PRESS OF
S. CHISM,—FRANKLIN PRINTING HOUSE,
HAWLEY ST., COR. FRANKLIN.

CONTENTS.

Agrarianism, 393

Bulls and Bears, 70, 189, 303, 403, 585, 710.

Bundle of Old Letters, A, 550.

Calculus, The Differential and Integral, 704.

Charge with Prince Rupert, A, 725.

Charles Lamb and Sydney Smith, 290.

Coffee and Tea, 35.

Did I ? 213.

El Llanero, 174.

Gymnasium, The, 529.

Holbein and the Dance of Death, 265.

Illustrious Obscure, The, 53.

In a Cellar, 151.

In the Pines, 560.

Juanita, 16.

Letter to a Dyspeptic, A, 465.

Lizzy Griswold's Thanksgiving, 282.

Men of the Sea, 44.

Mien-yaun, 671.

Minister's Wooing, The, 97, 219, 375, 504, 620, 749.

New Life of Dante, The, 62, 202, 330.

Odds and Ends from the Old World, 423.

Olympus and Asgard, 1.

Ought Women to Learn the Alphabet? 137.

Palfrey's and Arnold's Histories, 441.

Plea for the Fijians, A, 342.

Professor at the Breakfast-Table, The, 85, 232, 350, 492, 609, 760.

Roba di Roma, 454.

Shakspeare's Art, 657.

Smollett, Some Inedited Memorials of, 693.

Stereoscope and Stereograph, The, 738.

Trip to Cuba, A, 601, 686.

Two Sniffs, 429.

Utah Expedition, The, 361, 474, 570.

White's Shakspeare, 111, 241.

Why did the Governess Faint? 543.

Winter Birds, The, 319.

POETRY.

Achmed and his Mare, 289.

At Sea, 69.

Bloodroot, 703.

Chicadee, 52.

Double-Headed Snake of Newbury, The, 339.

Drifting, 452.

Hamlet at the Boston, 172.

Inscription for an Alms-Chest, 600.

Joy-Month, 685.

Last Bird, The, 569.

Left Behind, 33.

Morning Street, The, 150.

Our Skater Belle, 491.

Palm and the Pine, The, 230.

Philter, The, 212.

Prayer for Life, 419.

Sphinx, The, 724.

Spring, 737.

Two Years After, 548.

Walker of the Snow, The, 631.

Waterfall, The, 318.

REVIEWS AND LITERARY NOTICES.

Allibone's Dictionary of Authors, 775.

Arabian Days' Entertainments, 133.

Avenger, The, 773.

Bacon, The Works of, 514.

- Bitter-Sweet, 651.
 Bryant, Durand's Portrait of, 653.
 Bunsen's Gott in der Geschichte, 525.
 Colton's Illustrated Cabinet Atlas, 772.
 Courtship of Miles Standish, 129.
 Dexter's Street Thoughts, 646.
 Duyckinck's Life of George Herbert, 773.
 Emerson, Rowse's Portrait of, 653.
 Ernest Carroll, 136.
 Furness's Thoughts on the Life and Character of Jesus, 131.
 Hamilton's Lectures on Metaphysics, 774.
 Hymns of the Ages, 136.
 Index to Catalogue of Boston City Library, 777.
 Lytton, R. B., (Owen Meredith,) Poems by, 772.
 Mathematical Monthly, The, 647.
 Morgan's, Lady, Autobiography, 650.
 Mothers and Infants, Nurses and Nursing, 645.

VOL. III.—JANUARY, 1859.—NO. XV.

OLYMPUS AND ASGARD.

How remote from the nineteenth century of the Christian era lies the old Homeric world! By the magic of the Ionian minstrel's verse that world is still visible to the inner eye. Through the clouds and murk of twenty centuries and more, it is still possible to catch clear glimpses of it, as it lies there in the golden sunshine of the ancient days. A thousand objects nearer in the waste of past time are far more muffled, opaque, and impervious to vision. As you enter it through the gates of the "Ilias" and "Odusseia," you bid a glad adieu to the progress of the age, to railroads and telegraph-wires, to cotton-spinning, (there might have been some of that done, however, in some Nilotic Manchester or Lowell,) to the diffusion of knowledge and the rights of man and societies for the improvement of our race, to humanitarianism and philanthropy, to science and mechanics, to the printing-press and gunpowder, to industrialism, clipper-ships, power-looms, metaphysics, geology, observatories, light-houses, and a myriad other things too numerous for specification,—and you pass into a sunny region of glorious sensualism, where there are no obnoxious questionings of outward things, where there are no blank misgivings of a

creature moving about in worlds not realized, no morbid self-accusings of a morbid methodistic conscience. All there in that old world, lit "by the strong vertical light" of Homer's genius, is healthful, sharply-defined, tangible, definite, and sensualistic. Even the divine powers, the gods themselves, are almost visible to the eyes of their worshippers, as they revel in their mountain-propped halls on the far summits of many-peaked Olympus, or lean voluptuously from their celestial balconies and belvederes, soothed by the Apollonian lyre, the Heban nectar, and the fragrant incense, which reeks up in purple clouds from the shrines of windy Ilion, hollow Lacedæmon, Argos, Mycenæ, Athens, and the cities of the old Greek isles, with their shrine-capped headlands. The outlooks and watch-towers of the chief deities were all visible from the far streets and dwellings of their earthly worshippers, in that clear, shining, Grecian atmosphere. Uranography was then far better understood than geography, and the personages composing the heavenly synod were almost as definitely known to the Homeric men as their mortal acquaintances. The architect of the Olympian palaces was sur-named Amphiguëcis, or the Hail. The

Homeric gods were men divinized with imperishable frames, glorious and immortal sensualists, never visited by qualms of conscience, by headache, or remorse, or debility, or wrinkles, or dyspepsia, however deep their potations, however fiercely they indulged their appetites. Zeus, the Grand Seignior or Sultan of Olympus and father of gods and men, surpassed Turk and Mormon Elder in his uxoriousness and indiscriminate concubinage. With Olympian goddess and lone terrestrial nymph and deep-bosomed mortal lass of Hellas, the land of lovely women, as Homer calls it, did he pursue his countless intrigues, which he sometimes had the unblushing coolness and impudence to rehearse to his wedded wife, Herè. His *list* would have thrown Don Giovanni's entirely into the shade. Herè, the queen of Olympus, called the Golden-Throned, the Venerable, the Ox-Eyed, was a sort of celestial Queen Bess, the undaunted she-Tudor, whose father, bluff Harry, was not a bad human copy of Zeus himself, the Rejoicer in Thunder.

In that old Homeric heaven,—in those quiet seats of the gods of the heroic world, which were never shaken by storm-wind, nor lashed by the wintry tempest that raved far below round the dwellings of wretched mortals,—in those quiet abodes above the thunder, there was for the most part nought but festal joy, music, choral dances, and emptying of nectar-cups, interrupted now and then by descents into the low-lying region of human life in quest of adventure, or on errands of divine intervention in the affairs of men, for whom, on the whole, Zeus and his court entertained sentiments of profound contempt. Once in a while Zeus and all his courtiers went on a festal excursion to the land of the blameless Ethiops, which lay somewhere over the ocean, where they banqueted twelve days. Why such a special honor as this was shown to these Ethiops is not explained. Within their borders were evidently the summer resorts, Newport and Baden-Baden, frequented by the Olympians. Only in great crises was the

whole mythic host of the Grecian religion summoned to meet in full forum on the heights of the immemorial mountain. At such times, all the fountains, rivers, and groves of Hellas were emptied of their guardian dæmons, male and female, who hastened to pay their homage to and receive their orders from the Cloud-Gatherer, sitting on his throne, in his great skyey Capitolium, and invested with all the pomp of mythic majesty, his ambrosial locks smoothly combed and brushed by some Olympian *friseur*, his eagle perched with ruffled plumes upon his fist, and everything else so arranged as most forcibly to impress the country visitors and rural incumbents with salutary awe for the occupant of their sky-Vatican. Whether these last were compelled to salute the Jovine great toe with a kiss is not recorded, there being no account extant of the ceremonial and etiquette of Olympus. Whatever it was, doubtless it was rigidly enforced; for the Thunderer, it would seem, had a Bastile, or lock-up, with iron doors and a brazen threshold specially provided for contumacious and disobedient gods.

Zeus, although he could claim supreme dominion under the law of primogeniture, was originally only a coequal ruler with his two brothers, Hades, king of the underworld, and Ennosigæus, monarch of the salt sea-foam. They were alike the sons and coequal heirs of Kronos, or Time, and the Mæræ, or Destinies, had parcelled out the universe in three equal parts between them. But the position of Zeus in his serene air-realm gave him the advantage over his two brothers,—as the metropolitan situation of the Roman see in the capital of the world gave its diocesan, who was originally nothing more than the peer of the Bishops of Antioch, Alexandria, Carthage, and Constantinople, an opportunity finally to assert and maintain a spiritual lordship. This is a case exactly in point. It is certainly proper to illustrate a theocratic usurpation by an hierarchic one. Zeus, with his eagle and thunder and that earthquaking nod, was too strong for him of the trident and him

of the three-headed hound. The whole mythic host regarded Jove's court as a place of final resort, of ultimate appeal. He was recognized as the Supreme Father, Papa, or Pope, of the Greek mythic realm. The nod of his immortal head was decisive. His azure eyebrows and ambrosial hair were full of fate.

The wars of mortals in Hellas and Dardanland were matters of more interest to the Olympian celestials than any other mere human transactions. These occasioned partisanships, heartburnings, and factions in the otherwise serene Olympian palaces. Even Father Zeus himself acknowledged a bias for sacred Ilium and its king and people over all the cities of terrestrial men beneath the sun and starry heaven. In the ten-years' war at Troy, the Olympians were active partisans upon both sides at times, now screening their favorites from danger, and now even pitting themselves against combatants of more vulnerable flesh and blood. But in the matter of vulnerability they seem not to have enjoyed complete exemption, any more than did Milton's angels. Although they ate not bread nor drank wine, still there was in their veins a kind of ambrosial blood called *ichor*, which the prick of a javelin or spear would cause to flow freely. Even Ares, the genius of homicide and slaughter, was on one occasion at least wounded by a mortal antagonist, and sent out of the melee badly punished, so that he bellowed like a bull-calf, as he mounted on a dusty whirlwind to Olympus. Over his misadventures while playing his own favorite game certainly there were no tears to be shed; but when, prompted by motherly tenderness, Aphrodite, the soft power of love,—she of the Paphian boudoir, whose recesses were glowing with the breath of Sabæan frankincense fumed by a hundred altars,—she at whose approach the winds became lushed, and the clouds fled, and the dædal earth poured forth sweet flowers,—when such a presence manifested herself on the field of human strife on an errand of motherly affection, and attempted to screen her bleeding son from the shafts

of his foes with a fold of her shining *peplum*, surely the audacious Grecian king should have forborne, and, lowering his lance, should have turned his wrath elsewhere. But no,—he pierced her skin with his spear, so that, shrieking, she abandoned her child, and was driven, bleeding, to her immortal homestead. The rash earth-born warrior knew not that he who put his lance in rest against the immortals had but a short lease of life to live, and that his bairns would never run to lip their sire's return, nor climb his knees the envied kiss to share.

Homer, in the first books of his "*Iliad*," permits us to glance into the banquetting-hall of Olympus. The two regular pourers of nectar, to wit, Hebe and Ganymede, are off duty. Hephestus the Cripple has taken their place; and as he halts about from guest to guest, inextinguishable laughter arises among the gods at his awkward method of "passing the rosy." His lameness was owing to that sunset fall on the isle of Lemnos from the threshold of heaven. So, all day long, says the poet, they revelled, Apollo and the Muses performing the part of a ballet-troop. It is pleasing to learn that the Olympians kept early hours, conforming, in this respect, to the rule of Poor Richard. Duly at set of sun they betook themselves to their couches. Zeus himself slept, and by his side Herè of the Golden Throne.

Who would wish to have lived a pagan under that old Olympian dispensation, even though, like the dark-eyed Greek of the Atreidean age, his fancy could have "fetched from the blazing chariot of the Sun a beardless youth who touched a golden lyre and filled the illumined groves with ravishment"?—even though, like him, he might in myrtle-grove and lonely mountain-glen have had favors granted him even by Idalian Aphrodite the Beautiful, and felt her warm breath glowing upon his forehead, or been counselled by the blue-eyed Athene, or been elevated to ample rule by Herè herself, Heaven's queen? That Greek heaven was heartless, libidinous, and cold. It

had no mild divinities appointed to bind up the broken heart and assuage the grief of the mourner. The weary and the heavy-laden had no celestial resource amongst its immortal revellers and libertines, male and female. There was no sympathy for mortal suffering amongst those divine sensualists. They talked with contempt and unsympathizing ridicule of the woes of the earthborn, of the brevity of mortal life, and of its miseries. A boon, indeed, and a grateful exchange, was the Mother Mild of the Roman Catholic Pantheon, the patroness of the broken-hearted, who inclines her countenance graciously to the petitions of womanly anguish, for the voluptuous Aphrodite, the haughty Juno, the Di-Vernonish Artemis, and the lewd and wanton nymphs of forest, mountain, ocean, lake, and river. Ceres alone, of the old female classic dæmons, seemed to be endowed with a truly womanly tenderness and regard for humankind. She, like the Mater Dolorosa, is represented in the myths to have known bereavement and sorrow, and she, therefore, could sympathize with the grief of mothers sprung from Pyrrha's stem. Nay, she had envied them their mortality, which enabled them to join their lost ones, who could not come back to them, in the grave. Vainly she sought to descend into the dark underworld to see her "young Persephone, transcendent queen of shades." Not for her weary, wandering feet was a single one of the thousand paths that lead downward to death. Her only consolation was in the vernal flowers, which, springing from the dark earthly mould, seemed to her to be

"heralds from the dreary deep,
Soft voices from the solemn streams,"

by whose shores, veiled in eternal twilight, wandered her sad child, the queen of the realm of Dis, with its nine-fold river, gates of adamant, and minarets of fire. The heartlessness of all the ethnic deities, of whatever age or nation, is a noticeable feature, especially when contrasted with the unfathomable pity of their Exterminator, who wept over the

chief city of his fatherland, and would have gathered it, as a hen gathereth her chickens, under the wings of his love, though its sons were seeking to compass his destruction. Those old ethnic deities were cruel, inexorable, and relentless. They knew nothing of mercy and forgiveness. They ministered no balm to human sorrow. The dæmons who wandered in human shape over the classic lands of old were all fickle and malevolent. They oftentimes impelled their victims to suicide. The ghouls that haunt the tombs and waste places of the regions where they were once worshipped are their lineal descendants and modern representatives. The vampires and pesthags of the Levant are their successors in malignity. The fair humanities of the old religion were fair only in shape and exterior. The old pagan gods were friendly only to kings, heroes, and grantees; they had no beatitude for the poor and lowly. Human despair, under their dispensation, knew no alleviation but a plunge from light and life into the underworld,—rather than be monarch of which, the shade of Achilles averts, in the "Oduscia," that it would prefer to be the hireling and drudge of some poor earthly peasant. Elysium was only for a privileged few.

It has been said that the old ethnic creeds were the true religion "growing wild,"—that the human soil was prepared by such kind of spiritual crops and outgrowths, with their tares and weeds intermingled with wheat, for the seed that was finally to be sown by the Divine Sower,—that, erroneous as they were in a thousand respects, they were genuine emanations of the religious nature in man, and as such not to be stigmatized or harshly characterized,—that without them the human soil could not have been made ready for the crop of unmixed truth. This may be true of some of them, though surely not of the popular form of the old Greek ethnic faith. Its deities were nothing better than the passions of human nature projected upon ethereal heights, and incarnated and

made personal in undecaying dæmonic shapes,—not conditioned and straitened like the bodies of man, but enjoying perpetual youth and immunity from death in most cases, with permission to take liberties with Space and Time greater even than are granted to us by steam and telegraph-wires.

The vulgar Grecian polytheism was all material. It had no martyrs and confessors. It was not worth dying for, as it was good for nothing to live by. The religion of Hellas was the religion of sensualistic beauty simply. It was just the worship for Pheidias and Praxiteles, for the bard of Teos and the soft Catullus, for sensual poet, painter, and sculptor. But "the blind old man of Scio's rocky isle," although we gather most of our knowledge of Olympus and the Olympians from his verse, was worthy of a loftier and purer heaven than the low one under which he wandered from city to city, singing the tale of Troy divine, and hymns and pæans to the gods. The good and the true were mere metaphysical abstractions to the old Greek. What must he have been when it would not have been safe for him to leave his wife alone with the best and highest of his gods? The ancient Hellenes were morally most vicious and depraved, even when compared with contemporary heathen nations. The old Greek was large in brain, but not in heart. He had created his gods in his own image, and they were—what they were. There was no goodness in his religion, and we can tolerate it only as it is developed in the Homeric rhapsodies, in the far-off fable-time of the old world, and amongst men who were but partially self-conscious. In that remote Homeric epoch it is tolerable, when cattle-stealing and war were the chief employments of the ruling caste,—and we may add, woman-stealing, into the bargain. "I did not come to fight against the Trojans," says Achilles, "because I had suffered any grievance at their hands. They never drove off my oxen and horses or stole my harvests in rich-soiled Phthia, the nurse of heroes; for vale-darkening

mountains and a tumultuous sea separate us."

Into that old Homeric world we enter through the portals of the "Ilias" and "Odusseia," and see the peaks of Olympus shining afar off in white splendor like silvery clouds, not looking for or expecting either a loftier or a purer heaven. Somewhere on the bounds of the dim ocean-world we know that there is an exiled court, a faded sort of St. Germain celestial dynasty, geologic gods, coevals of the old Silurian strata,—to wit, Kronos, Rhea, Nox, *et al.* Here these old, unseptred, disrowned, and sky-fallen potentates "cogitate in their watery ooze," and in "the shady sadness of vales,"—sometimes visited by their successors for counsel or concealment, or for the purpose of establishing harmony amongst them. The Sleep and Death of the Homeric mythology were naturally gentle divinities,—sometimes lifting the slain warrior from the field of his fame, and bearing him softly through the air to his home and weeping kindred. This was a gracious office. The saintly legends of the Roman Church have borrowed a hint from this old Homeric fancy. One pleasant feature of the Homeric battles is, that, when some blameless, great-souled champion falls, the blind old bard interrupts the performances for a moment and takes his reader with him away from the din and shouting of the battle, following, as it were, the spirit of the fallen hero to his distant abode, where sit his old father, his spouse, and children,—thus throwing across the cloud of battle a sweet gleam of domestic, pastoral life, to relieve its gloom. Homer, both in the "Ilias" and "Odusseia," gives his readers frequent glimpses into the halls of Olympus; for messengers are continually flashing to and fro, like meteors, between the throne of Zeus and the earth. Sometimes it is Hermes sandalled with down; sometimes it is wind-footed Iris, who is winged with the emerald plumes of the rainbow; and sometimes it is Oneiros, or a Dream, that glides down to earth, hooded and veiled, through the shadow of

night, bearing the behests of Jove. But however often we are permitted to return to the ambrosial homestead of the ever-living gods in the wake of returning messengers, we always find it the same calm region, lifted far up above the turbulence, the perturbations, the clouds and storms of

"That low spot which men call earth,"
—a glorious aerial Sans-Souci and house of pleasure.

It is curious that the atheistic Lucretius has given us a most glowing description of the Olympian mansions; but perhaps the Olympus of the Epicurean poet and philosopher is somewhat higher up and more sublimated and etherealized than the Olympus of Homer and of the popular faith. In a flash of poetic inspiration, he says, "The walls of the universe are cloven. I see through the void inane. The splendor (*numen*) of the gods appears, and the quiet seats which are not shaken by storm-winds nor aspersed by rain-clouds; nor does the whitely falling snow-flake, with its hoar rime, violate *their summery warmth*, but an ever-cloudless ether laughs above them with widespread radiance." Lucretius had all these lineaments of his Epicurean heaven from old Homer. They are scattered up and down the "*Ilias*" and "*Odusseia*" in the shape of *disjecta membra*. For instance, the Olympus which he beholds through a chasm in the walls of the universe, towering into the pure empyrean, has some of the features of Homer's island Elysium, the blissful abodes of mortal heroes who have been divinized or translated. The Celtic island-valley of Avalon, the abode of King Arthur, "with its orchard-lawns and bowery hollows," so exquisitely alluded to by Tennyson, is a kindred spot with the Homeric Elysian plain. Emerson says, "The race of gods, or those we erring own, are shadows floating up and down in the still abodes." This is exactly the meaning of Lucretius also. They are all air-cities, these seats of the celestials, whatever be the creed,—summery, ethereal climes, fanned with spice-winds and zephyrs. Meru, Kaf,

Olympus, Elboorz,—they are all alike. The ethnic superior daemons were well termed the powers of the air. Upward into the far blue gazes the weary and longing saint and devotee of every faith. Beyond the azure curtains of the sky, upward into the pure realm, over the rain-cloud and the thunder and the silver bars of the scirrhous, he places his quiet seats, his mansions of rest.

The German poet, Schiller, who was a worshipper of Art and sensualistic beauty, and who regarded the sciences as the mere handmaids of Art, exalting the æsthetic above the moral nature in man, quite naturally regretted that he had not lived in the palmy days of the anthropomorphic creed of Hellas, before the dirge of Pan was chanted in the Isle of Naxos. His "*Gods of Greek Land*" is as fine a piece of heathenish longing as could well be written at so late a day. His heart was evidently far away from the century in which he lived, and pulsed under that distant Grecian sky of which he somewhere speaks. For artistic purposes the myths of Greece formed a glorious faith. Grace and symmetry of form were theirs, and they satiated the eye with outward loveliness; but to the deep fountains of feeling and sentiment, such as a higher faith has unsealed in the heart, they never penetrated. What a poor, narrow little world was that myth-haunted one of the Grecian poet and sculptor, and even philosopher, compared with the actual world which modern science is revealing from year to year! What a puny affair was that Grecian sun, with its coachman's apparatus of reins, fire-breathing nags, and golden car, which Schiller looks back to, in the spirit of Mr. Weller, Senior, when compared with the vast empyreal sphere and light-fountain of modern science, with its retinue of planets, ships of space, freighted with souls! Science the handmaid of Art! Well might the mere artist and worshipper of anthropomorphic beauty shrink appalled, and sigh for a lodge under some low Grecian heaven and in the bosom of some old myth-peopled Nature,

as he trembled before the apocalypses of modern sidereal science, which has dropped its plummet to unimaginable depths through the nebulous abysses of space, shoaled with systems of worlds as the sea is with its finny droves. The Nature and the Physical Universe of the old ethnic Greek formed only a little niche and recess, on the walls of which the puny human image was easily reflected in beautiful and picturesque and grotesque shadows, which were mistaken for gods. But the Nature and Universe revealed by modern Christian science are too vast and profound to mirror anything short of the image of the Omnipotent himself.

Still there is a period in the life of every imaginative youth, when he is a pagan and worships in the old Homeric pantheon,—where self-denial and penance were unknown, and where in grove and glen favored mortal lover might hear the tread of “Aphrodite’s glowing sandal.” The youthful poet may exclaim with Schiller,—

“Art thou, fair world, no more?

Return, thou virgin-bloom on Nature’s face!

Ah, only on the minstrel’s magic shore

Can we the footstep of sweet Fable trace!

The meadows mourn for the old hallowing life;

Vainly we search the earth of gods bereft;

Where once the warm and living shapes were rife,

Shadows alone are left!

Cold, from the North, has gone

Over the flowers the blast that chilled their May;

And, to enrich the worship of the One,

A universe of gods must pass away!

Mourning, I search on yonder starry steeps,

But thee, no more, Selene, there I see!

And through the woods I call, and o’er the deeps,

And—Echo answers me.”*

The Elysian beauty and melancholy grace which Wordsworth throws over the shade of Alcestis were gleams borrowed from a better world than the mythic Elysium. Neither Olympus nor Erebus disdained the pleasures of sense.

Shakspeare, in his “Midsummer-Night’s Dream,” has mingled the mythologies

* Bulwer’s Translation.

of Hellas and Scandinavia, of the North and the South, making of them a sort of mythic *olla podrida*. He represents the tiny elves and fays of the Gothic fairy-land, span-long creatures of dew and moonshine, the lieges of King Oberon, and of Titania, his queen, as making an irruption from their haunted hillocks, woods, meres, meadows, and fountains, in the North, into the olive-groves of Ilissus, and dancing their ringlets in the ray of the Grecian Selene, the chaste, cold huntress, and running by the triple Hecate’s team, following the shadow of Night round the earth. Strangely must have sounded the horns of the Northern Elfland, “faintly blowing” in the woods of Hellas, as Oberon and his grotesque court glanced along, “with bit and bridle ringing,” to bless the nuptials of Theseus with the bouncing Amazon. Strangely must have looked the elfin footprints in the Attic green. Across this Shakspearean plank, laid between Olympus and Asgard, or more strictly Alfheim, we gladly pass from the sunny realm of Zeus into that of his Northern counterpart, Odin, who ought to be dearer and more familiar to his descendants than the Grecian Jove, though he is not. The forms, which throng Asgard may not be so sculpturesquely beautiful, so definite, and fit to be copied in marble and bronze as those of Olympus. There may be more vagueness of outline in the Scandinavian abode of the gods, as of far-off blue skyey shapes, but it is more cheerful and homelike. Pleasantly wave the evergreen boughs of the Life-Tree, Yggdrasil, the mythic ash-tree of the old North, whose leaves are green with an unwithering bloom that shall defy even the fires of the final conflagration. Iduna, or Spring, sits in those boughs with her apples of rejuvenescence, restoring the wasted strength of the gods. In the shade of its topmost branches stands Asgard, the abode of the Asen, who are called the Rasters of the World,—to wit, Odin, Thor, Freir, and the other higher powers, male and female, of the old Teutonic religion. In Asgard is Valhalla, the

hall of elect heroes. The roots of this mundane ash reach as far downwards as its branches do upwards. Its roots, trunk, and branches together thrird the universe, shooting Hela, the kingdom of death, Midgard, the abode of men, and Asgard, the dwelling of the gods, like so many concentric rings.

This ash was a psychological and ontological plant. All the lore of Plato and Kant and Fichte and Cousin was audible in the sigh of its branches. Three Norns, Urt, Urgand, and Skuld, dwelt beneath it, so that it comprehended time past, present, and future. The gods held their councils beneath it. By one of its stems murmured the Fountain of Mimir, in Nifheim or Mistland, from whose urn welled up the ocean and the rivers of the earth. Odin had his outlook in its top, where kept watch and ward the All-seeing Eye. In its boughs frisked and gambolled a squirrel called *Busybudy*, which carried gossip from bough to root and back. The warm Urdar Fountain of the South, in which swam the sun and moon in the shape of two swans, flowed by its celestial stem in Asgard. A tree so much extended as this ash of course had its parasites and *rodentia* clinging to it and gnawing it; but the brave old ash defied them all, and is to wave its skywide umbrage even over the ruins of the universe, after the *dies iræ* shall have passed. So sings the Voluspa. This tree is a worthy type of the Teutonic race, so green, so vigorous, so all-embracing. We should expect to find the chief object in the Northern myth-world a tree. The forest was ever dear to the sons of the North, and many ancient Northern tribes used to hold their councils and parliaments under the branches of some wide-spreading oak or ash. Like its type, Yggdrasil, the Teutonic race seems to be threading the earth with the roots of universal dominion, and, true to hereditary instincts, it is belting the globe with its colonies, planting it, as it were, with slips from the great Mundane Ash, and throwing Bifröst bridges across oceans, in the shape of telegraph-cables and steamships.

Asgard is a more homelike place than Olympus. Home and fireside, in their true sense, are Teutonic institutions. Valhalla, the hall of elect heroes, was appropriately shingled with golden shields. Guzzlers of ale and drinkers of *lager-bier* will be pleased to learn that this Northern Valhalla was a sort of celestial beer-saloon, thus showing that it was a genuine Teutonic paradise; for ale would surely be found in such a region. In the "Prose Edda," Hor replies to Gangler—who is asking him about the board and lodgings of the heroes who had gone to Odin in Valhalla, and whether they had anything but water to drink—in huge disdain, inquiring of Gangler whether he supposed that the Allfather would invite kings and jarls and other great men, and give them nothing to drink but water. How do things divine and supernatural, when conceived of by man and cast in an earthly, finite mould, necessarily assume human attributes and characteristics! Strong drinks, the passion of the Northern races in all ages, are of course found in their old mythic heaven, in their fabled Hereafter,—and even boar's flesh also. The ancient Teuton could not have endured a heaven with mere airy, unsubstantial joys. There must be celestial roasts of strong meat for him, and flagons of his ancestral ale. His descendants to this day never celebrate a great occasion without a huge feed and corporation dinners, thus establishing their legitimate descent from Teutonic stock. The Teutonic man ever led a life of vigorous action; hence his keen appetite, whetted by the cold blasts of his native North. What wonder, then, at the presence of sodden boar's flesh in his ancient Elysium, and of a celestial goat whose teats yielded a strong beverage? The Teuton liked not fasting and humiliation either in Midgard or Asgard. He was ever carnivorous and cupeptic. We New Englanders are perhaps the leanest of his descendants, because we have forsaken too much the old ways and habits of the race, and given ourselves too much to abstractions and transcendentalism. The old Teuton

abhorred the abstract. He loved the concrete, the substantial. The races of Southern Europe, what are now called the Latin races, were more temperate than the Teutonic, but they were far less brave, honest, and manly. Their sensuality might not be so boisterous, but it was more bestial and foul. Strength and manliness, and a blithe, cheery spirit, were ever the badges of the Teuton. But though originally gross and rough, he was capable of a smoother polish, of a glossier enamel, than a more superficial, trivial nature. He was ever deeply thoughtful, and capable of profounder moods of meditation than the lightly-moved children of the South. Sighs, as from the boughs of Yggdrasil, ever breathed through his poetry from of old. He was a smith, an artificer, and a delver in mines from the beginning. The old Teutonic Pan was far more musical and awe-inspiring than his Grecian counterpart. The Noon-spirit of the North was more wild than that of the South. How all the ancient North was alive in its Troll-haunted hillocks, where clanged the anvil of the faëry hill-smith, and danced and banqueted the Gnome and Troll,—and in its streams and springs, musical with the harps of moist-haired Elle-women and mermaids, who, ethnic dæmons though they were, yet cherished a hope of salvation! The myth-spirits of the North were more homely and domestic than those of the South, and had a broader humor and livelier fancies. The Northern Elf-folk were true natives of the soil, grotesque in costume and shape.

The Teuton of to-day is the lineal descendant of the old worshipper of Thor. Miöllnir, the hammer of Thor, still survives in the gigantic mechanisms of Watt, Fulton, and Stephenson. Thor embodied more Teutonic attributes than Odin. The feats which Thor performed in that strange city of Utgard, as they are related in the old "*Prose Edda*," were prophetic of the future achievements of the race, of which he was a chief god. Thor once went on a journey to Jötunheim, or Giant-land,—a primitive outlying coun-

try, full of the enemies of the Asgard dynasty, or cosmical deities. In the course of the journey, he lodged one night with his two companions in what he supposed to be a huge hall, but which turned out to be the glove of a giant named Skrymir, who was asleep and snoring as loud as an earthquake, near by. When the giant awoke, he said to Thor, who stood near,—"My name is Skrymir, but I need not ask thy name, for I know that thou art the god Thor. But what hast thou done with my glove?" Sure enough, on looking, Thor found that he had put up that night in Skrymir's handshoe, or glove. The giant and Thor breakfasted amicably together and went on their way till night, when Skrymir gave up his wallet of provisions to Thor and his two companions, and bade them supply themselves,—he meanwhile composing himself to sleep, snoring so loudly that the forest trembled. Thor could not undo the giant's wallet, and in his wrath he smote the somnolent lubber with his mallet, a crushing blow. Skrymir simply awoke, and inquired whether a leaf had not fallen upon his head from the oak-tree under which he was lying. Conceive the chagrin and shame of Thor at this question! A second time Thor let fly at the giant with his mallet. This time it sank into his skull up to the handle, but with no more satisfactory result. The giant merely inquired whether an acorn had not dropped on his head, and wanted to know how Thor found himself, whether he slept well or not; to which queries Thor muttered an answer, and went away, determined to make a third and final effort with his mallet, which had never failed him until then. About daybreak, as Skrymir was taking his last snooze, Thor uplifted his hammer, clutching it so fiercely that his knuckles became white. Down it came, with terrific emphasis, crushing through Skrymir's cheek, up to the handle. Skrymir sat up and inquired if there were not birds perched on the tree under which he had been lodging; he thought he felt something dropping on his head,—some

moss belike. Alas for Thor and his weapon! For once he found himself worsted, and his mightiest efforts regarded as mere flea-bites; for Skrymir's talk about leaves and acorns and moss was merely a sly piece of humor, levelled at poor crestfallen Thor, as he afterwards acknowledged. After this incident, Thor and his two companions, the peasant's children, Thjalfi and Röska, and Skrymir went their ways, and came to the high-gated city of Utgard, which stood in the middle of a plain, and was so lofty that Thor had to throw back his head to see its pinnacles and domes. Now Thor was by no means small; indeed, in Asgard, the city of the Æsir, he was regarded as a giant; but here in Utgard Skrymir told him he had better not give himself any airs, for the people of that city would not tolerate any assumption on the part of such a mannikin!

Utgard-Loki, the king of the city, received Thor with the utmost disdain, calling him a stripling, and asked him contemptuously what he could do. Thor professed himself ready for a drinking-match. Whereupon Utgard-Loki bade his cup-bearer bring the large horn which his courtiers had to drain at a single draught, when they had broken any of the established rules and regulations of his palace. Thor was thirsty, and thought he could manage the horn without difficulty, although it was somewhat of the largest. After a long, deep, and breathless pull which he designed as a finisher, he set the horn down and found that the liquor was not perceptibly lowered. Again he tried, with no better result; and a third time, full of wrath and chagrin, he guzzled at its contents, but found that the liquor still foamed near to the brim. He gave back the horn in disgust. Then Utgard-Loki proposed to him the childish exercise of lifting his cat. Thor put his hands under Tabby's belly, and, lifting with all his might, could only raise one foot from the floor. He was a very Gulliver in Brobdingnag. As a last resort, he proposed to retrieve his

tarnished reputation by wrestling with some Utgardian; whereupon the king turned into the ring his old nurse, Elli, a poor toothless crone, who brought Thor to his knees, and would have thrown him, had not the king interfered. Poor Thor! The next morning he took breakfast in a sad state of mind, and owned himself a shamefully used-up individual. The fact was, he had strayed unconsciously amongst the old brute powers of primitive Nature, as he ought to have perceived by the size of the kids they wore. He had done better than he was aware of, however. The three blows of his hammer had fallen on nothing less than a huge mountain, instead of a giant, and left three deep glens dented into its surface; the drinking-horn, which he had undertaken to empty, was the sea itself, or an outlet of the sea, which he had perceptibly lowered; while the cat was in reality the Midgard Serpent, which enringed the world in its coils, and the toothless she-wrestler was Old Age! What wonder that Thor was brought to his knees? On finding himself thus made game of, Thor grew wroth, but had to go his ways, as the city of Utgard had vanished into thin air, with its cloud-capped towers and enormous citizens. Thor afterwards undertook to catch the Midgard Serpent, using a bull's head for bait. The World-Snake took the delicious morsel greedily, and, finding itself hooked, writhed and struggled so that Thor thrust his feet through the bottom of his boat, in his endeavors to land his prey.

There is a certain grotesque humor in Thor's adventures, which is missed in his mythologic counterpart of the South, Hercules. It is the old rich "world-humor" of the North, genial and broad, which still lives in the creations of the later Teutonic Muse. The dints which Thor made on the mountain-skull of Skrymir were types and forerunners of the later feats of the Teutonic race, performed on the rough, shaggy, wilderness face of this Western hemisphere, channelling it with watery highways, tunnelling and levelling its

mountains, and strewing its surface with cities. The old Eddas and Voluspas of the North are full of significant lore for the sons of the Northmen, wherever their lot is cast. There they will find, that, in colonizing and humanizing the face of the world, in zoning it with railroads and telegraph-wires, in bridging its oceans with clipper-ships and steamboats, and in weaving, forging, and fabricating for it amid the clang of iron mechanisms, they are only following out the original bent of the race, and travelling in the wake of Thor the Hammerer.

While the Grecian and Roman myths are made familiar by our school-books, it is to be regretted that the wild and glorious mythic lore of our ancient kindred is neglected. To that you must go, if you would learn whence came

"the German's inward sight,
And slow-sure Britain's secular might,"

and it may be added, the Anglo-American's unsurpassed practical energy, skill, and invincible love of freedom. From the fountains of the ash-tree Yggdrasil flowed these things. Some of the greatest of modern Teutonic writers have gone back to these fountains, flowing in these wild mythic wastes of the Past, and have drunk inspiration thence. Percy, Scott, and Carlyle, by so doing, have infused new sap from the old life-tree of their race into our modern English literature, which had grown effete and stale from having had its veins injected with too much cold, thin, watery Gallic fluid. Yes, Walter Scott heard the innumerable leafy sigh of Yggdrasil's branches, and modulated his harp thereby. Carlyle, too, has bathed in the three mystic fountains which flow fast by its roots. In an especial manner has the German branch of the Teuton kindred turned back to those old musical well-springs bubbling up in the dim North, and they have been strengthened and inspired by the pilgrimage. Under the root, which stretches out towards the Jötuns, there is Mimir's Well, in which Wisdom and Wit

lie hidden." Longfellow, too, has drunk of Mimir's Well, and hence the rare charm and witchery of his "Evangeline," "Hiawatha," and "Golden Legend." This well in the North is better than Castalian fount for the children of the North.

How much more genial and lovable is Balder, the Northern Sun-god, than his Grecian counterpart, the lord of the unerring bow, the Southern genius of light, and poesy, and music! Balder dwelt in his palace of Breidablick, or Broadview; and in the magical spring-time of the North, when the fair maiden Iduna breathed into the blue air her genial breath, he set imprisoned Nature free, and filled the sky with silvery haze, and called home the stork and crane, summoning forth the tender buds, and clothing the bare branches with delicate green. "Balder is the mildest, the wisest, and the most eloquent of all the Æsir," says the "Edda." A voice of wail went through the palaces of Asgard when Balder was slain by the mistletoe dart. Hermod rode down to the kingdom of Hela, or Death, to ransom the lost one. Meantime his body was set adrift on a floating funeral pyre. Hermod would have succeeded in his mission, had not Lok, the Spirit of Evil, interposed to thwart him. For this, Lok was bound in prison, with cords made of the twisted intestines of one of his own sons; and he will remain imprisoned until the Twilight of the Gods, the consummation of all things.

On the shoulders of Odin, the supreme Scandinavian deity, sat two ravens, whispering in his ears. These two ravens are called Hugin and Munin, or Thought and Memory. These "stately ravens of the saintly days of yore" flew, each day, all over the world, gathering "facts and figures," doubtless for their august master. It is a beautiful fable, and reminds one of Milton's "thoughts which wander through eternity." The dove of the Ark, and the bird which perched on the shoulder of the old Plutarchan hero Sertorius, are recalled by this Scandinavian legend:—

"Hugin and Munin
Each down take their flight
Earth's fields over."

Nobler birds, these dark ravens of the Northern Jove, than the bolt-bearing eagle of his Grecian brother. So much deeper, more significant, and musical are the myths of the stern, dark, and tender North than those of the bright and fickle South!

Notwithstanding that Valhalla was full of invincible heroes, and that the celestial city of Asgard was the abode of the chief gods, still it had a watchman who dwelt in a tower at the end of the Bridge Bifröst. Heimdall was his name, and he was endowed with the sharpest ear and eye that ever warder possessed. He could hear grass and wool grow with the utmost distinctness. The Æsir, notwithstanding their supreme position, had need of such a warder, with his Gjallar-horn, mightier than the Paladin Astolfo's, that could make the universe reëcho to its blast. The truth was, over even the high gods of Asgard hung a Doom which was mightier than they. It was necessary for them to keep watch and ward, therefore, for evil things were on their trail. There were vast, mysterious, outlying regions beyond their sway: Niflheim or Mistland, Muspellheim or Flameland, and Jötunheim, the abode of the old earth-powers, matched with whom, even Thor, the strongest of the Asen, was but a puny stripling. Over this old Scandinavian heaven, as over all ethnic celestial abodes, the dark Destinies lorded it with unquestioned sway. From the four corners of the world, at last, were to fly the snow-flakes of the dread Fimbul, Winter, blotting the sun, and moaning and drifting night and day. Three times was Winter to come and go, bringing to men and gods "a storm-age, a wolf-age." Then cometh Ragnarök, the Twilight of the Gods! Odin mounts his war-steed. The vast ash Yggdrasil begins to shiver through all its height. The beatified heroes of Valhalla, who have ever been on the watch for this dread era, issue forth full of the

old dauntless spirit of the North to meet the dread agents of darkness and doom. Garm, the Moonhound, breaks loose, and bays. "High bloweth Heimdall his horn aloft. Odin counselleth Mimir's head." The battle joins. In short, the fiery baptism prophesied in the dark scrolls of Stoic sage and Hebrew and Scandinavian scald alike wraps the universe. The dwarfs wail in their mountain-clefts. All is uproar and hissing conflagration.

"Dimmed's now the sun;
In ocean earth sinks;
From the skies are cast
The sparkling stars;
Fire-reek rageth
Around Time's nurse,
And flickering flames
With heaven itself shall play."

By "Time's nurse," in the foregoing lines from the "Voluspa," is meant the Mundane Tree Yggdrasil, which shall survive unscathed, and wave mournfully over the universal wreck. But in the "Edda" Hor tells Gangler that "another earth shall appear, most lovely and verdant, with pleasant fields, where the grain shall grow unsovn. Vidar and Vali shall survive. They shall dwell on the Plain of Ida, where Asgard formerly stood. Thither shall come the sons of Thor, bringing with them their father's mallet. Baldur and Hödur shall also repair thither from the abode of Death. There shall they sit and converse together, and call to mind their former knowledge and the perils they underwent."

Perhaps we might give the Eddaic Twilight of the Gods a more human and strictly European interpretation. May it not also foreshadow the great Armageddon struggle which is evidently impending between the Teutonic races in Western Europe, with their Protestantism, free speech, individual liberty, right of private judgment, and scorn of all thralldom, both material and mental, on the one side, and the dark powers of absolutism, repression, and irresponsible authority in church and state, on the other? How Russia, the type of brute-force, presses with crushing weight on in-

tellectual Germany! Soon she will absorb the old kingdoms of Scandinavia,—to wit, Sweden, Norway, and Denmark. On the shores of Norway the ruler of the Slavonic race will hang over Scotland and England, like a bird of prey about to swoop upon his victim. All despots and absolutists will array themselves under his banner or be his auxiliaries. The old hierarchies will be banded with him to crush out Protestantism, which is a plant of Teutonic growth. Old Asia, with her rancor and despotic traditions, recognizes in the Russian imperial rule a congenial rallying-point against the progressive and hated Anglo-Saxonism and Protestantism of the West. A decisive struggle is surely impending between freedom and absolutism, between the bigoted adherents of the old faiths and the nations that have cut loose from them. Perhaps this struggle may be prefigured in the old Northern myth of the Twilight of the Gods.

All the old mythic cosmogonies are strangely suggestive and full of mystic import,—that of Northern Odinism more than any other. In that dim Nifheim, for instance, with its well-springs of the waters of the upper world confusedly bubbling, and its metallic ore-veins, and dusk, vaporous atmosphere, whence issued the old Nibelungen heroes of the great Teutonic epos, there is much that is suggestive. May not one discover in this old cosmogonic myth a dim hint of the nebular hypothesis of creation, as it is called? Certainly, Nifheim, the Mistland, and Muspellheim, the Flameland, commingled together, would produce that hot, seething, nebulous fire-mist, out of which, the physicists say, was evolved, by agglomeration and centrifugal and centripetal attraction, our fair, harmonious system of worlds bounded by outermost Neptune, thus far the Ultima Thule of the solar system. Perhaps Asgard, translated from mythic into scientific language, means the Zodiacal Light, and the Bridge Bifröst, the Milky Way.

How curious, to trace in the grotesque mythic cosmogonies of India, Greece, and

Scandinavia, modern geology, botany, chemistry, etc.,—the vast and brutal giants of the Eddas and other old mythic scriptures being recognized as impersonations of the forces of Nature! The old mythic cosmogonists and the modern geologists and astronomers do not differ amongst themselves so much, after all. The mythic physicists had personal agents at work, in place of our simple elemental ones; the result is the same. Take the mythic cosmogonies of ancient Greece, Scandinavia, and India, and the geologies and astronomies of the present day, and compare their pages, changing things personal into things impersonal. The expulsion and banishment of the old shapeless mundane deities by a new and more beautiful race of gods, the cosmical divinities, the powers and rulers of an ordered world, are intelligible enough when translated into our modern geological nomenclature. The leaves of the Stone Book, as the rocky layers of the earth have been called, and the blue hieroglyphic page of heaven, also, are more intelligibly read by the aid of the mythic glosses of old religion, of Saga, Rune, and Voluspa. They spell the telluric records aright in their own peculiar language. The assaults of the Typhons and Jötuns upon the celestial dynasty, and their attempts to scale the fiery citadels of the gods by making ladders of mountains, indicate clearly enough the different revolutions read by geology in the various strata and rocky layers piled upon the primitive granite of the globe, the bursting through of eruptions from the central fire, extruding and uplifting mountains, and the subsidence of the ocean from one ripple-marked sea-beach to another lower down. In those dim geologic epochs, where annals are written on Mica Slate, Clay Slate, and Silurian Systems, on Old Red Sandstones and New, on Primary and Secondary Rocks and Tertiary Chalkbeds, there were topsy-turvyings amongst the hills and gambollings and skipplings of mountains, to which the piling of Pelion upon Ossa was a mere cobblestone feat. Alps and Apennines then

played at leap-frog. Vast basaltic masses were oftentimes extruded into the astonished air from the very heart and core of the world. In truth, the old mythic cosmogonies of the ancient East, South, and North are not a whit too grotesque in their descriptions of the embryo earth, when it lay weltering in a sort of uterine film, assuming form and regular lineaments.

There is nothing more drear, monstrous, wild, dark, and lonely in the descriptions of the mythologic than of the scientific page. What more wild and drear is there, even in Indian cosmogonic fable, than that strange carbonigenous era of the globe, whose deposits, in the shape of petrified forests, now keep us warm and cook our food, and whose relics and souvenirs are pressed between the stone leaves of the secondary rock for preservation by the Omnipotent Herbalist? Land and water were then distinguishable,—but as yet there was no terrestrial animal, nothing organic but radiata and molluscs, belly-footed and head-footed, and other aquatic monstrosities, mailed, plated, and buckler-headed, casting the shovel-nosed shark of the present Cosmos entirely into the shade, in point of horned, toothed, and serrated horrors. These amorphous creatures glided about in the seas, and vast sea-worms, or centipedal asps, the parents of modern krakens and sea-serpents, doubtless, accompanied them. There stood that unfinished world reeking with charcoal fumes, its soft, fungous, cryptogamic vegetation efflorescing with fierce luxuriance in that ghastly carbonic atmosphere. Rudimental palms and pines of mushroom growth stood there motionless, sending forth no soft and soul-like murmurs into the lurid reek; for as yet leaves and flowers and blue skies and pure breezes were not,—nothing but whiffs of mephitic and lethal vapor ascending, as from a vast charcoal brazier. No lark or linnet or redbreast or mocking-bird could live, much less warble, in those carbonic times. The world, like a Mississippi steamer, was coaling, with an eye

to the needs of its future biped passengers. The embryotic earth was then truly a Niflheim, or Mistland,—a dun, fuming region. Those were the days, perhaps, when Nox reigned, and the great mundane egg was hatching in the oven-like heat, from which the winged boy Eros leaped forth, “his back glittering with golden plumes, and swift as eddying air.” We have it on good authority, that the Adirondack Mountains of New York, and the Grampian Hills of Scotland, where Norval was to feed his flocks, had already upheaved their bare backs from the boiling caldrons of the sea, thus stealing a march on the Alps and many other more famous mountains.

How opposite and remote from each other are the mythologic ages and the nineteenth century! The critical and scientific spirit of the one is in strange contrast with the credulous, blindly reverent spirit of the other. Mythology delegated the government of the world to inferior deities, the subjects of an omnipotent Fate or Necessity; while, to show how extremes meet, mere science delegates it to chemical and physiological agencies, and ends, like the mythic cosmogonies, in some irrepressible spontaneous impulse of matter to develop itself in the ever-changing forms of the visible universe. Myriads of gods were the actors in “the rushing metamorphosis” of the old myth-haunted Nature; while chemic and elemental forces perform the same parts in the masquerade of the modern *Phusis*. Both mythology and science, therefore, stick fast in secondary causes.

Myths are the religion of youth, and of primitive, unsophisticated nations; while science may be called the religion of the mature man, full of experience and immersed in the actual. The Positivism of Comte, like the old myth-worship, sets up for its deity human nature idealized, adorned with genius and virtue. The Positivist worships virtuous human nature, conditioned and limited as it is; while the Mythist worshipped it reflected on the outer world and endowed with supernat-

ural attributes, clothed with mist-caps and wishing-caps that gave it dominion over space and time. The restless, glittering, whimsical sprites of fairy mythology, that were believed of old to have so large a share in shaping the course of Nature and of human life, have vanished from the precincts of the schoolmaster at least. They could not endure the clear eyebeam of Science, which has searched their subterranean abodes, withering them up and metamorphosing them into mere physiological forces. Reason and scientific investigation have no patience with the things of faith and imagination. Our poets now have to go back to the Past, to the standpoints of the old pagan bards. Tennyson lives in the land of the Lotophagi, in the Arabian Nights of the Bagdad of Caliph Haroun, and in the orchard lawns of King Arthur's Avalon. So, too, Longfellow must inhale the golden legendary air of the Past. The mere humanitarian bards, who try to make modern life trip to the music of trochees, dactyles, and spondees, fail miserably. Industrialism is not poetical. Our modern life expresses itself in machines, in mathematical formulas, in statistics, and with scientific precision generally. Art and poetry are pursued in the spirit of past ages, and concern themselves with the symbols, faiths, and ideal creations of the Past.

It is true, however, that all past ages of the world are contemporaneous in this age. For example, we have in this nineteenth century the patriarchal age of the world still surviving in the desert tents of the Arab,—while the mythic, anthropomorphic period is still extant in Persia, China, and India, and even among the nations of the West, in the rustic nooks and corners of the Roman Catholic countries of Europe. But the existing nations, which still preserve that old ethnic worship and the mediæval superstitions, are mere lingerers and camp-followers in the march of humankind. Under the ample skirts of the Roman Church still cower and lurk the superstitions of the old ethnic world,

baptized to be sure, and called by new names. The Roman see has ever had a lingering kindness for the fair humanities of old religion, which live no longer in the faith of Protestant reason and free inquiry. She compromised with them of old, and they have clung about her waist ever since. She has put her uniform upon them, and made them do service in her cause, and keep alive with their breath the fast expiring embers of faith and imaginative credulity, which she so much loves and commends. Like an equivocal and ambiguous nature, the old Mother Church, as she is called, is upward fair and Christian, but downward foul and ethnic. She attacks human nature on the side of the heart, the senses, and those old instincts which Coleridge says bring back the old names. Reason and intellection, sharpened by science, she abhors; but so large a part of mankind still linger in the rear of the vanguard nations, that she has yet a long lease of life to run, with myriads of adherents to cling to her with fanatical tenacity,—nay, with proselytes from amongst the poetical, the artistic, and imaginative, who voluntarily prefer to the broad sunshine of science the twilight gloom of her sanctuaries, in order there the better to woo the old inspiration of art, superstitious faith, and poetry. The old ethnic instincts of human nature are formidable auxiliaries of the Mother Church. Puseyism would rehallo the saintly wells even of Protestant, practical England, and send John Bull again on a pilgrimage to the shrines of Canterbury and Walsingham. Compare a Yankee, common-school-bred, and an Austrian peasant, if you would learn how the twelfth and nineteenth centuries live together in the current year. The one is self-reliant, helpful, and versatile, not freighted with any old-world rubbish; while the other is abject, and blindly reverent, and full of the old mythic imagination that is in strong contrast with the keen common-sense of the Protestant, who dispels all twilight fantasies with a laugh of utter in-

credulity. The one sees projected on the outer world his own imaginings, now fair, now gloomy; while the other sees in the world, land to be cut up into corner-lots for speculation, and water for saw-mills and cotton-mills, and to float clipper-ships and steamers. The one is this-worldly; the other is other-worldly. The one is armed and equipped at all points to deal with the Actual, to subdue it and make the most of it; he aims for success and wealth, for elegance, plenty, and comfort in his home;—while the other is negligent, a frequenter of shrines, in all things too superstitious, overlooking and slighting mere physical comfort, and content with misery and dirt. The Romish peasant lives begirt by supernatural beings, who demand a large share of his time and thoughts for their service; while the thrifty Protestant artisan or agriculturist is a practical naturalist, keeping his eye fixed on the main chance. Brownson would have us believe that he is morally and spiritually the inferior of the former. For this light of common day, which now shines upon the world, the multiplication-table, and reading and writing, are far better than amulet, rosary, and crucifix.

After all, this light of common day, which the bards and saints so much condemn and disclaim, when subjected to the microscopic and telescopic ken of modern science, opens as large a field for wonder and for the imagination to revel in as did the old marvels, fables, and

fiction of the Past. The True is beginning to be found as strange, nay, stranger than the purely Imaginative and Mythic. The Beautiful and the Good will yet be found to be as consistent with the strictly True and Actual, with the plain Matter-of-Fact as it is called, as they have been, in the heroic ages of human achievement and endurance, with the glorious cheats and delusions that nerved man to high emprise. The modern scientific discoverer and inventor oftentimes finds himself engaged in quests as strange as that of the Holy Grail of Round-Table fiction. To the Past, with its mythic delusions, simplicity, and dense ignorance of Nature, we can never return, any more than the mature man can shrink into the fresh boy again. Nor is it to be regretted. The distant in time, like the distant in space, wears a halo, a vague, blue loveliness, which is all unreal. The tired wayfarer, who is weary with the dust, the din, and stony footing of the Actual and the Present, may sometimes fondly imagine, that, if he could return to the far Past, he would find all smooth and golden there; but it is a pleasant delusion of that glorious arch-cheat, the imagination. Yet if we cannot go back to the Past, we can march forward to a Future, which opens a deeper and more wondrous and airier vista, with its magicians of the Actual casting into shade the puny achievements of old necromancy and mythic agencies.

JUANITA.

YES! I had, indeed, a glorious revenge! Other people have had home, love, happiness; they have had fond caresses, tender cares, the bright faces of children shining round the board. I had none of these; my revenge has stood to me in place of them all. And it has stood well.

Love may change; loved ones may die; the fair-faced children may grow up hard-hearted and ungrateful. But my revenge will not deceive or disappoint me; it cannot change or pass away; it will last through Time into Eternity.

I was left an orphan in early child-

hood. My father was an officer in the American Navy; my mother a Spaniard. She was very beautiful, I always heard; and her miniature, which my father's dying hand placed about my neck, proclaimed her so. A pale, clear, olive tint, eyes of thrilling blackness, long, lustrous hair, and a look of mingled tenderness and melancholy made it, in my thought, the loveliest face that mortal eyes could see.

My parents left me no fortune, and I fell to the care of my father's only brother, a man of wealth and standing. I have no story to tell of the bitterness of dependence,—of slights, and insult, and privation. My uncle had married, somewhat late in life, a young and gentle woman; when I was twelve years old she became the mother of twins,—two lovely little girls. No one, unacquainted with the family history, could have supposed that I was other than the elder sister of Florence and Leonora. Every indulgence was granted me, every advantage of dress and education bestowed upon me. So far as even I could see, my uncle and aunt regarded me as their own child. Nor was I ungrateful, but repaid them with a filial reverence and affection.

I did not inherit the fulness of my mother's beauty, but had yet some traits of her,—the pale, clear skin, the large, black eyes, the glossy and abundant hair. Here the resemblance ceased. I have heard my uncle say,—how often!—"Your mother, Juanita, had the most perfect form I ever saw, except in marble"; all Spanish women, indeed, he told me, had a full, elastic roundness of shape and limb, rarely seen among our spare and loose-built nation. I was American in form, at least,—slight and stooping, with a certain awkwardness, partly to be imputed to my rapid growth, partly to my shyness and reserve. I was insatiably fond of reading, little attracted toward society. When my uncle's house, as often happened, was full of gay company, I withdrew to my own room, and read my favorite authors in its pleasant solitude.

I was ill at ease with lively, fashionable people,—very much at home with books. Thanks to my uncle's care, I was well educated, even scholarly, for my age and sex. My studious habits, far from being discouraged, were praised by all the household, and I was looked upon as a prodigy of cleverness and industry.

A widow lady, of the name of Haughton, came to live in the little cottage near us when I was fifteen years old. She was well-born, but poor, and had known many sorrows. My aunt, Mrs. Heywood, soon became interested in her, and took pleasure in offering her those numerous attentions which a wealthy neighbor can so easily bestow, and which are so grateful to the recipient. Mrs. Haughton and her sons were frequent guests at our house; and we, too, spent many pleasant hours in the vine-covered porch of the cottage. I had few companions, and John and William Haughton were very welcome to me. They were somewhat older than I,—John twenty-two, and William two years younger; and I was thus just able to escape regarding them with that profound contempt which the girl of fifteen usually feels for "boys." After knowing them awhile I felt how baseless such contempt would be; for they possessed a depth and maturity of character rarely seen except in men of much experience. John was grave and thoughtful; his livelier brother often said he had come into the world some centuries too late,—that he was meant for an Augustine or a Pascal, so studious was he, and so saintly. Do not fancy that he was one of those stiff, bespectacled, pedantic youths who cannot open their lips without a classic allusion or a Greek quotation; nothing could be farther from the truth. He was quiet and retiring; very few guessed how beneath that exterior, so unassuming, lay hid the noblest aspirations, the most exalted thought. It was John I should have loved.

But it was William who won my heart, even without an effort. I, the pale, serious girl, loved with a wild idolatry the gay and careless youth. Never, from that

day till now, have I seen a man so perfect in all manly beauty. Strength and symmetry were united in his tall, athletic figure; his features were large, but nobly formed; his hair, of a sunny hue, fell in rich masses over a broad, white brow. So might Apollo have looked in the flush of his immortal youth.

At first I gazed at him only with the enthusiasm which his extreme beauty might well awaken in the heart of a romantic maiden; then I grew to see in the princely type of that beauty a reflection of his mind. Did ever any fond fool so dote upon her Ideal as I on mine? All generous thoughts, all noble deeds, seemed only the fit expression of his nature. Then I came to mingle a reverence with my admiration. We were friends; he talked to me much of his plans in life, — of the future that lay before him. What an ambitious spirit burned within him! — a godlike ambition I thought it then. And how my weak, womanish heart thrilled with sympathy to his! With what pride I listened to his words! with what fervor I joined in his longings!

There came a time when I trembled before him. I could no longer walk calmly arm-in-arm with him under the linden-trees, hearkening joyfully. I dared not lift my eyes to his face; I turned pale with suppressed feeling, if he but spoke my name—*Juanita*—or took my hand in his for friendly greeting. What a hand it was! — so white, and soft, and shapely, yet so powerful! It was the right hand for him, — a fair and delicate seeming, a cruel, hidden strength. When he spoke of the future my heart cried out against it; it was intolerable to me. In its bright triumphs I could have no part; thereto I could follow him only with my love and tears. The present alone was mine, and to that I passionately clung. For I never dreamed, you see, that he could love me.

My manner toward him changed; I was fitful and capricious. I dreaded, above all things, that he should suspect my feelings. Sometimes I met him cold-

ly; sometimes I received his confidences with an indifferent and weary air. This could not last.

One night—it was a little time before he left us—he begged me to walk with him once more under the lindens. I made many excuses, but he overruled them all. We left the brilliantly-lighted rooms and stood beneath the solemn shadow of the trees. It was a warm, soft night; the harvest moon shone down upon us; a south wind moaned among the branches. We walked silently on till we reached a rustic seat, formed of gnarled boughs fantastically bound together; here he made me sit down and placed himself beside me.

“*Juanita*,” he said, in a tone so soft, so thrillingly musical, that I shall never forget it, “what has come between us? Are you no longer my friend?”

I tried to answer him, and could not; love and grief choked my utterance.

“Look at me,” he said.

I looked. The moon shone full on his face; his eyes were bent on mine. What a serpent-charm lurked in their treacherous blue depths! If, looking at me thus, he had bidden me kill myself at his feet, I must have done it.

“*Juanita*,” he said, with a smile of conscious power, “you love me! But why should that destroy our happiness?”

He held out his arms; I threw myself on his bosom in an agony of shame and joy. Oh, Heaven! could it be possible that he loved me at last?

Long, long, we sat there in the moonlight, his arms around me, my hand clasped in his. Poor hand! even by that faint radiance how dark and thin it looked beside his, so white and rounded! How gloriously beautiful was he! what a poor, pale shadow I! And yet he loved me! He did not talk much of it; he spoke more of the future,—*our* future. It all lay before him, a bright, enchanted land, wherein we two should walk together. We had not quite reached it, but we surely should, and that ere long.

The steps toward it were prosaic enough, save as his imagination bright-

ened them. An early friend of his dead father, a distinguished lawyer, wishing to further William's advancement in life, gave him the opportunity of studying his profession with him,—offering him, at the same time, a home in his own family. From these slender materials William's fancy built air-castles the most magnificent. He would study assiduously; with such a prize in view, he fondly said, his patience would never weary. He felt within himself the consciousness of talent; and talent and industry *must* succeed. A bright career was before him,—fame, fortune; and all were to be laid at my feet; all would be valueless, if not shared with me.

"Ah, William," I asked, with a moment's sorrowful doubt, "are you sure of that? Are you certain that it is not fame you look forward so eagerly to possess, instead of me?"

"How *dare* you say such a thing?" he answered, sternly. I did not mind the sternness; there was love behind it.

"And what am I to do while you are thus winning gold and glory?" I asked, at length.

"I will tell you, Juanita. In the first place, you are *not* to waste your time and spirits in long, romantic reveries, and vain pining because we cannot be together."

"Indeed, I will not!" was my quick reply, though I colored deeply. I was ashamed that he thought me in danger of loving him too well. "I know you think me foolish and sentimental; but I assure you I will try to be different, since you wish it."

"That is my own dear girl! You must go out,—you must see people,—you must enjoy yourself. You must study, too; don't let your mind rust because you are engaged. It will be quite time enough for that when we are married."

"You need not be afraid; I shall always wish to please you, William, and so I shall always endeavor to improve."

"Good child!" he said, laughing. "But you will not always be such an obedient infant, Juanita. You will find

out your power over me, and then you will want to exercise it, just for the pleasure of seeing me submit. You will be despotic about the veriest trifles, only to show me that my will must bow to yours."

"That will never be! I have no will of my own, where you are concerned, William. I only ask to know your wishes, that I may perform them."

"Is that indeed so?" he said, with a new tenderness of manner. "I am very glad; for, to tell the truth, my love, I fear I should have little patience with womanish caprices. I have reasons always for what I do and for what I require, and I could not long love any one who opposed them."

Again I assured him that he need feel no such dread. How happy we were!—yes, I believe he loved me enough then to be happy, even as I was.

It was so late before we thought of going in, that a messenger was sent to seek us, and many a fine jest we had to encounter when we reached the drawing-room.

The next day, William spoke to my uncle, who seemed to regard the matter in a light very different from ours. He said, we were a mere boy and girl, that years must elapse before we could marry, and by that time we should very probably have outgrown our liking for each other; still, if we chose, we might consider ourselves engaged; he did not know that he had any objection to make. This manner of treating the subject was not a flattering one; however, we had his consent,—and that was the main point, after all.

So we were troth-plight; and William went forth on his career of labor and success, and I remained at home, loving him, living for him, striving to make my every act what he would have it. I went into company as he had bidden me; I studied and improved myself; I grew handsomer, too. All who saw me noticed and approved the alteration in my appearance. I was no longer awkward and stooping; my manner had ac-

quired something of ease and gracefulness; a faint bloom tinged my cheek and made my dark eyes brighter. I was truly happy in the change; it seemed to render me a little more suited to him, who was so proudly, so splendidly handsome.

I remembered what he had said too well to spend much time in love-dreams; but my happiest moments were when I was alone, and could think of him, read his letters, look at his picture, and fancy the joyfulness of his return.

His letters!—there the change first showed itself. At first they were all, and more than all, I could wish. I blushed to read the ardent words, as I did when he had spoken them. But by-and-by there was a different tone: I could not describe it; there was nothing to complain of; and yet I felt—so surely!—that something was wrong. I never thought of blaming him; I dreaded lest I had in some way wounded his affection or his pride. I asked no explanation; I thought to do so might annoy or vex him, for his was a peculiar nature. I only wrote to him the more fondly,—strove more and more to show him how my whole heart was his. But the change grew plainer as months passed on; and some weeks before the time appointed for his return, the letters ceased altogether.

This conduct grieved me, certainly, yet I was more perplexed than unhappy. It never occurred to me to doubt his love; I thought there must be some mistake, some offence unwittingly given, and I looked to his coming to clear away all doubt and trouble. But I longed so for that coming!—it seemed as if the weeks would never end. I knew he loved me; but I needed to hear him say it once more,—to have every shadow dispelled, and nothing between us but the warmest affection and fullest confidence.

In such a mood I met him. The house was full of guests, and I could not bear to see him for the first time before so many eyes. I had watched, as may well be believed, for his arrival, and a little

before dark had seen him enter his mother's house. He would surely come over soon; I ran down the long walk, and paced up and down beneath the trees, awaiting him. As soon as he came in sight I hastened toward him; he met me kindly, but the change that had been in his letters was plainer yet in his manner. It struck a chill to my heart.

"I suppose you have a house full of company, as usual," he remarked presently, glancing at the brilliant windows.

"Yes, we have a number of friends staying with us. Will you go in and see them? There are several whom you know."

"Thank you,—not to-night; I am not in the mood. And I have a good deal to say to you, Juanita, that deeply concerns us both."

"Very well," I replied; "you had better tell me at once."

We walked on to the old garden-chair, and sat down as we had done that memorable night. We were both silent,—I from disappointment and apprehension. He, I suppose, was collecting himself for what he had to say.

"Juanita," he spoke at last, taking my hand in his, "I do not know how you will receive what I am about to tell you. But this I wish you to promise me: that you will believe I speak for our best happiness,—yours as well as mine."

"Go on," was all my reply.

"A year ago," he continued, "we sat here as we do now, and, spite of doubts and misgivings and a broken resolution, I was happier than I shall ever be again. I had loved you from the first moment I saw you, with a passion such as I shall never feel for any other woman. But I knew that we were both poor; I knew that marriage in our circumstances could only be disastrous. It would wear out your youth in servile cares; it would cripple my energies; it might even, after a time, change our love to disgust and aversion. And so, though I believed myself not indifferent to you, I resolved never to speak of my love, but to struggle against it, and root it out of my heart.

You know how differently it happened. Your changed manner, your averted looks, gave me much pain. I feared to have offended you, or in some way forfeited your esteem. I brought you here to ask an explanation. I said, 'Juanita, are you no longer my friend?' You know what followed; the violence of your emotion showed me all. You remember?"

Did I not?—and was it not generous of him to remind me then?

"I saw you loved me, and the great joy of that knowledge made me forget prudence, reason, everything. Afterwards, when alone, I tried to justify to myself what I had done, and partially succeeded. I argued that we were young and could wait; I dreamed, too, that my ardor could outrun time, and grasp in youth the rewards of mature life. In that hope I left you.

"Since then my views have greatly changed. I have seen something—not much, it is true—of men and of life, and have found that it is an easy thing to dream of success, but a long and difficult task to achieve it. That I have talent it would be affectation to deny; but many a poor and struggling lawyer is my equal. The best I can hope for, Juanita, is a youth of severe toil and gripping penury, with, perhaps, late in life,—almost too late to enjoy it,—competence and an honorable name. And even that is by no means secure; the labor and the poverty may last my life long.

"You have been reared in the enjoyment of every luxury which wealth can command. How could you bear to suffer privations, to perform menial labors, to be stinted in dress, deprived of congenial society, obliged to refrain from every amusement, because you were unable to afford the expense? How should you like to have a grinding economy continually pressing upon you, in every arrangement of your household, every detail of your daily life? to have your best days pass in petty cares and savings, all your intellect expended in the

effort to make your paltry means do the greatest possible service?"

It was not a pleasant picture, but, harshly drawn as it was, I felt in the fullness of my love that I could do all that, and more, for him. Oh, yes! for him and with him I would have accepted any servitude, any suffering. Yet a secret something withheld me from saying so; and how glad I soon was that I had kept silence!

"You make no reply, Juanita," he said. "Well, I might put on a pretence of disinterestedness, and say that I was unwilling to bind you to such a fate, and therefore released you from your engagement. It would not be altogether a pretence, for nothing could be more painful to me than to see the brightness of your youth fading away in the life I have described. But I think of myself, too; comforts, luxuries, indulgences, I value highly. Since my father's death I have tasted enough of poverty to know something of its bitterness; and to be doomed to it for life is appalling to me. The sordid cares of narrow means are so distasteful, that I cannot contemplate them with any degree of patience. After a day of exhausting mental effort; to return to a dingy, ill-furnished home,—to relieve professional labors by calculations about the gas-bill or the butcher's account,—I shrink from such a miserable prospect! I love the elegant, the high-bred, the tasteful, in women; I am afraid even my love for you would alter, Juanita, to see you day by day in coarse or shabby clothing, performing such offices as are only suited to servants,—whom we could not afford to keep.

"I have thought of it a great deal, and it seems to me that it is useless and hopeless, that it would be the wildest folly, to continue our engagement. With our tastes and habits, we must seek in marriage the means of comfort, the appliances of luxury. Others may find in it the bewildering bliss we might have known, had fortune been favorable to us; but, as it is, I think the best, the

wisest, the happiest thing we can do is—to part!”

Oh, Heaven! this from him!

“Still, Juanita, if you think otherwise,” he went on after a moment’s pause,—“if you prefer to hold me to our engagement, I am ready to fulfil it when you wish.”

It was like a man to say this, and then to feel that he had acted uprightly and honorably!

I said nothing for a time; I could not speak. All hell woke in my heart. I knew then what lost spirits might feel,—grief, and wounded pride, and rage, hatred, despair! In the midst of all I made a vow; and I kept it well!

How I had loved this man!—with what a self-forgetting, adoring love! He had been my thought, day and night. I would have done anything,—sacrificed, suffered anything,—yes, sinned even,—to please his lightest fancy. And he cast me coldly off because I had no fortune!—trampled my heart into the dust because I was poor!

“You make no answer, Juanita,” he said, at length.

“I am thinking,” I replied, looking up and laughing slightly, “how to say that I quite agree with you, and have been planning all day how I should manage to tell you the very same thing.”

Miserable falsehood! But I spoke it so coolly, that he was thoroughly deceived. He never suspected the truth,—my deep love, my outraged pride.

“It is just as you have said, William. We have elegant tastes, and no means of gratifying them. What should we do together? Only make each other miserable. You need a rich wife, I a rich husband, who can supply us with the indulgences we demand. To secure these we can well make the sacrifice of a few romantic fancies.”

“I am glad you think so,” he replied, yet somewhat absently.

“You must wait awhile for Florence,” I continued; “she is four years old, and twelve years hence you will yet be quite a personable individual. And Florence

will have a fortune worth waiting for, I assure you. Or perhaps you have somebody more eligible already in view. Come, William, be frank,—tell me all about it.”

“I did not expect this levity, Juanita,” he answered, severely. “You must know that I have never thought of such a thing. And believe me,” he said, in a tenderer tone, “that, among all the beautiful women I have seen,—and some have not disdained to show me favor,—none ever touched my heart for a moment. Had we any reasonable prospect of happiness, I could never give you up; I love you better a thousand times than anything in the world.”

“Except yourself,” I said, mockingly; and I looked at him with a mischievous smile, while a storm of passion raged in my heart and my brain seemed on fire. “Be it so! I do not complain of such a splendid rival. But really, William, I cannot boast of constancy like yours, even; though I suppose most people would consider that rather a poor, flawed specimen. It hurt my dignity very much when Uncle Heywood called our attachment a boy-and-girl affair; but I soon found that he knew best about it. For a time I kept my love very warm and glowing; but it was not long ere the distractions you bade me seek in society proved more potent than I wished. I found there were other things to be enjoyed than dreams of you, and even—shall I confess it? I can now, I suppose—other people to be admired as well as you!”

“Indeed!” he said, with ill-concealed annoyance. “You had a great talent for concealment, then; your letters showed no trace of the change.”

“I know they didn’t,” I answered, laughing. “I hated very much to admit even to myself that I had altered; it seemed, you know, so capricious and childish,—in short, so far from romantic. I kept up the illusion as long as I could; used to go off alone to read your letters, look at your picture, and fancy I felt just as at first. Then when I sat down

to write, and remembered how handsome you were, and all that had happened, the old feelings would come back, and for the time you were all I cared for. But I am very glad we have had this explanation, and understand each other. We shall both be happier for it."

I had a little taste of vengeance, even then, when I saw how his vanity was wounded. He tried to look relieved,—I dare say he tried to feel so,—but I question very much whether he was pleased with himself that he had been so cool and philosophical. He did not wish to make me wretched; but he had expected I would be so, as a matter of course. To find me so comfortable under the infliction perplexed and disconcerted him.

"This will not make any coldness between us, I hope?" he said, at last. "We will be friends still, dear Juanita?"

"Yes," I replied, "we will be friends, dear William. We are a great deal more in our true relations thus than as lovers."

"And your uncle's family," he inquired,—*"shall we explain all to them?"*

"There is no need of that," I answered, carelessly. "Let things pass. After a time they will perhaps notice that there is a change, and I can tell them that we are both tired of the engagement. They will ask no further questions."

"Thank you," he said. "It will save me some embarrassment."

"Yes," I replied, looking at him steadily, "I think it would have been a rather awkward topic for you to broach."

His eye fell before mine; through all the sophistry he had used, I think some slight sense of the baseness of his conduct forced itself upon his mind.

"Now I must return to the house," I said, rising; "will you not come with me? My uncle and aunt will expect to see you, and Anna Gray is here. You can make your first essay toward the rich match this evening."

"Nonsense!" he said, impatiently, yet he accompanied me. I knew he did not like to lose sight of me.

Never had I exerted myself so much to please any one, as I did that night to charm and attract him;—not, indeed, by any marked attention; that would have failed of its object. But I talked and danced; I displayed for his benefit all that I had acquired of ease and manner since he left. I saw his astonishment, that the pale, quiet girl who was wont to sit in some corner, almost unnoticed, should now be the life of that gay circle. I made him admire me most at the very moment he had lost me forever,—and so far, all was well.

I went to my room that night a different creature. That place had been a kind of sanctuary to me. By its vine-draped window I had loved to sit and think of him, to read the books he liked, and fashion my mind to what he could approve. But the spot which I had left, a hopeful and loving girl, I returned to, a forsaken and revengeful woman. My whole nature was wrought up to one purpose,—to repay him, to the last iota, all he had made me suffer, all the humiliation, the despair. It was strange how this purpose upbore and consoled me; for I needed consolation. I hated him, yet I loved him fiercely, too; I despised him, yet I knew no other man would ever touch my heart. He had been, he always must be, everything to me,—the one object to which all my thoughts tended, to which my every action was referred.

I took from a drawer his letters and his few love-gifts. The paper I tore to fragments and threw into the empty fireplace. I lighted the heap, and tossed the gifts, one after another, into the flame. Last of all, I drew his portrait from my bosom. I gazed at it an instant, pressed it to my lips. No,—I would not destroy this,—I would keep it to remind me.

I remember thinking, as I watched the flickering flame, that this was something like a witch's incantation. I smiled at the idea.

The next morning there was only a heap of light ashes left in the grate.

I pursued my purpose determinedly and with unflagging zeal. I did not know exactly how it would be realized, but I felt sure I should achieve it. My first care was to cultivate to the utmost every faculty I possessed. My education had been hitherto of rather a substantial order; I had few accomplishments. To these I turned my care. "What has a woman," I thought, "to do with solid learning? It never tells in society." I had observed the rapt attention with which William listened to music. Hitherto I had been only a passable performer, such as any girl of sixteen might be. But under the influence of this new motive I studied diligently; the best masters were supplied me; and soon my progress both astonished and delighted myself and all who heard me.

I have before said that a change for the better had taken place in my person; this I strove by every means in my power to increase. I rode, I walked, I plied the oars vigorously upon our little lake. My health grew firm, my cheeks more blooming, my form fuller and majestic. I took the greatest pains with my toilet. It was wonderful to see, day by day, as I looked into the mirror, the alteration that care and taste could effect in personal appearance. Could this erect, stately figure, with its air of grace and distinction, be one with the thin, stooping form, clad in careless, loose-fitting garb, which I so well remembered as myself? Could that brilliant face, with its bands of shining hair, that smile of easy self-confidence, belong to me? What had become of the pale, spiritless girl? My uncle sometimes asked the question, and, looking at me with a fond, admiring glance, would say,—"You were made for an empress, Juanita!" I knew then that I was beautiful, and rejoiced in the knowledge; but no tinge of vanity mingled with the joy. I cultivated my beauty, as I did my talents, for a purpose of which I never lost sight.

It was now I learned for the first time that John Haughton loved me. When it became generally understood that

William and I were no longer engaged, John came forward. I do not know what he, so good, so high-minded, saw in me; but certainly he loved me with a true affection. When he avowed it, a strange joy seized me; I felt that now I held in my hand the key of William's destiny. Now I should not lose my hold on him; we could not drift apart in the tide of life. As John's bride, John's wife, there must always be an intimate connection between us. So I yielded with well-feigned tenderness to my lover's suit,—only stipulating, that, as some time must elapse before our marriage, no one should know of our attachment,—not even William, or his mother,—nor, on my part, any of my uncle's family. He made no objection; I believe he even took a romantic pleasure in the concealment. He liked to see me moving about in society, and to feel that there was a tie between us that none dreamed of but ourselves. Poor John! he deserved better of Fate than to be the tool of my revenge!

William came home, soon after our engagement, for his annual visit. He was succeeding rather better than his dismal fancies had once prognosticated. He was very often at our house,—very much my friend. I saw through all that clearly enough; I knew he loved me a hundred-fold more passionately than in our earlier days; and the knowledge was to me as a cool draught to one who is perishing of thirst. I did all in my power to enhance his love; I sang bewildering melodies to him; I talked to him of the things he liked, and that roused his fine intellect to the exercise of its powers. I rode with him, danced with him; nor did I omit to let him see the admiration with which others of his sex regarded me. I was well aware that a man values no jewel so highly as that which in a brilliant setting calls forth the plaudits of the crowd. I talked to him often of his prospects and hopes; his ambition, all selfish as it was, fascinated me by its pride and daring. "Ah, William!" I sometimes thought, "you made a deadly

mistake when you cast me off! You will never find another who can so enter, heart and soul, into all your brilliant projects!"

He came to me, one morning, rather earlier than his wont. I was reading, but laid aside my book to greet him.

"What have you there, Juanita? Some young-ladyish romance, I suppose."

"Not at all,—it is a very rational work;—though I presume you will laugh at it, because it contains a little sentiment,—you are grown so hard and cold, of late."

"Do you think so?" he asked, with a look that belied the charge.

He took up the volume, and, glancing through it, read now and then a sentence.

"What say you to this, Juanita? 'If we are still able to love one who has made us suffer, we love him more than ever.' Is that true to your experience?"

"No," I answered, for I liked at times to approach the topic which was always uppermost in my mind, and to see his perfect unconsciousness of it. "If any one had made me suffer, I should not stop to inquire whether I were able to love him still or not; I should have but one thought left,—revenge!"

"How very fierce!" he said, laughing. "And your idea of revenge is—what? To stab him with your own white hand?"

"No!" I said, scornfully. "To kill a person you hate is, to my mind, the most pitiful idea of vengeance. What! put him out of the world at once? Not so! He should live," I said, fixing my eyes upon him,—“and live to suffer,—and to remember, in his anguish, why he suffered, and to whose hand he owed it!"

It was a hateful speech, and would have repelled most men; for my life I dared not have made it before John. But I knew to whom I was talking, and that he had no objection to a slight spice of *diablerie*.

"What curious glimpses of character

you open to me now and then," he said, thoughtfully. "Not very womanly, however."

"Womanly!" I cried. "I wonder what a man's notion of woman is! Some soft, pulpy thing that thrives all the better for abuse? a spaniel that loves you more, the more you beat it? a worm that grows and grows in new rings as often as you cut it asunder? I wonder history has never taught you better. Look at Judith with Holofernes,—Jael with Sisera,—or if you want profane examples, Catherine de Medicis, Mademoiselle de Brinvilliers, Charlotte Corday. There are women who have formed a purpose, and gone on steadily toward its accomplishment, even though, like that Roman girl,—Tullia was her name?—they had to drive over a father's corpse to do it."

"You have known such, perhaps," said Richard.

"Yes," I answered, with a gentle smile, "I have. They wished no harm, it might be, to any one, but people stood in their way. It is as if you were going to the arbor after grapes, and there were a swarm of ants in the path. You have no malice against the ants, but you want the grapes,—so you walk on, and they are crushed."

I was thinking of John and of his love, but William did not know that.

"You are a strange being!" he said, looking at me with a mixture of admiration and distrust.

"Ah! Well, you see my race is somewhat anomalous,—a blending of the Spaniard and the Yankee. Come, I will be all Spanish for a time; bring me the guitar. Now let me sing you a *romance*."

I struck the tinkling chords, and began a sweet love-ditty. Fixing my eyes on his, I made every word speak to his heart from mine. I saw his color change, his eyes melt;—when the song ended, he was at my feet.

I know not what he said; I only know it was passion, burning and intense. Oh, but it was balm both to my love and hate

to hear him! I let him go on as long as he would,—then I said, gently caressing his bright hair,—

“You forget, dear William, all those lessons of prudence you taught me not so very long ago.”

He poured forth the most ardent protestations; he begged me to forget all that cold and selfish reasoning. Long since he had wished to offer me his hand, but feared lest I should repel him with scorn. Would I not pardon his former ingratitude, and return his love?

“But you forget, my friend,” I said, “that circumstances have not altered, but only your way of viewing them; we must still be poor and humble. Don’t you remember all your eloquent pictures of the life we should be obliged to lead? Don’t you recollect the dull, dingy house, the tired, worn-out wife in shabby clothing?”—

“Oh, hush, Juanita! Do not recall those wretched follies! Besides, circumstances *have* somewhat changed; I am not so very poor. My income, though small, will be sufficient, if well-managed, to maintain us in comfort and respectability.”

“Comfort and respectability!” I exclaimed, with a shudder. “Oh, William, can you imagine that such words apply to me? The indulgences of wealth are necessary to me as the air I breathe. I suppose you would be able to shield me from absolute suffering; but that is not enough. Do not speak of this again, for both our sakes. And now, good friend,” I added, in a lighter tone, “I advise you to get up as soon as may be; we are liable to interruption at any time; and your position, though admirable for a *tableau*, would be a trifle embarrassing for ordinary life.”

He started to his feet, and would have left me in anger, but I recalled him with a word. It was good to feel my power over this man who had slighted and rejected me. Before we parted that day he had quite forgiven me for refusing him and making him ridiculous; I thought a little of the spaniel was transferred to

him. I saw, too, he had a hope, which I carefully forbore to contradict, that I preferred him to any other, and would accept him, could he but win a fortune for me. And so I sent him out into the world again, full of vain, feverish desires after the impossible. I gave him all the pains of love without its consolations. It was good, as far as it went.

John and I, meanwhile, got on very peacefully together. He was not demonstrative, nor did he exact demonstration from me. I had promised to marry him, and he trusted implicitly to my faith; while his love was so reverent, his ideal of maiden delicacy so exalted, that I should have suffered in his esteem, I verily believe, had my regard been shown other than by a quiet tenderness of manner.

About this time my uncle’s family went abroad. They wished me to accompany them, but I steadily declined. When they pressed me for a reason, I told them of my engagement to John, and that I was unwilling to leave him for so long a time. The excuse was natural enough, and they believed me; and it was arranged that during the period of their absence I should remain with a sister of Mrs. Heywood.

The time passed on. I saw William frequently. Often he spoke to me of his love, and I scarcely checked him; I liked to feed him with false hopes, as once he had done to me. He did not speak again of marriage; I knew his pride forbade it. I also knew that he believed I loved him, and would wait for him.

I heard often from our travellers, and always in terms of kindness and affection. At last their speedy return was announced; they were to sail in the “Arctic,” and we looked joyfully forward to the hour of their arrival. Too soon came the news of the terrible disaster; a little while of suspense, and the awful certainty became apparent. My kind, indulgent uncle and all his family, whom I loved as I would my own parents and sisters, were buried in the depths of the Atlantic.

I will not attempt to describe my grief; it has nothing to do with the story that is written here. When, after a time, I came back to life and its interests, a startling intelligence awaited me. My uncle had died intestate; his wife and children had perished with him; as next of kin, I was sole heir to his immense estate. When my mind fully took in the meaning of all this I felt that a crisis was at hand. Day by day I looked for William.

I had not long to wait. I was sitting by my window on a bright October day, reading a book I loved well,—“Shirley,” one of the three immortal works of a genius fled too soon. As I read, I traced a likeness to my own experience; Caroline was a curious study to me. I marvelled at her meek, forgiving spirit; if I would not imitate, I did not condemn her.

Then I heard the gate-latch click; I looked out through the vine-leaves, all scarlet with the glory of the season, and saw William coming up the walk. I knew why he was there, and, still retaining the volume in my hand, went down to meet him.

We walked out in the grounds; it was a perfect afternoon; all the splendor of autumn, without a trace of its swift-coming decay. Gold, crimson, and purple shone the forests through their softening haze; and the royal hues were repeated on the mountain, reflected in the river. The sky was cloudless and intensely blue; the sunlight fell, with red glow, on the fading grass. A few late flowers of gorgeous hues yet lingered in the beds and borders; and a sweet wind, that might have come direct from paradise, sighed over all. William and I walked on, conversing.

At first we spoke of the terrible disaster and my loss; he could be gentle when he chose, and now his tenderness and sympathy were like a woman's. I almost forgot, in listening, what he was and had been to me. I was reminded when he began to speak of ourselves; I recalled it fully, when again, with all the power that passion and eloquence could impart,

he declared his love, and begged me to be his.

I looked at him; to my eye he seemed happy, hopeful, triumphant; handsomer he could not be, and to me there was a strange fascination in his lofty, masculine beauty. I felt then, what I had always known, that I loved him even while I hated him, and for an instant I wavered. Life with him! It looked above all things dear, desirable! But what! Show such a weak, such a *womanish* spirit? Give up my revenge at the very moment that it was within my grasp,—the revenge I had lived for through so many years? Never!—I recalled the night under the lindens, and was myself again.

“Dear William,” I said, gently, “you amaze and distress me. Such love as a sister may give to an only brother you have long had from me. Why ask for any other?”

“‘A sister's love!’” he cried, impatiently. “I thought, Juanita, you were above such paltry subterfuges! Is it as a brother I have loved you all these long and weary years?”

“Perhaps not,—I cannot say. At any rate,” I continued, gravely, “a sisterly affection is all I can give you now.”

“You are trifling with me, Juanita! Cease! It is unworthy of you.”

He seized my hand, and clasped it to his breast. How wildly his heart beat under my touch! I trembled from head to foot,—but I said, in a cold voice, “You are a good actor, William!”

“You cannot look in my eyes and say you believe that charge,” he answered.

I essayed to do it,—but my glance fell before his, so ardent, so tender. Spite of myself, my cheeks burned with blushes. Quietly I withdrew my hand and said, “I am to be married to John in December.”

Ah, but there was a change then! The flush and the triumph died out of his face, as when a lamp is suddenly extinguished. Yet there was as much indignation as grief in his voice when he said,—

“Heaven forgive you, Juanita! You have wiffully, cruelly deceived me!”

"Deceived you!" I replied, rising with dignity. "Make no accusation. If deceived you were, you have simply your own vanity, your own folly, to blame for whatever you may suffer."

"You have listened to my love, and encouraged me to hope"—

"Silence! I *did* love you once,—your cold heart can never guess how well, how warmly. I would have loved on through trial and suffering forever; no one could have made me believe anything against you; nothing could have shaken my fidelity, or my faith in yours. It was reserved for yourself to work my cure,—for your own lips to pronounce the words that changed my love to cool contempt."

"Oh, Juanita," he cried, passionately, "will you always be so vindictive? Will you forever remind me of that piece of insane folly? Let it go,—it was a boy's whim, too silly to remember."

"You were no boy then," I answered. "You had a mature prudence,—a careful thoughtfulness for self. Or if otherwise, in your case the child was indeed father to the man."

"Your love is dead, then, I suppose?" he questioned, with a bitter smile.

I handed him the book I had been reading. It was marked at these words: "Love can excuse anything except meanness; but meanness kills love, cripples even natural affection; without esteem, true love cannot exist."

William raised his head with an air of proud defiance. "And in what sense," he asked, "do such words apply to me?"

"You are strangely obtuse," I said. "You see no trace of yourself in that passage,—no trace of meanness in the man who cast off the penniless orphan, with her whole heart full of love for him, yet pleads so warmly with the rich heiress, when he knows she is pledged to another?"

"You have said enough, Juanita," he replied, with concentrated passion. "This is too much to bear, even from you, from whom I have already endured

so much. You *know* you do not believe it."

"I *do* believe it," was my firm reply. It was false, but what did I care? It served my purpose.

"I might bid you remember," he said, "how I urged you to be mine when my prospects had grown brighter, and you were poor as before. I might appeal to the manner in which my suit has been urged for years, as a proof of my innocence of this charge that you have brought against me. But I disdain to plead my cause with so unwomanly a heart,—that measures the baseness of others by what it knows of its own."

He went, and for a time I was left in doubt whether my victory had been really achieved. Then I thought it all over, and was reassured. He could not simulate those looks and tones,—no, nor that tumult of feeling which had made his heart throb so wildly beneath my hand. He loved me,—that was certain; and no matter how great his anger or his indignation, my refusal must have cut him to the soul. And the charge I had made would rankle, too. These thoughts were my comfort when John told me, with grief and surprise, that his brother had joined the Arctic expedition under Dr. Kane. I knew it was for no light cause he would forsake the career just opening so brightly before him.

John and I were married in December, as had been our intention. We led a quiet, but to him a happy, life. He often wondered at my content with home and its seclusion, and owned what fears he had felt, before our marriage, lest I, accustomed to gayety and excitement, should weary of him, the thoughtful, book-loving man. It seemed he had made up his mind to all manner of self-sacrifice in the way of accompanying me to parties, and having guests at our own house. I did not exact much from him; I cared little for the gay world in which William no longer moved. I read with John his favorite books; I interested myself in the sciences which he pursued with such enthusiasm. It was no part of my plan to

inflict unnecessary misery on any one, and I strove with all my power to make happy the man whom I had chosen. I succeeded fully; and when we sat on the piazza in the moonlight, my head resting on his shoulder, my hand clasped in his, he would tell me how infinitely dearer the wife had grown to be than even the lover's fancy had portrayed her.

And my thoughts were far away from the bland airs and brightening moon amid the frozen solitudes of the North. Where was William? what was he doing? did he think of me? and how? What if he should perish there, and we should never meet again? Life grew blank at the thought; I put it resolutely away.

I had drunk of the cup of vengeance; it was sweet, but did not satisfy. I longed for a fuller draught; but might it not be denied to my fevered lips? Perhaps, amid the noble and disinterested toils of the expedition, his heart would outgrow all love for me, and when we met again I should see my power was gone. I pondered much on this; I believed at last that the solitude, the isolation, would be not unpropitious to me. From the little world of the ice-locked vessel his thoughts would turn to the greater world he had left, and I should be remembered. When he returned we should be much together. His mother was dead; our house was the only place he could call his home. Not even for me, I felt assured, would he cast off the love of his only brother. I had not done with him yet. So quietly and composedly I awaited his return.

He came at last, and his manner when we met smote me with a strange uneasiness. It was not the estrangement of a friend whom I had injured, but the distant politeness of a stranger. Was my influence gone? I determined to know, once for all. When we chanced to be alone a moment I went to his side. "William," I asked, laying my hand on his arm, and speaking in a tender, reproachful tone, "why do you treat me so?"

With a quick, decided motion, he removed my hand,—then looked down on me with a smile. "'You are strangely obtuse,'" he said, quoting my own words of two years before. "What can Mrs. Haughton desire from a base fortune-hunter with whom she is unhappily connected by marriage, but a humility that does not presume on the relationship?"

I saw a bold stroke was needed, and that I must stoop to conquer. "Oh, William," I said, sorrowfully, "you called me vindictive once, but it is you who are really so. I was unhappy, harassed, distracted between"—

"Between what?"

"I do not know—I mean I cannot tell you," I stammered, with well-feigned confusion. "Can you not forgive me, William? Often and often, since you left me that day, I have wished to see you, and to tell you how I repented my hasty and ungenerous words. Will you not pardon me? Shall we not be friends again?"

"I am not vindictive," he said, more kindly,—“least of all toward you. But I cannot see how you should desire the friendship of one whom you regard as a mercenary hypocrite. When you can truthfully assure me that you disbelieve that charge, then, and not till then, will I forgive you and be your friend.”

"Let it be now, then," I said, joyfully, holding out my hand. He did not reject it;—we were reconciled.

William had come home ill; the hardships of the expedition and the fearful cold of the Arctic Zone had been too much for him. The very night of his return I noticed in his countenance a frequent flush succeeded by a deadly pallor; my quick ear had caught, too, the sound of a cough,—not frequent or prolonged, but deep and hollow. And now, for the first time in my long and dreary toil, I saw the path clear and the end in view.

Every one knows with what enthusiasm the returned travellers were hailed. Amid the felicitations, the praises, the banquets, the varied excitements of the time, William forgot his ill-health. When these were over, he reopened his office,

and prepared to enter once more on the active duties of his profession. But he was unfit for it; John and I both saw this, and urged him to abandon the attempt for the present,—to stay with us, to enjoy rest, books, society, and not till his health was fully reëstablished undertake the prosecution of business.

"You forget, my good sister," he laughingly said to me one day,—(he could jest on the subject now,)—"that I have not the fortune of our John,—I did not marry an heiress, and I have my own way to make. I had got up a few rounds of the ladder when an adverse fate dragged me down. Being a free man once more, I must struggle up again as quickly as may be."

"Oh, for that matter," I returned, in the same tone, "I had some part, perhaps, in the adverse fate you speak of; so it is but fair that I should make you what recompense I can. I am an admirable nurse; and you will gain time, if you will deliver yourself up to my care, and not go back to Coke and Chitty till I give you leave. Seriously, William, I fear you do not know how ill you are, and how unsafe it is for you to go on with business."

He yielded without much persuasion, and came home to us. Those were happy days. William and I were constantly together. I read to him, I sung to him, and played chess with him; on mild days I drove him out in my own little pony-carriage. Did he love me all this time? I could not tell. Never by look or tone did he intimate that the old affection yet lived in his heart. I fancied he felt as I with him,—perfect content in my companionship, without a thought or wish beyond. We were made for each other; our tastes, our habits of mind and feeling, fully harmonized; had we been born brother and sister, we should have preferred each other to all the world, and, remaining single for each other's sakes, have passed our lives together.

So the time wore on, sweetly and placidly, and only I seemed to notice the failure in our invalid; but I watched for

it too keenly, too closely, to be blinded. The occasional rallies of strength that gave John such hope, and cheered William himself so greatly, did not deceive me; I knew they were but the fluctuations of his malady. Changes in the weather, or a damp east wind, did not account to me for his relapses; I knew he was in the grasp of a fell, a fatal disease; it might let him go awhile, give him a little respite, as a cat does the mouse she has caught,—but he never could escape,—his doom was fixed.

But you may be sure I gave him no hint of it, and he never seemed to suspect it for himself. One could not believe such blindness possible, did we not see it verified in so many instances, year after year.

Often, now, I thought of a passage in an old book I used to read with many a heart-quake in my girlish days. It ran thus:—"Perhaps we may see you flattering yourself, through a long, lingering illness, that you shall still recover, and putting off any serious reflection and conversation for fear it should overset your spirits. And the cruel kindness of friends and physicians, as if they were in league with Satan to make the destruction of your soul as sure as possible, may, perhaps, abet this fatal deceit." We had all the needed accessories: the kind physician, anxious to amuse and fearful to alarm his patient,—telling me always to keep up his spirits, to make him as cheerful and happy as I could; and the cruel friends—I had not far to seek for them.

For a time William came down-stairs every morning, and sat up during the greater part of the day. Then he took to lying on the sofa for hours together. At last, he did not rise till afternoon, and even then was too much fatigued to sit up long. I prepared for his use a large room on the south side of the house, with a smaller apartment within it; to this we carried his favorite books and pictures, his easy-chair and lounge. My piano stood in a recess; a guitar hung near it. When all was finished, it looked home-

like, pleasant; and we removed William to it, one mild February day.

"This is a delightful room," he said, gazing about him. "How pleasant the view from these windows will be as spring comes on!"

"You will not need it," I said, "by that time."

"I should be glad, if it were so," he replied; "but I am not quite so sanguine as you are, Juanita."

He did not guess my meaning; how should he, amused, flattered, kept along as he had been? To him, life, with all its activities, its prizes, its pleasures, seemed but a little way removed; a few weeks or months and he should be among them again. But I knew, when he entered that room, that he never would go forth again till he was borne where narrower walls and a lowlier roof should shut him in.

I had an alarm one day. "Juanita," said the invalid, when I had arranged his pillows comfortably, and was about to begin the morning's reading, "do not take the book we had yesterday. I wish you would read to me in the Bible."

What did this mean? Was this proud, worldly-minded man going to humble himself, and repent, and be forgiven? And was I to be defrauded thus of my just revenge? Should he pass away to an eternal life of holiness and joy,—while I, stained through him and for his sake with sins innumerable, sank ever lower and lower in unending misery and despair? Oh, I must stop this, if it were not yet too late.

"What!" I said, pretending to repress a smile, "are you getting alarmed about yourself, William? Or is Saul really going to be found among the prophets, after all?"

He colored, but made no reply. I opened the Bible and read two or three of the shorter Psalms,—then, from the New Testament, a portion of the Sermon on the Mount.

"It must have been very sweet," I observed, "for those who were able to receive Jesus as the true Messiah, and

his teachings as infallible, to hear these words from his lips."

"And do you not so receive them?" William asked.

"We will not speak of that; my opinion is of no weight."

"But you must have thought much of these things," he persisted; "tell me what result you have arrived at."

"Candidly, then," I said, "I have read and pondered much on what this book contains. It seems to me, that, if it teaches anything, it clearly teaches, that, no matter how we flatter ourselves that we are doing as we choose, and carrying out our own designs and wishes, we are all the time only fulfilling purposes that have been fixed from all eternity. Since, then, we are the subjects of an Inexorable Will, which no entreaties or acts of ours can alter or propitiate, what is there for us to do but simply to bear as best we can what comes upon us? It is a short creed."

"And a gloomy one," he said.

"You are right; a very gloomy one. If you can rationally adopt a cheerfuller, pray, do it. I do not wish for any companion in mine."

There was silence for a time, and then I said, with affectionate earnestness, "Dear William, why trouble yourself with these things in your weak and exhausted state? Surely, the care of your health is enough for you now. By-and-by, when you have in some measure regained your strength, look seriously into this subject, if you wish. It is an important one for all. I am afraid I gave you an overdose of anodyne last night, and am to blame for your low spirits of this morning. Own, William," I said, smilingly, "that you were terribly hyped, and fancied you never could recover."

He looked relieved as I spoke thus lightly. "I should find it sad to die," he said. "Life looks bright to me even yet."

This man was a coward. He dreaded that struggle, that humiliation of spirit, through which all must pass ere peace

with Heaven is achieved. Yet more, perhaps, he dreaded that deeper struggle which ensues when we essay to tear Self from its throne in the heart, and place God thereon. As he said, life looked bright to him; and all his plans and purposes in life were for himself, his own advancement, his own well-being. It would have been hard to make the change; and he thought it was not necessary now, at least.

No more was said upon the subject. Our days went on as before. There was a little music, some light reading, an occasional call from a friend,—and long pauses of rest between all these. And slowly, but surely, life failed, and the soul drew near its doom.

I knew now that he loved me still; he talked of it sometimes when he woke suddenly, and did not at once remember where he was; I saw it, too, in his look, his manner; but we never breathed it to each other, and he did not think I knew.

One night there was a great change; physicians were summoned in haste; there were hours of anxious watching. Toward morning he seemed a little better, and I was left alone with him. He slumbered quietly, but when he awoke there was a strange and solemn look in his face, such as I had never seen before. I knew what it must mean.

"When Dr. Hammond comes, let me see him alone," he whispered.

I made no objection; nothing could frustrate my purpose now.

The physician came,—a kind old man, who had known us all from infancy. He was closeted awhile with William; then he came out, looking deeply moved.

"Go to him,—comfort him, if you can," he said.

"You have told him?" I asked.

"Yes,—he insisted upon hearing the truth, and I knew he had got where it could make no difference. Poor fellow! it was a terrible blow."

I wanted a few moments for reflection; I sent John in my stead. I locked myself in my own room, and tried to get the full weight of what I was going to do. I

was about to meet him who had rejected my heart's best love, no longer in the flush and insolence of health and strength, but doomed, dying,—with a dark, hopeless eternity stretching out before his shuddering gaze. And when he turned to me in those last awful moments for solace and affection, I was to tell him that the girl he loved, the woman he adored, had since that one night kept the purpose of vengeance hot in her heart,—that for years her sole study had been to baffle and to wound him,—and that now, through all those months that she had been beside him, that he had looked to her as friend, helper, comforter, she had kept her deadly aim in view. *She* had deceived him with false hopes of recovery; *she* had turned again to the world the thoughts which he would fain have fixed on heaven; while he was loving her, she had hated him. She had darkened his life; she had ruined his soul.

Oh, was not this a revenge worthy of the name?

I went to him. He was sitting in the great easy-chair, propped with pillows; John had left the room, overcome by his feelings. Never shall I forget that face,—the despair of those eyes.

I sat down by him and took his hand.

"The Doctor has told you?" I murmured.

"Yes,—and what is this world which I so soon must enter? I believe too much to have one moment's peace in view of what is coming. Oh, why did I not believe more before it was too late?"

I kept silence a few minutes; then I said,—

"Listen, William,—I have something to tell you."

He looked eagerly toward me;—perhaps he thought even then, poor dupe, that it was some word of hope, that there was some chance for his recovery.

Then I told him all,—all,—my lifelong hatred, my cherished purpose. Blank amazement was in the gaze that he turned upon me. I feared that impending death had blunted his senses, and that he did not fully comprehend.

"You will remember now what I once told you," I cried, with savage joy; "for so surely as there is another world, in that world shall you live, and live to suffer, and to remember in your anguish why you suffer, and to whose hand you owe it."

He understood well enough now. "Fiend!" he exclaimed, with a look of horror, and started to his feet. The effort, the emotion, were too much. Blood gushed from his lips; a frightful spasm convulsed his features; he fell back; he was gone!

Yes,—he was gone! And my life's work was complete!

I cannot tell what happened after that. I suppose they must have found him, and laid him out, and buried him; but I remember nothing of it. Since then I have lived in this great, gloomy house, with its barred doors and windows. Never since I came here have I seen a face that I knew. Maniacs are all about me; I meet them in the halls, the gardens; sometimes I hear the fiercer sort raving and dashing about their cells. But I do not feel afraid of them.

It is strange how they all fancy that

the rest are mad, and they the only sane ones. Some of them even go so far as to think that *I* have lost my reason. I heard one woman say, not long ago,—“Why, she has been mad these twenty years! She never was married in her life; but she believes all these things as if they were really so, and tells them over to anybody who will listen to her.”

Mad these twenty years! So young as I am, too! And I never married, and all my wrongs a maniac's raving! I was angry at first, and would have struck her; then I thought, “Poor thing! Why should I care? She does not know what she is saying.”

And I go about, seeing always before me that pallid, horror-stricken face; and wishing sometimes—oh, how vainly!—that I had listened to him that bright October day,—that I had been a happy wife, perchance a happy mother. But no, no! I must not think thus. Once I look at it in that way, my whole life becomes a terror, a remorse. I will not, must not, have it so.

Then let me rejoice again, for I have had my revenge,—a great, a glorious revenge!

LEFT BEHIND.

It was the autumn of the year;
The strawberry-leaves were red and sere;
October's airs were fresh and chill,
When, pausing on the windy hill,
The hill that overlooks the sea,
You talked confidingly to me,—
Me, whom your keen artistic sight
Has not yet learned to read aright,
Since I have veiled my heart from you,
And loved you better than you knew.

You told me of your toilsome past,
The tardy honors won at last,
The trials borne, the conquests gained,
The longed-for boon of Fame attained:

I knew that every victory
But lifted you away from me,—
That every step of high emprise
But left me lowlier in your eyes ;
I watched the distance as it grew,
And loved you better than you knew.

You did not see the bitter trace
Of anguish sweep across my face ;
You did not hear my proud heart beat
Heavy and slow beneath your feet ;
You thought of triumphs still unwon,
Of glorious deeds as yet undone ;—
And I, the while you talked to me,
I watched the gulls float lonesomely
Till lost amid the hungry blue,
And loved you better than you knew.

You walk the sunny side of Fate ;
The wise world smiles, and calls you great ;
The golden fruitage of success
Drops at your feet in plenteousness ;
And you have blessings manifold,—
Renown, and power, and friends, and gold ;
They build a wall between us twain
Which may not be thrown down again ;—
Alas ! for I, the long years through,
Have loved you better than you knew.

Your life's proud aim, your art's high truth
Have kept the promise of your youth ;
And while you won the crown which now
Breaks into bloom upon your brow,
My soul cried strongly out to you
Across the ocean's yearning blue,
While, unremembered and afar,
I watched you, as I watch a star
Through darkness struggling into view,
And loved you better than you knew.

I used to dream, in all these years,
Of patient faith and silent tears,—
That Love's strong hand would put aside
The barriers of place and pride,—
Would reach the pathless darkness through,
And draw me softly up to you.
But that is past.—If you should stray
Beside my grave, some future day,
Perchance the violets o'er my dust
Will half betray their buried trust,
And say, their blue eyes full of dew,
" She loved you better than you knew."

COFFEE AND TEA.

FACTS, and figures representing facts, are recognized as stubborn adversaries when arrayed singly in an argument; in aggregate, and in generalizations drawn from aggregates, they are often unanswerable.

To the nervous reader it may seem a startling, and to the reformatory one a melancholy fact, that every soul in these United States has provided for him annually, and actually consumes, personally or by proxy, between six and seven pounds of coffee, and a pound of tea; while in Great Britain enough of these two luxuries is imported and drunk to furnish every inhabitant, patrician or pauper, with over a pound of the former, and two of the latter.

Coffee was brought to Western Europe, by way of Marseilles, in 1644, and made its first appearance in London about 1652. In 1853, the estimated consumption of coffee in Great Britain, according to official returns, was thirty-five million pounds, and in the United States, one hundred and seventy-five million pounds, a year.

Tea, in like manner, from its first importation into England by the Dutch East India Company, early in the seventeenth century, and from a consumption indicated by its price, being sixty shillings a pound, has proportionately increased in national use, until, in 1854, the United States imported and retained for home consumption twenty-five million pounds, and England fifty-eight million pounds.

Two centuries have witnessed this almost incredible advance. The consumption of coffee alone has increased, in the past twenty-five years, at the rate of four *per cent.* *per annum*, throughout the world.

We pay annually for coffee fifteen millions of dollars, and for tea seven millions. Twenty-two millions of dollars for

articles which are popularly accounted neither fuel, nor clothing, nor food!

"What a waste!" cries the reformer; "nearly a dollar apiece, from every man, woman, and child throughout the country, spent on two useless luxuries!"

Is it a waste? Is it possible that we throw all this away, year after year, in idle stimulation or sedation?

It is but too true, that the instinct, leading to the use of some form of stimulant, appears to be universal in the human race. We call it an instinct, since all men naturally search for stimulants, separately, independently, and unceasingly, —because use renders their demands as imperious as are those for food.

Next to alcohol and tobacco, coffee and tea have supplied more of the needed excitement to mankind than any other stimulants; and, taking the female sex into the account, they stand far above the two former substances in the ratio of the numbers who use them.

In Turkey coffee is regarded as the essence of hospitality and the balm of life. In China not only is tea the national beverage, but a large part of the agricultural and laboring interest of the country is engaged in its cultivation. Russia follows next in the almost universal use of tea, as would naturally result from its proximity and the common origin of a large part of its population. Western Europe employs both coffee and tea largely, while France almost confines itself to the former. The *cafés* are more numerous, and have a more important social bearing, than any other establishments in the cities of France. Great Britain uses more tea than coffee. The former beverage is there thought indispensable by all classes. The poor dine on half a loaf rather than lose their cup of tea; just as the French peasant regards his *demi-bouteille* of Vin Bleu as the most important part of his meal.

Tea first roused the rebellion of these American Colonies; and tea made many a half Tory among the elderly ladies of the Revolution. It has, indeed, been regarded, and humorously described by the senior Weller, as the indispensable comforter and friend of advanced female life. Dr. Johnson was as noted for his fondness for tea as for his other excesses at the table. Many sober minds make coffee and tea the *vis a tergo* of their daily intellectual labor; just as a few of greater imagination or genius seek in opium the spur of their ephemeral efforts. In the United States, the young imbibe them from their youth up; and it is quite as possible that a part of the nation's nervousness may arise from this cause, as it is probable that our wide-spread dyspepsia begins in the use of badly-cooked solid food, immediately on the completion of the first dentition.

All over this country we drink coffee and tea, morning and night; at least, the majority of us do. They are expensive; their palpable results to the senses are fleeting; they are reported innutritious; nay, far worse, they are decried as positively unwholesome. Yet we still use them, and no one has succeeded in leading a crusade against them at all comparable with the onslaughts on other stimulants, made in these temperance days. The fair sex raises its voice against tobacco and other masculine sedatives, but clings pertinaciously to this delusion.

It becomes, then, an important question to decide whether the choice of civilization is justified by experience or science,—and whether some effect on the animal economy, ulterior to a merely soothing or stimulant action, can be found to sanction the use of coffee and tea. And this is a question in so far differing from that of other stimulants, that it is not to be discussed with the moralist, but solely with the economist and the sanitarian.

More even than us, economically, does it concern the overcrowded and limited states of Europe, where labor is cheap,

and the necessities of life absorb all the efforts, to decide whether so much of the earnings of the poor is annually thrown away in idle stimulation.

It concerns us in a sanitary point of view, more than in any other way, and more than any other people. We are rich, spare in habit, and of untiring industry. We can afford luxurious indulgences, we are very susceptible to nervous stimuli, and we overwork.

Our national habit is feeble. Debility is recognized as the prevailing type of our diseases. Nervous exhaustion is met by recourse to all kinds of stimulation. We are apt to think coffee and tea as harmless, or rather as slow in their deleterious action, as any. Are they nothing more?

As debility marks the degeneration of our physical constitution, so does a morbid sensitiveness at all earthly indulgence, a tendency to reform things innocent, although useless, betray the weakness of the moral health of our day. An ascetic spirit is abroad; our amateur physiologists look rather to a mortification than an honest building-up of the flesh. They prefer naked muscle to rounded outline, and seek rather to test than to enjoy their bodies. Fearing to be Epicureans, they become Spartans, as far as their feebleness organizations will allow them, and very successful Stoics, by the aid of Saxon will. By a faulty logic, things which in excess are hurtful are denied a moderate use. Habits innocent in themselves are to be cast aside, lest they induce others which are injurious.

There is but little danger that Puritan antecedents and a New England climate should tend to idle indulgence or Epicurean sloth. We think there is a tendency to reform too far. We confess our preference for the *physique* of Apollo to that of Hercules. We acknowledge an amiable weakness for those bounties of Nature which soothe or comfort us or renew our nervous energy, and which, we think, injure us no more than our daily bread, if not immoderately used.

Science almost always finds some foundation in fact for popular prejudices. For years, men have continued wasting their substance on coffee and tea, insisting that they strengthened as well as comforted them, in spite of the warnings of the sanitarian, who looked on them solely as stimulants or sedatives, and of the economist, who bewailed their extravagant cost.

Physiology, relying on organic chemistry, has at least justified by experiment the choice of the civilized world. Coffee and tea had been regarded by the physiologist and the physician as stimulants of the nervous system, and to a less extent and secondarily of the circulation, and that was all. To fulfil this object, and to answer the endless craving for habitual excitants of the cerebral functions, they had been admitted reluctantly to the diet of their patients, rather as necessary evils than as positive goods. It was reserved for the all-searching German mind to discover their better qualities; and it is only within the last five years, that the self-sacrificing experiments of Dr. Böcker of Bonn, and of Dr. Julius Lehmann, have raised them to their proper place in dietetics, as "Accessory Foods." This term, which we borrow from the remarkable work on "Digestion and its Arrangements," by Dr. Thomas K. Chambers, of London, is only the slightest of the many obligations which we hasten to acknowledge ourselves under to this author, as will appear from citations in the course of this article.

The labors of earlier physiologists and chemists, as Carpenter, Liebig, and Paget, had resulted in the classification of nutritive substances under different heads, according to the purposes they served in the physical economy. Perhaps the most convenient, though not an unexceptionable division, is into the Saccharine, Oleaginous, Albuminous, and Gelatinous groups. The first includes those substances analogous in composition to sugar, being chemically composed of hydrogen, carbon, and oxygen. Such are starch, gum, cellulose, and so forth, which are almost identical in their ultimate

composition, and admit of ready conversion into sugar by a simple process of vital chemistry. The oleaginous group comprises all oily matters, which are even purer hydro-carbons than the first-mentioned class. The third, or albuminous group, includes all substances closely allied to albumen, and hence containing a large proportion of nitrogen in addition to the other three elements. The last group consists also of nitrogenized substances, which resemble gelatine in many of their characteristics. The first two groups are called non-azotized, as they contain no nitrogen; the last two, azotized, containing nitrogen. "All articles of food that are to be employed in the production of heat must contain a larger proportion of hydrogen than is sufficient to form water with the oxygen that they contain, and none are appropriate for the maintenance of any tissues (except the adipose) unless they contain nitrogen." Hence the obvious restriction of the first two classes to the heat-producing function, and of the last two (or azotized) to the reparation of the tissues.

We have, then, the two natural divisions of calorific and plastic foods: the one adapted to sustain the heat of the body, and enable us to maintain a temperature independent of that of the medium we may be in; the other to build up, repair, and preserve in their natural proportions the various tissues, as the muscular, fibrous, osseous, or nervous, which compose our frames. These two kinds of food we must have in due proportion and quantity in order to live. Neither the animal nor the vegetable kingdom furnishes the one to the exclusion of the other. We derive our supplies of each from both. More than this, we consume and appropriate certain incidental elements, which find their place and use in the healthy system. Iron floats in our blood, sulphur lies hidden in the hair and nails, phosphorus scintillates unseen in the brain, lime compacts our bones, and fluorine sets the enamelled edges of our teeth. At least one-third

of all the known chemical elements exist in some part of the human economy, and are taken into the stomach hidden in our various articles of food. This would seem enough for Nature's requirements. It is enough for all the brute creation. As men, and as thinkers, we need something more.

In all the lower orders of creation the normal state is preserved. Health is the rule, and sickness the rare exception. Demand and supply are exactly balanced. The contraction of the voluntary muscles, and the expenditure of nervous power consequent on locomotion, the temperate use of the five senses, and the quiet, regular performance of the great organic processes, limit the life and the waste of the creature. But when the brain expands in the dome-like cranium of the human being, a new and incessant call is made on the reparative forces. The nervous system has its demands increased a hundred-fold. We think, and we exhaust; we scheme, imagine, study, worry, and enjoy, and proportionately we waste.

In the rude and primitive nations this holds good much less than among civilized people. Yet even among them, the faculties whose possession involves this loss have been ever exercised to repair it by artificial means. In the busy life of to-day how much more is this the case! Overworked brains and stomachs, underworked muscles and limbs, soon derange the balance of supply and demand. We waste faster than enfeebled digestion can well repair. We feel always a little depressed; we restore the equilibrium temporarily by stimulation,—some with alcohol and tobacco, others with coffee and tea.

Now it is to these last means of supply that the name has been given of "accessory foods."

"Accessories are those by whose use the moulting and renewing (that is, the metamorphosis) of the organic structures are modified, so as best to accommodate themselves to required circumstances. They may be subdivided into those which arrest and those which increase metamor-

phosis." It is under the former class that are placed alcohol, sugar, coffee, and tea.

Again, says Dr. Chambers,—“Not satisfied with the bare necessities,” (the common varieties of plastic and calorific food,) “we find that our species chiefly are inclined by a *soi-disant* instinct to feed on a variety of articles the use of which cannot be explained as above; they cannot be refund in the organism; they cannot, apparently, without complete disorganization, be employed to build up the body. These may be considered as extra diet, or called accessory foods. . . . These are what man does not want, if the protracting from day to day his residence on earth be the sole object of his feeding. He could live without them, grow without them, think, after a fashion, without them. A baby does. Would he be wise to try and imitate it?”

“Thus, there is no question but that easily assimilable brown meat is the proper food for those whose muscular system is subjected to the waste arising from hard exercise; and if plenty of it is to be got, and the digestive organs are in sufficiently good order to absorb enough to supply the demand, it completely covers the deficiency. Water, under these circumstances, is the best drink; and a ‘total abstainer,’ with plenty of fresh meat, strong exercise, and a vigorous digestion, will probably equal anybody in muscular development. But should the digestion not be in such a typical condition, should the exercise be over-severe and the victuals deficient, then the waste must be limited by some arrester of metamorphosis; if it is not, the system suffers, and the man is what is called ‘overworked.’ . . . Intellectual labor also exercises the demand for food, and at the same time, unfortunately, injures the assimilating organs; so that, unless a judicious diet is employed, waste occurs which cannot be replaced.”

Waste, we may be told, is life, and the rapidity of change marks the activity of the vital processes. True, if each particle consumed is at once and ade-

quately replaced. Beyond that point, let the balance once tend to over-consumption, and we approach the confines of decay. Birds live more and faster than men, and insects probably most of all; yet many of the latter are ephemeral.

Every-day experience had long pointed to the recurring coincidence, that, of the annual victims of pulmonary consumption, few were to be found among the habitual consumers of ardent spirits. Science volunteered the explanation, that alcohol supplied a hydro-carbonaceous nutriment similar to that furnished by the cod-liver oil, which, serving as fuel, spared the wasting of the tissues, just in proportion to its own consumption and assimilation. Other aid it was supposed to lend, by stimulating the function of nutrition to renewed energy. Later investigations have proved that it exercises a yet more important influence as an arrester of metamorphosis. It was on arriving at this conclusion, that Dr. Böcker was led to institute a series of careful experiments to determine the influence of water on the physical economy, and the real value of salt, sugar, coffee, tea, and other condiments, as articles of food. "The experimenter appears to have used the utmost precision, and details so conscientiously the mode adopted of making his estimates, that additional knowledge may perhaps alter the conclusions drawn, but can never diminish the value of the experiments." They are not open to the objections of mistaken sensations, and honest, though ludicrous, misapprehension of fallible symptoms, to which the testing of drugs homœopathically is liable, and of which another instance has just occurred in London, in the "proving" of the new medicinal agent, gonioine. They rather resemble in accuracy a quantitative, as well as a qualitative, analysis. We will cite first the experiments on tea, and quote from the interesting narrative of Dr. Chambers.●

"After Dr. Böcker had determined by some preliminary trials what quantity of food and drink was just enough to satiate his appetite without causing loss of weight

to his body,—that is to say, was sufficient to cover exactly the necessary outgoings of the organism,—he proceeded to special experiments, in which, during periods of twenty-four hours, he took the amount of victuals ascertained by the former trials.

"The first set of the first series of experiments consists of seven observations, of twenty-four hours' duration each, in the months of July and August, with three barely sufficient meals *per diem*, in quantities as nearly equal each day as could be managed, and only spring-water to drink. The second set comprises the same number of observations in August, September, and October, under similar circumstances, except that infusion of tea, drunk cold, was taken instead of plain water.

"Each day there are carefully recorded" qualitative and quantitative analyses of the excretions,—estimates of "the amount of insensible perspiration, and of expired carbonic acid,—the quickness of respiration,—the beats of the pulse,—together with accurate notes of the duration of bodily exercise in the open air, the loss of weight of the whole body, the general feelings, and the circumstances, thermometric, barometric, and meteoric, under which the observations are taken.

"A second series of seventeen experiments of equal duration were made, and at a different time of year, so as to answer the question, which might arise, as to whether the season made any difference."

In these experiments similar observations and records are made as previously, "under the three following circumstances, namely: while taking tea as an ordinary drink, on the days immediately following the leaving it off, and on other days when it was not taken."

"A third series, of four experiments, was also made during four fasts of thirty-six hours each,—two with water only, and two with tea to drink.

"In the following particulars, all the three series so entirely coincide, that the conclusions will be set down as general deductions from the whole.

"Tea, in ordinary doses, has not any effect on the amount of carbonic acid expired, the frequency of the respirations, or of the pulse."

Obviously, then, it is not with reference to the heat-producing function that we can look upon tea as in any sense a nutriment; and if it causes no saving of carbon, its effects must be sought in checking some other waste, or in the less consumption of nitrogen. The pulse, and hence the respiration, are unaltered; for the two great processes of circulation and aëration of the blood are interdependent functions, and have, in health, a definite ratio of activity one with the other. As a nervous stimulant, tea in excess will, as we all know, produce an exaltation of the action of the heart, amounting in some persons to a painful and irregular palpitation. No such result seems to follow its moderate use.

"The loss by perspiration is limited by tea."

This seems, at first, contrary to common experience, as the sensible perspiration produced by several cups of warm tea is a familiar fact to all tea-drinkers. That this effect is wholly owing to the warmth of the mixture, it being drunk usually in hot infusion or decoction, was pointed out long since by Cullen. Tea limits perspiration, perhaps, by the astringent action of the tannin which it contains,—of which more hereafter. What is saved by limiting perspiration? Water, largely; carbonic acid, in considerable amount; ammonia (a nitrogenized substance;) salts of soda, potash and lime, and a trace of iron, all in quantities minute, to be sure, but to be counted in the aggregate of arrest of metamorphosis.

But the great fact which establishes tea as an arrester of the change of tissue is, that its use diminishes remarkably the amount of nitrogen thrown off by the excretions, specially destined to remove that element, when in excess, from the system. We have before called attention to the fact, that an indispensable component of plastic food, by which alone the tissues are repaired, is nitrogen. By a chemico-

vital process, nitrogen builds up and is incorporated in the tissues. Nitrogen, again, is one of the resulting components of the change of tissue. This element forms a large part of the effete particles which are rejected on accumulation from such change or waste. That a less amount is excreted by the tea-drinker, when similar quantities are ingested, the weight and plumpness of the body remaining undiminished the while, is proof of the slower change of tissue which takes place under the modifying influence of tea. The importance of this effect we shall presently see.

"In the first series of experiments, the daily allowance of food, though less copious on the tea days, was more nitrogenized, and nitrogen also was taken in as theine. Yet, in spite of this, the quantity thrown off in twenty-four hours was nearly a *gramme* less than on the water days. Still more strikingly is this shown in the days of complete fast, when pure spring-water is seen to cause a greater loss of nitrogen than infusion of tea, in spite of the supply of nitrogen contained in the latter. The difference also is seen to exist in spite of an increased amount of bodily exercise."

As final deductions from these experiments, there result, first, "that, when the diet is sufficient, the body is more likely to gain weight when tea is taken than when not"; second, "that, when the diet is *insufficient*, tea *limits* very much the *loss of weight* thereby entailed."

A set of experiments made by Dr. Lehmann are parallel with these. They exhibit the effects of coffee on the excretion of phosphorus, chloride of sodium, (common salt,) and nitrogen. If less full than Dr. Böcker's, they appear to be equally accurate, and more complete in showing the separate actions of the several constituents of coffee. It would be tedious to the general reader to follow them in detail, and we shall avail ourselves of the brief *résumé* of Dr. Chambers.

"First,—Coffee produces on the organism two chief effects, which it is very

difficult to connect together,—namely, the raising the activity of the vascular and nervous systems, and protracting remarkably the decomposition of the tissues. Second,—that it is the reciprocal modifications of the specific actions of the empyreumatic oil and caffeine contained in the bean which call forth the stimulant effects of coffee, and therefore those peculiarities of it which possess importance in our eyes,—such as the rousing into new life the soul prostrated by exertion, and especially the giving it greater elasticity, and attuning it to meditation, and producing a general feeling of comfort. Third,—that the protraction of metamorphic decomposition which this beverage produces in the body is chiefly caused by the empyreumatic oil, and that the caffeine only causes it when it is taken in larger quantity than usual. Fourth,—that caffeine (in excess) produces increased action of the heart, rigors, headache, a peculiar inebriation, delirium, and so on. Fifth,—that the empyreumatic oil (in excess) causes perspirations, augmented activity of the understanding, which may end in irregular trains of thought, restlessness, and incapacity for sleep."

It follows that both the active elements of the coffee-berry are necessary to insure its grateful effects,—that the volatile and odorous principle alone protracts decomposition,—and that careful preparation in roasting and decocting are essential to secure the full benefits of it as a beverage.

It would be difficult to overestimate the practical importance of these results. They raise coffee and tea from the rank of stimulants to that of food,—from idle luxuries to real agents of support and lengthening of life. Henceforth the economist can hear of their increasing consumption without a regret. The poor may indulge in them, not as extravagant enjoyments, but practical goods. The cup of tea, which is the sole luxury of their scanty meal, lessens the need for more solid food; it satisfies the stomach, while it gladdens the heart. It saves them, too,

the waste of those nitrogenized articles of food which require so much labor and forethought to procure. The flesh meats and the cereals, which contain the largest amounts of this requisite of organic life, are always the dearest articles of consumption. Certainly it is not as positive nutriment that we recommend the use of coffee and tea; for although they contain a relatively large amount of nitrogen, that supply can be better taken in solid food. Their benefit is two-fold. While they save more than enough of the waste of tissue to justify their use as economical beverages, they supply a need of the nervous system of no small importance. They cheer, refresh, and console. They thus fill a place in the wants of humanity which common articles of food cannot, inasmuch as they satisfy the cravings of the spirit as well as of the flesh.

We have before attempted to show that the human race is liable to a peculiar and constant waste from the development of the nervous system, and that the body has to answer for the labor of the mind. At first thought, we shall find it difficult to appreciate the endless vigilance and activity of the brain. Like the other organisms which possess a proper nervous system, man carries on the common organic processes of life with a regularity and unfailing accuracy which seem to verge on the mechanical forces, or to be, at least, automatic. All habitual voluntary acts by repetition become almost automatic, or require no perceptibly distinct impulse of the will. When we emerge from this necessary field of labor, we come to those functions peculiar to the proper brain. Here all is continual action. Thought, imagination, will, the conflicting passions, language, and even articulation, claim their first impulse from the nervous centre. The idlest reverie, as well as the most profound study, taxes the brain. That distinguishing attribute of man can almost never rest. In sleep, to be sure, we find a seeming exception. Then only its inferior portion remains necessarily at work to supervise the

breathing function. Yet we know that we have often dreamed,—while we do not know how often we fail to recall our dreams. The duality of the cerebrum may also furnish a means of rest in all trivial mental acts. Still, the great demands of the mind upon the nervous tissues remain. And it is these losses which may be peculiarly supplied by the nervous stimulants. Such are coffee and tea. Common nutrition by common food, and particularly the adipose and phosphatic varieties, nourishes nerve tissue, no doubt, as gluten and fibrine do muscle. But the stimulants satisfy temporarily their pressing needs, and enable them to continue their labors without exhaustion. Reacting again upon the rest of the body, they invigorate the processes of ordinary nutrition; for whatever rests or stimulates the nerve proportionately refreshes and vitalizes the tissues which it supplies.

It would be curious and well worth while to follow out the peculiar connection between the use of coffee and the excretion of phosphorus, which has been before hinted at. Other experiments of Dr. Böcker prove sugar to be a great saver of the phosphates, and hence of bone,—which affords, at least, a very plausible reason for the instinctive fondness of children for sweets, during the building portion of their lives.

In exhausting labors, long-continued exposure, and to insure wakefulness, the uses of coffee and tea have long been practically recognized by all classes. The sailor, the trapper, and the explorer value them even above alcohol; and in high latitudes we are assured of their importance in bracing the system to resist the rigors of the Arctic winter.

There is of course, as in all human history, another side of this picture. Abuse follows closely after use. The effects of the excessive employment of nervous stimulants in shaking the nerves themselves, and in impairing digestion, are too familiar to need description. Yet even here a use is not followed by those terrible penalties which await the drunk-

ard or the opium-eater. Idiosyncrasy, too, may forbid their use; and this is not very rare. As strengtheners and comforters of the average human system, however, they have no superiors, and none others are so largely used.

It is a little singular that the active principles of coffee and tea are probably identical,—no more so, however, than the marvellous similarity of starch, gum, and sugar, or other chemical wonders. They have been called caffeine and theine, respectively. They are azotized, and contain quite a marked amount of nitrogen. Chemically, they consist of carbon 19, hydrogen 10, nitrogen 4, oxygen 4. Some allowance is therefore to be made for them as plastic food.

This peculiar principle (theine) is also found in the leaves of the *Ilex Paraguayensis*, or Paraguay tea, used in South America, as a beverage.

" Good black tea contains of			
theine from	2.00	to 2.13	per cent.
Coffee-leaves	"	1.15	" 1.25 " "
Paraguay tea	"	1.01	" 1.23 " "
The coffee-berry	a mean of 1.00 " "		

" Besides the theine and the essential oils, which latter give the aroma of the plants, there is contained in both coffee and tea a certain amount of difficultly soluble vegetable albumen, and in the latter, especially, a large quantity of tannin. Roasting renders volatile the essential oil of the coffee-berry. The tea-leaf, infused for a short time, parts with its essential oil, and a small portion of alkaloid, (theine,) a good deal of which is thrown away with the grounds. If it stands too long, or is boiled, more indeed is got out of it, but an astringent, disagreeable drink is the result. The boiling of coffee extracts all its oil and alkaloid too, and, when it is drunk with the grounds, allows the whole nutriment to be available. Even when strained, it is clearly more economical than tea."

Roasted coffee is a powerful deodorizer, also. This fact is familiarly illustrated by its use in bar-rooms; and it might be made available for other purposes.

The cost and vast consumption of coffee and tea have made the inducements to adulterate them very great. The most harmless form is the selling of coffee-grounds and old tea-leaves for fresh coffee and tea. There is no security in buying coffee ready-ground; and we always look at the neat little packages of it in the grocers' windows with a shudder. Beans and peas we have certainly tasted in ground coffee. The most fashionable adulteration, and one even openly vaunted as economical and increasing the richness of the beverage, is with the root of the wild endive, or chicory. Roasted and ground, it closely resembles coffee. It contains, however, none of the virtues of the latter, and has nothing to recommend it but its cheapness. The leaves of the ash and the sloe are used to adulterate tea. They merely dilute its virtues, without adding any that are worth the exchange.

The coffee-tree is a native of Ethiopia or Abyssinia. Bruce tells us that the nomad tribes of that part of Africa carry with them, in crossing deserts on hostile expeditions, only balls of pulverized roasted coffee mixed with butter. One of these as large as a billiard-ball keeps them, they say, in strength and spirits during a whole day's fatigue, better than a loaf of bread or a meal of meat. The Arabs gave the first written account of coffee, and first used it in the liquid form. Burton, in his "Anatomy of Melancholy," mentions it as early as 1621. "The Turks have a drink they call coffee, (for they use no wine,)—so named of a berry as black as soot, and as bitter, which they sip up as warm as they can suffer, because they find by experience that that kind of drink, so used, helpeth digestion and procureth alacrity."

The coffee-tree reaches a height of from six to twelve feet, and when fully grown much resembles the apple-tree. Its leaves are green all the year; and in almost all seasons, blossoms and green and ripe fruit may be seen on the same tree at the same time. When the blossom falls, there springs from it a small fruit, green at first,

red when ripe, and under its flesh, instead of a stone, is the bean or berry we call coffee. "It has but recently become known by Europeans that the leaves of the coffee-plant contain the same essential principle for which the berries are so much valued. In Sumatra, the natives scarcely use anything else. The leaves are cured like tea. And the tree will produce leaves over a much larger *habitat* than it will berries." Should the decoction of the leaves prove as agreeable as that of the berry, we shall have a much cheaper coffee; though it remains to be proved that they contain the essential oil as well as the caffeine.

The coffees of Java, Ceylon, and Mocha are most esteemed. The quantities produced are quite limited. Manila and Arabia together give less than 4,500 tons. Cuba yields 5,000 tons *per annum*; St. Domingo, 18,000; Ceylon and the British East Indies, 16,000; Java, 60,000; and Brazil, 142,000. Yet, in 1774, a Franciscan friar, named Villaso, cultivated a single coffee-tree in the garden of the convent of San Antonio, in Brazil. In the estimates for 1853, we find that Great Britain consumes 17,500 tons; France, 21,500; Germany, (Zollverein), 58,000; and the United States, about 90,000 tons. It is worth remarking how small is the comparative consumption of tea in France. The importation of tea for 1840 was only 264,000 kilogrammes (less than 600,000 pounds).

In Asia, coffee is drunk in a thick farinaceous mixture. With us the cup of coffee is valued by its clearness. We generally drink it with sugar and milk. The French with their meals use it as we do,—but after dinner, invariably without milk (*café noir*). And we would suggest to the nervous and the dyspeptic, who do not want to resign the luxury of coffee, or to whom its effects as an arrester of metamorphosis are beneficial, that when drunk on a full stomach its effects upon the nerves are much less felt than when taken fasting or with the meals.

In the consumption of tea the United States rank next to Great Britain. Tea is the chief import from China into this country. The tea-plant flourishes from the equator to the forty-fifth parallel of latitude; though it grows best between the twenty-third and the twenty-fifth parallels. Probably it can be successfully cultivated in our Southern States. Mr. Fortune considers that all varieties of tea are derived from the same plant. Other authorities say that there are two species, the green and the black,—*Thea viridis* and *Thea Bohea*. This point is yet unsettled. Tea is grown in small, shrub-like plantations, resembling vineyards. As it is a national beverage, certain localities are as much valued for choice varieties as are the famous vintage-hills and slopes of Southern France. The buds and the leaves are used; and there are three harvestings,—in February, April, and June. The young, unfolded buds of February furnish the "Youi" and "Soumlo," or "Imperial Teas." These are the delicate "Young Hysons" which we are supposed to buy sometimes, but most of which are consumed by the Mandarins. Souchong, Congo, and Bohea mark the three stages of increasing size and coarseness in the leaves. Black

tea is of the lowest kind, with the largest leaves. In gathering the choicer varieties, we are told on credible authority that "each leaf is plucked separately; the hands are gloved; the gatherer must abstain from gross food, and bathe several times a day." Many differences in the flavor and color of green and black teas are produced by art. Mr. Fortune says of green tea, that "it has naturally no bloom on the leaf, and a much more natural color. It is dyed with Prussian blue and gypsum. Probably no bad effects are produced. There is no foundation for the suspicion that green tea owes its verdure to an inflorescence acquired from plates of copper on which it is curled or dried. The drying-pans are said to be invariably of sheet-iron." We drink our tea with milk or sugar, or both, and always in warm infusion. In Russia, it is drunk cold,—in China, pure; in Ava, it is used as a pickle preserved in oil.

It would be improper not to notice, finally, the moral effect of coffee- and tea-drinking. How much resort to stronger stimulants these innocent beverages prevent can be judged only by the weakness of human nature and the vast consumption of both.

MEN OF THE SEA.

WHEN the little white-headed country-boy of an inland farmstead lights upon a book which shapes his course in life, five times out of six the volume of his destiny will turn out to be "Robinson Crusoe." That wonderful fiction is one of the servants of the sea,—a sort of bailiff, which enters many a man's house and singles out and seizes the tithe of his flock. Or rather, cunning old De Foe,—like Odusseus his helmet, wherewith he detected the disguised Achilles among the maids-of-honor,—by his magic book, sum-

mons to the service of the sea its predestined ones. Why is it, but from a difference in blood and soul, that the sea gets its own so surely? The farmer's sons grow up about the fireside, do chores together, together range the woods for squirrels, woodchucks, chestnuts, and sassafras, go to the same "deestrick-school," and succeed to the same ambitions and hopes. Reuben, the first-born, comes in due time to the care of the paternal acres and oxen. Simeon, Dan, Judah, Benjamin, and the rest, grow up and emigrate to Western

clearings. Levi, it may be, pale, thoughtful Levi, sees other fields "white to harvest," and struggles up through a New England academy- and college-education, to find a seat in the lecture-rooms of Andover, and to hope for a pulpit hereafter. But Joseph, the pet and pride of the household,—what becomes of him? Unlucky little duck! why could he not go "peeping" at the heels of the maternal parent with his brother and sister biddies? Why must he be born with webbed toes, and run at once to the wash-tub, there to make nautical experiments with walnut-shells?

I know why the boys of a seaport-town take kindly to the water. All the birds of the shore are something marine, and their table-flavor is apt to be fishy. We youngsters, who were rocked to sleep with the roar of the surf in our ears,—one wall of whose play-room was colored in blue edged with white, in striking contrast with the peaceful green of the three other sides,—who have many a night lain warm in bed and listened to the distant roll of a sea-chorus and the swinging tramp of a dozen jolly blue-jackets,—we whose greatest indulgence was a sail with Old Card, *the boatman par excellence*,—we who knew ships, as the farmer's boy knows his oxen, before we had mastered the multiplication-table,—it is not strange that we should take kindly to salt water. So, too, all along the lovely "fiords" of Maine, in the villages which cluster about the headlands of Essex, in the brown and weather-mossed cottages which dot the white sands of Cape Cod, by the southern shore of Long Island, wherever the sea and the land meet, the boy grows up drawing into his lungs the salt air, which passes in Nature's mysterious alchemy into his blood, so that he can never wholly disown his birthright. But what is it that draws from the remote inland the predestinate children of the deep?

Poor little Joseph! he tries to slip along with the others; but when the holiday comes, instinct takes him straight to the mill-pond, there to construct forbid-

den rafts and adventure contraband voyages. The best-worn page of his *Malte-Brun Geography* is that which treats the youthful student to a packet-passage to England. He can tell the names of all islands, capes, and bays; but ask him the boundaries of Bohemia or Saxony, the capitals of Western States, and down he goes to the foot of the class. Thus it continues awhile, till, after a fracas at school, or a neglected duty on the farm, or similar severance of the bonds of home, Master Joe may be seen trudging along the dusty seaport-highway, in a passion of tears, but with a resolute heart, and an ever-deepening conviction that he must go on, and not back.

Then there is another class,—the poetical, dreamy adventurer, to whom the sea beckons in every white Undine that rises along the beaches of a moonlight night, to whom it calls in that mournful and magic undertone heard only by those who love and listen. These do not often run away to go to sea; they prefer to voyage genteelly in yachts or packet-ships, and, if the impulse be very strong, will get a commission in the navy. However, if circumstances compel a Tapleyan "coming out strong," they will sometimes face their work, and that right nobly; for there is nowhere that gentle blood so tells as at sea. The utter absence of all sham or room for sham brings out true and noble qualities as well as mean and selfish ones. For ordinary work, one man's muscle is as good as another's. It is only when the time of trial comes,—when the volunteers are called to man the boat that is to venture through the wild seas to pick off the crew of a foundering wreck,—"when the jerking, slatting sail overhead must be got in somehow," though topmast and yard and sail may go any minute,—when the quailing mate or frightened captain dares not *order* men to all but certain death, and still less dares to *lead*,—then it is, when the lives of all hang on the heroism of one, that the good blood will assert itself.

Then there is the class who are *sent* to

sea,—scapegraces all. The alternative is not unfrequently the one of which Dr. Johnson chose the other side. The Doctor being *sans question* a landsman, he never saw, we warrant, any resemblance to fore and main and mizzen in the three spires of Litchfield. But the Doctor, not being a scamp, was not compelled to choose. Many another is not so well off. Like little boys who are sent to school, they learn what they learn from pretty much the same motive. Sometimes they turn out good and gallant men; but not often does it reform a man who is unfit for the shore to dispatch him to sea. If there are any vices he does not carry with him, they are commonly to be had dog- and dirt-cheap at the first port his ship makes.

Then, last of all, there is a large and increasing class who *get* to sea. They fall into the calling, they cannot tell how; they continue in it, they cannot tell why. Some have friends who would rescue them, if they could; others have no friend, no home, no nationality even, the pariahs of the sea, sullen, stupid, and broken-down, burnt-out shells of men, which the belaying-pin of some brutal or passionate mate crushes into sudden collapse, or which the hospital duly consigns to the potter's field.

There is a popular idea of the sailor, which, beginning at the lowest note of the gamut, with the theatrical and cheap-novelist mariner, runs up its do-re-mi with authors, preachers, public speakers, reformers, and legislators, but always in the wrong key. There is no use in making up an ideal of any class; but if you must have one, let it be of an extinct class. It does not much harm to construct horrible plesiosaurians from the petrified scales we dig out of a coal-mine or chalk-pit; but when it comes to idealizing the sea-serpent, who winters at the Cape Verdes and summers at Nahant, it is a serious matter. For the love of Agassiz, give us true dimensions or none.

So, too, fancy Greeks and Romans may be ever preferable to the true Aristophanic or Juvenalian article,—imaginary

Cavaliers or Puritans not at all hard to swallow,—but ideal sailors, why in the world must we bear them, when we can get the originals so cheaply? When the American "Beggar's Opera" was put upon the stage, "Mose" stepped forward, the very impersonation of the Bowery. If it was low, it was at least true, a social fact. But the stage sailor is not as near probability as even the stage ship or the theatrical ocean. He is a relic of the past,—a monstrous compound out of the imperfect gleanings of the Wapping dramatists of the last century. Yet all those who deal with this character of the sailor begin upon the same false notion. In their eyes the seaman is a good-natured, unsophisticated, frank, easy-going creature, perfectly reckless of money, very fond of his calling, unhappy on shore, manly, noble-hearted, generous to a degree inconceivable to landsmen. He is a child who needs to be put in leading-strings the moment he comes over the side, lest he give way to an unconquerable propensity of his to fry gold watches and devour bank-notes, *à la sandwich*, with his bread and butter.

With this theory in view, all sorts of nice schemes are set forward for the sailor, and endless are the dull and decorous substitutes for the merriment or sociability of his favorite boarding-house, and wonderful are the schemes which are to attract the nautical Hercules to choose the austere virtue and neglect the rollicking and easy-going vice. Beautiful on paper, admirable in reports, pathetic in speeches,—all pictorial with anchors and cables and polar stars, with the light-house of Duty and the shoals of Sin. But meanwhile the character of the merchant-marine is daily deteriorating. More is done for the sailor now by fifty times than was done fifty years ago; yet who will compare the crews of 1858 with those of 1808?

There are many reasons for this change, and one is Science. That which always makes the rich richer and the poor poorer, and which can be made to restore the lost equilibrium in a higher civiliza-

tion only by the strong pressure of an enlightened Christianity, has been at work upon the sea. Columbus sailed out of Palos in a very different looking craft from the "Great Republic." The Vikings had small knowledge of taking a lunar, and of chronometers set by Greenwich time. Sir Humphrey Gilbert, when he so gallantly and piously reminded his crew that "heaven was as near by sea as on land," was sitting in the stern of a craft hardly so large as the long-boat of a modern merchantman. Yet the modern time does not give us commanders such as were of old, still less such seamen. Science has robbed the sea of its secret,—is every day bearing away something of the old difficulties and dangers which made the wisest head and the strongest arm so dear to their fellows, which gave that inexpressible sense of brotherhood. Science has given us the steamship,—it has destroyed the sailor. The age of discovery is closing with this century. Up to the limits of the ice-fields, every shore is mapped out, every shoal sounded. Not only does Science give the fixed, but she is even transferring to her charts the variable features of the deep,—the sliding current, the restless and veering wind.

The personal qualities which were once needed for the sea-service are fast passing away. The commander or the master needs no longer to lean upon his men, or they to trust in him. He wants drudges, not shipmates,—obedient, active drudges,—men who can be drilled to quick execution of duty, even as in a machine the several parts. The navy is manned after this pattern; but there is a touchstone which sharpens the edge dulled with routine,—the touchstone of war. When the time comes that the drum-tap calls to quarters, and the decks are strewn with sand,—when with silence as of the grave, fore and aft, the frigate moves stately and proud into the line of her adversaries' fire, then it is that the officer and the man meet face to face, and the awful truth of battle compels them to own their common brotherhood. The merchant-service has few such exigencies.

The greater the size of the ship, the greater the number of the crew. The system of shipping-offices and outfitters breaks up almost all the personal contact between master and men. They come on board at the hour of sailing. A gang of riggers, stevedores, or lightermen work the vessel into the stream. A handful of boosy wretches are bundled into the fore-castle, and as many more rolled, dead-drunk, into their bunks, to sleep off their last spree. The mates are set to the task of dragooning into order the unruly mass. Half the men have spent their advance, and mean to run as soon as the ship arrives. They intend to do as little as they can,—to "soger," and shirk, and work against the ship all they can. The captain cares only to make a quick passage and get what he can out of the crew. Community of interest there is none. Brutal authority is pitted against sullen discontent.

In the old days of the little white-headed farmer's boy's dreams, there were discovery- and trading-ships sailing into unknown seas, and finding fairy islands never visited before. There were savages to trade with,—to fight with, it might be. There were a thousand perils and adventures that called for all the manly and ennobling qualities both of generous command and loyal obedience. It was a point of honor to stick by ship and captain while ship and captain remained to stick by; for the success of a voyage depended on such mutual trust and help. But now where is the sea's secret? There is hardly a square league of water which has not been sailed over. Find an island large enough to land a goat upon, and you will find it laid down in the charts,—and, if it be only far enough south, a Stonington sealer at anchor under its lee, or a New Bedford whaler's crew ashore picking up drift-wood. Where are the old dangers of the sea? We are fast learning to calculate for the storms, and to run from them. Steam-frigates have ended forever the pirates of the Spanish Main. The long, low, black schooner, which could sail dead to windward through the pages of the cheap

"yellow-covers," and the likeness of which sported its skull and crossbones on the said covers, is to be met with nowhere else. Neither the Isle of Pines nor the numberless West India keys know her or her romantic commander any more.

The relations of trade, too, have changed with the changes of Science. We were once gathered with the group of travelers who are wont to smoke the cigar of peace beside the pilot-house of one of our noble Sound steamers. As we rounded the Battery and sped swiftly up the East River, the noblest avenue of New York, lined with the true palaces of her merchant-princes,—an avenue which by its solid and truthful architecture half atones for the flimsiness of its land structures,—as we passed the ocean steamships lying at the "Hook," the sea-captains about me began to talk of the American triumphs of speed. "They say to the Englishmen now," said one, "that we're going to take the berths out of the 'Pacific.'" (She had just made the then crack passage.) "When the English fellows ask, 'What for?'—they say, 'Because Collins intends to run her for a day-boat.'" This extravaganza raised a laugh; but one of the older brethren shook his head solemnly and sadly. "It's all very well," said he; "but what with a steamer twice a week, and your telegraph to New Orleans, they know what's going on at Liverpool as well as if they were at Prince's Dock. It don't pay now to lay a week alongside the levee on the chance of five cents for cotton."

It was a text that suggested a long homily. The shipmaster was degraded from his old position of the merchant's friend, confidential agent, and often brother-merchant. He was to become a mere conductor, to take the ship from port to port. No longer identified with the honor and success of a great and princely house, with the old historic kings of the Northwest Coast, or of Canton, or of Calcutta, he sinks into a mere navigator, and a smuggler of Geneva watches or French embroideries.

We state facts. Thus much has Science done to deteriorate the men of the sea. It has robbed them of all the noblest parts of their calling. It has taken away the spirit of adventure, the love of enterprise, and the manly spirit which braved unknown dangers. It has destroyed their interest by its new-modelling of trade; it has divided labor, and is constantly striving to solve the problem, How to work a ship without requiring from the sailor any courage or head-work, or anything, in short, but mere muscle. It interferes with the healthful relations of officer and man. The docks of Liverpool are a magnificent work, but they necessitate the driving of the seaman from his ship into an atmosphere reeking with pollution. The steam-tugs of New York are a wonderful convenience, but they help to further many a foul scheme of the Cherry-Street crimps and land-sharks.

For all this Science owes a remedy. It must be in a scientific way. We have indicated some of the leading causes of the decline of the seaman's character. The facts are very patent. Step into any shipping-office, or consult any sea-captain of your acquaintance, and you will have full evidence of what we say.

The remedy must not be outside the difficulty. You may build "Bethels" into which the sailor won't come, and "Homes" where he won't stay, distribute ship-loads of tracts, and scatter Bibles broadcast, but you will still have your work to do. The Bethel, the Home, and the Bible are all right, but they are for the shore, and the sailor's home is on the sea. It points an address prettily, no doubt, to picture a group of pious sailors reading their Bibles aloud of a Sunday afternoon, and entertaining each other with profound theological remarks, couched in hazy nautical language. But what is the real truth of the case? It may be a ship close-hauled, with Cape Horn under her lee,—all hands on deck for twelve hours,—sleet, snow, and storm,—the slide over the fore-castle hatchway,—no light below by which to make out a line even of the excellent type of the American

Bible Society, and on deck a gale blowing that would take the leaves bodily out of any book short of a fifteenth-century folio,—this, with the men now reefing and now shaking out topsails and every other thing, as the gale rages or lulls, in the hope of working to windward of certain destruction.

The remedy, to be effectual, must touch the seaman's calling. It is of no use to appeal to his better nature, if he hasn't any. If you make a drudge and a beast of him, you can't do him much good by preaching at him. The working of the present system is, that there are afloat a set of fellows who are a sort of non-countrymen. Like the beach-combers of the Pacific, they have neither country, home, nor friends, and are as different from the old class of American sailors as the *condottiere* from the loyal soldier. Let the navigation-laws be enforced first of all, and see that the due proportion of the crews of every ship be native-born. Let the custom-house protections be no longer the farce they are,—where a man who talks of "awlin haft the main tack" is set down as a native of Martha's Vineyard, and his messmate, who couldn't say "peas" without betraying County Cork, is permitted to hail from the interior of Pennsylvania. Let the ship-owners combine (it is for their interest) to do away with the whole body of shipping-agents, middlemen, and land-sharks. Jack will take his pleasure ashore,—you can't help that; and perhaps so would you, Sir, after six months of "old horse" and stony biscuit, with a leaky fore-castle and a shorthanded crew. Jack will take his pleasure, and that in ways we may all of us object to; but, for Heaven's sake, break up a system of which the whole object is to degrade the man into the mere hack of a set of shore harpies. Do not leave him in the hands of those whom you are now permitting to combine with you to clear him out as swiftly as possible, and then dispatch him to sea. Let the captains ship their own crews on board the ship, and do away with the system of advances. But, at any rate,

do learn to treat the sailor as if he were not altogether a fool. He has sense, plenty of it, shrewd, strong, common sense, and more real gentlemanly feeling than we on shore generally suppose, a good deal of faith, and certain standing principles of sea-morality. But at the same time he has prejudices and whims utterly unaccountable to men living on shore. He will forfeit one or two hundred dollars of wages to run from a ship and captain with which he can find no fault. He will ship the next day in a worse craft for smaller wages. You cannot understand his impulses and moods and grievances till you see them from a fore-castle point of view.

It may be that Science will solve the riddle by casting aside the works and improvements of a thousand years,—the "wave line," the spar, the sail, and all,—and with them the men of the sea. It may be that "Leviathans" will march unheedingly *through* the mountain waves,—that steam and the Winans's model will obliterate old inventions and labors and triumphs. Blake and Raleigh and Fro-bisher and Dampier may be known no more. The poetry and the mystery of the sea may perish altogether, as they have in part. Out of the past looks a bronzed and manly face; along the deck of a phantom-ship swings a square and well-knit form. I hear, in memory, the ring of his cheerful voice. I see his alert and prompt obedience, his self-respecting carriage, and I know him for the man of the sea, who was with Hull in the "Constitution" and Porter in the "Essex." I look for him now upon the broad decks of the magnificent merchantmen that lie along the slips of New York, and in his place is a lame and stunted, bloated and diseased wretch, spiritless, hopeless, reckless. Has he knowledge of a seaman's duty? The dull sodden brain can carry the customary orders of a ship's duty, but more than that it cannot. Has he hopes of advancement? His horizon is bounded by the bar and the brothel. A dog's life, a dog's berth, and a dog's death are his heritage.

The old illusion still prevails and has power over little towheaded Joseph on the Berkshire interval. It will not prevail much longer. It is fast yielding to the power of facts. The Joes of next year may run from home in obedience to the planetary destiny which casts their horoscope in Neptune, but they will not run to the fore-castle. We shall have officers and men of a different class,—the Spartan on the quarter-deck, the Helot in the fore-castle. We have it now. A story of brutal wrong on shipboard startles the public. A mutiny breaks out in the Mersey, and a mate is beaten to death, and we wonder why the service is so demoralized. The story could be told by a glance at the names upon the shipping-papers. The officers are American,—the men are foreigners, blacks, Irish, Germans, non-descripts, but hopelessly severed from the chances of the quarter-deck. The law may interpose a strong arm, and keep the officer from violence, the men from mutiny. We may enact a Draconian code which shall maintain a sullen and revengeful order upon the seas, but all fellowship and mutual helpfulness are gone. When the day of trial comes,—the wreck, the fire, the leak,—subordination is lost, and every man scrambles for his own selfish safety, leaving women and children to the flames and the waves. Why is it that ships, dismasted, indeed, but light and staunch, are so often found rolling abandoned on the seas? It is the daily incident of our marine columns. I have been told by an old shipmaster, how, when he was a young mate, his ship was dismasted on the Banks of Newfoundland, on a voyage to Europe. The captain had been disabled and the vessel was leaking. He came into command. But in those days men never dreamed of leaving their ship till she was ready to leave them. They rigged jury-masts, and, under short canvas and working at the pumps, brought their craft to the mouth of Plymouth Harbor. The pilot demanded salvage, and was refused leave to come on board.

The mate had been into that port before, was a good seaman and a sharp observer, and he took his vessel safely to her anchorage himself, rather than burden his owners with a heavy claim. Captains and mates will not now-a-days follow that lead, because they cannot trust their men, because with every emergency the *morale* of the fore-castle is utterly gone.

For all this there is of course no universal panacea. Nor do I believe that legislation will much help the matter. The common-law of the seas, well carried out by competent courts of admiralty, is better than many statutes. For emergencies require extraordinary powers and a wide discretion. There can be no divided rule in a ship. But if every man know his place and his duty, and none overstep it, there will come thereof successful and happy voyages. There must be discipline, subordination, and law. The republican theory stops with the shore. "Obey orders, though you break owners," is the Magna Charta of the main. This can be well and wisely carried out only with some homogeneity of the ship's company, with a community of feeling and a community of interest. Everybody who has been off soundings knows, or ought to know, the difference between things "done with a will" and "sogering." If it be important on land to adjust the relations of employer and employed, it is doubly important on the sea, where the peril and the privation are great. For it is a hard life, a life of unproductive toil, that oftenest shows no results while accomplishing great ends. It cannot be made easy. The gale and the lee-shore are the same as when the sea-kings of old dared them and did battle with them in the heroic energy of their old Norse blood. The wet, the cold, the exposure must be, since you cannot put a Chilson's furnace into a ship's fore-castle, nor wear India-rubbers and carry an umbrella when you go aloft. But men will brave all such discomforts and the attendant perils with a hearty delight, if you will train up the right

spirit in them. Better the worst night that ever darkened off Hatteras, than the consumption-laden atmosphere of the starving journeyman-tailor's garret, the slow inhalation of pulverized steel with which the needle-maker draws his every breath! The sea's work makes a man, and leaves him with his duty nobly done, a man at the last. Courage, loyal obedience, patient endurance, the abnegation of selfishness,—these are the lessons the sea teaches. Why must the shore make such diabolical haste and try such fiendish ingenuity to undo them? The sea is pure and free, the land is firm and stable,—but where they meet, the tide rises and falls, leaving a little belt of sodden mud, of slippery, slimy weeds, where the dead refuse of the sea is cast up to rot in the hot sun. Something such is the welcome the men of the sea get from that shore which they serve. Into this Serbonian bog between them and us we let them flounder, instead of building out into their domain great and noble piers and wharves, upon which they can land securely and come among us.

* Some years ago, a young scholar was led to step forth from his natural sphere into the fore-castle of a merchantman. No quarrel with the world, no romantic fancy, drove him thither, but a plain common-sense purpose. He saw what he saw fairly, and he has told the tale in a volume which, for picturesque clearness, vigor, and manly truthfulness, will scarcely find its equal this side the age of Elizabeth. He owed it to the sea, for the sea gave him health, self-reliance, and fearlessness, and that persistent energy which saved him from becoming that which elegant tastes and native refinement make of too many of our young men, a mere literary or social *dilettante*, and raised him up to be a champion of right, a chivalrous defender of the oppressed, whose name has honored his calling. His book was an effort in the right direction. By that we of the land were brought nearer to those to whom this country owes so much, its merchant-seamen. But we

want more than the work, however noble, of one man. We want the persistent and Christian interest in the elevation of the seaman of every man who is connected with his calling. We do not want a Miss-Nancyish nor Rosa-Matildan sentimentalism, but a good, earnest, practical handling of the matter. We call our merchants princes. If wealth and lavish expenditure make the prince, they are, indeed, fit peers of Esterhazy or Lichtenstein. But the true princely heart looks after the humblest of its subjects. When the poor of Lyons were driven from their homes by the flooded Rhone, Louis Napoleon urged his horse breast-deep into the tide to see with his own eyes that his people were thoroughly rescued. The merchant whose clippers have coined him gold should spare more than a passing thought upon the men who hung over the yards and stood watchful at the wheel. England's ears can afford to look after the toiling serfs in their collieries; the patricians of New York and Boston might read as startling a page as ever darkened a Parliamentary Blue-book, with a single glance into Cherry and Ann Streets.

For a thousand years the Anglo-Saxon race has been sending its contributions to the nation of the Men of the Sea. Ever since the Welshman paddled his coracle across Caernarvon Bay, and Saxon Alfred muscled over the Danish galley wrecked upon his shore, each century has been adding new names of fame to the Vikings' bead-roll. Is the list full? has Valhalla no niche more for them? and must the men of the sea pass away forever? If it must be so,—it must. *Che sarà sarà*. But if there is no overruling Fate in this, but only the working of casual causes, it is somebody's care that they be removed. In almost all handicrafts and callings the last thirty years have wrought a vast and rapid deterioration of the men who fill them. Machinery, the boasted civilizer, is the true barbarizer. The sea has not escaped. Its men are not what the men of old were. The question is, Can we let

them go?—can they be dispensed with among the elements of national greatness?

Passing fair is Venice, but she sits in lonely widowhood in the deserted Adriatic. Amalfi crouches under her cliffs in the shame of her poverty. The harbors of Tyre and Carthage are lonesome pools. They tell their own story. When the men of the sea no longer find a home or a welcome on the shore,—when they are driven to become the mere hirelings

who fight the battles of commerce, like other hirelings they will serve beneath the flag where the pay and the provant are most abundant. The vicissitudes of traffic are passing swift in these latter days; and it does not lie beyond the reach of a possible future that the great commercial capitals of the Atlantic coast may be called to pause in their giddy race, even before they have rebuilt the Quarantine Hospital, or laid the capstone of the pharos of Minot's Ledge.

CHICADEE.

THE song-sparrow has a joyous note,
The brown thrush whistles bold and free;
But my little singing-bird at home
Sings a sweeter song to me.

The cat-bird, at morn or evening, sings
With liquid tones like gurgling water;
But sweeter by far, to my fond ear,
Is the voice of my little daughter.

Four years and a half since she was born,
The blackcaps piping cheerily,—
And so, as she came in winter with them,
She is called our Chicadee.

She sings to her dolls, she sings alone,
And singing round the house she goes,—
Out-doors or within, her happy heart
With a childlike song o'erflows.

Her mother and I, though busy, hear,—
With mingled pride and pleasure listening,—
And thank the inspiring Giver of song,
While a tear in our eye is glistening.

Oh! many a bird of sweetest song
I hear, when in woods or meads I roam;
But sweeter by far than all, to me,
Is my Chicadee at home.

THE ILLUSTRIOUS OBSCURE.

A SECOND LETTER FROM PAUL POTTER, OF NEW YORK, TO THE DON ROBERTO WAGONERO, COMMORANT OF WASHINGTON, IN THE DISTRICT OF COLUMBIA.

22,728, Five Hundred and Fifty-First St., }
New York, June 1, 1858. }

DEAR DON BOBUS,—I see that you have been Christian enough to send my last letter to "The Atlantic Monthly," and that the editors of that famous work have confirmed my opinion of their high taste by printing it. Your disposition of my MSS. I do not quarrel with; although it must be regarded in law as an illegal liberty, inasmuch as the Court of Chancery has decided that a man does not part with property in his own letters merely by sending them; but I ask permission to hint that your conduct will acquire a certain graceful rotundity, if you will remit to me in current funds the munificent sum of money which the whole-souled and gentlemanly proprietors—pardon the verbal habits of my humble calling!—have without doubt already remitted to you. *Pecunia prima querenda,—virtus post nummos.* Mind you, I do not expect to be as well paid as Sannazarius.

"Who the deuse was he?" I hear you growling.

My dear Iberian friend, I really thought that you knew everything; but I find that you have set up for an Admirable Crichton upon an inadequate capital. Know, then, that a great many years ago Sannazarius—never mind who he was,—I do not justly know, myself—wrote an hexastich on the city of Venice, and sent it to the potent Senators of that moist settlement. It was as follows:—

"Viderat Adriacis Venetam Neptunus in undis
Stare urbem et toti ponere jura mari.
Nunc mihi Tarpeias quantumvis, Jupiter,
arces,

Objice, et illa tui mœnia Martis, ait;
Sic Pelago Tibrim præfers; urbem aspice
utramque,
Illam homines dices, hanc posuisse deos."

Which may be liberally rendered thus:—

When sea-faring Neptune saw Venice well-founded

And stiffly coercing the Adrian main,
The jolly tar cried, in a rapture unbounded:

"Why, d—ash my eyes, Jove, but I have you again;

You may boast of your city, and Mars of his walling;

But while I'm afloat, I'll stick to it that mine

Beats yours into rope-yarn, in spite of your bawling,

Just as snuffy old Tiber is flogged by the brine;

And he who the difference cannot discern
Is a lob-sided lubber from bowsprit to stern.

"Very free, indeed!" you will say. It might have been worse, if I had staid at college a year or two longer, or if I had been elevated to a place in the Triennial Catalogue,—thus:

* PAULUS POTTER, LL.D., S. T. D., Bar-
rat. V. Gubernator, Lit. Hum. Prof.,
e Cong., Præses Rerumpub. Fæd., A.
B. Yal., M.D. Dart., D.D. Dart., P.D.
V. Mon., etc., etc., etc.

I have put myself down *stelliger*, because it is certain, that, after obtaining all the above honors, if not an inmate of the cold and silent tomb, I should be false to my duties as a member of society, and a nuisance to my fellow-creatures. The little anachronism of translating after being translated you will also pardon; and talking of the tomb, let us return to Sannazarius. I pray that your nicely noble nose may not be offended by the tarry flavor of my version. You will find the Latin in Howell's "Survey of Venice," 1651,—a book so thoroughly useless, and so scarce withal, that I am sure it must be in your library. By the way, as you

have written travels in all parts of this and other worlds, without so much as stirring from your arm-chair, and have calmly and coolly published the same, I must quote to you the rebuke of Howell, who says, "He would not have adventured upon the remote, outlandish subject, had he not bin himself upon the place; had he not had practicall conversation with the people of whom he writes." This veracious person very properly dedicated his book to the saints in Parliament assembled, many of whom had, soon after, ample leisure for perusing the fat folio. Nor is it perfectly certain that you have read the book, although you may own it; since it is your sublime pleasure to collect books like Guiccardini's History, which somebody went to the galleys rather than read through.

But let us return, my dear Bobus, to the money question. Know, then, that the Sannazarian performance above quoted, so different from the language of the malignant and turhaned Turks, filled with rapture the first Senator and the second Senator and all the other Senators mentioned in Act I., Scene 3, of "Othello," so that, in grand committee, and, for all I know to the contrary, with Brabantio in the chair, they voted to the worthy author a reward of three hundred zechins, or, to state it cambistically in our own beloved Columbian currency, \$1,233.20, —this being the highest literary remuneration upon record, if we except the untold sums lavished by "The New York Blotter" upon the fascinating author of "Steel and Strychnine; or, the Dagger and the Bowl." But as we have had enough of Sannazarius, let us leave him with the gentle hope that his check was cashed in specie at the Rialto Bank, and that he made a good use of the money.

Now, dear Don, in the great case of *Virtue vs. Money*, I appear for the defendant. Confound Virtue, say I, and the whole tribe of the Virtuous! I am as weary of both as was that sensible Athenian of hearing Aristides called *The Just*; and if I had been there, and a legal voter, I know into which box my humble

oyster-shell would have been plumped. Such was the vile, self-complacent habit of the Athenians, that I suspect the best fellows then were not good fellows at all. And what did the son of Lysimachus make by being recalled from banishment? He died so poor, that he was buried at the public charge, and left a couple of daughters as out-door pensioners upon public charity. The Athenians, I aver, were a duncified race; and it would have pleased me hugely to have been in the neighborhood when Alcibiades rescinded his dog's charming tail,—a fine practical protest, although unpleasant to the dog. Virtue may be well enough by way of variety; but for a good, steady, permanent pleasure, commend me to Avarice! Yes, O my Bobus, I, who was once, as to money, "still in motion of raging waste," and, like Timon, "senseless of expense,"—I, who have many a time borrowed cash of you with amiable recklessness, and have never asked you to take it back again,—I, who have had many a race with the constable, and have sometimes been overtaken,—I, who have in my callow days spoken disrespectfully of Mammon in several charming copies of verses,—I am waxing sordid. I am for the King of Lydia against Solon. How do I know that the insolent Cyrus was not blandished out of his bloodthirsty intention of roasting his deposed brother by a little cash which the son of Gyges had saved out of the wide, weltering wreck of his wealth, and had concealed in his boots? Royal palms were not wholly free from *pruritus* even then. Why has this silly world still persisted in putting long ears upon Midas? I do not know whether he sang better or worse than Apollo; and I am sure it is much better, and bespeaks more sense, to play the flute ill than to play it well. Depend upon it, his Majesty of Phrygia has been very much abused by the mythologists. With that particular skill of his, during an epidemic of the *brevitas pecuniaria*, (*Angl. shorts*;) he would have been just the person to coax into one's house of accompt, at five

minutes before two o'clock in the afternoon, to work a little involuntary transmutation,—to change the coal-scuttle into ingots, and the ruler into a great, gorged, glittering *rouleau*. So little would his auricular eccentricity have hindered his welcome, that I verily believe he would have been heartily received, if he had come with ensanguined chaps straight from the pillory, and had left both ears nailed to the post.

Don't talk to me about filthy lucre! Pray, when would Sheikh Tâhâr, that eminent Koordish saint, have become convinced that he was a great sinner, if they had not carried about the contribution-boxes in the little New England churches? Do you think it has cost nothing to demonstrate to the widows of Scindiah the folly of *suttee*? Don't you know that it has been an expensive work to persuade the Khonds of Goomsoor to give up roasting each other in the name of Heaven? Very fine is Epictetus,—but will he be your bail? Will Diogenes bring home legs of mutton? Can you breakfast upon the simple fact that riches have wings and use them? Can you lunch upon *vanitas vanitatum*? Are loaves and fishes intrinsically wicked? As for Virtue, we have the opinion of Horace himself, that it is viler than the vilest weed, without fortune to support it. Poets, of all men, are supposed to live most easily upon air; and yet, Don Bob, is not a fat poet, like Jamie Thomson, quite likely, although plumper than be-seems a bard, to be ten thousand times healthier in his singing than my Lord Byron, thinning himself upon cold potatoes and vinegar? Do you think that Ovid cuts a very respectable figure, blubbing on the Euxine shore and sending penitential letters to Augustus and afterward to Tiberius? He was a poor puppy, and as well deserved to have three wives as any sinner I ever heard of. Don't you think, that, if the cities of Smyrna, Chios, Colophon, Salamis, Rhodes, Argos, and Athens had given over disputing about the birth-place of the author of the "Iliad" and

other poems, and had "pooled in" a handsome sum to send him to a blind asylum, it would have been a sensible proceeding? Do you think Milton would have written less sublimely, if he had been more prosperous? Do you think Otway choking, or Hudibras Butler dying by inches of slow starvation, pleasant to look upon? Are we to keep any terms with the thin-visaged jade, Poverty, after she has broken down a great soul like John Dryden's? That is a very foolish notion which has so long and so universally prevailed, that a poet must, by the necessity of the case, be poor. David was reckoned an eminent bard in his day, and he was a king; and Solomon, another sweet singer, was a king also. Depend upon it, no man sings, or thinks, or, if he be a man, works, the worse for being tolerably provided for in basket and pocket-money.

Objectively considered, I say that there is not in this world a sadder sight, one so touchingly suggestive of departed joys, departed never to return, as a pocket-book, flat, planed, exenterated, crushed by the elephantine foot of Fate,—nor is there one so ridiculous, inutile, impertinent, possibly reproachful and disagreeably didactic. Think of it, Don Bob,—for you in your day, as I in mine, have seen it. 'Tis so much leather stripped from the innocent beast, and cured and colored and polished and stamped to no purpose,—with a prodigious show of empty compartments, like banquet-halls deserted. It has a clasp to mount guard over nothing,—a clasp made of steel digged from the bowels of the earth, and smelted and hammered and burnished, only to keep watch and ward after the thief has made his visit leisurely. 'Tis an egregious chaos. 'Tis an absurd vacuum. To make it still more unpleasant, there are your memoranda. You are reminded that upon Thursday last you purchased butter flavous, or chops rosy; but where is hint, sign, direction, or instruction touching the purchase of either upon Thursday next? How much would it have helped poor

Belisarius, in his sore estate, if he had kept a record of his household expenses, as my friend Minimus does? By the same token, he sometimes makes odd misentrics, pious figurative fictions, in order to save the feelings of Mrs. Minimus, who is auditor-general and comptroller of the household. And speaking of Belisarius, just fancy the hard fate of that gallant and decayed soldier! Figure him left naked by the master whom he had served so well, crying out for a beggarly *obolus*! Now this, you must know, was one of the least respectable coins of ancient times, being of about the value of one farthing sterling. If the poor man had got his battered old helmet full of them, the ponderous alms would not have driven the wolf gaunt and grinning many paces from his squalid home,—always admitting that he had any home, however squalid, to crawl into at sunset. And how often he crouched and whined, white-headed and bare-headed all day, and did not get a *lepton* (which was, in value, thirty-one three hundred thirty-sixths of an English farthing) for his pains! 'Tis such a pitiful story, that I am truly glad that the eminent German scholar, Nicotinus of Heidelberg, in his work upon the Greek Particle, has pretty clearly shown (Vol. xxviii. pp. 2850 to 5945) that the story may be regarded as a myth, illustrating the great, eternal, and universal danger of ultimate seediness, in which the most prosperous creatures live. And just think of Napoleon squabbling about wine with Sir Hudson Lowe,—the hero of Arcola, without courage enough to hang himself. Now you will notice, my dear friend, that he did not lose his dignity, until, with true British instinct, they took away his cash, and even opened his letters to confiscate his remittances. He should have hidden the imperial spoons in a secret pocket. He should, at least, have saved a sixpence wherewithal to buy Mr. Alison.

You may think, dear Don, that my views are exceedingly sordid. I readily admit that all the philosophy and poetry, and I suppose I must add the morality,

of the world are against me. I know that it is prettier to turn up one's nose at ready cash. I have not found, indeed, that for the poetical pauper, in his proper person, the world, whether sentimental or stolid, has any deep reverence. Will old Jacob Plum, who lives on an unapproachably high avenue,—his house-front and his heart of the same material,—and who made two mints of money in the patent *poudrette*, come to my shabby little attic in Nassau Street, and ask me to dinner simply because "The Samos (Ill.) Aristarchean" has spoken with condescending blandness of my poems? I know that Miss Plum dotes upon my productions. I know that she pictures me to herself as a Corydon in sky-blue smalls and broad-brimmed straw hat, playing elegies in five flats, or driving the silly sheep home through the evening shades. Now, whatever else I may be, I am not that. I keep my refinement for gala-days; I do not shave, because I would save sixpences; I do not wear purple and fine linen. I should be a woful disappointment to Mistress Plum; for I like beer with my beef, and a heart-easing tug at my pipe afterwards; and as for the album, we should never get along at all, for I have too much respect for poetry to write it for nothing. But if I have not wholly escaped the shiftlessness and improvidence of my vocation,—if I have never rightly comprehended the noble maxim, "A penny saved is a penny gained," (which cannot in rigid mathesis be true, because by saving the penny you miss the enjoyment: that is, half-and-half, chops, or cheese; which the penny aforesaid would purchase; so that the penny saved is no better than pebbles which you may gather by the bushel upon any shore.)—if I like to haunt Old Tom's, and talk of politics and poetry with the dear shabby set who nightly gather there, and are so fraternally blind to the holes in each other's coats,—why it is all a matter between myself and Mrs. Potter, and perhaps the clock. We have a good, stout, manly supper,—no Apician kickshaws, the triumphs of palate-science,—no nightingales' tongues, no peacocks'

brains, no French follies,—but just a rasher or so, in its naked and elegant simplicity. Montaigne's cook, who treated of his art with a settled countenance and magisterial gravity, would have turned his nose skyward at our humble repast; and he would have cast like scorn upon that to which Milton with such charming grace invited his friend, in one of those matchless sonnets which make us weep to think that the author did not write a hundred of them. But Montaigne's cook may follow his first master, the late Cardinal Caraffa, to that place where there will always be fire for his saucepans! The epicures of Old Tom's would deal very crisply with that spit-bearing Italian, or his shade, should it appear to them. We are not very polished, but most of us could give hints to men richer than we can hope to be of a wiser use of money than the world is in any danger of witnessing. There is Old Sanders, the proof-reader,—“illegitimate S.” we call him,—who knows where there is an exquisite black-letter Chaucer which he pants to possess, and which he would possess, were it not for a fear of Mrs. Sanders and a tender love of the little Sanderses. There is young Smooch,—he who smashed the Fly-Gallery in “*The Mahlstick*” newspaper, and was not for a moment taken in by the new Titian. There is Crosshatch, who has the marvellous etching by Rembrandt, of which there are only three copies in the world, and which he will not sell,—no, Sir,—not to the British Museum. There is Mr. Brevier Lead, who has in my time successively and successfully smitten and smashed all the potentates, big and little, of Europe, and who has in his museum a wooden model of the Alsop bomb. Give them money, and Sanders will rebuild and refurnish the Alexandrian Library,—Smooch will bid every young painter in America reset his palette and try again,—and Brevier Lead will be fool enough to start a newspaper upon his own account, and, while his purse holds out to bleed, will make it a good one. But until all these high and mighty things happen,—until we come

into our property,—we must make the best of matters. I know a clever Broadway publisher, who, if I were able to meet the expenses, would bring out my minor poems in all the pomp of cream-laid paper, and with all the circumstance of velvet binding, with illustrations by Darley, and with favorable notices in all the newspapers. I should cut a fine figure, metaphorically, if not arithmetically speaking; whereas my farthing rush-light is now sputtering, clinking, and guttering to waste, and all because I have not a pair of silver snuffers. If you wish me to move the world, produce your lever! Your wealthy bard has at least audience; and if he cannot sing, he may thank his own hoarse throat, and not the Destinies.

For myself, dear Don Bob, having come into my inheritance of oblivion while living,—having in vain called upon Fame to sound the trumpet, which I am sure is so obstinately plugged that it will never syllable my name,—having resolutely determined to be nobody,—I do not waste my sympathy upon myself, but generously bestow it upon a mob of fine fellows in all ages, who deserved, but did not grasp, a better fortune. All that live in human recollection are but a handful to the tribes that have been forgotten. You will be kind enough, my sardonic friend, to repress your sneers. I tell you that a great many worthy gentlemen and ladies have been shouldered out of the Pantheon who deserved at least a corner, and who would not while living have given sixpence to insure immortality, so certain were they of monuments harder than brass. The murrain among the poets is the severest. For, in the first place, a fine butterfly may have a pin stuck through his stomach even while living. There are Bavins and Mævius, who have been laughed at since Virgil wrote his Third Eclogue. Now why does the world laugh? What does the world know of either? They were stupid and malevolent, were they? Pray, how do you know that they were? You have Virgil's word for it. But how do you know that Virgil was just? It might have been

the east wind ; it might have been an indigestion ; it might have been Virgil's vanity ; it might have been all a mistake. When a man has once been thoroughly laughed down, people take his stupidity for granted ; and although he may grow as wise as Solomon, living he is considered a fool, dying he is regarded as a fool, and dead he is remembered as a fool. Do you not suppose that very respectable folk were pilloried in the "Dunciad" ? My own opinion is, that a person must have had some merit, or he would not have been put there at all. How many of those who laugh at Dennis and Shadwell know anything of either ? And let me ask you if the Pope set had such a superabundance of heart, that you would have been willing, with childlike confidence, to submit your own verses to their criticism ? For myself, I am free to say that I have no patience with satirists. I never knew a just one. I never heard of a fair one. They are a mean, malicious, murdering tribe,—they are a supercilious, dogmatical, envious, suspicious company,—knocking down their fellow-creatures in the name of Virtue for their own gratification,—mere Mohawks, kept by family influence out of the lock-up.

But of all Mohawks, Time is the fiercest. If I were upon the high road to fame, if I had honestly determined to win immortality or perish in the attempt, I should look upon the gentleman with no clothing except a scanty forelock, and with no personal property save his scythe and hour-glass, as my greatest enemy,—and I should behold the perpetual efforts made to kill him with perfect complacency. This, I know, is not regarded as a strictly moral act ; for this murderer of murderers is very much caressed by those who, in the name of Moses, would send a poor devil to his hempen destiny for striking an unlucky blow. How continually is it beaten upon the juvenile tympanum,—“Be careful of Time,”—“Time is money,”—“Make much of Time” ! Certainly, I do not know what he has done to merit consideration so

tender. The best that can be said of old Edax Rerum is that he has an unfailing appetite, and is not very fastidious about his provender,—and that, if he does take heavy toll of the wheat, he also rids the world of no small amount of chaff. But 'tis such a prodigious maw !

You think, Don Bob, that you know the name of every man who has distinguished himself since the days of Deucalion and Pyrrha. Let us see how much you know. I believe that in your day you had something to do with the new edition of the Aldine Poets. I therefore ask you, in the name of an outraged gentleman, who is too dead to say much for himself, why you left out of the series my friend Mr. Robert Baston. You have used Baston very ill. Baston was an English poet. Baston lived in the fourteenth century, and wrote verses in Nottingham. When proud Edward went to Scotland, he took Baston along with him to sing his victories. Unhappily, Bruce caged the bird, and compelled him to amend his finest poems by striking out “Edward,” wherever the name of that revered monarch occurred, and inserting “Robert,” which, as I have said, he was obliged to do,—and a very ridiculous mess the process must have made of Mr. Baston's productions. This is all I know of Baston ; but is not this enough to melt the toughest heart ? No wonder he prologued his piping after the following dismal fashion :—

“In dreary verse my rhymes I make,
Bewailing whilst such theme I take.”

However, Baston was a monk of the Carmelite species, and I hope he bore his agonies with religious bravery.

And now let us make a skip down to Charles Aleyn, *temp.* Charles I. “of blessed memory.” A Sidney collegian of Cambridge, he began life as an usher in the celebrated school of Thomas Farnaby,—another great man of whom you never heard, O Don !—a famous school, in Goldsmith's Rents, near Red-Cross Street, in the Parish of St. Giles, Cripplegate. Those were stirring times ; but Aleyn managed to write, before he died, in

1640, a rousing great poem, intituled, "The Battailes of Crescey and Poictiers, under the Fortunes and Valour of King Edward the Third of that Name, and his Sonne, Edward, Prince of Wales, surnamed The Black." 8vo. 1633. Let me give you a taste of his quality, in the following elaborate catalogue of the curiosities of a battle-field :—

"Here a hand severed, there an ear was
cropped;
Here a chap fallen, and there an eye put
out;
Here was an arm lopped off, there a nose
dropped;
Here half a man, and there a less piece
fought;
Like to dismembered statues they did stand,
Which had been mangled by Time's iron
hand."

This is prosaic enough, and might have been written by a surgical student; but this is better :—

"The artificial wood of spears was wet
With yet warm blood; and trembling in
the wind,
Did rattle like the thorns which Nature set
On the rough hide of an armed porcu-
pine;
Or looked like the trees which droppèd
gore,
Plucked from the tomb of slaughtered Poly-
dore."

So much for Mr. Charles Aleyn.

But it is at the theatre, as you may well believe, that poets live and die most like the blithesome grasshoppers. The poor players, marvellous compounds of tin, feathers, and tiffany, fret but a brief hour; but the playwright, less considered alive, is sooner defunct. I have not Dodsley's Plays by me, but, if my memory does not deceive me, not one of them keeps the stage; nor did dear Charles Lamb make many in love with that huge heap in the British Museum. Alas! all these good people, now grown so rusty, fusty, and forgotten, might have rolled under their tongues, as a sweet morsel, those lines which civil Abraham Cowley sent to Leviathan Hobbes :—

"To things immortal Time can do no wrong;
And that which never is to die forever must
be young."

Alas! they had great first nights and glorious third nights,—lords and ladies smiled and the groundlings were affable,—they lived in a paradise of compliment and cash,—and then were no better off than the garreteer who took his damnation comfortably early upon the first night, and ran back to his den to whimper with mortification and to tremble with cold. There is worthy Mr. Shakspeare, of whom an amiable writer kindly said, in 1723,—“There is certainly a great deal of entertainment in his comical humors, and a pleasing and well-distinguished variety in those characters which he thought fit to meddle with. His images are indeed everywhere so lively, that the thing he would represent stands full before you, and you possess every part of it. His sentiments are great and natural, and his expression just, and raised in proportion to the subject and occasion.” You may laugh at this as much as you please, Don Bob; but I think it quite as sensible as many of the criticisms of Samuel Johnson, LL.D.,—as that one of his, for instance, upon “Measure for Measure,” which I never read without a feeling of personal injury. I should like to know if it is writing criticism to write,—“Of this play, the light or comic part is very natural and pleasing; but the grave scenes, if a few passages be excepted, have more labor than elegance.” Now, if old Boltcourt had written instead, as he might have done, if the fit had been on him,—“Of this play, the heavy or tragic part is very natural and pleasing; but the comic scenes, if a few passages be excepted, have more labor than elegance,”—his remark would have been quite as sonorous, and just a little nearer the truth. For my own part, I think there is nothing finer in all Shakspeare than the interview between Angelo and Isabella, in the Second Act, or that exquisite outburst of the latter, afterward, “Not with fond shekels of the tested gold,” which is a line the sugar of which you can sensibly taste as you read it. Incedon used to wish that his old music-master could come down from heaven to Norwich, and could take the

coach up to London to hear that d—d Jew sing,—referring thus civilly to the respectable John Braham. I have sometimes wished that Shakspeare could make a similar descent, and face his critics. Ah! how much he could tell us over a single bottle of *Rosa Solis* at some new “Mermaid” extemporized for the occasion! What wild work would he make with the commentators long before we had exhausted the ordinate cups! and how, after we had come to the inordinate, would he be with difficulty prevented from marching at once to break the windows of his latest glossator! If anything could make one sick of “the next age,” it would be the shabby treatment which the Avonian has received. I do not wonder that the illustrious authors of “*Salmagundi*” said,—“We bequeathe our first volume to future generations,—and much good may it do them! Heaven grant they may be able to read it!” Seeing that contemporary fame is the most profitable,—that you can eat it, and drink it, and wear it upon your back,—I own that it is the kind for which I have the most absolute partiality. It is surely better to be spoken well of by your neighbors, who do know you, than by those who do not know you, and who, if they commend, may do so by sheer accident.

You never heard of Mr. Horden, of Charles Knipe, of Thomas Lupon, of Edward Revet? Great men all, in their day! So there was Mr. John Smith,—*clarum et venerabile nomen!*—who in 1677 wrote a comedy called “*Cytherea*; or, the Enamoring Girdle.” So there was Mr. Swinney, who wrote one play called “*The Quacks*.” So there was Mr. John Tutchin, 1685, who wrote “*The Unfortunate Shepherd*.” So there is Mr. William Smith, Mr. H. Smith, author of “*The Princess of Parma*,” and Mr. Edmund Smith, 1710, author of “*Phedra and Hippolytus*,” who is buried in Wiltshire, under a Latin inscription as long as my arm. There is Thomas Yalden, D.D., 1690, who helped Dryden and Congreve in the translation of Ovid,

who wrote a Hymn to Morning, commencing vigorously thus:—

“Parent of Day! whose beauteous beams of light

Sprang from the darksome womb of night!”—

and who was a great friend of Addison, which is the best I know of him. He might have been, like Sir Philip Sidney, “scholar, soldier, lover, saint,”—for Doctors of Divinity have been all four,—but I declare that I have told you all I have learned about him.

It is grievous to me, dear Bobus, a man of notorious gallantry, to find that the ladies, after consenting to smirch their rosy fingers with Erebean ink, are among the first who are discarded. If you will go into the College Library, Mr. Sibley will show you a charming copy of the works of Mrs. Behn, with a roguish, rakish, tempting little portrait of the writer prefixed. Poor Mrs. Behn was a notability as well as a notoriety in her day; and when I have great leisure for the work, I mean to write her life and do her justice. The task would have been worthy of De Foe; but, with a little help from you, I hope to do it passably. Poor Aphra! poet, dramatist, intriguing strumpet! Worthy of no better fate, take my benison of light laughter and of tears! Then there is Mrs. Elizabeth Singer, who was living in 1723, who selected as the subject of her work nothing less than the Creation, and who was a woman of great religion. Her poem commences patronizingly thus:—

“Hail! mighty Maker of the Universe!

My song shall still thy glorious deeds rehearse.

Thy praise, whatever subject others choose,
Shall be the lofty theme of my aspiring Muse.”

Elizabeth was a Somersetshire woman, a clothier's daughter; and if she had thrown away her lyre and gone back to the distaff, I do not think Parnassus would have broken its heart. Then there is our fair friend, Mrs. Molesworth. Her father was a Right Honorable Irish peer of the same name, who had some acquaintance, if not

a friendlier connection, with John Locke. Her Muse was rather high-skirted, as you may believe, when you read this epitaph:—

“O’er this marble drop a tear!
 Here lies fair Rosalinde;
 All mankind was pleased with her,
 And she with all mankind.”

Let me introduce you to one more lady. This is Mrs. Wiseman, dear Don! She was of “poor, but honest” parentage; and if she did wash the dishes of Mr. Recorder Wright of Oxford, she did better than my Lady Hamilton or my Lady Blessington of later times. Mrs. Wiseman read novels and plays, and, of course, during the intervals of domestic drudgery, began to write a drama, which she finished after she went to London. It was of high-sounding title, for it was called, “Antiochus the Great; or, the Fatal Relapse.” Who relapsed so fatally—whether Antiochus with his confidant, or his wife with her confidante, or Ptolemy Pater with his confidant, or Epiphanes with his confidant—is more than I can tell. Indeed, I am not sure that I know which Antiochus was honored by Mrs. Wiseman’s Muse. Whether it was Antiochus Soter, or Antiochus Theos, or Antiochus the Great, or Antiochus the Epiphanous or Illustrious, or Antiochus Eupator, or Antiochus Eutheus, or Antiochus Sidetes, or Antiochus Grypus, or Antiochus Cyzenicus, or Antiochus Pius,—the greatest rogue of the whole dynasty,—or Antiochus Asiaticus, who “used up” the family entirely in Syria—is more than I can tell. Indeed, Antiochus was such a favorite name with kings, that, without seeing the play,—and I have not seen it,—I cannot inform you which Antiochus we are talking about. Possibly it was the Antiochus who went into a fever for the love of Stratonice; and if so, please to notice that this was the wicked Antiochus Soter, the son of Seleucus, and the scapegrace who married his mother-in-law, by the

advice of the family-doctor, while his fond father stood tearfully by and gave away the bride. After such a scandalous piece of business, I shall have nothing more to do with the family, but shall gladly return to our talented friend, Mrs. Wiseman. She brought out her work at the Theatre Royal in 1706, “with applause”; and the play, I am glad to inform you, brought in money, so that an enterprising young vintner, by the name of Holt, besought her hand, and won it. With the profits of “Antiochus” they established a tavern in Westminster, and the charming Wiseman with her own hand drew pots of half-and-half, or mixed punch for the company. I should very much like to see two-thirds of our many poet-esses doing the same thing.

But enough, probably too much, of this skimble-skamble! If you will look into a copy of Dr. Johnson’s Dictionary, (Worcester’s edition,) you will find the names of nearly a thousand English authors cited in alphabetical order as authorities. Of these it is safe to say that not more than one hundred are remembered by the general reader. Such is Fame! Such is the jade who leads us up hill and down, through jungles and morasses, into deep waters and into swamps, through thick weather and thin, under blue skies and brown ones, in heat and in cold, hungry and thirsty and ragged, and heart-sore and foot-sore, now hopeful and now hopeless, now striding and now stumbling, now exultant and now despairing, now singing, now sighing, and now swearing, up to her dilapidated old temple. And when we get there, we find Dr. Beattie, in a Scotch wig, washing the face of young Edwin! A man of your pounds would be a fool to undertake the journey; but if you will be such a fool, you must go without the company of

Your terrestrial friend,
 PAUL POTTER.

"THE NEW LIFE" OF DANTE.

I.

"AT that season," says Boccaccio, in his *Life of Dante*, "when the sweetness of heaven reclothes the earth with its adornments, and makes it all smiling with flowers among the green leaves, it was the custom in our city for the men and for the ladies to celebrate festivals in their own streets in separate companies. Wherefore it happened, that, among the rest, Folco Portinari, a man held in much honor in those times among the citizens, had collected his neighbors at a feast in his own house on the first of May. Among them was the before-named Alighieri,—and, as little boys are wont to follow their fathers, especially to festive places, Dante, whose ninth year was not yet finished, accompanied him. It happened, that here, with others of his age, of whom, both boys and girls, there were many at the house of the entertainer, he gave himself to merry-making, after a childish fashion. Among the crowd of children was a little daughter of Folco, whose name was Bice,—though this was derived from her original name, which was Beatrice. She was, perhaps, eight years old, a pretty little thing in a childish way, very gentle and pleasing in her actions, and much more sedate and modest in her manners and words than her youthful age required. Beside this, she had very delicate features, admirably proportioned, and full, in addition to their beauty, of such openness and charm, that she was looked upon by many as a little angel. She then, such as I depict her, or rather, far more beautiful, appeared at this feast before the eyes of our Dante, not, I believe, for the first time, but first with power to enamor him. And although still a child, he received her image into his heart with such affection, that, from that day forward, never, as long as he lived, did it leave him."*

* *Vita di Dante*. Milan, 1823, pp. 29, 30.

It was partly from tradition, partly from the record which Dante himself had left of it, that Boccaccio drew his account of this scene. In the *Vita Nuova*, "The New Life," Dante has written the first part of the history of that love which began at this festival, and which, growing with his growth, became, not many years after, the controlling passion of his life. Nothing is better or more commonly known about Dante than his love for Beatrice; but the course of that love, its relation to his external and public life, its moulding effect upon his character, have not been clearly traced. The love which lasted from his boyhood to his death, keeping his heart fresh, spite of the scorplings of disappointment, with springs of perpetual solace,—the love which, purified and spiritualized by the bitterness of separation and trial, led him through the hard paths of Philosophy and up the steep ascents of Faith, bringing him out of Hell and through Purgatory to the glories of Paradise and the fulfilment of Hope,—such a love is not only a spiritual experience, but it is also a discipline of character whose results are exhibited in the continually renewed struggles of life.

The earthly story of this love, of its beginning, its irregular course, its hopes and doubts, its exaltations and despairs, its sudden interruption and transformation by death, is the story which the "*Vita Nuova*" tells. The narrative is quaint, embroidered with conceits, deficient in artistic completeness, but it has the *naïveté* and simplicity of youth, the charm of sincerity, the freedom of personal confidence; and so long as there are lovers in the world, so long as lovers are poets, so long will this first and tenderest love-story of modern literature be read with appreciation and responsive sympathy.

But "The New Life" has an interest of another sort and a claim, not yet suffi-

ciently acknowledged, upon all who would read the "*Divina Commedia*" with fit appreciation, in that it contains the first hint of the great poem itself, and furnishes for it a special, interior, imaginative introduction, without the knowledge of which it is not thoroughly to be understood. The character of Beatrice, as she appears in the "*Divina Commedia*," the relation in which the poet stands to her, the motive of the dedication of the poem to her honor and memory, and many minor allusions, are all explained or illustrated by the aid of the "*Vita Nuova*." Dante's works and life are interwoven as are those of no other of the poets who have written for all time. No other has so written his autobiography. With Dante, external impressions and internal experiences — sights, actions, thoughts, emotions, sufferings — were all fused into poetry as they passed into his soul. Practical life and imaginative life were with him one and indissoluble. Not only was the life of imagination as real to him as the life of fact, but the life of fact was clothed upon by that of imagination; so that, on the one hand, daily events and common circumstances became a part of his spiritual experience in a far more intimate sense than is the case with other men, while, on the other, his fancies and his visions assumed the absoluteness and the literal existence of positive external facts. The remotest flights of his imagination never carry him where his sight becomes dim. His journey through the spiritual world was no less real to him than his journeys between Florence and Rome, or his wanderings between Verona and Ravenna. So absolute was his imagination, that it often so far controls his reader as to make it difficult not to believe that the poet beheld with his mortal eyes the invisible scenes, which he describes. Boccaccio relates, that, after that part of the "*Commedia*" which treats of Hell had become famous it happened one day in Verona, that Dante "passed before a door where several women were sitting, and one of them, in a low voice, yet not

so but that she was well heard by him and his companion, said to another woman: 'See that man who goes through Hell and comes back when he pleases, and brings news of those who are down there!' And then one of them replied simply: 'Indeed, what you say must be true; for do you not see how his beard is crisped and his face brown with the heat and smoke of it?'"*

From this close relation between his life and his works, the "*Vita Nuova*" has a peculiar interest, as the earliest of Dante's writings, and the most autobiographic of them in its form and intention. In it we are brought into intimate personal relations with the poet. He trusts himself to us with full and free confidence; but there is no derogation from becoming manliness in his confessions. He draws the picture of a portion of his youth, and lays bare its tenderest emotions; but he does so with no morbid self-consciousness, and no affectation. Part of this simplicity is due, undoubtedly, to the character of the times, part to his own youthfulness, part to downright faith in his own genius. It was the fashion for poets to tell of their loves; in following the fashion, he not only gave expression to real feeling, but claimed his rank among the poets, and set a new style, from which love-poetry was to take a fresh date.

This first essay of his poetic powers exhibits the foundation upon which his later life was built. The figure of Beatrice, which appears veiled under the allegory, and indistinct in the bright cloud of the mysticism of the "*Divina Commedia*," takes her place in life and on the earth through the "*Vita Nuova*," as definitely as Dante himself. She is no allegorized piece of humanity, no impersonation of attributes, but an actual woman,—beautiful, modest, gentle, with companions only less beautiful than herself,—the most delightful figure in the midst of the picturesque life of Florence. She is seen smiling and weeping, walking with stately maidenly decorum in the street, praying at the church, merry at

* *Vita di Dante*, p. 69.

festivals, mourning at funerals; and her smiles and tears, her gentleness, her reserve, all the sweet qualities of her life, and the peace of her death, are told of with such tenderness and refinement, such pathetic melancholy, such delicate purity, and such passionate vehemence, that she remains and will always remain the loveliest and most womanly woman of the Middle Ages,—at once absolutely real and truly ideal.

It was in the year 1292, about two years after the death of Beatrice, and when he himself was about twenty-seven years old, that Dante collected into this *libretto d' amore* the poems that he had written during Beatrice's life, adding to them others relating to her written after her death, and accompanying all with a narrative and commentary in prose. The meaning of the name which he gave to the book, "*La Vita Nuova*," has been the cause of elaborate discussion among the Italian commentators. Literally "*The New Life*," it has been questioned whether this phrase meant simply early life, or life made new by the first experience and lasting influence of love. The latter interpretation seems the most appropriate to Dante's turn of mind and to his condition of feeling at the time when the little book appeared. To him it was the record of that life which the presence of Beatrice had made new.*

* For *vita nova* in the sense of *early life*, see *Purgatory*, xxx. 115, with the comments of Landino and Benvenuto da Imola; and for *età novella* in a similar sense, see *Canzone xviii.* st. 6. Fraticelli, who supports this interpretation, gives these with other examples, but none more to the point. Mr. Joseph Garrow, who had a translation into English of the *Vita Nuova*, printed at Florence in 1846, entitles his book "*The Early Life of Dante Alighieri*." But as giving probability to the meaning to which we incline, see *Canzone x.* st. 5.

"Lo giorno che costei nel mondo venne,
Secondo che si trova
Nel libro della mente che vien meno,
La mia persona parvola sostenne
Una passion nova."

But whatever be the true significance of the title, this "*New Life*" is full not only of the youthfulness of its author, but also of the fresh and youthful spirit of the time. Italy, after going through a long period of childhood, was now becoming conscious of the powers of maturity. Society, (to borrow a fine figure from Lamennais,) like a river, which, long lost in marshes, had at length regained its channel, after stagnating for centuries, was now again rapidly advancing. Throughout Italy there was a morning freshness, and the thrill and exhilaration of conscious activity. Her imagination was roused by the revival of ancient and now new learning, by the stories of travellers, by the gains of commerce, by the excitements of religion and the alarms of superstition. She was boastful, jealous, quarrelsome, lavish, magnificent, full of fickleness,—exhibiting on all sides the exuberance, the magnanimity, the folly of youth. After the long winter of the Dark Ages, spring had come, and the earth was renewing its beauty. And above all other cities in these days Florence was full of the pride of life. Civil brawls had not yet reduced her to become an easy prey for foreign conquerors. She was famous for wealth, and her spirit had risen with prosperity. Many years before, one of the Provençal troubadours, writing to his friend in verse, had said,—"*Friend Gaucelm, if you go*

That day when she unto the world attained,
As is found written true
Within the book of my now sinking soul,
Then by my childish nature was sustained
A passion new.

In referring to Dante's Minor Poems, we shall refer to them as they stand in the first volume of Fraticelli's edition of the *Opere Minore di Dante*, Firenze, 1834. There is great need of a careful, critical edition of the *Canzoniere* of Dante, in which poems falsely ascribed to him should no longer hold place among the genuine. But there is little hope for this from Italy; for the race of Italian commentators on Dante is, as a whole, more frivolous, more impertinent, and duller, than that of English commentators on Shakspeare.

to Tuscany, seek a shelter in the noble city of the Florentines, which is named Florence. There all true valor is found; there joy and song and love are perfect and adorned." And if this were true in the earlier years of the thirteenth century, it was still truer of its close; for much of early simplicity and purity of manners had disappeared before the increasing luxury (*le morbidezze d' Egitto*, as Boccaccio terms it) and the gathered wealth of the city,—so that gayety and song more than ever abounded. "It is to be noted," says Giovanni Villani, writing of this time, "it is to be noted that Florence and her citizens were never in a happier condition." The chroniclers tell of constant festivals and celebrations. "In the year 1283, in the month of June, at the feast of St. John, the city of Florence being in a happy and good state of repose,—a tranquil and peaceable state, excellent for merchants and artificers,—there was formed a company of a thousand men or more, all clothed in white dresses, with a leader called the Lord of Love, who devoted themselves to games and sports and dancing, going through the city with trumpets and other instruments of joy and gladness, and feasting often together. And this court lasted for two months, and was the most noble and famous that ever was in Florence or in all Tuscany, and many gentlemen came to it, and many rhymers,* and all were welcomed and honorably cared for." Every year, the summer was opened with May and June festivals. Florence was rejoicing in abundance and beauty.† Nor was it only in passing gayeties that the cheerful and liberal temper of the people was displayed.

The many great works of Art which were begun and carried on to completion

* The word in the original (Villani, Book vii. c. 89) is *Giocolari*, the Italian form of the French *jongleur*,—the appellation of those whose profession was to sing or recite the verses of the troubadours or the romances of chivalry.

† See Boccaccio, *Decamerone*, Giorn. vi. Nov. 9, for an entertaining picture of Florentine festivities.

at this time show with what large spirit the whole city was inspired, and under what strong influences of public feeling the early life of Dante was led. Civil liberty and strength were producing their legitimate results. Little republic as she was, Florence was great enough for great undertakings. Never was there such a noble activity within the narrow compass of her walls as from about 1265, when Dante was born, to the end of the century. In these thirty-five years, the stout walls and the tall tower of the Bargello were built, the grand foundations of the Palazzo Vecchio and of the unrivalled Duomo were laid, and both in one year; the Baptistry—*Il mio bel San Giovanni*—was adorned with a new covering of marble; the churches of Sta Maria Novella, of Or San Michele, (changed from its original object,) and Sta Croce,—the finest churches even now in Florence,—were all begun and carried far on to completion. Each new work was at once the fruit and the seed of glorious energy. The small city, of less than one hundred thousand inhabitants, the little republic, not so large as Rhode Island or Delaware, was setting an example which later and bigger and richer republics have not followed.* It might well, indeed, be called a "new life" for Florence, as well as for Dante. When it was determined to supply the place of the old church of Santa Reparata with a new cathedral, a decree was passed in words of memorable spirit: "Whereas it is the highest interest of a people of illustrious origin so to proceed in its affairs that men may perceive from its external works that its doings are at once wise and magnanimous, it is therefore ordered, that Arnolfo, architect of our commune, prepare the model or design for the rebuilding of Santa Reparata, with such supreme and lavish magnificence that neither the in-

* The feeling which moved Florence thus to build herself into beauty was one shared by the other Italian republican cities at this time. Venice, Verona, Pisa, Siena, Orvieto, were building or adding to churches and palaces such as have never since been surpassed.

dustry nor the capacity of man shall be able to devise anything more grand or more beautiful; inasmuch as the most judicious in this city have pronounced the opinion, in public and private conferences, that no work of the commune should be undertaken, unless the design be to make it correspondent with a heart which is of the greatest nature, because composed of the spirit of many citizens united together in one single will."* The records of few other cities contain a decree so magnificent as this.

It would be strange, indeed, if the youthful book of one so sensitive to external influences as Dante did not give evidence of sympathy with such pervading emotion. And so apparent is this, that one may say that only at such a period, when strength of sentiment was finding vent in all manner of free expression, was such a book possible. Confidence, frankness, directness in the rendering of personal feeling are rare, except in conditions of society when the emotional spirit is stronger than the critical. The secret of the active power of the arts at this time was the conscious or unconscious resort of those who practised them to the springs of Nature, from which the streams of all true Art proceed. Dante was the first of the moderns to seek Poetry at the same fountain, and to free her from the chains of conventionality which had long bound her. In this he shows his close relation to his times. It is his fidelity to Nature which has made him a leader for all successive generations. The "Vita Nuova" was the beginning of a new school of poetry and of prose as completely as Giotto's O was the beginning of a new school of painting.

The Italian poets, before Dante, may be broadly divided into two classes. The first was that of the troubadours, writing in the Provençal language, hardly to be distinguished from their contemporaries of the South of France, giving expression in their verses to the ideas of love, gallantry, and valor which formed the base of the complex and artificial system of

chivalry, repeating constantly the same fancies and thoughts in similar formulas of words, without scope or truth of imagination, with rare exhibitions of individual feeling, with little regard for Nature. Ingenuity is more characteristic of their poetry than force, subtilty more obvious in it than beauty. The second and later class were poets who wrote in the Italian tongue, but still under the influence of the poetic code which had governed the compositions of their Provençal predecessors. Their poetry is, for the most part, a faded copy of an unsubstantial original,—an echo of sounds originally faint. Truth and poetry were effectually divided. In the latter half of the thirteenth century, however, a few poets appeared whose verses give evidence of some native life, and are enlivened by a freer play of fancy and a greater truthfulness of feeling. Guido Guinicelli, who died in 1276, when Dante was eleven years old, and, a little later, Guido Cavalcanti, and some few others, trusting more than had been done before to their own inspiration, show themselves as the forerunners of a better day.* But as, in painting, Margheritone and Cimabue, standing between the old and the new styles, exhibit rather a vague striving than a fulfilled attainment, so is it with these poets. There is little that is distinguishingly individual in them. Love is still treated mostly as an abstraction, and one poet might adopt the others' love-verses with few changes of words for any manifest difference in them of personal feeling.

Not so with Dante. The "Vita Nuova," although retaining many ideas, forms, and expressions derived from earlier poets, is his, and could be the work

* Guido Guinicelli will always be less known by his own verses than by Dante's calling him

———"father
Of me and all those better others
Who sweet chivalric love-lays formed."
Purg. xxvi. 97-99.

And Guido Cavalcanti, "he who took from this other Guido the praise of speech," (*Purg.* xi. 97,) is more famous as Dante's friend than as a poet.

* Cicognara, *Storia della Scultura*, II. 147.

of no other. Nor was he unaware of this difference between himself and those that had gone before him, or ignorant of its nature. In describing himself to Buonagiunta da Lucca in Purgatory, he says, "I am one who, when Love breathes, mark, and according as he dictates within, I report"; to which the poet of Lucca replies, "O brother, now I see the knot which kept the Notary and Guittone and me back from that sweet new style which now I hear. I see well how your pens have followed close on the dictator, which truly was not the case with ours."*. As Love was the common theme of the verses from which Buonagiunta drew his contrast, the difference between them lay plainly in sincerity of feeling and truth of expression. The following close upon the dictates of his heart was the distinguishing merit of Dante's love-poetry over all that had preceded it and most of what has followed it. There are, however, some among his earlier poems in which the "sweet new style" is scarcely heard,—and others, of a later period, in which the accustomed metaphysical and fanciful subtilties of the elder poets are drawn out to an unwonted fineness. These were concessions to a ruling mode,—concessions the more readily made, owing to their being in complete harmony with the strong subtilizing and allegorizing tendencies of Dante's own mind. Still, so far as he adopts the modes of his predecessors in this first book of his, Dante surpasses them all in their own way. He leaves them far behind him, and goes forward to open new paths which he is to tread alone.

But there is yet another tendency of the times, to which Dante, in his later works, has given the fullest and most characteristic expression, and which exhibits itself curiously in the "*Vita Nuova*." Corresponding with the new ardor for the arts, and in sympathy with it, was a newly awakened and generally diffused ardor for learning, especially for the various branches of philosophy. Science was leaving the cloister, in which

she had sat in dumb solitude, and coming out into the world. But the limits and divisions of knowledge were not firmly marked. The relations of learning to life were not clearly understood. The science of mathematics was not yet so advanced as to bind philosophy to exactness. The intellects of men were quickened by a new sense of freedom, and stimulated by ardor of imagination. New worlds of undiscovered knowledge loomed vaguely along the horizon. Philosophy invaded the sphere of poetry, while, on the other hand, poetry gave its form to much of the prevailing philosophy. To be a proper poet was not only to be a writer of verses, but to be a master of learning. Boccaccio describes Guido Cavalcanti as "one of the best logicians in the world, and as a most excellent natural philosopher,"* but says nothing of his poetry. Dante, more than any other man of his time, resumed in himself the general zeal for knowledge. His genius had two distinct, and yet often intermingling parts,—the poetic and the scientific. No learning came amiss to him. He was born a scholar, as he was born a poet,—and had he written not a single poem, he would still be famous as the most profound student of his times. Far as he surpassed his contemporaries in poetry, he was no less their superior in the depth and the extent of his knowledge. And this double nature of his genius is plainly shown in many parts of "*The New Life*." A youthful incapacity to mark clearly the line between the work of the student and the work of the poet is manifest in it. The display of his acquisitions is curiously mingled with the narrative of his emotions. This is not to be charged against him as pedantry. His love of learning partook of the nature of passion; his judgment was not yet able, if indeed it ever became able, to establish the division between the abstractions of

* *Decamerone*, Giorn. vi. Nov. 9. *Logician* is here to be understood in an extended sense, as the student of letters, or arts, as they were then called, in general.

* *Purgatory*, xxiv. 53-60.

the intellect and the affections of the heart. And above all, his early claim of honor as a poet was to be justified by his possession of the fruits of study.

But there was also in Dante a quality of mind which led him to unite the results of knowledge with poetry in a manner almost peculiar to himself. He was essentially a mystic. The dark and hidden side of things was not less present to his imagination than the visible and plain. The range of human capacity in the comprehension of the spiritual world was not then marked by as numerous boundary-stones of failure as now limit the way. Impossibilities were sought for with the same confident hope as realities. The alchemists and the astrologers believed in the attainment of results as tangible and real as those which travellers brought back from the marvellous and still unachieved East. The mystical properties of numbers, the influence of the stars, the powers of cordials and elixirs, the virtues of precious stones, were received as established facts, and opened long vistas of discovery before the student's eyes. Curiosity and speculative inquiry were stimulated by wonder and fed by all the suggestions of heated fancies. Dante, partaking to the full in the eager spirit of the times, sharing all the ardor of the pursuit of knowledge, and with a spiritual insight which led him into regions of mystery where no others ventured, naturally connected the knowledge which opened the way for him with the poetic imagination which cast light upon it. To him science was but another name for poetry.

Much learning has been expended in the attempt to show that even the doctrine of Love, which is displayed in "*The New Life*," is derived, more or less directly, from the philosophy of Plato. It has been supposed that this little autobiographic story, full of the most intimate personal revelations, and glowing with a sincere passion, was written on a preconceived basis of theory. A certain Platonic form of expression, often covering ideas very far removed from those of

Plato, was common to the earlier, colder, and less truthful poets. Some strains of such Platonism, derived from the poems of his predecessors, are perhaps to be found in this first book of Dante's. But there is nothing to show that he had deliberately adopted the teachings of the ancient philosopher. It may well, indeed, be doubted if at the time of its composition he had read any of Plato's works. Such Platonism as exists in "*The New Life*" was of that unconscious kind which is shared by every youth of thoughtful nature and sensitive temperament, who makes of his beloved a type and image of divine beauty, and who by the loveliness of the creature is led up to the perfection of the Creator.

The essential qualities of the "*Vita Nuova*," those which afford direct illustration of Dante's character, as distinguished from those which may be called youthful, or merely literary, or biographical, correspond in striking measure with those of the "*Divina Commedia*." The earthly Beatrice is exalted to the heavenly in the later poem; but the same perfect purity and intensity of feeling with which she is reverently regarded in the "*Divina Commedia*" is visible in scarcely less degree in the earlier work. The imagination which makes the unseen seen, and the unreal real, belongs alike to the one and to the other. The "*Vita Nuova*" is chiefly occupied with a series of visions; the "*Divina Commedia*" is one long vision. The sympathy with the spirit and impulses of the time, which in the first reveals the youthful impressibility of the poet, in the last discloses itself in maturer forms, in more personal expressions. In the "*Vita Nuova*" it is a sympathy mastering the natural spirit; in the "*Divina Commedia*" the sympathy is controlled by the force of established character. The change is that from him who follows to him who commands. It is the privilege of men of genius, not only to give more than others to the world, but also to receive more from it. Sympathy, in its full comprehensiveness, is the proof of the strongest individuality. By as

much as Dante or Shakspeare learnt of and entered into the hearts of men, by so much was his own nature strengthened and made peculiarly his own. The "Vita Nuova" shows the first stages of that

genius, the first proofs of that wide sympathy, which at length resulted in the "Divine Comedy." It is like the first blade of spring grass, rich with the promise of the golden harvest.

AT SEA.

THE night is made for cooling shade,
For silence, and for sleep ;
And when I was a child, I laid
My hands upon my breast, and prayed,
And sank to slumbers deep :
Childlike as then, I lie to-night,
And watch my lonely cabin light.

Each movement of the swaying lamp
Shows how the vessel reels :
As o'er her deck the billows tramp,
And all her timbers strain and cramp
With every shock she feels,
It starts and shudders, while it burns,
And in its hinged socket turns.

Now swinging slow, and slanting low,
It almost level lies ;
And yet I know, while to and fro
I watch the seeming pendule go
With restless fall and rise,
The steady shaft is still upright,
Poising its little globe of light.

O hand of God ! O lamp of peace !
O promise of my soul !—
Though weak, and tossed, and ill at ease,
Amid the roar of smiting seas,
The ship's convulsive roll,
I own, with love and tender awe,
Yon perfect type of faith and law !

A heavenly trust my spirit calms,
My soul is filled with light :
The ocean sings his solemn psalms,
The wild winds chant : I cross my palms,
Happy as if, to-night,
Under the cottage-roof, again
I heard the soothing summer-rain.

BULLS AND BEARS.

[Continued.]

CHAPTER V.

WHICH TREATS OF THE MODESTY OF
CANDIDATES FOR OFFICE.

MR. SANDFORD sat in his private room. Through the windows in front were seen the same bald and grizzly heads that had for so many years given respectability to the Vortex Company. The contemplation of the cheerful office and the thought of its increasing prosperity seemed to give him great satisfaction; for he rubbed his white and well-kept hands, settled his staid cravat, smoothed his gravely decorous coat, and looked the picture of placid content. He meditated, gently twirling his watch-seal the while.

"Windham will be here presently, for my note admitted only of an answer in person. A very useful person to have a call from is Windham; these old gentlemen will put up their gold spectacles when he comes, and won't think any the less of me for having such a visitor. I noticed that Monroe was much impressed the other day. Then Bullion and Stearine will drop in, I think,—both solid men, useful acquaintances. If Plotman has only done what he promised, the thing will come round right. I shall not seek office,—oh, no! I could not compromise my position. But if the people thrust it upon me, I cannot refuse. Citizenship has its duties as well as its privileges, and every man must take his share of public responsibility. By-the-by, that's a well-turned phrase; 'twill bear repeating. I'll make a note of it."

True enough, Mr. Windham called, and, after the trivial business-affair was settled, he introduced the subject he was expected to speak on.

"We want men of character and business habits in public station, my young friend, and I was rejoiced to-day to hear

that it was proposed to make you a Senator. We have had plenty of politicians,—men who trade in honors and offices."

"I am sensible of the honor you mention," modestly replied Sandford, "and should value highly the compliment of a nomination, particularly coming from men like yourself, who have only the public welfare at heart. But if I were to accept, I don't know how I could discharge my duties. And besides, I am utterly without experience in political life, and should very poorly fulfil the expectations that would be formed of me."

"Don't be too modest, Mr. Sandford. If you have not experience in politics, all the better; for the ways to office have been foul enough latterly. And as to business, we must arrange that. Your duties here you could easily discharge, and we will get some other young man to take your place in the charitable boards;—though we shall be fortunate, if we find any one to make a worthy successor."

After a few words, the stately Mr. Windham bowed himself out, leaving Sandford rubbing his hands with increased, but still gentle hilarity.

Mr. Bullion soon dropped in. He was a stout man, with a round, bald head, short, sturdy legs, and a deep voice,—a weighty voice on 'Change, though, as its owner well knew,—the more, perhaps, because it dealt chiefly in monosyllables.

"How are you, Sandford? Fine day. Anything doing? Money more in demand, they say. Hope all is right; though it looks like a squall."

Mr. Sandford merely bowed, with an occasional "Ah!" or "Indeed!"

"How about politics?" Bullion continued. "Talk of sending you to the Senate. Couldn't do better,—I mean the city couldn't; *you'd* be a d—d fool

to go. Somebody has to, though. You as well as any. Can I help you?"

"You rather surprise me. I had not thought of the honor."

Bullion turned his eye upon him,—a cool, gray eye, overhung by an eyebrow that seemed under perfect muscular control; for the gray wisp of hair grew pointed like a paint-brush, and had a queer motion of intelligence.

"Oh, sly, I see! Just as well. Too forward is bad. We'll fix it. Good morning!"

And Bullion, sticking his hands in his pockets, went away with a half-audible whistle, to look after his debtors, and draw in his resources before the anticipated "squall" should come. Mr. Sandford had lost the opportunity of making his carefully studied speech; but, as Bullion had said, it was just as well.

Mr. Stearine came next,—a tall, thin man, with a large, bony frame, and a bilious temperament. A smile played perpetually around his loose mouth,—not a smile of frank good-humor, but of uneasy self-consciousness. He smiled because it was necessary to do something; and he had not the idea of what repose meant.

"You are going to the Senate, I hear," said the visitor.

"Indeed!"

"Oh, yes,—I've heard it from several. Mr. Windham approves it, and I just heard Bullion speak of it. A solid man is Bullion; a man of few words, but all his words tell; they drop like shot."

"Mr. Windham was good enough to speak of it to me to-day; but I haven't made up my mind. In fact, it will be time enough when the nomination is offered to me. By-the-way, Mr. Stearine, you were speaking the other day of a little discount. If you want a thousand or two, I think I can get it for you. Street rates are rather high, you know; but I will do the best I can."

Mr. Stearine smiled again, as he had done every minute before, and expressed his gratification.

"Let me have good paper on short

time; it's not my money, and I must consult the lender's views, you know. About one and a half per cent. a month, I think; he may want one and three quarters, or two per cent.,—not more."

Mr. Stearine hoped his friend would obtain as favorable terms as he could.

"You'll have no trouble in meeting the larger note due Bullion, on which I am indorser?" said Sandford.

"None at all, I think," was the reply.

"Two birds with one stone," thought Sandford, after his friend's departure. "A good investment, and the influence of a good man to boot. Now to see Fletcher and learn how affairs are coming on. We'll make that ten thousand fifteen before fall is over, if I am not mistaken."

CHAPTER VI.

WHEREIN THE INVESTMENT IS DISCUSSED.

It was the evening of a long day in summer. Mrs. Monroe had rolled up her sewing and was waiting for her son. Tea was ready in the pleasant east room, and the air of the house seemed to invite tranquillity and repose. It was in a quiet street, away from the rattle of carriages, and comparatively free from the multitudinous noises of a city. The carts of milkmen and marketmen were the only vehicles that frequented it. The narrow yard in the rear, with its fringe of grass, and the proximity to the pavement in front, were the only things that would have prevented one from thinking himself a dweller in the country. As the clock struck six, Walter Monroe's step was heard at the door;—other men might be delayed; he never. No seductions of billiards or pleasant company ever kept him from the society of his mother. He had varied sources of amusement, and many friends, attracted by his genial temper and tried worth; but he never forgot that his mother denied herself all intercourse with society, and was indifferent to every pleasure out of the sphere of home. Nor did he meet her as a matter of course; mindful of his mother's

absorbing love, and heartily returning it, he seemed always, upon entering the room, to have come home as from a long absence. He kissed her fondly, asked concerning her health and spirits, and how she had passed the day.

"The day is always long till you come, Walter. Tea is ready now, my son. When you are rested, we will sit down."

"Ah, mother, you are cheerful to-day. I have brought you, besides the papers, a new book, which we will commence presently."

"A thoughtful boy you are; but you haven't told me all, Walter. I see something behind those eyes of yours."

"What telltales they must be! Well, I have a pretty present for you,—a sweet picture I bought the other day, and which will come home to-morrow, I fancy."

"Is that all? I shall be glad to see the picture, because you like it. But you have something else on your mind."

"I see I never keep anything from you, mother. You seem to know my thoughts."

"Well, what is it?"

"I have been thinking, mother, that our little property was hardly so productive as it ought to be,—earning barely six per cent., while I know that many of my friends are getting eight, and even ten."

"I am afraid that the extra interest is only to pay for the risk of losing all."

"True, that is often the case; but I think we can make all safe."

"Well, what do you propose doing?"

"I have left it with Mr. Sandford, an acquaintance of mine, to invest for me. He is secretary of an insurance company, and knows all the ways of the money-lending world."

"It's a great risk, Walter, to trust our all."

"Not our all, mother. I have a salary, and, whatever may happen, we can always depend on that. Besides, Mr. Sandford is a man of integrity and credit. He has the unlimited confidence of the company, and I rely upon him as I would upon myself."

"How has he invested it? Have you got the securities?"

"Not yet, mother. I have left the money on his note for the present; and when he has found a good chance to loan it, he will give me the mortgages or stocks, as the case may be. But come, mother, let us sit down to tea. All is safe, I am sure; and to-morrow I will make you satisfied with my prudent management."

When the simple meal was over, they sat in the twilight before the gas was lighted. The moments passed rapidly in their free and loving converse. Then the table was drawn out and the new book was opened. Mrs. Monroe suddenly recollected something.

"Walter, my dear, a letter was left here to-day by the postman. As it was directed to the street and number, it did not go to your box. Here it is. I have read it; and rather sad news it brings. Cousin Augustus is failing, so his daughter writes, and it is doubtful whether he ever recovers. Poor child! I am sorry for her."

Walter took the letter and hastily read it.

"A modest, feeling, sensible little girl, I am sure. I have never seen her, you know; but this letter is simple, touching, and womanly."

"A dear, good girl, I am sure. How lonely she must be!"

"Mother, I believe I'll go and see them. In time of trouble we should forget ceremony. Cousin Augustus has never invited me, but I'll go and see him. Won't you go, too?"

"Dear boy, I couldn't! The cars? Oh, never!"

Walter smiled. "You don't get over your prejudices. The cars are perfectly safe, and more comfortable than coaches."

"I can't go; it's no use to coax me."

"I have but one thing to trouble me, mother,—and that is, that I can never get you away from this spot."

"I'm very happy, Walter, and it's a

very pleasant spot; why should I wish to go?"

"How long since you have been down Washington Street?"

"Ten years, I think."

"And you have never seen the new theatre, nor the Music Hall?"

"No."

"Nor any of the new warehouses?"

"I don't want to see them."

"And you wouldn't go to church, if it were more than a stone's throw away?"

"I am afraid not."

"How long since you were in a carriage?"

Her eyes filled with tears, but she made no reply.

"Forgive me, mother! I remember the time,—five years! and it seems like yesterday when father"—

There was a silence which, for a time, neither cared to break.

"Well," said Walter, at length, "I shall have to go alone. To-morrow morning I will arrange my business,—not forgetting our securities,—and start in the afternoon train."

"Your father often spoke of Cousin Augustus and his lovely wife; I wonder if the daughter has her mother's beauty?"

"I can't tell. I hope so. But don't look so inquiringly. I don't love a woman in the world,—except you, mother. I shan't fall in love, even if she is an angel."

"If Cousin Augustus should be worse,—should die, what will become of the poor motherless child?"

"There are no nearer relatives than we, mother,—and we must give her a home, if she will come."

"Certainly, Walter, we must not be hard-hearted."

Mrs. Monroe was charitable, kind, and motherly towards the distressed; she felt the force of her son's generous sentiments. If it were her Cousin Augustus himself who was to be sheltered, or his son, if he had one,—or if the daughter were unattractive, a hoyden even, she would cheerfully make any sacrifice in favor of hospitality. But she could not

repress a secret fear lest the beauty and innocence of the orphan should appeal too strongly to Walter's heart. She knew the natural destiny of agreeable young men; she acknowledged to herself that Walter would sometime marry; but she put the time far off as an evil day, and kept the subject under ban. None of her neighbors who had pretty daughters were encouraged to visit her on intimate terms. She almost frowned upon every winsome face that crossed her threshold when Walter was at home. So absorbing was this feeling, that she was not aware of its existence, but watched her son by a sort of instinct. Her conduct was not the result of cool calculation, and, if it could have been properly set before her generous, kindly heart, she would have been shocked at her own fond selfishness.

So she sat and speculated, balancing between fear and hope. If Walter built air-castles, was he to blame? At twenty-four, with a heart untouched, with fresh susceptibilities, and a little romance withal, is it to be wondered that his fancy drew such pleasing pictures of his cousin?

We will leave them to their quiet evening's enjoyment and follow Greenleaf to the house of Mr. Sandford.

CHAPTER VII.

THE MUSICAL SOIRÉE.

A SMALL, but judiciously-selected company had assembled; all were people of musical tastes, and most of them capable of sharing in the performances. There were but few ladies; perhaps it did not suit the mistress of the house to have the attentions of the gentlemen divided among too many. Miss Sandford was undeniably queen of the evening; her superb face and figure, and irreproachable toilet, never showed to better advantage. And her easy manners, and ready, silvery words, would have given a dangerous charm to a much plainer woman. She had a smile, a welcome, and a compliment for each,—not seemingly studied, but gracefully expressed, and sufficient to put the guests in the best humor. Mrs.

Sandford, less demonstrative in manner than her sister-in-law, and less brilliant in conversation and personal attractions, was yet a most winning, lovable woman,—a companion for a summer ramble, or a quiet *tête-à-tête*, rather than a belle for a drawing-room. Mr. Sandford was calmly conscious, full of subdued spirits, cheerful and ready with all sorts of pleasant phrases. It is not often that one sees such a manly, robust figure, such a handsome, ingenuous face, and such an air of agreeable repose. Easelmann was present, retiring as usual, but with an acute eye that lost nothing while it seemed to be observing nothing. Greenleaf was decidedly the lion. It was not merely his graceful person and regular features that drew admiring glances upon him; the charm lay rather in an atmosphere of intellect that surrounded him. His conversation, though by no means faultless, was marked by an energy of phrase joined to an almost womanly delicacy and taste. His was the “hand of steel,” but clothed with the “glove of velvet.” Easelmann followed him with a look half stealthy, half comical, as he saw the unusual vivacity of the reigning beauty when in his immediate society. Her voice took instinctively a softer and more musical tone; she showered her glances upon him, dazzling and prismatic as the rays from her diamonds; she seemed determined to captivate him without the tedious process of a siege. And, in truth, he must have been an unimpressible man that could steel himself against the influence of a woman who satisfied every critical sense, who piqued all his pride, who stimulated all that was most manly in his nature, and without apparent effort filled his bosom with an exquisite intoxication.

The music commenced under Marcia's direction. There were piano solos that were *not* tedious,—full of melody and feeling, and with few of the pyrotechnical displays which are too common in modern virtuoso-playing; vocal duets and quartets from the Italian operas, and from *Orfeo* and other German masterpieces; and solos, if not equal to the ef-

forts of professional singers, highly creditable to amateurs, to say the least. The auditors were enthusiastic in praise. Even Charles, who came in late, declared the music “Vewy good, upon my soul,—surpwizingly good!”

Greenleaf was listening to Marcia, with a pleased smile on his face, when Mr. Sandford approached and interrupted them.

“You are proficient in more than one art, I see. You paint as well as though you knew nothing of music, and yet you sing like a man who has made it an exclusive study.”

Greenleaf simply bowed.

“How do you come on with the picture?” Mr. Sandford continued.

“Very well, I believe.”

“My dear Sir, make haste and finish it.”

“I thought you were not in a hurry.”

“Not in the least, my friend; but when you get that finished, you can paint others, which I can probably dispose of for you.”

“You are very kind.”

“I speak as a business man,” said Sandford, in a lower tone, at which Marcia withdrew. “The arts fare badly in time of a money panic, and all the pictures you can sell now will be clear gain.”

“Are there signs of a panic?”

“Decidedly; the rates of interest are advancing daily, and no one knows where it will end. Unless there is some relief in the market by Western remittances, the distress will be wide-spread and severe.”

“I am obliged to you for the hint. I have two or three pictures nearly done.”

“I will look at them in a day or two, and try to find you purchasers.”

Greenleaf expressed his thanks, warmly, and then walked towards Mrs. Sandford, who was sitting alone at that moment.

“There is no knowing what Marcia may do,” thought Sandford; “I have never seen her when she appeared so much in earnest,—infatuated like a can-

dle-fly. I hope she won't be fool enough to marry a man without money. These artists are poor sheep; they have to be taken care of like so many children. At all events, it won't cost much to keep him at work for the present. Meanwhile she may change her mind."

Greenleaf was soon engaged in conversation with Mrs. Sandford. She had too much delicacy to flatter him upon his singing, but naturally turned the current towards his art. Without depreciating his efforts or the example of deservedly eminent American painters, she spoke with more emphasis of the acknowledged masters; and as she dwelt with unaffected enthusiasm upon the delight she had received from their immortal works, his old desire to visit Europe came upon him with redoubled force. There was a calm strength in her thoughts and manner that moved him strangely. He saw in a new light his thoughtless devotion to pleasure, and especially the foolish fascination into which he had been led by a woman whom he could not marry and ought not to love. Mrs. Sandford did not exhort, nor even advise; least of all did she allude to her sister-in-law. Hers was only the influence of truth,—of broad ideas of life and its noblest ends, presented with simplicity and a womanly tact above all art. It seemed to Greenleaf the voice of an angel that he heard, so promptly did his conscience respond. He listened with heightening color and tense nerves; the delicious languor of amatory music, and the delirium he had felt while under the spell of Marcia's beauty, passed away. It seemed to him that he was lifted into a higher plane, whence he saw before him the straight path of duty, leading away from the tempting gardens of pleasure,—where he recognized immutable principles, and became conscious that his true affinities were not with those who came in contact only with his sensuous nature. He had never understood himself until now.

A long meditation, the reader thinks; but, in reality, it was only an electric current, awakening a series of related

thoughts; as a flash of lightning at night illumines at once a crowd of objects in a landscape, which the mind perceives, but cannot follow in detail.

When, at length, Greenleaf looked up, he was astonished to find the room silent, and himself with his companion in the focus of all eyes. Marcia looked on with a curiosity in which there was perhaps a shade of apprehension. Easelmann relieved the momentary embarrassment by walking towards his friend, with a meaning glance, and taking a seat near Mrs. Sandford.

"I can't allow this," said Easelmann. "You have had your share of Mrs. Sandford's time. It is my turn. Besides, you will forget it all when you cross the room."

"Trust me, I shall *never* forget," said Greenleaf, with a marked emphasis, and a grateful look towards the lovely widow.

"What's this? What's this?" said Easelmann, rapidly. "Insatiate trifler, could not one suffice?"

"Oh, we understand each other, perfectly," said Mrs. Sandford, in a placid tone.

"You do, eh? I should have interrupted you sooner. It might have saved *my* peace of mind, and perhaps relieved some other anxieties I have witnessed. But go, now!" Greenleaf turned away with a smile.

Marcia at once proposed a duet to conclude the entertainment,—Rossini's *Mira bianca luna*,—a piece for which she had reserved her force, and in which she could display the best qualities of her voice and style. Greenleaf had a high and pure tenor voice; he exerted himself to support her, and with some success; the duet was a fitting close to a delightful and informal concert. But he was thoroughly sobered; the effects he produced were from cool deliberation, rather than the outbursts of an enthusiastic temper. Earlier in the evening the tones and the glances of his companion would have sent fiery thrills along his nerves and lifted him above all self-control.

In the buzz of voices that followed, Marcia commenced a lively colloquy with Greenleaf, as though she desired to leave him under the impressions with which the evening commenced. The amusements of summer were discussed, the merits of watering-places and other fashionable resorts, when Greenleaf accidentally mentioned that he and Easemann were going presently to Nahant.

"Delightful!" she exclaimed, "to enjoy the ocean and coast-scenery after the rush of company has left! While the fashionable season lasts, there is nothing but dress and gossip. You are wise to avoid it."

"I think so," he replied. "Neither my tastes nor my pursuits incline me to mingle in what is termed fashionable society. It makes too large demands upon one's time, to say nothing of the expense or the unsatisfactory nature of its pleasures."

"I agree with you. So you are going to sketch. Would not you and Mr. Easemann like some company? You will not pore over your canvas *all* day, surely."

"We should be delighted; *I* should, certainly. And if you will look at my friend's face just now, as he is talking to your beautiful sister-in-law, you will see that he would not object."

"Do you think Lydia is *beautiful*?" The tone was quiet, but the glance questioning.

"Not classically beautiful,—but one of the most lovely, engaging women I ever met."

"Yes,—she is charming, truly. I don't think her strikingly handsome, though; but tastes rarely agree, you know. I only asked to ascertain your predilections."

"I understand," thought Greenleaf; but he made no further reply.

"Don't be surprised, if you see us before your stay is over,—that is, if Lydia and I can induce Charles to go down with us. Henry is too busy, I suppose."

Charles passed just then; he was endeavoring to form a cotillon, declaring

that talk was slow, and, now that the music was over, a dance would be the thing.

"Charles, you will go to Nahant for a week,—won't you?"

"What! now?"

"In a day or two."

"Too cold, Sister Marcia; too late, altogether."

"But you were unwilling to go early in the season."

"Too early is as bad as too late; it is chilly there till the company comes. No billiards, no hops, no pwetty girls, no sailing, no wides on the beach, no pwomenades on the moonlight side of the piazza. No, my deah, Nahant is stupid till the curwent sets that way."

"Southern visitors warm the coast like the Gulf Stream, I suppose," said Greenleaf.

"Pwecisely so,"—then, after the idea had reached his brain, adding, "Vewy good, Mr. Gweenleaf! Vewy good!"

The soirée ended as all seasons of pleasure must, and without the dance on which Charles had set his heart. The friends walked home together. Greenleaf was rather silent, but Easemann at last made him talk.

"What do you think of the beauty, now?" the elder asked.

"Still brilliant, bewitching, dangerous."

"You are not afraid of her?"

"Upon my soul, I believe I am."

"What has frightened you? What faults or defects have you seen?"

"Two. One is, she uses perfumes too freely. Stop that laugh of yours! It's a trifling thing, but it is an indication. I don't like it."

"Fastidious man, what next? Has she more hairs on one eyebrow than the other? Or did you see a freckle of the size of a fly's foot?"

"The second is in her manner, which, in spite of its ease and apparent artlessness, has too much method in it. Her suavity is no more studied than her raptures. She is frosted all over,—frosted like a cake, I mean, and not with ice. And, to follow the image, I have no idea

what sort of a compound the tasteful confectionery covers."

"Well, if that is all, I think she has come out from under your scrutiny pretty well. I should like to see the woman in whom you would not find as many faults."

"If a man does not notice trifles, he will never learn much of character. With women especially, one should be as observing as a Huron on the trail of an enemy."

"Ferocious hunter, who supposed there were so many wiles in your simple heart?"

"Odd enough, there seemed to be a succession of warnings this evening. I was dazzled at first, I own,—almost hopelessly smitten. But Sandford gave me a jolt by bringing in business; he thinks there is to be a smash, and advises me to make hay while the sun shines. Then I talked with Mrs. Sandford."

"Now we come to the interesting part—to me!"

"But I shan't gratify you, you mouser! It is enough to say, that in a few simple words, uttered, I am sure, without forethought, she placed my frivolity before me, and then showed me what I might and ought to be. I was like a grasshopper before, drunk with dew, and then sobered by a plunge into a clear, cool spring. Besides, I have thought more about your advice in regard to the lady, you dissembling old rascal! For you know that in such matters you never mean what you say; and when you counsel me to fall in love with a coquette, you only wish me to be warned in time and make good my escape. If it were light enough, I should see that grizzly moustache of yours curl like a cat's, this minute. You can grin, you amiable Mephistopheles, but I know you! No, my dear Easelmann, I am cured. I shall take hold of my pencils with new energy. I will save money and go abroad, and—I had nearly forgotten her!—I will take a new look at my darling's sweet face in my pocket, and, like Ulysses, I'll put wax into my ears when I meet the singing Siren again."

"I hope your rustic *fiancée* is not clairvoyant?"

"I hope not."

"If she is, she will cry her little eyes out to-night."

"Don't speak of it, I beg of you."

"You are getting lugubrious; we shall have to change the subject. Love affects people in as many different ways as wine. Some are exalted,—their feet spurn the earth, their heads are in the clouds; some pugnacious, walking about with a chip on the shoulder; others are stupidly happy,—their faces wearing a sickly smile that becomes painful to look at; others again, like you, melancholy as a wailing tenor in the last act of 'Lucia.' Like learning, a little draught of love is dangerous; drink largely and be sober. The charmer will not cast so powerful a spell upon you the next time, and you will come away more tranquil."

There was just the least shade of sarcasm in the tone, and Greenleaf, as usual, was a little puzzled. For Easelmann was a study,—always agreeable, never untruthful, but fond of launching an idea like a boomerang, to sweep away, apparently, but to return upon some unexpected curve. His real meaning could not always be gathered from any isolated sentence; and to strangers he was a living riddle. But Greenleaf had passed the excitable period, and had lapsed into a state of moody repentance and grim resolution.

"You need not tempt me," he said, "even if that were your object, which I doubt, you sly fox! And if you mean only to pique my pride in order to cure my inconstancy to my betrothed, I assure you it is quite unnecessary. I shall have too much self-respect to place myself in the way of temptation again."

"Now you are growing disagreeable; the virtuous resolutions of a diner-out, on the headachy morning after, are never pleasant to hear. There is so much implied! One does not like to follow the idea backward to its naughty source. The penitent should keep his sermons and soda-water to himself."

"Well, here we are at home. We have walked a mile, and yet it seems but a furlong. If I were not so disagreeable as you say, we would take another turn about the Common."

"Sleep will do you more good, my friend; and I think I'll go home. I haven't smoked since dinner. Good night!"

Greenleaf went to his room, but not at once to sleep; his nerves were still too tremulous. With the picture of Alice before him, he sat for hours in a dreamy reverie; and when at last he went to bed, he placed the miniature under his pillow.

CHAPTER VIII.

A YOUNG FINANCIER AT HOME.

JOHN FLETCHER lived in a small, but neat house at the South End. Slender and youthful as he looked, he was not a bachelor, but had a pretty, fragile-looking wife, to whom he was married when only nineteen years of age. Such a union could have been brought about only by what the world calls an indiscretion, or from an unreflecting, hasty impulse. Girl as Mrs. Fletcher seemed to be, she was not without prudence as a housekeeper; and as far as she could command her inconstant temper, she made home attractive to her husband. But neither of them had the weight of character to act as a counterpoise to the vacillation of the other. It was not a sun and a planet, the one wheeling about the other,—nor yet were they double stars, revolving about a centre common to both; their movements were like nothing so much as the freaks of a couple of pith-balls electrically excited,—at one time drawn furiously together, and then capriciously repelling each other. Their loves, caresses, spats, quarrels, poutings, and reconciliations were as uncertain as the vagaries of the weather,—as little guided by sense or reason as the passions of early childhood. On one subject they agreed at all times, and that was to pet and spoil most thoroughly their infant daughter, a puny, weak-voiced, slender-limbed, curly-haired

child, with the least possible chance of living to the age of womanhood.

Fletcher was confidential clerk to the great banking-house of Foggarty, Danforth, and Dot. The senior partner rarely took any active part in business, but left it to the management of Danforth and Dot. Danforth had the active brain to plan,—Dot the careful, cool faculty to execute. Fletcher had a good salary,—so large that he could always reserve a small margin for "outside operations," by which in one way or another he generally contrived to lose.

The god he worshipped was Chance; by which I do not refer at all to any theory of the creation of matter, but to the course and order of human affairs. His drawers were full of old lottery-schemes; he did not long buy tickets, because he was too shrewd; but he made endless calculations upon the probability of drawing prizes,—provided the tickets were really all sold, and the wheel fairly managed. A dice-box was always at hand upon the mantel. He had portraits of celebrated racers, both quadruped and biped, and he could tell the fastest time ever made by either. His manipulation of cards was, as his friends averred, one of the fine arts; and in all the games he had wrought out problems of chances, and knew the probability of every contingency. A stock-list was always tacked above his secretary, and another constantly in his pocket. And this evening he had brought home a revolving disk, having figures of various values engraved around its edge, carefully poised, with a hair-spring pointer, like a hand on a dial-plate.

"What have you got, John?" asked his wife.

"Only a toy, a plaything, deary. See it spin!" and he gave the disk a whirl.

"But what is it *for*?"

"Oh, nothing in particular. I thought we could amuse ourselves in turning it for the largest throws."

"Is that all? It is a heavy thing, and must have cost a good lot of money."

"Not much. Now see! You know

I have tried to show you how chance rules the world; and if you once get the chances in your favor, all is right. Now suppose we take this wheel, and on the number 2,000 we paste 'Michigan Central,' 'Western' over 1,000, 'Vermont and Massachusetts' over 500, 'Cary Improvement' over 400, and so on. Now, after a certain number of revolutions, by keeping account, we get the *chance* of each stock to come up."

"I don't understand."

"I don't suppose you do; you don't give your mind to it, as I do."

"But you know you had the same notion once about cards, and pasted the names of the stocks on the court cards; and then you shuffled and cut and dealt and turned up, night after night."

"Little doxy! small piece of property! you'd best attend to that baby, and other matters that you know something about."

The "little doxy" felt strongly inclined to cry, but she kept back the sobs and said, "You know, John, how sullen and almost hateful you were before, when you were bewitched after those mean stocks. I don't think you should meddle with such things; they are too big for you. Let the rich fools gamble, if they want to; if *they* lose, they can afford it, and nobody cares but to laugh at them. Oh, John, you promised me you wouldn't gamble any more."

"Well, I don't gamble. I haven't been to a faro bank for a year. I stay away just to please you, although I know all the chances, and could break the bank as easy as falling off a log."

"You don't gamble, you say, but you are uneasy till you put all your money at risk on those paper things. I don't see the difference."

"You *needn't* see the difference; nobody asked you to see the difference. Gamble, indeed! there isn't a man on the street that doesn't keep an eye on the paper things, as you call them."

"You see what I told you. You are cross. You like anything better (*a sob*) than your poor (*another*) neglected wife."

The sobs now thickened into a cry, and, with streaming eyes, she picked up the puny child and declared she was going to bed. To this proposal the moody man emphatically assented. But as Mrs. Fletcher passed near her husband, the child reached out its slender arms and caught hold of him by his cravat, screaming, "Papa! papa! I stay, papa!"

"Let go!" roughly exclaimed the amiable father. But she held the tighter, and shouted, "Papa! my papa!"

What sudden freak overcame his anger probably not even Fletcher himself could tell. But, turning towards his wife, who was supporting the child, whose little fingers still held him fast, his face cleared instantly, and, with a sudden movement, he drew the surprised and delighted woman down upon his knee, and loaded her with every form of childish endearment. Her tears and sorrows vanished together, like the dew.

"Little duck," said he, "if I were alone, I shouldn't care for any more money. I know I can always take care of myself. But for your sake I want to be independent,—rich, if you please. I want to be free. I want to meet that wily, smooth, plausible, damned, respectable villain face to face, and with as much money as he."

His eyes danced with a furious light and motion, and the fringy moustache trembled over his thin and sensitive mouth. But in a moment he repented the outbreak; for his wife's face blanched then, and the tears leaped from her eyes.

"Oh, John," she exclaimed, "what is this awful secret? I know that something is killing you. You mutter in sleep; you are sullen at times; and then you break out in this dreadful way."

Fletcher meditated. "I can't tell her; 'twould kill her, and not do any good either. No, one good streak of luck will set me up where I can defy him. I'll grin and bear it."

"What is it, John? Tell your poor little wife!"

"Oh, nothing, my dear. I do some

business for Sandford, who is apt to be domineering,—that's all. To-day he provoked me, and when I am mad it does me good to swear; it's as natural as lightning out of a black cloud."

"It may do *you* good to swear, John; but it makes the cold chills run over me. Why do you have anything to do with anybody that treats you so? You are *so* changed from what you were! Oh, John, something is wrong, I know. Your face looks sharp and inquiring. You are thin and uneasy. There's a wrinkle in your cheek, that used to be as smooth as a girl's."

She patted his face softly, as it rested on her shoulder; but he made no reply save by an absent, half-audible whistle.

"You don't answer me, John, dear!"

"I've nothing especial to say, doxy,—only that I *will* wind up with Sandford as soon as we finish the business in hand."

"The business in hand? Has he anything to do with Foggarty, Danforth, and Dot?"

Fletcher was not skilful under cross-examination. So he simply answered, "No," and then stopping her mouth with kisses, promised to explain the matter another day.

"Well, John, I am tired; I think I'll take baby and go to bed. Don't sit up and get blue over your troubles!"

As she left the room, Fletcher drew a long breath. What an accent of despair was borne on that sigh! His busy brain was active in laying plans which his vacillating will could never execute without help. Often before, he had determined to confront Sandford and defy him; but as often he had quailed before that self-possessed and imperious man. What hope was there, then, for this timid, crouching man, as long as the hand of his haughty master was outstretched in command? None!

CHAPTER IX.

STATE STREET.

THE stringency of the money-market began to frighten even Mr. Sandford,

who had been predicting a panic. There had been but few failures, and those were generally of houses that ought to fail, being insolvent from losses or mismanagement. Mr. Sandford studied over his sheet of bills payable and receivable almost hourly. The amount intrusted to him by Monroe had been loaned out; for which he was now very sorry, as the rate of interest had nearly doubled since he made the last agreement. This, however, was but a small item in his accounts; other transactions of greater magnitude occupied his attention. As he looked over the array of promisors and indorsers, he said to himself, "I am safe. If these men fail, it will be because the universal bottom has dropped out and chaos come again. If anybody is shaky, it is Stearine. He believes, though, that Bullion will help him through, and extend that note. Perhaps he will. Perhaps, again, he will have enough to do to keep on his own legs. He fancies himself strong because he owns the most of the Neversink Mills. But he doesn't know what I know, that Kerbstone, the treasurer of the Mills, is in the street every day, looking like a gambler when his last dollar is on the table. A few more turns of the screw and down goes Kerbstone. Who knows that the Mills won't tumble, too, and Bullion after them? *He* may go hang; but we must look after Stearine, and prop him, if necessary. That twenty thousand is more than we can afford to lose just now. Lucky, there he comes!"

Mr. Stearine entered, not with his usual smile, but with an expression like that of a man trying to be jolly with the toothache. A short, but dexterous cross-examination showed to Sandford, that, if the twenty-thousand-dollar note could be extended over to better times, Stearine was safe. But the note was soon due, and Bullion might be unable or unwilling to renew; in which case, the Vortex would have to meet it. That was a contingency to be provided against; for Mr. Sandford did not intend that the public should know that the credit of the Company had been used for private purposes by its

officers. He therefore called in Mr. Fayerweather, the President, and the affair was talked over and settled between them.

"One thing more," said Sandford. "Suppose any one *should* get wind of this, and grow suspicious ;—Bullion himself might be foolish enough to let the cat out of the bag ;—we might find the shares of the Vortex in the market, and the bears running them down to an uncomfortable figure."

"True enough. We must stop that."

"The only way is to keep a sharp lookout, and if any of the stock is offered, to buy it up. Half a dozen of us can take all that will be likely to come into market."

"How many shares do you own, Sandford?" asked Mr. Fayerweather, with a quizzical look. "Is this a nice little scheme of yours to run them off at par? It's a shrewd dodge."

"You do me wrong," said Sandford, with a look of wounded innocence. "I merely want to sustain the credit of the Company."

"Oh, no doubt!" said the President. "Well, we will agree, then, not to let the shares fall below ninety, say. It would be suspicious, I think, to hold them higher than that, when money is two and a half per cent. a month."

"Very well. You will see to this? Be careful what men you speak to."

Mr. Sandford, being left alone, be thought him of Monroe. He did not wish to give him a statement of affairs; he had put him off once, and must find some way to satisfy him. How was it to be done? The financier meditated. "I have it," said he; "I'll send him a quarter's interest in advance. That's as much as I can spare in these times, when interest grows like those miraculous pumpkin-vines out West." He drew a check for two hundred dollars, and dispatched it to Monroe by letter.

So Mr. Sandford had all things snug. The Vortex was going on under close-reefed, topsails. If the notes he held were paid as they matured, he would

have money for new operations; if not, he had arranged that the debtors should be piloted over the bar and anchored in safety till the storm should blow over. Everything was secured, as far as human foresight could anticipate.

Mr. Sandford had now but little use for Fletcher's services, except to look after his debtors,—to know who was "shinning" in the street, or "kite-flying" with accommodation-paper. Still he did not admit the agent into his confidence. But this active and scheming mind was not long without employment. Mr. Bullion had seen him in frequent communication with Sandford, and thereby formed a high opinion of his shrewdness and tact; for he knew that Sandford was very wary in selecting his associates. He sought Fletcher.

"Young man," said Bullion, pointing his wisp of an eyebrow at him, "do you want a job? Few words and keep mum. Yes or no?"

"Yes," said Fletcher, decidedly.

"I like your pluck," said Bullion.

"It doesn't take much pluck to follow Mr. Bullion's lead."

"None of your nonsense. How do you know anything about me, or what I am going to do? I may fail to-morrow,—God forbid!—but when the wind comes, it's the tall trees that are knocked over."

Fletcher thought the comparison rather ludicrous for a man standing on such remarkably short pegs, but he said nothing.

"I mean to sell a few shares of stock, and I want you to do the business. I am not to be known in it."

Fletcher bowed, and asked what the stocks were.

"No matter; any you can sell to advantage. I haven't a share, but I needn't tell you *that* doesn't make any difference."

"Let me understand you clearly," said Fletcher.

"Sell under. For instance, take a stock that sells to-day at ninety-four; offer to deliver it five days hence at ninety. To-morrow offer it a peg lower, and so on, till the market is easier. When the

first contract is up, we shall get the stock at eighty-eight, or less, perhaps,—deliver to the buyers, and pocket the difference.”

“But it may not fall.”

“It’s bound to fall. People that hold stock *must* sell to pay their notes. Every day brings a fresh lot of shares to the hammer.”

“But the bulls may corner you; they will try mightily to keep prices up.”

“But they can’t corner, I tell you; there are too many of them in distress. Besides, we’ll spread; we won’t put all our eggs into one basket. If I stuck to “bearing” one stock, the holders might get all the shares and break me by keeping them so that I couldn’t comply with my contracts. I shan’t do it. I’ll pitch into the “fancies” mainly; they are held by speculators, who must be short, and they’ll come down with a run.”

“How deep shall I go in?”

“Fifty thousand, to begin with. However, there won’t be many transfers actually made; the bulls will merely pay the differences.”

“Or else waddle out of the street lame ducks.”

Bullion rubbed his hands, while his eyes shone with a colder glitter.

“Well, you are a bear, truly,” said Fletcher, with unfeigned admiration,—“a real *Ursa Major*.”

“To be sure, I’m a bear. What’s the use in being a bull in times like these, to be skinned and sold for your hide and tallow?”

“The market is falling, and no mistake.”

“Yes, and will fall lower. Stocks haven’t been down since ’37 so low as you will see them a month from now.”

Fletcher bowed—and waited. Bullion pointed the eyebrow again.

“You don’t want to begin on an uncertainty. I see. Sharp. Proper enough. I’ll give you ten per cent. of the profits,—you to pay the commissions. Each day’s work to be set down, and at the end of each week I’ll give you a note for your share. That do? I thought it would. I offer a liberal figure, for I

think you know something, youngster. Use your judgment, now. Consult me, of course; but *mun’s* the word. If any stock is pushed in, lay hold, and don’t be afraid. The holders must sell, and they must sacrifice. We’ll skin ‘em, by G—,” said Bullion, with an excitement that was rare in a cool, hard head like his. Then thinking he had been too outspoken, he resumed his former concise manner.

“All fair, you know. Bargain is a bargain. They must sell; we won’t buy, without we buy cheap; their loss, to be sure, but our gain. All trade on the same plan. Seller gets the most he can; buyer pays only what he must.”

“That’s it,” said Fletcher. “Every man for himself in this world.”

“Well, good morning, young man. Sharp’s the word. Call at my office this afternoon.” And, with a queer sweep of the pointed eyebrow, he departed.

What visions of opulence rose before Fletcher’s fancy! He would now lay the foundations of his fortune, and, perhaps, accomplish it. He would become a power in State Street; and, best of all, he would escape from his slavery to Sandford, and perhaps even patronize the haughty man he had so long served. How to begin? He could not attend the sales at the Brokers’ Board in person, as he was not a member. Should he confide in Danforth? No,—for, with his relations to the house, his own share in the profits would be whittled down. He determined to employ Tonsor, an old acquaintance, who would be glad to buy and sell for the regular commissions. The preliminaries were speedily concluded, and a list of stocks made out on which to operate. The excitement was almost too great for Fletcher to bear. As he counted the piles of bank-bills on his employers’ counter, or stacked up heaps of coin, in his ordinary business, he fancied himself another *Ali Baba*, in a cave to which he had found the *Open Sesame*, and he could hardly contain himself till the time should come when he should take possession of his unimaginable wealth. He had

built air-castles before, but never one so magnificent, so real. He could have hugged Bullion, bear as he was.—We leave Fletcher and his principal on the high road to success.

CHAPTER X.

THE SIREN COMES TO THE SEA-SHORE.

GREENLEAF worked assiduously upon his landscapes, and, notwithstanding the pressure in the money-market, was fortunate enough to dispose of them to gentlemen whose incomes were not affected by the vicissitudes of business. For this he was principally indebted to Sandford, who took pains to bring his works to the notice of connoisseurs. But, with all his success, the object of his ambition was as far off as at first. Imperceptibly he had acquired expensive habits. He was not prodigal, not extravagant; but, having a keen sense of the beautiful, he gradually became more fastidious in dress, and in all those nameless elegancies which seem of right to belong to the accomplished man, as to the gentleman in easy circumstances. This desire for ease and luxury did not conflict with simplicity; he seemed born for all the enjoyment which the most cultivated society could bestow. He had the power to spend the income of a fortune worthily; unhappily, he did not have it to spend. He had written constantly to his betrothed, and when he told her of the prices he had received for his pictures, he was at a loss how to make her comprehend the new relations into which he had grown,—to explain that he was practically as poor as when he first came to the city. How could he assure her of his desire to end the engagement in marriage, if he spoke of postponement now that he had an income beyond his first expectations? Imperceptibly to himself, his letters became more like intellectual conversations, or essays, rather,—pleasant enough in themselves, but far different from the simple and fervent epistles he wrote while the memory of Alice was fresher. *She* felt this, although she had not reasoned upon

it, and her sensitive womanly heart was full of vague forebodings.

Would he confess to himself, that, as he looked at her cherished picture, another face, with a more brilliant air and a more dazzling beauty, came between him and the silent image before him? Dared he to think, that, in his frequent visits to Miss Sandford, the ties which bound him to his betrothed were daily weakening?—that he found a charm in the very caprices and waywardness of the new love, which the unvarying constancy and placid affection of the old had never created? The one put her heart unreservedly into his keeping; she knew nothing of concealment, and he read her as he would an unsophisticated child; there was not a nook or cranny in her heart, he thought, that he had not explored. The other was full of surprises; she had as many phases as an April day; and from mere curiosity, if from no other motive, Greenleaf was piqued to follow on to understand her real character. The apprehensions he felt at first wore away; he became accustomed to her measured sentences and her apparently artificial manner. What seemed affectation now became a natural expression. The secret influence she exerted increased, and, at length, possessed him wholly while in her company. It drew him as the moon draws the tides, silently, unconsciously, but with a power he could not resist. It was only when he was away from her that he could reason himself into a belief in his independence.

Greenleaf and Easemann were at Nahant at the close of the season. A few straggling visitors only remained; the fashionable world had returned to the city. The friends wandered over the rocky peninsula, walked the long beach that leads to the main land, sketched the sea from the shore, and the shore from the sea, and watched and transferred the changing phases of Nature in sunshine and in storm. They were fortunate enough to see one magnificent tempest, by which the ocean was lashed into fury, breaking in thunder over the rugged

coast-line, and dashing spray sheer over the huge back of Egg Rock.

Miss Sandford's threat was carried into execution; the family came to the hotel, and, for a week, Greenleaf and his friend were most devoted in their attentions. Marcia was charmed with their sketches, and, with a tact as delicate as it is rare, gave them time for their cherished pursuits, and planned excursions only for their unemployed hours. They collected colored mosses, star-fish, and other marine curiosities; they sailed, fished, scampered over the rocks, drove over the beach at twilight, sang, danced, and bowled. And when weary of active amusement, they reclined on the grass and listened to the melancholy rote of the sea,—the steady pulsations of its mighty heart.

Easelmann, with his usual raillery, congratulated his friend on his prospects, and declared that the pupil was surpassing the teacher in the beau's arts.

"Finely, Greenleaf! You are just coming to the interesting part of the process. You are a little flushed, however,—not quite cool enough. A wily adversary she is; if you allow your feelings to run away with you, it's all up. She will hold the reins as coolly as you held your trotting pony yesterday. Keep the bits out of your mouth, my boy."

"Don't trouble yourself. I shall keep cool. I am not going to make a fool of myself by proposing."

"Oh, you aren't? We shall see. But she'll refuse you, and then you'll come to your senses."

"I'm densedly afraid she would accept me."

"The vanity of mankind! Don't tell me that women are vain. Every man thinks himself irresistible,—that he has only to call, to have the women come round him like colts around a farmer with a measure of corn. Shake the kernels in your dish, and cry, 'Kerjock!' Perhaps she *will* come."

"I suppose you think, with Hosea Bigelow, that

'Ta'n't a knowin' kind o' cattle
That is ketched with mouldy corn.'"

"I needn't tell you that Marcia Sandford is knowing,—too knowing to let an enthusiastic lover relapse into a humdrum husband. You amuse her now; for she likes to enjoy poetry and sentiment, dances, rides, and rambles, in company with a man of fresh susceptibilities;—a good phrase that, 'fresh susceptibilities.'—The instant you become serious and ask her to marry you, the dream is over; she will hate you."

"Well, what is to become of a lady like this,—a creature you think too bright, if not too good, for human nature's daily food?"

"An easy prophecy. The destiny of a pretty woman is to catch lovers."

"'The cat doth play, and after slay,'"
said Greenleaf, laughing.

"Play while you can, my dear boy; if she is a cat, you'll get the final *coup* soon enough. To finish the fortune-telling,—she will continue her present delightful pursuits as long as youth and beauty last; and the beauty will last a long time after the youth has gone. She *may* pick up some young man of fortune and marry him; but it is not likely; the rich always marry the rich. Just this side of the *blasé* period, while still in the fulness of her charms, she will open her battery of smiles upon some wealthy old widower and compel him to place her at the head of his establishment. Then, with a secure position and increased facilities, she will draw new throngs of admirers, as long as she has power to fascinate, or until there are no more fools left."

"A pleasing picture of domestic felicity for the husband!"

"Precisely what he deserves. When an old fool marries a young flirt, he deserves to wear whatever honors she may bestow upon him."

"Do you remember how you artfully persuaded me into this intimacy? And now you are making game of me for following your own suggestions."

"Me? I never suggest; I never persuade."

"You did, you crafty old fox! You advised me to fall in love with her."

"Did I? Well, I think now you have gone far enough. A sip from the cup of enchantment is quite sufficient; you needn't swallow the whole of it."

"But people can't always control themselves. Can you trust yourself to stop this side of insensibility, when you take ether? or be sure you won't get drunk, if you commence the evening with a party of dissipated fellows?"

"That will do, my friend. I know there are people who are fond of confessing their weakness; don't you do it. Where is the supremacy of mind and

will, and all that nonsense, if a man can't amuse himself with a clever woman's artifices without tumbling into the snare he is watching?"

"We'll see how you succeed with the charming widow, — whether the wise man, when his own *jecur* is pierced with the arrow, may not show it, as well as other people. And by-the-by, you will have an excellent opportunity for your experiment. Marcia and I are going to take a sail this afternoon, and you can entertain Mrs. Sandford while we are gone."

Easelmann softly whistled.

[To be continued.]

THE PROFESSOR AT THE BREAKFAST-TABLE.

WHAT HE SAID, WHAT HE HEARD, AND WHAT HE SAW.

I INTENDED to have signalized my first appearance by a certain large statement, which I flatter myself is the nearest approach to a universal formula of life yet promulgated at this breakfast-table. It would have had a grand effect. For this purpose I fixed my eyes on a certain divinity-student, with the intention of exchanging a few phrases, and then forcing my picture-card, namely, *The great end of being*.—I will thank you for the sugar,—I said.—Man is a dependent creature.

It is a small favor to ask,—said the divinity-student,—and passed the sugar to me.

—Life is a great bundle of little things,—I said.

The divinity-student smiled, as if that was the concluding epigram of the sugar question.

You smile,—I said.—Perhaps life seems to you a little bundle of great things?

The divinity-student started a laugh, but suddenly reined it back with a pull, as one throws a horse on his haunches. —Life is a great bundle of great things,—he said.

(Now, then!) The great end of being, after all, is—

Hold on!—said my neighbor, a young fellow whose name seems to be John, and nothing else,—for that is what they all call him,—hold on! the Sculpin is go'n' to say somethin'.

Now the Sculpin (*Cottus Virginianus*) is a little water-beast which pretends to consider itself a fish, and, under that pretext, hangs about the piles upon which West-Boston Bridge is built, swallowing the bait and hook intended for flounders. On being drawn from the water, it exposes an immense head, a diminutive bony carcass, and a surface so full of spines, ridges, ruffles, and frills, that the naturalists have not been able to count them without quarrelling about the number, and that the colored youth, whose sport they spoil, do not like to touch them, and especially to tread on them, unless they happen to have shoes on, to cover the thick white soles of their broad black feet.

When, therefore, I heard the young fellow's exclamation, I looked round the

table with curiosity to see what it meant. At the further end of it I saw a head, and a small portion of a little deformed body, mounted on a high chair, which brought the occupant up to a fair level enough for him to get at his food. His whole appearance was so grotesque, I felt for a minute as if there was a showman behind him who would pull him down presently and put up Judy, or the hangman, or the Devil, or some other wooden personage of the famous spectacle. I contrived to lose the first part of his sentence, but what I heard began so:—

—by the Frog-Pond, when there were frogs in it, and the folks used to come down from the tents on 'Lection and Independence days with their pails to get water to make egg-pop with. Born in Boston; went to school in Boston as long as the boys would let me. —The little man groaned, turned, as if to look round, and went on.—Ran away from school one day to see Phillips hung for killing Denegri with a loggerhead. That was in flip days, when there were always two or three loggerheads in the fire. I'm a Boston boy, I tell you,—born at North End, and mean to be buried on Copp's Hill, with the good old underground people,—the Worthylakes, and the rest of 'em. Yes, Sir,—up on the old hill, where they buried Captain Daniel Malcolm in a stone grave, ten feet deep, to keep him safe from the red-coats, in those old times when the world was frozen up tight and there wasn't but one spot open, and that was right over Faneuil Hall,—and black enough it looked, I tell you! There's where my bones shall lie, Sir, and rattle away when the big guns go off at the Navy Yard opposite! You can't make me ashamed of the old place! Full of crooked little streets;—I was born and used to run round in one of 'em—

—I should think so,—said that young man whom I hear them call "John,"—softly, not meaning to be heard, nor to be cruel, but thinking in a half-whisper, evidently.—I should think so; and got

kinked up, turnin' so many corners.—The little man did not hear what was said, but went on,—

—full of crooked little streets; but I tell you Boston has opened, and kept open, more turnpikes that lead straight to free thought and free speech and free deeds than any other city of live men or dead men,—I don't care how broad their streets are, nor how high their steeples!

—How high is Bosting meet'n'-house?—said a person with black whiskers and imperial, a velvet waistcoat, a guard-chain rather *too* massive, and a diamond pin so *very* large that the most trusting nature might confess an inward *suggestion*,—of course, nothing amounting to a suspicion. For this is a gentleman from a great city, and sits next to the landlady's daughter, who evidently believes in him, and is the object of his especial attention.

How high?—said the little man.—As high as the first step of the stairs that lead to the New Jerusalem. Isn't that high enough?

It is,—I said.—The great end of being is to harmonize man with the order of things; and the church has been a good pitch-pipe, and may be so still. But who shall tune the pitch-pipe? *Quis cus*—(On the whole, as this quotation was not entirely new, and, being in a foreign language, might not be familiar to all the boarders, I thought I would not finish it.)

—Go to the Bible!—said a sharp voice from a sharp-faced, sharp-eyed, sharp-elbowed, strenuous-looking woman in a black dress, appearing as if it began as a piece of mourning and perpetuated itself as a bit of economy.

You speak well, Madam,—I said;—yet there is room for a gloss or commentary on what you say. "He who would bring back the wealth of the Indies must carry out the wealth of the Indies." What you bring away from the Bible depends to some extent on what you carry to it.—Benjamin Franklin! Be so good as to step up to my chamber and bring me down the small uncovered pamphlet of

twenty pages which you will find lying under the "Cruden's Concordance." [The boy took a large bite, which left a very perfect crescent in the slice of bread-and-butter he held, and departed on his errand, with the portable fraction of his breakfast to sustain him on the way.]

Here it is. "Go to the Bible. A Dissertation, etc., etc. By J. J. Flourney. Athens, Georgia. 1858."

Mr. Flourney, Madam, has obeyed the precept which you have judiciously delivered. You may be interested, Madam, to know what are the conclusions at which Mr. J. J. Flourney of Athens, Georgia, has arrived. You shall hear, Madam. He has gone to the Bible, and he has come back from the Bible, bringing a remedy for existing social evils, which, if it is the real specific, as it professes to be, is of great interest to humanity, and to the female part of humanity in particular. It is what he calls *trigamy*, Madam, or the marrying of three wives, so that "good old men" may be solaced at once by the companionship of the wisdom of maturity, and of those less perfected but hardly less engaging qualities which are found at an earlier period of life. He has followed your precept, Madam; I hope you accept his conclusions.

The female boarder in black attire looked so puzzled, and, in fact, "all abroad," after the delivery of this "counter" of mine, that I left her to recover her wits, and went on with the conversation, which I was beginning to get pretty well in hand.

But in the mean time I kept my eye on the female boarder to see what effect I had produced. First, she was a little stunned at having her argument knocked over. Secondly, she was a little shocked at the tremendous character of the triple matrimonial suggestion. Thirdly.—I don't like to say what I thought. Something seemed to have pleased her fancy. Whether it was, that, if trigamy should come into fashion, there would be three times as many chances to enjoy the luxury of saying, "No!" is more than I can tell you. I may as well mention that

B. F. came to me after breakfast to borrow the pamphlet for "a lady,"—one of the boarders, he said,—looking as if he had a secret he wished to be relieved of.

—I continued.—If a human soul is necessarily to be trained up in the faith of those from whom it inherits its body, why, there is the end of all reason. If, sooner or later, every soul is to look for truth with its own eyes, the first thing is to recognize that no presumption in favor of any particular belief arises from the fact of our inheriting it. Otherwise you would not give the Mahometan a fair chance to become a convert to a better religion.

The second thing would be to depolarize every fixed religious idea in the mind by changing the word which stands for it.

—I don't know what you mean by "depolarizing" an idea,—said the divinity-student.

I will tell you,—I said.—When a given symbol which represents a thought has lain for a certain length of time in the mind, it undergoes a change like that which rest in a certain position gives to iron. It becomes magnetic in its relations,—it is traversed by strange forces which did not belong to it. The word, and consequently the idea it represents, is *polarized*.

The religious currency of mankind, in thought, in speech, and in print, consists entirely of polarized words. Borrow one of these from another language and religion, and you will find it leaves all its magnetism behind it. Take that famous word, O'm, of the Hindoo mythology. Even a priest cannot pronounce it without sin; and a holy Pundit would shut his ears and run away from you in horror, if you should say it aloud. What do you care for O'm? If you wanted to get the Pundit to look at his religion fairly, you must first depolarize this and all similar words for him. The argument for and against new translations of the Bible really turns on this. Skepticism is afraid to trust its truths in depolarized words, and so cries out against a new translation. I think, myself, if every idea our

Book contains could be shelled out of its old symbol and put into a new, clean, unmagnetic word, we should have some chance of reading it as philosophers, or wisdom-lovers, ought to read it,—which we do not and cannot now, any more than a Hindoo can read the “Gayatri” as a fair man and lover of truth should do. When society has once fairly dissolved the New Testament, which it never has done yet, it will perhaps crystallize it over again in new forms of language.

—I didn’t know you was a settled minister over this parish,—said the young fellow near me.

A sermon by a lay-preacher may be worth listening to,—I replied, calmly.—It gives the *parallax* of thought and feeling as they appear to the observers from two very different points of view. If you wish to get the distance of a heavenly body, you know that you must take two observations from distant points of the earth’s orbit,—in midsummer and midwinter, for instance. To get the parallax of heavenly truths, you must take an observation from the position of the laity as well as of the clergy. Teachers and students of theology get a certain look, certain conventional tones of voice, a clerical gait, a professional neckcloth, and habits of mind as professional as their externals. They are scholarly men and read Bacon, and know well enough what the “idols of the tribe” are. Of course they have their false gods, as all men that follow one exclusive calling are prone to do.—The clergy have played the part of the fly-wheel in our modern civilization. They have never suffered it to stop. They have often carried on its movement, when other moving powers failed, by the momentum stored in their vast body. Sometimes, too, they have kept it back by their *vis inertiae*, when its wheels were like to grind the bones of some old canonized error into fertilizers for the soil that yields the bread of life. But the mainspring of the world’s onward religious movement is not in them, nor in any one body of men, let me tell you. It is the people that makes the

clergy, and not the clergy that makes the people. Of course, the profession reacts on its source with variable energy.—But there never was a guild of dealers or a company of craftsmen that did not need sharp looking after.

Our old friend, Dr. Holyoke, whom we gave the dinner to some time since, must have known many people that saw the great bonfire in Harvard College yard.

—Bonfire?—shrieked the little man.
—The bonfire when Robert Calef’s book was burned?

The same,—I said,—when Robert Calef the Boston merchant’s book was burned in the yard of Harvard College, by order of Increase Mather, President of the College and Minister of the Gospel. You remember the old witchcraft revival of ’92, and how stout Master Robert Calef, trader, of Boston, had the pluck to tell the ministers and judges what a set of fools and worse than fools they were—

Remember it?—said the little man.—I don’t think I shall forget it, as long as I can stretch this forefinger to point with, and see what it wears.—There was a ring on it.

May I look at it?—I said.

Where it is,—said the little man;—it will never come off, till it falls off from the bone in the darkness and in the dust.

He pushed the high chair on which he sat slightly back from the table, and dropped himself, standing, to the floor,—his head being only a little above the level of the table, as he stood. With pain and labor, lifting one foot over the other, as a drummer handles his sticks, he took a few steps from his place,—his motions and the dead beat of the misshapen boots announcing to my practised eye and ear the malformation which is called in learned language *talipes varus*, or inverted club-foot.

Stop! stop!—I said,—let me come to you.

The little man hobbled back, and lifted himself by the left arm, with an ease approaching to grace which surprised me, into his high chair. I walked to his side, and he stretched out the fore-

finger of his right hand, with the ring upon it. The ring had been put on long ago, and could not pass the misshapen joint. It was one of those funeral rings which used to be given to relatives and friends after the decease of persons of any note or importance. Beneath a round bit of glass was a death's head. Engraved on one side of this, "L. B. *Æt.* 22,"—on the other, "Ob. 1692."

My grandmother's grandmother,—said the little man.—Hanged for a witch. It doesn't seem a great while ago. I knew my grandmother, and loved her. Her mother was daughter to the witch that Chief Justice Sewall hanged and Cotton Mather delivered over to the Devil.—That was Salem, though, and not Boston. No, not Boston. Robert Calef, the Boston merchant, it was that blew them all to —

Never mind where he blew them to,—I said;—for the little man was getting red in the face, and I didn't know what might come next.

This episode broke me up, as the jockeys say, out of my square conversational trot; but I settled down to it again.

—A man that knows men, in the street, at their work, human nature in its shirt-sleeves,—who makes bargains with deacons, instead of talking over texts with them,—a man who has found out that there are plenty of praying rogues and swearing saints in the world,—above all, who has found out, by living into the pith and core of life, that all of the Deity which can be folded up between the sheets of any human book is to the Deity of the firmament, of the strata, of the hot aortic flood of throbbing human life, of this infinite, instantaneous consciousness in which the soul's being consists,—an incandescent point in the filament connecting the negative pole of a past eternity with the positive pole of an eternity that is to come,—that all of the Deity which any human book can hold is to this larger Deity of the working battery of the universe only as the films in a book of gold-leaf are to the broad seams and curdled lumps of ore that lie in unsunned

mines and virgin placers,— Oh!—I was saying that a man who lives out-of-doors, among live people, gets some things into his head he might not find in the index of his "Body of Divinity."

I tell you what,—the idea of the professions' digging a moat round their close corporations, like that Japanese one at Jeddo, which you could put Park-Street Church on the bottom of and look over the vane from its side, and try to stretch another such spire across it without spanning the chasm,—that idea, I say, is pretty nearly worn out. Now when a civilization or a civilized custom falls into senile *dementia*, there is commonly a judgment ripe for it, and it comes as plagues come, from a breath,—as fires come, from a spark.

Here, look at medicine. Big wigs, gold-headed canes, Latin prescriptions, shops full of abominations, recipes a yard long, "curing" patients by drugging as sailors bring a wind by whistling, selling lies at a guinea apiece,—a routine, in short, of giving unfortunate sick people a mess of things either too odious to swallow or too acrid to hold, or, if that were possible, both at once.

—You don't know what I mean, indignant and not unintelligent country-practitioner? Then you don't know the history of medicine,—and that is not my fault. But don't expose yourself in any outbreak of eloquence; for, by the mortar in which Anaxagoras was pounded! I did not bring home Schenckius and Forestus and Hildanus, and all the old folios in calf and vellum I will show you, to be bullied by the proprietor of a "Wood and Bache," and a shelf of peppered sheepskin reprints by Philadelphia Editors. Besides, many of the profession and I know a little something of each other, and you don't think I am such a simpleton as to lose their good opinion by saying what the better heads among them would condemn as unfair and untrue? Now mark how the great plague came on the generation of drugging doctors, and in what form it fell.

A scheming drug-vendor, (inventive

genius,) an utterly untrustworthy and incompetent observer, (profound searcher of Nature,) a shallow dabbler in erudition, (sagacious scholar,) started the monstrous fiction (founded the immortal system) of Homœopathy. I am very fair, you see,—you can help yourself to either of these sets of phrases.

All the reason in the world would not have had so rapid and general an effect on the public mind to disabuse it of the idea that a drug is a good thing in itself, instead of being, as it is, a bad thing, as was produced by the trick (system) of this German charlatan (theorist). Not that the wiser part of the profession needed him to teach them; but the routinists and their employers, the “general practitioners,” who lived by selling pills and mixtures, and their drug-consuming customers, had to recognize that people could get well, unpoisoned. These dumb cattle would not learn it of themselves, and so the murrain of Homœopathy fell on them.

—You don’t know what plague has fallen on the practitioners of theology? I will tell you, then. It is SPIRITUALISM. While some are crying out against it as a delusion of the Devil, and some are laughing at it as an hysteric folly, and some are getting angry with it as a mere trick of interested or mischievous persons, Spiritualism is quietly undermining the traditional ideas of the future state which have been and are still accepted,—not merely in those who believe in it, but in the general sentiment of the community, to a larger extent than most good people seem to be aware of. It needn’t be true, to do this, any more than Homœopathy need, to do its work. The Spiritualists have some pretty strong instincts to pry over, which no doubt have been roughly handled by theologians at different times. And the Nemesis of the pulpit comes, in a shape it little thought of, beginning with the snap of a toe-joint, and ending with such a crack of old beliefs that the roar of it is heard in all the ministers’ studies of Christendom! Sir, you cannot have people of cultivation,

of pure character, sensible enough in common things, large-hearted women, grave judges, shrewd business-men, men of science, professing to be in communication with the spiritual world and keeping up constant intercourse with it, without its gradually reacting on the whole conception of that other life. It is the folly of the world, constantly, which confounds its wisdom. Not only out of the mouths of babes and sucklings, but out of the mouths of fools and cheats, we may often get our truest lessons. For the fool’s judgment is a dog-vane that turns with a breath, and the cheat watches the clouds and sets his weathercock by them,—so that one shall often see by their pointing which way the winds of heaven are blowing, when the slow-wheeling arrows and feathers of what we call the Temples of Wisdom are turning to all points of the compass.

—Amen!—said the young fellow called John.—Ten minutes by the watch. Those that are unanimous will please to signify by holding up their left foot!

I looked this young man steadily in the face for about thirty seconds. His countenance was as calm as that of a reposing infant. I think it was simplicity, rather than mischief, with perhaps a youthful playfulness, that led him to this outbreak. I have often noticed that even quiet horses, on a sharp November morning, when their coats are just beginning to get the winter roughness, will give little sportive demi-kicks, with slight sudden elevation of the subsequent region of the body, and a sharp short whinny,—by no means intending to put their heels through the dasher, or to address the driver rudely, but feeling, to use a familiar word, frisky. This, I think, is the physiological condition of the young person, John. I noticed, however, what I should call a *palpebral spasm*, affecting the eyelid and muscles of one side, which, if it were intended for the facial gesture called a wink, might lead me to suspect a disposition to be satirical on his part.

—Resuming the conversation, I remarked,—I am, *ex officio*, as a Professor,

a conservative. For I don't know any fruit that clings to its tree so faithfully, not even a "froze-n'-thaw" winter-apple, as a Professor to the bough of which his chair is made. You can't shake him off, and it is as much as you can do to pull him off. Hence, by a chain of induction I need not unwind, he tends to conservatism generally.

But then, you know, if you are sailing the Atlantic, and all at once find yourself in a current and the sea covered with weeds, and drop your Fahrenheit over the side and find it eight or ten degrees higher than in the ocean generally, there is no use in flying in the face of facts and swearing there is no such thing as a Gulf-Stream, when you are in it.

You can't keep gas in a bladder, and you can't keep knowledge tight in a profession. Hydrogen will leak out, and air will leak in, through India-rubber; and special knowledge will leak out, and general knowledge will leak in, though a profession were covered with twenty thicknesses of sheepskin diplomas. By Jove, Sir, till common sense is well mixed up with medicine, and common manhood with theology, and common honesty with law, *We the people*, Sir, some of us with nut-crackers, and some of us with trip-hammers, and some of us with pile-drivers, and some of us coming with a whisk! like air-stones out of a lunar volcano, will crash down on the lumps of nonsense in all of them till we have made powder of them like Aaron's calf!

If to be a conservative is to let all the drains of thought choke up and keep all the soul's windows down,—to shut out the sun from the east and the wind from the west,—to let the rats run free in the cellar, and the moths feed their fill in the chambers, and the spiders weave their lace before the mirrors, till the soul's typhus is bred out of our neglect, and we begin to snore in its coma or rave in its delirium,—I, Sir, am a *bonnet-rouge*, a red-cap of the barricades, my friends, rather than a conservative.

—Were you born in Boston, Sir?—

said the little man,—looking eager and excited.

I was not,—I replied.

It's a pity,—it's a pity,—said the little man;—it's the place to be born in. But if you can't fix it so as to be born here, you can come and live here. Old Ben Franklin, the father of American science and the American Union, wasn't ashamed to be born here. Jim Otis, the father of American Independence, bothered about in the Cape Cod marshes awhile, but he came to Boston as soon as he got big enough. Joe Warren, the first bloody ruffled-shirt of the Revolution, was as good as born here. Parson Channing strolled along this way from Newport, and staid here. Pity old Sam Hopkins hadn't come, too;—we'd have made a man of him,—poor, dear, good old Christian heathen! There he lies, as peaceful as a young baby, in the old burying-ground! I've stood on the slab many a time. Meant well,—meant well. Juggernaut. Parson Channing put a little oil on one linchpin, and slipped it out so softly, the first thing they knew about it was the wheel of that side was down. T'other fellow's at work now; but he makes more noise about it. When the linchpin comes out on his side, there'll be a jerk, I tell you! Some think it will spoil the old cart, and they pretend to say that there are valuable things in it which may get hurt. Hope not,—hope not. But this is the great Macadamizing place,—always cracking up something.

Cracking up Boston folks,—said the gentleman with the *diamond*-pin, whom, for convenience' sake, I shall hereafter call the *Koh-i-noor*.

The little man turned round mechanically towards him, as Maelzel's Turk used to turn, carrying his head slowly and horizontally, as if it went by cog-wheels.—Cracking up all sorts of things,—native and foreign vermin included,—said the little man.

This remark was thought by some of us to have a hidden personal application, and to afford a fair opening for a lively rejoinder, if the *Koh-i-noor* had been so

disposed. The little man uttered it with the distinct wooden calmness with which the ingenious Turk used to exclaim, *E-chez!* so that it *must* have been heard. The party supposed to be interested in the remark was, however, carrying a large knife-blade-full of something to his mouth just then, which, no doubt, interfered with the reply he would have made.

—My friend who used to board here was accustomed sometimes, in a pleasant way, to call himself the *Autocrat* of the table,—meaning, I suppose, that he had it all his own way among the boarders. I think our small boarder here is like to prove a refractory subject, if I undertake to use the sceptre my friend meant to bequeath me, too magisterially. I won't deny that sometimes, on rare occasions, when I have been in company with gentlemen who *preferred* listening, I have been guilty of the same kind of usurpation which my friend openly justified. But I maintain, that I, the Professor, am a good listener. If a man can tell me a fact which subtends an appreciable angle in the horizon of thought, I am as receptive as the contribution-box in a congregation of colored brethren. If, when I am exposing my intellectual dry-goods, a man will begin a good story, I will have them all in, and my shutters up, before he has got to the fifth “says he,” and listen like a three-years’ child, as the author of the “Old Sailor” says. I had rather hear one of those grand elemental laughs from either of our two Georges, (fictitious names, Sir or Madam,) or listen to one of those old playbills of our College days, in which “Tom and Jerry” (“Thomas and Jeremiah,” as the old Greek Professor was said to call it) was announced to be brought on the stage with the whole force of the Faculty, read by our Frederick, (no such person, of course,) than say the best things I might by any chance find myself capable of saying. Of course, if I come across a real thinker, a suggestive, acute, illuminating, informing talker, I enjoy the luxury of sitting still for a while as much as another.

Nobody talks much that doesn't say unwise things,—things he did not mean to say; as no person plays much without striking a false note sometimes. Talk, to me, is only spading up the ground for crops of thought. I can't answer for what will turn up. If I could, it wouldn't be talking, but “speaking my piece.” Better, I think, the hearty abandonment of one's self to the suggestions of the moment, at the risk of an occasional slip of the tongue, perceived the instant it escapes, but just one syllable too late, than the royal reputation of never saying a foolish thing.

—What shall I do with this little man?—There is only one thing to do,—and that is, to let him talk when he will. The day of the “Autocrat's” monologues is over.

—My friend,—said I to the young fellow whom, as I have said, the boarders call “John,”—My friend,—I said, one morning, after breakfast,—can you give me any information respecting the deformed person who sits at the other end of the table?

What! the Sculpin?—said the young fellow.

The diminutive person, with angular curvature of the spine,—I said,—and double *talipes varus*,—I beg your pardon,—with two club-feet.

Is that long word what you call it when a fellow walks so?—said the young man, making his fists revolve round an imaginary axis, as you may have seen youth of tender age and limited pugilistic knowledge, when they show how they would punish an adversary, themselves protected by this rotating guard,—the middle knuckle, meantime, thumb-supported, fiercely prominent, death-threatening.

It is,—said I.—But would you have the kindness to tell me if you know anything about this deformed person?

About the Sculpin?—said the young fellow.

My good friend,—said I,—I am sure, by your countenance, you would not hurt the feelings of one who has been hardly

enough treated by Nature to be spared by his fellows. Even in speaking of him to others, I could wish that you might not employ a term which implies contempt for what should inspire only pity.

A fellah's no business to be so—crooked,—said the young man called John.

Yes, yes,—I said, thoughtfully,—the strong hate the weak. It's all right. The arrangement has reference to the race, and not to the individual. Infirmary must be kicked out, or the stock run down. Wholesale moral arrangements are so different from retail!—I understand the instinct, my friend,—it is cosmic,—it is planetary,—it is a conservative principle in creation.

The young fellow's face gradually lost its expression as I was speaking, until it became as blank of vivid significance as the countenance of a gingerbread rabbit with two currants in the place of eyes. He had not taken my meaning.

Presently the intelligence came back with a snap that made him wink, as he answered,—Jest so. All right. A 1. Put her through. That's the way to talk. Did you speak to me, Sir?—Here the young man struck up that well-known song which I think they used to sing at Masonic festivals, beginning, "Aldiboron-tiphoseophornio, Where left you Chronohotonthologos?"

I beg your pardon,—I said;—all I meant was, that men, as temporary occupants of a permanent abode called human life, which is improved or injured by occupancy, according to the style of tenant, have a natural dislike to those who, if they live the life of the race as well as of the individual, will leave lasting injurious effects upon the abode spoken of, which is to be occupied by countless future generations. This is the final cause of the underlying brute instinct which we have in common with the herds.

—The gingerbread-rabbit expression was coming on so fast, that I thought I must try again.—It's a pity that families are kept up, where there are such hereditary infirmities. Still, let us treat this

poor man fairly, and not call him names. Do you know what his name is?

I know what the rest of 'em call him,—said the young fellow.—They call him Little Boston. There's no harm in that, is there?

It is an honorable term,—I replied.—But why Little *Boston*, in a place where most are Bostonians?

Because nobody else is quite so Boston all over as he is,—said the young fellow.

"L. B. Ob. 1692."—Little Boston let him be, when we talk about him. The ring he wears labels him well enough. There is stuff in the little man, or he wouldn't stick so manfully by this crooked, crotchety old town. Give him a chance.—You will drop the Sculpin, won't you?—I said to the young fellow.

Drop him?—he answered,—I ha'n't took him up yet.

No, no,—the term,—I said,—the term. Don't call him so any more, if you please. Call him Little Boston, if you like.

All right,—said the young fellow.—I wouldn't be hard on the poor little—

The word he used was objectionable in point of significance and of grammar. It was a frequent termination of certain adjectives among the Romans,—as of those designating a person following the sea, or given to rural pursuits. It is classed by custom among the profane words; why, it is hard to say,—but it is largely used in the street by those who speak of their fellows in pity or in wrath.

I never heard the young fellow apply the name of the odious pretended fish to the little man from that day forward.

—Here we are, then, at our board-ing-house. First, myself, the Professor, a little way from the head of the table, on the right, looking down, where the Autocrat used to sit. At the further end sits the Landlady. At the head of the table, just now, the Koh-i-noor, or the gentleman with the *diamond*. Opposite me is a Venerable Gentleman with a bland countenance, who as yet has spoken little. The Divinity-Student is my neighbor on the right,—and further down, that

Young Fellow of whom I have repeatedly spoken. The Landlady's Daughter sits near the Koh-i-noor, as I said. The Poor Relation near the Landlady. At the right upper corner is a fresh-looking youth of whose name and history I have as yet learned nothing. Next the further left-hand corner, looking down the table, sits the deformed person. The chair at his side, occupying that corner, is empty. I need not specially mention the other boarders, with the exception of Benjamin Franklin, the landlady's son, who sits near his mother. We are a tolerably assorted set,—difference enough and likeness enough; but still it seems to me there is something wanting. The Landlady's Daughter is the *prima donna* in the way of feminine attractions. I am not quite satisfied with this young lady. She wears more "jewelry," as certain young ladies call their trinkets, than I care to see on a person in her position. Her voice is strident, her laugh too much like a giggle, and she has that foolish way of dancing and bobbing like a quill-float with a "minnum" biting the hook below it, which one sees and weeps over sometimes in persons of more pretensions. I can't help hoping we shall put something into that empty chair yet which will add the missing string to our social harp. I hear talk of a rare Miss who is expected. Something in the school-girl way, I believe. We shall see.

—My friend who calls himself *The Autocrat* has given me a caution which I am going to repeat, with my comment upon it, for the benefit of all concerned.

Professor,—said he, one day,—don't you think your brain will run dry before a year's out, if you don't get the pump to help the cow? Let me tell you what happened to me once. I put a little money into a bank, and bought a check-book, so that I might draw it as I wanted, in sums to suit. Things went on nicely for a time; scratching with a pen was as easy as rubbing Aladdin's Lamp; and my blank check-book seemed to be a dictionary of possibilities, in which I could find

all the synonymes of happiness, and realize any one of them on the spot. A check came back to me at last with these two words on it,—*No funds*. My check-book was a volume of waste-paper.

Now, Professor,—said he,—I have drawn something out of your bank, you know; and just so sure as you keep drawing out your soul's currency without making new deposits, the next thing will be, *No funds*,—and then where will you be, my boy? These little bits of paper mean your gold and your silver and your copper, Professor; and you will certainly break up and go to pieces, if you don't hold on to your metallic basis.

There is something in that,—said I.—Only I rather think life can coin thought somewhat faster than I can count it off in words. What if one shall go round and dry up with soft napkins all the dew that falls of a June evening on the leaves of his garden? Shall there be no more dew on those leaves thereafter? Marry, yea,—many drops, large and round and full of moonlight as those thou shalt have absterged!

Here am I, the Professor,—a man who has lived long enough to have plucked the flowers of life and come to the berries,—which are not always sad-colored, but sometimes golden-hued as the crocus of April, or rosy-cheeked as the damask of June; a man who staggered against books as a baby, and will totter against them, if he lives to decrepitude; with a brain as full of tingling thoughts, such as they are, as a limb which we call "asleep," because it is so particularly awake, is of pricking points; presenting a key-board of nerve-pulps, not as yet tanned or ossified, to the finger-touch of all outward agencies; knowing something of the filmy threads of this web of life in which we insects buzz awhile, waiting for the gray old spider to come along; contented enough with daily realities, but twirling on his finger the key of a private Bedlam of ideals; in knowledge feeding with the fox oftener than with the stork,—loving better the breadth of a fertilizing inundation than the depth of a narrow

artesian well; finding nothing too small for his contemplation in the markings of the *grammatophora subtilissima*, and nothing too large in the movement of the solar system towards the star Lambda of the constellation Hercules;—and the question is, whether there is anything left for me, the Professor, to suck out of creation, after my lively friend has had his straw in the bung-hole of the Universe!

A man's mental reactions with the atmosphere of life must go on, whether he will or no, as between his blood and the air he breathes. As to catching the residuum of the process, or what we call *thought*,—the gaseous ashes of burned-out *thinking*,—the excretion of mental respiration,—that will depend on many things, as, on having a favorable intellectual temperature about one, and a fitting receptacle.—I sow more thought-seeds in twenty-four hours' travel over the desert-sand, along which my lonely consciousness paces day and night, than I shall throw into soil where it will germinate, in a year. All sorts of bodily and mental perturbations come between us and the due projection of our thought. The pulse-like "fits of easy and difficult transmission" seem to reach even the transparent medium through which our souls are seen. We know our humanity by its often intercepted rays, as we tell a revolving light from a star or meteor by its constantly recurring obscuration.

An illustrious scholar once told me, that, in the first lecture he ever delivered, he spoke but half his allotted time, and felt as if he had told all he knew. Braham came forward once to sing one of his most famous and familiar songs, and for his life could not recall the first line of it;—he told his mishap to the audience, and they screamed it at him in a chorus of a thousand voices. Milton could not write to suit himself, except from the autumnal to the vernal equinox. One in the clothing-business, who, there is reason to suspect, may have inherited, by descent, the great poet's impressible temperament, let a customer slip through

his fingers one day without fitting him with a new garment. "Ah!" said he to a friend of mine, who was standing by, "if it hadn't been for that confounded headache of mine this morning, I'd have had a coat on that man, in spite of himself, before he left the store." A passing throb, only,—but it deranged the nice mechanism required to persuade the accidental human being, *x*, into a given piece of broadcloth, *a*.

We must take care not to confound this frequent difficulty of transmission of our ideas with want of ideas. I suppose that a man's mind does in time form a neutral salt with the elements in the universe for which it has special elective affinities. In fact, I look upon a library as a kind of mental chemist's shop, filled with the crystals of all forms and hues which have come from the union of individual thought with local circumstances or universal principles.

When a man has worked out his special affinities in this way, there is an end of his genius as a real solvent. No more effervescence and hissing tumult as he pours his sharp thought on the world's biting alkaline unbeliefs! No more corrosion of the old monumental tablets covered with lies! No more taking up of dull earths, and turning them, first into clear solutions, and then into lustrous prisms!

I, the Professor, am very much like other men. I shall not find out when I have used up my affinities. What a blessed thing it is, that Nature, when she invented, manufactured, and patented her authors, contrived to make critics out of the chips that were left! Painful as the task is, they never fail to warn the author, in the most impressive manner, of the probabilities of failure in what he has undertaken. Sad as the necessity is to their delicate sensibilities, they never hesitate to advertise him of the decline of his powers, and to press upon him the propriety of retiring before he sinks into imbecility. Trusting to their kind offices, I shall endeavor to fulfil—

Bridget enters and begins clearing the table.

The following poem is my (the Professor's) only contribution to the great department of Ocean-Cable literature. As all the poets of this country will be engaged for the next six weeks in writing for the premium offered by the Crystal-Palace Company for the Burns Centenary, (so called, according to our Benjamin Franklin, because there will be na'ry a cent for any of us,) poetry will be very scarce and dear. Consumers may, consequently, be glad to take the present article, which, by the aid of a Latin tutor and a Professor of Chemistry, will be found intelligible to the educated classes.

DE SAUTY.

AN ELECTRO-CHEMICAL ECLOGUE.

Professor. Blue-Nose.

PROFESSOR.

TELL me, O Provincial! speak, Ceruleo-Nasal!

Lives there one De Sauty extant now among you,
Whispering Boanerges, son of silent thunder,
Holding talk with nations?

Is there a De Sauty ambulant on Tellus,
Bifid-cleft like mortals, dormant in night-cap,

Having sight, smell, hearing, food-receiving feature
Three times daily patent?

Breathes there such a being, O Ceruleo-Nasal?

Or is he a *mythus*,—ancient word for "humbug,"—

Such as Livy told about the wolf that wet-nursed

Romulus and Remus?

Was he born of woman, this alleged De Sauty?

Or a living product of galvanic action,
Like the *acarus* bred in Crosse's flint-solution?

Speak, thou Cyano-Ithinal!

BLUE-NOSE.

Many things thou askest, jackknife-bearing stranger,

Much-conjecturing mortal, pork-and-treacle-waster!

Pretermitt thy whittling. wheel thine ear-flap toward me,
Thou shalt hear them answered.

When the charge galvanic tingled through the cable,

At the polar focus of the wire electric
Suddenly appeared a white-faced man among us.

Called himself "DE SAUTY."

As the small opossum held in pouch maternal
Grasps the nutrient organ whence the term *mammalia*,

So the unknown stranger held the wire electric,
Sucking in the current.

When the current strengthened, bloomed the pale-faced stranger,—

Took no drink nor victual, yet grew fat and rosy,—

And from time to time, in sharp articulation,
Said, "All right! DE SAUTY."

From the lonely station passed the utterance,
spreading

Through the pines and hemlocks to the groves of steeples,

Till the land was filled with loud reverberations

Of "All right! DE SAUTY."

When the current slackened, drooped the mystic stranger,—

Faded, faded, faded, as the shocks grew weaker,—

Wasted to a shadow, with a hartshorn odor
Of disintegration.

Drops of deliquescence glistened on his forehead,

Whitened round his feet the dust of efflorescence,

Till one Monday morning, when the flow suspended,

There was no De Sauty.

Nothing but a cloud of elements organic,
C. O. H. N. Ferrum, Chor. Flu. Sil. Potassa,
Calc. Sod. Phosph. Mag. Sulphur, Mang. (?)

Alumin. (?) Cuprum, (?)

Such as man is made of.

Born of stream galvanic, with it he had perished!

There is no De Sauty now there is no current!
Give us a new cable, then again we'll hear him

Cry, "All right! DE SAUTY."

THE MINISTER'S WOOING.

[Continued.]

CHAPTER IV.

THEOLOGICAL TEA.

AT the call of her mother, Mary hurried into the "best room," with a strange discomposure of spirit she had never felt before. From childhood, her love for James had been so deep, equable, and intense, that it had never disturbed her with thrills and yearnings; it had grown up in sisterly calmness, and, quietly expanding, had taken possession of her whole nature, without her once dreaming of its power. But this last interview seemed to have struck some great nerve of her being,—and calm as she usually was, from habit, principle, and good health, she shivered and trembled, as she heard his retreating footsteps, and saw the orchard-grass fly back from under his feet. It was as if each step trod on a nerve,—as if the very sound of the rustling grass was stirring something living and sensitive in her soul. And, strangest of all, a vague impression of guilt hovered over her. *Had* she done anything wrong? She did not ask him there; she had not spoken love to him; no, she had only talked to him of his soul, and how she would give hers for his,—oh, so willingly,—and that was not love; it was only what Dr. H. said Christians must always feel.

"Child, what *have* you been doing?" said Aunt Katy, who sat in full flowing chintz petticoat and spotless dimity short-gown, with her company knitting-work in her hands; "your cheeks are as red as peonies. Have you been crying? What's the matter?"

"There is the Deacon's wife, mother," said Mary, turning confusedly, and darting to the entry-door.

Enter Mrs. Twitchel,—a soft, pillowy little elderly lady, whose whole air and dress reminded one of a sack of feath-

ers tied in the middle with a string. A large, comfortable pocket, hung upon the side, disclosed her knitting-work ready for operation; and she zealously cleansed herself with a checked handkerchief from the dust which had accumulated during her ride in the old "one-hoss shay," answering the hospitable salutation of Katy Scudder in that plaintive, motherly voice which belongs to certain nice old ladies, who appear to live in a state of mild chronic compassion for the sins and sorrows of this mortal life generally.

"Why, yes, Miss Scudder, I'm pretty tol'able. I keep goin', and goin'. That's my way. I's a-tellin' the Deacon, this mornin', I didn't see how I *was* to come here this afternoon; but then I *did* want to see Miss Scudder and talk a little about that precious sermon, Sunday. How *is* the Doctor? blessed man! Well, his reward must be great in heaven, if not on earth, as I was a-tellin' the Deacon; and he says to me, says he, 'Polly, we mustn't be man-worshippers.' There, dear," (*to Mary*), "don't trouble yourself about my bonnet; it a'n't my Sunday one, but I thought 'twould do. Says I to Cerinthy Ann, 'Miss Scudder won't mind, 'cause her heart's set on better things.' I always like to drop a word in season to Cerinthy Ann, 'cause she's clean took up with vanity and dress. Oh, dear! oh, dear me! so different from your blessed daughter, Miss Scudder! Well, it's a great blessing to be called in one's youth, like Samuel and Timothy; but then we doesn't know the Lord's ways. Sometimes I gets clean discouraged with my children,—but then ag'in I don't know; none on us does. Cerinthy Ann is one of the most master hands to turn off work; she takes hold and goes along like a woman, and nobody never knows when that gal finds the time to do all she does do; and I

don't know nothin' what I *should* do with-out her. Deacon was saying, if ever she was called, she'd be a Martha, and not a Mary; but then she's dreadful opposed to the doctrines. Oh, dear me! oh, dear me! Somehow they seem to rile her all up; and she was a-tellin' me yesterday, when she was a-hangin' out clothes, that she never should get reconciled to Decees and 'Lec-tion, 'cause she can't see, if things is certain, how folks is to help 'em-selves. Says I, 'Cerinthy Ann, folks a'n't to help 'em-selves; they's to submit unconditional.' And she jest slammed down the clothes-basket and went into the house."

When Mrs. Twitchel began to talk, it flowed a steady stream, as when one turns a faucet, that never ceases running till some hand turns it back again; and the occasion that cut the flood short at present was the entrance of Mrs. Brown.

Mr. Simeon Brown was a thriving ship-owner of Newport, who lived in a large house, owned several negro-servants and a span of horses, and affected some state and style in his worldly appearance. A passion for metaphysical Orthodoxy had drawn Simeon to the congregation of Dr. H., and his wife of course stood by right in a high place there. She was a tall, angular, somewhat hard-favored body, dressed in a style rather above the simple habits of her neighbors, and her whole air spoke the great woman, who in right of her thousands expected to have her say in all that was going on in the world, whether she understood it or not.

On her entrance, mild little Mrs. Twitchel fled from the cushioned rocking-chair, and stood with the quivering air of one who feels she has no business to be anywhere in the world, until Mrs. Brown's bonnet was taken and she was seated, when Mrs. Twitchel subsided into a corner and rattled her knitting-needles to conceal her emotion.

New England has been called the land of equality; but what land upon earth is wholly so? Even the mites in a bit of cheese, naturalists say, have great tumblings and strivings about position and

rank; he who has ten pounds will always be a nobleman to him who has but one, let him strive as manfully as he may; and therefore let us forgive meek little Mrs. Twitchel for melting into nothing in her own eyes when Mrs. Brown came in, and let us forgive Mrs. Brown that she sat down in the rocking-chair with an easy grandeur, as one who thought it her duty to be affable and meant to be. It was, however, rather difficult for Mrs. Brown, with her money, house, negroes, and all, to patronize Mrs. Katy Scudder, who was one of those women whose natures seem to sit on thrones, and who dispense patronage and favor by an in-born right and aptitude, whatever be their social advantages. It was one of Mrs. Brown's trials of life, this secret, strange quality in her neighbor, who stood apparently so far below her in worldly goods. Even the quiet, positive style of Mrs. Katy's knitting made her nervous; it was an implication of independence of her sway; and though on the present occasion every customary courtesy was bestowed, she still felt, as she always did when Mrs. Katy's guest, a secret uneasiness. She mentally contrasted the neat little parlor, with its white sanded floor and muslin curtains, with her own grand front-room, which boasted the then uncommon luxuries of Turkey carpet and Persian rug, and wondered if Mrs. Katy did really feel as cool and easy in receiving her as she appeared.

You must not understand that this was what Mrs. Brown *supposed* herself to be thinking about; oh, no! by no means! All the little, mean work of our nature is generally done in a small dark closet just a little back of the subject we are talking about, on which subject we suppose ourselves of course to be thinking;—of course we *are* thinking of it; how else could we talk about it?

The subject in discussion, and what Mrs. Brown supposed to be in her own thoughts, was the last Sunday's sermon on the doctrine of entire Disinterested Benevolence, in which good Doctor H.

had proclaimed to the citizens of Newport their duty of being so wholly absorbed in the general good of the universe as even to acquiesce in their own final and eternal destruction, if the greater good of the whole might thereby be accomplished.

"Well, now, dear me!" said Mrs. Twitchel, while her knitting-needles trotted contentedly to the mournful tone of her voice,—*"I was tellin' the Deacon, if we only could get there! Sometimes I think I get a little way,—but then ag'in I don't know; but the Deacon he's quite down,—he don't see no evidences in himself. Sometimes he says he don't feel as if he ought to keep his place in the church,—but then ag'in he don't know. He keeps a-turnin' and turnin' on't over in his mind, and a-tryin' himself this way and that way; and he says he don't see nothin' but what's selfish, no way."*

"Member one night last winter, after the Deacon got warm in bed, there come a rap at the door; and who should it be but old Beulah Ward, wantin' to see the Deacon?—'twas her boy she sent, and he said Beulah was sick and hadn't no more wood nor candles. Now I know'd the Deacon had carried that crittur half a cord of wood, if he had one stick, since Thanksgivin', and I'd sent her two o' my best moulds of candles,—nice ones that Cerinthy Ann run when we killed a crittur; but nothin' would do but the Deacon must get right out his warm bed and dress himself, and hitch up his team to carry over some wood to Beulah. Says I, 'Father, you know you'll be down with the rheumatis for this; besides, Beulah is real aggravatin'. I know she trades off what we send her to the store for rum, and you never get no thanks. She 'xpects, 'cause we has done for her, we always must; and more we do, more we may do.' And says he to me, says he, 'That's jest the way we sarves the Lord, Polly; and what if He shouldn't hear us when we call on Him in our troubles?' So I shet up; and the next day he was down with the rheumatis. And Cerinthy Ann, says she, 'Well, father, *now* I hope you'll own

you have got *some* disinterested benevolence,' says she; and the Deacon he thought it over a spell, and then he says, 'I'm 'fraid it's all selfish. I'm jest a-makin' a righteousness of it.' And Cerinthy Ann she come out, declarin' that the best folks never had no comfort in religion; and for her part she didn't mean to trouble her head about it, but have jest as good a time as she could while she's young, 'cause if she was 'lected to be saved she should be, and if she wa'n't she couldn't help it, any how."

"Mr. Brown says he came onto Dr. H.'s ground years ago," said Mrs. Brown, giving a nervous twitch to her yarn, and speaking in a sharp, hard, didactic voice, which made little Mrs. Twitchel give a gentle quiver, and look humble and apologetic. "Mr. Brown's a master thinker; there's nothing pleases that man better than a hard doctrine; he says you can't get 'em too hard for him. He don't find any difficulty in bringing his mind up; he just reasons it out all plain; and he says, people have no need to be in the dark; and that's *my* opinion. 'If folks know they ought to come up to anything, why *don't* they?' he says; and I say so too."

"Mr. Scudder used to say that it took great afflictions to bring his mind to that place," said Mrs. Katy. "He used to say that an old paper-maker told him once, that paper that was shaken only one way in the making would tear across the other, and the best paper had to be shaken every way; and so he said we couldn't tell, till we had been turned and shaken and tried every way, where we should tear."

Mrs. Twitchel responded to this sentiment with a gentle series of groans, such as were her general expression of approbation, swaying herself backward and forward; while Mrs. Brown gave a sort of toss and snort, and said that for her part she always thought people knew what they did know,—but she guessed she was mistaken.

The conversation was here interrupted by the civilities attendant on the recep-

tion of Mrs. Jones,—a broad, buxom, hearty soul, who had come on horseback from a farm about three miles distant.

Smiling with rosy content, she presented Mrs. Katy a small pot of golden butter,—the result of her forenoon's churning.

There are some people so evidently broadly and heartily of this world, that their coming into a room always materializes the conversation. We wish to be understood that we mean no disparaging reflection on such persons;—they are as necessary to make up a world as cabages to make up a garden; the great healthy principles of cheerfulness and animal life seem to exist in them in the gross; they are wedges and ingots of solid, contented vitality. Certain kinds of virtues and Christian graces thrive in such people as the first crop of corn does in the bottom-lands of the Ohio. Mrs. Jones was a church-member, a regular church-goer, and planted her comely person plump in front of Dr. H. every Sunday, and listened to his searching and discriminating sermons with broad, honest smiles of satisfaction. Those keen distinctions as to motives, those awful warnings and urgent expostulations, which made poor Deacon Twitchel weep, she listened to with great, round, satisfied eyes, making to all, and after all, the same remark,—that it was good, and she liked it, and the Doctor was a good man; and on the present occasion, she announced her pot of butter as one fruit of her reflections after the last discourse.

"You see," she said, "as I was a-settin' in the spring-house, this mornin', a-workin' my butter, I says to Dinah,—'I'm goin' to carry a pot of this down to Miss Scudder for the Doctor,—I got so much good out of his Sunday's sermon. And Dinah she says to me, says she,—'Laws, Miss Jones, I thought you was asleep, for sartin!' But I wasn't; only I forgot to take any caraway-seed in the mornin', and so I kinder missed it; you know it livens one up. But I never lost myself so but what I kinder heerd him goin' on, on, sort o' like,—and it sound-

ed *all sort o' good*; and so I thought of the Doctor to-day."

"Well, I'm sure," said Aunt Katy, "this will be a treat; we all know about your butter, Mrs. Jones. I sha'n't think of putting any of mine on table to-night, I'm sure."

"Law, now don't!" said Mrs. Jones. "Why, you re'lly make me ashamed, Miss Scudder. To be sure, folks does like our butter, and it always fetches a pretty good price,—*he's* very proud on't. I tell him he oughtn't to be,—we oughtn't to be proud of anything."

And now Mrs. Katy, giving a look at the old clock, told Mary it was time to set the tea-table; and forthwith there was a gentle movement of expectancy. The little mahogany tea-table opened its brown wings, and from a drawer came forth the snowy damask covering. It was etiquette, on such occasions, to compliment every article of the establishment successively, as it appeared; so the Deacon's wife began at the table-cloth.

"Well, I do declare, Miss Scudder beats us all in her table-cloths," she said, taking up a corner of the damask, admiringly; and Mrs. Jones forthwith jumped up and seized the other corner.

"Why, this 'ere must have come from the Old Country. It's 'most the beautifullest thing I ever did see."

"It's my own spinning," replied Mrs. Katy, with conscious dignity. "There was an Irish weaver came to Newport the year before I was married, who wove beautifully,—just the Old-Country patterns,—and I'd been spinning some uncommonly fine flax then. I remember Mr. Scudder used to read to me while I was spinning,"—and Aunt Katy looked afar, as one whose thoughts are in the past, and dropped out the last words with a little sigh, unconsciously, as to herself.

"Well, now, I must say," said Mrs. Jones, "this goes quite beyond me. I thought I could spin some; but I sha'n't never dare to show mine."

"I'm sure, Mrs. Jones, your towels that you had out bleaching, this spring, were wonderful," said Aunt Katy. "But

I don't pretend to do much now," she continued, straightening her trim figure. "I'm getting old, you know; we must let the young folks take up these things. Mary spins better now than I ever did. Mary, hand out those napkins."

And so Mary's napkins passed from hand to hand.

"Well, well," said Mrs. Twitchel to Mary, "it's easy to see that *your* linen-chest will be pretty full by the time *he* comes along; won't it, Miss Jones?"—and Mrs. Twitchel looked pleasantly facetious, as elderly ladies generally do, when suggesting such possibilities to younger ones.

Mary was vexed to feel the blood boil up in her cheeks in a most unexpected and provoking way at the suggestion; whereat Mrs. Twitchel nodded knowingly at Mrs. Jones, and whispered something in a mysterious aside, to which plump Mrs. Jones answered,—"Why, do tell! now I never!"

"It's strange," said Mrs. Twitchel, taking up her parable again, in such a plaintive tone that all knew something pathetic was coming, "what mistakes some folks will make, a-fetchin' up girls. Now there's your Mary, Miss Scudder,—why, there a-n't nothin' she can't do; but law, I was down to Miss Skinner's, last week, a-watchin' with her, and re'lly it 'most broke my heart to see her. Her mother was a most amazin' smart woman; but she brought Suky up, for all the world, as if she'd been a wax doll, to be kept in the drawer,—and sure enough, she was a pretty cretur,—and now she's married, what is she? She ha'n't no more idee how to take hold than nothin'. The poor child means well enough, and she works so hard she most kills herself; but then she is in the suds from mornin' till night,—she's one the sort whose work's never done,—and poor George Skinner's clean discouraged."

"There's everything in *knowing how*," said Mrs. Katy. "Nobody ought to be always working; it's a bad sign. I tell Mary,—'Always do up your work in the forenoon.' Girls must learn that. I

never work afternoons, after my dinner-dishes are got away; I never did and never would."

"Nor I, neither," chimed in Mrs. Jones and Mrs. Twitchel,—both anxious to show themselves clear on this leading point of New England house-keeping.

"There's another thing I always tell Mary," said Mrs. Katy, impressively. "'Never say there isn't time for a thing that ought to be done. If a thing is *necessary*, why, life is long enough to find a place for it. That's my doctrine. When anybody tells me they can't *find time* for this or that, I don't think much of 'em. I think they don't know how to work,—that's all.'"

Here Mrs. Twitchel looked up from her knitting, with an apologetic giggle, at Mrs. Brown.

"Law, now, there's Miss Brown, she don't know nothin' about it, 'cause she's got her servants to every turn. I s'pose she thinks it queer to hear us talkin' about our work. Miss Brown must have her time all to herself. I was tellin' the Deacon the other day that she was a privileged woman."

"I'm sure, those that have servants find work enough following 'em 'round," said Mrs. Brown,—who, like all other human beings, resented the implication of not having as many trials in life as her neighbors. "As to getting the work done up in the forenoon, that's a thing I never can teach 'em; they'd rather not. Chloe likes to keep her work 'round, and do it by snacks, any time, day or night, when the notion takes her."

"And it was just for that reason I never would have one of those creatures 'round," said Mrs. Katy. "Mr. Scudder was principled against buying negroes,—but if he had *not* been, I should not have wanted any of *their* work. I know what's to be done, and most help is no help to me. I want people to stand out of my way and let me get done. I've tried keeping a girl once or twice, and I never worked so hard in my life. When Mary and I do all ourselves, we can calculate everything to a minute; and we get our

time to sew and read and spin and visit, and live just as we want to."

Here, again, Mrs. Brown looked uneasy. To what use was it that she was rich and owned servants, when this Mordecai in her gate utterly despised her prosperity? In her secret heart she thought Mrs. Katy must be envious, and rather comforted herself on this view of the subject,—sweetly unconscious of any inconsistency in the feeling with her views of utter self-abnegation just announced.

Meanwhile the tea-table had been silently gathering on its snowy plateau the delicate china, the golden butter, the loaf of faultless cake, a plate of crullers or wonders, as a sort of sweet fried cake was commonly called,—tea-rusks, light as a puff, and shining on top with a varnish of egg,—jellies of apple and quince quivering in amber clearness,—whitest and purest honey in the comb,—in short, everything that could go to the getting-up of a most faultless tea.

"I don't see," said Mrs. Jones, resuming the gentle pæans of the occasion, "how Miss Scudder's loaf-cake always comes out jest so. It don't rise neither to one side nor t'other, but jest even all 'round; and it a'n't white one side and burnt the 'other, but jest a good brown all over; and it don't have no heavy streak in it."

"Jest what Cerinthy Ann was sayin', the other day," said Mrs. Twitchel. "She says she can't never be sure how hers is a-comin' out. Do what she can, it will be either too much or too little; but Miss Scudder's is always jest so. 'Law,' says I, 'Cerinthy Ann, it's *faculty*,—that's it;—them that has it has it, and them that hasn't—why, they've got to work hard, and not do half so well, neither.'"

Mrs. Katy took all these praises as matter of course. Since she was thirteen years old, she had never put her hand to anything that she had not been held to do better than other folks, and therefore she accepted her praises with the quiet repose and serenity of assured reputation; though, of course, she used

the usual polite disclaimers of "Oh, it's nothing, nothing at all; I'm sure I don't know how I do it, and was not aware it was so good,"—and so on. All which things are proper for gentlewomen to observe in like cases, in every walk of life.

"Do you think the Deacon will be along soon?" said Mrs. Katy, when Mary, returning from the kitchen, announced the important fact, that the tea-kettle was boiling.

"Why, yes," said Mrs. Twitchel. "I'm a-lookin' for him every minute. He told me, that he and the men should be plantin' up to the eight-acre lot, but he'd keep the colt up there to come down on; and so I laid him out a clean shirt, and says, 'Now, Father, you be sure and be there by five, so that Miss Scudder may know when to put her tea a-drawin'.'—There he is, I believe," she added, as a horse's tramp was heard without, and, after a few moments, the desired Deacon entered.

He was a gentle, soft-spoken man, low, sinewy, thin, with black hair showing lines and patches of silver. His keen, thoughtful, dark eye marked the nervous and melancholic temperament. A mild and pensive humility of manner seemed to brood over him, like the shadow of a cloud. Everything in his dress, air, and motions indicated punctilious exactness and accuracy, at times rising to the point of nervous anxiety.

Immediately after the bustle of his entrance had subsided, Mr. Simeon Brown followed. He was a tall, lank individual, with high cheek-bones, thin, sharp features, small, keen, hard eyes, and large hands and feet.

Simeon was, as we have before remarked, a keen theologian, and had the scent of a hound for a metaphysical distinction. True, he was a man of business, being a thriving trader to the coast of Africa, whence he imported negroes for the American market; and no man was held to understand that branch of traffic better,—he having, in his earlier days, commanded ships in the business, and thus learned it from the root. In his private life, Simeon was severe and dic-

tatorial. He was one of that class of people who, of a freezing day, will plant themselves directly between you and the fire, and there stand and argue to prove that selfishness is the root of all moral evil. Simeon said he always had thought so; and his neighbors sometimes supposed that nobody could enjoy better experimental advantages for understanding the subject. He was one of those men who suppose themselves submissive to the Divine will, to the uttermost extent demanded by the extreme theology of that day, simply because they have no nerves to feel, no imagination to conceive what endless happiness or suffering is, and who deal therefore with the great question of the salvation or damnation of myriads as a problem of theological algebra, to be worked out by their inevitable x, y, z .

But we must not spend too much time with our analysis of character, for matters at the tea-table are drawing to a crisis. Mrs. Jones has announced that she does not think "*he*" can come this afternoon, by which significant mode of expression she conveyed the dutiful idea that there was for her but one male person in the world. And now Mrs. Katy says, "Mary, dear, knock at the Doctor's door and tell him that tea is ready."

The Doctor was sitting in his shady study, in the room on the other side of the little entry. The windows were dark and fragrant with the shade and perfume of blossoming lilacs, whose tremulous shadow, mingled with spots of afternoon sunlight, danced on the scattered papers of a great writing-table covered with pamphlets and heavily-bound volumes of theology, where the Doctor was sitting.

A man of gigantic proportions, over six feet in height, and built every way with an amplitude corresponding to his height, sitting bent over his writing, so absorbed that he did not hear the gentle sound of Mary's entrance.

"Doctor," said the maiden, gently, "tea is ready."

No motion, no sound, except the quick racing of the pen over the paper.

"Doctor! Doctor!"—a little louder, and with another step into the apartment,—"tea is ready."

The Doctor stretched his head forward to a paper which lay before him, and responded in a low, murmuring voice, as reading something.

"Firstly,—if underived virtue be peculiar to the Deity, can it be the duty of a creature to have it?"

Here a little waxen hand came with a very gentle tap on his huge shoulder, and "Doctor, tea is ready," penetrated drowsily to the nerve of his ear, as a sound heard in sleep. He rose suddenly with a start, opened a pair of great blue eyes, which shone abstractedly under the dome of a capacious and lofty forehead, and fixed them on the maiden, who by this time was looking up rather archly, and yet with an attitude of the most profound respect, while her venerated friend was assembling together his earthly faculties.

"Tea is ready, if you please. Mother wished me to call you."

"Oh!—ah!—yes!—indeed!" he said, looking confusedly about, and starting for the door, in his study-gown.

"If you please, Sir," said Mary, standing in his way, "would you not like to put on your coat and wig?"

The Doctor gave a hurried glance at his study-gown, put his hand to his head, which, in place of the ample curls of his full-bottomed wig, was decked only with a very ordinary cap, and seemed to come at once to full comprehension. He smiled a kind of conscious, benignant smile, which adorned his high cheek-bones and hard features as sunshine adorns the side of a rock, and said, kindly, "Ah, well, child, I understand now; I'll be out in a moment."

And Mary, sure that he was now on the right track, went back to the tea-room with the announcement that the Doctor was coming.

In a few moments he entered, majestic and proper, in all the dignity of full-bottomed, powdered wig, full, flowing coat, with ample cuffs, silver knee- and shoe-

buckles, as became the gravity and majesty of the minister of those days.

He saluted all the company with a benignity which had a touch of the majestic, and also of the rustic in it; for at heart the Doctor was a bashful man,—that is, he had somewhere in his mental camp that treacherous fellow whom John Bunyan anathematizes under the name of Shame. The company rose on his entrance; the men bowed and the women curtsied, and all remained standing while he addressed to each with punctilious decorum those inquiries in regard to health and well-being which preface a social interview. Then, at a dignified sign from Mrs. Katy, he advanced to the table, and, all following his example, stood, while, with one hand uplifted, he went through a devotional exercise which, for length, more resembled a prayer than a grace,—after which the company were seated.

"Well, Doctor," said Mr. Brown, who, as a householder of substance, felt a conscious right to be first to open conversation with the minister, "people are beginning to make a noise about your views. I was talking with Deacon Timmins the other day down on the wharf, and he said Dr. Stiles said that it was entirely new doctrine,—entirely so,—and for his part he wanted the good old ways."

"They say so, do they?" said the Doctor, kindling up from an abstraction into which he seemed to be gradually subsiding. "Well, let them. I had rather publish *new* divinity than any other, and the more of it the better,—*if it be but true*. I should think it hardly worth while to write, if I had nothing *new* to say."

"Well," said Deacon Twitchel,—his meek face flushing with awe of his minister,—“Doctor, there’s all sorts of things said about you. Now the other day I was at the mill with a load of corn, and while I was a-waitin’, Amariah Wadsworth came along with his’n; and so while we were waitin’, he says to me, ‘Why, they say your minister is gettin’ to be an Armenian’; and he went on a-tellin’ how old Ma’am Badger told him that

you interpreted some parts of Paul’s Epistles clear on the Armenian side. You know Ma’am Badger’s a master-hand at doctrines, and she’s ’most an uncommon Calvinist.”

"That does not frighten me at all," said the sturdy Doctor. "Supposing I do interpret some texts like the Arminians. Can't Arminians have anything right about them? Who wouldn't rather go with the Arminians when they are *right*, than with the Calvinists when they are *wrong*?"

"That's it,—you've hit it, Doctor," said Simeon Brown. "That's what I always say. I say, 'Don't he *prove* it? and how are you going to answer him?' That gravels 'em."

"Well," said Deacon Twitchel, "Brother Seth,—you know Brother Seth,—he says you deny depravity. He's all for imputation of Adam's sin, you know; and I have long talks with Seth about it, every time he comes to see me; and he says, that, if we did not sin in Adam, it's givin' up the whole ground altogether; and then he insists you're clean wrong about the unregenerate doings."

"Not at all,—not in the least," said the Doctor, promptly.

"I wish Seth could talk with you sometime, Doctor. Along in the spring, he was down helpin' me to lay stone fence,—it was when we was fencin' off the south-pastur' lot,—and we talked pretty nigh all day; and it re'lly did seem to me that the longer we talked, the sotter Seth grew. He's a master-hand at readin'; and when he heard that your remarks on Dr. Mayhew had come out, Seth tackled up o' purpose and come up to Newport to get them, and spent all his time, last winter, studyin' on it and makin' his remarks; and I tell you, Sir, he's a tight fellow to argue with. Why, that day, what with layin' stone wall and what with arguin' with Seth, I come home quite beat out,—Miss Twitchel will remember."

"That he was!" said his helpmeet. "I 'member, when he came home, says I, 'Father, you seem clean used up'; and I stirred 'round lively like, to get him his

tea. But he jest went into the bedroom and laid down afore supper; and I says to Cerinthy Ann, 'That's a thing I ha'n't seen your father do since he was took with the typhus.' And Cerinthy Ann, she said she knew 'twa'n't anything but them old doctrines,—that it was always so when Uncle Seth come down. And after tea Father was kinder chirked up a little, and he and Seth set by the fire, and was a-beginnin' it ag'in, and I jest spoke out and said,—Now, Seth, these 'ere things doesn't hurt you; but the Deacon is weakly, and if he gets his mind riled after supper, he don't sleep none all night. So,' says I, 'you'd better jest let matters stop where they be; 'cause,' says I, 'twon't make no difference, for to-night, which on ye's got the right on't;—reckon the Lord 'll go on his own way without you; and we shall find out, by'm-by, what that is.'"

"Mr. Scudder used to think a great deal on these points," said Mrs. Katy, "and the last time he was home he wrote out his views. I haven't ever show'n them to you, Doctor; but I should be pleased to know what you think of them."

"Mr. Scudder was a good man, with a clear head," said the Doctor; "and I should be much pleased to see anything that he wrote."

A flush of gratified feeling passed over Mrs. Katy's face;—for one flower laid on the shrine which we keep in our hearts for the dead is worth more than any gift to our living selves.

We will not now pursue our party further, lest you, Reader, get more theological tea than you can drink. We will not recount the numerous nice points raised by Mr. Simeon Brown and adjusted by the Doctor,—and how Simeon invariably declared, that that was the way in which he disposed of them himself, and how he had thought it out ten years ago.

We will not relate, either, too minutely, how Mary changed color and grew pale and red in quick succession, when Mr. Simeon Brown incidentally remarked, that the "Monsoon" was going to set

sail that very afternoon, for her three-years' voyage. Nobody noticed it in the busy amenities,—the sudden welling and ebbing of that one poor little heart-fountain.

So we go,—so little knowing what we touch and what touches us as we talk! We drop out a common piece of news,—“Mr. So-and-so is dead,—Miss Such-a-one is married,—such a ship has sailed,”—and lo, on our right hand or our left, some heart has sunk under the news silently,—gone down in the great ocean of Fate, without even a bubble rising to tell its drowning pang. And this—God help us!—is what we call living!

CHAPTER V.

THE LETTER.

MARY returned to the quietude of her room. The red of twilight had faded, and the silver moon, round and fair, was rising behind the thick boughs of the apple-trees. She sat down in the window, thoughtful and sad, and listened to the crickets, whose ignorant jollity often sounds as mournfully to us mortals as ours may to superior beings. There the little hoarse, black wretches were scraping and creaking, as if life and death were invented solely for their pleasure, and the world were created only to give them a good time in it. Now and then a little wind shivered among the boughs, and brought down a shower of white petals which shimmered in the slant beams of the moonlight; and now a ray touched some tall head of grass, and forthwith it blossomed into silver, and stirred itself with a quiet joy, like a new-born saint just awaking in paradise. And ever and anon came on the still air the soft eternal pulsations of the distant sea,—sound mournfullest, most mysterious, of all the harpings of Nature. It was the sea,—the deep, eternal sea,—the treacherous, soft, dreadful, inexplicable sea; and *he* was perhaps at this moment being borne away on it,—away, away,—to what sorrows, to what temptations, to what dangers, she knew not. She looked along the old,

familiar, beaten path by which he came, by which he went, and thought, "What if he *never* should come back?" There was a little path through the orchard out to a small elevation in the pasture-lot behind, whence the sea was distinctly visible, and Mary had often used her low-silled window as a door when she wanted to pass out thither; so now she stepped out, and, gathering her skirts back from the dewy grass, walked thoughtfully along the path and gained the hill. Newport harbor lay stretched out in the distance, with the rising moon casting a long, wavering track of silver upon it; and vessels, like silver-winged moths, were turning and shifting slowly to and fro upon it, and one stately ship in full sail passing fairly out under her white canvas, graceful as some grand, snowy bird. Mary's beating heart told her that *there* was passing away from her one who carried a portion of her existence with him. She sat down under a lonely tree that stood there, and, resting her elbow on her knee, followed the ship with silent prayers, as it passed, like a graceful, cloudy dream, out of her sight.

Then she thoughtfully retraced her way to her chamber; and as she was entering, observed in the now clearer moonlight what she had not seen before,—something white, like a letter, lying on the floor. Immediately she struck a light, and there, sure enough, it was,—a letter in James's handsome, dashing hand; and the little puss, before she knew what she was about, actually kissed it, with a fervor which would much have astonished the writer, could he at that moment have been clairvoyant. But Mary felt as one who finds, in the emptiness after a friend's death, an unexpected message or memento; and all alone in the white, calm stillness of her little room her heart took sudden possession of her. She opened the letter with trembling hands, and read what of course we shall let you read. We got it out of a bundle of old, smoky, yellow letters, years after all the parties concerned were gone on the eternal journey beyond earth.

"MY DEAR MARY,—

"I cannot leave you so. I have about two hundred things to say to you, and it's a shame I could not have had longer to see you; but blessed be ink and paper! I am writing and seeing to fifty things besides; so you mustn't wonder if my letter has rather a confused appearance.

"I have been thinking that perhaps I gave you a wrong impression of myself, this afternoon. I am going to speak to you from my heart, as if I were confessing on my death-bed. Well, then, I do not confess to being what is commonly called a bad young man. I should be willing that men of the world generally, even strict ones, should look my life through and know all about it. It is only in your presence, Mary, that I feel that I am bad and low and shallow and mean, because you represent to me a sphere higher and holier than any in which I have ever moved, and stir up a sort of sighing and longing in my heart to come towards it. In all countries, in all temptations, Mary, your image has stood between me and low, gross vice. When I have been with fellows roaring drunken, beastly songs,—suddenly I have seemed to see you as you used to sit beside me in the singing-school, and your voice has been like an angel's in my ear, and I have got up and gone out sick and disgusted. Your face has risen up calm and white and still, between the faces of poor lost creatures who know no better way of life than to tempt us to sin. And sometimes, Mary, when I have seen girls that, had they been cared for by good pious mothers, might have been like you, I have felt as if I could cry for them. Poor women are abused all the world over; and it's no wonder they turn round and revenge themselves on us.

"No, I have not been bad, Mary, as the world calls badness. I have been kept by you. But do you remember you told me once, that, when the snow first fell and lay so dazzling and pure and soft, all about, you always felt as if the spreads

and window-curtains that seemed white before were dirty? Well, it's just like that with me. Your presence makes me feel that I am not pure,—that I am low and unworthy,—not worthy to touch the hem of your garment. Your good Dr. H. spent a whole half-day, the other Sunday, trying to tell us about the beauty of holiness; and he cut, and pared, and peeled, and sliced, and told us what it wasn't, and what was *like* it, and wasn't; and then he built up an exact definition, and fortified and bricked it up all round; and I thought to myself that he'd better tell 'em to look at Mary Scudder, and they'd understand all about it. That was what I was thinking when you talked to me for looking at you in church instead of looking towards the pulpit. It really made me laugh in myself to see what a good little ignorant, unconscious way you had of looking up at the Doctor, as if he knew more about that than you did.

"And now as to your Doctor that you think so much of, I like him for certain things, in certain ways. He is a great, grand, large pattern of a man,—a man who isn't afraid to think, and to speak anything he does think; but then I do believe, if he would take a voyage round the world in the fore-castle of a whaler, he would know more about what to say to people than he does now; it would certainly give him several new points to be considered. Much of his preaching about men is as like live men as Chinese pictures of trees and rocks and gardens,—no nearer the reality than that. All I can say is, 'It isn't so; and you'd know it, Sir, if you knew men.' He has got what they call a *system*,—just so many bricks put together just so; but it is too narrow to take in all I see in my wanderings round this world of ours. Nobody that has a soul, and goes round the world as I do, can help feeling it at times, and thinking, as he sees all the races of men and their ways, who made them, and what they were made for. To doubt the existence of a God seems to me like a want of common sense. There is a Maker and a Ruler, doubtless; but then, Mary, all

this invisible world of religion is unreal to me. I can see we must be good, somehow,—that if we are not, we shall not be happy here or hereafter. As to all the metaphysics of your good Doctor, you can't tell how they tire me. I'm not the sort of person that they can touch. I must have real things,—real people; abstractions are nothing to me. Then I think that he systematically contradicts on one Sunday what he preaches on another. One Sunday he tells us that God is the immediate efficient Author of every act of will; the next he tells us that we are entire free agents. I see no sense in it, and can't take the trouble to put it together. But then he and you have something in you that I call religion,—something that makes you *good*. When I see a man working away on an entirely honest, unworldly, disinterested pattern, as he does, and when I see you, Mary, as I said before, I should like at least to *be* as you are, whether I could believe as you do or not.

"How could you so care for me, and waste on one so unworthy of you such love? Oh, Mary, some better man must win you; I never shall and never can;—but then you must not quite forget me; you must be my friend, my saint. If, through your prayers, your Bible, your friendship, you can bring me to your state, I am willing to be brought there,—nay, desirous. God has put the key of my soul into your hands.

"So, dear Mary, good-bye! Pray still for your naughty, loving

"COUSIN JAMES."

Mary read this letter, and re-read it, with more pain than pleasure. To feel the immortality of a beloved soul hanging upon us, to feel that its only communications with Heaven must be through us, is the most solemn and touching thought that can pervade a mind. It was without one particle of gratified vanity, with even a throb of pain, that she read such exalted praises of herself from one blind to the glories of a far higher loveliness.

Yet was she at that moment, unknown

to herself, one of the great company scattered through earth who are priests unto God,—ministering between the Divine One, who has unveiled himself unto them, and those who as yet stand in the outer courts of the great sanctuary of truth and holiness. Many a heart, wrung, pierced, bleeding with the sins and sorrows of earth, longing to depart, stands in this mournful and beautiful ministry, but stands unconscious of the glory of the work in which it waits and suffers. God's kings and priests are crowned with thorns, walking the earth with bleeding feet, and comprehending not the work they are performing.

Mary took from a drawer a small pocket-book, from which dropped a lock of black hair,—a glossy curl, which seemed to have a sort of wicked, wilful life in every shining ring, just as she had often seen it shake naughtily on the owner's head. She felt a strange tenderness towards the little wilful thing, and, as she leaned over it, made in her heart a thousand fond apologies for every fault and error.

She was standing thus when Mrs. Scudder entered the room to see if her daughter had yet retired.

"What are you doing there, Mary?" she said, as her eye fell on the letter. "What is it you are reading?"

Mary felt herself grow pale; it was the first time in her whole life that her mother had asked her a question that she was not from the heart ready to answer. Her loyalty to her only parent had gone on even-handed with that she gave to her God; she felt, somehow, that the revelations of that afternoon had opened a gulf between them, and the consciousness overpowered her.

Mrs. Scudder was astonished at her evident embarrassment, her trembling, and paleness. She was a woman of prompt, imperative temperament, and the slightest hesitation in rendering to her a full, outspoken confidence had never before occurred in their intercourse. Her child was the core of her heart, the apple of her eye, and intense love is always near

neighbor to anger; there was, therefore, an involuntary flash from her eye and a heightening of her color, as she said,—*"Mary, are you concealing anything from your mother?"*

In that moment, Mary had grown calm again. The wonted serene, balanced nature had found its habitual poise, and she looked up innocently, though with tears in her large, blue eyes, and said,—

"No, mother,—I have nothing that I do not mean to tell you fully. This letter came from James Marvyn; he came here to see me this afternoon."

"Here? — when? I did not see him."

"After dinner. I was sitting here in the window, and suddenly he came up behind me through the orchard-path."

Mrs. Katy sat down with a flushed cheek and a discomposed air; but Mary seemed actually to bear her down by the candid clearness of the large, blue eye which she turned on her, as she stood perfectly collected, with her deadly pale face and a brilliant spot burning on each cheek.

"James came to say good-bye. He complained that he had not had a chance to see me alone since he came home."

"And what should he want to see you alone for?" said Mrs. Scudder, in a dry, disturbed tone.

"Mother, — everybody has things at times which they would like to say to some one person alone," said Mary.

"Well, tell me what he said."

"I will try. In the first place, he said that he always had been free, all his life, to run in and out of our house, and to wait on me like a brother."

"Hum!" said Mrs. Scudder; "but he isn't your brother, for all that."

"Well, then, he wanted to know why you were so cold to him, and why you never let him walk with me from meetings or see me alone, as we often used to. And I told him why,—that we were not children now, and that you thought it was not best; and then I talked with him about religion, and tried to persuade him to attend to the concerns of his soul;

and I never felt so much hope for him as I do now."

Aunt Katy looked skeptical, and remarked,—“If he really felt a disposition for religious instruction, Dr. H. could guide him much better than you could.”

“Yes,—so I told him, and I tried to persuade him to talk with Dr. H.; but he was very unwilling. He said, I could have more influence over him than anybody else,—that nobody could do him any good but me.”

“Yes, yes,—I understand all that,” said Aunt Katy,—“I have heard young men say *that* before, and I know just what it amounts to.”

“But, mother, I do think James was moved very much, this afternoon. I never heard him speak so seriously; he seemed really in earnest, and he asked me to give him my Bible.”

“Couldn't he read any Bible but yours?”

“Why, naturally, you know, mother, he would like my Bible better, because it would put him in mind of me. He promised faithfully to read it all through.”

“And then, it seems, he wrote you a letter.”

“Yes, mother.”

Mary shrank from showing this letter, from the natural sense of honor which makes us feel it indelicate to expose to an unsympathizing eye the confidential outpourings of another heart; and then she felt quite sure that there was no such intercessor for James in her mother's heart as in her own. But over all this reluctance rose the determined force of duty; and she handed the letter in silence to her mother.

Mrs. Scudder took it, laid it deliberately in her lap, and then began searching in the pocket of her chintz petticoat for her spectacles. These being found, she wiped them, accurately adjusted them, opened the letter and spread it on her lap, brushing out its folds and straightening it, that she might read with the greater ease. After this she read it carefully and deliberately; and all this while there was such a stillness, that the sound of the

tall varnished clock in the best room could be heard through the half-opened door.

After reading it with the most tiresome, torturing slowness, she rose, and laying it on the table under Mary's eye, and pressing down her finger on two lines in the letter, said, “Mary, have you told James that you loved him?”

“Yes, mother, always. I always loved him, and he always knew it.”

“But, Mary, this that he speaks of is something different. What has passed between”——

“Why, mother, he was saying that we who were Christians drew to ourselves and did not care for the salvation of our friends; and then I told him how I had always prayed for him, and how I should be willing even to give up my hopes in heaven, if he might be saved.”

“Child,—what do you mean?”

“I mean, if only one of us two could go to heaven, I had rather it should be him than me,” said Mary.

“Oh, child! child!” said Mrs. Scudder, with a sort of groan,—“has it gone with you so far as this? Poor child!—after all my care, you *are* in love with this boy,—your heart is set on him.”

“Mother, I am not. I never expect to see him much,—never expect to marry him or anybody else;—only he seems to me to have so much more life and soul and spirit than most people,—I think him so noble and grand,—that is, that he *could* be, if he were all he ought to be,—that, somehow, I never think of myself in thinking of him, and his salvation seems worth more than mine;—men can do so much more!—they can live such splendid lives!—oh, a real noble man is so glorious!”

“And you would like to see him well married, would you not?” said Mrs. Scudder, sending, with a true woman's aim, this keen arrow into the midst of the cloud of enthusiasm which enveloped her daughter. “I think,” she added, “that Jane Spencer would make him an excellent wife.”

Mary was astonished at a strange, new

pain that shot through her at these words. She drew in her breath and turned herself uneasily, as one who had literally felt a keen dividing blade piercing between soul and spirit. Till this moment, she had never been conscious of herself; but the shaft had torn the veil. She covered her face with her hands; the hot blood flushed scarlet over neck and brow; at last, with a beseeching look, she threw herself into her mother's arms.

"Oh, mother, mother, I am selfish, after all!"

Mrs. Scudder folded her silently to her heart, and said, "My daughter, this is not at all what I wished it to be; I see how it is;—but then you have been a good child; I don't blame you. We can't always help ourselves. We don't always really know how we do feel. I didn't know, for a long while, that I loved your father. I thought I was only curious about him, because he had a strange way of treating me, different from other men; but, one day, I remember, Julian Simons told me that it was reported that his mother was making a match for him with Susan Emery, and I was astonished to find how I felt. I saw him that evening, and the moment he looked at me I saw it wasn't true; all at once I knew something I never knew before,—and that was, that I should be very unhappy, if he loved any one else better than me. But then, my child, your father was a different man from James;—he was as much better than I was as you are than James. I was a foolish, thoughtless young thing then. I never should have been anything at all, but for him. Somehow, when I loved him, I grew more serious, and then he always guided and led me. Mary, your father was a wonderful man; he was one of the sort that the world knows not of;—sometime I must show you his letters. I always hoped, my daughter, that you would marry such a man."

"Don't speak of marrying, mother. I never shall marry."

"You certainly should not, unless you can marry in the Lord. Remember the

words, 'Be ye not unequally yoked together with unbelievers. For what fellowship hath righteousness with unrighteousness? and what communion hath light with darkness? and what concord hath Christ with Belial? or what part hath he that believeth with an infidel?'"

"Mother, James is not an infidel."

"He certainly is an *unbeliever*, Mary, by his own confession;—but then God is a Sovereign and hath mercy on whom He will. You do right to pray for him; but if he does not come out on the Lord's side, you must not let your heart mislead you. He is going to be gone three years, and you must try to think as little of him as possible;—put your mind upon your duties, like a good girl, and God will bless you. Don't believe too much in your power over him;—young men, when they are in love, will promise anything, and really think they mean it; but nothing is a saving change, except what is wrought in them by sovereign grace."

"But, mother, does not God use the love we have to each other as a means of doing us good? Did you not say that it was by your love to father that you first were led to think seriously?"

"That is true, my child," said Mrs. Scudder, who, like many of the rest of the world, was surprised to meet her own words walking out on a track where she had not expected them, but was yet too true of soul to cut their acquaintance because they were not going the way of her wishes. "Yes, all that is true; but yet, Mary, when one has but one little ewe lamb in the world, one is jealous of it. I would give all the world, if you had never seen James. It is dreadful enough for a woman to love anybody as you can, but it is more to love a man of unsettled character and no religion. But then the Lord appoints all our goings; it is not in man that walketh to direct his steps;—I leave you, my child, in His hands." And, with one solemn and long embrace, the mother and daughter parted for the night.

It is impossible to write a story of New England life and manners for a thought-

less, shallow-minded person. If we represent things as they are, their intensity, their depth, their unworldly gravity and earnestness, must inevitably repel lighter spirits, as the reverse pole of the magnet drives off sticks and straws.

In no other country were the soul and the spiritual life ever such intense realities, and everything contemplated so much (to use a current New England phrase) "in reference to eternity." Mrs. Scudder was a strong, clear-headed, practical woman. No one had a clearer estimate of the material and outward life, or could more minutely manage its smallest item; but then a tremendous, eternal future had so weighed down and compacted the fibres of her very soul, that all earthly things were but as dust in comparison to it. That her child should be one elected to walk in white, to reign with Christ when earth was a forgotten dream, was her one absorbing wish; and she looked on all the events of life only with reference to this. The way of life was narrow, the chances in favor of any child of Adam infinitely small; the best, the most seemingly pure and fair, was by nature a child of wrath, and could be saved only by a sovereign decree, by which it should be plucked as a brand

from the burning. Therefore it was, that, weighing all things in one balance, there was the sincerity of her whole being in the dread which she felt at the thought of her daughter's marriage with an unbeliever.

Mrs. Scudder, after retiring to her room, took her Bible, in preparation for her habitual nightly exercise of devotion, before going to rest. She read and re-read a chapter, scarce thinking what she was reading,—aroused herself,—and then sat with the book in her hand in deep thought. James Marvyn was her cousin's son, and she had a strong feeling of respect and family attachment for his father. She had, too, a real kindness for the young man, whom she regarded as a well-meaning, wilful youngster; but that *he* should touch her saint, her Mary, that *he* should take from her the daughter who was her all, really embittered her heart towards him.

"After all," she said to herself, "there are three years,—three years in which there will be no letters, or perhaps only one or two,—and a great deal may be done in three years, if one is wise";—and she felt within herself an arousing of all the shrewd womanly and motherly tact of her nature to meet this new emergency.

[To be continued.]

WHITE'S SHAKSPEARE.*

(FIRST NOTICE.)

It may be doubted whether any language be rich enough to maintain more than one truly great poet,—and whether there be more than one period, and that very short, in the life of a language, when such a phenomenon as a great poet is possible. It may be reckoned one of the

rarest pieces of good-luck that ever fell to the share of a race, that (as was true of Shakspeare) its most rhythmic genius, its acutest intellect, its profoundest imagination, and its healthiest understanding should have been combined in one man, and that he should have arrived at the full development of his powers at the moment when the material in which he was to work—that wonderful composite called English, the best result of the confusion

* *The Works of William Shakspeare*. Edited, etc., by RICHARD GRANT WHITE. Vols. II., III., IV., and V. Boston: Little, Brown, & Co. 1858.

of tongues—was in its freshest perfection. The English-speaking nations should build a monument to the misguided enthusiasts of the Plain of Shinar; for, as the mixture of many bloods seems to have made them the most vigorous of modern races, so has the mingling of divers speeches given them a language which is perhaps the noblest vehicle of poetic thought that ever existed.

Had Shakspeare been born fifty years earlier, he would have been cramped by a book-language, not yet flexible enough for the demands of rhythmic emotion, not yet sufficiently popularized for the natural and familiar expression of supreme thought, not yet so rich in metaphysical phrase as to render possible that ideal representation of the great passions which is the aim and end of Art, not yet subdued by practice and general consent to a definiteness of accentuation essential to ease and congruity of metrical arrangement. Had he been born fifty years later, his ripened manhood would have found itself in an England absorbed and angry with the solution of political and religious problems, from which his whole nature was averse, instead of in that Elizabethan social system, ordered and planetary in its functions and degrees as the angelic hierarchy of the Areopagite, where his contemplative eye could crowd itself with various and brilliant picture, and whence his impartial brain—one lobe of which seems to have been Normanly refined and the other Saxonly sagacious—could draw its morals of courtly and worldly wisdom, its lessons of prudence and magnanimity. In estimating Shakspeare, it should never be forgotten, that, like Goethe, he was essentially observer and artist, and incapable of partisanship. The passions, actions, sentiments, whose character and results he delighted to watch and to reproduce, are those of man in society as it existed; and it no more occurred to him to question the right of that society to exist than to criticize the divine ordination of the seasons. His business was with men as they were, not with man as he ought to

be,—with the human soul as it is shaped or twisted into character by the complex experience of life, not in its abstract essence, as something to be saved or lost. During the first half of the seventeenth century, the centre of intellectual interest was rather in the other world than in this, rather in the region of thought and principle and conscience than in actual life. It was a generation in which the poet was, and felt himself, out of place. Sir Thomas Browne, our most imaginative mind since Shakspeare, found breathing-room, for a time, among the "*O altitudines!*" of religious speculation, but soon descended to occupy himself with the exactitudes of science. Jeremy Taylor, who half a century earlier would have been Fletcher's rival, compels his clipped fancy to the conventual discipline of prose, (Maid Marian turned nun,) and waters his poetic wine with doctrinal eloquence. Milton is saved from making total shipwreck of his large-utteranced genius on the desolate Noman's Land of a religious epic only by the lucky help of Satan and his colleagues, with whom, as foiled rebels and republicans, he cannot conceal his sympathy. As purely poet, Shakspeare would have come too late, had his lot fallen in that generation. In mind and temperament too exoteric for a mystic, his imagination could not have at once illustrated the influence of his epoch and escaped from it, like that of Browne; the equilibrium of his judgment, essential to him as an artist, but equally removed from propagandism, whether as enthusiast or logician, would have unfitted him for the pulpit; and his intellectual being was too sensitive to the wonder and beauty of outward life and Nature to have found satisfaction, as Milton's could, (and perhaps only by reason of his blindness,) in a world peopled by purely imaginary figures. We might fancy his becoming a great statesman, but he lacked the social position which could have opened that career to him. What we mean, when we say *Shakspeare*, is something inconceivable either during the reign of Henry the

Eighth or the Commonwealth, and which would have been impossible after the Restoration.

All favorable stars seem to have been in conjunction at his nativity. The Reformation had passed the period of its vinous fermentation, and its clarified results remained as an element of intellectual impulse and exhilaration; there were small signs yet of the acetous and putrefactive stages which were to follow in the victory and decline of Puritanism. Old forms of belief and worship still lingered, all the more touching to Fancy, perhaps, that they were homeless and attained; the light of skeptic day was baffled by depths of forest where superstitious shapes still cowered, creatures of immemorial wonder, the raw material of Imagination. The invention of printing, without yet vulgarizing letters, had made the thought and history of the entire past contemporaneous; while a crowd of translators put every man who could read in inspiring contact with the select souls of all the centuries. A new world was thus opened to intellectual adventure at the very time when the keel of Columbus had turned the first daring furrow of discovery in that unmeasured ocean which still girt the known earth with a beckoning horizon of hope and conjecture, which was still fed by rivers that flowed down out of primeval silences, and which still washed the shores of Dreamland. Under a wise, cultivated, and firm-handed monarch also, the national feeling of England grew rapidly more homogeneous and intense, the rather as the womanhood of the sovereign stimulated a more chivalric loyalty,—while the new religion, of which she was the defender, helped to make England morally, as it was geographically, insular to the continent of Europe.

If circumstances could ever make a great national poet, here were all the elements mingled at melting-heat in the alembic, and the lucky moment of projection was clearly come. If a great national poet could ever avail himself of circumstances, this was the occasion,—and, fortunately,

Shakspeare was equal to it. Above all, we esteem it lucky that he found words ready to his use, original and untarnished,—types of thought whose sharp edges were unworn by repeated impressions. In reading Hakluyt's Voyages, we are almost startled now and then to find that even common sailors could not tell the story of their wanderings without rising to an almost Odyssean strain, and habitually used a diction that we should be glad to buy back from desuetude at any cost. Those who look upon language only as anatomists of its structure, or who regard it as only a means of conveying abstract truth from mind to mind, as if it were so many algebraic formulæ, are apt to overlook the fact that its being alive is all that gives it poetic value. We do not mean what is technically called a living language,—the contrivance, hollow as a speaking-trumpet, by which breathing and moving bipeds, even now, sailing o'er life's solemn main, are enabled to hail each other and make known their mutual shortness of mental stores,—but one that is still hot from the hearts and brains of a people, not hardened yet, but moltenly ductile to new shapes of sharp and clear relief in the moulds of new thought. So soon as a language has become literary, so soon as there is a gap between the speech of books and that of life, the language becomes, so far as poetry is concerned, almost as dead as Latin, and (as in writing Latin verses) a mind in itself essentially original becomes in the use of such a medium of utterance unconsciously reminiscential and reflective, lunar and not solar, in expression and even in thought. For words and thoughts have a much more intimate and genetic relation, one with the other, than most men have any notion of; and it is one thing to use our mother-tongue as if it belonged to us, and another to be the puppets of an overmastering vocabulary. "Ye know not," says Ascham, "what hurt ye do to Learning, that care not for Words, but for Matter, and so make a Divorce betwixt the Tongue and the Heart." *Lingua Toscana in bocca Ro-*

mana is the Italian proverb; and that of poets should be, *The tongue of the people in the mouth of the scholar*. We intend here no assent to the early theory, or, at any rate, practice, of Wordsworth, who confounded plebeian modes of thought with rustic forms of phrase, and then atoned for his blunder by abscinding into a diction more Latinized than that of any poet of his century.

Shakspeare was doubly fortunate. Saxon by the father and Norman by the mother, he was a representative Englishman. A country-boy, he learned first the rough and ready English of his rustic mates, who knew how to make nice verbs and adjectives curtsy to their needs. Going up to London, he acquired the *lingua aulica* precisely at the happiest moment, just as it was becoming, in the strictest sense of the word, *modern*,—just as it had recruited itself, by fresh impressments from the Latin and Latinized languages, with new words to express the new ideas of an enlarging intelligence which printing and translation were fast making cosmopolitan,—words which, in proportion to their novelty, and to the fact that the mother-tongue and the foreign had not yet wholly mingled, must have been used with a more exact appreciation of their meaning.* It was in London, and chiefly by means of the stage, that a thorough amalgamation of the Saxon, Norman, and scholarly elements of English was brought about. Already, Puttenham, in his “*Arte of English Poesy*,” declares that the practice of the capital and the country within sixty miles of it was the standard of correct diction, the *jus et norma loquendi*. Already Spenser had almost recreated English poetry,—and it is interesting to observe, that, scholar as he was, the archaic words which he was at first over-fond of introducing are often provincialisms of purely English original. Already Marlowe had brought the English unrhymed pentameter (which had hitherto justified but half its name, by being

always blank and never verse) to a perfection of melody, harmony, and variety which has never been surpassed. Shakspeare, then, found a language already to a certain extent *established*, but not yet fetlocked by dictionary- and grammar-mongers,—a versification harmonized, but which had not yet exhausted all its modulations, or been set in the stocks by critics who deal judgment on refractory feet, that will dance to Orphean measures of which their judges are insensible. That the language was established is proved by its comparative uniformity as used by the dramatists, who wrote for mixed audiences, as well as by Ben Jonson's satire upon Marston's neologisms; that it at the same time admitted foreign words to the rights of citizenship on easier terms than now is in good measure equally true. What was of greater import, no arbitrary line had been drawn between high words and low; vulgar then meant simply what was common; poetry had not been alienated from the people by the establishment of an Upper House of vocables, alone entitled to move in the stately ceremonies of verse, and privileged from arrest while they forever keep the promise of meaning to the ear and break it to the sense. The hot conception of the poet had no time to cool while he was debating the comparative respectability of this phrase or that; but he snatched what word his instinct prompted, and saw no indiscretion in making a king speak as his country-nurse might have taught him.* It was Waller who first learned in France that to talk in rhyme alone comported with the state of royalty. In the time of Shakspeare, the living tongue resembled that tree which Father Hue saw in Tartary, whose leaves were languaged,—and every hidden root of thought, every subtlest fibre of feeling, was mated

* As where Ben Jonson is able to say,—

“Men may securely sin, but safely never.”

* “Vulgarem locutionem appellamus eam quâ infantes adnefiunt ab adiscentibus cum primitus distinguere voces incipiunt: vel, quod brevius dici potest, vulgarem locutionem asserimus *quam sine omni regulâ, nutricem imitantes, accipiunt*. Dantes, *de Vulg. Eloquentia*, Lib. I. cap. I.

by new shoots and leafage of expression, fed from those unseen sources in the common earth of human nature.

The Cabalists had a notion, that whoever found out the mystic word for anything attained to absolute mastery over that thing. The reverse of this is certainly true of poetic expression; for he who is thoroughly possessed of his thought, who imaginatively conceives an idea or image, becomes master of the word that shall most amply and fitly utter it. Heminge and Condell tell us, accordingly, that there was scarce a blot in the manuscripts they received from Shakspeare; and this is the natural corollary from the fact that such an imagination as his is as unparalleled as the force, variety, and beauty of the phrase in which it embodied itself.* We believe that Shakspeare, like all other great poets, instinctively used the dialect which he found current, and that his words are not more wrested from their ordinary meaning than followed necessarily from the unwonted weight of thought or stress of passion they were called on to support. He needed not to mask familiar thoughts in the weeds of unfamiliar phraseology; for the life that was in his mind could transfuse the language of every day with an intelligent vivacity, that makes

* Gray, himself a painful corrector, told Nicholls that "nothing was done so well as at the first concoction,"—adding, as a reason, "We think in words." Ben Jonson said, it was a pity Shakspeare had not blotted more, for that he sometimes wrote nonsense,—and cited in proof of it the verse

"Cæsar did never wrong but with just cause."

The last four words do not appear in the passage as it now stands, and Professor Craik suggests that they were stricken out in consequence of Jonson's criticism. This is very probable; but we suspect that the pen that blotted them was in the hand of Master Heminge or his colleague. The moral confusion in the idea was surely admirably characteristic of the general who had just accomplished a successful *coup d'état*, the condemnation of which he would fancy that he read in the face of every honest man he met, and which he would therefore be forever indirectly palliating.

it seem lambent with fiery purpose, and at each new reading a new creation. He could say with Dante, that "no word had ever forced him to say what he would not, though he had forced many a word to say what it would not,"—but only in the sense, that the mighty magic of his imagination had conjured out of it its uttermost secret of power or pathos. He himself says, in one of his sonnets,—

"Why is my verse so barren of new pride,
So far from alteration and quick change?
Why, with the time, do I not glance aside
To new-found methods and to compounds
strange?
Why write I still all one, ever the same,
And keep invention in a noted weed
That every word doth almost tell my
name?"

When we say that Shakspeare used the current language of his day, we mean only that he habitually employed such language as was universally comprehensible,—that he was not run away with by the hobby of any theory as to the fitness of this or that component of English for expressing certain thoughts or feelings. That the artistic value of a choice and noble diction was quite as well understood in his day as in ours is evident from the praises bestowed by his contemporaries on Drayton, and by the epithet "well-linguaged" applied to Daniel, whose poetic style is as modern as that of Tennyson; but the endless absurdities about the comparative merits of Saxon and Norman-French, vented by persons incapable of distinguishing one tongue from the other, were as yet unheard of. The influence of the Normans in Romanizing our language has been vastly overrated. We find a principle of *caste* established in certain cases by the relation of producer and consumer,—in others by the superior social standing of the conquering race. Thus, *ox, sheep, calf, swine*, indicate the thing produced; *beef, mutton, veal, pork*, the thing consumed.* It is the same with the names of the various grains, and the product of the cheaper kinds when ground,—as *oat-meal, barley-meal*

* Scott, in *Ivanhoe*.

rye-meal; while the generic term for the crop becomes *grain*, and the meal of the variety used by the higher classes is turned into *flour*. To *bury* remains Saxon, because both high and low must be hidden under ground at last; but as only the rich and noble could afford any pomp in that sad office, we get the word *funeral* from the Norman. So also the serf went into a Saxon *grave*, the lord into a Norman *tomb*. All the parts of armor are naturally named from the French; the weapons of the people, as *sword*, *bow*, and the like, continued Saxon. So *feather* is Saxon; but as soon as it changes into a *plume* for the knight, it turns Norman,—and Latin when it is cut into a *pen* for the clerk. *Book* is Saxon; but a number of books collected together, as could be done only by the rich, makes a *library*. *Darling* would be murmured over many a *cradle* in Saxon *huts*; but *minion* came into the language down the back stairs of the Norman *palace*. In the same way, terms of law are Norman, and of the Church, Latin. These are familiar examples. But hasty generalizers are apt to overlook the fact, that the Saxon was never, to any great extent, a literary language. Accordingly, it held its own very well in the names of common things, but failed to answer the demands of complex ideas, derived from them. The author of "Piers Ploughman" wrote for the people,—Chaucer for the court. We open at random and count the Latin * words in ten verses of the "Vision" and ten of Chaucer's "Romaunt of the Rose," (a translation from the French,) and find the proportion to be seven in the former and five in the latter.

The organs of the Saxon have always been unwilling and stiff in learning languages. He acquired only about as many British words as we have Indian ones, and we believe that more French and Latin was introduced through the pen and the eye than through the tongue and the ear.

* We use the word *Latin* here to express words derived either mediately or immediately from that language.

For obvious reasons, the question is one that must be settled by reference to prose-writers, and not poets; and it is, we think, pretty well settled that more words of Latin original were brought into the language in the century between 1550 and 1650 than in the whole period before or since,—and for the simple reason, that they were absolutely needful to express new modes and combinations of thought.* The language has gained immensely by the infusion, in richness of synonyme and in the power of expressing nice shades of thought and feeling, but more than all in light-footed polysyllables that trip singing to the music of verse. There are certain cases, it is true, where the vulgar Saxon word is refined, and the refined Latin vulgar, in poetry,—as in *sweat* and *perspiration*; but there are vastly more in which the Latin bears the bell. Perhaps there might be a question between the old English *again-rising* and *resurrection*; but there can be no doubt that *conscience* is better than *inwit*, and *remorse* than *again-bite*. Should we translate the title of Wordsworth's famous ode, "Intimations of Immortality," into "Hints of Deathlessness," it would hiss like an angry gander. If, instead of Shakspeare's

"Age cannot wither her,
Nor custom stale her infinite variety,"

we should say, "her boundless manifoldness," the sentiment would suffer in exact proportion with the music. What home-bred English could ape the high Roman fashion of such togated words as

"The multitudinous sea incarnadine,"—

where the huddling epithet implies the tempest-tossed soul of the speaker, and at the same time pictures the wallowing

* The prose of Chaucer (1390) and of Sir Thomas Malory (translating from the French, 1470) is less Latinized than that of Bacon, Browne, Taylor, or Milton. * The glossary to Spenser's *Shepherd's Calendar* (1579) explains words of Teutonic and Romanic root in about equal proportions. The parallel but independent development of Scotch is not to be forgotten.

waste of ocean more vividly than the famous phrase of Æschylus does its rippling sunshine? Again, *sailor* is less poetical than *mariner*, as Campbell felt, when he wrote,

"Ye mariners of England,"

and Coleridge, when he preferred

"It was an ancient mariner"

"It was an elderly seaman";

for it is as much the charm of poetry that it suggest a certain remoteness and strangeness as familiarity; and it is essential not only that we feel at once the meaning of the words in themselves, but also their melodic meaning in relation to each other, and to the sympathetic variety of the verse. A word once vulgarized can never be rehabilitated. We might say now a *buxom* lass, or that a chambermaid was *buxom*, but we could not use the term, as Milton did, in its original sense of *boursome*,—that is, *lithe, gracefully bending*.*

* We believe that for the last two centuries the Latin radicals of English have been more familiar and homelike to those who use them than the Teutonic. Even so accomplished a person as Professor Craik, in his *English of Shakspeare*, derives *head*, through the German *haupt*, from the Latin *caput*! We trust that its genealogy is nobler, and that it is of kin with *cælum tuum*, rather than with the Greek *κεφαλή*, if Suidas be right in tracing the origin of that to a word meaning *vacuity*. Mr. Craik suggests, also, that *quick* and *wicked* may be etymologically identical, because he fancies a relationship between *busy* and the German *böse*, though *wicked* is evidently the participial form of A. S. *wacan*, (German *weichen*,) to bend, to yield, meaning *one who has given way to temptation*, while *quick* seems as clearly related to *wegan*, meaning to move, a different word, even if radically the same. In the *London Literary Gazette* for Nov. 13, 1858, we find an extract from Miss Millington's *Heraldry in History, Poetry, and Romance*, in which, speaking of the motto of the Prince of Wales,—*De par Houmout ich diene*,—she says, "The precise meaning of the former word [*Houmout*] has not, I think, been ascertained." The word is plainly the German *Hochmuth*, and the whole would read, *De par (Aus) Hochmuth ich diene*,—"Out of magnanimity I serve." So entirely lost is the Saxon

But the secret of force in writing lies not in the pedigree of nouns and adjectives and verbs, but in having something that you believe in to say, and making the parts of speech vividly conscious of it. It is when expression becomes an act of memory, instead of an unconscious necessity, that diction takes the place of warm and hearty speech. It is not safe to attribute special virtues (as Bosworth, for example, does to the Saxon) to words of whatever derivation, at least in poetry. Because Lear's "oak-cleaving thunderbolts," and "the all-dreaded thunder-stone" in "Cymbeline" are so fine, we would not give up Milton's Virgilian "fulminated over Greece," where the verb in English conveys at once the idea of flash and reverberation, but avoids that of riving and shattering. In the experiments made for casting the great bell for the Westminster Tower, it was found that the superstition which attributed the remarkable sweetness and purity of tone in certain old bells to the larger mixture of silver in their composition had no foundation in fact. It was the cunning proportion in which the ordinary metals were balanced against each other, the perfection of form, and the nice gradations of thickness, that wrought the miracle. And it is precisely so with the language of poetry. The genius of the poet will tell him what word to use (else what use in his being poet at all?); and even then, unless the proportion and form, whether of parts or whole, be all that Art requires and the most sensitive taste finds satisfaction in, he will have failed to make what shall vibrate through all its parts with a silvery unison,—in other words, a poem.

We think the component parts of Eng-

meaning of the word *knave*, (A. S. *cnawa*, German *knabe*,) that the name *navie*, assumed by railway-laborers, has been transmogrified into *navigator*. We believe that more people could tell why the month of July was so called than could explain the origin of the names for our days of the week, and that it is oftener the Saxon than the French words in Chaucer that puzzle the modern reader.

lish were in the latter years of Elizabeth thus exquisitely proportioned one to the other. Yet Bacon had no faith in his mother-tongue, translating the works on which his fame was to rest into what he called "the universal language," and affirming that "English would bankrupt all our books." He was deemed a master of it, nevertheless; and it is curious that Ben Jonson applies to him in prose the same commendation which he gave Shakspeare in verse, saying, that he "performed that in our tongue which may be compared or preferred either to *insolent Greece or haughty Rome*"; and he adds this pregnant sentence:—"In short, within his view and about his time were all the wits born that could honor a language or help study. Now things daily fall: wits grow downwards, eloquence grows backwards." Ben had good reason for what he said of the wits. Not to speak of science, of Galileo and Kepler, the sixteenth century was a spendthrift of literary genius. An attack of immortality in a family might have been looked for then as scarlet-fever would be now. Montaigne, Tasso, and Cervantes were born within the same fourteen years; and in England, while Spenser was still delving over the *propria quæ maribus*, and Raleigh launching paper navies, Shakspeare was stretching his baby hands for the moon, and the little Bacon, chewing on his coral, had discovered that impenetrability was one quality of matter. It almost takes one's breath away to think that "Hamlet" and the "Novum Organon" were at the risk of teething and measles at the same time. But Ben was right also in thinking that eloquence had grown backwards. He lived long enough to see the language of verse become in a measure traditional and conventional. It was becoming so, partly from the necessary order of events, partly because the most natural and intense expression of feeling had been in so many ways satisfied and exhausted,—but chiefly because there was no man left to whom, as to Shakspeare, perfect conception gave perfection of phrase. Dante, among mod-

ern poets, his only rival in condensed force, says, "*Optimis conceptionibus optima loquela conveniet; sed optimæ conceptiones non possunt esse nisi ubi scientia et ingenium est; et sic non omnibus versificantibus optima loquela convenit, cum plerique sine scientiâ et ingenio versificantur.*"*

Shakspeare must have been quite as well aware of the provincialism of English as Bacon was; but he knew that great poetry, being universal in its appeal to human nature, can make any language classic, and that the men whose appreciation is immortality will mine through any dialect to get at an original soul. He had as much confidence in his home-bred speech as Bacon had want of it, and exclaims,—

"Not marble nor the gilded monuments

Of princes shall outlive this powerful rhyme."

He must have been perfectly conscious of his genius, and of the great trust which he imposed upon his native tongue as embodier and perpetuator of it. As he has avoided obscurities in his sonnets, he would do so *a fortiori* in his plays, both for the purpose of immediate effect on the stage and of future appreciation. Clear thinking makes clear writing, and he who has shown himself so eminently capable of it in one case is not to be supposed to abdicate intentionally in others. The difficult passages in the plays, then, are to be regarded either as corruptions, or else as phenomena in the natural history of Imagination, whose study will enable us to arrive at a clearer theory and better understanding of it.

While we believe that our language had two periods of culmination in poetic beauty,—one of nature, simplicity, and

* *De Vulgari Eloquentia*, Lib. II. cap. i. *aa finem*. We quote this treatise as Dante's, because the thoughts seem manifestly his; though we believe that in its present form it is an abridgment by some transcriber, who sometimes copies textually, and sometimes substitutes his own language for that of the original.

truth, in the ballads, which deal only with narrative and feeling,—another of Art, (or Nature as it is ideally reproduced through the imagination,) of stately amplitude, of passionate intensity and elevation, in Spenser and the greater dramatists,—and that Shakspeare made use of the latter as he found it, we by no means intend to say that he did not enrich it, or that any inferior man could have dipped the same words out of the great poet's inkstand. But he enriched it only by the natural expansion and exhilaration of which it was conscious, in yielding to the mastery of a genius that could turn and wind it like a fiery Pegasus, making it feel its life in every limb. He enriched it through that exquisite sense of music, (never approached but by Marlowe,) to which it seemed to be eagerly obedient, as if every word said to him,

"*Bid me discourse, I will enchant thine ear,*"—

as if every latent harmony revealed itself to him as the gold to Brahma, when he walked over the earth where it was hidden, crying, "Here am I, Lord! do with me what thou wilt!" That he used language with that intimate possession of its meaning possible only to the most vivid thought is doubtless true; but that he wantonly strained it from its ordinary sense, that he found it too poor for his necessities, and accordingly coined new phrases, or that, from haste or carelessness, he violated any of its received proprieties, we do not believe. We have said that it was fortunate for him that he came upon an age when our language was at its best; but it was fortunate also for us, because our costliest poetic phrase is put beyond reach of decay in the gleaming precipitate in which it united itself with his thought.

We do not, therefore, agree with Mr. Matthew Arnold, that the extravagance of thought and diction which characterizes much of our modern poetry is traceable to the influence of Shakspeare. We see in it only the futile effort of misguided persons to torture out of language the secret of that inspiration which should

be in themselves. We do not find the extravagances in Shakspeare himself. We never saw a line in any modern poet that reminded us of him, and will venture to assert that it is only poets of the second class that find successful imitators. And the reason seems to us a very plain one. The genius of the great poet seeks repose in the expression of itself, and finds it at last in style, which is the establishment of a perfect mutual understanding between the worker and his material.* The secondary intellect, on the other hand, seeks for excitement in expression, and stimulates itself into mannerism, which is the wilful obtrusion of self, as style is its unconscious abnegation. No poet of the first class has ever left a school, because his imagination is incommunicable; while, just as surely as the thermometer tells of the neighborhood of an iceberg, you may detect the presence of a genius of the second class in any generation by the influence of his mannerism, for that, being an artificial thing, is capable of reproduction. Dante, Shakspeare, Goethe, left no heirs either to the form or mode of their expression; while Milton, Sterne, and Wordsworth left behind them whole regiments uniformed with all their external characteristics. We do not mean that great poetic geniuses may not have influenced thought, (though we think it would be difficult to show how Shakspeare had done so, directly and wilfully,) but that they have not infected contemporaries or followers with mannerism.

That the propositions we have endeavored to establish have a direct bearing in various ways upon the qualifications of whoever undertakes to edit the works of Shakspeare will, we think, be apparent to those who consider the matter. The hold which Shakspeare has acquired and maintained upon minds so many and so various, in so many vital respects utterly

* Pheidias said of one of his pupils that he had an inspired thumb, because the modelling-clay yielded to its careless sweep a grace of curve which it refused to the utmost pains of others.

unsympathetic and even incapable of sympathy with his own, is one of the most noteworthy phenomena in the history of literature. That he has had the most inadequate of editors, that, as his own Falstaff was the cause of the wit, so he has been the cause of the foolishness that was in other men, (as where Malone ventured to discourse upon his metres, and Dr. Johnson on his imagination,) must be apparent to every one,—and also that his genius and its manifestations are so various, that there is no commentator but has been able to illustrate him from his own peculiar point of view or from the results of his own favorite studies. But to show that he was a good common-lawyer, that he understood the theory of colors, that he was an accurate botanist, a master of the science of medicine, especially in its relation to mental disease, a profound metaphysician, and of great experience and insight in politics,—all these, while they may very well form the staple of separate treatises, and prove, that, whatever the extent of his learning, the range and accuracy of his knowledge were beyond precedent or later parallel, are really outside the province of an editor.

That Shakspeare did not edit his own works must be attributed, we suspect, to his premature death. That he should not have intended it is inconceivable. That the "*Tempest*" was his latest work we have no doubt; and perhaps it is not considering too nicely to conjecture a profound personal meaning in it. Is it over-fanciful to think that in the master Prospero we have the type of Imagination? in Ariel, of the wonder-working and winged Fantasy? in Caliban, of the half-animal but serviceable Understanding, tormented by Fancy and the unwilling slave of Imagination? and that there is something of self-consciousness in the breaking of Prospero's wand and burying his book,—a sort of sad prophecy, based on self-knowledge of the nature of that man who, after such thaumaturgy, could go down to Stratford and live there for years, only collecting his div-

idends from the Globe Theatre, lending money on mortgage, and leaning over his gate to chat and bandy quips with neighbors? His thought had entered into every phase of human life and thought, had embodied all of them in living creations;—had he found all empty, and come at last to the belief that genius and its works were as phantasmagoric as the rest, and that fame was as idle as the rumor of the pit? However this may be, his works have come down to us in a condition of manifest and admitted corruption in some portions, while in others there is an obscurity which may be attributed either to an idiosyncratic use of words and condensation of phrase, to a depth of intuition for a proper coalescence with which ordinary language is inadequate, to a concentration of passion in a focus that consumes the lighter links which bind together the clauses of a sentence or of a process of reasoning in common parlance, or to a sense of music which mingles music and meaning without essentially confounding them. We should demand for a perfect editor, then, first, a thorough glossological knowledge of the English contemporary with Shakspeare; second, enough logical acuteness of mind and metaphysical training to enable him to follow recondite processes of thought; third, such a conviction of the supremacy of his author as always to prefer his thought to any theory of his own; fourth, a feeling for music, and so much knowledge of the practice of other poets as to understand that Shakspeare's versification differs from theirs as often in kind as in degree; fifth, an acquaintance with the world as well as with books; and last, what is, perhaps, of more importance than all, so great a familiarity with the working of the imaginative faculty in general, and of its peculiar operation in the mind of Shakspeare, as will prevent his thinking a passage dark with excess of light, and enable him to understand fully that the Gothic Shakspeare often superimposed upon the slender column of a single word, that seems to twist under it,

but does not,—like the quaint shafts in cloisters, — a weight of meaning which the modern architects of sentences would consider wholly unjustifiable by correct principle.

It would be unreasonable to expect a union of all these qualifications in a single man, but we think that Mr. White combines them in larger proportion than any editor with whose labors we are acquainted. He has an acuteness in tracing the finer fibres of thought worthy of the keenest lawyer on the scent of a devious trail of circumstantial evidence; he has a sincere desire to illustrate his author rather than himself; he is a man of the world, as well as a scholar; he comprehends the mastery of imagination, and that it is the essential element as well of poetry as of profound thinking; a critic of music, he appreciates the importance of rhythm as the higher mystery of versification. The sum of his qualifications is large, and his work is honorable to American letters.

Though our own studies have led us to a somewhat intimate acquaintance with Elizabethan literature, it is with some diffidence that we bring the criticism of *dilettanti* to bear upon the labors of five years of serious investigation. We fortify ourselves, however, with Dr. Johnson's *dictum* on the subject of Criticism:—"Why, no, Sir; this is not just reasoning. You may abuse a tragedy, though you cannot make one. You may scold a carpenter who has made a bad table, though *you* cannot make a table; it is not your trade to make tables." Not that we intend to abuse Mr. White's edition of Shakspeare, but we shall speak of what seem to us its merits and defects with the frankness which alone justifies criticism.

We have spoken of Mr. White's remarkable qualifications. We shall now

state shortly what seem to us his faults. We think his very acumen sometimes misleads him into fancying a meaning where none exists, or at least none answerable to the clarity and precision of Shakspeare's intellect; that he is too hasty in his conclusions as to the pronunciation of words and the accuracy of rhymes in Shakspeare's day, and that he has been seduced into them by what we cannot help thinking a mistaken theory as to certain words, as *moth* and *nothing*, for example; that he shows, here and there, a glimpse of Americanism, especially misplaced in an edition of the poet whose works do more than anything else, perhaps, to maintain the sympathy of the English race; and that his prejudice against the famous corrected folio of 1632 leads him to speak slightly of Mr. Collier, to whom all lovers of our early literature are indebted, and who alone, in the controversy excited in England by the publication of his anonymous corrector's emendations, showed, under the most shameful provocation, the temper of a gentleman and the self-respect of a scholar. But after all these deductions, we remain of the opinion that Mr. White has given us the best edition hitherto published, and we do not like him the less for an occasional erotchet. For though Shakspeare himself seemed to think with regret that the dirge of the hobby-horse had been sung, yet, as we ourselves have given evidence, it is impossible for any one to write on this subject without taking an occasional airing on one or more of those imaginary steeds that stand at livery with no risk of eating off their own heads. We shall take up the subject again in our next number, and by extracts justify both our commendation and our criticisms of Mr. White.

REVIEWS AND LITERARY NOTICES.

A History of Philip the Second, King of Spain. By WILLIAM H. PRESCOTT. Vol. III. Boston: Phillips, Sampson, & Co. 1858.

A CORDIAL welcome from many quarters will greet this third instalment of a work which promises, when completed, to be the most valuable contribution to European history ever made by an American scholar. This will in part be owing to the importance of the subject, which, though professing to be the history of a single country and a single reign, is in fact the great program of the politics of Christendom, and of more than Christendom, during a period when the struggles of rival powers and of hostile principles and creeds kept the world in agitation and prolonged suspense,—when Romanism and Reform, the Crescent and the Cross, despotic power and constitutional freedom, were contending for mastery, and no government or nation could stand wholly aloof from a contest in which the fate, not of empires alone, but of civilization, was involved. Spain, during that period, was the bulwark of the Church against the attacks of the Reformers, and the bulwark of Christendom against the attacks of the Moslem. The power of Spain towered high above that of every other monarchy; and this power was wielded with absolute authority by the king. The Spanish nation was united and animated by an intense, unwavering devotion to the ancient faith, which was entwined with all the roots of the national life,—which was Spanish, in fact, far more than it was Italian; and of this spirit Philip the Second was the fitting representative, not merely from his position, but from his education, his intellect, and his character. Therefore it is that the historian of this single country and this single reign, standing upon a central eminence, must survey and depict the whole vast field of which we have spoken.

The materials for such a survey are abundant. But down to a very recent period, the most valuable and authentic portion of them—letters of the actors,

records, written not from hearsay, but from personal knowledge, documents of various kinds, private and official, that fill up the hiatuses, correct the conjectures, establish the credibility, and give a fresh meaning to the relations of the earlier writers—were neglected or concealed, inaccessible, unexplored, all but unknown. Now these hidden sources have been revealed. A flood of light streams back upon that bygone age, filling every obscure nook, making legible and plain what before could neither be read nor understood. Or rather, the effect is such as when distant objects, seen dimly and confusedly with the naked eye, are brought within the range of a powerful telescope, which dissolves the seeming masses, and enables us to scrutinize each separate form.

Glance for a moment through this instrument, so adjusted as to bear upon a figure not undeserving of a closer study. Night has fallen on the bleak and sombre scenery of the Sierra Guadarrama. The gray outlines of the Escorial are scarcely distinguishable from those of the dusky hills amid which it stands. No light is thrown forth from its eleven thousand windows, save in this retreating angle formed by the junction of the palace with the convent, or—to speak according to the architect's symbolical design—of the “handle” with the “gridiron.” The apartment from which this feeble ray emerges is of small size,—not more than sixteen feet square,—but having on two sides arched recesses that somewhat increase its capacity. One of these alcoves contains a bed, and a door opening into an adjoining oratory, which has immediate communication with the chancel of the great church, so that an occupant of the bed might, if supported in a sitting posture, have a view of the high altar and witness the elevation of the host. This alcove is decked with many little images of saints, which, with a few small pictures, of rare beauty,—the subjects all of a religious character,—and two cabinets of a curious, agate-colored marble, a product of the New World,—are the only or-

naments that relieve the extreme simplicity of the apartment, with its plain white walls and floor of brick. The other alcove is occupied by a writing-table, where sits, intent on the employment that consumes by far the greater portion of his time, the potent monarch of Spain, the "most pious and most prudent" Philip the Second. A drowsy secretary, who waits for the completion of the document which he is to copy, is his only attendant.

Does it not seem strange that ambassadors and nuncios should become confused and lose all recollection of the addresses they had committed to memory, in the presence of a prince whose exterior so ill accords with the grandeur of his titles and the vastness of his power? His form is below the middle height and very slender, the limbs having even an attenuated look. The whole appearance is that of a man of delicate and even feeble organization. The blonde complexion, the pale blue eyes, and the light sandy hue—save where they are prematurely touched with gray—of the hair, moustache, and short, pointed beard, all indicate the Flemish origin of one who would fain be regarded as "wholly a Spaniard." The protruding under-jaw is another proof of his descent from the Burgundian rulers of the Netherlands. The expression of the countenance, as we find on a closer inspection, is not so easy to define. There is no variable play of light and shade upon the features, no settled look of joy or sorrow, no trace of anger or of weariness. Is it because the subject with which his pen is busied is too unimportant to call forth any emotion in the writer? It may be a mere matter of routine, connected with the regular business of his household or the ordinary affairs of state. But if it be an answer to the dispatch from Flanders giving information of the outburst of iconoclasm and rebellion, or a subtly-conceived plan for the secret execution of Montigny or the assassination of Escovedo, or an order for the imprisonment—or the death—of the heir-apparent to the throne, you shall perceive nothing in that face, unruffled as a mask, by which to conjecture the sentiment or purpose of the mind. As little will he in the presence of others exhibit any signs of agitation on the reception of extraordinary

news or the occurrence of some great event. The fleet which he sent out under his brother, John of Austria, in conjunction with the Papal and Venetian armaments, to decide by a single blow the long struggle with the Infidel,—all Europe awaiting the issue with trembling anxiety and suspense,—has won a memorable and unexpected victory, and destroyed forever the *prestige* of the Moslem power. An official, bursting with the intelligence, carries it to the king, who is hearing a service in his private chapel. Without the slightest change of countenance, Philip desires the priest, whose ear the thrilling whisper has reached, and who stands open-mouthed, prepared to burst forth at once into the *Te Deum*, to proceed with the service; that ended, he orders appropriate thanks to be offered up.

As in triumph, so in disaster. The *armada*, which had been baptized "Invincible," is destroyed. The great navy collected from many states, equipped at the cost of an enormous treasure, manned with the choicest troops of Spain and her subject dominions, lies scattered and wrecked along the English shores, which it was sent forth to conquer. Again the sympathies of Europe are excited to the highest pitch. Protestantism triumphs; Catholicism despairs. He who had most at stake alone preserves his calmness, on hearing that all is lost. He neither frowns upon his unfortunate generals nor murmurs against Providence. Again he orders thanks to be offered up, for those who have been rescued from the general ruin,—for those, also, who in this holy enterprise have lost their lives and gained eternal glory.

Neither does any private grief—the death of children, of a parent, or of a wife—move him either to real or simulated agitation.* Nor will intense physical suffering overpower this habitual sticism.† He has seen unmoved the agony of many victims. He will himself endure the like without any outward manifestation of pain. In yonder bed he will one

* "Sempre apparisce d' un volto e d' una temperatura medesima; la qual cosa a chi, considerato gli accidenti che gli sono occorsi delle morti dei figliuoli e delle mogli, ha fatto credere che fusse crudele." *Relaz. Anon.* (1588.)

day suffer tortures surpassing those to which he has so often consigned the heretic and the apostate Morisco; there he will expire amid horrors that scarce ever before encompassed a death-bed;—but no groan will reveal the weakness of the flesh; the soul, triumphant over nature, will bear aloft her colors to the last, and plant them on the breach through which she passes into the unknown eternity.

But while we have been thus discoursing, the king has finished his long dispatch, and now hands it to the secretary. The latter, having vainly struggled with his sleepiness, has at length begun to nod. Hearing his name pronounced, he starts to his feet, takes the document, which is not yet dry, to sand it, and, desirous to show by his alertness that he has been all the time wide awake, empties over it—the contents of the inkstand! Awkward individual!—there he stands, dumfounded and aghast. His master quietly resumes his seat, procures fresh materials, and, though it is long past midnight, begins his task anew with that incomparable patience which is “his virtue.”

The perfect equanimity on all occasions, which was the trait in Philip's character that most impressed such of his contemporaries as were neither his adherents nor his enemies,—for example, the Venetian envoys at his court,—was not produced by a single stroke of Nature's pencil, but had a three-fold origin. In the education which, from his earliest years, had prepared him for the business of reigning, the *alpha* and the *omega* of every lesson had been the word “dissimulation.” *Qui nescit dissimulare, nescit regnare.* By this maxim it was not intended—at least, openly or cynically—to impress on youthful royalty the duty and propriety of lying. All it professed to inculcate was the necessity of wearing an habitual veil before the mind, through which no thought or feeling should ever be discernible. Every politician, in the sixteenth century, had learned that lesson. William of Orange, the best and purest statesman of the age, was the greatest of all masters in the art of dissimulation. In vain might Granvelle strive to pry into that bosom, to learn whether its designs were friendly or hostile to the plans of tyranny. Not till it was extorted by events could the secret be discovered.

In the second place, Philip, as a Spaniard, and one whose manners were to furnish a model for the Spanish court, had, of course, been trained to that demeanor which was regarded in Spain as the distinctive mark of high breeding. “All the nobles of this court,” writes an Italian contemporary, “though amazingly ignorant and unlettered, maintain a certain haughty tranquillity of manner which they term *sosiego*.” Foreigners found it difficult to define a quality which differed as much from the composure and self-possession everywhere characteristic of the gentleman as Spartan endurance or Stoical apathy from ordinary fortitude or self-control. It was a glacier-like repose, incrusting a mountain of pride. The beams, that gilded, might not thaw it; the storm did but harden and extend it. It yielded only to the inner fires of arrogance and passion, bursting through, at times, with irrepressible fury.

These occasional outbreaks were never witnessed in Philip.* He was exempted from them by the third element which we

* None of the anecdotes in which Philip is represented as giving way to violent bursts of anger will bear examination. Take, for example, the story of his pent-up wrath having exploded against the Prince of Orange, when he was quitting the Netherlands in 1559. The Prince, it is said, who had accompanied him to the ship, endeavored to convince him that the opposition to his measures, of which he complained, had sprung from the Estates; on which the king, seizing William's sleeve, and shaking it vehemently, exclaimed, “No, not the Estates, but you,—you,—you!”—*No los Estados, ma vos,—vos,—vos!*—using, say the original relator and the repeaters of the story, a form of address, the second person plural, which in the Spanish language is expressive of contempt. Now it is true that *vos*, applied to an equal, would have been a solecism; but it is also true that it was the *invariable* form employed by the sovereign, even when addressing a grandee or a prince of the Church. (See the *Papiers d'État de Granvelle, passim.*) Moreover, the correspondence of the time shows clearly that neither Philip nor Granvelle had as yet conceived any deep suspicion of the Prince of Orange, much less had any of the parties been so imprudent as to throw off the usual mask. The story is first told by Aubéri, a writer of the seventeenth century, who had it from his father, to whom it had been told by an anonymous eye-witness!

proposed to notice, and which, as nature takes precedence of habit, ought perhaps to have been the first. A Spaniard by birth and education, a Spaniard in his sympathies and in his tastes, he had inherited, nevertheless, some of the peculiarities, intellectual as well as moral, of the other race to which by his origin, and, as we have already said, by his physical characteristics, he belonged. He had none of the more pleasing qualities of the Netherlander; but he had the sluggish temper, the slow but laborious mind. "He is phlegmatic as well from natural disposition as from will," remarks an Italian contemporary. "This king," says another Venetian minister, "is absolutely free from every kind of passion." The word "passion" is here used in a strict, if not the most correct sense. Philip could, perhaps, love; that he could hate is what no one has ever ventured to dispute; but never did either feeling, strong, persistent, indestructible, though it might be, rise in turbulent waves around his soul. In religion he was a bigot,—not a fanatic. "The tranquillity of my dominions and the security of my crown," he said, "rest on an unqualified submission in all essential points to the authority of the Holy See." In the same deliberate and impressive style, not in that of a wild and reckless frenzy, is his famous saying, "Better not to reign at all than to reign over heretics." His course in all matters of government was in conformity with the only chart by which he had been taught to steer. He boasted that he was no innovator,—that he did but tread in the footsteps of his father. Nor, though he ever kept his object steadily in view, did he press towards it with undue haste. He was content that time should smooth away the difficulties in his path. "Time and myself against any other two" was not the maxim of a man who looked to effect great changes or who felt himself in danger of being driven from his course by the gusts of passion.

To a person of this character it mattered little, as far as the essentials of existence were concerned, whether his life were passed upon a throne or at an attorney's desk. In the latter situation, his fondness for using the pen would well have qualified him for the drudgery, his admirable patience would have been sufficiently ex-

ercised, and the mischief he was able to do would have been on a more contracted scale. On the throne, his labors, as his admirers tell us, were those of "a poor clerk earning his bread," while his recreations were those of a Jeronymite monk. His intercourse with mankind was limited to the narrowest range of which his position would allow. Even with his ministers he preferred to communicate in writing. When he went abroad, it was in a carriage so constructed as to screen him entirely from view, and to shut out the world from his observation. He always entered Madrid after nightfall, and reached his palace by streets that were the least frequented. He had an equally strong aversion to bodily exercise. Such was his love of quiet and seclusion, that it was commonly believed he waited only for a favorable opportunity to follow the example of his father, resign his power and withdraw to a convent.*

In the volume before us are two chapters devoted to the character and personal habits of Philip, a picture of his court, his method of transacting business, his chief advisers, the machinery of his government, and his relations with his subjects. As usually happens, it is in details of a personal and biographical kind that the author's investigations have been the most productive of new discoveries. It is a question with some minds, whether such details are properly admitted into history. The new luminary of moral and political science, the Verulam of the nineteenth century, Mr. Henry Buckle, tells us that biography forms no part of history, that individual character has little or no effect in determining the course of the world's affairs, and that the historian's proper business is to exhibit those general laws, discoverable by a strictly scientific process of investigation, which act with controlling power upon human conduct and govern the destinies of our race. We readily admit that the discovery of such laws would exceed in importance every other having relation to man's present sphere of existence; and we heartily wish that Mr. Buckle had made as near an approach to the discovery as he confidently believes himself to have done. But even had he, instead of crude theories, unwar-

ranted assumptions, and a most lively but fallacious train of reasoning, presented us with a grand and solid philosophical work, a true *Novum Organon*, he would still have left the department of literature which he has so violently assailed in full possession of its present field. Our curiosity in regard to the character and habits of the men who have played conspicuous parts on the stage of history would have been not a whit diminished. The interest which men feel in the study of human character is, perhaps, the most common feeling that induces them to read at all. It is to gratify that feeling that the great majority of books are written. The mutual influences of mind upon mind—not the influences of climate, food, the “aspects of Nature,” thunder-storms, earthquakes, and statistics—form, and will ever form, the great staple of literature. Mr. Buckle’s own book would not have been half so entertaining as it is, if he had not, with the most natural inconsistency, plentifully besprinkled his pages with biographical details, some of which are not incorrect. Lord Macaulay, whom Mr. Buckle is unable to eulogize with sufficient vehemence without a ludicrous as well as irreverent application of Scriptural language, is of all writers the most profuse in the description of individual peculiarities, neatly doing up each separate man in a separate parcel with an appropriate label, and dismissing half his personages, like “ticket-of-leave men,” with a “character,” and nothing more.

In truth, while the office of the speculative philosopher is to explore the principles that have the widest operation in the revolutions of society, the office of the historian is to represent society as it actually exists at any given period in all its various phenomena. The *science* of history has been first invented—at least, he tells us so—by Mr. Buckle. The *art* of history is older than Herodotus, older than Moses, older than printed language. It is based, like every other art, on certain truths, general and special, principles and facts; its process, like that of every other art, is the Imagination, the creative principle of genius, using these truths as its rules and its materials, working by them and upon them, applying and idealizing them. That there is such a thing as historical art has also, we know, been disputed. It is one of the exceedingly strong convictions—

he will not allow us to call them opinions—entertained by the distinguished author of “Modern Painters,” and expressed by him in a lecture delivered at Edinburgh, that past ages are to be studied only in the records which they have themselves left,—letters, contemporary memoirs, and the like sources. Works built upon these he calls “restorations,” weak and servile copies, from which the spirit of the original has fled. He accordingly advises every one who would make himself really acquainted with the manners and events of a former period to go at once to the fountain-head and learn what that period said for itself in its own dialect and style. It might be sufficient mildly to warn any person who thinks of adopting this advice, that, unless the field of his intended researches be very limited, or the amount of time which he proposes to devote to the study very great, the result can scarcely be of a satisfactory nature. But there is another answer to Mr. Ruskin, which has more force when addressed to one so renowned as a critic and exponent of Art. The eye of Genius seizes what escapes ordinary observation. The province of Art is to *reveal* Nature, to elucidate her obscurities, to present her, not otherwise than as she *is*, but more truthfully and more completely than she *appears* to the common eye. Of what use were landscape-painting, if it did not teach us how to look for beauty in the real landscape? Who has not seen in a good portrait an expression which he then for the first time recognized as that which best represented the character of the original? When we applaud the personations of a great actor, we exclaim, as the highest praise, “How true to Nature!” We must, therefore, have seen before the look and gesture, and heard the tone, which we thus acknowledge as appropriate to the passion and the scene. And yet they had never stamped themselves upon our minds, when witnessed in actual life, from which the actor himself had copied them, with half that force and vividness which they receive from his delineation. In like manner, the historian—one to whom history is a genuine vocation—applies to the facts with which he has to deal, to the evidence which he has to sift, to the relations which he has to peruse, a faculty which shall detect a meaning where the common reader

would find none,—which shall conceive a whole picture, a complete view, where another would see but fragments,—which shall combine and reproduce in one distinct and living image the relics of a past age, which lie broken, scattered, and buried beneath the mounds of time. Such a work has Niebuhr performed for early Roman history, and Michelet for the confused epochs of mediæval France. The spirit, instead of escaping in the process, was for the first time made visible. The historian did not merely anatomize the body of the Past, but with magic power summoned up its ghost.

It cannot be said that the claims of history have ever been disallowed by the reading public. There is, indeed, no class of literature so secure of receiving the attention which it demands. While the novelist modestly confines himself to a brace of spare duodecimos, and, if his story be somewhat extended, endeavors to conceal its length in the smallness of the print, the historian unblushingly presents himself with three, six, a dozen, nay, if he be a Frenchman or a German, with forty huge tomes, and is more often taken to task for his omissions than censured for the fulness of his narrative. It is respectable to buy his volumes, and respectable to read them. We don't put them away in corners, but give them the most conspicuous places on our shelves. Strange to say, that kind of reading to which we were once driven as to a task, which our fathers thought must be useful because it was so dull, has of late outstripped every other branch in its attractiveness to the mass. Nobody yawns over Carlyle; people set upon Macaulay as if quite unconscious that they were about to be led into the labyrinths of Whig and Tory politics; and gentlemen whirled along in railway-cars bend over the pages of Prescott, and pronounce them as fascinating as any romance.

Stranger still, these modern historians excel their predecessors as much in learning and depth of research as in dramatic power, artistic arrangement and construction, and beauty and picturesqueness of style. Compare the meagre array of references in the foot-notes of Watson's "History of Philip the Second" with the multitude of authorities cited by Mr. Prescott. It may be doubted, whether any printed book,

however rare or little known, which could throw the least glimmer of light upon his subject, has been overlooked or neglected by the last-mentioned author; while thousands of manuscript pages, gathered from libraries and collections in almost every part of Europe, have furnished him with some of his most curious particulars and enabled him to clear up the mystery that shrouded many portions of the subject.

We shall not attempt to determine the exact place that ought to be assigned in an illustrious brotherhood to our American historian. The country is justly proud of him, as one whose name is a household word in many lands,—who has done more, perhaps, than any other of her living writers, with the exception of Washington Irving, to obtain for a still youthful literature the regard and attention of the world,—who has helped to accomplish the prediction of Horace Walpole, that there would one day be "a Thucydides at Boston and a Xenophon at New York"; a prediction which seemed so fanciful, at the time it was made, (less than two years before the declaration of Independence,) that the prophet was fain to link its fulfilment with the contemporaneous visit of a South American traveller to the deserted ruins of London.* His writings have won favor with hosts of readers, and they have received the homage of learned and profound inquirers, like Humboldt and Guizot. They have merits that are recognizable at a glance, and they have also merits that will bear the closest examination. They occupy a field in which they have no compeers. They are the products of a fertile soil and of laborious cultivation. The mere literary critic, accustomed to dwell with even more attention on the form than on the substance of a work, commends above all the admirable skill shown in the selection and grouping of the incidents, the facile hand with which an obscure and entangled theme is divested of its embarrassments, the frequent brilliancy and picturesqueness of the narrative, the judicious mixture of anecdote and reflection, and the harmony and clearness of the style. These are the qualities which make Mr. Prescott's histories, with all their solid learning and minute research, as pleasant reading as the airiest

* Walpole to Mason, Nov. 24, 1774.

of novels. And yet not these alone. A charm is felt in many a sentence that has a deeper origin than in the intellect. No egotism obtrudes itself upon our notice; but the subtle outflow of a generous and candid spirit, of a genial and singularly healthy nature, wins for the author a secure place in the affections of his readers.

The third volume of the "History of Philip the Second" is, we think, superior to its predecessors. It contains, perhaps, no single scene equal in elaborate and careful painting to the death of Count Egmont. It has no chapter devoted to the elucidation of the darker passages in Philip's personal history, like that which in a former volume traced to a still doubtful end the unhappy career of Don Carlos, or such as will doubtless, in a future volume, shed new light on that of Antonio Perez. But there is a more continuous interest, arising from a greater unity of subject. With the exception of the two chapters already referred to, the narrative is taken up with the contest waged by the Spaniards against those Moslem foes whom they hated with the hereditary hate of centuries, the mingled hate that had grown out of diversity of religion, an alien blood, and long arrears of vengeance. When that contest was waged upon the sea or on a foreign soil, it was at least mitigated by the ordinary rules of warfare. But on Spanish soil it knew no restraint, no limitation but the complete effacement of the Moorish population. The story of the Morisco Rebellion, which we remember to have first read with absorbed attention in Dunham's meagre sketch, is here related with a fulness of detail that exhausts the subject, and leaves the mind informed both of causes and results. Yet the march of the narrative is rapid and unchecked, from the first outbreak of the revolt, when Aben-Farax, with a handful of followers, facing the darkness of night and the blinding snow, penetrated into the streets of Granada, shouting the cry so long unheard in air that had once been so familiar with its sound, "There is no God but Allah, and Mahomet is the prophet of God!"—through all the strange and terrible vicissitudes of the deadly struggle that ensued, the frightful massacres, the wild *guerrilla* battles, the fiery onslaughts of the Spanish chivalry, the stealthy surprises of the Moorish mountaineers,—down to the com-

plete suppression of the insurrection, the removal of the defeated race, the overthrow and death of Aben-Aboo, "the little king of the Alpujarras," and the ghastly triumph in which his dead body, clothed in the robes of royalty and supported upright on a horse, was led into the capital where his ancestors had once reigned in peaceful splendor, after which the head was cut off and set up in a cage above the wall, "the face turned towards his native hills, which he had loved so well."

On such a theme, and in such localities, Mr. Prescott is more at home than any other writer, American or European. His imagination, kindled by long familiar associations, burns with a steady flame. The characters are portrayed with a free and vigorous pencil, the contrast between the Orientalism of the Spanish Arab and the sterner features of the Spanish Goth being always strongly marked. The scenery, painted with as much fidelity as truth, is sometimes brought before the eye by minute description, and sometimes, with still happier effect, by incidental touches,—an epithet or a simile, as appropriate as it is suggestive. As we follow the route of Mondejar's army, the "frosty peaks" of the Sierra Nevada are seen "glistening in the sun like palisades of silver"; while terraces, scooped out along the rocky mountain-side, are covered with "bright patches of variegated culture, that hang like a garland round the gaunt Sierra." At their removal from Granada, the remnant of what had once been a race of conquerors bid a last farewell to their ancient homes just as "the morning light has broken on the red towers of the Alhambra"; and scattered over the country in small and isolated masses, the presence of the exiles is "sure to be revealed by the minute and elaborate culture of the soil,—as the secret course of the mountain-stream is betrayed by the brighter green of the meadow."

We had marked for quotation an admirable passage, in which our author passes judgment on the policy of the Spanish government, its cruelty and its mistakes. But want of space compels us here to take leave of a book which we have not pretended to analyze, but to which we have rendered sincere, though inadequate, praise.

The Courtship of Miles Standish. By HENRY WADSWORTH LONGFELLOW. Boston: Ticknor & Fields. 1858.

THE introduction and acclimatization of the *hexameter* upon English soil has been an affair of more than two centuries. The attempt was first systematically made during the reign of Elizabeth, but the metre remained a feeble exotic that scarcely burgeoned under glass. Gabriel Harvey,—a kind of Don Adriano de Armado,—whose chief claim to remembrance is, that he was the friend of Spenser, boasts that he was the first to whom the notion of transplantation occurred. In his "Foure Letters," (1592,) he says, "If I never deserve anye better remembrance, let mee rather be Epitaphed, the Inventour of the English Hexameter, whome learned M. Stanilhurst initated in his Virgill, and excellent Sir Phillip Sidney disdained not to follow in his Arcadia and elsewhere." This claim of invention, however, seems to have been an afterthought with Harvey, for, in the letters which passed between him and Spenser in 1579, he speaks of himself more modestly as only a collaborator with Sidney and others in the good work. The Earl of Surrey is said to have been the first who wrote thus in English. The most successful person, however, was William Webb, who translated two of Virgil's Eclogues with a good deal of spirit and harmony. Ascham, in his "Schoolmaster," (1570,) had already suggested the adoption of the ancient hexameter by English poets; but Ascham (as afterwards Puttenham in his "Art of Poesie") thought the number of monosyllabic words in English an insuperable objection to verses in which there was a large proportion of dactyles, and recommended, therefore, that a trial should be made with iambics. Spenser, at Harvey's instance, seems to have tried his hand at the new kind of verse. He says,—"I like your late Englishe Hexameters so exceedingly well, that I also enure my penne sometimes in that kinde. . . . For the onely or chiefest hardnesse, which seemeth, is in the Accente, which sometime gapeth, and, as it were, yawneeth ilfavouredly, coming shorte of that it should, and sometime exceeding the measure of the Number, as in *Carpenter*; the middle sillable being vsed shorte in Speache, when it shall be read long in

Verse, seemeth like a lame Gosling that draweth one legge after hir: and *Heaven*, being used shorte as one sillable, when it is in Verse stretched out with a *Diastole*, is like a lame dogge that holdes up one legge. But it is to be wonne with Custome, and rough words must be subdued with Vse. For why a God's name may not we, as else the Greekes, have the kingdome of our owne Language, and measure our Accentes by the Sounde, reserving the Quantitie to the Verse?" The amiable Edmonde seems to be smiling in his sleeve as he writes this sentence. He instinctively saw the absurdity of attempting to subdue English to misunderstood laws of Latin quantities, which would, for example, make the vowel in *debt* long, in the teeth of use and wont.

We give a specimen of the hexameters which satisfied so entirely the ear of Master Gabriel Harvey,—an ear that must have been long by position, in virtue of its place on his head.

"Not the like *Discourser*, for Tongue and head:
to be found out;
Not the like *resolute Man*, for great and serious
affaires;
Not the like *Lynx*, to spie out secretes and
privities of States;
Eyed like to *Argus*, *Earde* like to *Midas*,
Nosd like to *Naso*,
Wingd like to *Mercury*, fittst of a Thousand
for to be employed."

And here are a few from "worthly M. Stanyhurst's" translation of the "*Æneid*."

"Laocoon storming from Princelie Castel is
hastning,
And a far of beloning: What fond phantas-
tical harebraine
Madnesse hath enchanted your wits, you
townsmen unhappie?
Weene you (blind hodiepecks) the Greekish
naue returned,
Or that their presents want craft? is subtil
Vlisses
So soone forgotten? My life for an haulf-
pennie (Trojans)," etc.

Mr. Abraham Fraunce translates two verses of Heliodorus thus:—

"Now had fyery Phlegon his dayes reuol-
ution ended,
And his snoring snowt with salt waues all
to bee washed."

Witty Tom Nash was right enough when he called this kind of stuff, "that drunken,

staggering kinde of verse which is all vp hill and downe hill, like the waye betwixt Stamford and Beechfeeld, and goes like a horse plunging through the myre in the deep of winter, now sount up to the saddle, and straight aloft on his tiptoes." It will be noticed that his prose falls into a kind of tipsy hexameter. The attempt in England at that time failed, but the controversy to which it gave rise was so far useful that it called forth Samuel Daniel's "Defence of Ryme," (1603,) one of the noblest pieces of prose in the language. Hall also, in his "Satires," condemned the heresy in some verses remarkable for their grave beauty and strength.

The revival of the hexameter in modern poetry is due to Johann Heinrich Voss, a man of genius, an admirable metrist, and, Schlegel's sneer to the contrary notwithstanding, hitherto the best translator of Homer. His "Odyssey," (1788,) his "Iliad," (1791,) and his "Luise," (1795,) were confessedly Goethe's teachers in this kind of verse. The "Hermann and Dorothea" of the latter (1798) was the first true poem written in modern hexameters. From Germany, Southey imported that and other classic metres into England, and we should be grateful to him, at least, for having given the model for Canning's "Knifegrinder." The exotic, however, again refused to take root, and for many years after we have no example of English hexameters. It was universally conceded that the temper of our language was unfriendly to them.

It remained for a man of true poetic genius to make them not only tolerated, but popular. Longfellow's translation of "The Children of the Lord's Supper" may have softened prejudice somewhat, but "Evangeline," (1847,) though incumbered with too many descriptive irrelevancies, was so full of beauty, pathos, and melody, that it made converts by thousands to the hitherto ridiculed measure. More than this, it made Longfellow at once the most popular of contemporary English poets. Clough's "Bothie"—a poem whose singular merit has hitherto failed of the wide appreciation it deserves—followed not long after; and Kingsley's "Andromeda" is yet damp from the press.

While we acknowledge that the victory thus won by "Evangeline" is a striking proof of the genius of the author, we con-

fess that we have never been able to overcome the feeling that the new metre is a dangerous and deceitful one. It is too easy to write, and too uniform for true pleasure in reading. Its ease sometimes leads Mr. Longfellow into prose,—as in the verse

"Combed and wattled gules and all the rest
of the blazon,"—

and into a prosaic phraseology which has now and then infected his style in other metres, as where he says

"Spectral gleam their snow-white dresses,"—

using a word as essentially unpoetic as *surtout* or *pea-jacket*. We think one great danger of the hexameter is, that it gradually accustoms the poet to be content with a certain regular recurrence of accented sounds, to the neglect of the poetic value of language and intensity of phrase.

But while we frankly avow our infidelity as regards the metre, we as frankly confess our admiration of the high qualities of "Miles Standish." In construction we think it superior to "Evangeline"; the narrative is more straightforward, and the characters are defined with a firmer touch. It is a poem of wonderful picturesqueness, tenderness, and simplicity, and the situations are all conceived with the truest artistic feeling. Nothing can be better, to our thinking, than the picture of Standish and Alden in the opening scene, tinged as it is with a delicate humor, which the contrast between the thoughts and characters of the two heightens almost to pathos. The pictures of Priscilla spinning, and the bridal procession, are also masterly. We feel charmed to see such exquisite imaginations conjured out of the little old familiar anecdote of John Alden's vicarious wooing. We are astonished, like the fisherman in the Arabian tale, that so much genius could be contained in so small and leaden a casket. Those who cannot associate sentiment with the fair Priscilla's maiden name of Mullins may be consoled by hearing that it is only a corruption of the Huguenot Desmoulins,—as Barnum is of the Norman Vernon.

Indifferent poets comfort themselves with the notion that contemporary popularity is no test of merit, and that true poetry must always wait for a new generation to do it justice. The theory is not

true in any general sense. With hardly an exception, the poetry that was ever to receive a wide appreciation has received it at once. Popularity in itself is no test of permanent literary fame, but the kind of it is and always has been a very decided one. Mr. Longfellow has been greatly popular because he so greatly deserved it. He has the secret of all the great poets,—the power of expressing universal sentiments simply and naturally. A false standard of criticism has obtained of late, which brings a brick as a sample of the house, a line or two of condensed expression as a gauge of the poem. But it is only the whole poem that is a proof of the poem, and there are twenty fragmentary poets, for one who is capable of simple and sustained beauty. Of this quality Mr. Longfellow has given repeated and striking examples, and those critics are strangely mistaken who think that what he does is easy to be done, because he has the power to make it seem so. We think his chief fault is a too great tendency to moralize, or rather, a distrust of his readers, which leads him to point out the moral which he wishes to be drawn from any special poem. We wish, for example, that the last two stanzas could be cut off from "The Two Angels," a poem which, without them, is as perfect as anything in the language.

Many of the pieces in this volume having already shone as captain jewels in Maga's carcanet, need no comment from us; and we should, perhaps, have avoided the delicate responsibility of criticizing one of our most precious contributors, had it not been that we have seen some very unfair attempts to depreciate Mr. Longfellow, and that, as it seemed to us, for qualities which stamp him as a true and original poet. The writer who appeals to more peculiar moods of mind, to more complex or more esoteric motives of emotion, may be a greater favorite with the few; but he whose verse is in sympathy with moods that are human and not personal, with emotions that do not belong to periods in the development of individual minds, but to all men in all years, wins the gratitude and love of whoever can read the language which he makes musical with solace and aspiration. The present volume, while it will confirm Mr. Longfellow's claim to the high rank he has won among lyric

poets, deserves attention also as proving him to possess that faculty of epic narration which is rarer than all others in the nineteenth century. In our love of stimulants, and our numbness of taste, which craves the red pepper of a biting vocabulary, we of the present generation are apt to overlook this almost obsolete and unobtrusive quality; but we doubt if, since Chaucer, we have had an example of more purely objective narrative than in "The Courtship of Miles Standish." Apart from its intrinsic beauty, this gives the poem a claim to higher and more thoughtful consideration; and we feel sure that posterity will confirm the verdict of the present in regard to a poet whose reputation is due to no fleeting fancy, but to an instinctive recognition by the public of that which charms now and charms always,—true power and originality, without grimace and distortion; for Apollo, and not Milo, is the artistic type of strength.

Thoughts on the Life and Character of Jesus of Nazareth. By W. H. FURNESS, Minister of the First Congregational Unitarian Church in Philadelphia. Boston: Phillips, Sampson, & Co. 1859.

HERE is a book, written, not for "orthodox believers," but for those whom the orthodox creeds have wholly repelled from its subject. It is quite distinct from three other books on the same general theme, by the same author. It has, indeed, some objects in view, at which neither of those books directly aimed.

It will overwhelm with horror such readers as may stumble upon it, who do not know, till they meet it, that there is any view of Jesus Christ but that which is presented in the widely circulated issues of the Tract Society and similar institutions. Our attention has already been called to one very absurd and unjust attack upon it, in a Philadelphia paper, intended to catch the prejudices of such persons. But the views by which we found this attack accompanied, in the same journal, led us to suspect that some political prejudice against the author's anti-slavery had more to do with the onslaught than any deeply seated love of Orthodox Christianity. To another class of readers, who have been wholly repelled from

any interest in Jesus Christ, by whatever misfortune of temperament or training, the careful study of these "Thoughts" would be of incalculable value. We suppose this class of readers, through the whole extent of our country, to be quite as large as the first class we have named. To a third class, which is probably as large as both the others put together, who are neither repelled nor attracted by the received ecclesiastical statements regarding the Saviour, but are willing to pass, without any real inquiry or any firm opinion, his presence in the world, and his influence at this moment on every event in modern life, the book might also have an immense value,—if it could be conceived that any thunder-clap could wake them from that selfish and comfortable indifference as to the central point of all the history, philosophy, life, and religion, in which they live.

We have no intention of entering into a discussion of the remarkable and very clear views presented in this volume. We have only to say that the author does not do himself justice when he asserts that there is no system in its arrangement. It is a systematic work, leading carefully along from point to point in the demonstration attempted. One may read it through in an afternoon, and he will then have a very clear idea of what the author thinks, which does not always happen when one has read a book through. If he be one of the class of readers for whom it was written, he will have, at the very least, a deeper interest in the study of the life of Jesus of Nazareth than he had when he began. He will have read a reply to Dr. Strauss, Mr. Parker, Dr. Feuerbach, and Mr. Hittel, which, he will confess, is written in an appreciative and candid spirit, quite different from that of some of the *ex-cathedra* works of controversy, which have failed to annihilate these writers, although they have taken so arrogant a tone. As we have said, we do not attempt to analyze the argument or the statement of which we thus speak. We have only to say that it is positive, and not negative,—constructive, and not destructive,—reverent, and not flippant,—courteous to opponents, and never denunciatory. These are characteristics of a work of theology of which those can judge who do not af-

fect to be technical theologians. Had we to give our own views of the matters presented in so interesting a form, we should not, of course, attempt to condense our assent or our dissent with the author into these columns; but where we differed or where we agreed, we should gladly recognize his eagerness to be understood, his earnest hope to find the truth, and his sympathy with all persons seeking it,—qualities which we have not always found in our study of theologians by profession.

In making the suggestion, however, that these "Thoughts" would be of special value to those who have fallen into the habit of disbelieving the Gospels, they hardly know why, we know that there is no more probability that they will read a book with this title than there is that young men should read "Letters to Young Men," or young women should read "Letters to Young Women." We suppose that the unconverted seldom read "Hints to the Unconverted," and that undecided fools never read "Foster on Decision of Character." Recurring, then, to Mr. Everett's story of the Guava jelly, which was recommended to invalids, but would "not materially injure those who are well," we may add to what we have said, that all readers of this volume will find valuable suggestions in it for the enlightenment of the gospel narratives. Theologians who differed fundamentally from Dr. Furness have been eager to express their sense of the value of his "Jesus and his Biographers," as affording some of the most vivid and scenic representations in all literature of that life which he has devoted all his studies to illustrating. It does not fall in the way of this book to attempt many such illustrations; but it is full of hints which all readers will value as lightening up and making fresh their notion of Scripture.

Critically speaking, the most prominent fault in the book is the occasional interpolation of matter not connected directly with its argument. That argument is simply laid out. In the first part is the direct plea of the author for the gospel narrative as a whole, earnestly and effectively sustained. The second part examines Mr. Theodore Parker's arguments against the truth of parts of it. The third book discusses other objections. So far as this is done from the author's leading point

of view, the book is coherent and effective. But occasionally there comes in a little piece of fanciful criticism on the text, or a comment on some side-view or transaction, or the suggestion of a probability or a possibility, which remind one of the thin puerilities of the commentators whom Dr. Furness despises more than of the general drift of his own discussion.

Vernon Grove; or Hearts as they are. A Novel. New York: Rudd & Carleton.

THIS volume makes a pleasant addition to the light reading of the day. It is the more welcome as coming from a new field; for we believe that the veil of secrecy with regard to its authorship has been so far blown aside, that we shall be permitted to say, that, although it is written by a lady of New England birth, it may be most properly claimed as a part of the literature of South Carolina. It is a regular novel, although a short one. It is an interesting story, of marked, but not improbable incidents, involving a very few well-distinguished characters, who fall into situations to display which requires nice analysis of the mind and heart,—developed in graceful and flowing narrative, enlivened by natural and spirited conversations. The atmosphere of the book is one of refined taste and high culture. The people in it, with scarce an exception, are people who mean to be good, and who are handsome, polite, accomplished, and rich, or at least surrounded by the conveniences and even luxuries of life. It is a story, too, for the most part, of cultivated enjoyment. There are sufferings and sorrows depicted in it, it is true; without them, it would be no representation of real life, which it does not fail to be. Some tears will undoubtedly be shed over it, but the sufferings and sorrows are such that we feel they are, after all, leading to happiness; and we are not made to dwell upon pictures of unnecessary misery or unavailing misfortune. Let it not be supposed, however, that we are speaking of a namby-pamby tale of the luxuries and successes of what is called “high life,” for this book has nothing of that character. We mean only to point out, as far as we may, without entering upon the story itself, that it tells of pleasant people, in pleasant circumstances,

among whom it is a pleasure to the reader for a time to be. Many a novel “ends well” that keeps us in a shudder or a “worry” from the beginning to the end. Here we see the enjoyment as we go along. Indeed, a leading characteristic of “Vernon Grove” is the extremely good taste with which it is conceived and written; and so we no more meet with offensive descriptions of vulgar show and luxury than we do with those of squalor or moral turpitude. It is a book marked by a high tone of moral and religious as well as artistic and æsthetic culture. Without being made the vehicle of any set theories in philosophy or Art, without (so far as we know) “inculcating” any special moral axiom, it embodies much good teaching and suggestion with regard to music and painting, and many worthy lessons for the mind and heart. This is done, as it should be, by the apparently natural development of the story itself. For, as we have said, the book is really a novel, and will be read as a novel should be, for the story,—and not, in the first instance and with deliberation, with the critical desire to find out what lessons it teaches or what sentiments it inspires.

The narrative covers a space of several years, but is so told that we are furnished with details rather than generalities; and particular scenes, events, and conversations are set forth vividly and minutely. The descriptions of natural scenery, and of works of Art, many of which come naturally into the story, show a cultivated and observant eye and a command of judicious language. The characters are well developed, and, with an unimportant exception, there is nothing introduced into the book that is not necessary to the completion of the story. “Vernon Grove” will commend itself to all readers who like works of fiction that are lively and healthy too; and will give its author a high rank among the lady-novelists of our day and country.

Arabian Days' Entertainments. Translated from the German, by HERBERT PELHAM CURTIS. Boston: Phillips, Sampson, & Co. 1858.

IN this famous nineteenth century of ours, which prides itself on being practical,

and feeds voraciously on facts, and considers itself almost above being amused, we for our part rejoice to greet such a book as this. Our great-great-grandfathers, when they were boys, were happy in having wise and good grandfathers who told them pleasant stories of what never happened,—and who loved well to tell them, because they were truly wise men, and knew what the child's mind relished and fattened upon,—nay, and because, like all truly good men, they themselves indulged a fond, secret, half-belief that these child's stories of theirs were, if the truth could be got at, more than half true. We should be sorry to believe that this good old life of story-telling and story-hearing had utterly gone out. It belonged to an age that only very foolish men and very vulgar men laugh at without blushing.

"We of the nineteenth century" have a certain way of our own, however, of enjoying that most rarely fascinating class of literary productions known as *stories*,—a critical, perhaps over-intellectual, way,—but still sufficing, it is comfortable to know, to keep the story at very near its ancient dignity in the realm of letters. Perhaps it is a true sign of the perfect story, that it ministers at once to these two unsympathizing mental appetites, and pleases completely, not only the man, but his—by this side—ever-so-great-grandfather, the child.

Everybody thinks first of the "Arabian Nights' Entertainments," when we fall into such remarks as these,—that marvelous treasure, from which the dreams of little boys have been furnished forth, and the pages of great scholars gemmed with elegant illustration, ever since it was first opened to Western eyes. With this book the title which Mr. Curtis has so happily selected for his translation invites us to compare it; and it is not too much praise to say that it can well stand the comparison,—we mean as a selection of stories fascinating to old and young. As to the matter of translation itself, the versions we have of the "Arabian Nights" are notoriously bad. These stories, which Mr. Curtis has laid all good children and all right-minded grown people under perpetual obligation by thus collecting and presenting to them, are the productions of a single German writer, and, with the exception of three or four separately published in magazines, have, we believe, never be-

fore been translated into English. They present some very interesting points of contrast with the ever-famous book of Eastern stories,—such as open some very tempting cross-views of the German and the Eastern mind, which, for want of opportunity, we must pass by now.

The scenes of most of them are laid in the East,—of a few in Germany; but the robust *method* of the German story-writer is apparent in each. We wish we could quote from one or two which have particularly charmed us; but though this is impossible within any decent limits, we can at least provoke the appetite of readers of all ages by the mere displaying of such titles as these:—"The History of Caliph Stork"; "The Story of the Severed Hand"; "The Story of Little Muck"; "Nosey the Dwarf"; "The Young Englishman"; "The Prophecy of the Silver Florin"; "The Cold Heart," etc. What prospects for winter evenings are here! And while we can assure the adult reader that the promise which these titles give of burlesque or humorous description, and bold, romantic narrative, shall be more than kept, it may be well also to say, for the comfort of those whom we hope to see buy the book for their children's sake, that the stories in it are entirely free from certain objections which may be fairly urged against the "Arabian Nights" as reading for young people. The "Arabian Days" have nothing to be ashamed of in the nature of their entertainments.

The translation itself is a performance in a high degree creditable, not only to the German, but to the English, scholarship of Mr. Curtis. We perceive scarcely any of that peculiar stiffness of style which makes so many otherwise excellent translations painful to read,—the stiffness as of one walking in new boots,—the result of dressing the words of one language in the grammatical construction of another. Mr. Curtis gives us the sentiment and wit and fancy and humor and oddity of the German's stories, but in an English way. Indeed, his is manly and graceful English, such as we hope we are not now by any means seeing the last of.

To the right sort of reader, as we consider him, of the "Arabian Days," a word about the pictures (for observe, that the proper name for the illustrations of a story-book is *pictures*) may be fitly spoken.

There are no less than sixteen very nice pictures to this story-book, — well done, even for Mr. Hoppin, artistically, and well conceived for the refreshing of the inner eye of him, her, or it that reads. And we must be permitted, also, who have read this book by candle-light, as only such a book should be read, to congratulate the readers who come after us upon the good type and good paper in which the publishers have very properly produced it.

We hope and believe this publication will before long be given as a boon to the rising generation, our second-cousins, across the water. They, however, cannot have it (as we fully intend that certain small bodies, but huge feeders on fiction, among our acquaintance, shall have it) on Christmas morning,—the dear old festival, that, as we write, is already near enough to warm our hearts with anticipation.

The Stratford Gallery: or the Shakspeare Sisterhood. Comprising Forty-five Ideal Portraits, described by HENRIETTA LEE PALMER. Illustrated. New York: D. Appleton & Co.

THIS book is what it purports to be,—not a collection of elaborate essays devoted to metaphysical analysis or to conjectural emendations of doubtful lines,—but a series of ideal portraits of the women of Shakspeare's plays. The reader may fancy himself led by an intelligent cicerone who pauses before each picture and with well-chosen words tells enough of the story to present the heroine, and then gives her own conception of the character, with such hints concerning manners and personal peculiarities as a careful study of the play may furnish. The narrations are models of neatness and brevity, yet full enough to give a clear understanding of the situation to any one unacquainted with it. The creations of Shakspeare have a wonderful completeness and vitality; and yet the elements of character are often mingled so subtly that the sharpest critics differ widely in their estimates. Nothing can be more fascinating than to follow closely the great dramatist, picking out from the dialogue a trait of form here, a whim of color there, and at last combining them into an harmonious whole, with the truth of outline, hue, and bearing pre-

served. Often as this has been done, there is room still for new observers, provided they bring their own eyes to the task, and do not depend upon the dim and warped lenses of the commentators.

It is very rarely that we meet with so fresh, so acute, and so entertaining a student of Shakspeare as the author of this volume. Her observations, whether invariably just or not, are generally taken from a new stand-point. She is led to her conclusions rather by instinct than by reason. She makes no apology for her judgments.

"I have no reason but a woman's reason;
I think her so because I think her so."

And it would not be strange, if womanly instinct were to prove oftentimes a truer guide in following the waywardness or the apparent contradictions of a woman's nature than the cold logical processes of merely intellectual men.

To the heroines who are most truly *women* the author's loyalty is pure and intense. Imogen, the "chaste, ardent, devoted, beautiful" wife,—Juliet, whose "ingenuousness and almost infantile simplicity" endear her to all hearts,—Miranda, that most ethereal creation, type of virgin innocence,—Cordelia, with her pure, filial devotion,—are painted with loving, sympathetic tenderness.

Altogether, this is a book which any admirer of the poet may read with pleasure; and especially to those who have not ventured to think wholly for themselves it will prove a most useful and agreeable companion.

It is a matter of regret that the characters of the greatest of dramatists should not have been embodied by the greatest of painters. But no Michel Angelo, or Raphael, or Correggio, has illustrated these wonderful creations; and the man who is capable of appreciating Miranda, or Ophelia, or Desdemona, finds the ideal heads of the painters, of our day at least, tame, rapid, and unsatisfactory. The heroine, as imaged in his mind, is arrayed in a loveliness which limner never compassed. We cannot promise our readers that the engravings in this beautifully printed and richly bound volume will prove to be exceptions to the usual rule. They are from designs by English artists,—"*Eminent Hands*," in the popular phrase; the faces

are often quite striking and expressive, and, up to a certain point, characteristic; moreover, they are smoothly finished, and will compare favorably with those in fashionable gift-books. Without being in the least degree examples of a high style of Art in its absolute sense, they answer well the purpose for which they were designed. Indeed, if they were more truly ideal, and, at the same time, more truly human, they would doubtless be far less popular.

Ernest Carroll, or Artist-Life in Italy. A Novel, in Three Parts. Boston: Ticknor & Fields. 1858.

THIS book is not strictly of the kind which the Germans call the Art-Novel, and yet we know not how else to class it. The author has spun a somewhat improbable story as the thread for his reflections on Art and his reminiscences of artists and travel. We confess that we should have liked it better, had he made his book simply a record of experience and reflection. But there are many admirable things in this little volume, which is evidently the work of a person of refined artistic culture and clear intelligence. Of especial value we reckon the reminiscences of Allston and his methods; and it seems a little singular, since the scene is laid chiefly in Florence and in 1847, that we get nothing more satisfactory than a single anecdote about the elder Greenough, whose life and works and thoroughly emancipated style of thought have done more to honor American Art than those of any other man, except Allston.

We the rather regret that the author had not made his book more of a journal, and recorded directly his own impressions, because he shows a decided ability in bringing scenes before the eye of the reader. The sketches of Doney's *Caffè* and the Venetian *improvisatore* are especially vivid; so is that of the old picture-dealer; though in all we think some of the phrases might have been softened with advantage. We enter our earnest protest also against the Ruskin-chapter. The scenes at Gracfenberg are fresh, lively, and interesting. The book is also enlivened by many entertaining anecdotes of living American

artists and *savans*, which are told with the skill of a practised *raconteur*. We hope to hear from the author again, and in a form which shall enable his knowledge and experience in matters of Art to have freer play than the exigencies of a novel allow them, and in which his abilities in the discussion of æsthetics shall have more scope given them than that of the *obiter dicta* in a story.

Hymns of the Ages. Being Selections from the Lyra Catholica, Apostolica, Germanica, and other Sources, with an Introduction by PROF. F. D. HUNTINGTON. Boston: Phillips, Sampson, & Co. 1859. Square 8vo. pp. 300.

IN this exquisitely-printed volume the editors have collected specimens of the devotional poetry of the Christian Church, including translations from the Roman Breviary, as well as from German hymns, with a few from English sources. There has been no attempt, evidently, to conform to the requirements of any creed; the devout Catholic, as well as the Episcopalian Churchman, will find here the favorite aspirations, penitential strains, and ascriptions of praise, which have been consecrated by generations of worshippers. To American readers the collection will be substantially new, since hardly a dozen of the hymns are to be found in the volumes in use in our churches. If it had been the purpose of the editors to gather all the classic religious poetry, to form a sacred anthology, it would have been necessary to print a great number of the hymns in modern collections; and the volume would in that case have lost in novelty what it gained in completeness.

Those who like to go back to the ancient forms of worship for inspiration, who feel the force of association in the lyrics which have come down from almost apostolic times, will find in this book an aid to devotion and religious contemplation. With a little more care in excluding strongly-marked doctrinal stanzas, the "Hymns of the Ages," if less characteristic, would have been more truly *catholic*, and therefore acceptable to a larger portion of the Church Universal.

Crispino

THE
ATLANTIC MONTHLY.

A MAGAZINE OF LITERATURE, ART, AND POLITICS.

VOL. III.—FEBRUARY, 1859.—NO. XVI.

OUGHT WOMEN TO LEARN THE ALPHABET?

PARIS smiled, for an hour or two, in the year 1801, when, amidst Napoleon's mighty projects for remodelling the religion and government of his empire, the ironical satirist, Sylvain Maréchal, thrust in his "Plan for a Law prohibiting the Alphabet to Women." Daring, keen, sarcastic, learned, the little tract retains to-day so much of its pungency, that we can hardly wonder at the honest simplicity of the author's friend and biographer, Madame Gacon Dufour, who declared that he must be partially insane, and proceeded to prove herself so by replying to him. His proposed statute consists of eighty-two clauses, and is fortified by a "whereas" of a hundred and thirteen weighty reasons. He exhausts the range of history to show the frightful results which have followed this taste of the fruit of the tree of knowledge; quotes the *Encyclopédie*, to prove that the woman who knows the alphabet has already lost a portion of her innocence; cites the opinion of Molière, that any female who has unhappily learned anything in this line should affect ignorance, when possible; asserts that knowledge rarely makes men attractive, and females never; opines that women have no occasion to peruse Ovid's "Art of Love," since they

know it all in advance; remarks that three-quarters of female authors are no better than they should be; maintains that Madame Guion would have been far more useful, had she been merely pretty and an ignoramus, such as Nature made her,—that Ruth and Naomi could not read, and Boaz probably would never have married into the family, had they possessed that accomplishment,—that the Spartan women did not know the alphabet, nor the Amazons, nor Penelope, nor Andromache, nor Lucretia, nor Joan of Arc, nor Petrarch's Laura, nor the daughters of Charlemagne, nor the three hundred and sixty-five wives of Mohammed;—but that Sappho and Madame de Maintenon could read altogether too well, while the case of Saint Brigitta, who brought forth twelve children and twelve books, was clearly exceptional, and afforded no safe precedent.

We take it, that the brilliant Frenchman has touched the root of the matter. Ought women to learn the alphabet? There the whole question lies. Concede this little fulcrum, and Archimæda will move the world before she has done with it; it becomes merely a question of time. Resistance must be made here or nowhere. *Obsta principiis.* Woman must

be a subject or an equal; there is no middle ground. What if the Chinese proverb should turn out to be, after all, the summit of wisdom,—"For men, to cultivate virtue is knowledge; for women, to renounce knowledge is virtue"?

No doubt, the progress of events is slow, like the working of the laws of gravitation generally. Certainly, there has been but little change in the legal position of woman since China was in its prime, until within the last dozen years. Lawyers admit that the fundamental theory of English and Oriental law is the same on this point: Man and wife are one, and that one is the husband. It is the oldest of legal traditions. When Blackstone declares that "the very being and existence of the woman is suspended during the marriage," and American Kent echoes that "her legal existence and authority are in a manner lost,"—when Petersdorff asserts that "the husband has the right of imposing such corporeal restraints as he may deem necessary," and Bacon that "the husband hath, by law, power and dominion over his wife, and may keep her by force within the bounds of duty, and may beat her, but not in a violent or cruel manner,"*

* It may be well to fortify this point by a racy extract from that rare and amusing old book, the pioneer of its class, entitled "The Lawes Resolutions of Women's Rights, or the Lawes Provision for Women. A Methodicall Collection of such Statutes and Customes, with the Cases, Opinions, Arguments, and Points of Learning in the Law as doe properly concern Women." London: A. D. 1632. pp. 404. 4to. The pithy sentences lose immeasurably, however, by being removed from their original black-letter setting.

"*Lib. III. Sect. VII. The Baron may beate his Wife.*"

"The rest followeth, Justice Brooke 12. H. 8. fo. 4. affirmeth plainly, that if a man beat an out-law, a traitor, a Pagan, his villein, or his wife, it is punishable, because by the Law Common these persons can have no action: God send Gentle-women better sport, or better companie.

"But it seemeth to be very true, that there is some kind of castigation which Law permits a Husband to vse; for if a woman be threatned by her husband to bee beaten, mis-

—when Mr. Justice Coleridge rules that the husband, in certain cases, "has a right to confine his wife in his own dwelling-house and restrain her from liberty for an indefinite time," and Baron Alderson sums it all up tersely, "The wife is only the *servant* of her husband,"—these high authorities simply reaffirm the dogma of the Gentoo code, four thousand years old and more:—"A man, both day and night, must keep his wife so much in subjection that she by no means be mistress of her own actions. If the wife have her own free will, notwithstanding she be of a superior caste, she will behave amiss."

Yet behind these unchanging institutions, a pressure has been for centuries becoming concentrated, which, now that it has begun to act, is threatening to overthrow them all. It has not yet operated very visibly in the Old World, where (even in England) the majority of women have not yet mastered the alphabet, and can not sign their own names in the marriage-register. But in this country,

chiened, or slaine, Fitzherbert sets donne a Writ which she may sve out of Chancery to compell him to finde surety of honest behaviour toward her, and that he shall neither doe nor procure to be done to her (marke I pray you) any bodily damage, otherwise then appertaines to the office of a Husband for lawfull and reasonable correction. See for this the new Nat. bre. fo. 80 f. & fo. 238 f.

"How farre that extendeth I cannot tell, but herein the sexe feminine is at no very great disadvantage: for first for the lawfulness; If it be in no other regard lawfull to beat a man's wife, then because the poore wench can sve no other action for it, I pray why may not the Wife beat the Husband againe, what action can he have if she doe: where two tenants in Common be on a horse, and one them will travell and vse this horse, hee may keepe it from his Companion a yeare two or three and so be even with him; so the actionlesse woman beaten by her Husband, hath retaliation left to beate him againe, if she dare. If he come to the Chancery or Justices in the Country of the peace against her, because her recognizance alone will hardly bee taken, he were best be bound for her, and then if he be beaten the second time, let him know the price of it on God's name."

the vast changes of the last twelve years are already a matter of history. No trumpet has been sounded, no earthquake felt, while State after State has ushered into legal existence one half of the population within its borders. Every Free State in the American Union, except perhaps Illinois and New Jersey, has conceded to married women, in some form, the separate control of property. Maine, Massachusetts, Connecticut, and Pennsylvania have gone farther, and given them the control of their own earnings,—given it wholly and directly, that is,—while New York and other States have given it partially or indirectly. Legislative committees in Ohio and Wisconsin have recommended, in printed reports, the extension of the right of suffrage to women; Kentucky (like Canada) has actually extended it, in certain educational matters, and a Massachusetts legislative committee has suggested the same thing; while the Kansas Constitutional Convention came within a dozen votes of extending it without reserve, and expunging the word *male* from the Constitution. Surely, here and now, might poor M. Maréchal exclaim, The bitter fruits of the original seed appear, and the sad question recurs, whether women ought ever to have tasted of the alphabet.

Mr. Everett, perhaps without due caution, advocated, last summer, the affirmative of this question. With his accustomed eloquence, he urged on the attention of Suleiman Bey the fact of the equal participation of the sexes in the public-school system of Boston, while omitting to explain to him that the equality is of very recent standing. No doubt, the eminent Oriental would have been pleased to hear that this public administration of the alphabet to females, on any terms, is an institution but little more than a half-century old in the city of Boston. It is well established by the early deeds and documents that a large proportion of Puritan women could not write their own names; and in Boston especially, for a hundred and fifty years, the public schools included boys only. In the year

1789, however, the notable discovery was made, that the average attendance of pupils from April to October was only one half of that reported for the remainder of the year. This was an obvious waste of money and accommodations, and it was therefore proposed that female pupils should be annually introduced during this intermediate period. Accordingly, school-girls, like other flowers, blossomed in summer only; and this state of things lasted, with but slight modification, for some forty years, according to the School-Superintendent's Third Report. It was not till 1828 that all distinctions were abolished in the Boston Common Schools; in the High Schools lingering far later, sole vestige of the "good old times," before a mistaken economy overthrew the wholesome doctrine of M. Sylvain Maréchal, and let loose the alphabet among women.

It is true that Eve ruined us all, according to theology, without knowing her letters. Still, there is something to be said in defence of that venerable ancestress. The Veronese lady, Isotta Nogarola, five hundred and thirty-six of whose learned letters were preserved by De Thou, composed a dialogue on the question, Whether Adam or Eve had committed the greater sin? But Ludovico Domenichi, in his "Dialogue on the Nobleness of Women," maintains that Eve did not sin at all, because she was not even created when Adam was told not to eat the apple. It is "in Adam all died," he shrewdly says; nobody died in Eve;—which looks plausible. Be that as it may, Eve's daughters are in danger of swallowing a whole harvest of forbidden fruit, in these revolutionary days, unless something be done to cut off the supply.

It has been seriously asserted that during the last half-century more books have been written by women and about women than during all the previous uncounted ages. It may be true; although, when we think of the innumerable volumes of *Mémoires* by Frenchwomen of the seveneenth and eighteenth centuries,—each

one justifying the existence of her own ten volumes by the remark, that all her contemporaries were writing as many,—we have our doubts. As to the increased multitude of general treatises on the female sex, however,—its education, life, health, diseases, charms, dress, deeds, sphere, rights, wrongs, work, wages, encroachments, and idiosyncrasies generally,—there can be no doubt whatever; and the poorest of these books recognizes a condition of public sentiment which no other age ever dreamed of. Still, literary history preserves the names of some reformers before the Reformation, in this matter. There was Signora Moderata Fonte, the Venetian, who left a book to be published after her death, in 1592, “*Dei Meriti delle Donne*.” There was her townswoman, Lucrezia Marinella, who followed ten years after, with her essay, “*La Nobilità e la Eccellenza delle Donne, con Difetti e Mancamenti degli Uomini*,”—a comprehensive theme, truly! Then followed the all-accomplished Anna Maria Schurman, in 1645, with her “*Disertatio de Ingenii Muliebris ad Doctrinam et meliores Literas Aptitudine*,” with a few miscellaneous letters appended, in Greek and Hebrew. At last came boldly Jacquette Guillaume, in 1665, and threw down the gauntlet in her title-page, “*Les Dames Illustres; où par bonnes et fortes Raisons il se prouve que le Sexe Feminin surpasse en toute Sorte de Genre le Sexe Masculin*”; and with her came Margaret Boufflet and a host of others; and finally, in England, Mary Wollstonecraft, whose famous book, formidable in its day, would seem rather conservative now,—and in America, that pious and worthy dame, Mrs. H. Mather Crocker, Cotton Mather’s grandchild, who, in 1818, published the first book on the “*Rights of Woman*” ever written on this side the Atlantic.

Meanwhile there have never been wanting men, and strong men, to echo these appeals. From Cornelius Agrippa and his essay (1509) on the excellence of woman and her preëminence over man, down to the first youthful thesis of

Agassiz, “*Mens Feminae Viri Animo superior*,” there has been a succession of voices crying in the wilderness. In England, Anthony Gibson wrote a book, in 1599, called “*A Woman’s Woorth, defended against all the Men in the World, proving them to be more Perfect, Excellent, and Absolute in all Vertuous Actions than any Man of what Qualitie soever, Interlarded with Poetry*.” *Per contra*, the learned Acidalius published a book in Latin and afterwards in French, to prove that women are not reasonable creatures. Modern theologians are at worst merely sub-acid, and do not always say so, if they think so. Meanwhile most persons have been content to leave the world to go on its old course, in this matter as in others, and have thus acquiesced in that stern judicial decree, with which Timon of Athens sums up all his curses upon womankind,—“If there sit twelve women at the table, let a dozen of them be—as they are.”

Ancient or modern, nothing in any of these discussions is so valuable as the fact of the discussion itself. There is no discussion where there is no wrong. Nothing so indicates wrong as this morbid self-inspection. The complaints are a perpetual protest, the defences a perpetual confession. It is too late to ignore the question, and once opened, it can be settled only on absolute and permanent principles. There is a wrong; but where? Does woman already know too much, or too little? Was she created for man’s subject, or his equal? Shall she have the alphabet, or not?

Ancient mythology, which undertook to explain everything, easily accounted for the social and political disabilities of woman. Goguet quotes the story from St. Augustine, who got it from Varro. Cecrops, building Athens, saw starting from the earth an olive-plant and a fountain, side by side. The Delphic oracle said, that this indicated a strife between Minerva and Neptune for the honor of giving a name to the city, and that the people must decide between them. Cecrops thereupon assembled the men, and

the women also, who then had a right to vote; and the result was that Minerva carried the election by a glorious majority of one. Then Attica was overflowed and laid waste; of course the citizens attributed the calamity to Neptune, and resolved to punish the women. It was therefore determined that in future they should not vote, nor should any child bear the name of its mother.

Thus easily did mythology explain all troublesome inconsistencies. But it is much that it should even have recognized them, at so early an epoch, as needing explanation. When we ask for a less symbolical elucidation, it lies within our reach. At least, it is not hard to take the first steps into the mystery. There are, to be sure, some flowers of rhetoric in the way. The obstacle to the participation of woman in the alphabet, or in any other privilege, has been thought by some to be the fear of impairing her delicacy, or of destroying her domesticity, or of confounding the distinction between the sexes. We think otherwise. These have been plausible excuses; they have even been genuine, though minor, anxieties. But the whole thing, we take it, had always one simple, intelligible basis,—sheer contempt for the supposed intellectual inferiority of woman. She was not to be taught, because she was not worth teaching. The learned Acidalius, aforesaid, was in the majority. According to Aristotle and the Peripatetics, woman was *animal occasionatum*, as if a sort of monster and accidental production. Mediæval councils, charitably asserting her claims to the rank of humanity, still pronounced her unfit for instruction. In the Hindoo dramas, she did not even speak the same language with her master, but used the dialect of slaves. When, in the sixteenth century, Françoise de Saintonges wished to establish girls' schools in France, she was hooted in the streets, and her father called together four doctors, learned in the law, to decide whether she was not possessed by demons, to think of educating women, — *pour s'as-*

surer qu'instruire des femmes n'était pas un œuvre du démon.

It was the same with political rights. The foundation of the Salic Law was not any sentimental anxiety to guard female delicacy and domesticity; it was, as stated by Froissart, a blunt, hearty contempt: "The kingdom of France being too noble to be ruled by a woman." And the same principle was reaffirmed for our own institutions, in rather softened language, by Theophilus Parsons, in his famous defence of the rights of Massachusetts *men* (the "Essex Result," in 1778): "Women, what age soever they are of, are not considered as having a sufficient acquired discretion [to exercise the franchise]."

In harmony with this are the various maxims and *bon mots* of eminent men, in respect to women. Niebuhr thought he should not have educated a girl well,—he should have made her know too much. Lessing said, "The woman who thinks is like the man who puts on rouge, ridiculous." Voltaire said, "Ideas are like beards; women and young men have none." And witty Dr. Maginn carries to its extreme the atrocity: "We like to hear a few words of sense from a woman, as we do from a parrot, because they are so unexpected." Yet how can we wonder at these opinions, when the saints have been severer than the sages? since the pious Fénelon taught that true virgin delicacy was almost as incompatible with learning as with vice,—and Dr. Channing complained, in his "Essay on Exclusion and Denunciation," of "women forgetting the tenderness of their sex" and arguing on theology.

Now this impression of feminine inferiority may be right or wrong, but it obviously does a good deal towards explaining the facts it takes for granted. If contempt does not originally cause failure, it perpetuates it. Systematically discourage any individual or class, from birth to death, and they learn, in nine cases out of ten, to acquiesce in their degradation, if not to claim it as a crown of glory. If the Abbé Choisi praised the Duchesse de Fontanges for being "beau-

tiful as an angel and silly as a goose," it was natural that all the young ladies of the court should resolve to make up in folly what they wanted in charms. All generations of women having been bred under the shadow of intellectual contempt, they have of course done much to justify it. They have often used only for frivolous purposes even the poor opportunities allowed them. They have employed the alphabet, as Molière said, chiefly in spelling the verb *Amo*. Their use of science has been like that of Mlle. de Launay, who computed the decline in her lover's affection by his abbreviation of their evening walk in the public square, preferring to cross it rather than take the circuit,—“From which I inferred,” she says, “that his passion had diminished in the ratio between the diagonal of a rectangular parallelogram and the sum of two adjacent sides.” And their conception, even of Art, has been too often on the scale of Properzia de Rossi, who carved sixty-five heads on a walnut, the smallest of all recorded symbols of woman's sphere.

All this might perhaps be overcome, if the social prejudice which discourages woman would only reward proportionately those who surmount the discouragement. The more obstacles the more glory, if society would only pay in proportion to the labor; but it does not. Women, being denied not merely the antecedent training which prepares for great deeds, but the subsequent praise and compensation which follow them, have been weakened in both directions. The career of eminent men ordinarily begins with colleges and the memories of Miltiades, and ends with fortune and fame; woman begins under discouragement, and ends beneath the same. Single, she works with half-preparation and half-pay; married, she puts name and wages into the keeping of her husband, shrinks into John Smith's “lady” during life, and John Smith's “relict” on her tombstone; and still the world wonders that her deeds, like her opportunities, are inferior.

Evidently, then, the advocates of woman's claims—those who hold that “the virtues of the man and the woman are the same,” with Antisthenes,—or that “the talent of the man and the woman is the same,” with Socrates in Xenophon's “Banquet”—must be cautious lest they attempt to prove too much. Of course, if women know as much as men without schools and colleges, there is no need of admitting them to these institutions. If they work as well on half-pay, it diminishes the inducement to give them the other half. The safer position is, to claim that they have done just enough to show what they might have done under circumstances less discouraging. Take, for instance, the common remark, that women have invented nothing. It is a valid answer, that the only tools habitually needed by woman have been the needle, the spindle, and the basket, and tradition reports that she herself invented all three. In the same way it may be shown that the departments in which women have equalled men have been the departments in which they have had equal training, equal encouragement, and equal compensation,—as, for instance, the theatre. Madame Lagrange, the *prima donna*, after years of costly musical instruction, wins the zenith of professional success; she receives, the newspapers affirm, sixty thousand dollars a year, travelling-expenses for ten persons, country-houses, stables, and liveries, besides an uncounted revenue of bracelets, bouquets, and *billet-doux*. Of course, every young *débutante* fancies the same thing within her own reach, with only a brief stage-vista between. On the stage there is no deduction for sex, and therefore woman has shown in that sphere an equal genius. But every female common-school teacher in the United States finds the enjoyment of her two hundred dollars a year to be secretly embittered by the knowledge that the young college-stripling in the next school-room is paid a thousand dollars for work no harder or more responsible than her own,—and that, too, after the whole pathway of edu-

cation has been obstructed for her and smoothed for him. These may be gross and carnal considerations; but Faith asks her daily bread, and Fancy must be *fed*. We deny woman her fair share of training, of encouragement, of remuneration, and then talk fine nonsense about her instincts and her intuitions,—say sentimentally, with the Oriental proverbialist, “Every book of knowledge is implanted by nature in the heart of woman,” and make the compliment a substitute for the alphabet.

Nothing can be more absurd than to impose entirely distinct standards, in this respect, on the two sexes, or to expect that woman, any more than man, will accomplish anything great without due preparation and adequate stimulus. Mrs. Patten, who navigated her husband’s ship from Cape Horn to California, would have failed in the effort, for all her heroism, if she had not, unlike most of her sex, been taught to use her Bowditch. Florence Nightingale, when she heard of the distresses in the Crimea, did not, as most people imagine, rise up and say, “I am a woman, ignorant, but intuitive, with very little sense or information, but exceedingly sublime aspirations; my strength lies in my weakness; I can do all things without knowing anything about them.” Not at all. During ten years she had been in hard training for precisely such services,—had visited all the hospitals in London, Edinburgh, Dublin, Paris, Lyons, Rome, Brussels, and Berlin,—had studied under the Sisters of Charity, and been twice a nurse in the Protestant Institution at Kaiserswerth. Therefore she did not merely carry to the Crimea a woman’s heart, as her stock in trade, but she knew the alphabet of her profession better than the men around her. Of course, genius and enthusiasm are, for both sexes, elements unforeseen and incalculable; but, as a general rule, great achievements imply great preparations and favorable conditions.

To disregard this truth is unreasonable in the abstract and cruel in its

consequences. If an extraordinary male gymnast can clear a height of ten feet with the aid of a spring-board, it would be considered slightly absurd to ask a woman to leap eleven feet without one; yet this is precisely what society and the critics have always done. Training and wages and social approbation are very elastic spring-boards, and the whole course of history has seen these offered bounteously to one sex and as sedulously withheld from the other. Let woman consent to be a doll, and there was no finery so gorgeous, no baby-house so costly, but she might aspire to share its lavish delights;—let her ask simply for an equal chance to learn, to labor, and to live, and it was as if that same doll should open its lips, and propound Euclid’s forty-seventh proposition. While we have all deplored the helpless position of indigent women, and lamented that they had no alternative beyond the needle, the wash-tub, the school-room, and the street, we have yet resisted their admission into every new occupation, denied them training, and cut their compensation down. Like Charles Lamb, who atoned for coming late to the office in the morning by going away early in the afternoon, we have, first, half educated women, and then, to restore the balance, only half paid them. What innumerable obstacles have been placed in the way of female physicians! what a complication of difficulties has been encountered by female printers, engravers, and designers! In London, Mr. Bennett was recently mobbed for lecturing to women on watchmaking. In this country, we have known grave professors to refuse to address lyceums which thought fit to employ an occasional female lecturer. Mr. Comer states that it was “in the face of ridicule and sneers” that he began to educate women as book-keepers, eight years ago; and it is a little contemptible in the authoress of “*A Woman’s Thoughts on Women*” to revive the same satire now, when she must know that in one half the retail shops in Paris

her own sex rules the ledger, and Mammon knows no Salic law.

We find, on investigation, what these considerations would lead us to expect, that eminent women have commonly been more exceptional in their training and position than even in their genius. They have excelled the average of their own sex because they have had more of the ordinary advantages of the other sex. Take any department of learning or skill; take, for instance, the knowledge of languages, the universal alphabet, philology.—On the great stairway, at Padua, stands the statue of Elena Cornaro, professor of six languages in that once renowned university. But Elena Cornaro was educated like a boy, by her father.—On the great door of the University of Bologna is inscribed the epitaph of Clotilda Tambroni, the honored correspondent of Porson, and the first Greek scholar of Southern Europe in her day. But Clotilda Tambroni was educated like a boy, by Emanuele Aponte.—How fine are those prefatory words, “by a Right Reverend Prelate,” to that pioneer book in Anglo-Saxon lore, Elizabeth Elstob’s grammar: “Our earthly possessions are indeed our patrimony, as derived to us by the industry of our fathers; but the language in which we speak is our mother-tongue, and who so proper to play the critic in this as the females?” But this particular female obtained the rudiments of her rare education from her mother, before she was eight years old, in spite of much opposition from her right reverend guardians.—Adelung, the highest authority, declares that all modern philology is founded on the translation of a Russian vocabulary into two hundred different dialects by Catherine II. But Catherine shared, in childhood, the instructors of her brother, Prince Frederick, and was subject to some reproach for learning, though a girl, so much more rapidly than he did.—Christina of Sweden ironically reproved Madame Dacier for her translation of Callimachus: “Such a pretty girl as you are, are you not

ashamed to be so learned?” But Madame Dacier acquired Greek by contriving to do her embroidery in the room where her father was teaching her stupid brother; and her queenly critic had learned to read Thucydides, harder Greek than Callimachus, before she was fourteen.—And so down to our own day, who knows how many mute, inglorious Minervas may have perished unenlightened, while Margaret Fuller and Elizabeth Barrett Browning were being educated “like boys”?

This expression simply means that they had the most solid training which the times afforded. Most persons would instantly take alarm at the very words; that is, they have so little faith in the distinctions which Nature has established, that they think, if you teach the alphabet, or anything else, indiscriminately to both sexes, you annul all difference between them. The common reasoning is thus: “Boys and girls are acknowledged to be distinct beings. Now boys study Greek and algebra, medicine and book-keeping. Therefore girls should not.” As if one should say: “Boys and girls are distinct beings. Now boys eat beef and potatoes. Therefore, obviously, girls should not.”

The analogy between physical and spiritual food is precisely in point. The simple truth is, that, amid the vast range of human powers and properties, the fact of sex is but one item. Vital and momentous in itself, it does not constitute the whole organism, but only a small part of it. The distinction of male and female is special, aimed at a certain end; and apart from that end, it is, throughout all the kingdoms of Nature, of minor importance. With but trifling exceptions, from infusorial up to man, the female animal moves, breathes, looks, listens, runs, flies, swims, pursues its food, eats it, digests it, in precisely the same manner as the male; all instincts, all characteristics, are the same, except as to the one solitary fact of parentage. Mr. Ten Broeck’s race-horses, Pryor and Prioress, were foaled alike, fed

alike, trained alike, and finally ran side by side, competing for the same prize. The eagle is not checked in soaring by any consciousness of sex, nor asks the sex of the timid hare, its quarry. Nature, for high purposes, creates and guards the sexual distinction, but keeps it humbly subordinate to still more important ones.

Now all this bears directly upon the alphabet. What sort of philosophy is that which says, "John is a fool; Jane is a genius; nevertheless, John, being a man, shall learn, lead, make laws, make money; Jane, being a woman, shall be ignorant, dependent, disfranchised, underpaid." Of course, the time is past when one would state this so frankly, though Comte comes quite near it, to say nothing of the Mormons; but this formula really lies at the bottom of the reasoning one hears every day. The answer is: Soul before sex. Give an equal chance, and let genius and industry do the rest. *La carrière ouverte aux talens*. Every man for himself, every woman for herself, and the alphabet for us all.

Thus far, our whole course of argument has been defensive and explanatory. We have shown that woman's inferiority in special achievements, so far as it exists, is a fact of small importance, because it is merely a corollary from her historic position of degradation. She has not excelled, because she has had no fair chance to excel. Man, placing his foot upon her shoulder, has taunted her with not rising. But the ulterior question remains behind,—How came she into this attitude, originally? Explain the explanation, the logician fairly demands. Granted that woman is weak because she has been systematically degraded; but why was she degraded? This is a far deeper question,—one to be met only by a profounder philosophy and a positive solution. We are coming on ground almost wholly untrod, and must do the best we can.

We venture to assert, then, that woman's social inferiority, in the past, has been, to a great extent, a legitimate

thing. To all appearance, history would have been impossible without it, just as it would have been impossible without an epoch of war and slavery. It is simply a matter of social progress, a part of the succession of civilizations. The past has been, and inevitably, a period of ignorance, of engrossing physical necessities, and of brute force,—not of freedom, of philanthropy, and of culture. During that lower epoch, woman was necessarily an inferior,—degraded by abject labor, even in time of peace,—degraded uniformly by war, chivalry to the contrary notwithstanding. Behind all the courtesies of Amadis and the Cid lay the stern fact,—woman a child or a toy. The flattering troubadours chanted her into a poet's paradise; but, alas! that kingdom of heaven suffered violence, and the violent took it by force. The truth simply was, that her time had not come. Physical strength must rule for a time, and she was the weaker. She was very properly refused a fendal grant, because, say "*Les Coutumes de Normandie*," she is not trained to war or policy: *C'est l'homme ki se bast et ki conseille*. Other authorities put it still more plainly: "A woman cannot serve the emperor or feudal lord in war, on account of the decorum of her sex; nor assist him with advice, because of her limited intellect; nor keep his counsel, owing to the infirmity of her disposition." All which was, no doubt, in the majority of cases, true, and the degradation of woman was simply a part of a system, which has indeed had its day, but has bequeathed its associations.

From this reign of force woman never freed herself by force. She could not fight, or would not. Bohemian annals, indeed, record the legend of a literal war between the sexes, in which the women's army was led by Libussa and Wlasla, and which finally ended with the capture, by the army of men, of Castle Dziewin, Maiden's Tower, whose ruins are still visible near Prague. The armor of Libussa is still shown at Vienna, and the guide calls attention to the long-

peaked toes of steel, with which, he avers, the tender Princess was wont to pierce the hearts of her opponents, while careering through the battle. And there are abundant instances in which women have fought side by side with men, and on equal terms. The ancient British women mingled in the wars of their husbands, and their princesses were trained to the use of arms in the Maiden's Castle at Edinburgh and in the Isle of Skye. The Moorish wives and maidens fought in defence of their European peninsula; and the Portuguese women fought, on the same soil, against the armies of Philip II. The king of Siam has at present a body-guard of four hundred women; they are armed with lance and rifle, are admirably disciplined, and their commander (appointed after saving the king's life at a tiger-hunt) ranks as one of the royal family and has ten elephants at her service. When the all-conquering Dahomian army marched upon Abbeokuta, in 1851, they numbered ten thousand men and six thousand women; the women were, as usual, placed foremost in the assault, as being most reliable; and of the eighteen hundred bodies left dead before the walls, the vast majority were of women. The Hospital of the Invalides, in Paris, has sheltered, for half a century, a fine specimen of a female soldier, "Lieutenant Madame Bulan," now eighty-three years old, decorated by Napoleon's own hand with the cross of the Legion of Honor, and credited on the hospital-books with "seven years' service,—seven campaigns,—three wounds,—several times distinguished, especially in Corsica, in defending a fort against the English." But these cases, though interesting to the historian, are still exceptional, and the instinctive repugnance they inspire is condemnatory, not of women, but of war.

The reason, then, for the long subjection of woman has been simply that humanity was passing through its first epoch, and her full career was to be reserved for the second. As the different races of man have appeared successively upon the stage of history, so there has been an

order of succession of the sexes. Woman's appointed era, like that of the Scandinavian tribes, was delayed, but not omitted. It is not merely true that the empire of the past has belonged to man, but that it has properly belonged to him; for it was an empire of the muscles, enlisting at best but the lower powers of the understanding. There can be no question that the present epoch is initiating an empire of the higher reason, of arts, affections, aspirations; and for that epoch the genius of woman has been reserved. The spirit of the age has always kept pace with the facts, and outstripped the statutes. Till the fulness of time came, woman was necessarily kept a slave to the spinning-wheel and the needle; now higher work is ready, peace has brought invention to her aid, and the mechanical means for her emancipation are ready also. No use in releasing her, till man, with his strong arm, had worked out his preliminary share in civilization. "Earth waits for her queen" was a favorite motto of Margaret Fuller's; but it would be more correct to say that the queen has waited for her earth, till it could be smoothed and prepared for her occupancy. Now Cinderella may begin to think of putting on her royal robes.

Everybody sees that the times are altering the whole material position of woman; but most persons do not appear to see the inevitable social and moral changes which are also involved. As has been already said, the woman of ancient history was a slave to physical necessities, both in war and peace. In war she could do too little, in peace she did too much, under the material compulsions which controlled the world. How could the Jews, for instance, elevate woman? They could not spare her from the wool and the flax and the candle that goeth not out by night. In Rome, when the bride first stepped across her threshold, they did not ask her, Do you know the alphabet? they asked simply, Can you spin? There was no higher epitaph than Queen Amalasontha's, — *Domum servavit, lanam fecit*. In Bœotia, brides

were conducted home in vehicles whose wheels were burned at the door, in token that they were never to leave the house again. Pythagoras instituted at Crotona an annual festival for the distaff; Confucius, in China, did the same for the spindle; and these celebrated not the freedom, but the serfdom, of woman.

And even into modern days this same tyrannical necessity has lingered. "Go spin, you jades! go spin!" was the only answer vouchsafed by the Earl of Pembroke to the twice-banished nuns of Wilton. And even now, travellers agree that throughout civilized Europe, with the partial exception of England and France, the profound absorption of the mass of women in household labors renders their general elevation impossible. But with us Americans, and in this age, when all these vast labors are being more and more transferred to arms of brass and iron,—when Rochester grinds the flour, and Lowell weaves the cloth, and the fire on the hearth has gone into black retirement and mourning,—when the wiser a virgin is, the less she has to do with oil in her lamp,—when the needle has made its last dying speech and confession in the "Song of the Shirt," and the sewing-machine has changed those doleful marches to delightful measures,—how is it possible for the blindest to help seeing that a new era is begun, and that the time has come for woman to learn the alphabet?

Nobody asks for any abolition of domestic labor for women, any more than of outdoor labor for men. Of course, most women will still continue to be mainly occupied with the indoor care of their families, and most men with their external support. All that is desirable for either sex is such an economy of labor, in this respect, as shall leave some spare time, to be appropriated in other directions. The argument against each new emancipation of woman is precisely that always made against the liberation of serfs and the enfranchisement of plebeians,—that the new position will take them from their legitimate business. "How

can he [or she] get wisdom that holdeth the plough, [or the broom,]—whose talk is of bullocks [or of babies]?" Yet the American farmer has already emancipated himself from those fancied incompatibilities, and so will the farmer's wife. In a nation where there is no leisure-class and no peasantry, this whole theory of exclusion is an absurdity. We all have a little leisure, and we must all make the most of it. If we will confine large interests and duties to those who have nothing else to do, we must go back to monarchy at once; if otherwise, then the alphabet, and its consequences, must be open to woman as to man. Jean Paul says nobly, in his "*Levana*," that, "before and after being a mother, a woman is a human being, and neither maternal nor conjugal relation can supersede the human responsibility, but must become its means and instrument." And it is good to read the manly speech, on this subject, of John Quincy Adams, quoted at length by his recent venerable biographer,—in which, after fully defending the political petitions of the women of Plymouth, he declares that "the correct principle is, that women are not only justified, but exhibit the most exalted virtue, when they do depart from the domestic circle, and enter on the concerns of their country, of humanity, and of their God."

There are duties devolving on every human being,—duties not small or few, but vast and varied,—which spring from home and private life, and all their sweet relations. The support or care of the humblest household is a function worthy of men, women, and angels, so far as it goes. From these duties none must shrink, neither man nor woman; the loftiest genius cannot ignore them; the sublimest charity must begin with them. They are their own exceeding great reward, their self-sacrifice is infinite joy, and the selfishness which discards them receives in return loneliness and a desolate old age. Yet these, though the most tender and intimate portion of human life, do not form its whole. It is given to noble souls to crave other interests also,

added spheres, not necessarily alien from these,—larger knowledge, larger action also,—duties, responsibilities, anxieties, dangers, all the aliment that history has given to its heroes. Not home less, but humanity more. When the high-born English lady in the Crimean hospital, ordered to a post of almost certain death, only raised her hands to heaven and said, "Thank God!" she did not renounce her true position as woman, she exclaimed it. When the queen of James I. of Scotland, already immortalized by him in stately verse, won a higher immortality by welcoming to her fair bosom the daggers aimed at his,—when the Countess of Buchan hung confined in her iron cage, outside Berwick Castle, in penalty for crowning Robert the Bruce,—when the stainless soul of Joan of Arc met God, like Moses, in a burning flame,—these things were as they should be. Man must not monopolize these privileges of peril, birthright of great souls. Serenades and compliments must not replace the nobler hospitality which shares with woman the opportunity of martyrdom. Great administrative duties also, cares of state, for which one should be born gray-headed, how nobly do these sit upon a female brow! Each year adds to the storied renown of Elizabeth of England, greatest sovereign of the greatest of historic nations. Christina of Sweden, alone among the crowned heads of Europe, (so says Voltaire,) sustained the dignity of the throne against Richelieu and Mazarin. And they most assuredly did not sacrifice their womanhood in the process; for her Britannic Majesty's wardrobe included four thousand gowns,—and Mlle. de Montpensier declares, that, when Christina had put on a wig of the latest fashion, "she really looked extremely pretty." Should this evidence of feminine attributes appear to some sterner intellects frivolous and insufficient, it is, nevertheless, adapted to the level of the style of argument it answers.

Les races se féminisent, said Buffon,—
"The world is growing more feminine."
It is a compliment, whether the naturalist

intended it or not. Time has brought peace; peace, invention; and the poorest woman of to-day is born to an inheritance such as her ancestors never dreamed of. Previous attempts to confer on women social and political equality,—as when Leopold, Grand Duke of Tuscany, made them magistrates, or when the Hungarian revolutionists made them voters, or when our own New Jersey tried the same experiment, in a guarded fashion, in early times, and then revoked the privilege, because (as in the ancient fable) the women voted the wrong way,—these things were premature, and valuable only as concessions to a supposed principle. But in view of the rapid changes now going on, he is a rash man who asserts the "Woman Question" to be anything but a mere question of time. The fulcrum has been already given, in the alphabet, and we must simply watch and see whether the earth does not move.

In this present treatment of the subject, we have been more anxious to assert broad principles than to work them out into the details of their application. We only point out the plain fact: woman must be either a subject or an equal; there is no other permanent ground. Every concession to a supposed principle only involves the necessity of the next concession for which that principle calls. Once yield the alphabet, and we abandon the whole long theory of subjection and coverture; the past is set aside, and we have nothing but abstractions to fall back upon. Reasoning abstractly, it must be admitted that the argument has been, thus far, entirely on the women's side, inasmuch as no man has yet seriously tried to meet them with argument. It is an alarming feature of this discussion, that it has reversed, very generally, the traditional positions of the sexes: the women have had all the logic; and the most intelligent men, when they have attempted the other side, have limited themselves to satire and gossip. What rational woman, we ask, can be convinced by

the nonsense which is talked in ordinary society around her,—as, that it is right to admit girls to common schools, and equally right to exclude them from colleges,—that it is proper for a woman to sing in public, but indelicate for her to speak in public,—that a post-office box is an unexceptionable place to drop a bit of paper into, but a ballot-box terribly dangerous? No cause in the world can keep above water, sustained by such contradictions as these, too feeble and slight to be dignified by the name of fallacies. Some persons profess to think it impossible to reason with a woman, and they certainly show no disposition to try the experiment.

But we must remember that all our American institutions are based on consistency, or on nothing; all claim to be founded on the principles of natural right, and when they quit those, they are lost. In all European monarchies, it is the theory, that the mass of the people are children, to be governed, not mature beings, to govern themselves. This is clearly stated, and consistently applied. In the free states of this Union, we have formally abandoned this theory for one half of the human race, while for the other half it still flourishes in full force. The moment the claims of woman are broached, the democrat becomes a monarchist. What Americans commonly criticize in English statesmen, namely, that they habitually evade all arguments based on natural right, and defend every legal wrong on the ground that it works well in practice, is the precise characteristic of our habitual view of woman. The perplexity must be resolved somehow. We seldom meet a legislator who pretends to deny that strict adherence to our own principles would place both sexes in precisely equal positions before law and constitution, as well as in school and society. But each has his special quibble to apply, showing that in this case we must abandon all the general maxims to which we have pledged ourselves, and hold only by precedent. Nay, he construes

even precedent with the most ingenious rigor; since the exclusion of women from all direct contact with affairs can be made far more perfect in a republic than is possible in a monarchy, where even sex is merged in rank, and the female patrician may have far more power than the male plebeian. But, as matters now stand among us, there is no aristocracy but of sex: all men are born patrician, all women are legally plebeian; all men are equal in having political power, and all women in having none. This is a paradox so evident, and such an anomaly in human progress, that it cannot last forever, without new discoveries in logic, or else a deliberate return to M. Maréchal's theory concerning the alphabet.

Meanwhile, as the newspapers say, we anxiously await further developments. According to present appearances, the final adjustment lies mainly in the hands of women themselves. Men can hardly be expected to concede either rights or privileges more rapidly than they are claimed, or to be truer to women than women are to each other. True, the worst effect of a condition of inferiority is the weakness it leaves behind it; even when we say, "Hands off!" the sufferer does not rise. In such a case, there is but one counsel worth giving. More depends on determination than even on ability. Will, not talent, governs the world. From what pathway of eminence were women more traditionally excluded than from the art of sculpture, in spite of *Non ne Praxitles fecit, sed Anna Damer?*—yet Harriet Hosmer, in eight years, has trod its full ascent. Who believed that a poetess could ever be more than an Annot Lyle of the harp, to soothe with sweet melodies the leisure of her lord, until in Elizabeth Barrett's hands the thing became a trumpet? Where are gone the sneers with which army surgeons and parliamentary orators opposed Mr. Sidney Herbert's first proposition to send Florence Nightingale to the Crimea? In how many towns has the current of popular preju-

dice against female orators been reversed by one winning speech from Lucy Stone! Where no logic can prevail, success silences. First give woman, if you dare, the alphabet, then summon her to her career; and though men, ignorant and prejudiced, may oppose its

beginnings, there is no danger but they will at last fling around her conquering footsteps more lavish praises than ever greeted the opera's idol,—more perfumed flowers than ever wooed, with intoxicating fragrance, the fairest butterfly of the ball-room.

THE MORNING STREET.

I WALK alone the Morning Street,
Filled with the silence strange and sweet:
All seems as lone, as still, as dead,
As if unnumbered years had fled,
Letting the noisy Babel be
Without a breath, a memory.
The light wind walks with me, alone,
Where the hot day like flame was blown;
Where the wheels roared and dust was beat,
The dew is in the Morning Street.

Where are the restless throngs that pour
Along this mighty corridor
While the noon flames? the hurrying crowd
Whose footsteps make the city loud?
The myriad faces? hearts that beat
No more in the deserted street?—
Those footsteps, in their dream-land maze,
Cross thresholds of forgotten days;
Those faces brighten from the years
In morning suns long set in tears;
Those hearts—far in the Past they beat—
Are singing in *their* Morning Street.

A city 'gainst the world's gray Prime,
Lost in some desert, far from Time,
Where noiseless Ages, gliding through,
Have only sifted sands and dew,
Were not more lone to one who first
Upon its giant silence burst,
Than this strange quiet, where the tide
Of life, upheaved on either side,
Hangs trembling, ready soon to beat
With human waves the Morning Street.

Ay, soon the glowing morning flood
Pours through this charmed solitude;

All silent now, this Memnon-stone
 Will murmur to the rising sun ;
 The busy life this vein shall beat,—
 The rush of wheels, the swarm of feet ;
 The Arachne-threads of Purpose stream
 Unseen within the morning gleam ;
 The Life will move, the Death be plain ;
 The bridal throng, the funeral train,
 Together in the crowd will meet,
 And pass along the Morning Street.

IN A CELLAR.

I.

It was the day of Madame de St. Cyr's dinner, an event I never missed ; for, the mistress of a mansion in the Faubourg St. Germain, there still lingered about her the exquisite grace and good-breeding peculiar to the old *régime*, that insensibly communicates itself to the guests till they move in an atmosphere of ease that constitutes the charm of home. One was always sure of meeting desirable and well-assorted people here, and a *contre-temps* was impossible. Moreover, the house was not at the command of all ; and Madame de St. Cyr, with the daring strength which, when found in a woman at all, should, to be enduring, be combined with a sweet but firm restraint, rode rough-shod over the *parvenus* of the Empire, and was resolute enough to insulate herself even among the old *noblesse*, who, as all the world knows, insulate themselves from the rest of France. There were rare qualities in this woman, and were I to have selected one who with an even hand should carry a snuffly candle through a magazine of powder, my choice would have devolved upon her ; and she would have done it.

I often looked, and not unsuccessfully,

to discern what heritage her daughter had in these little affairs. Indeed, to one like myself Delphine presented the worthier study. She wanted the airy charm of manner, the suavity and tenderness of her mother,—a deficiency easily to be pardoned in one of such delicate and extraordinary beauty. And perhaps her face was the truest index of her mind ; not that it ever transparently displayed a genuine emotion,—Delphine was too well-bred for that,—but the outline of her features had a keen, regular precision, as if cut in a gem. Her exquisite color seldom varied, her eyes were like blue steel, she was statue-like and stony. But had one paused there, pronouncing her hard and impassive, he had committed an error. She had no great capability for passion, but she was not to be deceived ; one metallic flash of her eye would cut like a sword through the whole mesh of entanglements with which you had surrounded her ; and frequently, when alone with her, you perceived cool recesses in her nature, sparkling and pleasant, which jealously guarded themselves from a nearer approach. She was infinitely *spirituelle* ; compared to her, Madame herself was heavy.

At the first I had seen that Delphine must be the wife of a diplomaté. What

diplomat? For a time asking myself the question seriously, I decided in the negative, which did not, however, prevent Delphine from fulfilling her destiny, since there were others. She was, after all, like a draught of rich old wine, all fire and sweetness. These things were not generally seen in her; I was more favored than many; and I looked at her with pitiless perspicacious eyes. Nevertheless, I had not the least advantage; it was, in fact, between us, diamond cut diamond,—which, oddly enough, brings me back to my story.

Some years previously, I had been sent on a special mission to the government at Paris, and having finally executed it, I resigned the post, and resolved to make my residence there, since it is the only place on earth where one can live. Every morning I half expect to see the country, beyond the city, white with an encampment of the nations, who, having peacefully flocked there over night, wait till the Rue St. Honoré shall run out and greet them. It surprises me, sometimes, that those pretending to civilization are content to remain at a distance. What experience have they of life,—not to mention gayety and pleasure, but of the great purpose of life,—society? Man evidently is gregarious; Fourier's fables are founded on fact; we are nothing without our opposites, our fellows, our lights and shadows, colors, relations, combinations, our *point d'appui*, and our angle of sight. An isolated man is immensurable; he is also unpicturesque, unnatural, untrue. He is no longer the lord of Nature, animal and vegetable,—but Nature is the lord of him; the trees, skies, flowers, predominate, and he is in as bad taste as green and blue, or as an oyster in a vase of roses. The race swings naturally to clusters. It being admitted, then, that society is our normal state, where is it to be obtained in such perfection as at Paris? Show me the urbanity, the generosity in trifles, better than sacrifice, the incuriousness and freedom, the grace, and wit, and honor, that will equal such as I find

here. Morality,—we were not speaking of it,—the intrusion is unnecessary; must that word with Anglo-Saxon pertinacity dog us round the world? A hollow mask, which Vice now and then lifts for a breath of air, I grant you this state may be called; but since I find the vice elsewhere, countenance my preference for the accompanying mask. But even this is vanishing; such drawing-rooms as Mme. de St. Cyr's are less and less frequent. Yet, though the delightful spell of the last century daily dissipates itself, and we are not now what we were twenty years ago, still Paris is, and will be till the end of time, for a cosmopolitan, the pivot on which the world revolves.

It was, then, as I have said, the day of Mme. de St. Cyr's dinner. Punctually at the hour, I presented myself,—for I have always esteemed it the least courtesy which a guest can render, that he should not cool his hostess's dinner.

The usual choice company waited. There was the Marquis of G., the ambassador from home, Col. Leigh, an *attaché* of that embassy, the Spanish and Belgian ministers,—all of whom, with myself, completed a diplomatic circle. There were also wits and artists, but no ladies whose beauty exceeded that of the St. Cyrs. With nearly all of this assemblage I held certain relations, so that I was immediately at ease. G. was the only one whom, perhaps, I would rather not have met, although we were the best of friends. They awaited but one, the Baron Stahl. Meanwhile Delphine stood coolly taking the measurement of the Marquis of G., while her mother entertained one and another guest with a low-toned flattery, gentle interest, or lively narration, as the case might demand.

In a country where a *coup d'état* was as easily given as a box on the ear, we all attentively watched for the arrival of one who had been sent from a neighboring empire to negotiate a loan for the tottering throne of this. Nor was expectation kept long on guard. In a moment, "His Excellency, the Baron Stahl!" was announced.

The exaggeration of his low bow to Mme. de St. Cyr, the gleam askeance of his black eye, the absurd simplicity of his dress, did not particularly please me. A low forehead, straight black brows, a beardless cheek with a fine color which gave him a fictitiously youthful appearance, were the most striking traits of his face; his person was not to be found fault with; but he boldly evinced his admiration for Delphine, and with a wicked eye.

As we were introduced, he assured me, in pure English, that he had pleasure in making the acquaintance of a gentleman whose services were so distinguished.

I, in turn, assured him of my pleasure in meeting a gentleman who appreciated them.

I had arrived at the house of Mme. de St. Cyr with a load on my mind, which for four weeks had weighed there; but before I thus spoke, it was lifted and gone. I had seen the Baron Stahl before, although not previously aware of it; and now, as he bowed, talked my native tongue so smoothly, drew a glove over the handsome hand upon whose first finger shone the only incongruity of his attire, a broad gold ring, holding a gaudy red stone,—as he stood smiling and expectant before me, a sudden chain of events flashed through my mind, an instantaneous heat, like lightning, welded them into logic. A great problem was resolved. For a second, the breath seemed snatched from my lips; the next, a lighter, freer man never trod in diplomatic shoes.

I really beg your pardon,—but perhaps from long usage, it has become impossible for me to tell a straight story. It is absolutely necessary to inform you of events already transpired.

In the first place, then, I, at this time, possessed a valet, the pink of valets, an Englishman,—and not the less valuable to me in a foreign capital, that, notwithstanding his long residence, he was utterly unable to speak one word of French intelligibly. Reading and writing it readily, his thick tongue could master scarcely a syllable. The adroitness and per-

fection with which he performed the duties of his place were unsurpassable. To a certain extent I was obliged to admit him into my confidence; I was not at all in his. In dexterity and dispatch he equalled the advertisements. He never condescended to don my cast-off apparel, but, disposing of it, always arrayed himself in plain but gentlemanly garments. These do not complete the list of Hay's capabilities. He speculated. Respectable tenements in London called him landlord; in the funds certain sums lay subject to his order; to a profitable farm in Hants he contemplated future retirement; and passing upon the Bourse, I have received a grave bow, and have left him in conversation with an eminent capitalist respecting consols, drafts, exchange, and other erudite mysteries, where I yet find myself in the A B C. Thus not only was my valet a free-born Briton, but a landed proprietor. If the Rothschilds blacked your boots or shaved your chin, your emotions might be akin to mine. When this man, who had an interest in the India traders, brought the hot water into my dressing-room, of a morning, the Antipodes were tributary to me; to what extent might any little irascibility of mine drive a depression in the market! and I knew, as he brushed my hat, whether stocks rose or fell. In one respect, I was essentially like our Saxon ancestors,—my servant was a villain. If I had been merely a civilian, in any purely private capacity, having leisure to attend to personal concerns in the midst of the delicate specialties intrusted to me from the cabinet at home, the possession of so inestimable a valet might have bullied me beyond endurance. As it was, I found it rather agreeable than otherwise. He was tacitly my secretary of finance.

Several years ago, a diamond of wonderful size and beauty, having wandered from the East, fell into certain imperial coffers among our Continental neighbors; and at the same time some extraordinary intelligence, essential to the existence, so to speak, of that government, reached a

person there who fixed as its price this diamond. After a while he obtained it, but, judging that prudence lay in departure, took it to England, where it was purchased for an enormous sum by the Duke of —, as he will remain an unknown quantity, let us say X. There are probably not a dozen such diamonds in the world,—certainly not three in England. It rejoiced in such flowery appellatives as the Sea of Splendor, the Moon of Milk; and, of course, those who had been scarcely better than jeweled out of it were determined to obtain it again at all hazards;—they were never famous for scrupulosity. The Duke of X. was aware of this, and, for a time, the gem had lain idle, its glory muffled in a casket; but finally, on some grand occasion, a few months prior to the period of which I have spoken above, it was determined to set it in the Duchess's coronet. Accordingly, one day, it was given by her son, the Marquis of G., into the hands of their solicitor, who should deliver it to her Grace's jeweller. It lay in a small shagreen case, and, before the Marquis left, the solicitor placed the case in a flat leathern box, where lay a chain of most singular workmanship, the clasp of which was deranged. This chain was very broad, of a style known as the brick-work, but every brick was a tiny gem, set in a delicate filigree linked with the next, and the whole rainbowed lustrousness moving at your will, like the scales of some gorgeous Egyptian serpent;—the solicitor was to take this also to the jeweller. Having laid the box in his private desk, Ulster, his confidential clerk, locked it, while he bowed the Marquis down. Returning immediately, the solicitor took the flat box and drove to the jeweller's. He found the latter so crowded with customers, it being the fashionable hour, as to be unable to attend to him; he, however, took the solicitor into his inner room, a dark fire-proof place, and there quickly deposited the box within a safe, which stood inside another, like a Japanese puzzle, and the solicitor, seeing the doors double-locked and secured, depart-

ed; the other promising to attend to the matter on the morrow.

Early the next morning, the jeweller entered his dark room, and proceeded to unlock the safe. This being concluded, and the inner one also thrown open, he found the box in a last and entirely, as he had always believed, secret compartment. Anxious to see this wonder, this Eye of Morning, and Heart of Day, he eagerly loosened the band and unclosed the box. It was empty. There was no chain there; the diamond was missing. The sweat streamed from his forehead, his clothes were saturated, he believed himself the victim of a delusion. Calling an assistant, every article and nook in the dark room was examined. At last, in an extremity of despair, he sent for the solicitor, who arrived in a breath. The jeweller's alarm hardly equalled that of the other. In his sudden dismay, he at first forgot the circumstances and dates relating to the affair; afterward was doubtful. The Marquis of G. was summoned, the police called in, the jeweller given into custody. Every breath the solicitor continued to draw only built up his ruin. He swallowed laudanum, but, by making it an overdose, frustrated his own design. He was assured, on his recovery, that no suspicion attached to him. The jeweller now asseverated that the diamond had never been given to him; but though this was strictly true, the jeweller had, nevertheless, committed perjury. Of course, whoever had the stone would not attempt to dispose of it at present, and, though communications were opened with the general European police, there was very little to work upon. But by means of this last step the former possessors became aware of its loss, and I make no doubt had their agents abroad immediately.

Meanwhile, the case hung here, complicated and tantalizing, when one morning I woke in London. No sooner had G. heard of my arrival than he called, and, relating the affair, requested my assistance. I confess myself to have been interested,—foolishly so, I thought after-

ward; but we all have our weaknesses, and diamonds were mine. In company with the Marquis, I waited upon the solicitor, who entered into the few details minutely, calling frequently upon Ulster, a young fresh-looking man, for corroboration. We then drove to the jeweller's new quarters, took him, under charge of the officers, to his place of business, where he nervously showed me every point that could bear upon the subject, and ended by exclaiming, that he was ruined, and all for a stone he had never seen. I sat quietly for a few moments. It stood, then, thus:—G. had given the thing to the solicitor, seen it put into the box, seen the box put into the desk; but while the confidential clerk, Ulster, locked the desk, the solicitor saw the Marquis to the door,—returning, took the box, without opening it again, to the jeweller, who, in the hurry, shut it up in his safe, also without opening it. The case was perfectly clear. These mysterious things are always so simple! You know now, as well as I, who took the diamond.

I did not choose to volunteer, but assented, on being desired. The police and I were old friends; they had so often assisted me, that I was not afraid to pay them in kind, and accordingly agreed to take charge of the case, still retaining their aid, should I require it. The jeweller was now restored to his occupation, although still subjected to a rigid surveillance, and I instituted inquiries into the recent movements of the young man Ulster. The case seemed to me to have been very blindly conducted. But, though all that was brought to light concerning him in London was perfectly fair and above-board, it was discovered that not long since he had visited Paris,—on the solicitor's business, of course, but gaining thereby an opportunity to transact any little affairs of his own. This was fortunate; for if any one could do anything in Paris, it was myself.

It is not often that I act as a detective. But one homogeneous to every situation could hardly play a pleasanter part for once. I have thought that our great mas-

ters in theory and practice, Machiavel and Talleyrand, were hardly more, on a large scale.

I was about to return to Paris, but resolved to call previously on the solicitor again. He welcomed me warmly, although my suspicions had not been imparted to him, and, with a more cheerful heart than had lately been habitual to him, entered into an animated conversation respecting the great case of *Biter v. Bit*, then absorbing so much of the public attention, frequently addressing Ulster, whose remarks were always pertinent, brief, and clear. As I sat actively discussing the topic, feeling no more interest in it than in the end of that cigar I just cut off, and noting exactly every look and motion of the unfortunate youth, I recollect the curious sentiment that filled me regarding him. What injury had he done me, that I should pursue him with punishment? Me? I am, and every individual is, integral with the commonwealth. It was the commonwealth he had injured. Yet, even then, why was I the one to administer justice? Why not continue with my coffee in the morning, my kings and cabinets and national chess at noon, my opera at night, and let the poor devil go? Why, but that justice is brought home to every member of society,—that naked duty requires no shirking of such responsibility,—that, had I failed here, the crime might, with reason, lie at my door and multiply, the criminal increase himself?

Very possibly you will not unite with me; but these little catechisms are, once in a while, indispensable, to vindicate one's course to one's self.

This Ulster was a handsome youth;—the rogues have generally all the good looks. There was nothing else remarkable about him but his quickness; he was perpetually on the alert; by constant activity, the rust was never allowed to collect on his faculties; his sharpness was distressing;—he appeared subject to a tense strain. Now his quill scratched over the paper unconcernedly, while he could join as easily in his master's conversation; noth-

ing seemed to preoccupy him, or he held a mind open at every point. It is pitiful to remember him that morning, sitting quiet, unconscious, as a tree, utterly in the hands of that morose Inquisition, the Metropolitan Police, with its countless arms, its cells and myrmidons in the remotest corners of the Continent, at the mercy of so merciless a monster, and momentarily closer involved, like some poor prey round which a spider spins its bewildering web. It was also curious to observe the sudden suspicion that darkened his face at some innocent remark,—the quick shrinking and intrenched retirement, the manifest sting and rancor, as I touched his wound with a swift flash of my slender weapon and sheathed it again, and, after the thrust, the espionage, and the relief at believing it accidental. He had many threads to gather up and hold;—little electric warnings along them must have been constantly shocking him. He did that part well enough; it was a mistake, to begin with; he needed prudence. At that time I owed this Ulster nothing; now, however, I owe him a grudge, for some of the most harassing hours of my life were occasioned me by him. But I shall not cherish enmity on that account. With so promising a beginning, he will graduate and take his degree from the loftiest altitude in his line. Hemp is a narcotic; let it bring me forgetfulness.

In Paris I found it not difficult to trace such a person, since he was both foreign and unaccustomed. It was ascertained that he had posted several letters. A person of his description had been seen to drop a letter, the superscription of which had been read by the one who picked it up for him. This superscription was the address of the very person who was likely to be the agent of the former possessors of the diamond, and had attracted attention. After all,—you know the Secret Force,—it was not so impossible to imagine what this letter contained, despite of its cipher. Such a person also had been met among the Jews, and at certain shops whose repu-

tation was not of the clearest. He had called once or twice on Mme. de St. Cyr, on business relative to a vineyard adjoining her château in the Gironde, which she had sold to a wine-merchant of England. I found a zest in the affair, as I pursued it.

We were now fairly at sea, but before long I found we were likely to remain there; in fact, nothing of consequence eventuated. I began to regret having taken the affair from the hands in which I had found it, and one day, it being a gala or some insatiable saint's day, I was riding, perplexed with that and other matters, and paying small attention to the passing crowd. I was vexed and mortified, and had fully decided to throw up the whole,—on such hairs do things hang,—when, suddenly turning a corner, my bridle-reins became entangled in the snaffle of another rider. I loosened them abstractedly, and not till it was necessary to bow to my strange antagonist, on parting, did I glance up. The person before me was evidently not accustomed to play the dandy; he wore his clothes ill, sat his horse worse, and was uneasy in the saddle. The unmistakable air of the *gamin* was apparent beneath the superfluities of the gentleman. Conspicuous on his costume, and wound like an order of merit upon his breast, glittered a chain, *the chain*,—each tiny brick-like gem spiked with a hundred sparks, and building a fabric of sturdy probabilities with the celerity of the genii in constructing Aladdin's palace. There, a cable to haul up the treasure, was the chain;—where was the diamond? I need not tell you how I followed this young friend, with what assiduity I kept him in sight, up and down, all day long, till, weary at last of his fine sport, as I certainly was of mine, he left his steed in stall and fared on his way a-foot. Still pursuing, now I threaded quay and square, street and alley, till he disappeared in a small shop, in one of those dark crowded lanes leading eastward from the Pont Neuf, in the city. It was the sign of a *marchand des armures*,

and, having provided myself with those persuasive arguments, a *sergent-de-ville* and a *gendarme*, I entered.

A place more characteristic it would be impossible to find. Here were piled bows of every material, ash, and horn, and tougher fibres, with slackened strings, and among them peered a rusty clarion and battle-axe, while the quivers that should have accompanied lay in a distant corner, their arrows serving to pin long, dusty, torn banners to the wall. Opposite the entrance, an archer in bronze hung on tiptoe, and levelled a steel bow, whose piercing *flèche* seemed sparkling with impatience to spring from his finger and flesh itself in the heart of the intruder. The hauberk and halberd, lance and casque, arquebuse and sword, were suspended in friendly congeries; and fragments of costly stuff swept from ceiling to floor, crushed and soiled by the heaps of rusty firelocks, cutlasses, and gauntlets thrown upon them. In one place, a little antique bust was half hid in the folds of some pennon, still dyed with battle-stains; in another, scattered treasures of Dresden and Sevres brought the drawing-room into the campaign; and all around bivouacked rifles, whose polished barrels glittered full of death,—pistols, variously mounted, for an insurgent at the barricades, or for a lost millionaire at the gaming-table,—foils, with buttoned bluntness,—and rapiers, whose even edges were viewless, as if filed into air. Destruction lay everywhere, at the command of the owner of this place, and, had he possessed a particle of vivacity, it would have been hazardous to bow beneath his doorway. It did not, I must say, look like a place where I should find a diamond. As the owner came forward, I determined on my plan of action.

"You have, Sir," I said, handing him a bit of paper, on which were scrawled some numbers, "a diamond in your possession, of such and so many carats, size, and value, belonging to the Duke of X., and left with you by an Englishman, Mr. Arthur Ulster. You will deliver it to me, if you please."

"Monsieur!" exclaimed the man, lifting his hands, and surveying me with the widest eyes I ever saw. "A diamond! In my possession! So immense a thing! It is impossible. I have not even seen one of the kind. It is a mistake. Jacques Noailles, the vender of jewels *en gros*, second door below, must be the man. One should perceive that my business is with arms, not diamonds. I have it not; it would ruin me."

Here he paused for a reply, but, meeting none, resumed. "M. Arthur Ulster! — I have heard of no such person. I never spoke with an Englishman. Bah! I detest them! I have no dealings with them. I repeat, I have not your jewel. Do you wish anything more of me?"

His vehemence only convinced me of the truth of my suspicions.

"These heroics are out of place," I answered. "I demand the article in question."

"Monsieur doubts me?" he asked, with a rueful face,— "questions my word, which is incontrovertible?" Here he clapped his hand upon a *couteau-de-chasse* lying near, but, appearing to think better of it, drew himself up, and, with a shower of nods flung at me, added, "I deny your accusation!" I had not accused him.

"You are at too much pains to convict yourself. I charge you with nothing," I said. "But this diamond must be surrendered."

"Monsieur is mad!" he exclaimed, "mad! he dreams! Do I look like one who possesses such a trophy? Does my shop resemble a mine? Look about! See! All that is here would not bring a hundredth part of its price. I beseech Monsieur to believe me; he has mistaken the number, or has been misinformed."

"We waste words. I know this diamond is here, as well as a costly chain"—

"On my soul, on my life, on my honor," he cried, clasping his hands and turning up his eyes, "there is here nothing of the kind. I do not deal in gems. A little silk, a few weapons, a curiosity, a

nicknack, comprise my stock. I have not the diamond. I do not know the thing. I am poor. I am honest. Suspicion destroys me!"

"As you will find, should I be longer troubled by your denials."

He was inflexible, and, having exhausted every artifice of innocence, wiped the tears from his eyes, — oh, these French! life is their theatre, — and remained quiet. It was getting dark. There was no gas in the place; but in the pause a distant street-lamp swung its light dimly round.

"Unless one desires to purchase, allow me to say that it is my hour for closing," he remarked, blandly, rubbing his black-bearded chin.

"My time is valuable," I returned. "It is late and dark. When your shop-boy lights up" —

"Pardon, — we do not light."

"Permit me, then, to perform that office for you. In this blaze you may perceive my companions, whom you have not appeared to recognize."

So saying, I scratched a match upon the floor, and, as the *sergent-de-ville* and the *gendarme* advanced, threw the light of the blue spirt of sulphurous flame upon them. In a moment more the match went out, and we remained in the demitwilight of the distant lantern. The *marchand des armures* stood petrified and aghast. Had he seen the imps of Satan in that instant, it could have had no greater effect.

"You have seen them?" I asked. "I regret to inconvenience you; but unless this diamond is produced at once, my friends will put their seal on your goods, your property will be confiscated, yourself in a dungeon. In other words, I allow you five minutes; at the close of that time you will have chosen between restitution and ruin."

He remained apparently lost in thought. He was a big, stout man, and with one blow of his powerful fist could easily have settled me. It was the last thing in his mind. At length he lifted his head, — "Rosalie!" he called.

At the word, a light foot pattered along

a stone floor within, and in a moment a little woman stood in an arch raised by two steps from our own level. Carrying a candle, she descended and tripped toward him. She was not pretty, but sprightly and keen, as the perpetual attrition of life must needs make her, and wore the everlasting grisette costume, which displays the neatest of ankles, and whose cap is more becoming than wreaths of garden millinery. I am too minute, I see, but it is second nature. The two commenced a vigorous whispering amid sundry gestures and glances. Suddenly the woman turned, and, laying the prettiest of little hands on my sleeve, said, with a winning smile, —

"Is it a crime of *lèse-majesté*?"

This was a new idea, but might be useful.

"Not yet," I said; "two minutes more, and I will not answer for the consequence."

Other whispers ensued.

"Monsieur," said the man, leaning on one arm over the counter, and looking up in my face, with the most engaging frankness, — "it is true that I have such a diamond; but it is not mine. It is left with me to be delivered to the Baron Stahl, who comes as an agent from his court for its purchase."

"Yes, — I know."

"He was to have paid me half a million francs, — not half its worth, — in trust for the person who left it, who is not M. Arthur Ulster, but Mme. de St. Cyr."

Madame de St. Cyr! How under the sun — No, — it could not be possible. The case stood as it stood before. The rogue was in deeper water than I had thought; he had merely employed Mme. de St. Cyr. I ran this over in my mind, while I said, "Yes."

"Now, Sir," I continued, "you will state the terms of this transaction."

"With pleasure. For my trouble I was myself to receive patronage and five thousand francs. The Baron is to be here directly, on other and public business. *Reine du ciel*, Monsieur! how shall I meet him?"

"He is powerless in Paris; your fear is idle."

"True. There were no other terms."

"Nor papers?"

"The lady thought it safest to be without them. She took merely my receipt, which the Baron Stahl will bring to me from her before receiving this."

"I will trouble you for it now."

He bowed and shuffled away. At a glance from me, the *gendarme* slipped to the rear of the building, where three others were stationed at the two exits in that direction, to caution them of the critical moment, and returned. Ten minutes passed,—the merchant did not appear. If, after all, he had made off with it! There had been the click of a bolt, the half-stifled rattle of arms, as if a door had been opened and rapidly closed again, but nothing more.

"I will see what detains my friend," said Mademoiselle, the little woman.

We suffered her to withdraw. In a moment more a quick expostulation was to be heard.

"They are there, the *gendarmes*, my little one! I should have run, but they caught me, the villains! and replaced me in the house. *Oh, sacre!*"—and rolling this word between his teeth, he came down and laid a little box on the counter. I opened it. There was within a large, glittering, curiously-cut piece of glass. I threw it aside.

"The diamond!" I exclaimed.

"Monsieur had it," he replied, stooping to pick up the glass with every appearance of surprise and care.

"Do you mean to say you endeavored to escape with that bawble? Produce the diamond instantly, or you shall hang as high as Haman!" I roared.

Whether he knew the individual in question or not, the threat was efficient; he trembled and hesitated, and finally drew the identical shagreen case from his bosom.

"I but jested," he said. "Monsieur will witness that I relinquish it with reluctance."

"I will witness that you receive stolen goods!" I cried, in wrath.

He placed it in my hands.

"Oh!" he groaned, from the bottom of his heart, hanging his head, and laying both hands on the counter before him,—“it pains, it grieves me to part with it!”

"And the chain," I said.

"Monsieur did not demand that!"

"I demand it now."

In a moment, the chain also was given me.

"And now will Monsieur do me a favor? Will he inform me by what means he ascertained these facts?"

I glanced at the *garçon*, who had probably supplied himself with his master's finery illicitly;—he was the means;—we have some generosity;—I thought I should prefer doing him the favor, and declined.

I unclasped the shagreen case; the *sergent-de-ville* and the *gendarme* stole up and looked over my shoulder; the *garçon* drew near with round eyes; the little woman peeped across; the merchant, with tears streaming over his face, gazed as if it had been a loadstone; finally, I looked myself. There it lay, the glowing, resplendent thing! flashing in affluence of splendor, throbbing and palpitant with life, drawing all the light from the little woman's candle, from the sparkling armor around, from the steel barbs, and the distant lantern, into its bosom. It was scarcely so large as I had expected to see it, but more brilliant than anything I could conceive of. I do not believe there is another such in the world. One saw clearly that the Oriental superstition of the sex of stones was no fable; this was essentially the female of diamonds, the queen herself, the principle of life, the rejoicing creative force. It was not radiant, as the term literally taken implies; it seemed rather to retain its wealth,—instead of emitting its glorious rays, to curl them back like the fringe of a madrepore, and lie there with redoubled quivering scintillations, a mass of white magnificence, not prismatic, but a vast milky lustre. I closed the case; on reopening it, I could scarcely believe that

the beautiful sleepless eye would again flash upon me. I did not comprehend how it could afford such perpetual richness, such sheets of lustre.

At last we compelled ourselves to be satisfied. I left the shop, dismissed my attendants, and, fresh from the contemplation of this miracle, again trod the dirty, reeking streets, crossed the bridge, with its lights, its warehouses midway, its living torrents who poured on unconscious of the beauty within their reach. The thought of their ignorance of the treasure, not a dozen yards distant, has often made me question if we all are not equally unaware of other and greater processes of life, of more perfect, sublimed, and, as it were, spiritual crystallizations going on invisibly about us. But had these been told of the thing clutched in the hand of a passer, how many of them would have known where to turn? and we,—are we any better?

II.

For a few days I carried the diamond about my person, and did not mention its recovery even to my valet, who knew that I sought it, but communicated only with the Marquis of G., who replied, that he would be in Paris on a certain day, when I could safely deliver it to him.

It was now generally rumored that the neighboring government was about to send us the Baron Stahl, ambassador concerning arrangements for a loan to maintain the sinking monarchy in supremacy at Paris, the usual synechdoche for France.

The weather being fine, I proceeded to call on Mme. de St. Cyr. She received me in her boudoir, and on my way thither I could not but observe the perfect quiet and cloistered seclusion that pervaded the whole house,—the house itself seeming only an adjunct of the still and sunny garden, of which one caught a glimpse through the long open hall-windows beyond. This boudoir did not differ from others to which I have been

admitted: the same delicate shades; all the dainty appliances of Art for beauty; the lavish profusion of *bijouterie*; and the usual statuettes of innocence, to indicate, perhaps, the presence of that commodity which might not be guessed at otherwise; and burning in a silver cup, a rich perfume loaded the air with voluptuous sweetness. Through a half-open door an inner boudoir was to be seen, which must have been Delphine's; it looked like her; the prevailing hue was a soft purple, or gray; a *prie-dieu*, a book-shelf, and desk, of a dark West Indian wood, were just visible. There was but one picture,—a sad-eyed, beautiful Fate. It was the type of her nation. I think she worshipped it. And how apt is misfortune to degenerate into Fate!—not that the girl had ever experienced the former, but, dissatisfied with life, and seeing no outlet, she accepted it stoically and waited till it should be over. She needed to be aroused;—the station of an *ambassadrice*, which I desired for her, might kindle the spark. There were no flowers, no perfumes, no busts, in this ascetic place. Delphine herself, in some faint rosy gauze, her fair hair streaming round her, as she lay on a white-draped couch, half-risen on one arm, while she read the morning's *feuilleton*, was the most perfect statuary of which a room could boast,—illuminated, as I saw her, by the gay beams that entered at the loftily-arched window, broken only by the flickering of the vine-leaves that clustered the curiously-latticed panes without. She resembled in kind a Nymph or Aphrodite just bursting from the sea.

Madame de St. Cyr received me with *empressement*, and, so doing, closed the door of this shrine. We spoke of various things,—of the court, the theatre, the weather, the world,—skating lightly round the slender edges of her secret, till finally she invited me to lunch with her in the garden. Here, on a rustic table, stood wine and a few delicacies,—while, by extending a hand, we could grasp the hanging pears and nectarines, still warm to the lip and luscious with sunshine, as

we disputed possession with the envious wasp who had established a priority of claim.

"It is to be hoped," I said, sipping the *Haut-Brion*, whose fine and brittle smack contrasted rarely with the delicious juiciness of the fruit, "that you have laid in a supply of this treasure that neither moth nor rust doth corrupt, before parting with that little gem in the Gironde."

"Ah? You know, then, that I have sold it?"

"Yes," I replied. "I have the pleasure of Mr. Ulster's acquaintance."

"He arranged the terms for me," she said, with restraint,—adding, "I could almost wish now that it had not been."

This was probably true; for the sum which she hoped to receive from Ulster for standing sponsor to his jewel was possibly equal to the price of her vineyard.

"It was indispensable at the time, this sale; I thought best to hazard it on one more season.—If, after such advantages, Delphine will not marry, why—it remains to retire into the country and end our days with the barbarians!" she continued, shrugging her shoulders; "I have a house there."

"But you will not be obliged to throw us all into despair by such a step now," I replied.

She looked quickly, as if to see how nearly I had approached her citadel,—then, finding in my face no expression but a complimentary one, "No," she said, "I hope that my affairs have brightened a little. One never knows what is in store."

Before long I had assured myself that Mme. de St. Cyr was not a party to the theft, but had merely been hired by Ulster, who, discovering the state of her affairs, had not, therefore, revealed his own,—and this without in the least implying any knowledge on my part of the transaction. Ulster must have seen the necessity of leaving the business in the hands of a competent person, and Mme. de St. Cyr's financial talent was patent. There were few ladies in Paris who would

have rejected the opportunity. Of these things I felt a tolerable certainty.

"We throng with foreigners," said Madame, archly, as I reached this point. "Diplomates, too. The Baron Stahl arrives in a day."

"I have heard," I responded. "You are acquainted?"

"Alas! no," she said. "I knew his father well, though he himself is not young. Indeed, the families thought once of intermarriage. But nothing has been said on the subject for many years. His Excellency, I hear, will strengthen himself at home by an alliance with the young Countess, the natural daughter of the Emperor."

"He surely will never be so imprudent as to rivet his chain by such a link!"

"It is impossible to compute the dice in those despotic countries," she rejoined,—"which was pretty well, considering the freedom enjoyed by France at that period."

"It may be," I suggested, "that the Baron hopes to open this delicate subject with you himself, Madame."

"It is unlikely," she said, sighing. "And for Delphine, should I tell her his Excellency preferred scarlet, she would infallibly wear blue. Imagine her, Monsieur, in fine scarlet, with a scarf of gold gauze, and rustling grasses in that unruly gold hair of hers! She would be divine!"

The maternal instinct as we have it here at Paris confounds me. I do not comprehend it. Here was a mother who did not particularly love her child, who would not be inconsolable at her loss, would not ruin her own complexion by care of her during illness, would send her through fire and water and every torture to secure or maintain a desirable rank, who yet would entangle herself deeply in intrigue, would not hesitate to tarnish her own reputation, and would, in fact, raise heaven and earth to—endow this child with a brilliant match. And Mme. de St. Cyr seemed to regard Delphine, still further, as a cool matter of fact.

These little confidences, moreover, are

provoking. They put you yourself so entirely out of the question.

"Mlle. de St. Cyr's beauty is peerless," I said, slightly chagrined, and at a loss. "If hearts were trumps, instead of diamonds!"

"We are poor," resumed Madame, pathetically. "Delphine is not an heirless. Delphine is proud. She will not stoop to charm. Her coquetry is that of an Amazon. Her kisses are arrows. She is Medusa!" And Madame, her mother, shivered.

Here, with her hair knotted up and secured by a tiny dagger, her gauzy drapery gathered in her arm, Delphine floated down the green alley toward us, as if in a rosy cloud. But this soft aspect never could have been more widely contradicted than by the stony repose and cutting calm of her beautiful face.

"The Marquis of G.," said her mother, "he also arrives ambassador. Has he talent? Is he brilliant? Wealthy, of course,—but *gauche*?"

Therewith I sketched for them the Marquis and his surroundings.

"It is charming," said Madame. "Delphine, do you attend?"

"And why?" asked Delphine, half concealing a yawn with her dazzling hand. "It is wearisome; it matters not to me."

"But he will not go to marry himself in France," said her mother. "Oh, these English," she added, with a laugh, "yourself, Monsieur, being proof of it, will not mingle blood, lest the Channel should still flow between the little red globules! You will go? but to return shortly? You will dine with me soon? *Au revoir!*" and she gave me her hand graciously, while Delphine bowed as if I were already gone, threw herself into a garden-chair, and commenced pouring the wine on a stone for a little tame snake which came out and lapped it.

Such women as Mme. de St. Cyr have a species of magnetism about them. It is difficult to retain one's self-respect before them,—for no other reason than that one is, at the moment, absorbed into

their individuality, and thinks and acts with them. Delphine must have had a strong will, and perpetual antagonism did not weaken it. As for me, Madame had, doubtless, reasons of her own for tearing aside these customary bands of reserve,—reasons which, if you do not perceive, I shall not enumerate.

"Have you met with anything further in your search, Sir?" asked my valet, next morning.

"Oh, yes, Hay," I returned, in a very good humor,—“with great success. You have assisted me so much, that I am sure I owe it to you to say that I have found the diamond.”

"Indeed, Sir, you are very kind. I have been interested, but my assistance is not worth mentioning. I thought likely it might be, you appeared so quiet."—The cunning dog!—"How did you find it, Sir, may I ask?"

I briefly related the leading facts, since he had been aware of the progress of the case to that point,—without, however, mentioning Mme. de St. Cyr's name.

"And Monsieur did not inform me!" a French valet would have cried.

"You were prudent not to mention it, Sir," said Hay. "These walls must have better ears than ordinary; for a family has moved in on the first floor recently, whose actions are extremely suspicious. But is this precious affair to be seen?"

I took it from an inner pocket and displayed it, having discarded the shagreen case as inconvenient.

"His Excellency must return as he came," said I.

Hay's eyes sparkled.

"And do you carry it there, Sir?" he asked, with surprise, as I restored it to my waistcoat-pocket.

"I shall take it to the bank," I said. "I do not like the responsibility."

"It is very unsafe," was the warning of this cautious fellow. "Why, Sir! any of these swells, these pickpockets, might meet you, run against you,—so!" said Hay, suiting the action to the word, "and, with the little sharp knife conceal-

ed in just such a ring as this I wear, give a light tap, and there's a slit in your vest, Sir, but no diamond!"—and instantly resuming his former respectful deportment, Hay handed me my gloves and stick, and smoothed my hat.

"Nonsense!" I replied, drawing on the gloves, "I should like to see the man who could be too quick for me. Any news from India, Hay?"

"None of consequence, Sir. The indigo crop is said to have failed, which advances the figure of that on hand, so that one or two fortunes will be made to-day. Your hat, Sir?—your lunettes? Here they are, Sir."

"Good morning, Hay."

"Good morning, Sir."

I descended the stairs, buttoning my gloves, paused a moment at the door to look about, and proceeded down the street, which was not more than usually thronged. At the bank I paused to assure myself that the diamond was safe. My fingers caught in a singular slit. I started. As Hay had prophesied, there was a fine longitudinal cut in my waistcoat, but the pocket was empty. My God! the thing was gone. I never can forget the blank nihility of all existence that dreadful moment when I stood fumbling for what was not. Calm as I sit here and tell of it, I vow to you a shiver courses through me at the very thought. I had circumvented Stahl only to destroy myself. The diamond was lost again. My mind flew like lightning over every chance, and a thousand started up like steel spikes to snatch the bolt. For a moment I was stunned, but, never being very subject to despair, on my recovery, which was almost at once, took every measure that could be devised. Who had touched me? Whom had I met? Through what streets had I come? In ten minutes the Prefect had the matter in hand. My injunctions were strict privacy. I sincerely hoped the mishap would not reach England; and if the diamond were not recovered before the Marquis of G. arrived,—why, there was the Seine. It is all very well to talk,—yet suicide is

so French an affair, that an Englishman does not take to it naturally, and, except in November, the Seine is too cold and damp for comfort, but during that month I suppose it does not greatly differ in these respects from our own atmosphere.

A preternatural activity now possessed me. I slept none, ate little, worked immoderately. I spared no efforts, for everything was at stake. In the midst of all G. arrived. Hay also exerted himself to the utmost; I promised him a hundred pounds, if I found it. He never told me that he said how it would be, never intruded the state of the market, never resented my irritating conduct, but watched me with narrow yet kind solicitude, and frequently offered valuable suggestions, which, however, as everything else did, led to nothing. I did not call on G., but in a week or so his card was brought up one morning to me. "Deny me," I groaned. It yet wanted a week of the day on which I had promised to deliver him the diamond. Meanwhile the Baron Stahl had reached Paris, but he still remained in private,—few had seen him.

The police were forever on the wrong track. To-day they stopped the old Comtesse du Quesne and her jewels, at the Barrière; to-morrow, with their long needles, they riddled a package of lace destined for the Duchess of X. herself; the Secret Service was doubled; and to crown all, a splendid new star of the testy Prince de Ligne was examined and proclaimed to be paste,—the Prince swearing vengeance, if he could discover the cause,—while half Paris must have been under arrest. My own hotel was ransacked thoroughly,—Hay begging that his traps might be included,—but nothing resulted, and I expected nothing, for, of course, I could swear that the stone was in my pocket when I stepped into the street. I confess I never was nearer madness,—every word and gesture stung me like asps,—I walked on burning coals. Enduring all this torment, I must yet meet my daily comrades, eat ices at Tortoni's, stroll on the Boulevards, call on

my acquaintance, with the same equanimity as before. I believe I was equal to it. Only by contrast with that blessed time when Ulster and diamonds were unknown, could I imagine my past happiness, my present wretchedness. Rather than suffer it again, I would be stretched on the rack till every bone in my skin was broken. I cursed Mr. Arthur Ulster every hour in the day; myself, as well; and even now the word diamond sends a cold blast to my heart. I often met my friend the *marchand des armures*. It was his turn to triumph; I fancied there must be a hang-dog kind of air about me, as about every sharp man who has been outwitted. It wanted finally but two days of that on which I was to deliver the diamond.

One midnight, armed with a dark lantern and a cloak, I was traversing the streets alone, — unsuccessful, as usual, just now solitary, and almost in despair. As I turned a corner, two men were but scarcely visible a step before me. It was a badly-lighted part of the town. Unseen and noiseless I followed. They spoke in low tones, — almost whispers; or rather, one spoke, — the other seemed to nod assent.

"On the day but one after to-morrow," I heard spoken in English. Great Heavens! was it possible? had I arrived at a clue? That was the day of days for me. "You have given it, you say, in this billet, — I wish to be exact, you see," continued the voice, — "to prevent detection, you gave it, ten minutes after it came into your hands, to the butler of Madame —," (here the speaker stumbled on the rough pavement, and I lost the name,) "who," he continued, "will put it in the —" (a second stumble acted like a hiccup) "cellar."

"Wine-cellar," I thought; "and what then?"

"In the —." A third stumble was followed by a round German oath. How easy it is for me now to fill up the little blanks which that unhappy pavement caused!

"You share your receipts with this

butler. On the day I obtain it," he added, and I now perceived his foreign accent, "I hand you one hundred thousand francs; afterward, monthly payments till you have received the stipulated sum. But how will this butler know me, in season to prevent a mistake? Hem! — he might give it to the other!"

My hearing had been trained to such a degree that I would have promised to overhear any given dialogue of the spirits themselves, but the whisper that answered him eluded me. I caught nothing but a faint sibillation. "Your ring?" was the rejoinder. "He shall be instructed to recognize it? Very well. It is too large, — no, that will do, it fits the first finger. There is nothing more. I am under infinite obligations, Sir; they shall be remembered. Adieu!"

The two parted; which should I pursue? In desperation I turned my lantern upon one, and illumined a face fresh with color, whose black eyes sparkled askance after the retreating figure, under straight black brows. In a moment more he was lost in a false *cul-de-sac*, and I found it impossible to trace the other.

I was scarcely better off than before; but it seemed to me that I had obtained something, and that now it was wisest to work this vein. "The butler of Madame —." There were hundreds of thousands of Madames in town. I might call on all, and be as old as the Wandering Jew at the last call. The cellar. Wine-cellar, of course, — that came by a natural connection with butler, — but whose? There was one under my own abode; certainly I would explore it. Meanwhile, let us see the entertainments for Wednesday. The Prefect had a list of these. For some I found I had cards; I determined to allot a fraction of time to as many as possible; my friends in the Secret Service would divide the labor. Among others, Madame de St. Cyr gave a dinner, and, as she had been in the affair, I determined not to neglect her on this occasion, although having no definite idea of what had been, or plan of what should be done. I decided not to speak of this oc-

currence to Hay, since it might only bring him off some trail that he had struck.

Having been provided with keys, early on the following evening I entered the wine-cellar, and, concealed in an empty cask that would have held a dozen of me, waited for something to turn up. Really, when I think of myself, a diplomat, a courtier, a man-about-town, curled in a dusty, musty wine-barrel, I am moved with vexation and laughter. Nothing, however, turned up,—and at length I retired, baffled. The next night came,—no news, no identification of my black-browed man, no success; but I felt certain that something must transpire in that cellar. I don't know why I had pitched upon that one in particular, but, at an earlier hour than on the previous night, I again donned the cask. A long time must have elapsed; dead silence filled the spacious vaults, except where now and then some Sillery cracked the air with a quick explosion, or some newer wine bubbled round the bung of its barrel with a faint effervescence. I had no intention of leaving this place till morning, but it suddenly appeared like the most woful waste of time. The master of this tremendous affair should be abroad and active; who knew what his keen eyes might detect, what loss his absence might occasion in this nick of time? And here he was, shut up and locked in a wine-cellar! I began to be very nervous; I had already, with aid, searched every crevice of the cellar; and now I thought it would be some consolation to discover the thief, if I never regained the diamond. A distant clock tolled midnight. There was a faint noise,—a mouse?—no, it was too prolonged;—nor did it sound like the fiz of Champagne;—a great iron door was turning on its hinges; a man with a lantern was entering; another followed, and another. They seated themselves. In a few moments, appearing one by one and at intervals, some thirty people were in the cellar. Were they all to share in the proceeds of the diamond? With what jaundiced eyes we beheld things! I my-

self saw all that was only through the lens of this diamond, of which not one of these men had ever heard. As the lantern threw its feeble glimmer on this group, and I surveyed them through my loophole, I thought I had never seen so wild and savage a picture, such enormous shadows, such bold outline, such a startling flash on the face of their leader, such light retreating up the threatening arches. More resolute brows, more determined words, more unshrinking hearts, I had not met. In fact, I found myself in the centre of a conspiracy, a society as vindictive as the Jacobins, as unknown and terrible as the Marianne of to-day. I was thunderstruck, too, at the countenances on which the light fell,—men the loyalest in estimation, ministers and senators, millionnaires who had no reason for discontent, dandies whose reason was supposed to be devoted to their tailors, poets and artists of generous aspiration and suspected tendencies, and one woman,—Delphine de St. Cyr. Their plans were brave, their determination lofty, their conclave serious and fine; yet as slowly they shut up their hopes and fears in the black masks, one man bent toward the lantern to adjust his. When he lifted his face before concealing it, I recognized him also. I had met him frequently at the Bureau of Police; he was, I believe, Secretary of the Secret Service.

I had no sympathy with these people. I had liberty enough myself, I was well enough satisfied with the world, I did not care to revolutionize France; but my heart rebelled at the mockery, as this traitor and spy, this creature of a system by which I gained my fame, showed his revolting face and veiled it again. And Delphine, what had she to do with them? One by one, as they entered, they withdrew, and I was left alone again. But all this was not my diamond.

Another hour elapsed. Again the door opened, and remained ajar. Some one entered, whom I could not see. There was a pause,—then a rustle,—the door creaked ever so little. "Art thou there?"

lisp'd a shrill whisper,—a woman, as I could guess.

"My angel, it is I," was returned, a semitone lower. She approached, he advanced, and the consequence was a salute resonant as the smack with which a Dutch burgomaster may be supposed to set down his mug.* I was prepared for anything. Ye gods! if it should be Delphine! But the base suspicion was birth-strangled as they spoke again. The conversation which now ensued between these lovers under difficulties was tender and affecting beyond expression. I had felt guilty enough when an unwilling auditor of the conspirators,—since, though one employs spies, one does not therefore act that part one's-self, but on emergencies,—an unwillingness which would not, however, prevent my turning to advantage the information gained; but here, to listen to this rehearsal of woes and blisses, this *ah mon Fernand*, this aria in an area, growing momentarily more fervent, was too much. I overturned the cask, scrambled upon my feet, and fled from the cellar, leaving the astounded lovers to follow, while, agreeably to my instincts, and regardless of the diamond, I escaped the embarrassing predicament.

At length it grew to be noon of the appointed day. Nothing had transpired; all our labor was idle. I felt, nevertheless, more buoyant than usual,—whether because I was now to put my fate to the test, or that to-day was the one of which my black-browed man had spoken, and I therefore entertained a presentiment of good-fortune, I cannot say. But when, in unexceptionable toilet, I stood on Mme. de St. Cyr's steps, my heart sunk. G. was doubtless already within, and I thought of the *marchand des armures'* exclamation, "Queen of Heaven, Monsieur! how shall I meet him!" I was plunged at once into the profoundest gloom. Why had I undertaken the business at all? This interference, this good-humor, this readiness to oblige,—it would ruin me yet! I forswore it, as Falstaff forswore honor. Why needed I to meddle in the *mêlée*? Why—— But I was

no catechumen. Questions were useless now. My emotions are not chronicled on my face, I flatter myself; and with my usual repose I saluted our hostess. Greeting G. without any allusion to the diamond, the absence of which allusion he received as a point of etiquette, I was conversing with Mrs. Leigh, when the Baron Stahl was announced. I turned to look at his Excellency. A glance electrified me. There was my dark-browed man of the midnight streets. It must, then, have been concerning the diamond that I had heard him speak. His countenance, his eager, glittering eye, told that to-day was as eventful to him as to me. If he were here, I could well afford to be. As he addressed me in English, my certainty was confirmed; and the instant in which I observed the ring, gaudy and coarse, upon his finger, made confirmation doubly sure. I own I was surprised that anything could induce the Baron to wear such an ornament. Here he was actually risking his reputation as a man of taste, as an exquisite, a leader of *haut ton*, a gentleman, by the detestable vulgarity of this ring. But why do I speak so of the trinket? Do I not owe it a thrill of as fine joy as I ever knew? Faith! it was not unfamiliar to me. It had been a daily sight for years. In meeting the Baron Stahl I had found the diamond.

The Baron Stahl was, then, the thief? Not at all. My valet, as of course you have been all along aware, was the thief.

The Marquis of G. took down Mme. de St. Cyr; Stahl preceded me, with Delphine. As we sat at table, G. was at the right, I at the left of our hostess. Next G. sat Delphine; below her, the Baron; so that we were nearly *vis-a-vis*. I was now as fully convinced that Mme. de St. Cyr's cellar was the one, as the day before I had been that the other was; I longed to reach it. Hay had given the stone to a butler—doubtless this—the moment of its theft; but, not being aware of Mme. de St. Cyr's previous share in the adventure, had probably not afforded her another. And thus I con-

cluded her to be ignorant of the game we were about to play; and I imagined, with the interest that one carries into a romance, the little preliminary scene between the Baron and Madame that must have already taken place, being charmed by the cheerfulness with which she endured the loss of the promised reward.

As the Baron entered the dining-room, I saw him withdraw his glove, and move the jewelled hand across his hair while passing the solemn butler, who gave it a quick recognition;—the next moment we were seated. It was a dinner *à la Russe*; that is, only wines were on the table, clustered around a central ornament,—a bunch of tall silver rushes and flag-leaves, on whose airy tip danced *fleurs-de-lis* of frosted silver, a design of Delphine's,—the dishes being on side-tables, from which the guests were served as they signified their choice of the variety on their cards. Our number not being large, and the custom so informal, rendered it pleasant.

I had just finished my oysters and was pouring out a glass of Chablis, when another plate was set before the Baron.

"His Excellency has no salt," murmured the butler,—at the same time placing one beside him. A glance, at entrance, had taught me that most of the service was uniform; this dainty little *salière* I had noticed on the buffet, solitary, and unlike the others. What a fool had I been! Those gaps in the Baron's remarks caused by the paving-stones, how easily were they to be supplied!

"Madame?"

Madame de St. Cyr.

"The cellar?"

A salt-cellar.

How quick the flash that enlightened me while I surveyed the *salière*!

"It is exquisite! Am I never to sit at your table but some new device charms me?" I exclaimed. "Is it your design, Mademoiselle?" I said, turning to Delphine.

Delphine, who had been ice to all the Baron's advances, only curled her lip. "*Des babioles!*" she said.

"Yes, indeed," cried Mme. de St. Cyr, extending her hand for it. "But none the less her taste. Is it not a fairy thing? A *Cellini*! Observe this curve, these lines! but one man could have drawn them!"—and she held it for our scrutiny. It was a tiny hand and arm of ivory, parting the foam of a wave and holding a golden shell, in which the salt seemed to have crusted itself as if in some secretest ocean-hollow. I looked at the Baron a moment; his eyes were fastened upon the *salière*, and all the color had forsaken his cheeks,—his face counted his years. The diamond was in that little shell. But how to obtain it? I had no novice to deal with; nothing but delicate *finesse* would answer.

"Permit me to examine it," I said. She passed it to her left hand for me to take. The butler made a step forward.

"Meanwhile, Madame," said the Baron, smiling, "I have no salt."

The instinct of hospitality prevailed;—she was about to return it. Might I do an awkward thing? Unhesitatingly. Reversing my glass, I gave my arm a wider sweep than necessary, and, as it met her hand with violence, the *salière* fell. Before it touched the floor I caught it. There was still a pinch of salt left,—nothing more.

"A thousand pardons!" I said, and restored it to the Baron.

His Excellency beheld it with dismay; it was rare to see him bend over and scrutinize it with starting eyes.

"Do you find there what Count Arnaldos begs in the song," asked Delphine,—"*the secret of the sea, Monsieur?*"

He handed it to the butler, observing, "I find here no"—

"Salt, Monsieur?" replied the man, who did not doubt but all had gone right, and replenished it.

Had one told me in the morning that no intricate manœuvres, but a simple blunder, would effect this, I might have met him in the Bois de Boulogne.

"We will not quarrel," said my neigh-

bor, lightly, with reference to the popular superstition.

"Rather propitiate the offended deities by a crumb tossed over the shoulder," added I.

"Over the left?" asked the Baron, to intimate his knowledge of another idiom, together with a reproof for my *gaucherie*.

"À gauche,—quelquefois c'est justement à droit," I replied.

"Salt in any pottage," said Madame, a little unasily, "is like surprise in an individual; it brings out the flavor of every ingredient, so my cook tells me."

"It is a preventive of palsy," I remarked, as the slight trembling of my adversary's finger caught my eye.

"And I have noticed that a taste for it is peculiar to those who trace their blood to Galitzin," continued Madame.

"Let us, therefore, elect a deputation to those mines near Cracow," said Delphine.

"To our cousins, the slaves there?" laughed her mother.

"I must vote to lay your bill on the table, Mademoiselle," I rejoined.

"But with a *boule blanche*, Monsieur?"

"As the salt has been laid on the floor," said the Baron.

Meanwhile, as this light skirmishing proceeded, my sleeve and Mme. de St. Cyr's dress were slightly powdered, but I had not seen the diamond. The Baron, bolder than I, looked under the table, but made no discovery. I was on the point of dropping my napkin to accomplish a similar movement, when my accommodating neighbor dropped hers. To restore it, I stooped. There it lay, large and glowing, the Sea of Splendor, the Moon of Milk, the Torment of my Life, on the carpet, within half an inch of a lady's slipper. Mademoiselle de St. Cyr's foot had prevented the Baron from seeing it; now it moved and unconsciously covered it. All was as I wished. I hastily restored the napkin, and looked steadily at Delphine, — so steadily, that she perceived some meaning, as she had already suspected a game.

By my sign she understood me, pressed her foot upon the stone and drew it nearer. In France we do not remain at table until unfit for a lady's society,—we rise with them. Delphine needed to drop neither napkin nor handkerchief; she composedly stooped and picked up the stone, so quickly that no one saw what it was.

"And the diamond?" said the Baron to the butler, rapidly, as he passed.

"It was in the *salière*!" whispered the astonished creature.

In the drawing-room I sought the Marquis.

"To-day I was to surrender you your property," I said; "it is here."

"Do you know," he replied, "I thought I must have been mistaken?"

"Any of our volatile friends here might have been," I resumed; "for us it is impossible. Concerning this, when you return to France, I will relate the incidents; at present, there are those who will not hesitate to take life to obtain its possession. The *diligence* leaves in twenty minutes; and if I owned the diamond, it should not leave me behind. Moreover, who knows what a day may bring forth? To-morrow there may be an *émeute*. Let me restore the thing as you withdraw."

The Marquis, who is not, after all, the Lion of England, pausing a moment to transmit my words from his ear to his brain, did not afterward delay to make inquiries or adieux, but went to seek Mme. de St. Cyr and wish her good-night, on his departure from Paris. As I awaited his return, which I knew would not be immediate, Delphine left the Baron and joined me.

"You beckoned me?" she asked.

"No, I did not."

"Nevertheless, I come by your desire, I am sure."

"Mademoiselle," I said, "I am not in the custom of doing favors; I have forsworn them. But before you return me my jewel, I risk my head and render one last one, and to you."

"Do not, Monsieur, at such price,"

she responded, with a slight mocking motion of her hand.

"Delphine! those resolves, last night, in the cellar, were daring; they were noble, yet they were useless."

She had not started, but a slight tremor ran over her person and vanished while I spoke.

"They will be allowed to proceed no farther,—the axe is sharpened; for the last man who adjusted his mask was a spy,—was the Secretary of the Secret Service."

Delphine could not have grown paler than was usual with her of late. She flashed her eye upon me.

"He was, it may be, Monsieur himself," she said.

"I do not claim the honor of that post."

"But you were there, nevertheless,—a spy!"

"Hush, Delphine! It would be absurd to quarrel. I was there for the recovery of this stone, having heard that it was in a cellar,—which, stupidly enough, I had insisted should be a wine-cellar."

"It was, then" —

"In a salt-cellar,—a blunder which, as you do not speak English, you cannot comprehend. I never mix with treason, and did not wish to assist at your pastimes. I speak now, that you may escape."

"If Monsieur betrays his friends, the police, why should I expect a kinder fate?"

"When I use the police, they are my servants, not my friends. I simply warn you, that, before sunrise, you will be safer travelling than sleeping,—safer next week in Vienna than in Paris."

"Thank you! And the intelligence is the price of the diamond? If I had not chanced to pick it up, my throat," and she clasped it with her fingers, "had been no slenderer than the others?"

"Delphine, will you remember, should you have occasion to do so in Vienna, that it is just possible for an Englishman to have affections, and sentiments, and,

in fact, sensations? that, with him, friendship can be inviolate, and to betray it an impossibility? And even were it not, I, Mademoiselle, have not the pleasure to be classed by you as a friend."

"You err. I esteem Monsieur highly."

I was impressed by her coolness.

"Let me see if you comprehend the matter," I demanded.

"Perfectly. The arrest will be used to-night, the guillotine to-morrow."

"You will take immediate measures for flight?"

"No,—I do not see that life has value. I shall be the debtor of him who takes it."

"A large debt. Delphine, I exact a promise of you. I do not care to have endangered myself for nothing. It is not worth while to make your mother unhappy. Life is not yours to throw away. I appeal to your magnanimity."

"Affections, sentiments, sensations!" she quoted. "Your own danger for the affection,—it is an affair of the heart! Mme. de St. Cyr's unhappiness,—there is the sentiment. You are angry, Monsieur,—that must be the sensation."

"Delphine, I am waiting."

"Ah, well. You have mentioned Vienna, and why? Liberals are countenanced there?"

"Not in the least. But Madame l'Ambassadrice will be countenanced."

"I do not know her."

"We are not apt to know ourselves."

"Monsieur, how idle are these cross-purposes!" she said, folding her fan.

"Delphine," I continued, taking the fan, "tell me frankly which of these two men you prefer,—the Marquis or his Excellency."

"The Marquis? He is antiphragistic,—he is ice. Why should I freeze myself? I am frozen now,—I need fire!"

Her eyes burned as she spoke, and a faint red flushed her cheek.

"Mademoiselle, you demonstrate to me that life has yet a value to you."

"I find no fire," she said, as the flush fell away.

"The Baron?"

"I do not affect him."

"You will conquer your prejudice in Vienna."

"I do not comprehend you, Monsieur;—you speak in riddles, which I do not like."

"I will speak plainer. But first let me ask you for the diamond."

"The diamond? It is yours? How am I certified of it? I find it on the floor; you say it was in my mother's *salière*; it is her affair, not mine. No, Monsieur, I do not see that the thing is yours."

Certainly there was nothing to be done but to relate the story, which I did, carefully omitting the Baron's name. At its conclusion, she placed the prize in my hand.

"Pardon, Monsieur," she said; "without doubt you should receive it. And this agent of the government,—one could turn him like hot iron in this vice,—who was he?"

"The Baron Stahl."

All this time G. had been waiting on thorns, and, leaving her now, I approached him, displayed for an instant the treasure on my palm, and slipped it into his. It was done. I bade farewell to this Eye of Morning and Heart of Day, this thing that had caused me such pain and perplexity and pleasure, with less envy and more joy than I thought myself capable of. The relief and buoyancy that seized me, as his hand closed upon it, I shall not attempt to portray. An abdicated king was not freer.

The Marquis departed, and I, wandering round the *salon*, was next stranded upon the Baron. He was yet hardly sure of himself. We talked indifferently for a few moments, and then I ventured on the great loan. He was, as became him, not communicative, but scarcely thought it would be arranged. I then spoke of Delphine.

"She is superb!" said the Baron, staring at her boldly.

She stood opposite, and, in her white attire on the background of the blue curtain, appeared like an impersonation of Greek genius relieved upon the

blue of an Athenian heaven. Her severe and classic outline, her pallor, her downcast lids, her absorbed look, only heightened the resemblance. Her reverie seemed to end abruptly, the same red stained her cheek again, her lips curved in a proud smile, she raised her glowing eyes and observed us regarding her. At too great distance to hear our words, she quietly repaid our glances in the strength of her new decision, and then, turning, began to entertain those next her with an unwonted spirit.

"She has needed," I replied to the Baron, "but one thing,—to be aroused, to be kindled. See, it is done! I have thought that a life of cabinets and policy might achieve this, for her talent is second not even to her beauty."

"It is unhappy that both should be wasted," said the Baron. "She, of course, will never marry."

"Why not?"

"For various reasons."

"One?"

"She is poor."

"Which will not signify to your Excellency. Another?"

"She is too beautiful. One would fall in love with her. And to love one's own wife—it is ridiculous!"

"Who should know?" I asked.

"All the world would suspect and laugh."

"Let those laugh that win."

"No,—she would never do as a wife; but then as"—

"But then in France we do not insult hospitality!"

The Baron transferred his gaze to me for a moment, then tapped his snuff-box, and approached the circle round Delphine.

It was odd that we, the arch enemies of the hour, could speak without the intervention of seconds; but I hoped that the Baron's conversation might be diverting,—the Baron hoped that mine might be didactic.

They were very gay with Delphine. He leaned on the back of a chair and

listened. One spoke of the new gallery of the Tuileries, and the five pavilions,—a remark which led us to architecture.

"We all build our own houses," said Delphine, at last, "and then complain that they cramp us here, and the wind blows in there, while the fault is not in the order, but in us, who increase here and shrink there without reason."

"You speak in metaphors," said the Baron.

"Precisely. A truth is often more visible veiled than nude."

"We should soon exhaust the orders," I interposed; "for who builds like his neighbor?"

"Slight variations, Monsieur! Though we take such pains to conceal the style, it is not difficult to tell the order of architecture chosen by the builders in this room. My mother, for instance,—you perceive that her pavilion would be the florid Gothic."

"Mademoiselle's is the Doric," I said.

"Has been," she murmured, with a quick glance.

"And mine, Mademoiselle?" asked the Baron, indifferently.

"Ah, Monsieur," she returned, looking serenely upon him, "when one has all the winning cards in hand and yet loses the stake, we allot him *un pavillon chinois*,"—which was the polite way of dubbing him Court Fool.

The Baron's eyes fell. Vexation and alarm were visible on his contracted brow. He stood in meditation for some time. It must have been evident to him that Delphine knew of the recent occurrences,—that here in Paris she could denounce him as the agent of a felony, the participant of a theft. What might prevent it? Plainly but one thing: no woman would denounce her husband. He had scarcely contemplated this step on arrival.

The guests were again scattered in groups round the room. I examined an engraving on an adjacent table. Delphine reclined as lazily in a *fauteuil* as if her life did not hang in the balance. The Baron drew near.

"Mademoiselle," said he, "you allotted me just now a cap and bells. If two should wear it?—if I should invite another into my *pavillon chinois*?—if I should propose to complete an alliance, desired by my father, with the ancient family of St. Cyr?—if, in short, Mademoiselle, I should request you to become my wife?"

"Eh, bien, Monsieur,—and if you should?" I heard her coolly reply.

But it was no longer any business of mine. I rose and sought Mme. de St. Cyr, who, I thought, was slightly uneasy, perceiving some mystery to be afloat. After a few words, I retired.

Archimedes, as perhaps you have never heard, needed only a lever to move the world. Such a lever I had put into the hands of Delphine, with which she might move, not indeed the grand globe, with its multiplied attractions, relations, and affinities, but the lesser world of circumstances, of friends and enemies, the circle of hopes, fears, ambitions. There is no woman, as I believe, but could have used it.

The next day was scarcely so quiet in the city as usual. The great loan had not been negotiated. Both the Baron Stahl and the English minister had left Paris,—and there was a *coup d'état*.

But the Baron did not travel alone. There had been a ceremony at midnight in the Church of St. Sulpice, and her Excellency the Baroness Stahl, *née* de St. Cyr, accompanied him.

It is a good many years since. I have seen the diamond in the Duchess of X.'s coronet, at the drawing-room, often,—but I have never seen Delphine. The Marquis begged me to retain the chain, and I gave myself the pleasure of presenting it, through her mother, to the Baroness Stahl. I hear, that, whenever she desires to effect any cherished object which the Baron opposes, she has only to wear this chain, and effect it. It appears to possess a magical power, and its potent spell enslaves the Baron as the lamp and ring of Eastern tales enslaved the Afrites.

The life she leads has aroused her. She is no longer the impassive Silence; she has found her fire. I hear of her as the charm of a brilliant court, as the soul of a nation of intrigue. Of her beauty one does not speak, but her talent is called prodigious. What impels me to ask the idle question, If it were well to save her life for this? Undoubtedly she fills a station which, in that empire, must be the summit of a woman's ambition. Delphine's Liberty was not a principle, but a dissatisfaction. The Baroness Stahl is vehement, is Imperialist, is successful. While she lives, it is on the top of the wave; when she dies,—ah! what business has Death in such a world?

As I said, I have never seen Delphine since her marriage. The beautiful statuesque girl occupies a niche into which the blazing and magnificent *intrigante* cannot crowd. I do not wish to be disillusioned. She has read me a riddle,—Delphine is my Sphinx.

As for Mr. Hay,—I once said the Antipodes were tributary to me, not thinking that I should ever become tributary to the Antipodes. But such is the case; since, partly through my instrumentality, that enterprising individual has been located in their vicinity, where diamonds are not to be had for the asking, and the greatest rogue is not a Baron.

HAMLET AT THE BOSTON.

WE sit before the row of evening lamps,
Each in his chair,
Forgetful of November dusks and damps,
And wintry air.

A little gulf of music intervenes,
A bridge of sighs,
Where still the cunning of the curtain screens
Art's paradise.

My thought transcends those viols' shrill delight,
The booming bass,
And towards the regions we shall view to-night
Makes hurried pace:

The painted castle, and the unneeded guard
That ready stand;
The harmless Ghost, that walks with helm unbarred
And beckoning hand;

And, beautiful as dreams of maidenhood,
That doubt defy,
Young Hamlet, with his forehead grief-subdued,
And visioning eye.

O fair dead world, that from thy grave awak'st
A little while,

And in our heart strange revolution mak'st
With thy brief smile !

O beauties vanished, fair lips magical,
Heroic braves !
O mighty hearts, that held the world in thrall !
Come from your graves !

The Poet sees you through a mist of tears,—
Such depths divide
Him, with the love and passion of his years,
From you, inside !

The Poet's heart attends your buskined feet,
Your lofty strains,
Till earth's rude touch dissolves that madness sweet,
And life remains :

Life that is something while the senses heed
The spirit's call,
Life that is nothing when our grosser need
Engulfs it all.

And thou, young hero of this mimic scene,
In whose high breast
A genius greater than thy life hath been
Strangely comprest !

Wear'st thou those glories draped about thy soul
Thou dost present ?
And art thou by their feeling and control
Thus eloquent ?

'Tis with no feigned power thou bind'st our sense,
No shallow art ;
Sure, lavish Nature gave thee heritance
Of Hamlet's heart !

Thou dost control our fancies with a might
So wild, so fond,
We quarrel, passed thy circle of delight,
With things beyond ;

Returning to the pillows rough with care,
And vulgar food,
Sad from the breath of that diviner air,
That loftier mood.

And there we leave thee, in thy misty tent
Watching alone ;
While foes about thee gather imminent,
To us scarce known.

Oh, when the lights are quenched, the music hushed,
 The plaudits still,
 Heaven keep the fountain, whence the fair stream gushed,
 From choking ill !

Let Shakspeare's soul, that wins the world from wrong,
 For thee avail,
 And not one holy maxim of his song
 Before thee fail !

So, get thee to thy couch as unproved
 As heroes blest ;
 And all good angels, trusted in and loved,
 Attend thy rest !

EL LLANERO.

De todos los Generales cual es el mejor ?
 Es mi General José con su Guardia de Honor !

I.

THE HATO.

It is only within a century that the world has become habituated to behold the birth of nations, and already the spectacle has grown too common to attract more than transitory notice. In the sluggish days that preceded the revolutionary efforts of our fathers, a nationality was fixed, seemingly immutable, the growth of scarcely numbered ages, the daughter of immemorial Time. A people then could place its hand upon its title-deeds, and, looking back through half a score of centuries, trace its gradual development from nothingness to power. To-day, on the contrary,—to use a somewhat daring metaphor,—nations have become autochthonous ; they have repudiated the feeble processes of conception and tutelage ; they spring, armed and full-grown, from the forehead of their progenitors, or rise, in sudden ripeness, from the soil.

Thousands must now be living, the citizens of prosperous states, who can

recall the days when they had entered upon manhood and yet the name itself of their nation had no existence. How many, indeed, are still among us, to whom nations owe the impetus that gave them birth ! Prominent, at least, among those who can lay claim to such distinction, there still stands one whose career it were well, perhaps, to study. We will endeavor to profit by a glance at it.

With this intent let us transport ourselves in imagination to the Llanos or Plains of Venezuela. It is a region similar in some respects, widely dissimilar in others, to the more celebrated Pampas of the regions to the south. The wonderful plain, covering more than two hundred thousand square miles, and forming the basin of the gigantic Orinoco, is a study in itself. The stranger who descends upon the vast savanna from the mountains that line and defend the coast is impressed with the momentary belief, when his eye for the first time sweeps over the level immensity, that he is again approaching the sea. From the hilly country through which he has toil-

ed, he beholds at his feet a limitless and dusky plain, smooth as an ocean in repose, but undulating, like it, in gigantic sweeps and curves. The Llanos that he sees spread out before him thus are one huge and exuberant pasture. Like the Pampas of Buenos Ayres, they are the support of myriads of roaming cattle; but, unlike them, they are intersected by numerous rivers, and suffer rather from excess than from lack of moisture. The Orinoco sweeps, in turbid magnificence, from west to east, traversing their entire breadth; and its countless tributaries seam in every direction the immense plain thus divided, and frequently by their unmanageable floods turn it for thousands of miles into a lake.

The dwellers in this region have a character no less distinctive than that of the Plains themselves. At long intervals, sometimes scores of miles apart, their habitations are established; but their home is the saddle. Innumerable herds of cattle and of horses turn to account the pasturage of the rich savanna; and the true Llanero exists only as guardian or proprietor of these savage hosts. He is as much at home in this trackless expanse of rank vegetation as the mariner navigating a familiar sea. There are no roads in the Llanos; but he can gallop unerringly to any given point, be it hundreds of miles away. There are no boundaries to the huge estates; but he knows when the cattle he is set to protect are grazing upon their own territory or upon that of a neighbor. He leads a life in which the extremes of solitariness and of activity are combined. Separated from his nearest neighbor by a journey of half a day, visited only rarely at his *hato* or farm-house by some casual traveller, or by the itinerant Galician peddler, whom he contemptuously denominates the *merca-chiftes*, the silent horseman lives wrapt up in ignorance of all but the care of the roving beasts that are intrusted to his vigilance.

Let us glance somewhat more nearly at the Llanero in his home. If we are able to obtain an elevated view of the

savanna,—let us say, in the Llanos which constitute the Province of Barinas, and through which the Apure rolls its rapid current to swell the volume of the Orinoco,—we shall observe, at distant intervals upon the plain, irregular groups of palm-trees surmounting the wavy level of the grass. These isolated clumps or groves, called *matas* in the provincial idiom, form the landmarks of the Venezuelan Plains; and in the neighborhood of each we shall find the *hato* or dwelling of a Llanero. The building, we shall find in every case, is a roughly-constructed hut, consisting of a floor raised a couple of feet above the spongy soil, and covered with a steep roof of palm-branches, with perhaps a thatch composed of the leaves of the same invaluable tree. A rough partition of mud-plastered twigs divides the Llanero's dwelling into unequal apartments; the lesser being reserved for the use of the females of the household, while the larger, furnished with half-a-dozen hides, the skin of a jaguar, and a couple of benches or stools ingeniously manufactured from bamboo, is the general reception-room, sleeping-apartment, and workshop for the *hatero*, when the floods are out, or when he takes a fancy at other times to shelter his head beneath a roof. A few rods from the dwelling is the *corral* or cattle-pen, a large oval inclosure, into which, at irregular intervals, he drives his herds for purposes of branding or enumeration; and near the *corral* two or three impatient horses, shackled with a thong confining the forelegs, are grazing.

The cattle-farms or *hatos* of the Plains are owned, for the most part, by the Creole residents of the cities which dot their outskirts, but are inhabited only by the semibarbarous *hateros*, who attend to the few requirements of the stock, and slaughter the annual supply. The *hatero*, although a descendant, and proud that he is so, of the Spanish settlers, has much intermixture of Indian and negro blood in his veins. Few of the Llaneros, indeed, could show a pedigree in which the Castilian blood was not sorely attenuated and diluted with that of half-a-dozen In-

dian or negro progenitors. He is born on the Llanos, as were his ancestors for many generations; and he has no conception of a land in which cattle-plains are unknown, and where the carcass of an animal is of more value than the hide. His ideas are restricted to his occupation, and his religious notions limited to the traditional instruction handed down from the days when his forefathers lived amid civilized men, or to the casual teaching of some fervent missionary, who devotes himself to the spiritual welfare of these lonely dwellers on the Plains. Eight or ten persons at the utmost form a *hato*, and suffice for all the requirements of thousands of cattle. The women are as much accustomed to solitude as the men, and spend their time in domestic occupations, or in cultivating the little patch of ground upon which their supply of maize and cassava is grown. The occasion of their marriage is perhaps the only one of their visit to a town,—perhaps their only opportunity of seeing a printed book. Men and women alike are a simple, healthy, ignorant race, borrowing manners, dress, and dialect rather from the Indian than from the Spanish stock.

Such as he is, nevertheless, and for the purposes which his existence subserves, the true Llanero is indeed well placed in his peculiar region. A man of middle stature, usually of broad and powerful build, short-necked, with square head and narrow forehead, and with eyes that would be black, if it were not for the fire that flickers in them with a carbuncle-like intensity. From the hips upward the Llanero is straight and well-proportioned; but his constant equitation curves and bandies his legs in a manner plainly visible whenever he attempts to walk. His distinctive costume consists of the *calzones*, or cotton breeches, reaching a little below the knee, a tunic or smock-frock of the same material, confined about his waist with a thong of leather, into which he thrusts his formidable *machete* or cutlass, and the inevitable *poncho*, that many-colored blan-

ket which the entire Spanish-American race has adopted at the hands of the vanquished Indians, and which he uses as cloak, as pillow, as bed, and sometimes as saddle. Boots he has none, nor shoes; but perhaps he may fasten strips of raw hide to his feet by way of sandals,—and a piece of raw hide covers, in all probability, his head. He cares little for ornament, since there are so few about him to admire display; and all his pride is concentrated in the steed that bears him, the lasso that he can throw with such unerring aim, and the heavy lance that he uses in driving his ferocious cattle, or as a death-dealing weapon when he is called upon to take part in some partisan warfare.

Upon his *hato*, perhaps, there are between one and two hundred thousand head of cattle and horses, guarded here and there by isolated posts of a nature similar to his own. The animals, savage from their birth, roam the plain in droves of many hundreds, each herd commanded by two or three bulls or stallions, whose authority is no less despotic than that of the colonel of a Russian regiment. They sweep from feeding-ground to feeding-ground, galloping eight or ten abreast, headed by scouts, and suffering no human being or strange animal to cross their path. As the dusky squadron hurries, like an incarnate whirlwind, from one point to another, every one prudently withdraws from their irresistible advance; and instances have occurred in which large bodies of troops, marching across the Plains, have been scattered and routed by an accidental charge of some such wild-eyed regiment. At certain intervals, *la herra*, the branding, takes place; when drove after drove are dexterously compelled within the walls of the *corral*, and there marked with the initials or cipher of the proprietor. This is the great festival of the *hatero*, and he invites to it all his neighbors for scores of leagues around. The bellowing cattle, the plunging steeds, the excitement of lassoing some bull more refractory than usual, the hissing of the iron as it sears the brand-

mark deep into the animal's hide, all these are elements of exquisite enjoyment in the unsophisticated Rarey of the Plains. His great delight, on such occasions, is to display his skill in lassoing an untamed colt, or in performing the feat called to *colear* a bull. He selects from the suspicious herd some fine young three-year old, grazing somewhat apart from the main body, and creeps silently towards it. Suddenly the lasso flies in suaky coils over the head of the beast, and is drawn with strangulating tightness about its neck. At the first plunge, a brother *hatero* lassoes the animal's hind legs, and it is permitted to rear and kick as frantically as it can, until it drops to the ground exhausted and strangled. The Llanero immediately approaches the prostrate colt, and deliberately beats its head with a heavy bludgeon until it becomes quite senseless. He then places his saddle upon its back, adjusts a murderous bit in its clammy mouth, and seats himself firmly in the saddle at the moment when the animal recovers strength enough to rise. The fearful plunges, the wild bounds, the vicious attempts at biting, which ensue, are all in vain; in a couple of days he subsides into a mere high-spirited trotter, whom one can ride with ease after once effecting a mount.

The pastime of "tailing" a bull is somewhat singular. Two or three horsemen single out an animal upon which to practise it, and secure a lasso about its horns. Another lasso, deftly thrown about its hind legs, is fastened to a tree, and the strongest of the party then seizes the bellowing beast by its tail, which he twists until his victim falls over on its side and is dispatched. The greatest dexterity is required in this manœuvre by all practising it, as the slackening of either lasso enables the bull to turn upon his caudal persecutor, who is certain to be gored to death. This, indeed, not unfrequently happens. But a Llanero cares little for death. He faces it daily in his lonely converse with thousands of intractable beasts,—in his bath in the river swarming

with alligators,—in the swamp teeming with serpents, against whose poison there is no antidote, and whose bite will destroy the life of a man in a single hour. Content with the wild excitement of his daily round of duty and recreation, with his meal of dried beef and cassava-cake, washed down, it is likely, with a gourdful of *guarapo*, a species of rum, in comparison with which the New England beverage is innocent and weak, and with the occasional recurrence of some such turbulent festival as that of the branding, he cares nothing for the future, and bestows no thought upon the past. The Llanero may be called a happy man.

II.

EL ARAURENSE.

Two years more than half a century ago there lived a Creole trader of some wealth in the little town of Araure, in the province of Barinas, upon the outskirts of the Llanos. Don José had a stalwart son, aged about sixteen, whom he had trained to active usefulness amid the monotonous ease of the torrid little municipality. Young José Antonio had received, it is true, only a scanty education, but he could sign his name, could verify a calculation, and had a shrewd, quick head for business. The doctors-of-law, tolerably numerous even in little Araure, pronounced him born for a jurist, and he was a godsend to the litigious natives of the Captain-Generaley. The hide-and-tallow merchants nodded knowingly, as he passed them in the street with a good-humored *Adios*, and predicted great fortunes for the lad as a future man-of-business. The Cura thought it a pity that he should prefer the society of the dusky beauties of Araure to the more hallowed enjoyments of preparation for a priestly life. And all the while quite other destinies were held in store by Fate. The remissness of a mercantile correspondent of his father altered the current of his life, and mightily influenced, even to the present day, the fortunes of his country.

A sum was owing to Don José by a trader of Capudare, and he intrusted his son with the task of collecting the debt. One fine day, in the spring of 1807, the lad accordingly set out, in high spirits at his important mission, armed with a brace of pistols and a cutlass, and mounted on a trusty mule. The money was duly collected, but, as young José Antonio journeyed home with it, a rumor of his precious charge was spread, and he was beset in a lonely by-path by four highwaymen. The pistols flashed from José's holsters, and one of the *churrones* fell the next moment with a bullet in his brain. Instantly presenting the second pistol, which was not loaded, he advanced upon the remaining three, who fell back in consternation, and fled, panic-stricken, from the boy. José Antonio was left alone with the highwayman's corpse. It was no light thing in Venezuela to commit a homicide without testimony of innocence, and young José hastened homewards with his treasure, in a state of trepidation far greater than any the living highwaymen could have inspired. Even in his parents' dwelling, he dreaded, every moment, the arrival of an order for his arrest, and to appease his groundless anxiety his father shortly suggested that he should take refuge upon the Llanos, —the Sherwood of Venezuelan Robin Hoods. The youth was delighted with the idea, and engaged himself as herdsman in the service of Don Manuel Pulido, a wealthy proprietor, whom he served so well that he was very quickly advanced to a position of confidence and command. In a few months the slayer of the *churron* had learned to smile at his recent apprehensions; but the wild life of the *hato* had already thrown around him its subtle fascination, and the sprightly youth of Araure had become a naturalized son of the Plains. Soon few were able like young José to break an untried steed; few wielded more dexterously the lasso, or could drive with more unerring force the jagged lance into the side of a galloping bull. Clad in *poucho* and *calzones*, he scoured the vast plain of La Calzada,

acquiring, at the same time with manual dexterity and physical hardihood, the affections, still more important, of the wild Llaneros with whom only he associated. The lad of eighteen, scarcely two years a denizen of the Plains, possessed all the influence and authority of the hoariest Llanero; and now the predictions ran that this daring José Antonio would one day be the most successful cattle-farmer in Venezuela!

III.

EL TEMBLOR.

WE must leave young José among his comrades of the *hato* for a while, and glance at the contemporaneous doings of anointed heads, whose destinies were strangely interwoven with his own.

Far away across the Atlantic, in the shadow of the Pyrenees, events had been developing themselves to the consummation that should overturn a splendid throne, shake Europe to its foundations, and electrify Spanish America with a sympathetic current of revolution, flashing from the pines of Oregon to the deserts of Patagonia.

The mysterious treachery of Bayonne was consummated. Joseph, brother of Napoleon, reigned on the throne of which King Charles had been perfidiously despoiled. Ferdinand, heir to the crown of Spain and the Indies, had scarcely heard himself proclaimed as the seventh monarch of that name, when he had resigned his kingly functions to a Regency, and hastened into the snare which already held his father a captive on the soil of France. The astounding intelligence arrived in different parts of South America during the year 1808. The effect was everywhere alike. One moment of utter bewilderment, an instant's reeling under the shock of surprise, and then a magnificent outburst of loyalty from the simple-hearted Creole population! *El Rey*, the King,—that almost mythical sovereign, who was ignorantly adored as the personification of wisdom and benefi-

cence, no matter how cruelly Viceroy might misgovern, or Captains-General oppress,—was it possible to conceive him a captive, the signer of his own humiliation, the renouncer of his immemorial rights? And Ferdinand, the young monarch of whom so little was known and so much expected,—he, too, a voluntary prisoner, while a Frenchman reigned in Madrid? This was news, indeed, to bewilder nations who had hitherto remained content in infantile tutelage, unconscious, undesirous, of the rights of men! Addresses, fervent with loyalty, were dispatched to Spain, embodying vows of eternal affection towards the King, and of detestation of Joseph, the usurper. French residents in Venezuela were publicly execrated by the excited Creoles; the French flag was insulted, and the French messengers were glad to escape with their lives from the hands of the infuriated Colonists. No Spanish monarch ever had a firmer hold upon the Indies than Ferdinand VII. when Spain was lost to him in July and August, 1808.

But soon there came that inevitable question, first in the catechism of all human society: Whom shall we obey? The King, whose hand had weighed not over lightly these many years, an abdicated prisoner at Bayonne; Ferdinand yielding his authority into the hand of a nameless Regency, and his capital to the brother of the Corsican Emperor; Spain overrun by two hundred thousand foreign troops; messengers at hand from Joseph, from the Regency, from the Junta of the Asturias, from the Junta of Seville, each alike asserting its right to authority over the Colonies, as legitimate possessors of jurisdiction in Spain itself! The accession of Joseph, in fact, gave a momentary independence to Spanish America, and the royal governors were thrown upon their own resources for the maintenance of their power. The Colonies were for the first time called upon to provide for their own defence,—solicited, not commanded, to obey; and they proved their loyalty by dispatching enormous

sums in gold and silver to the Junta at Cadiz, as well as by their eagerness to ascertain in whom actually reposed the lawful government of Spain. Gradually, however, the consciousness of their own entity stole over the Venezuelans and New Granadians, and they bethought them of establishing an administrative Junta of their own, until better times should dawn on Spain. Blindly imprudent, the Viceroy violently opposed the project, and with such troops as remained in the Colonies the first Juntas were dispersed or massacred. Squabbles ensued, until the citizens of Caracas quietly deposed the chief Colonial authorities, and appointed a *Junta Suprema* to administer affairs in the name of Ferdinand VII. Intelligence of this step, however, was received with great alarm by the sapient Junta of Cadiz, and a proclamation was launched, on the 31st of August, 1810, declaring the Province of Caracas in a state of rigorous blockade. A war of manifestoes ensued, until the Provinces became enlightened as to their own importance and strength, and published, on the 5th of July, 1811, the Declaration of their Independence. Scarcely was this done when the Spanish Cortes offered liberal terms of accommodation, but they were rejected. The nation, that in 1808 thought it sweet to be subject, declared itself, three years later, for unqualified independence. The ardent revolutionist, General Miranda, was placed in command of some hastily-levied forces, and took the field against the Spanish commander, Don Domingo Monteverde, who had assumed a hostile attitude immediately after the Declaration.

It is only necessary here to say, that, after some hard-fought and honorable fields, Miranda and his fellow-officers were completely successful. All the principal cities were in the hands of the Patriots before 1812 began. Monteverde, in January of that year, was cooped up in the remote province of Guiana, and Coro on the sea-coast was also held by his troops; but elsewhere the new Republic seemed fully established. Already

the point of Constitution-making—the crystallization-point of republics—had been reached. The ports of Venezuela were for the first time opened to foreign trade. Her inhabitants were no longer restricted from the enjoyment of the fruits of their own industry. A gigantic system of taxation had been brushed, like a spider's web, away. Two-thirds of the Captain-Generaley, in a word, were free.

There was little fear among any of the inhabitants of Caracas, in March, 1812, that they would again fall under the dominion of Spain. The Carnival had been celebrated with greater joyousness than in any year before; the proverbial gayety of the town was doubled during the concluding festival of Shrove Tuesday; and Lent had scarcely thrown as deep a shade as usual over the devoutest inhabitants of the city. Lent drew to a close, and there was every prospect that Passion Week would be succeeded by a season of rejoicing over impending defeats of the Royalist *Goths* in Coro and Guiana; and Passion Week came. Holy Thursday fell on the 26th of March.

The solemn festival was ushered in with the most imposing rites of the Church. In the great cathedral, which dwarfed all other buildings in the Plaza, there was high mass that day. The famous bell clanged out to all Caracas remembrance of the agony of our Lord. A silent multitude was prostrated all day long before the gorgeous altar. Prelates and priests and acolytes stood, splendid in vestments of purple and white and gold, solemnly celebrating upon the steps of the sanctuary the holiest mysteries of the Roman Catholic communion. Above and around, gigantic tapers flared from candlesticks of beaten gold; and every little while, the glorious anthems floated forth in majestic cadence, eddying in waves of harmony about the colonnade that stretched in dusky perspective from the great door to the altar, soaring above the distant arches, and swelling upwards in floods of melody, until the vast concavity of the vaulted nave was filled with a sea

of sound. But a sultry heaviness weighed with the incense upon the air. Elder citizens glanced uneasily at one another, and the thoughts of many wandered anxiously from the sacred building. Outside, the streets were empty. All Caracas was engaged in public worship; and the white dwellings that inclosed the Plaza, with its converging avenues, looked silently down upon deserted pavements, echoing only now and then to the careless tread of a party of negroes, or to the clattering heel of some undevout trooper. The sun had a glow as of molten copper; the atmosphere was dense; but not a cloud occupied the heavens. Towards evening the churches and the cathedral were again emptied, and the throng of worshippers, streaming out into the streets, prepared to witness the great religious procession that was to close the ceremonies of the holy day. Still the declining sun glowed with unnatural intensity of hue; and the evening breeze swept over the town in unusually fitful and stormy gusts. The air seemed to be laden with mysterious melancholy, to sigh with a hidden presage of some awful calamity to come.

Of a sudden it came. A shudder, a tremor, a quivering shock ran, for hundreds of miles simultaneously, through Venezuela. A groan, swelling thunderously and threateningly into a hollow roar, burst from the tortured earth, and swallowed up in its convulsive rumbling the shrieks of an entire nation suddenly inwrought in the shadow and agony of death. For a moment,—as if a supernatural hand were painfully lifting it from its inmost core,—the earth rocked and heaved through all Venezuela; and then, almost before the awful exclamation, *El temblor!* had time to burst from the lips of that stricken nation, it bounded from the bonds that held it, and in a moment was quaking, heaving, sliding, surging, rolling, in awful semblance to the sea. Great gulfs opened and closed their jaws, swallowing up and again belching forth dwellings, churches, human beings, overtaken by instantaneous destruction.

A flash and a roar passed through the earth, and a jagged chasm followed in its track, creating others in its rapid clash and close. Whole cities shivered, tottered, reeled, and fell in spreading heaps of undistinguishable ruin. In one minute and fifteen seconds, twenty thousand human beings perished in Venezuela; and then the Earthquake of Caracas ceased.

It was after four o'clock in the afternoon when the first subterranean shock was felt; and long before five the agonized earth was still. Long before five, the stupefied survivors stood slowly recovering their faculties of speech and motion. Long before five, a piteous wail ascended to heaven from fathers and husbands and wives and mothers, desolately mourning the dead in the streets of Caracas, La Guayra, Mérida, San Felipe, and Valencia. In this manner the Holy Thursday of 1812 drew toward its close. But the physical disasters consequent upon the great earthquake were of insignificant import as compared with its moral effect. Colonist and Spaniard had shared alike in suffering and death during those dreadful moments; but the superstitious population readily accepted the interpretation which an eager priesthood placed upon the event, and bowed in the belief that they had suffered the infliction in punishment of their rebellion against the King. Nine-tenths of the clergy and monastic brotherhood inwardly hated and feared the Revolution, and their practised tongues drew terrible auguries for rebellious Venezuela from the recent throes and upheaval of the earth. Preachers solemnly proclaimed the fact, that this, without doubt, was a catastrophe akin to the memorable convulsion which once had swallowed up Korah, Dathan, and Abiram, for mutiny against the Lord; and the proximate wrath of God could be appeased only by a retrogression into his chosen paths. The people listened to the fathers, and obeyed trembling. Miranda, who had struggled against and overcome the material power of his enemies, was impotent when confronted by

spiritual terrors; and after a few languid combats, his troops deserted, leaving Monteverde to triumph once more in the assertion of Spanish authority over every province of Venezuela. His headquarters were established at Caracas, and there, as well as elsewhere, his troops revelled in the perfidious torture and execution of their capitulated foes. During nearly two years, Monteverde reigned in Venezuela.

IV.

GUERRA Á LA MUERTE!

YET, towards the close of 1813, the star of liberty glimmered once more from the summits of the Western Cordillera. During and after the memorable earthquake, the city of Puerto Cabello, at that time held by the Patriots, was under the command of a young colonel in the Republican service, who had devoted a portion of his immense patrimonial wealth to the culture of his intellectual powers in European travel, (not, however, without subsequently applying a large share to the necessities of his country,) and whose name was Simon Bolívar. The treachery of an officer delivered the citadel of Puerto Cabello into the hands of some Spanish prisoners who were there confined, and in June, 1812, Colonel Bolívar was compelled to evacuate the town with all his force. While Monteverde lorded it over his country, he took refuge in the neighboring islands, and afterwards in New Granada, where he conceived the daring project which freed Venezuela, and has perpetuated, with his name, the simple but expressive title: *Liberator, Libertador*.

It is not our purpose here to follow the intrepid partisan in his descent, with six hundred New Granadian adherents, from the Andes, upon the astounded Spaniards. We cannot follow him, nor the generals whom he created, in their marvellous marches, and still more marvellous triumphs, during many succeeding years. Suffice it to say, that he fell like a thunderbolt from a sunny sky upon the

confident Royalist troops,—that he defeated and routed them time after time, broke, with his terrible lancers, upon encampments which believed him a hundred miles away, and drove the Royal commanders, with varying success, from one point to another of Venezuela. His watchword was, *Guerra á la muerte*, "War unto death!" Every battle-ground became a shamble, every flight a butchery. The system was inaugurated by his antagonists, who cruelly slew eight Patriot officers, and eight citizens of Barinas, shortly after the commencement of hostilities, under circumstances of peculiar barbarity. Thenceforward Bolívar's men took no prisoners.

In the mean time, Wellington had driven the French across the Pyrenees, and Ferdinand the Adored ruled once more in Madrid. Even now, judicious management might have secured again the allegiance of the Colonies; but the first action of Ferdinand was to vituperate his American subjects as rebels, whom he commanded to lay down their arms at once; and on the 18th of February, 1815, there sailed from Cadiz a stately armament intended to enforce this peremptory order. Sixty-five vessels composed the fleet, bearing six regiments of infantry, one of dragoons, the Queen's hussars, artillery, sappers and miners, engineers, and eighteen pieces of cannon, besides incalculable quantities of arms and munitions of war. The expedition numbered fifteen thousand men, and was commanded in chief by the famous soldier, General Don Pablo Morillo, the guerilla champion, the opposer of the French.

On the 4th of April, this redoubtable army effected a landing; and once more, all but an insignificant fraction of Venezuela fell under the hand of Spain. The flood of successful rebellion was rolled back from the coast, and Bolívar, with his dauntless partisans, was soon confined to the Llanos, which stretch away in level immensity from the marshy banks of the Orinoco, the Apure, and their tributaries.

Our readers have already been introduced to these Llanos, and have beheld their wild inhabitants amid the monotonous avocations of a time of peace. Let us now approach them while the "blood-red blossom of war" blazes up from their torrid vegetation. Let us descend upon them at night, here, at no great distance from the banks of the cayman-haunted Apure, and we shall gaze upon a different scene. All around us, the plain extends in the same desolate immensity that we noticed when we looked upon it from the *hato*; still, as before, we see it covered with a dense wilderness of reedy grasses that overtop the tallest trooper in Morillo's army; as before, we notice the scattered palm-islands, breaking here and there the uniformity of level; and hosts of cattle and wild horses are still roaming over the plain.

Near a *mata*, or grove of palm-trees, there is a sound of merry voices to-night. Fires are crackling here and there; huge strips of fresh beef are roasting on wooden spits; the long grass has been trodden flat in a wide circumference, and three or four rudely-constructed huts of palm-branches close the scene on one side. Five hundred men are collected here,—the *élite* of the liberators of Venezuela. Gathered about their camp-fires, these troopers, who have ridden a hundred miles since morning, are enjoying rest, refreshment, and recreation. But the word trooper must not conjure up a vision of belted horsemen, rigid in uniform, with clanking sabres, and helmets of brass. Of a far different stamp are the figures reclining before us. These are improvised warriors, *hateros*, cattle-farmers, who, grasping their lances and lassos, have eagerly exchanged the monotony of pastoral life for the wild excitement of the charge upon Spanish squadrons, and the ferocious slaughter of fellow-men. No two of this invincible band are clad alike. Here is a sergeant, wearing an old and dilapidated blanket poncho-fashion, with the remains of a palm-leaf hat sheltering his head, and with

limbs which a pair of ragged *calzones* make only a pretence of covering. Yet over his left shoulder is slung a gorgeous hussar-jacket, which he wears with the greater pride since it belonged last night to a lieutenant in the Queen's regiment, whom he slew in cold blood after the fight! Next to him leans a private, bare-legged and bare-headed, wearing only an old piece of carpet about his waist, a flannel shirt, and the uniform coat of a Spanish officer, from which he has cut the right sleeve in order to secure greater freedom for his arm. A third has made himself a suit which Robinson Crusoe might have envied. Helmet, jerkin, breeches, sandals,—all have been cut from the same raw bull's-hide! His neighbor, a new recruit, still wears the national dress of his order, which has not yet been tattered and torn from him by long service; and he is the envy of the motley troop. But the lack of uniformity in no wise detracts from valor, nor does it diminish the gayety of these terrible lancers as they lie idly grouped about the flickering fires. Half-a-dozen circles are absorbed in as many games at cards; others are swallowing greedily some improvised fantastic tale; and some are singing, in wild, irregular cadence, the favorite songs of the Plains. Their example soon becomes contagious, and group after group chimes in with the uproarious chant. Listen! From the farthest extremity of the encampment comes a quering solo:—

“De todos los Generales cual es el valiente?”

and from five hundred throats the response is thundered:—

“Mi General Paez con toda su gente!”

Again the solo demands:—

“De todos los Generales cual es el mejor?”

and the tumultuous answer is vociferated:—

“Es mi General José con su guardia de honor!”

And who may be the valiant General, the General with his guard of honor,

excelling all the rest? This, we learn, is the guard of honor; the General is José Antonio Paez, little José Antonio who killed the highwayman and betook himself to cattle-farming on the Plains! Now, however, he is the famous Llanero chieftain, favorite champion of Venezuela, brother-in-arms of Bolívar, who allows him, alone of all the military leaders, the privilege of an especial body-guard. Since 1810,—for five years,—he has been fighting constantly in his country's service, and has won himself fame while our eyes have been turned in other directions. Look! he is standing there, at the entrance to his hut, while the chorus yet echoes among the palm-branches. Scarcely of middle stature,—certainly not more than five feet four in height,—but broad-shouldered, muscular, with a constitution of iron, equal to perpetual exertion, capable of every fatigue. His countenance is open and prepossessing, his features rounded, forehead square, eyes piercing and intelligent. Like his men, he wears a motley garb,—part Spanish uniform, part costume of the Llanos; and he leans upon a lance, decorated with a black bannerol, which has carried death already to innumerable Loyalist hearts. Thus José Antonio Paez stands before us, on the banks of the Apure, in the twenty-fifth year of his age.

He has perhaps been hitherto too much neglected by us, and we must look backwards in order to take up the thread of his career. At the very first outbreak of insurrection in 1810, Paez took service as a volunteer in the hastily-levied militia of Barinas, and was quickly promoted to the post of sergeant in a corps of lancers. His influence and example attracted multitudes of Llanero horsemen to the Revolutionary ranks, but the calamitous period of the earthquake put an end to his military service, and he returned, in 1812, to his pastoral post. Soon, however, came news of Bolívar lighting from the mountains of New Granada; and in 1813 Paez was once more in the saddle, with the commission, this time, of captain in the Patriot

service. The Spaniards soon learned to dread the fiery lancer of Barinas. They were never safe from his sudden onslaught; and Puy, the commandant of the Province, rejoiced loudly when an unlucky defeat placed the indefatigable *guerrillero* in his power. Paez was condemned to be shot, and was actually led out, with other prisoners, to the place of execution; but a concatenation of extraordinary accidents saved his life, and he escaped once more to the head of his command. It was not long before he was brought in immediate contact with the now famous Bolívar, and he rapidly rose to independent command. In 1815, he was second only to the Liberator. Thousands of grim Llaneros acknowledged no chieftain beside *el Tío Pepe*,—Uncle Joe. When Morillo landed, in 1815, with his overwhelming force, only the Llaneros of Paez held out for the Republic; everywhere else in Venezuela the banner of Spain waved in triumph, but on the Plains of the Apure there was neither submission nor peace. Yet, after a while, as the victorious legions of Morillo flooded, in successive waves from the coast, the level region of his refuge, Paez was compelled to evacuate the Plains, and leave them to the invader. With a few hundred of his horsemen he established himself on the Plains of New Granada. Scarcely had he grown familiar with his new centre of action when the troops of Morillo were turned westward for the purpose of curbing the rebellious spirits in the neighboring Vice-Royalty,—when, quicker than thought, Paez was once more over the mountains, and recovered by a sudden swoop the Llanos of Barinas. Thenceforward, this region remained the surest foothold of the revolution in Venezuela. Encircled with Spanish troops, it remained, nevertheless, a practical republic in itself, and the vast basin of the Orinoco was the cradle of Venezuelan freedom. The Provisional Government consisted of a mere council of generals, who, in 1816, created Paez General and Supreme Chief of the Republic. A vast stride from the *hatero's*

hut that we saw him inhabiting in 1808!

Paez resigned this dignity in favor of Bolívar in the following year, contenting himself with his great military command. Surrounded by the body-guard we have seen, through all the years 1816, 1817, and 1818, now in Venezuela, now in New Granada, in the Plains to-day, in the mountains to-morrow, enduring every privation, braving odds apparently the most overwhelming, fighting pitched battles at midnight, and triumphantly effecting surprises in the open day, he maintained alive, in the midst of general discouragement, the cause he had espoused. Bolívar, the Liberator, was meanwhile endeavoring to make head against the Spaniards elsewhere, and gathered a considerable force in the interior province of Guiana. In 1818, the vanguard of the British legion—troops browned by the sun of Spain, who had marched with Wellington from Lisbon to the Pyrenees, and who gladly accepted the offers of the Patriots when Waterloo had put an end to European strife—sailed up the Orinoco, and effected a junction with the assembled Patriot forces.

At this time, not only the whole of New Granada, but the entire sea-coast of Venezuela and every important city in the Republic were possessed by Morillo. Yet the Royalist cause made no progress. Morillo's dominion was like that famous Haarlem lake which occupied so large an extent of the lands of Holland; it might be great and threatening, but barriers insurmountable, though unpretending, forbade its expansion, and perseverance gradually succeeded in curtailing its limits. Whatever the hand of Morillo covered, he possessed; but his authority ceased outside the range of his guns. His men were growing weary of the struggle; few reinforcements came from Spain; and the troops suffered frightfully, through their constant fatigues and hardships. The war had become that most terrible of all wars,—a deliberate system of surprises and skirmishes. Paez here, Bolívar there, Monágas,

Piar, Urdaneta, and a score of other chieftains, at every vulnerable point, harassed, without ceasing, the common foe.

In 1819, Bolívar set out upon that marvellous expedition across the Andes, in which, by marching one thousand miles and fighting three pitched battles in somewhat less than eleven weeks, he finally liberated New Granada, and secured a vast amount of Spanish treasure and munitions of war. During his absence, Paez was left to keep Morillo in check on the east of the Cordillera. His plan of operations was, to be everywhere, and to do everything with his lancers. Venezuela clung with terrible tenacity to the idea of freedom; and the Republic was converted into two great camps, perpetually shifting their boundaries, yet ever presenting the same features. Trade and commerce were at an end; the only business thought of was that of war unto death. Death, everywhere; death, at all times; death, in every shape. By the sword and the lance, by famine, by drowning, by fire, decimated by fever, worn out by fatigue, the Spaniards perished. When their convoys failed or were intercepted, it was impossible to obtain food; no foraging-party dared venture forth from the fortified encampment; it was necessary that an entire division should march out into the Llanos, and seek for the nearest herd of cattle. It not unfrequently happened, in these expeditions, that the very cattle were enlisted on the Patriot side. Herds of several thousands of the savage beasts were sometimes driven headlong upon the Spanish lines, throwing them into confusion, and trampling or goring great numbers to death. Close in the rear of the resistless herd then charged the lancers of Paez, with the terrible black bannerol fluttering in the van. Before the scattered Royalists have time to rally, they are attacked in every direction by their merciless foes,—and in another minute the battle is over, and the men of the Plains are out of sight! Sometimes, too, a detachment traversing

the savanna would notice with affright a column of thin smoke stealing up into the sky a mile to windward; and almost before the bugle or the drum could summon them to arms, the flames would be seething and crackling around them, and roaring away, in an ocean of fire, across the savanna beyond. And then, in the rear of the flames, dashed the bloodthirsty lancers, and the blackened embers of the grass turned red with the richness of Spanish veins! No venture was too arduous for the Llanero chieftain. He accomplished at one time an exploit in which only the multiplicity of witnesses who have testified to the achievement permits us to believe. San Fernando, an important town on the Apure, was strongly fortified, and was held by the Spaniards as a potent means of annoying the Patriots in any attempts they might make to cross the river. In order further to defend the passage, six large river-boats, each containing a piece of artillery, were anchored at a short distance below the only ford. But it became necessary that the Apure should be crossed, and Paez quietly undertook to secure the passage. With a few of his lancers, he rode to the river-bank, and there gave the command, *Al agua, muchachos!* "To the water, boys!" which he was accustomed to use when ordering his men to bathe. His meaning was at once apprehended. The men, stripping off their upper clothing, and holding their swords under their arms, plunged into the stream, shouting loudly to keep off the alligators, and partly rode, partly swam, nearly half a mile towards the gun-boats. Only the heads of horses and men were visible above the water, and the crews of the gun-boats, after a single discharge, which wounded none of the extraordinary attacking party, threw themselves into the river and made the best of their way to San Fernando, where they alleged that it was useless to contest possession of their charge with incarnate devils, to whom water was the same as dry land, and who butchered all their prisoners. The gun-boats were navigated

in triumph to the Patriot camp, and did excellent service in ferrying the troops across the Apure.

V.

LIBERTAD.

By the year 1820 the Revolutionists had for the third time perceptibly gained ground, and Morillo's force, spread like a fan at the inland base of the sierra, was gradually yielding to the unceasing pressure;—in a word, the Patriots were at length driving their enemies into the sea. Towards the close of 1820, Morillo opened negotiations with their chiefs, and a suspension of hostilities was commenced on the 26th of November, when the Spanish general gladly quitted the scene of his fruitless efforts, and retired to Spain with the title of Count of Cartagena, leaving Generals Morales and La Torre in authority behind him. The armistice was not prolonged. The Congress of Colombia, as the united republics of Venezuela and New Granada were then termed, demanded unqualified independence as the price of peace; and in June—the Battle Month—of 1821, Bolívar and Páez took up arms once more. The Spanish troops were concentrated at the base of the mountains, with Valencia and Caracas in their rear. Before them, the road wound westward, through tortuous passes, towards Tinaquilla and Barinas, at the former of which places Bolívar with his forces was now halting. Six thousand men were in arms on either side; but the troops of the Republic, though ragged, ill-fed, and badly armed, were flushed with the consciousness of success and the presentiment of triumph, while those of Spain were dispirited, worn out, and malcontent.

It was plain to the meanest trooper, however, that Carabobo must be held; and on intelligence of the Patriot advance, the position, of amazing strength, was resolutely occupied. It seemed, indeed, that a regiment could defend such a pass with ease against an army. In order to debouch upon the Plain of Ca-

rabobo, the Patriots must penetrate a defile, forming a narrow and tortuous pass, the road through which was a mere seam at the base of a deep ravine. This narrow passage, through which, of necessity, Bolívar's troops must march in straggling line, terminated abruptly in a basin or valley shut in by hills, except upon the northeast, where it opened upon the boundless expanse of the contested plain. At the mouth of this gorge La Torre lay with all his force. Despite the unfavorable condition of his men, with whom, moreover, he was not popular, the odds seemed overwhelmingly in his favor. He stood on the defensive, in one of the strongest of military positions, and well provided with artillery, while his adversary was to struggle through a narrow valley in the face of his opponents, before a single man could be made available. The mouth of this valley was blockaded by the Spanish infantry, who stretched in silent lines from side to side in the evening of the 23d of June. On either flank, the hills were occupied by corps of riflemen, and the artillery was posted at their base. No force, it appeared, could enter the beleaguered valley and live. Bolívar commenced his passage through the defile on the morning of the 24th, and halted in dismay as he reached the outlet. It was too apparent that such a conflict as lay before him could not be braved. At this moment Páez learned that a narrow side-path existed, permitting the passage of a single file, which led, by a *détour*, to the plain. It was one of those curious accidents on which the fate of battles seems to hang; and after some hesitation, Bolívar permitted Páez to venture the passage. Heading the famous Battalion of Apure, he at once wheeled to the left, and commenced the toilsome march. One by one the veterans struggled through the pass, but they were discovered by La Torre before they issued upon the plain.

Although taken entirely by surprise, the Spaniards had time for a partial change of front, and before the veterans of Apure had assembled at the mouth of

the pass, a volley of musketry rang out from the Spanish lines, and the gleaming of bayonets told of a wall of steel across the path. The scanty force of Paez, however, dashed from the ravine, and, forming hastily, rushed upon the enemy. Four Royalist battalions converged upon them, and they were crushed. They fell back, flying in disorder, and the Spaniards were on the point of securing the pass, when a shout arose before them that made the stoutest quail. With one ever-memorable cheer, a long hurrah, which spoke of well-known unconquerable determination, the British legion, less than eight hundred strong, with their Colonel, John Ferrier, at their head, appeared at the mouth of the ravine. Forming instantaneously and in perfect silence, but with the accuracy of a regiment on parade, they threw forward their bayonets, and knelt down, sedately, calmly, immovably, to confront destruction. The remaining troops of Bolívar were in their rear, traversing slowly the defile; and until they reached its mouth, that living wall of Anglo-Saxon valor neither stirred nor blenched. Volley after volley enfiladed their ranks, and, after each discharge, the mass of men was smaller. Still their cool and ceaseless firing rolled death into the ranks of the enemy, until at length the troops whom they had saved from destruction rallied once more. Then, what remained of the legion, headed by the two or three officers whose lives had been marvellously preserved, rushed fiercely forward like an avenging flame, and swept before them the affrighted Spaniards, wildly scattering at the onslaught which it was impossible to withstand. In another moment, eighty or ninety of the lancers of Paez issued from the ravine, and, hurling themselves upon the broken enemy, turned the defeat into an utter rout. La Torre's troops, with the exception of one regiment, fled in disgraceful confusion, or perished by hundreds under the lances of the implacable pursuers; and on the evening of the 24th of June, Bolívar, encamped upon the

Plain of Carabobo, laid his hand upon the shoulder of José Antonio Paez, thenceforward General-in-chief of the Armies of the Republic of Colombia!

Carabobo decided the War of Independence throughout South America. It snapped the chain which held Venezuela down, and the Spaniards, hemmed in for two years longer at Puerto Cabello, which place they defended with honorable pertinacity, were finally expelled from the free Republic in November, 1823. The city was taken by storm on the 7th of that month, and on the 9th the citadel surrendered. General Calzada, the commandant, with all his officers, and four hundred men, was shortly afterwards shipped for Spain.

Here the career of the Llanero closes. A new and still more brilliant avenue to distinction opens before Paez. At this, however, we can scarcely glance. Our business has been to study him in the saddle, wielding lasso and sword and lance; nor have we left ourselves room for adequate allusion to his subsequent life as President and private citizen, deliverer of his country, and exile in these Northern States. Yet the record could not be called complete, unless we passed briefly in review the vicissitudes of the past thirty years.

After the taking of Puerto Cabello, Paez administered the affairs of Venezuela as Provisional Chief of the State, and held that office under the Congress of Colombia, until the two republics were dissevered in 1830, when he was elected first President of Venezuela. Only partially disturbed by a military insurrection, headed by the turbulent General José T. Monagas, which was soon suppressed, the administration of Paez was such as surprised all lookers-on in America and Europe. He displayed administrative talents of a high order, with all the firmness and resolution of a soldier, yet with all the business capacity and peaceful proclivities of a civilian.

Laying down the Presidential office in 1834, he was again called upon to assume

it four years later, and until the close of 1842 Venezuela prospered under his direction. The foreign and domestic debt was liquidated by the products of national industry, and three millions of dollars were left in the treasury on the accession to the Presidency of General Soublette, in 1843. Honors had rained on the *ci-devant* impetuous horseman, whose shout had once so frequently been the prelude to slaughter and devastation. William the Fourth of England presented General Paez, in 1837, with a sword of honor; Louis Philippe of France invested him, in 1843, with the Grand Cordon of the Legion of Honor; and two years later, there arrived from Oscar of Sweden the Cross of the Military Order of the Sword.

But in 1850, and thenceforward, until 1858, José Antonio Paez trod the streets of New York as an exile from his native land.

General José T. Monágas was elected President of Venezuela in 1848, and created dissatisfaction by his course of action. Paez placed himself at the head of an insurrectionary movement against him, and, being defeated, was imprisoned in the city of Valencia. General Monágas, influenced, it is probable, by feelings of ancient friendship, and remembering the pardon extended to himself on a former similar occasion, contented himself with a decree of exile against the captive veteran, and Paez embarked for St. Thomas on the 24th of May, 1850. He passed from St. Thomas to the United States.

All, whose memories extend so far back as the year 1850, remember the ovation received in New York by the exiled chief. New York grants an ovation to every one; and Monágas would, doubtless, have been received with the same demonstration, had the breath of adverse fortune blown him hither, instead of his antagonist.

After the first effervescence produced by the dropping of a notability into the caldron of New York, the Llanero general was permitted to enjoy his placid domesticity without molestation; and in a pleasant street, far up-town among the Twenties, he lived in the midst of us for eight quiet years. A curious serenity of evening, for a life so turbulent and incarnadined in its beginning! How many of the thousands who were wont to pass the stout old soldier, with his seamed forehead and gray moustache, as he enjoyed his quiet stroll down Broadway, thought of him as the lad of Araure, the horseman of Barinas, terror of the Spaniard, victor of Carabobo, and President of Venezuela? But though retired and unpretending in his exile, Paez was not neglected in New York; and the procession which followed him, but a few weeks since, to the steamer destined to bear him back to his native land,—a procession saddened, it is true, by the feeble condition to which an accident had temporarily reduced the chieftain,—showed that his solid worth was recognized and honored.

Not yet, however, is it time for the summing-up of his history. The exile of 1850 has been solicited to return to his country, and the ninth anniversary of banishment may find him occupying once more the Presidential chair. General Monágas having been deposed in March, 1858, repeated invitations were dispatched, by the Provisional Government, to Paez, entreating his return; and, after much cautious hesitation, he resolved, in the following September, to comply with the request. Subsequent events belong rather to the chronology of the day than to the page of history we have thrown open here. Our task is at an end; the career of the Llanero has been unfolded; we have placed ourselves in the presence of the comrade of Bolívar, and have witnessed the rise of the Venezuelan Republic.

BULLS AND BEARS.

[Continued.]

CHAPTER XI.

SHOWING AT WHAT COST OUR HERO
ESCAPED DROWNING.

THE boat lay at the wharf, a pretty little craft of six or eight tons, with a mainsail and jib. It was a delightful afternoon; a gentle westerly wind swept over a placid sea, and the sky was as clear as the mirror that reflected its exquisite blue. Greenleaf and Miss Sandford took their seats amidships, leaving the stern for the boatman. The ropes were cast off, and the sailor was about stepping aboard, when it was discovered that the fishing-lines had been left behind. Old Tarry was dispatched to bring them, and he rolled off as fast as his habitual gait allowed him. When he was fairly up the hill, Miss Sandford said,—

"You know how to sail a boat, don't you?"

"Yes," said Greenleaf, "I have frequently been out alone; but I thought I would not take the responsibility of a more precious freight."

"It would be delightful to have a sail by ourselves."

"Charming, truly! Our salt-water friend may be a very estimable person, but we should be freer to talk in his absence."

"Suppose you try it. I will sit here, and you take his place."

Greenleaf hesitated; the proposal was a tempting one, but he had no great confidence in his own skill.

"The sea is like a pond," continued his companion. "We can sail out a short distance, and then return for our pilot, if we like."

Greenleaf allowed himself to be persuaded. He shoved off the boat, hoisted sail, and they were soon lightly skimming the waters of the bay. They rounded the rocky point and stood for the east-

ward. Their boatman soon appeared on the shore and made frantic gestures to no purpose; they looked back and rather enjoyed his discomfiture.

Never did the sea have such a fascination for Greenleaf. He held the rudder and drew the sheets with a feeling of proud mastery, deeper and more exciting than the horseman feels on the back of his steed. These first emotions, however, gradually lost their intensity, and he resigned himself to the measureless content which the gentle motion, the bland air, and the sunny sky inspired.

What had been the character of Miss Sandford's regard for Greenleaf hitherto would be a difficult question to answer; it is doubtful whether she knew, herself. She had been pleased with his conversation and manners, flattered by his graceful and not too obsequious attentions, and proud of his success in his art. Living upon the pleasures of the day, without a thought of the future, she had never seriously reflected upon the consequences of her flirtation, supposing that, as in every former case, there would come a time of *ennui* and coolness. Besides, she had felt the force of her prudent sister-in-law's suggestion, that a man without an estate would never be able to supply the necessities of a woman of fashion. With all her *quasi* advances a degree of reserve was mingled, and she persuaded herself that she should never become entangled beyond the power of retreat. But Greenleaf was not an easy conquest. She was aware of her influence over him, and employed all her arts to win and secure his devotion; as long as the least indifference on his part remained, she was unsatisfied. But in this protracted effort she had drifted unconsciously from her own firm anchorage. Day by day his society had grown more and more necessary to her, and her habitual caution was more and

more neglected. The conduct of Greenleaf, without any design on his part, had been such as to draw her on irresistibly, until their positions had become reversed; she was now fascinated beyond self-control, and without a thought of the future, while he was merely agreeable, but inwardly cool and self-possessed. Still at times the strange thrills returned as the soft light of her eyes fell upon him, and the intoxication he felt at his first meeting with her again drowned his senses in delight.

They did not talk very freely that summer's day. The heart when full rarely pours itself out in words. A look, a pressure of the hand, or (if such improprieties are to be imagined) a kiss, expresses the emotions far better than the most glowing speech. It was enough for Marcia, steeped in delicious languor, to sway with the rocking boat, to feel the soft wind dallying with her hair, and to look with unutterable fondness at her companion.

As long as the ceremonies of society are observed, and people are kept asunder a room's distance, so that only the mind acts, and the senses are in repose, reserve may keep up its barrier. Words lose their electricity in passing through a cool tract of air, and Reason shows all things in her own clear white light. But establish a magnetic circle by contact, let hand rest in quivering hand, while eye looks into melting eye, and Reason may as well resign her sway. When the nerves tingle, the heart bounds, and the breath quickens, estates, honors, family, prudence, are of little worth. The Grundys, male and female, may go hang; the joy of the present so transcends all memory, so eclipses hope even, that all else is forgotten.

The boat careened somewhat, and Marcia changed her seat to the opposite side, quite near to Greenleaf. His right hand held the tiller,—his left, quite unconsciously, it would seem, fell into her open palm. The subtle influence ran through every fibre. What he said he did not know, only that he verged towards the momentous subject, and committed himself so far that he must either come plain-

ly to the point or apologize and withdraw as best he might. *Could* he withdraw, while, as he held her soft hand, that lambent fire played along his nerves? He did not give up the hand.

Poor little Alice! Her picture in his breast-pocket no longer weighed upon his heart.

The breeze freshened, the boat rose and fell with easy motion over the whitening waves. The sun all at once was obscured. They looked behind them; a heavy black cloud was rising rapidly in the west. Greenleaf put the boat about, and, as it met the shock of the sea, they were covered with spray. To go back in the wind's eye was clearly impossible; they must beat up, and, hauling as close to the wind as possible, they stood towards Swampscot. For a mile or two they held this course, and then tacked. But making very little headway in that direction, the bow was turned northward again. In coming about they shipped so much water, that Marcia, though by no means a coward, screamed out, "We are lost!" She flung herself into the bottom of the boat and laid her head in Greenleaf's lap like a frightened child. He soothed her and denied that there was danger; he did not venture to tack again, however, for fear of being swamped, but determined to run northwardly along the coast in the hope of getting ashore on some sandy beach before the fury of the storm should come. The boat now careened so far that her gunwale was under water; he saw that he must take in the mainsail. With some difficulty he persuaded Marcia to hold the tiller while he let go the halliards. The mainsail came down with a run, and the boat kept on with the jib only, though of course at a slower rate. They were still two or three miles from shore, and the storm increased momentarily. They saw Lynn Beach without hope of gaining it, the wind driving them northward. Neither could Greenleaf run into the little bay of Swampscot. In spite of his efforts the boat shot by Phillips's Point, and he must therefore run upon the rocks beyond the

Point or make for Marblehead harbor. But the latter was an untried and dangerous course for an inexperienced boatman, and, grim as the coast looked, he was obliged to trust to its tender mercies for the chance of getting ashore. The rain now fell in blinding torrents, and a blackness as of night brooded over the sea. Greenleaf was utterly bewildered, but held on to the tiller with his aching, stiffening hand, and strove to inspire his companion with courage. The boat was "down by the head," on account of the wind's drawing the jib, and rolled and plunged furiously. Behind were threatening billows, and before were ragged, precipitous rocks, around which the surges boiled and eddied. Greenleaf quailed as he neared the awful coast; his heart stood still as he thought of the peril to a helpless woman in clambering up those cliffs, even if she were not drowned before reaching them. Every flash of lightning seemed to disclose some new horror. If life is measured by sensations, he lived years of torture in the few minutes during which he waited for the shock of the bows against the granite wall. Marcia, fortunately, had become insensible, though her sobbing, panting breath showed the extremity of terror that had pursued her as long as consciousness remained. Nearer and nearer they come; an oar's length, a step; they touch now! No, a wave careens the boat, and she lightly grazes by. Now opens a cleft, perhaps wide enough for her to enter. With helm hard down the bow sweeps round, and they float into a narrow basin with high, perpendicular walls, opening only towards the sea. When within this little harbor, the boat lodged on a shelving rock and heeled over as the wave retreated. Greenleaf and his companion, who had now recovered from her swoon, kept their places as though hanging at the eaves of a house. They were safe from the fury of the storm without, but there was no prospect of an immediate deliverance. The rock rose sheer above them thirty or forty feet, and they were shut up as in the bottom of a well. The waves

dallied about the narrow entrance, shooting by, meeting, or returning on the sweep of an eddy; but at intervals they gathered their force, and, tumbling over each other, rushed in, dashing the spray to the top of the basin, and completely drenching the luckless voyagers. This, however, was not so serious a matter as it would have been if their clothes had not been wet before in the heavy rain. The tide slowly rose, and the boat floated higher and higher against the rock, as the shadows began to settle over the gulf.

In spite of the peril they had encountered, and their present discomfort and perplexity, Greenleaf now experienced an indescribable pleasure. Marcia was exhausted with fatigue and terror, and rested her head upon his shoulder. Unconsciously, he used the cheering, caressing tones which the circumstances naturally prompted. It was an occasion to draw out what was most manly, most tender, most chivalric in him. The pride of the woman was gone, her artifices forgotten. In that hour she had looked beyond the factitious distinctions of society; she had found herself face to face with her companion without disguise, as spirit looks upon spirit, and she felt herself drawn to him by the loyalty which a superior nature inevitably inspires.

A slight movement of the boat caused Greenleaf to turn his head. Just behind him there was a shelf not three feet above the gunwale; beyond that was a second step, and still farther a winding fissure. After measuring the distances again with his eye, to be sure that he should raise no illusive hope, he pointed out to Marcia the way of escape. Their conversation had naturally taken an affectionate turn, and Greenleaf's delicate courtesy and hardly ambiguous words had raised a tumult in her bosom which could no longer be repressed. She flung herself into his arms, and with tears exclaimed,—

"Dear George, you have saved my life! It is yours! Take me!"

The rush of emotion swept away the last barrier; he yielded to the impulse; he clasped her fondly in his arms and

gave his heart and soul to her keeping. Carefully he assisted her up by the way he had found, and when at last they reached the top of the cliff, both fell on their knees in gratitude to Heaven for their preservation. Then new embraces and protestations. Rain and salt spray, hunger and fatigue, were of little moment in that hour.

Near the cliff stood a gentleman's villa, and to that they now hastened to procure dry clothing before returning home. They found the welcome hospitality they expected, and after rest and refreshment started to walk to Swampscot, where they could obtain a carriage for Nahant. But at the gate they met Easemann and Mrs. Sandford, who, alarmed at their long absence, had driven in a barouche along the coast in hope of hearing some tidings of the boat.

The wanderers were overwhelmed with congratulations, mingled with deserved reproofs for their rashness in venturing forth without their pilot. On the way home, Greenleaf told the story which the reader already knows, omitting only some few passages. Easemann turned and said, with a meaning emphasis,—

"I thought so. I thought what would happen. You aren't drowned, to be sure; but some people *can't* be drowned; better for them, if they could!"

Greenleaf made no reply to the *brusque* sarcasm, but drew Marcia closer to his side. He could not talk after such an adventure, especially while in contact with the woman for whom he had risked so much.

Poor little Alice!

CHAPTER XII.

THE BEGINNING OF THE END.

THE flurry in the money-market gradually increased to a storm. Confidence was destroyed, and business at a stand. The daily bulletins of failures formed the chief topic of conversation. The merchants and bankers, especially those who held Western lands, Western securities, or Western credits, went down one after

another. Houses tumbled like a row of bricks. No class was safe at a time when the relations of debtor and creditor were so complicated and so universal. Stocks went down with a run. Bullion was not disappointed in his calculations, and Fletcher, in spite of his insane whims upon the subject of chances, proved himself shrewd, vigilant, and energetic. Flushed with success, he made bolder ventures, and the daily balances grew to be enormous. Within the first fortnight, Bullion had given Fletcher notes for over five thousand dollars as his share of the profits. The brokers, even, were astonished at the silent but all-powerful influence that pressed upon the market, bringing the best stocks down till they sold like damaged goods at a sheriff's auction. But Tonsor, the lucky agent, kept his counsel. Daily he attended the sales at the Board, with apparently exhaustless resources, *bearing* pitilessly, triumphantly, until the unlucky bulls came to think the sight of his face was an ill omen.

Of all men, Sandford felt this steady, determined pressure most keenly. To sustain the credit of those in whose affairs he was concerned, he was obliged from time to time to put under the hammer stocks which had been placed in his hands. Every sale showed the value of these securities to be sinking, until it really seemed that they would come to be as worthless as the old Continental currency. But neither he nor other sufferers had any remedy;—stocks were worth only what they would bring; prices must take care of themselves; and the calm, determined bids of Tonsor were like the voice of Fate.

In his extremity, Sandford thought of Monroe, and remembering his own personal responsibility for the sum he had received, he determined to "hedge." So he sent for Monroe; he showed him the notes, all amply secured, if any man's name could be said to give security.

"You see," said Sandford, "how careful I have been. Two good names on every note. They may fail, it is true. So

stocks may go for a song, and universal bankruptcy follow. See, there is a note signed by Flint, Steel, & Co., and indorsed by Lameduck, — another by Kiteflyer and Co., indorsed by Burnt-wick, — and this by Stearine & Star, indorsed by Bullion. Every dollar will yield at least the eight per cent. I promised."

"The names are good, I should think, — as long as anybody is good," said Monroe. "Still I should feel safer with a mortgage, or even with stocks; for if these do go down, they will come up again."

"Stocks!" said Sandford, with an air of contempt. "There isn't a bank that is worth *that*," — snapping his fingers. "They keep on their legs only by sufferance; if put to the test, they could not redeem their notes a day. The factories are worse yet, — rotten, hollow. Railroads, — eaten up with bonds and mortgages."

"Well, perhaps you have done wisely. Time will show."

"I sent for you," said Sandford, "because I knew you must be anxious. I gave you a part of the interest, you know. You'll take these notes? You approve of my judgment?"

"I must, I suppose. Yes, — you can make the transfers to me, if you like. They may as well remain with you, however."

Sandford drew a long breath with a sense of relief. If he were to be hard pushed, these notes would serve for collateral securities.

Monroe left the office, not quite so cheerful as when he came. He remembered his mother's regrets at the disposition of the money, — their all. His own health had been failing. His relative, whom he went to see, was dead; and now that his cousin had accepted his invitation to come and live with him, he felt an increased solicitude about the future.

Sandford's main anxiety now was to provide for Stearine's note, which he felt assured the promisor could not meet. He dared not let the loss fall upon the

Vortex until every expedient had been tried; for such an affair would lead at once to an unwelcome investigation of the Company's accounts. He determined first to see Bullion, to whom the note was due. He found that gentleman cool, tranquil, and not at all frightened, as he supposed he would be, at the idea of a protest. The truth was, that Bullion had already made so much in his operations, that he could easily "lift" the note; but as long as his capital was yielding such golden returns, he was not disposed to use it in that way until obliged to do so. Besides, he believed, from Sandford's anxiety, that he would himself make an effort to raise the money elsewhere. He was quite easy, therefore.

"Stearine must look out for his own paper; if he don't, he must go down. If I have to pay it, I shall any way get a dividend out of him, and, what is better, get a few days' time. Time is money, these days."

There was no course for Sandford, then, but to sell or hypothecate the shares of stock he held. Then the thought of the still falling prices frightened him. The stocks he had to sell were already quoted far below their usual price, and he, in common with all the street, had heard of the secret irresistible influence that was bearing down upon the daily sales. If Tonsor should come into market against him, the consequences might be ruinous. It was out of the question for him to stand up against any further serious depreciation.

To Tonsor he went, in the hope of persuading or buying him off from his destructive course. As he entered the broker's door he saw Fletcher hand over a package of bills, and just caught the words, "Forty-five thousand." What was Fletcher doing? He remembered that he had not met his old agent for some days, and he knew well that such a scheming brain would not be idle in a time like this. A light flashed upon him. Was Fletcher in the conspiracy? If he knew and shared in the scheme, the secret should be wrenched from him.

Mr. Sandford affected, therefore, to have come to see Fletcher only, and drew him into a corner.

"Fletcher, what's in the wind? Don't Danforth & Co. do their own buying and selling? They don't employ Tonsor, do they?"

"You don't expect me to tell their business, do you?"

"Well, no,—not exactly. I thought you might have dipped in on your own account."

"That's a good joke. How should I have the funds?"

"Any chances to invest, Fletcher? I'll give liberal commissions."

"Chances are plenty for those that have money."

Fletcher started as though he would return to his place of business. But Sandford dropped his smooth and honeyed tone and spoke more decidedly.

"You can't blind me, Fletcher. You know what the bears are doing. They are ruining everything, knocking down prices, destroying credit, using what little money there is for speculation, thriving on the distress of the public. It's no better than highway-robbery; and it's my belief you are concerned in the plot."

"You had better go to the nobs, and not talk to me. You might as well pitch into the tellers or messengers when the banks suspend payment."

"No, — I shan't let you off. The 'nobs,' as you call them, dare not be seen in this matter; they will pocket the chestnuts, but they will get some cat's-paw to rake them out of the ashes."

"Well, what are you going to do about it?"

Fletcher was astonished at his own temerity as soon as he had uttered the words; but his prosperity and the support of Bullion had given him some courage.

"Do? you scoundrel!" said Sandford, in a rage that rarely overtook him. "What am I going to do? I'll break every bone in your skin, if you don't give up this plot you are in. Do you *dare* to set yourself to put *me* down? Don't let any of your tools *dare* to run my

stocks! If you do, I'll go to a magistrate and have you arrested."

"When I am arrested, my good Sir," said Fletcher, with a face pale as death, but with lips firmly set, "I advise you to have your accounts ready. For I shan't be in the jug a minute before you'll have to show your papers and your cash-book to the Company."

Sandford staggered as though he had received a blow from a bruiser. He gasped for breath,—turned pale, then red,—at length with difficulty said, "You defy me, then? We shall see!"

"You have it;—I defy you, hate you, despise you! I have been your slave long enough. Do your worst. But the instant you move, I promise you that a man will look after you, d—d quick."

Sandford looked around. Tonsor was calmly counting the pile of bank-notes before him. It was near eleven. The Board would soon commence its session. He stepped into the street, slamming the door after him.

"Pretty well, for a beginning!" said Fletcher, meditating,—a shot betwixt wind and water. So much for Bullion's advice. Bullion is a trump, and Sandford be hanged!"

CHAPTER XIII.

SED REVOCARE GRADUM!—

THE fatigue, drenching, and terror of the unlucky day's sail produced their natural effects upon a rather delicate constitution. Miss Sandford was ill the following day, and, in spite of the doctors, a fever set in. Her sister-in-law was assiduous in her attentions, and Greenleaf called daily with inquiries and tender messages. While thus occupied, he had little time to consider the real state of his feelings towards the new love, still less to reflect upon his conduct towards the old. For the first time in his life he became a coward. If he meant to abide by his last engagement, honor should have led him to break the unwelcome news to Alice as best he might, and extricate himself from his false

and embarrassing position. If he still loved the girl of his first choice, and felt that his untruth to her was only the result of a transient, sensuous passion, it was equally plain that he must resolutely break away from the beautiful tempter. But he oscillated, pendulum-like, between the two. When Marcia began to recover, and he was allowed to see her in her chamber, the influence she had at first exerted returned upon him with double force. In her helplessness, she appealed powerfully to the chivalric sentiment which man feels towards the dependent; her tones, softened by affection and tremulous from weakness, thrilled his soul; and the touch of her hand was electric. When he returned to his studio, as he thought of the trustful, unsuspecting, generous heart of Alice, he was smitten with a pang of remorse too keen to be borne. He tried to look at her picture, but the face was to him like the sight of a reproving angel. He could not look steadily upon the placid features; the calm eyes turned his heart to stone; the sweet mouth was an accuser he dared not face. But when next he saw Marcia, all was forgotten; while under her spell he could have braved the world, only too happy to live and die for her.

For days this struggle continued. His art had no power to amuse him or engross his thought. His friends were neglected,—Easelmann with the rest. His enemy could not have wished to see him more completely miserable. He knew that he must decide, must act; but whatever might be his determination, he had a most painful duty to perform. Let him do what he might, he must prove himself a villain. He loathed, detested himself. Sometimes he was tempted to fly; but then he reflected that he should in that way prove a scoundrel to two women instead of one. For three weeks he had not written to Alice, and the last letter he had received from her was now a month old. He took it from his pocket, where it lay among the perfumed and tinted evidences of his unfaithfulness. It

was a simple thing, but how the gentle words smote upon his heart!

“MY DEAR GEORGE, (*her dear George!*)—How I wish I could be with you, to rejoice over your success! You are really a great artist, the papers say, and are becoming famous! Not that I love you the more for that. If you were still unknown to the world, still only a lover of beauty for its own sake, and content with painting for your own pleasure, I am not sure that I should not love you the more. But you will believe me, that I am proud of your success. If I am ambitious, it is for you. I would have the world see and know you as I do. Yet not as I do,—nobody can do that. To the world you are a great painter. To me—ah, my dearest George!—you are the noblest and truest heart that ever woman rested upon. Nobody but me knows that. I shall be proud of the homage the world gives you, because at the same time I shall say, ‘That is my betrothed, my husband, whom they praise; what his heart is, no woman knows but me’”—

He could read no farther. His emotions were too powerful to be borne in silence. He yielded, and, strong man as he was, bowed his head and wept. The tears of childhood, and oftentimes the tears of woman, lie shallow; they come at the first bidding of sorrow or sympathy. But it is no common event, no common feeling, that prevails over man; nothing less than a convulsion like an earthquake unseals the fountain of tears in him. Whoever has seen the agony of a manly nature in groans and tears and sobs has something to remember for a life-time.

It was a long night,—a night of unutterable suffering, struggle, and doubt. The hours seemed shod with lead. Sleep seemed banished from the universe. But with the coming of dawn the tempest was stilled. In the clear light of day the path of duty seemed plain. He felt sure that in his heart

of hearts he loved Alice, and her only. He would go at once to Marcia and tell her of his perfidy, implore the forgiveness of silence and charity, and bid her farewell. When he had reached this conclusion he became calm. As he looked out from his window, he saw the world awake from slumber, and he shared in the gladness of Nature. He even rejoiced in the prospect of deliverance from his wretched condition, although he well knew the humiliation he must pass through to attain it. He waited impatiently for the hour when he could present himself before Marcia, own his duplicity, and take leave of her. He felt strong in his new resolution. All vacillation was past. He could face any temptation without one flutter of inconstancy towards his first-love.

Greenleaf was not the only one in the city with whom the night had passed heavily. The cloud still hung over the mercantile world. Failures, by dozens, were announced daily. Men heard the dismal intelligence, as in time of pestilence they would hear the report of the dead and dying. No business-man felt secure. No amount of property, other than ready money, was any safeguard. Neighbor met neighbor, asking, with doleful accent, "Where is this going to end?" The street, at 'change hours, presented a crowd of haggard faces, furrowed with care, their eyes fixed and despairing. Some looked white with apprehension, some crushed and tearful, others stony, sullen, or defiant. Whatever was bravest had been drawn out in manly endeavor; whatever was most generous was excited to sympathy and brotherly-kindness; whatever was most selfish was stimulated by the fierce desire for self-preservation; whatever was most fiendish was roused by blind rage and useless resentment. In the halcyon days of plenty and prosperity men know little of each other; trade has its accustomed way; balances are smoothly adjusted; notes are given and paid with smiling faces; one would think that honor and manliness were the commonest of

qualities. Now, every man was put to the severest proof, and showed the in-born and essential traits of his nature. Like a ship's crew on a raft, alone on the ocean without provisions, they looked at each other as they were. There, in their extremity, were to be seen calm resignation, unmanly terror, moody despair, turbulent passion, and stealthy, fiendish glances that blinked not at cannibalism itself.

Mr. Sandford, almost for the first time in his life, had been rendered nervous with apprehension. To be sure, he was not one of the "sleek-headed men that sleep o' nights"; he was always busy with some scheme; but, heretofore, success had followed every plan, and he had gone on with steadfast confidence. Now the keenest foresight was of no avail; events defied calculation; misfortunes came without end and without remedy. It was the moment of fate to him. He had gone to the last verge, exhausted every resource, and, if there were not some help, as unlooked for as a shower of gold from heaven, he must stop payment,—he, whose credit had been spotless and without limit, whose name in the financial world was honor itself, whose influence had been a tower of strength in every undertaking. It was not without a struggle that he brought himself to look this inexorable fact in the face. Marcia and his sister-in-law heard him as he paced the room through the night; they had noticed his abstracted and downcast air the preceding evening; and at breakfast the few words that escaped from between his firm-set lips were sufficiently ominous. It was the first morning that Marcia had appeared at the table, and in her feeble condition the apprehension of danger was intense and overpowering. Mrs. Sandford tried in vain to change the conversation, by significant glances towards the invalid; but the brother was too much absorbed to notice anything outside of the gloomy circle that hemmed him in. Muttering still of "ruin," "beggary," and similar topics, so admirably adapted to cheer the

convalescent, he swallowed his breakfast like an animal, left the room without his usual bland "good morning," and slammed the street-door after him.

A fit of hysterics was the natural consequence. The kind and sisterly widow bore, rather than led, Marcia to an upper room, propped her with pillows in an arm-chair, and employed every tender and womanly art to soothe her excited nerves. Calmness came, but only with exhaustion. The door-bell rang. Mrs. Sandford gave an inaudible direction to the servant. But Marcia exclaimed, "It is George! I heard his step on the pavement. I must see him. Let him in." Mrs. Sandford remonstrated to no purpose, and then went to her own room.

It was "George." He entered the room with a pale face, and a look betokening both suffering and resolution. He was evidently struck by the appearance of Miss Sandford, rightly judging that she was not able to bear what he had come to tell her. He would have uttered a few commonplace courtesies, and deferred his weighty communication to another time. But Marcia's senses were preternaturally sharpened; weak as a vine without its trellis, instinct seemed to guide her to clasp by every tendril the support to which she had been wont to cling. She noticed a certain uneasiness in Greenleaf's demeanor; ready to give the worst interpretation to everything, she exclaimed, in a quick, frightened manner, "George, dear George, what is the matter? You are cold, you are distant. Are *you* in trouble, too, like all the world?"

"Deeply in trouble," he answered gravely, — still standing, hat in hand.

"Trouble that I cannot soothe?"

"I am afraid not."

"And you won't tell me?"

"Not to-day."

"Then you don't love me."

Greenleaf was silent; his lips showing the emotion he strove to control. Her voice took a more cheerful tone, as if she would assure herself, and, with a faint smile, she said,—

"You are silent; but I am only childish. You *do* love me, — don't you, George?"

"As much as I ever did."

A mean subterfuge; for though it was true, perhaps, to him, he knew it was a falsehood to her. She attempted to rise from her chair; he sprang to support her.

"You are so gloomy, reserved, to-day!" she continued.

Still Greenleaf was silent. He aided her to resume her seat; but when he had done so, she detained him, seizing his arm and then his hand. His heart beat rapidly, and he turned away his head to avoid the fond but keen scrutiny of her eyes,—at the same time gently, but ineffectually, attempting to free his hand. Once more he resolved, since the conversation had taken such a turn, to risk the consequences, and prepare her mind for a separation. But a sudden thought struck her, and, before he could frame a sentence, she spoke:—

"You have heard bad news this morning?"

He shook his head.

"No,—I know you are not mercenary; I would not wrong you with the suspicion."

"What suspicion, pray?" he asked, turning suddenly towards her.

"You have not heard?"

"I have heard nothing."

"Pity my foolishness. But my brother is in difficulty; he may fail; perhaps has failed even now. Pray, don't chide me for my fears. All the world goes with the rich and the prosperous."

"The world has very little company just now, then," said Greenleaf, with a grim smile. "But assure yourself," he continued: "the dowry of my wife is a matter I have never considered. *With the woman I love*," said he, with deep emphasis, "honest poverty is what I do not dread."

Interpreting this fervent declaration in the natural way, Marcia reached forth her arms with sudden fervor, drew him nearer, and covered his forehead, lips,

and cheeks with kisses. Every kiss fell like a spot of mildew on his flesh; her caresses filled him with shame. Could he undeceive her? In her feeble condition, the excitement into which she had been thrown by her brother's danger was all she could bear. False as his position was, heartless and empty as his soothing words and caresses were, he must continue to wear the mask, and show himself as he was at some time when she had no other trouble to weigh her down. Still she chid his gloomy reserve, his absent air, and mechanical movements. Was he weak, if under such influences his fixed resolves bent?—if his nerves felt the old thrill?—if his voice took a softer tone?—and if he parted from her with something of his former tenderness? He tried to excuse himself to his conscience by the plea, that the deception once begun must be kept up until it could be ended with safety. For he saw that her heart was really bound up in him. She no longer kept up the brilliant fence of repartee; she had abandoned all coquettish arts, and, for once at least, was sincerely, fondly, even foolishly, in love. Home he went, sadder than before, his conscience yet more aroused, and his resolutions farther than ever from accomplishment.

Poor little Alice!

CHAPTER XIV.

EVERY MAN FOR HIMSELF.

MR. SANDFORD walked towards his office, that fine autumn morning, in no amiable mood. Nature seemed to protest against his angry violence; the very stones of the pavement seemed to say,—“He need not thump us in that way; *we* can't pay his notes.” The trees along Mount-Vernon Street rustled their leaves with a shudder, as he passed under them; they dropped no benison upon a face which even the golden morning could not lighten. “Let him stride on!” said they; “we shall be more cheerful in company with the maids washing the sidewalks or taking out the children (blessed darlings!) for an airing.” Canaries

ceased their songs in the windows; urchins stopped their hoops and stood on the curbstones, eyeing the gloomy man askance. When he passed the Granary Burying-Ground, he saw a squirrel dart down a tree, and scamper over the old graves in search of some one of his many stores; then rising on his haunches, he munched the pea-nut which he had unearthed, (the gift of some schoolboy, months ago,) as much as to say,—“*We* know how to look out for hard times; but what have you done with *your* pea-nuts, old fellow, that you look so cross? Can't get 'em, eh? You should put 'em where you'll know where they are.” A whisk of his tail and he flew up the tree. The lesson was lost upon the financier. At the office-door he met Bullion,—his face a trifle more ruddy, his eye with a colder glitter, and his queer eyebrow pointing with an odder significance.

“How are you, Sandford?”—A very short nod.—“Cool, this morning.”—Standing with his dumpy legs apart, he nibbled at the ivory head of his cane.

“Mr. Bullion,” said Sandford, “you must help me. You must lift that note. Come, I know you can do it,—and I'll make it worth your while.”

“Can't do it; you want a long extension, I s'pose.”

“Say three or four months.”

“Time is money, as I told you before. In four months, with forty thousand dollars, I could—do pretty well,” ending the sentence in a lower tone, that indicated a desire to keep his first thought back.

“In a time like this, Mr. Bullion, it is the duty of every man to assist his neighbor to the extent of his ability. If there is no forbearance, no brotherly aid, how are the complicated settlements of a mad community like this to be made? There is not money enough to pay what must be paid.”

The eyebrow was stiffly pointed as Bullion answered,—

“I do forbear. I must forbear. Stearine owes me; you indorse; you can't pay, neither of you. I sha'n't get the money. I must go without.”

It was an injured tone.

"Then why do you let it go to protest?"

"Only a form, Sandford. Usage of the mercantile world. Very irregular not to do it. Sorry, but can't help it."

Mr. Sandford's patience was exhausted.

"It is my turn to-day, Bullion; I have no further resource; I am ruined. You feel strong and look upon my distress in triumph. But your turn will come. Mark my words. Within a fortnight I shall see you rushing down State Street in despair; your property will be swept away with a flood, and you will be a beggar,—as you deserve to be. Damn your stony heart!"

It was the first outburst of profanity from Mr. Sandford,—too fastidious, usually, to allow himself the use of such expletives.

"Sorry to see you excited, Sandford. Best to keep temper. Guess you and Fayerweather will raise the money. Pity Stearine hadn't wick enough in him to stand alone. Rather a poor candle, he is,—he! he! Morning!"

The gray eyes twinkled, the eyebrow whisked, and the sturdy legs bore the creditor away.

Entering the office, Mr. Sandford tried to assume a cheerful look. He looked over the list of failures, in the "Independent," with something of the interest which a patient in a hospital would feel when overhearing the report from the dead-house. Was there no one of the bald or grizzly-haired gentlemen who smiled so benignly whom he could ask for aid? Not one; he knew their circumstances; they had no money at command; all their property was locked up in investments. He thought of the many chairmen and directors in benevolent associations with whom he was connected. No,—they were either men of moderate means, or had some son or nephew or brother in business whose credit they must uphold. How gladly would he barter all his parchment testimonials for one good "promise to pay"!

He groaned almost audibly, and wondered how he could pass the time till the close of bank-hours. The suspense was a torture as keen as the calamity itself.

A visitor entered; it was Plotman. He came with a cheerful, even exulting, look.

"Good news, Sandford!"

"News!" exclaimed Sandford, impetuously. "What news? How much?"

In his absent state he forgot that Plotman was not aware of his thoughts, and associated good news only with an accommodation to serve his present need. But his fluttering expectations were dashed to the ground with the reply.

"How much," did you say? A clean majority over all. Your name stands at the head of the ticket."

"I am obliged to you," replied Sandford, sadly, "but I don't think I can accept the nomination."

"Well, that is rather strong," said Plotman. "You'd best keep your modesty for the papers; it's thrown away on me."

"I really can't bother with politics."

"Why in the Devil, then, did you lay your corns to get the place, and make me all this trouble for nothing?"

"I am really sorry, Plotman; but, to tell you just how it is, I am so much involved in this fearful monetary pressure that I have no time nor heart for anything else."

"Confounded spooney!" muttered Plotman, between his teeth. "If I'd known he was so weak in the knees, I'd have gone in for Spreadingeagle, who offered a handsome figure."

"Come in to-morrow, Plotman, and we'll talk about it. I can't think about it now. I'll make all right with you."

Still muttering, the disappointed politician departed, leaving Sandford in a deeper abyss than before. To prevent unwelcome visits, the latter left word with his clerks that he could see no one whatever.

To wile away the time, he took out his cash-book and private papers. There was about a thousand dollars in bank.

"It will be best to draw that," thought

he, "for there's no knowing what may happen."

And the office-boy was dispatched with a check for the amount.

"Let us see what other resources. There are Monroe's notes,—ten thousand dollars. I can raise something on them. I'll borrow from Tonsor, who seems to have funds enough."

He sent a clerk and succeeded in obtaining eight thousand dollars for five days, by depositing the notes.

"If worst comes to worst, I have nine thousand to fall back upon. Now, what next? Fletcher's note for five hundred, with the rather peculiar admission at the beginning. I wonder, now, what he would give for this little paper? Possibly he is in funds. He's a scheming devil and hasn't been idle in this gale of wind. I'll send for him."

Fletcher entered with an air of confidence.

"Well, Mr. Sandford, you don't bear malice, I see. If you didn't want to get a saucy answer, you shouldn't have threatened, the other day."

"You were hardly civil, Fletcher," said Sandford, gravely, "and rather forgetful, besides. If I were you, I wouldn't bluster until a certain piece of paper was safe in my possession."

"Do you suppose I ever forget that paper, or how you bullied it out of me? But you know that at the time when I used that five hundred dollars, I had money enough, and felt as sure of returning it the next day as you do of paying the ten thousand you had of Monroe."

Sandford started.

"How did you know whose money I had?"

"Never mind. I hear a great many things. As I was saying, I didn't steal the money, for you didn't miss it till I told you; and if I hadn't been a coward and a fool to boot, I should never have signed that cursed paper."

"I have it, though. The law calls it a confession of theft."

Fletcher winced.

"You have told me that often enough

before. You needn't touch me on the raw to make me remember it."

He waited, but Sandford made no reply. Fletcher continued:—

"Well, what is it? You've something on hand, or you wouldn't have sent for me."

"You propose to pay sometime, I believe?"

"Of course, I do. I've offered to pay times enough, you know. I can get the money in ten minutes."

"Can you! How much?"

"Why, the five hundred and interest."

"I rather think the document is worth more money."

"You'd take my heart's blood for it, I know. But you can't get any more money than I have got."

"You were very ready in promising five hundred in ten minutes. It seems to me that in an hour you might raise a larger sum."

"Do you suppose I am a capitalist?—that I own Fogarty, Danforth, and Dot?"

"I'm sure, I can't tell. Stranger things have happened."

"I wonder if he suspects my connection with old Bullion?" thought Fletcher.

"I'll make you a fair proposition. Fletcher. I need some money, for a few days. Get me thirty thousand dollars for a week, say; I'll pay a liberal interest and give up the paper."

"I can't do it. The figure is altogether above me. You don't want me to rob my employers?"

"'Rob' is a hard word, Fletcher. No, I counsel no crime. You don't want anything more to think of. But you may know some chance to borrow that sum?"

Fletcher mused. "If Sandford comes to a man like me for such a sum, it must be because he is devilish hard up; and if I get him the money, it would likely be sunk. I can't do it."

"No, Mr. Sandford, it's out of the question. Everybody that has money has twenty applications for every dollar."

"Then you'd rather see this paper in an officer's hands?"

Fletcher's face blanched and his knees

shook, but he kept his resolution in spite of his bodily tremor.

"I have been like a mouse cuffed between a cat's paws so long that I don't care to run. If you mean to pounce upon me and finish me, go ahead. I may as well die as to be always dreading it. But you'll please remember what I said about overhauling your accounts."

Sandford found his man firmer than he had expected. He changed his tactics.

"Fletcher, as you can't do what I want, how much will you give outright for the little obligation? You shall have it for fifteen hundred dollars. Come, now, that's reasonable."

"Reasonable as the fellow who puts a pistol to your head on a dark night in the middle of Cambridge bridge."

"Tut, tut! Don't talk of highway-robbery! I think I am letting you off cheap."

"How do you suppose I can raise fifteen hundred dollars?"

"That is your affair."

"You are as cruel as a bloodhound after a runaway nigger."

"I have once or twice remonstrated against your use of harsh words."

"What's the use of being mealy-mouthed? I owe you five hundred dollars. Every dollar beyond that you get from me you rob me of; and it doesn't matter whether it is a pistol or a writ that you threaten me with."

"You persist in a violent tone."

"I can't talk to suit you, and I shall stop. We shall never agree. I'll tell you, though, what I will do. I'll give you a note, to-morrow, for a thousand dollars, on short time, with a good name."

"Mohey, Fletcher!—money! I don't want any note."

"Well, I'll see what I can do. Perhaps I *can* get the money."

"And, Fletcher, I advise you to settle the affair to-day. It has stood quite long enough. Just devote to-day to this little matter. Come in before two,—not later than three, at any rate. Perhaps your employers might advance it,—that is, rath-

er than have their clerk compromised. Suppose I lay the matter before them?"

Fletcher's rage broke out afresh. He gnashed his teeth and foamed at the mouth. If he had had a weapon, it might have fared hard with his oppressor. But his anger was inarticulate,—too mighty, too tumultuous, for words. He left the office, his eyes glowing like a cat's, and his fringy moustache trembling over his white teeth.

Mr. Sandford was somewhat exasperated, and rubbed his smooth hands with energy. "I think he'll come back," thought he. "Failure is inevitable. Let it come! We must bear it as we can. And for a ruined man I don't know of any consolation like a little ready money. Now to play my last cards. These shares which I own in the Vortex are worth more to-day than they are likely to be to-morrow. It would be a shame not to dispose of them while they will bring something. Fayerweather and the others who have agreed to buy at ninety per cent. are at the Board. I'll get a new hand to take them in. They won't suspect, for they think Stearine's note has been extended."

He called a junior clerk and dispatched the shares to a broker to be sold for cash on account of whom it might concern. He then locked himself in the back office to be free from troublesome visitors, keeping a cautious lookout for Fletcher, whom he expected, and for the clerk who was to bring the money. His chief anxiety was lest Mr. Fayerweather should come before the sale was effected; and he was in a fever until the money was brought to him. Through the window he saw his friends Monroe, Bullion, and others, who called for him and were denied by his order; he chose to remain unseen.

Fletcher did not return. In going out he met Bullion, and, telling him that he had to pay Sandford a thousand dollars, asked for a part of the money due him.

"Don't be a fool," replied that sturdy financier. "Sandford will fail to-day, probably. That's the reason for his hurry to get the money. Let him sweat.

Keep your funds. You can pay his assignee any time these six months to come."

It was near two o'clock. Mr. Sandford had in his pocket the proceeds of the Vortex shares, the loan from Tonsor, and his balance from bank,—a comfortable sum altogether; and he thought it not prudent to risk the whole by waiting for Fletcher, who, after all, might not come. So, seeing the coast clear, he put on his surtout and walked out of the front door with an unconcerned air.

The notary came with the inevitable protest. Mr. Fayerweather was the astounded individual who received it. A sudden light broke upon him. He was swindled. He took out the Vortex shares which he had just bought by agreement, and, turning to the transfer-book, found

that they were Sandford's. The Secretary had weathered the President with a vengeance.

The lawyer to whom the protested note came happened to hold other claims against Mr. Fayerweather and the Vortex, and, naturally judging that the Company might be involved in the difficulties of its officers, he commenced suit without a moment's delay. Ill news flies fast. In an hour after the first writs were served, suit was brought by Tonsor and other creditors, and the office was shut. The safe was found to hold nothing more valuable than duplicates of policies, the Company's bank-account was overdrawn, its stocks and bonds were sold or pledged, and its available assets consisted of the office-furniture, a few reams of paper, and half a dozen sticks of sealing-wax.

[To be continued.]

"THE NEW LIFE" OF DANTE.

[Continued.]

II.

WERE the author of the "*Vita Nuova*" unknown, its story of youth and love would still possess a charm, as standing in the dawn of modern literature,—the first book in which modern sentiment finds free expression. It would be of interest, as contrasted with the later growth of the sentimental element in literature, which speedily exhibits the influence of factitious feeling, of self-conscious effort, and of ambitious display. The sentiment of the "*Vita Nuova*" is separated by the wide gulf that lies between simplicity and affectation from the sentimentality of Petrarch's sonnets. But connected as it is with Dante's life,—the first of that series of works in which truth, intensity, and tenderness of feeling are displayed as in the writings of no other man,—its interest no longer arises merely from itself

and from its place in literature, but becomes indissolubly united with that which belongs by every claim to the "*Divina Commedia*" and to the life of Dante.

When the "*Vita Nuova*" was completed, Dante was somewhat less than twenty-eight years old. Beatrice had died between two and three years before, in 1290; and he seems to have pleased himself after her loss by recalling to his memory the sweet incidents of her life, and of her influence upon himself. He begins with the words:—

"In that part of the book of my memory before which little can be read is found a rubric which says: *Incipit Vita Nova* [*The New Life begins*]. Under which rubric I find the words written which it is my intention to copy into this little book,—if not all of them, at least their meaning."

This introduction, short as it is, exhib-

its a characteristic trait of Dante's mind, in the declaration of his intention to copy from the book of his memory, or, in other words, to write the true records of experience. Truth was the chief quality of his intellect, and upon this, as upon an unshaken foundation, rest the marvellous power and consistency of his imaginations. His heart spoke clearly, and he interpreted its speech plainly in his words. His tendency to mysticism often, indeed, led him into strange fancies; but these, though sometimes obscure, are never vague. After these few words of preface, the story begins:—

"Nine times now, since my birth, the heaven of light had turned almost to the same point in its gyration, when first appeared before my eyes the glorious lady of my mind, who was called Beatrice, by many who did not know why they thus called her.* She had now been in this life so long, that in its time the starred heaven had moved toward the east one of the twelve parts of a degree;† so that about the beginning of her ninth year she appeared to me, and I near the end of my ninth year saw her. She appeared to me clothed in a most noble color, a becoming and modest crimson, and she was girt and adorned in the style that suited her extreme youth. At that instant, I say truly, the spirit of life, which dwells in the most secret chamber of the heart, began to tremble with such violence, that it appeared horribly in the least pulses, and, trembling, said these words: *Ecce deus fortior me, qui veniens dominabitur mihi!* [Behold a god, stronger than I, who, coming, shall rule me!‡] "

* It may be that Dante here refers to the meaning of the name Beatrice, — *She who renders happy, She who blesses.*

† According to the astronomy of the times, the sphere of the stars moved from west to east one degree in a hundred years. The twelfth of a degree was, therefore, eight and a half years. See the *Convito*, Tratt. II. c. vi.

‡ Compare with this passage Canzone x. st. 5, 6. Especially the lines,

“E, se 'l libro non erra,
Lo spirito maggior tremò si forte,

"At that instant, the spirit of the soul, which dwells in the high chamber to which all the spirits of the senses bring their perceptions, began to marvel greatly, and, addressing the spirits of the sight, said these words: *Apparuit jam beatitudo vestra.* [Now hath appeared your bliss.] At that instant the natural spirit, which dwells in that part where the nourishment is supplied, began to weep, and, weeping, said these words: *Heu miser! quia frequenter impeditus ero deinceps.* [Woe is me wretched! because frequently henceforth shall I be hindered.]

"From this time forward I say that Love lorded over my soul, which had been thus quickly put at his disposal;* and he began to exercise over me such control and such lordship, through the power which my imagination gave to him, that I was obliged to perform completely all his pleasure. He commanded me many times that I should seek to see this youthful angel, so that I in my boyhood often went seeking her, and saw her of such noble and praiseworthy deportment, that truly of her might be said that saying of the poet Homer: 'She does not seem the

Che parve ben, che morte
Per lui in questo mondo giunta fosse."

"And, if the book errs not, the chief spirit so greatly trembled, that it plainly appeared that death for him had arrived in this world."

When Dante meets Beatrice in Purgatory, he says, referring to this time,—and it is pleasant to note these connections between his earliest and his latest works,—

"Tosto che nella vista mi percosse
L'alta virtù, che già m'avea trafitto
Prima ch'io fuor di puerizia fosse."
Canto xxx. l. 40–42.

* The text of the *Vita Nuova* is often uncertain. Here, for example, many authorities concur in the reading, "*la quale fu sì tosto a lui disponsata,*" "which had been so quickly betrothed to him." But we prefer to read "*disposta,*" as being more in accordance with the remainder of the figure concerning Love. Many other various readings will be passed over without notice,—but a translation might be exposed to the charge of inaccuracy, if it were judged by the text of any special edition of the original, without comparison with others. The text usually followed in these versions is that of Fraticelli.

daughter of a mortal, but of God.' And it befell that her image, which stayed constantly with me, inspired boldness in Love to hold lordship over me; but it was of such noble virtue, that it never suffered that Love should rule without the faithful counsel of Reason in those matters in which such counsel could be useful."

Such is the account which Dante gives of the beginning of his love for Beatrice. The tenderness and purity of his passion are obscured, but not concealed, by quaintness of expression and formality of learning. In literary style the passage displays the uncertain hand of youth, and in a translation something is lost of the charm of simplicity which pervades the original. But in this passage the keynote of Dante's life is struck.

Passing over many things, he says that exactly nine years were completed after the above-described appearance of this most gentle lady, when it happened that "she appeared before me clothed in purest white between two noble ladies, and, passing along the street, she turned her eyes toward that place where I stood very timidly, and, by her ineffable courtesy, which is now rewarded in eternity, saluted me with such virtue, that I seemed to behold all the bounds of bliss. The hour when her most sweet salutation reached me was exactly the ninth of that day; and since it was the first time that her words came to my ears, I felt such great delight, that, as it were intoxicated, I turned away from the crowd, and, betaking myself to the solitary place of my chamber, sat myself down to think of this most courteous lady, and, thinking of her, a sweet slumber came upon me, in which a marvellous vision appeared to me." After describing this vision, he says, that, thinking of what had appeared to him, he "proposed to bring it to the knowledge of many who were famous poets at that time; and since I had already seen in myself the art of speaking words in rhyme, I proposed to write a sonnet, in which I would salute all the vassals of Love; and praying them to give an inter-

pretation of my vision, I wrote to them that which I had seen in my slumber. And I began then this sonnet:—

- "To every captive soul and gentle heart
Before whose sight may come the present word,
That they may thereupon their thoughts impart,
Be greeting in Love's name, who is their lord.
"Now of those hours wellnigh one third had gone
In which each star appears in heaven most bright,
When on a sudden Love before me shone,
To think upon whose being gives me fright.
"Joyful seemed Love, and he was keeping
My heart within his hands, while on his arm
He held my Lady, covered o'er and sleeping.
"Then waking her, he with this flaming heart
Did humbly feed her, fearful of some harm.
'Sudden I saw him weep, and quick depart."

This sonnet is somewhat obscure in the details of its meaning, and has little beauty, but it is of interest as being the earliest poetic composition by Dante that has been preserved for us, and it is curious as being the account of a vision. In our previous article on the "New Life," we referred to the fact of this book being in great part composed of the account of a series of visions, thus connecting itself in the form of its imaginations with the great work of Dante's later years. As a description of things unseen except by the inward eye, this sonnet is bound in poetic connection to the nobler visions of the "Divina Commedia." The private stamp of Dante's imagination is indelibly impressed upon it.

He tells us that many answers were made to this sonnet, and "among those who replied to it was he whom I call the first of my friends, and he wrote a sonnet which began,

'Thou seest in my opinion every worth.'

This was, as it were, the beginning of our friendship when he knew that it was I who had sent these verses to him." This first of Dante's friends was Guido Cavalcanti. Their friendship was of long duration, beginning thus in Dante's nineteenth year, and ending only with Guido's

death, in 1300, when Dante was thirty-five years old. It may be taken as a proof of its intimacy and of Dante's high regard for the genius of his friend, that, when Dante, in his course through Hell, at Easter in 1300, represents himself as being recognized by the father of Guido, the first words of the old man to him are,

"If through this blind prison thou goest through loftiness of soul, where is my son? oh, why is he not with thee?"*

The sonnet of Guido, in reply to that sent him by Dante, has been preserved, together with the replies by two other contemporary poets; but Dante says of them all,—*"The true meaning of my sonnet was not then seen by any one, though now it is plain to the simplest."*

After this vision, the poet, whose soul was wholly devoted to his most gentle lady, was brought by Love into so frail a condition of health, that his friends became anxious for him, and questioned him about that which he most wished to conceal. Then he told them that it was Love which had brought him to this pass. But when they asked him, *"For whom has Love thus wasted thee?"* he looked at them smiling, and said nothing.

"One day it happened," he goes on to relate, *"that this most gentle lady sat where words concerning the Queen of Glory are heard, and I was in a place from which I beheld my bliss. Between her and me in a direct line sat a gentle lady of most pleasing aspect, who looked at me often, wondering at my gaze, which seemed to terminate upon her; and many observed her looks. So great attention, indeed, was paid to this, that when I went out from the place I heard some one say, 'Behold how that lady wastes the life of this man!'—and naming her, I heard that they spoke of her who had been in the path of the straight line which, parting from my most gentle Beatrice, had ended in my eyes."* Then he says he thought to make this lady serve as a screen for his real love, and he did this so well that in a short time many persons fancied they knew his secret. And in order to

deceive them still more, he addressed to this lady many trifles in rhyme, of which he will insert in this account of his *"New Life"* only those which bear reference to Beatrice.

Some time after this, *"it was the pleasure of the Lord of the Angels to call to his glory a young and beautiful lady, who had been very lovely in the city of Florence. And I saw her body lying without its soul, surrounded by many ladies who wept grievously. Then remembering that I had formerly seen her in company with that most gentle lady, I could not restrain some tears; and, weeping, I proposed to say some words about her death, as a return for that I had seen her sometimes with my lady."* Then, he says, he wrote two poems, of which we give the last, adding to it his verbal comment, as an example of the style of commentary with which he has accompanied all the poems of the *"Vita Nuova"*:—

"O villain Death, compassion's foe,
The Mother from of old of woe,
Inexorable judge severe,
Thou givest sorrow for the heart to bear;
Wherefore in grief I go,
And blaming thee my very tongue out-
wear.

"And if of every grace thou wouldst be bare,
It only needs that I declare
The guilt of this thy sinful blow,
So that all those shall know,
And each shall be thy foe,
Who erst were nurtured with Love's ten-
der care.

"For thou hast taken from the world the grace
And virtue which are woman's praise,
And in youth's gayest days
The charm of loveliness thou dost deface.
"Who is this lady is not to be told,
Save as these qualities do make her known.
He who deserves salvation may alone
Have hope companionship with her to hold.

"This sonnet is divided into four parts.* In the first I address Death by certain of her proper names; in the second, speaking to her, I tell the reason why I am moved to blame her; in the third, I re-

* Dante calls this little poem a sonnet, although, strictly, the name does not belong to it.

* *Inferno*, x. 58-60.

vile her; in the fourth, I speak to a person undefined, although definite as regards my intention. The second part begins at *Thou givest*; the third at *And if of every grace*; the fourth at *He who deserves*."

After this, Dante tells of a journey he was forced to take, in the direction of the city to which the lady who had afforded him the means of disguising his real love had gone. He says, that, on the way, which he calls the way of sighs, he met Love, who was sad in aspect, and clad like a pilgrim, and that Love told him the name of another lady who must thenceforth serve as his screen to conceal his secret. He goes on to relate, that, after his return,* he sought out this lady, and made her his defence so effectually, that many persons spoke of it beyond the terms of courtesy, which weighed on him heavily. And on account of this lying talk which defamed him greatly, he says that Beatrice, "the most gentle lady, who was the enemy of all the vices, and the queen of virtue, passing by a certain place, denied me her most sweet salute, in which consisted all my bliss. And departing a little from the present subject, I will declare that which her salutation effected within me. I say, then, that, whenever she appeared, in my hope for her admirable salutation I no longer had an enemy, for a flame of charity possessed me which made me pardon every one who had done me wrong; and if at that time any one had asked anything of me, my only answer would have been *Love*, and my face would have been clothed with humility. And when she was near to giving me a salutation, a

spirit of Love, destroying all the other spirits of the senses, drove out the feeble spirits of the sight, and said to them, 'Go and do honor to your lady,' and he stayed in their place. And whoever had wished to know Love might have done so by looking at the trembling of my eyes."

After the salutation which had been wont to bring to him a joy almost beyond his capacity had been refused to him, Dante went weeping to his chamber, where he could lament without being heard; and there he fell asleep, crying like a little child who has been beaten. And in his sleep he had a vision of Love, who entered into talk with him, and bade him write a poem, adorned with sweet harmony, in which he should set forth the truth and fidelity of his love for Beatrice, and should sue for her pardon. Dante awoke at the ninth hour of the day, and at once began the poem, of which the following is a portion. He personifies his poem, and he bids it

"Tell her,—'O Lady, this his heart is stayed
On faithfulness so sure and firm,
Save to serve you it has no other care:
Early 'twas yours, and never has it strayed.'
But if she trust not what thou dost affirm,
Tell her to ask of Love, who will the truth
declare;
And at the end, beg her, with humble prayer,
That she her pardon of its wrong would
give;
Then let her bid that I no longer live,
And she shall see her servant quick obey.'"*

After this poem was finished, Dante describes what he calls "a battle of thoughts" concerning Love within his mind, and then goes on to relate that it happened one day that he was taken, by a friend who thought to give him pleasure, to a feast at which many ladies were present. "They were assembled," he says, "to attend a lady who was married that day, and, according to the custom of the city, they bore her company at her first sitting at table in the dwelling of her new husband." Dante, believing thus to do pleasure to his friend, proposed to stand in waiting upon these ladies. But at the moment of this intention he felt a

* In his few words of introduction to the *Vita Nuova*, Dante implies that he shall not copy out into his book all his compositions relating to its subject. Some of the poems of this period, not included in the *Vita Nuova*, have been preserved, and we propose to refer to them in their appropriate places. Compare with this passage Sonnet lxxix., *Poesie Liriche*, ed. Fraticelli,—

"Se 'l bello aspetto non mi fosse tolto,"—which was apparently written during Dante's absence from Beatrice.

* Compare Canz. x. and xi.

sudden tremor, which caused him to lean for support against a painting which ran round the wall,* and, raising his eyes, he beheld Beatrice. His confusion became apparent; and the ladies, not excepting Beatrice herself, laughed at his strange appearance. - Then his friend took him from their presence, and having asked him what so ailed him, Dante replied, "I have set my feet on that edge of life beyond which no man can go with intent to return." Then leaving him, he went to the chamber of tears, weeping and ashamed; and in his trouble he wrote a sonnet to Beatrice, in which he says, that, if she had known the cause of his trouble, he believes that she would have felt pity for him.†

The foregoing passage, like many others in the "*Vita Nuova*," is full of the intense and exaggerated expressions of passionate feeling. But this feeling is recorded with a frank simplicity which carries conviction of the sincerity of emotion. It may be laughed at, but it cannot be doubted. It is possible, though hardly probable, that the scene took place at the wedding festival of Beatrice herself. She was married sometime previous to 1287, and unless a reference to this event be found here, no notice of it is taken by Dante in what he has written concerning her. That the fact of her marriage changed in no degree the feeling with which Dante regarded her is plain. His love was of no low quality, to be altered

* This is, perhaps, the earliest reference in modern literature to the use of painting as a decoration for houses. It is probable that it was a recent application of the art, and resulted from the revival of interest in its works which accompanied the revival of the art. We shall have occasion again to note a reference to painting.

† To this period, apparently, belong Sonnets xxix. and xxx. of the general collection. The last may not unlikely have been omitted in the *Vita Nuova* on account of the tenderness with which the death of Beatrice had invested every memory of her, preventing the insertion of a poem which might seem harsh in its expression:—

"I curse the day on which I first beheld
The light of thy betraying eyes."

by earthly circumstance. It was a love of the soul. No change or separation that left the being untouched could part him from it. To the marriage of true souls there was no impediment, and he would admit none, in her being the wife of another. The qualities which she possessed as a maiden belonged to her no less as a wife.

It was in the same year, probably, as that in which the "*Vita Nuova*" was composed and published, that Dante himself was married to Gemma Donati. There are stories that their married life was unhappy. But these stories have not the weight of even contemporary gossip. Possibly they arose from the fact of the long separation between Dante and his wife during his exile. Boccaccio insinuates more than he asserts, and he concludes a vague declamation about the miseries of married life with the words, "Truly I do not affirm that these things happened to Dante, *for I do not know*." Dante keeps utter silence in his works,—certainly giving no reason to suppose that domestic trials were added to his other burdens. One thing is known which deserves remembrance,—that, when, after some years, a daughter was born to him, the name which she received was Beatrice.

In the next few pages of the "*Vita Nuova*" Dante describes various thoughts which came to his mind concerning his appearance when in presence of his lady; but, passing over these, we come to a passage which we give in full, as containing a delightful picture from Florence in its old time, and many sentences of sweet and characteristic feeling.

"Many persons had now learned from my looks the secret of my heart. And it happened that certain ladies, who well knew my heart, each of them having witnessed many of my discomfitures, had assembled together, taking pleasure in each other's company. And I, by chance passing near them, was addressed by one of these gentle ladies. She who called to me was very graceful in her speech, so that when I reached them, and saw

well that my most gentle lady was not with them, reassuring myself, I saluted them, and asked what might be their pleasure. The ladies were many, and some of them were laughing together, and others looked at me, waiting for what I might say, while others spoke among themselves, and one of them, turning her eyes toward me, and calling me by name, said, 'To what end dost thou love this lady, since thou canst not support her presence? Tell us, for it is certain that the object of such a love must be a very strange one.' And when she had said these words to me, not only she, but all the others, began to attend in expectation of my reply. Then I said to them, 'Ladies, the object of my love was, in truth, the salutation of that lady of whom perhaps you speak; and in that dwelt the bliss which was the end of all my desires. But since it has pleased her to deny it to me, my lord Love, thanks be to him, has placed all my bliss in that which cannot be taken from me.' Then these ladies began to speak together, and, as we sometimes see rain falling mingled with beautiful snow, so, it seemed to me, I saw their words mingled with sighs. And after they had spoken for some time among themselves, the same lady who had first spoken to me said to me, 'We pray thee that thou wouldst tell us in what consists this thy bliss.' And I, replying to her, said, 'In those words which speak my lady's praise.' And she answered, 'If thou sayest truth in this, those words which thou hast spoken concerning thine own condition must have been written with another intention.'*

* This refers to the sonnets Dante had written about his own trouble and the conflict of his thoughts. It will be observed that the words "speak" and "speech" are used in reference to poetic compositions. In those days the poet was commonly called *il dicatore in rima*, "the speaker in rhyme," or simply *il dicatore*.

praise my lady, why has my speech been of other things?' And I proposed to take always for my subject, henceforward, the praise of this most gentle lady. And thinking much on this, I seemed to myself to have taken too lofty a subject for my power, so that I did not dare to begin. Thus I delayed some days, with the desire to speak, and with a fear of beginning.

"Then it happened, that, walking along a road, at the side of which ran a very clear stream, so great a wish to speak came to me, that I began to think on the method I should observe; and I thought that to speak of her would not be becoming, unless I addressed my words to ladies,—and not to every lady, but only to those who are gentle, and not mere women.* Then I say that my tongue spoke as if moved by its own accord, and said, 'Ladies who have intelligence of Love.' These words I laid by in my mind with great joy, thinking to take them for my beginning. And returning to the city, after some days I began this Canzone:—†

* The epithet which Dante constantly applies to Beatrice is "most gentle," *gentilissima*, while other ladies are called *gentile*, "gentle." Here he makes the distinction between the *donna* and the *donna gentile*. The word is used with a signification similar to that which it has in our own early literature, and fuller than that which it now retains. It refers both to race, as in the phrase "of gentle birth," and to the qualities of character. "Gentleness means the same as nobleness," says Dante, in the *Convito*; "and by nobleness is meant the perfection of its own nature in anything." Tratt. iv. c. 14-16.

The delicacy and the dignity of meaning attaching to the word render it an epithet especially appropriate to Beatrice, as implying all that is loveliest in person and character. Its use in the *Vita Nuova* is the more to be remarked, as in the *Divina Commedia* it is never applied to Beatrice. Its appropriateness ceased with her earthly life, for there was "another glory of the celestial body."

† This Canzone is one of the most beautiful of Dante's minor poems. We have preferred to give it in a literal translation, rather than to attempt one in which the involved rhyme of the original should be preserved, fearing lest this could not be done without sacrifice of the meaning to the form. The original

"Ladies who have intelligence of Love,
I of my lady wish with you to speak;
Not that to tell her praise in full I think,
But to discourse that I may ease my mind.

"I say that when I think upon her worth,
So sweet doth Love make himself feel to me,
That if I then did not my courage lose,
Speaking I would enamor all mankind.
I do not wish so loftily to speak,
Lest I should fail and fall through very fear.
But of her gentle nature I will treat
With lightest touch compared with her desert,
Ladies and damsels bound to Love, with you;
For unto others this may not be told.

"An Angel cries aloud in tongue divine,
And says, 'O Sire! in the world is seen
A miracle in action, that proceeds
From out a soul which far as here doth shine.'
The Heavens, which have no other want, in-
deed,

But that of her, demand her of her Lord,
And every Saint doth for this favor beg;
Only Compassion our part defends.
What sayeth God? what of Madonna means?
'O my delights, now be content in peace
That, while I please, your hope should there
remain

Where dwelleth one who loss of her awaits,
And who shall say in Hell to the condemned,
"I have beheld the hope of those in bliss." *
"My lady is desired in high heaven.

Her virtues now will I make known to you.
I say, whoso a gentle lady would appear
Should go with her: for when she passeth by,
Love casts a frost upon all villain hearts,
So that their every thought doth freeze and die;
And whoso bears to stay and look on her
Will nobler thing become or else will die;
And when one finds that he may worthy be
To look on her, he doth his virtue prove;
For then that comes to him which gives him
health,

And humbleth him till he forgets all wrong;
And God hath given a still greater grace,
That who hath spoke with her cannot end ill.

"Love says of her, 'How can a mortal thing
must be read by those who would understand
its grace of expression combined with its
depth of feeling. Dante himself prized this
Canzone, and represents Buonagiunta da Luc-
ca in Purgatory as addressing him,—

"Ma di s'io veggio qui colui che fuore
Trasse le nuove rime, cominciando:
Donne, ch' avete intelletto d' Amore."

"But tell me if I see him who wrote the
new rhymes, beginning, 'Ladies who have
intelligence of Love.'" *Purgat. c. xxiv.*
l. 49-51.

* Note the reference implied in these words
to the journey of Dante through Hell.

Be thus in every part adorned and pure?'
Then, gazing on her, to himself he swears
That God in her a creature new designs.
Color of pearl doth clothe her, as it were,—
Not in excess, but most becomingly.
Whate'er of good Nature can make she is;
And by her model Beauty proves itself.
From out her eyes, wherever they may move,
Spirits inflamed with love do issue forth,
Which strike the eyes of whoso looks on her,
And enter so that every heart they find.
Love you behold depicted on her face,
On which with fixed look no one can gaze.

"I know, Canzone, thou wilt go to speak
With many ladies, when I send thee forth;
And now I bid thee, having bred thee up
Like to a young and simple child of Love,
That where thou goest thou shouldst praying
say,

'Teach me which way to go, for I am sent
To her with praise of whom I am adorned.'
And if thou wishest not to go in vain,
Remain not there where villain folk may be;
Endeavor, if thou mayst, to be acquainted
Only with ladies, or with courteous men,
Who thee will guide upon the quickest way.
Love thou wilt find in company with her,
And to them both commend me as thou
shouldst."

After explaining, according to his cus-
tom, and marking the divisions of this poem,
Dante copies out a sonnet in which he
answers the question of one of his friends,
who, he says, perhaps entertaining an ex-
pectation of him beyond what was due,
asked him, 'What is Love?' Many of
the poets of that time tried their hands in
giving an answer to this difficult ques-
tion, and Dante begins his with confirming
the opinion expressed by one of them:—

"Love is but one thing with the gentle heart,
As in the saying of the sage we find." *

* It is probable that Dante refers to the first
of a Canzone by Guido Guinicelli, which says,
"Within the gentle heart Love always stays,"
—a verse which he may have had still in his
memory when he makes Francesca da Rimini
say, (*Inf. v. 100*),

"Love which by gentle heart is quickly learn-
ed."

For other definitions of Love as under-
stood by the Italian poets of the trecento, see
Guido Cavalcanti's most famous and most
obscure Canzone, *Donna mi priega*; the son-
net (*No. xlii.*) falsely ascribed to Dante, *Molti
volendo dir che fosse Amore*; the sonnet by
Jacopo da Lentino, *Amore è un desio che vien
dal core*; and many others.

Another sonnet follows upon this, telling how this Love was awakened by Beatrice, and beginning with the exquisite praise,

"Within her eyes my lady beareth Love,
So that who looks on her is gentle made."*

Not many days after this, the father of Beatrice died.† "And inasmuch as it is the custom in the above-mentioned city for ladies to assemble with ladies, and men with men, in such affliction, many ladies assembled at the house where Beatrice was weeping piteously. And seeing certain of them returning from her, I heard them speak of this most gentle lady, how she was lamenting. . . . When these ladies had passed, I remained in such grief that tears began to fall, and, putting my hands before my eyes, I covered my face. And if it had not been that I expected to hear further of her, for I stood near by where most of the ladies who came from her passed, I should have hidden myself as soon as the tears assailed me. While I still delayed, more ladies passed by, talking together and saying, 'Who of us should ever be joyful after hearing this lady speak so piteously?' After these others passed, who said, as they went by, 'This one who is here weeps neither more nor less than if he had seen her as we have. And then others said of me, 'See! so overcome is he, that he seems not himself.' And thus these ladies passing by, I heard speech of her and of myself." And going away, after this, he wrote two sonnets, telling of what he had seen and heard.‡

It happened not long after this time that Dante was seized with grievous illness, which reduced him to such a state of weakness that he lay as one unable to move. And on the ninth day, suffering

* Compare with this Sonnet xl,—

"Dagli occhi della mia donna si muove."

† Folco Portinari died December 31, 1289.

‡ Compare with this passage Sonnet xlvii., which seems to have been written on this occasion:—

"Voi, donne, che pietoso atto mostrate,"
and Sonnet xlvii.,—

"Onde venite voi, così pensoso?"

greatly, he thought of his lady, and, reflecting on the frailty of life even at its best, the thought struck him that even the most gentle Beatrice must at some time die. And upon this, such consternation seized him that his fancy began to wander, and, he says, "It seemed to me that I saw ladies, with hair dishevelled, and marvellously sad, pass weeping by, and that I saw the sun grow dark, so that the stars showed themselves of such a color as to make me deem they wept. And it appeared to me that the birds as they flew fell dead, and that there were great earthquakes. And struck with wonder at this fantasy, and greatly alarmed, I imagined that a friend came to me, who said, 'Dost thou not know? Thy admirable lady has departed from this world.' Then I began to weep very piteously, and wept not only in imagination, but with my eyes shedding real tears. Then I imagined that I looked toward heaven, and it seemed to me that I saw a multitude of angels who were returning upwards, having before them a little cloud of exceeding whiteness. It seemed to me that these angels sang gloriously, and that the words of their song were these: '*Osanna in excelsis!*'—and other than these I did not hear.*

"Then the heart in which abode such great love seemed to say to me, 'It is true that our lady lies dead.' And thereupon I seemed to go to behold the body in which that most noble and blessed soul had been. And the erring fancy was so powerful that it showed to me this lady dead, and it appeared to me that ladies were covering her head with a white veil, and that her face had such an aspect of humility that it seemed to say, 'I behold the beginning of peace.'"

Then Dante called upon Death to come to him; and when he had beheld in his imagination the sad mysteries which are performed for the dead, he seemed to

* In the *Divina Commedia* frequent reference is made to the singing of *Osanna* by the Angels. See *Purgat.* xi. 11; xxix. 51; *Par.* vii. 1; xxviii. 94, 118; xxxii. 135; and especially viii. 28.

return to his own chamber. And so strong was his imagining, that, weeping, he said with his true voice, "O most beautiful soul! how is he blessed who beholds thee!" Upon this, a young and gentle lady, who was watching by his bed, thinking that he was grieving for his own pain, began to weep; whereon other ladies who were in the chamber drew near and roused him from his dream. Then they asked him by what he had been troubled; and he told all that he had seen in fancy, keeping silence only with regard to the name of Beatrice; and when, some time after, he recovered from his illness, he wrote a poem which related his vision.

The next incident of his new life which Dante tells is one of a different nature, and of pleasant character. One day he saw Love coming to him full of joy; and his own heart became so joyful that it seemed to him it could not be his heart, so changed was its condition. Then he saw approaching him a lady of famous beauty, who had been the lady of his first friend. Her name was Giovanna, but on account of her beauty she was called Primavera, which means *Spring*. And with her was Beatrice. Then Love, after they had passed, explained the hidden meaning of the name Primavera, and said, that, by one considering subtly, Beatrice would be called *Love*, on account of the great resemblance she bore to him. Then Dante, thinking over these things, wrote this sonnet to his friend, believing that he still admired the beauty of this gentle Primavera:—

"An amorous spirit in my heart who lay
I felt awaken from his slumber there;
And then I saw Love come from far away,
But scarce I knew him for his joyous air.

"Honor to me," he said, 'think now to pay,'
And all his words with smiles companioned were.

Then as my lord awhile with me did stay,
Along the way whence he appeared
whilere

"The Lady Joan and Lady Bice I see,
Coming toward the place wherein I was;
And the two marvels side by side did move.

"Then, as my mind now tells it unto me,

Love said, 'This one is Spring, and this,
because

She so resembleth me, is namèd Love.'"

After this sonnet, Dante enters on a long and fanciful discourse on the use of figurative language, to explain how he speaks of Love as if it were not a mere notion of the intellect, but as if it had a corporeal existence. There is much curious matter in this dissertation, and it is one of the most striking examples that could be found of the youthful character of the literature at the time in which Dante was writing, and of the little familiarity which those in whose hands his book was likely to fall possessed of the common forms of poetry, and of the style of the ancient Latin poets.

Returning from this digression, he says:

"This most gentle lady, of whom there has been discourse in what precedes, reached such favor among the people, that when she passed along the way persons ran to see her, which gave me wonderful delight. And when she was near any one, such modesty took possession of his heart, that he did not dare to raise his eyes or to return her salutation; and to this, should any one doubt it, many, as having experienced it, could bear witness for me. She, crowned and clothed with humility, took her way, displaying no pride in that which she saw and heard. Many, when she had passed, said, 'This is not a woman; rather is she one of the most beautiful angels of heaven.' Others said, 'She is a miracle. Blessed be the Lord who can perform such a marvel!' I say that she showed herself so gentle and so full of all beauties, that those who looked on her felt within themselves a delight so pure and sweet that they could not smile; nor was there any who could look at her and not feel need at first to sigh. These and more wonderful things proceeded from her, marvellously and in reality. Wherefore I, thinking on all this, proposed to say some words, in which I would exhibit her marvellous and excellent influences, to the end that not

* See the charming Sonnet lii. :—

"Guido vorrei che tu, e Lapo, ed io."

only those who might actually behold her, but also others, might know of her whatever words could tell. Then I wrote this sonnet :—

“ So gentle and so modest doth appear
My lady when she giveth her salute,
That every tongue becometh trembling
mute,
Nor do the eyes to look upon her dare.

“ And though she hears her praises, she doth
go
Benignly clothèd with humility,
And like a thing come down she seems
to be

• From heaven to earth, a miracle to show.

“ So pleaseth she whoever cometh nigh,
She gives the heart a sweetness through
the eyes,
Which none can understand who doth
not prove.

“ And from her lip there seems indeed to move
A spirit sweet and in Love's very guise,
Which goeth saying to the soul, ‘ Ah,
sigh ! ’ ” *

* Perhaps the spirit of the latter part of

With this incomparable sonnet we close that part of the “ Vita Nuova ” which relates to the life of Beatrice. It fitly completes the golden record of youth. Its tender lines are the epitaph of happy days, and in them is found that mingled sweetness and sadness which in this world are always the final expression of love. Its tone is that of the wind of autumn sighing among the leaves of spring. Beneath its outward meaning lies a prophecy of joy,—but that joy is to be reached only through the gates of death.

this sonnet may be better conveyed by rendering thus :—

“ So pleaseth she all those approaching nigh
her,

Which goeth saying to the soul, ‘ Aspire ! ’ ”

Compare the very beautiful Ballata vi. and Sonnet xlviii., beginning,

“ Di donne io vidi una gentile schiera.”

THE PHILTER.

“ A DRAUGHT of water, maiden fair,”
I said to the girl beside the well.
Oh, sweet was the smile on her face of guile,
As she gave me to drink,—that witch of hell !

I drank, and sweet was the draught I drank,
And thanked the giver, and still she smiled ;
And her smile like a curse on my spirit sank,
Till my face grew wan, and my heart grew wild.

And lo ! the light from the day was gone,
And gone was maiden, and gone was well :
The dark instead, like a wall of stone,
And rivers that roared through the dark, and fell.

Was it the draught, or was it the smile,
Or my own false heart ? Ah, who shall tell ?
But the black waves beat at my weary feet,
And sits at my side the witch of hell.

DID I?

"Giorno d' orrore."

WHEELS rolled away in the distance; the corner of a gray cloak fluttered where the drive turns down hill. From under the fore-wheel of Juggernaut I struggled back to life with a great sob, that died before it sounded. I looked about the library for some staff to help me to my feet again. The porphyry vases were filled with gorgeous boughs, leaves of deep scarlet, speckled, flushed, gold-spotted, rimmed with green, dashed with orange, tawny and crimson, blood-sprinkled, faint clear amber; all hues and combinations of color rioted and revelled in the crowded clusters. To what hand but hers could so much beauty have gathered? to what eye but hers did the magnificent secrets of Nature reveal themselves, so that out of a whole forest her careless straying hand should bring only its culminating glories, its most perfect results, whether of leaf or flower or fruit. For in an urn of tintless alabaster, that had lain centuries in the breathless dust and gloom of an Egyptian tomb, that hand had set a sheaf of gentians, every fringed cup blue as the wild river when a noon sky tints it, or as the vaulted azure of a June midnight on the edge of the Milky Way, —a sheaf no Ceres owned, no foodfull garner coveted, but the satiating aliment of beauty, fresh as if God that hour had pronounced them good, and set his sign-manual upon each delicate tremulous petal, that might have been sapphire, save for its wistful translucence. And on the teapoy in the window stood two dainty baskets of clean willow, in which we had that day brought home chestnuts from the wood;—nine was full of nuts, but they were small and angular and worm-eaten, as the fruitage of a wet season might well be; hers scantily freighted, but every nut round, full, and glossy, perfect from its cruel husk, a specimen,

a type of its kind. And on the handle of the basket hung a little kid glove. I looked at it closely; the tiny finger-tops and oval nails had left light creases on the delicate leather, and an indescribable perfume, in which violet predominated, drove away the vile animal scent that pervades such gloves. I flung it on the fire.

All about the room lay books that were not of my culling, from the oak cases, whose every door stood ajar,—novels innumerable,—*"The Arabian Nights,"* Vaughan's *"Silex Scintillans,"* with a scarlet leaf laid in against *"Peace,"* and *"Tennyson"* turned on its face at *"Fatima,"* a heavy volume of French moral philosophy, a Methodist hymn-book, Sir Thomas Browne's *"Hydriotaphia,"* and a gilded red-bound history of *"Five Little Pigs."*

I rang the bell, and ordered all the books to be gathered up and put into an old bookcase, long banished to a dark attic. I walked to the fire and leaned my head against the mantel. The embers were all dead; in the gray ashes was the print of a little foot, whose arched instep had left no trace between the light track of the small heel and the deeper impression that the slender toe had left. That foot-print told the secret of her airy motion,—that step so akin to flight, that on an overhanging mountain-ledge I had more than once held my breath, looking to see her extended wings float over the silent tree-tops below, or longed to grasp her carelessly trailed shawl, that I might detain her upon earth. To me the track had yet another language. An hour before, as I stood there beside her, the bitter passion of a man solitary and desperate shaking every faculty before the level rays of her scornful eye, she had set her embroidered slipper in the ashes, and said,—*"Look! I leave a print*

there which the first breath of air shall dissipate; all fire becomes ashes, and ashes blow away,"—and so left me. I stood before the fire, that had been, still looking at that foot-mark; my brain was stunned and stupid, my heart beat slow and loud; I knew nothing, I felt nothing, I was nothing. Presently a bell rang.

The world is full of magicians, transmutations, magnetic miracles, juggling, chemical astonishments, moral gymnastics, hypocrisies, lies of wonder,—but what is so strange, so marvellous, so inexplicable, as the power of conventions? One minute found me tempting the blackness of darkness, every idea astray and reeling, every emotion benumbed; the next, a bell rang, and I went to the tea-table, sat in my own place, answered my mother's questions, resumed the politenesses and habits of daily life, seemed to be myself to those who had known me always,—ate, drank, jested,—was a man,—no more the trodden ashes under a girl's foot, no longer the sport of a girl's cool eye, no slave, no writhing idolater under the car-wheel; and this lasted—half an hour! You have seen the horses of Pharaoh following the glittering sand-track of the Judæan host, walled in with curling beryl battlements, over whose crests the white sea-foam dares no more laugh and threaten? You know those curved necks clothed with strength, the bent head whose nostrils flare with pride, the tossed and waving mane, the magnificent grace of the nervous shoulder, the great, intelligent, expectant eyes? Suddenly the roar of waves at the farther shore! Look at that head! strong and quiet no more; terror erects the quivering ears; the nostril sinks and contracts with fear; the eye glares and glances from side to side, mad with prescient instinct; the corded veins that twist forkedly from the lip upward swell to the utmost tension of the fine skin; that sweeping mane rises in rough undulations, the forelock is tossed back, the shoulder grows rigid with horror, the chest rises with a long indrawn breath of dismay. Horrible beyond all

horrid sounds, the yell of a horse in mortal fear. Do you hear it? No,—it is a picture,—the picture of a moment between one animal that sees the impending fate, and another that has not yet caught it;—it is human that such moments interpose between two oceans of agony, that man can momentarily control the rush of a sea which the brute must yield to.—So the sea rushed back.

All night long, all the long night!—long as lifetimes are, measured with slow-dropping arteries that drip away living blood. Once I watched by a dying woman; wild October rains poured without, but all unheard; in the dim-lit room, scented with quaint odors of lackered cases and chests of camphor-wood, heavy with perfumes that failed to revive, and hushed with whispers of hopeless comment, that delicate frame and angelic face, which the innumerable lines of age could only exalt and sweeten, shivered with the frosts of death; every breath was a sob; every sigh, anguish; the terrible restlessness of the struggle between soul and body in their parting writhed in every limb;—but there were no words other than broken cries of prayer, only half-heard on earth, till at length the tender, wistful eyes unclosed, and in a hoarse whisper, plaintive beyond expression, full of a desolate and immortal weariness, bearing a conviction of eternity and exhaustion that words cannot hope to utter, she said, "Will it never be morning?" And so this night stayed its pace; my room grew narrow and low; the ceiling pressed on my head; the walls forever clasped me, yet receded ever as I paced the floor; the floor fell in strange waves under me,—yet I walked steadily, up and down, up and down! Still the night stayed. Fever set its hurried pulses fleeting like wild-fire through every vein; a band of hot iron pressed above my eyes;—but these were adjuncts; the curse consumed me within. In every moment I heard those calm and fatal words, "I do not love you," sounding clear and sweet through the dull leaden air of night,—an air full of ghostly

sounds, sighs about the casements, creaking stairs, taps at the window, light sounds of feet in the long hall below; all falling heedless on my ear, for my ghost walked and talked with me, a ghastly reality, the galvanized corpse of a murdered life.

Still the night stayed. A weight of lead pressed on my brain and concentrated it to frantic power; the months in which I had known her, the only months I could call life, came back to me inch by inch, grain by grain. I recalled our first meeting,—the sudden springing into acquaintance,—the sympathetic power that had transfused those cold blue eyes into depths of tenderness and pity,—the gay and genial manner that aroused and charmed me,—the scornful lip that curled at the world for its worldliness,—that fresh imagination, which, like the spirit of frost, decked the commonest things with beauty; and I recalled those early letters that had passed between us,—mine, insipid enough,—hers, piquant, graphic, refined, tender, delicately passionate, sparkling, full of lofty thought and profound feeling. Good God! could she not have taken my heart, and wrung it, and thrown it away, under some more commonplace pretext than the profaned name of Friendship? Her friend! It is true I had called myself her friend; I had been strenuous in the nomenclature to quiet my own conscience,—to satisfy her conventional scruples; but had she no instinct to interpret the pretence? What friend ever lived on every look, studied every phrase, watched every action and expression, was so torn with jealousy and racked with doubt, bore so humbly with caprices, and forgave every offence so instantly and utterly,—nay, was scarce conscious that anything her soul entertained could be an offence, could be wrong? Friendship!—ah, that deity is calm and serene; that firm lip and pale cheek do not flush with apprehension or quiver with passion; that tranquil eye does not shine with anything but quiet tears. Rather call the dusky and dark-haired Twilight, whose pensive face is limned against the western hills, by the name of that fierce and fervid

Noon that stands erect under the hot zenith, instinct with the red blood of a thousand summers, casting her glittering tresses abroad upon the south-wind, and holding in her hands the all-unfolded rose of life. And if I was only her friend, was that a reason why she should permit in me the thousand intimacies of look and caress that are the novitiate of love? Was it a friend's calm duty to give me her tiny hand to hold in mine, that I might fold and unfold the rosy fingers, and explore the white dimples that were its ornamenting gems,—to rest her tired head against my shoulder, even,—watching all day by the chair where pain, life-long ministrant, held me on the rack?—was it only friendly that she should press her soft little mouth to mine, and soothe me into quiet as a mother soothes her last, her dearest child? No! no! no! never could that be! She knew, she had known, that I loved her! Deliberate cruelty outlined those lovely lips; every statue-like moulding of that proud face told the hard and unrelenting nature of the soul within. God forgive her!—the exclamation escaped me unaware, and recoiled in a savage exultation that such treachery had no forgiveness in heaven or on earth,—one gleam of desperate satisfaction in that black night. But in its light, what new madness seized me? I had held her stainless and holy, intact of evil or deceit; what was she now? My whole brain reeled; the foundations were taken away; earth and heaven met; even as when the West forges tempest and lightning-bolts upon its melancholy hills, brooding and muttering hour by hour, till at length the livid gloom rushes upward against sun and stars, and the blackening sky shuts down upon the blackened earth, cowering at the shock, and the torrents and flames are let loose upon their prey,—so an accumulated storm of unutterable agony flung wave on wave above me, wrecked and alone.

Still the night stayed; the black mass of forest that swept up the hill-side stood in mystical gloom, in silence that could be felt; when at once,—not suddenly,—

as if the night could forbear no more, but must utter some chord with the culmination of midnight horrors, a bird uttered one sharp cry, desolate utterly, hopeless, concentrated, as if a keen blade parted its heart and the outraged life within remonstrated and despaired,—despaired not of life, for still the note repeated its monotone, but of death, of period to its pangs. That cry entered into my brain; it was unjust of Nature so to taunt me, so to express where I was speechless; yet I could not shut it out. A pitiful chill of flesh and sense seized me; I was cold,—oh, how cold!—the fevered veins crept now in sluggish ice; sharp thrills of shivering rigor racked me from head to foot; pain had dulled its own capacity; wrapped in every covering my room afforded, with blunted perceptions, and a dreadful consciousness of lost vitality, which, even when I longed to die, appalled me with the touch of death's likeness, I sunk on the floor,—and it was morning!

Morning!—"a day of darkness and of gloominess, a day of clouds and of thick darkness, as the morning spread upon the mountains!" A pale sun lit the earth, but earth and sky were black,—no sun touched me in heart or eye; I saw nothing, felt nothing, but heavy and impenetrable gloom. Yet again the ceremonies of life prevailed, and my real life slept undiscovered. Whatever pallor or shadow lined my face was no stranger there at that hour. The gray morning passed away; the village on the hill sent down busy sounds of labor and cheer; flies buzzed on the sunny pane, doors clicked and slammed in the house, fires crackled behind the shining fire-dogs. I went to the library,—*the first breath of air had dissipated it!* What a mockery! I went away,—out of the house,—on, anywhere. Dry leaves rustled in my path and sent up a faint aromatic breath as they were crushed in the undried dew; squirrels chattered in the wood; here and there a dropping nut stirred the silence with deliberate fall, or an unseen grouse whirled through the birches at my approaching

step. The way was trodden and led me by gradual slope and native windings through the dull red oaks downward to the river: Once on the path, a low cluster of sweet fern attracted me;—strange assertion of human personality, that in the deepest grief a man knows and notices the trivial features of Nature with microscopic fidelity!—that the veining of a leaf or the pencilling of a blossom will attract the eye that no majesty or beauty of unwonted manifestation could light with one appreciative spark! Is it that the injured and indignant soul so vindicates its own essential and divine strength, and says, unconsciously, to the most uncontrolled anguish, "There is in me a life no mortal accident can invade; the breath of God is not altogether extinct in any blast of man's devising; shake, torture, assault the outer tenement,—darken its avenues with fire to stifle, and drench its approaches with seas to drown,—there is that within that God alone can vanquish,—yours is but a finite terror"? Half-crazed as I was, the fern-bed attracted me, as I said, and I flung myself wearily down on the leaves, whose healing and soothing odor stole up like a cloud all about me; and I lay there in the sun, noting with pertinacious accuracy every leaf or bloom that was within the range of sight,—the dark green leaves of the wax-flower springing from their red stem, veined and threaded with creamy white, stiff and quaint in form and growth,—the bending sprays of golden-rod that bowed their light and brittle stems over me, swaying gently to and fro in the gentle wind,—the tiny scarlet cups of moss that held a little drop of dew brimming over their rims of fire, a spark in the ashy gray moss-beds where they stood,—the shrinking and wan wood-asters, branched out widely, but set with meagre bloom,—every half-tint of the lichens, that scantily fed from the relentless granite rock, yet clung to its stern face with fearless persistence,—the rough seams and velvet green moss-tufts of the oak-trunks,—the light that pierced the dingy hue of oak-leaves with vivid and

informing crimson: all these stamped themselves on my mind with inevitable minuteness; the great wheel of Fate rolled over me, and I bore the marks even of its ornamental rim; the grooves in its tire left traces of its track.

At length the minuteness of Nature oppressed me. The thousand odors, spicy, acrid, aromatic, honeyed, that an autumnal dew expressed from every herb, through that sense that is the slave of association, recalled my youth, my boyhood, the free and careless hours I knew no more, when, on just such mornings of hazy and splendid autumns, I had just so lain on the fern-beds, heedless of every beauty that haunted the woods, full of fresh life, rejoicing in dog and gun and rod as no man ever rejoices in title-deeds or stocks or hoarded gold. The reminiscence stung me to the quick; I could endure no more. Rising, I went on, and through the oak-wood came to the brink of the river, and in a vague weariness sat down upon the massive water-wall, and looked over into the dark brown stream. It was deep below me; a little above were clear shallows, where the water-spider pursued its toil of no result, and cast upon the yellow sand beneath a shadow that was not a shadow, but, refracted from the broken surface, spots of glittering light, clustered like the diamonds of a brooch, separate, yet linked, and tremulously bright. This, also, did I note; but below my feet the river flowed darker and more deeply, darkness and depth broken only by the glancing fins of little fishes, that slanted downward, catching a gleam as they went. No other light pierced the sullen, apprehensive flood that rolled past in tranquil gloom, leaden from the skies above, and without ripple or fall to break its glassy-quiet. Beside the wall grew a witch-hazel; in my vague grasp at outside objects I saw it, full of wrinkled and weird bloom, as if the golden fleece had strayed thereby, and caught upon the ungainly twigs of the scragged bush, and left glittering curled threads in flecked bunches scattered on every branch; the strange spell-sweet odor of

the flowers struck me before I saw them, and the whole expression of their growth affected me with helpless admiration, so brave as it was!—defying all Autumn to daunt the immortal Spring ever surviving in its soul,—here, on October's edge, putting out its freshness and perfume, as if seasons were an accident, and circumstance a chimera,—as if will, good-will, will to be of strength and cheer, were potent enough to laugh at Nature, and trust the God-given consciousness within, whatever adverse fate ruled and triumphed without. Not that all these ideas came to me then, else perhaps I had been spared that morning's experience; but they entered my brain as lightning is sometimes said to enter a tree and stamp some image from without upon its heart, thereafter to be revealed by the hewing axe and the persistent saw. No! I sat by the river and looked down into its dark serenity, and again the horror of the past day swept over me with fresh force. Could I live? The unswerving river lay before me; in its bed nothing stirred; neither pang nor passion in those chill depths could utter a cry; there *she* could not come; there was rest. I did not yield; oh, no, I did not yield! I resisted,—passively. I laid hold upon the eternal fact that there was a God; the blind and blank universe spun about me; its pillars of support wavered like waterspouts; all that I had ever believed or loved whirled up and down in one howling chaos, and circled through all space in clouds of dust and floating atoms; but through all I knew there was a God,—feel it I could not, neither did I see nor did one of Nature's tongues spell me the lesson,—I only knew it. And I did not, no, I did not rush before Him; but I lay at the bottom of the river.

I have heard it said that drowning persons recall, as by a sudden omniscience, all their past lives, as soon as the water closes above them and the first shock of horror is past. It was not so with me. I remembered nothing beyond the events of the past week; but, by some strange action of the mind, as soon as the gasp-

ing sense of an unnatural element passed away, my thoughts went forward. I became, as it were, another man; and above me on the bank I saw calmly the stone where my living double had left his cripple's cane, and thought to myself for one sharp moment, "Fool!"—for I looked forward. *If I had not drowned*,—that was the key-note of the theme. Something that was me and was not me rose up from the water-wall and went away,—a man racked and broken by a great sorrow, it is true, but a man conscious of God. Life had turned its darkest page for him, but there was the impassable fact that it was the darkest; no further depths remained to dread; the worst had come, and he looked it in the face and studied it; suffer he might, but with full knowledge of every agony. Life had been wrecked, but living remained. Calmly he took up the cripple's cane and went home; the birds sang no song,—after tempests they do not sing until the sun shines,—neither did the blossoms give him any greeting. Nature wastes no trivialities on such grief; the mother, whose child comes in to her broken-limbed and wounded, does not give it sugar-plums and kisses, but waits in silence till the surgeon has done his kindly and appalling office,—then, it may be, she sings her boy to sleep!

But this man took up life again and conquered it. Home grew about him into serenity and cheer; as from the roots of a felled tree a thousand verdant offshoots spring, tiny in stature, but fresh and vivid in foliage, so out of this be-headed love arose a crowd of sweet affections and tender services that made the fraternity of man seem possible, and illustrated the pervasive care of God. He went out into life, and from a heart wrung with all man can endure, and a brain tested in the fire, spoke burning and fluent words of strength and consolation to hundreds who, like him, had suffered, but were sinking under what he had borne. And these words carried in them a reviving virtue. Men blessed him silently, and women sang

him in their hearts as they sing hymns of prayer. Honors clustered about him as mosses to a rock; Fame relented, and gave him an aureole in place of a crown; and Love, late, but sweeter than sweet, like the last sun-ripened fruit of autumn, made honors and fame alike enduring. This man conquered, and triumphed in the victory.

I held out my hand in that water and touched—a skeleton! What! had any other man preceded me? I looked at it; it was the water-washed frame of a horse,—brutes together! And death was at hand; the grasp tightened on my breast with that acrid sense of weight and suffocation that the redundant blood suffusing the lungs must needs produce. "The soul of the brute goeth downward." Coward! what might not life have been? and I had lost it!—lost it for the sting of a honey-bee!—for the contempt of a woman! Every magnificent possibility, every immortal power, every hope of a future, tantalizing in its grand mystery, all lost! What if that sweeping star-seraph that men call a comet, speeding through heaven in its lonely splendor, with nitent head, and pinions trailing with the very swiftness and strength of its onward flight, should shudder from its orbit, fling into star-strewn space its calm and awful glory, and go crashing down into the fury and blackness of chaos, carrying with it wrecks of horror, and the yelling fragments of spheres no longer choral, but smitten with the lawless stroke of a creature regardless of its Creator, an orb that made its solitary fate, and carried across the order and the law of God ruin and wreck embodied?

And I had a soul;—I had flung it away; I had set my will up for my destiny, and the one had worked out the other. But had I? When that devilish suggestion came to me on the bank, did I entertain it? Have I not said how I grasped at the great idea of a God, and held it with a death-gripe in the midst of assault? How did I come in the water? I did not plunge nor fall. No shock of horror chilled me; no remembrance of a volun-

tary assent to the Tempter could I recall. I was there, it was true; but was I guilty? Did I, in the eyes of any watching angel, consciously cast my life, brittle and blind as it was, away in that fashion? In the water, helpless now for any effort after upper air, side by side with the fleshless anatomy of a brute, over-sailed by gray fishes with speckled sides, whose broad,

unwinking eyes glared at me with maddening shine and stare,—oppressed, and almost struggling, yet all unable to achieve the struggle with the curdling blood that gorged every vein and air-cell with the hurried rush of death,—did I go out of this life red with the sin of murder? Did I commit suicide?

Who knows?

THE MINISTERS' WOOING.

[Continued.]

CHAPTER VI.

THE DOCTOR.

It is seldom that man and woman come together in intimate association, unless influences are at work more subtle and mysterious than the subjects of them dream. Even in cases where the strongest ruling force of the two sexes seems out of the question, there is still something peculiar and insidious in their relationship. A fatherly old gentleman, who undertakes the care of a sprightly young girl, finds, to his astonishment, that little Miss spins all sorts of cobwebs round him. Grave professors and teachers cannot give lessons to their female pupils just as they give them to the coarser sex, and more than once has the fable of "Cadenus and Vanessa" been acted over by the most unlikely performers.

The Doctor was a philosopher, a metaphysician, a philanthropist, and in the highest and most earnest sense a minister of good on earth. The New England clergy had no sentimental affectation of sanctity that segregated them from wholesome human relations; and consequently our good Doctor had always resolved, in a grave and thoughtful spirit, at a suitable time in his worldly affairs, to choose unto himself a helpmeet. Love, as treated of in romances, he held to be a foolish and profane matter, unworthy the attention of

a serious* and reasonable creature.* All the language of poetry on this subject was to him an unknown tongue. He contemplated the entrance on married life somewhat in this wise:—That at a time and place suiting, he should look out unto himself a woman of a pleasant countenance and of good repute, a zealous, earnest Christian, and well skilled in the items of household management, whom accosting as a stranger and pilgrim to a better life, he should loyally and lovingly entreat, as Isaac did Rebekah, to come under the shadow of his tent and be a helpmeet unto him in what yet remained of this mortal journey. But straitened circumstances, and the unsettled times of the Revolution, in which he had taken an earnest and zealous part, had delayed to a late bachelorhood the fulfilment of this resolution.

When once received under the shadow of Mrs. Scudder's roof, and within the provident sphere of her unfailing house-keeping, all material necessity for an immediate choice was taken away; for he was exactly in that situation dearest to every scholarly and thoughtful man, in which all that pertained to the outward life appeared to rise under his hand at the moment he wished for it without his knowing how or why.

He was not at the head of a prosperous church and society, rich and well-to-do in the world,—but, as the pioneer lead-

er of a new theology, in a country where theology was the all-absorbing interest, he had to breast the reaction that ever attends the advent of new ideas. His pulpit talents, too, were unattractive. His early training had been all logical, not in the least æsthetic; for, like the ministry of his country generally, he had been trained always to think more of what he should say than of how he should say it. Consequently, his style, though not without a certain massive greatness, which always comes from largeness of nature, had none of those attractions by which the common masses are beguiled into thinking. He gave only the results of thought, not its incipient processes; and the consequence was, that few could follow him. In like manner, his religious teachings were characterized by an ideality so high as quite to discourage ordinary virtue.

There is a ladder to heaven, whose base God has placed in human affections, tender instincts, symbolic feelings, sacraments of love, through which the soul rises higher and higher, refining as she goes, till she outgrows the human, and changes, as she rises, into the image of the divine. At the very top of this ladder, at the threshold of paradise, blazes dazzling and crystalline that celestial grade where the soul knows self no more, having learned, through a long experience of devotion, how blest it is to lose herself in that eternal Love and Beauty of which all earthly fairness and grandeur are but the dim type, the distant shadow. This highest step, this saintly elevation, which but few selectest spirits ever on earth attain, to raise the soul to which the Eternal Father organized every relation of human existence and strung every chord of human love, for which this world is one long discipline, for which the soul's human education is constantly varied, for which it is now torn by sorrow, now flooded by joy, to which all its multiplied powers tend with upward hands of dumb and ignorant aspiration,—this Ultima Thule of virtue had been seized upon by our sage as the *all* of religion. He knocked out every round of the ladder but the highest,

and then, pointing to its hopeless splendor, said to the world, "Go up thither and be saved!"

Short of that absolute self-abnegation, that unconditional surrender to the Infinite, there was nothing meritorious,—because, if *that* were commanded, every moment of refusal was rebellion. Every prayer, not based on such consecration, he held to be an insult to the Divine Majesty;—the reading of the Word, the conscientious conduct of life, the performance of the duties of man to man, being, without this, the deeds of a creature in conscious rebellion to its Eternal Sovereign, were all vitiated and made void. Nothing was to be preached to the sinner, but his ability and obligation to rise immediately to this height.

It is not wonderful that teaching of this sort should seem to many unendurable, and that the multitude should desert the preacher with the cry, "This is an hard saying; who can hear it?" The young and gay were wearied by the dryness of metaphysical discussions which to them were as unintelligible as a statement of the last results of the mathematician to the child commencing the multiplication-table. There remained around him only a select circle,—shrewd, hard thinkers, who delighted in metaphysical subtilties, —deep-hearted, devoted natures, who sympathized with the unworldly purity of his life, his active philanthropy and untiring benevolence,—courageous men, who admired his independence of thought and freedom in breasting received opinion,—and those unperceiving, dull, good people who are content to go to church anywhere as convenience and circumstance may drift them,—people who serve, among the keen feeling and thinking portion of the world, much the same purpose as adipose matter in the human system, as a soft cushion between the nerves of feeling and the muscles of activity.

There was something affecting in the pertinacity with which the good Doctor persevered in saying his say to his discouraging minority of hearers. His salary was small; his meeting-house, dam-

aged during the Revolutionary struggle, was dilapidated and forlorn,—fireless in winter, and in summer admitting a flood of sun and dust through those great windows which formed so principal a feature in those first efforts of Puritan architecture.

Still, grand in his humility, he preached on,—and as a soldier never asks why, but stands at apparently the most useless post, so he went on from Sunday to Sunday, comforting himself with the reflection that no one could think more meanly of his ministrations than he did himself. "I am like Moses only in not being eloquent," he said, in his simplicity. "My preaching is barren and dull, my voice is hard and harsh; but then the Lord is a Sovereign, and may work through me. He fed Elijah once through a raven, and he may feed some poor wandering soul through me."

The only mistake made by the good man was that of supposing that the elaboration of theology was preaching the gospel. The gospel he was preaching constantly, by his pure, unworldly living, by his visitations to homes of poverty and sorrow, by his searching out of the lowly African slaves, his teaching of those whom no one else in those days had thought of teaching, and by the grand humanity, outrunning his age, in which he protested against the then admitted system of slavery and the slave-trade. But when, rising in the pulpit, he followed trains of thought suited only to the desk of the theological lecture-room, he did it blindly, following that law of self-development by which minds of a certain amount of fervor *must* utter what is in them, whether men will hear or whether they will forbear.

But the place where our Doctor was happiest was his study. There he explored, and wandered, and read, and thought, and lived a life as wholly ideal and intellectual as heart could conceive.

And could *Love* enter a reverend doctor's study, and find his way into a heart empty and swept of all those shreds of poetry and romance in which he usually finds the material of his incantations?

Even so;—but he came so thoughtfully, so reverently, with so wise and cautious a footfall, that the good Doctor never even raised his spectacles to see who was there. The first that he knew, poor man, he was breathing an air of strange and subtle sweetness,—from what paradise he never stopped his studies to inquire. He was like a great, rugged elm, with all its lacings and archings of boughs and twigs, which has stood cold and frozen against the metallic blue of winter sky, forgetful of leaves, and patient in its bareness, calmly content in its naked strength and crystalline definiteness of outline. But in April there is a rising and stirring within the grand old monster,—a whispering of knotted buds, a mounting of sap coursing ethereally from bough to bough with a warm and gentle life; and though the old elm knows it not, a new creation is at hand. Just so, ever since the good man had lived at Mrs. Seudder's, and had the gentle Mary for his catechumen, a richer life seemed to have colored his thoughts,—his mind seemed to work with a pleasure as never before.

Whoever looked on the forehead of the good Doctor must have seen the squareness of ideality giving marked effect to its outline. As yet ideality had dealt only with the intellectual and invisible, leading to subtle refinements of argument and exalted ideas of morals. But there was lying in him, crude and unworked, a whole mine of those artistic feelings and perceptions which are awakened and developed only by the touch of beauty. Had he been born beneath the shadow of the great Duomo of Florence, where Giotto's Campanile rises like the slender stalk of a celestial lily, where varied marbles and rainbow-glass and gorgeous paintings and lofty statuary call forth, even from childhood, the soul's reminiscences of the bygone glories of its pristine state, his would have been a soul as rounded and full in its sphere of faculties as that of Da Vinci or Michel Angelo. But of all that he was as ignorant as a child; and the first revelation of his dormant nature was to come to him through

the face of woman, — that work of the Mighty Master which is to be found in all lands and ages.

What makes the love of a great mind something fearful in its inception is that it is often the unsealing of a hitherto undeveloped portion of a large and powerful being; the woman may or may not seem to other eyes adequate to the effect produced, but the man cannot forget her, because with her came a change which makes him forever a different being. So it was with our friend. A woman it was that was destined to awaken in him all that consciousness which music, painting, poetry awaken in more evenly developed minds; and it is the silent breathing of her creative presence that is even now creating him anew, while as yet he knows it not.

He never thought, this good old soul, whether Mary were beautiful or not; he never even knew that he looked at her; nor did he know why it was that the truths of his theology, when uttered by her tongue, had such a wondrous beauty as he never felt before. He did not know why it was, that, when she silently sat by him, copying tangled manuscript for the press, as she sometimes did, his whole study seemed so full of some divine influence, as if, like St. Dorothea, she had worn in her bosom, invisibly, the celestial roses of paradise. He recorded honestly in his diary what marvellous freshness of spirit the Lord had given him, and how he seemed to be uplifted in his communings with heaven, without once thinking from the robes of what angel this sweetness had exhaled.

On Sundays, when he saw good Mrs. Jones asleep, and Simon Brown's hard, sharp eyes, and Deacon Twitchel mournfully rocking to and fro, and his wife handing fennel to keep the children awake, his eye glanced across to the front gallery, where one earnest young face, ever kindling with feeling and bright with intellect, followed on his way, and he felt uplifted and comforted. On Sunday mornings, when Mary came out of her little room, in clean white dress, with her sing-

ing-book and psalm-book in her hands, her deep eyes solemn from recent prayer, he thought of that fair and mystical bride, the Lamb's wife, whose union with her Divine Redeemer in a future millennial age was a frequent and favorite subject of his musings; yet he knew not that this celestial bride, clothed in fine linen, clean and white, veiled in humility and meekness, bore in his mind those earthly features. No, he never had dreamed of that! But only after she had passed by, that mystical vision seemed to him more radiant, more easy to be conceived.

It is said, that, if a grape-vine be planted in the neighborhood of a well, its roots, running silently underground, wreath themselves in a net-work around the cold, clear waters, and the vine's putting on outward greenness and unwonted clusters and fruit is all that tells where every root and fibre of its being has been silently stealing. So those loves are most fatal, most absorbing, in which, with unheeded quietness, every thought and fibre of our life twines gradually around some human soul, to us the unsuspected well-spring of our being. Fearful it is, because so often the vine must be uprooted, and all its fibres wrenched away; but till the hour of discovery comes, how is it transfigured by a new and beautiful life!

There is nothing in life more beautiful than that trance-like quiet dawn which precedes the rising of love in the soul. When the whole being is pervaded imperceptibly and tranquilly by another being, and we are happy, we know not and ask not why, the soul is then receiving all and asking nothing. At a later day she becomes self-conscious, and then come craving exactions, endless questions,—the whole world of the material comes in with its hard counsels and consultations, and the beautiful trance fades forever.

Of course, all this is not so to *you*, my good friends, who read it without the most distant idea what it can mean; but there are people in the world to whom it has meant and will mean much, and who will see in the present happiness of our

respectable friend something even ominous and sorrowful.

It had not escaped the keen eye of the mother how quickly and innocently the good Doctor was absorbed by her daughter, and thereupon had come long trains of practical reflections.

The Doctor, though not popular indeed as a preacher, was a noted man in his age. Her deceased husband had regarded him with something of the same veneration which might have been accorded to a divine messenger, and Mrs. Scudder had received and kept this veneration as a precious legacy. Then, although not handsome, the Doctor had decidedly a grand and imposing appearance. There was nothing common or insignificant about him. Indeed, it had been said, that, when, just after the declaration of peace, he walked through the town in the commemorative procession side by side with General Washington, the minister, in the majesty of his gown, bands, cocked hat, and full flowing wig, was thought by many to be the more majestic and personable figure of the two.

In those days, the minister united in himself all those ideas of superior position and cultivation with which the theocratic system of the New England community had invested him. Mrs. Scudder's notions of social rank could reach no higher than to place her daughter on the throne of such preëminence.

Her Mary, she pondered, was no common girl. In those days, it was a rare thing for young persons to devote themselves to religion or make any professions of devout life. The church, or that body of people who professed to have passed through a divine regeneration, was almost entirely confined to middle-aged and elderly people, and it was looked upon as a singular and unwonted call of divine grace when young persons came forward to attach themselves to it. When Mary, therefore, at quite an early age, in all the bloom of her youthful beauty, arose, according to the simple and impressive New England rite, to consecrate herself publicly to a religious life, and

to join the company of professing Christians, she was regarded with a species of deference amounting even to awe. Had it not been for the childlike, unconscious simplicity of her manners, the young people of her age would have shrunk away from her, as from one entirely out of their line of thought and feeling; but a certain natural and innocent playfulness and amiable self-forgetfulness made her a general favorite.

Nevertheless, Mrs. Scudder knew no young man whom she deemed worthy to have and hold a heart which she prized so highly. As to James, he stood at double disadvantage, because, as her cousin's son, he had grown up from childhood under her eye, and all those sins and iniquities into which gay and adventurous youngsters will be falling had come to her knowledge. She felt kindly to the youth; she wished him well; but as to giving him her Mary!—the very suggestion made her dislike him. She was quite sure he must have tried to beguile her,—he must have tampered with her feelings, to arouse in her pure and well-ordered mind so much emotion and devotedness as she had witnessed.

How encouraging a Providence, then, was it that he was gone to sea for three years!—how fortunate that Mary had been prevented in any way from committing herself with him!—how encouraging that the only man in those parts, in the least fitted to appreciate her, seemed so greatly pleased and absorbed in her society!—how easily might Mary's dutiful reverence be changed to a warmer sentiment, when she should find that so great a man could descend from his lofty thoughts to think of her!

In fact, before Mrs. Scudder had gone to sleep the first night after James's departure, she had settled upon the house where the minister and his young wife were to live, had reviewed the window-curtains and bed-quilts for each room, and glanced complacently at an improved receipt for wedding-cake which might be brought out to glorify a certain occasion!

CHAPTER VII.

THE FRIENDS AND RELATIONS OF
JAMES.

MR. ZEBEDEE MARVYN, the father of James, was the sample of an individuality so purely the result of New England society and education, that he must be embodied in our story as a representative man of the times.

He owned a large farm in the immediate vicinity of Newport, which he worked with his own hands and kept under the most careful cultivation. He was a man past the middle of life, with a white head, a keen blue eye, and a face graven deeply with the lines of energy and thought. His was one of those clearly-cut minds which New England forms among her farmers, as she forms quartz crystals in her mountains, by a sort of gradual influence flowing through every pore of her soil and system.

His education, properly so called, had been merely that of those common schools and academies with which the States are thickly sown, and which are the springs of so much intellectual activity. Here he had learned to think and to inquire, — a process which had not ceased with his school-days. Though toiling daily with his sons and hired man in all the minutæ of a farmer's life, he kept an observant eye on the field of literature, and there was not a new publication heard of that he did not immediately find means to add it to his yearly increasing stock of books. In particular was he a well-read and careful theologian, and all the controversial tracts, sermons, and books, with which then, as ever since, New England has abounded, not only lay on his shelves, but had his pencilled annotations, queries, and comments thickly scattered along their margins. There was scarce an office of public trust which had not at one time or another been filled by him. He was deacon of the church, chairman of the school-committee, justice of the peace, had been twice representative in the State legislature, and was in permanence a sort of adviser-general in

all cases between neighbor and neighbor. Among other acquisitions, he had gained some knowledge of the general forms of law, and his advice was often asked in preference to that of the regular practitioners.

His dwelling was one of those large, square, white, green-blinded mansions, cool, clean, and roomy, wherein the respectability of New England in those days rejoiced. The windows were shaded by clumps of lilacs; the deep yard with its white fence inclosed a sweep of clean, short grass, and a few fruit-trees. Opposite the house was a small blacksmith's-shed, which, of a wet day, was sparkling and lively with bellows and ringing forge, while Mr. Zebedee and his sons were hammering and pounding and putting in order anything that was out of the way in farming-tools or establishments. Not unfrequently the latest scientific work or the last tractate of theology lay open by his side, the contents of which would be discussed with a neighbor or two as they entered; for, to say the truth, many a neighbor, less forehanded and thrifty, felt the benefit of this arrangement of Mr. Zebedee, and would drop in to see if he "wouldn't just tighten that rivet," or "kind o' ease out that 'ere brace," or "let a feller have a turn with his bellows, or a stroke or two on his anvil," — to all which the good man consented with a grave obligingness. The fact was, that, as nothing in the establishment of Mr. Marvyn was often broken or lost or out of place, he had frequent applications to lend to those less fortunate persons, always to be found, who supply their own lack of consideration from the abundance of their neighbors.

He who is known always to be in hand, and always obliging, in a neighborhood, stands the chance sometimes of having nothing for himself. Mr. Zebedee reflected quietly on this subject, taking it, as he did all others, into grave and orderly consideration, and finally provided a complete set of tools, which he kept for the purpose of lending; and when any of these were lent, he told the next

applicant quietly, that the axe or the hoe was already out, and thus he reconciled the Scripture which commanded him to "do good and lend" with that law of order which was written in his nature.

Early in life Mr. Marvyn had married one of the handsomest girls of his acquaintance, who had brought him a thriving and healthy family of children, of whom James was the youngest. Mrs. Marvyn was, at this time, a tall, sad-eyed, gentlemanly woman, thoughtful, earnest, deep-natured, though sparing in the matter of words. In all her household arrangements, she had the same thrift and order which characterized her husband; but hers was a mind of a finer and higher stamp than his.

In her bed-room, near by her work-basket, stood a table covered with books,—and so systematic were her household arrangements, that she never any day missed her regular hours for reading. One who should have looked over this table would have seen there how eager and hungry a mind was hid behind the silent eyes of this quiet woman. History, biography, mathematics, volumes of the encyclopædia, poetry, novels, all alike found their time and place there,—and while she pursued her household labors, the busy, active soul within travelled cycles and cycles of thought, few of which ever found expression in words. What might be that marvellous music of the *Miserere*, of which she read, that it convulsed crowds and drew groans and tears from the most obdurate? What might be those wondrous pictures of Raphael and Leonardo da Vinci? What would it be to see the Apollo, the Venus? What was the charm that enchanted the old marbles,—charm untold and inconceivable to one who had never seen even the slightest approach to a work of art? Then those glaciers of Switzerland, that grand, unapproachable mixture of beauty and sublimity in her mountains!—what would it be to one who could see it? Then what were all those harmonies of which she read,—masses,

fugues, symphonies? Oh, could she once hear the *Miserere* of Mozart, just to know what music was like! And the cathedrals, what were they? How wonderful they must be, with their forests of arches, many-colored as autumn-woods with painted glass, and the chants and anthems rolling down their long aisles! On all these things she pondered quietly, as she sat often on Sundays in the old staring, rattle-windowed meeting-house, and looked at the uncouth old pulpit, and heard the choir faw-sol-la-ing or singing fuging tunes; but of all this she said nothing.

Sometimes, for days, her thoughts would turn from these subjects and be absorbed in mathematical or metaphysical studies. "I have been following that treatise on Optics for a week, and never understood it till to-day," she once said to her husband. "I have found now that there has been a mistake in drawing the diagrams. I have corrected it, and now the demonstration is complete.—Dinah, take care, that wood is hickory, and it takes only seven sticks of that size to heat the oven."

It is not to be supposed that a woman of this sort was an inattentive listener to preaching so stimulating to the intellect as that of Dr. H. No pair of eyes followed the web of his reasonings with a keener and more anxious watchfulness than those sad, deep-set, hazel ones; and as she was drawn along the train of its inevitable logic, a close observer might have seen how the shadows deepened over them. For, while others listened for the clearness of the thought, for the acuteness of the argument, she listened as a soul wide, fine-strung, acute, repressed, whose every fibre is a nerve, listens to the problem of its own destiny,—listened as the mother of a family listens, to know what were the possibilities, the probabilities, of this mysterious existence of ours to herself and those dearer to her than herself.

The consequence of all her listening was a history of deep inward sadness. That exultant joy, or that entire sub-

mission, with which others seemed to view the scheme of the universe, as thus unfolded, did not visit her mind. Everything to her seemed shrouded in gloom and mystery; and that darkness she received as a token of unregeneracy, as a sign that she was one of those who are destined, by a mysterious decree, never to receive the light of the glorious gospel of Christ. Hence, while her husband was a deacon of the church, she, for years, had sat in her pew while the sacramental elements were distributed, a mournful spectator. Punctilious in every duty, exact, reverential, she still regarded herself as a child of wrath, an enemy to God, and an heir of perdition; nor could she see any hope of remedy, except in the sovereign, mysterious decree of an Infinite and Unknown Power, a mercy for which she waited with the sickness of hope deferred.

Her children had grown up successively around her, intelligent and exemplary. Her eldest son was mathematical professor in one of the leading colleges of New England. Her second son, who jointly with his father superintended the farm, was a man of wide literary culture and of fine mathematical genius; and not unfrequently, on winter evenings, the son, father, and mother worked together, by their kitchen fireside, over the calculations for the almanac for the ensuing year, which the son had been appointed to edit.

Everything in the family arrangements was marked by a sober precision, a grave and quiet self-possession. There was little demonstrativeness of affection between parents and children, brothers and sisters, though great mutual affection and confidence. It was not pride, nor sternness, but a sort of habitual shamefacedness, that kept far back in each soul those feelings which are the most beautiful in their outcome; but after a while, the habit became so fixed a nature, that a caressing or affectionate expression could not have passed the lips of one to another without a painful awkwardness. Love was understood, once for all, to be the basis on which their life

was built. Once for all, they loved each other, and after that, the less said, the better. It had cost the woman's heart of Mrs. Marvyn some pangs, in the earlier part of her wedlock, to accept of this *once for all*, in place of those daily outgoings which every woman desires should be like God's loving-kindnesses, "new every morning"; but hers, too, was a nature strongly inclining inward, and, after a few tremulous movements, the needle of her soul settled, and her life-lot was accepted,—not as what she would like or could conceive, but as a reasonable and good one. Life was a picture painted in low, cool tones, but in perfect keeping; and though another and brighter style might have pleased better, she did not quarrel with this.

Into this steady, decorous, highly-respectable circle the youngest child, James, made a formidable irruption. One sometimes sees launched into a family-circle a child of so different a nature from all the rest, that it might seem as if, like an aërolite, he had fallen out of another sphere. All the other babies of the Marvyn family had been of that orderly, contented sort who sleep till it is convenient to take them up, and while awake suck their thumbs contentedly and look up with large, round eyes at the ceiling when it is not convenient for their elders and betters that they should do anything else. In farther advanced childhood, they had been quiet and decorous children, who could be all dressed and set up in chairs, like so many dolls, of a Sunday morning, patiently awaiting the stroke of the church-bell to be carried out and put into the wagon which took them over the two-miles' road to church. Possessed of such tranquil, orderly, and exemplary young offshoots, Mrs. Marvyn had been considered eminent for her "faculty" in bringing up children.

But James was destined to put "faculty," and every other talent which his mother possessed, to rout. He was an infant of moods and tenses, and those not of any regular verb. He would cry of nights, and he would be taken up of morn-

ings, and he would not suck his thumb, nor a bundle of caraway-seed tied in a rag and dipped in sweet milk, with which the good gossips in vain endeavored to pacify him. He fought manfully with his two great fat fists the battle of babyhood, utterly reversed all nursery maxims, and reigned as baby over the whole prostrate household. When old enough to run alone, his splendid black eyes and glossy rings of hair were seen flashing and bobbing in every forbidden place and occupation. Now trailing on his mother's gown, he assisted her in salting her butter by throwing in small contributions of snuff or sugar, as the case might be; and again, after one of those mysterious periods of silence which are of most ominous significance in nursery experience, he would rise from the demolition of her indigo-bag, showing a face ghastly with blue streaks, and looking more like a gnome than the son of a respectable mother. There was not a pitcher of any description of contents left within reach of his little tiptoes and busy fingers that was not pulled over upon his giddy head without in the least seeming to improve its steadiness. In short, his mother remarked that she was thankful every night when she had fairly gotten him into bed and asleep; James had really got through one more day and killed neither himself nor any one else.

As a boy, the case was little better. He did not take to study,—yawned over books, and cut out moulds for running anchors when he should have been thinking of his columns of words in four syllables. No mortal knew how he learned to read, for he never seemed to stop running long enough to learn anything; and yet he did learn, and used the talent in conning over travels, sea-voyages, and lives of heroes and naval commanders. Spite of father, mother, and brother, he seemed to possess the most extraordinary faculty of running up unsavory acquaintances. He was hail-fellow well-met with every Tom and Jack and Jim and Ben and Dick that strolled on the wharves, and astonished his father with minutest par-

ticulars of every ship, schooner, and brig in the harbor, together with biographical notes of the different Toms, Dicks, and Harrys by whom they were worked.

There was but one member of the family that seemed to know at all what to make of James, and that was their negro servant, Candace.

In those days, when domestic slavery prevailed in New England, it was quite a different thing in its aspects from the same institution in more southern latitudes. The hard soil, unyielding to any but the most considerate culture, the thrifty, close, shrewd habits of the people, and their untiring activity and industry, prevented, among the mass of the people, any great reliance on slave labor. It was something foreign, grotesque, and picturesque in a life of the most matter-of-fact sameness; it was even as if one should see clusters of palm-trees scattered here and there among Yankee wooden meeting-houses, or open one's eyes on clumps of yellow-striped aloes growing among hardhack and huckleberry bushes in the pastures.

Added to this, there were from the very first, in New England, serious doubts in the minds of thoughtful and conscientious people in reference to the lawfulness of slavery; and this scruple prevented many from availing themselves of it, and proved a restraint on all, so that nothing like plantation-life existed, and what servants were owned were scattered among different families, of which they came to be regarded and to regard themselves as a legitimate part and portion,—Mr. Marvyn, as a man of substance, numbering two or three in his establishment, among whom Candace reigned chief. The presence of these tropical specimens of humanity, with their wide, joyous, rich physical abundance of nature and their hearty *abandon* of outward expression, was a relief to the still clear-cut lines in which the picture of New England life was drawn, which an artist must appreciate.

No race has ever shown such infinite and rich capabilities of adaptation to va-

rying soil and circumstances as the negro. Alike to them the snows of Canada, the hard, rocky land of New England, with its set lines and orderly ways, or the gorgeous profusion and loose abundance of the Southern States. Sambo and Cuffy expand under them all. New England yet preserves among her hills and valleys the lingering echoes of the jokes and jollities of various sable worthies, who saw alike in orthodoxy and heterodoxy, in Dr. This-side and Dr. That-side, only food for more abundant merriment;—in fact, the minister of those days not unfrequently had his black shadow, a sort of African Boswell, who powdered his wig, brushed his boots, defended and patronized his sermons, and strutted complacently about as if through virtue of his blackness he had absorbed every ray of his master's dignity and wisdom. In families, the presence of these exotics was a godsend to the children, supplying from the abundant outwardness and demonstrativeness of their nature that aliment of sympathy so dear to childhood, which the repressed and quiet habits of New England education denied. Many and many a New Englander counts among his pleasantest early recollections the memory of some of these genial creatures, who by their warmth of nature were the first and most potent mesmerizers of his childish mind.

Candace was a powerfully built, majestic black woman, corpulent, heavy, with a swinging majesty of motion like that of a ship in a ground-swell. Her shining black skin and glistening white teeth were indications of perfect physical vigor which had never known a day's sickness; her turban, of broad red and yellow bandanna stripes, had even a warm tropical glow; and her ample skirts were always ready to be spread over every childish transgression of her youngest pet and favorite, James.

She used to hold him entranced long winter-evenings, while she sat knitting in the chimney-corner, and crooned to him strange, wild African legends of the things that she had seen in her childhood

and early days,—for she had been stolen when about fifteen years of age; and these weird, dreamy talks increased the fervor of his roving imagination, and his desire to explore the wonders of the wide and unknown world. When rebuked or chastised, it was she who had secret bowels of mercy for him, and hid doughnuts in her ample bosom to be secretly administered to him in mitigation of the sentence that sent him supperless to bed; and many a triangle of pie, many a wedge of cake, had conveyed to him surreptitious consolations which his more conscientious mother longed, but dared not, to impart. In fact, these ministrations, if suspected, were winked at by Mrs. Marvyn, for two reasons: first, that mothers are generally glad of any loving-kindness to an erring boy, which they are not responsible for; and second, that Candace was so set in her ways and opinions that one might as well come in front of a ship under full sail as endeavor to stop her in a matter where her heart was engaged.

To be sure, she had her own private and special quarrels with "Massa James" when he disputed any of her sovereign orders in the kitchen, and would sometimes pursue him with uplifted rolling-pin and floury hands when he had snatched a gingernut or cookie without suitable deference or supplication, and would declare, roundly, that there "never was sich an aggravatin' young un." But if, on the strength of this, any one else ventured a reproof, Candace was immediately round on the other side:—"Dat ar' chile gwin' to be spiled, 'cause dey's allers a-piekin' on him;—he's well enough, on'y let him alone."

Well, under this miscellaneous assortment of influences,—through the order and gravity and solemn monotone of life at home, with the unceasing tick-tack of the clock forever resounding through clean, empty-seeming rooms,—through the sea, ever shining, ever smiling, chimping, soliciting, like a magical charger who comes saddled and bridled and offers to take you to fairyland,—through acquaintance with all sorts of foreign, out-

landish ragamuffins among the ships in the harbor,—from disgust of slow-moving oxen, and long-drawn, endless furrows round the fifteen-acre lot,—from misunderstandings with grave elder brothers, and feeling somehow as if, he knew not why, he grieved his mother all the time just by being what he was and couldn't help being,—and, finally, by a bitter break with his father, in which came that last wrench for an individual existence which some time or other the young growing mind will give to old authority,—by all these united, was the lot at length cast; for one evening James was missing at supper, missing by the fireside, gone all night, not at home to breakfast,—till, finally, a strange, weird, most heathenish-looking cabin-boy, who had often been forbidden the premises by Mr. Marvyn, brought in a letter, half-defiant, half-penitent, which announced that James had sailed in the "Ariel" the evening before.

Mr. Zebedee Marvyn set his face as a flint, and said, "He went out from us because he was not of us,"—whereat old Candace lifted her great floury fist from the kneading-trough, and, shaking it like a large snowball, said, "Oh, you go 'long, Massa Marvyn; ye'll live to count dat ar' boy for de staff o' your old age yet, now I tell ye; got de makin' o' ten or'nary men in him; kittles dat's full allers will bile over; good yeast will blow out de cork,—lucky ef it don't bust de bottle. Tell ye, der's angels has der hooks in sich, and when de Lord wants him dey'll haul him in safe and sound." And Candace concluded her speech by giving a lift to her whole batch of dough and flinging it down in the trough with an emphasis that made the pewter on the dresser rattle.

This apparently irreverent way of expressing her mind, so contrary to the deferential habits studiously inculcated in family discipline, had grown to be so much a matter of course to all the family that nobody ever thought of rebuking it. There was a sort of savage freedom about her which they excused in right of her having

been born and bred a heathen, and of course not to be expected to come at once under the yoke of civilization. In fact, you must all have noticed, my dear readers, that there are some sorts of people for whom everybody turns out as they would for a railroad-car, without stopping to ask why, and Candace was one of them.

Moreover, Mr. Marvyn was not displeased with this defence of James, as might be inferred from his mentioning it four or five times in the course of the morning, to say how foolish it was,—wondering why it was that Candace and everybody else got so infatuated with that boy,—and ending, at last, after a long period of thought, with the remark, that these poor African creatures often seemed to have a great deal of shrewdness in them, and that he was often astonished at the penetration that Candace showed.

At the end of the year James came home, more quiet and manly than he had ever been known before,—so handsome with his sunburnt face, and his keen, dark eyes, and glossy curls, that half the girls in the front gallery lost their hearts the first Sunday he appeared in church. He was tender as a woman to his mother, and followed her with his eyes, like a lover, wherever she went; he made due and manly acknowledgments to his father, but declared his fixed and settled intention to abide by the profession he had chosen; and he brought home all sorts of strange foreign gifts for every member of the household. Candace was glorified with a flaming red and yellow turban of Moorish stuff, from Mogadore, together with a pair of gorgeous yellow morocco slippers with peaked toes, which, though there appeared no call to wear them in her common course of life, she would put on her fat feet and contemplate with daily satisfaction. She became increasingly strengthened thereby in the conviction that the angels who had their hooks in Massa James's jacket were already beginning to shorten the line.

THE PALM AND THE PINE.

WHEN Peter led the First Crusade,
A Norseman wooed an Arab maid.

He loved her lithe and palmy grace,
And the dark beauty of her face :

She loved his cheeks, so ruddy fair,
His sunny eyes and yellow hair.

He called : she left her father's tent ;
She followed whereso'er he went.

She left the palms of Palestine
To sit beneath the Norland pine.

She sang the musky Orient strains
Where Winter swept the snowy plains.

Their natures met like night and morn
What time the morning-star is born.

The child that from their meeting grew
Hung, like that star, between the two.

The glossy night his mother shed
From her long hair was on his head :

But in its shade they saw arise
The morning of his father's eyes.

Beneath the Orient's tawny stain
Wandered the Norseman's crimson vein :

Beneath the Northern force was seen
The Arab sense, alert and keen.

His were the Viking's sinewy hands,
The arching foot of Eastern lands.

And in his soul conflicting strove
Northern indifference, Southern love ;

The chastity of temperate blood,
Impetuous passion's fiery flood ;

The settled faith that nothing shakes,
The jealousy a breath awakes ;

The planning Reason's sober gaze,
And Fancy's meteoric blaze.

And stronger, as he grew to man,
The contradicting natures ran,—

As mingled streams from Etna flow,
One born of fire, and one of snow.

And one impelled, and one withheld,
And one obeyed, and one rebelled.

One gave him force, the other fire ;
This self-control, and that desire.

One filled his heart with fierce unrest ;
With peace serene the other blessed.

He knew the depth and knew the height,
The bounds of darkness and of light ;

And who these far extremes has seen
Must needs know all that lies between.

So, with untaught, instinctive art,
He read the myriad-natured heart.

He met the men of many a land ;
They gave their souls into his hand ;

And none of them was long unknown :
The hardest lesson was his own.

But how he lived, and where, and when,
It matters not to other men ;

For, as a fountain disappears,
To gush again in later years,

So natures lost again may rise
After the lapse of centuries,—

May track the hidden course of blood
Through many a generation's flood,

Till, on some unsuspected field,
The latent lineage is revealed.

The hearts that met in Palestine,
And mingled 'neath the Norland pine,
Still beat with double pulse in mine.

THE PROFESSOR AT THE BREAKFAST-TABLE.

WHAT HE SAID, WHAT HE HEARD, AND WHAT HE SAW.

BACK again!—A turtle—which means a tortoise—is fond of his shell; but if you put a live coal on his back, he crawls out of it. So the boys say.

It is a libel on the turtle. He grows to his shell, and his shell is in his body as much as his body is in his shell.—I don't think there is one of our boarders quite so testudinous as I am. Nothing but a combination of motives, more peremptory than the coal on the turtle's back, could have got me to leave the shelter of my carapace; and after memorable interviews, and kindest hospitalities, and grand sights, and huge influx of patriotic pride,—for every American owns all America,—

“Creation's heir,—the world, the world is”

his, if anybody's,—I come back with the feeling which a boned turkey might experience, if, retaining his consciousness, he were allowed to resume his skeleton.

Welcome, O Fighting Gladiator, and Recumbent Cleopatra, and Dying Warrior, whose classic outlines (reproduced in the calcined mineral of Lutetia) crown my loaded shelves! Welcome, ye triumphs of pictorial art (repeated by the magic graver) that look down upon me from the walls of my sacred cell! Vesalius, as Titian drew him, high-fronted, still-eyed, thick-bearded, with signet-ring, as befits a gentleman, with book and carelessly-held eyeglass, marking him a scholar; thou, too, Jan Knyper, commonly called Jan Praktiseer, old man of a century and seven years besides, father of twenty sons and two daughters, cut in copper by Houbraken, bought from a portfolio on one of the Paris *quais*; and ye Three Trees of Rembrandt, black in shadow against the blaze of sunlight; and thou Rosy Cottager of Sir Joshua,—thy roses hinted by the peppery burin of Bartolozzi; ye, too, of lower grades in

nature, yet not unlovely nor unrenowned, Young Bull of Paulus Potter, and Sleeping Cat of Cornelius Visscher; welcome once more to my eyes! The old books look out from the shelves, and I seem to read on their backs something besides their titles,—a kind of solemn greeting. The crimson carpet flushes warm under my feet. The arm-chair hugs me; the swivel-chair spins round with me, as if it were giddy with pleasure; the vast recumbent *fauteuil* stretches itself out under my weight, as one joyous with food and wine stretches in after-dinner laughter.

The boarders were pleased to say that they were glad to get me back. One of them ventured a compliment, namely,—that I talked as if I believed what I said.—This was apparently considered something unusual, by its being mentioned.

One who means to talk with entire sincerity,—I said,—always feels himself in danger of two things, namely,—an affectation of bluntness, like that of which Cornwall accuses Kent in “Lear,” and actual rudeness. What a man wants to do, in talking with a stranger, is to get and to give as much of the best and most real life that belongs to the two talkers as the time will let him. Life is short, and conversation apt to run to mere words. Mr. Huc I think it is, who tells us some very good stories about the way in which two Chinese gentlemen contrive to keep up a long talk without saying a word which has any meaning in it. Something like this is occasionally heard on this side of the Great Wall. The best Chinese talkers I know are some pretty women whom I meet from time to time. Pleasant, airy, complimentary, the little flakes of flattery glimmering in their talk like the bits of gold-leaf in *eau-de-vie de Dantzic*; their accents flowing on in a soft ripple,—never a wave, and never a calm;

words nicely fitted, but never a colored phrase or a high-flavored epithet; they turn air into syllables so gracefully, that we find meaning for the music they make as we find faces in the coals and fairy palaces in the clouds. There is something very odd, though, about this mechanical talk.

You have sometimes been in a train on the railroad when the engine was detached a long way from the station you were approaching? Well, you have noticed how quietly and rapidly the ears kept on, just as if the locomotive were drawing them? Indeed, you would not have suspected that you were travelling on the strength of a dead fact, if you had not seen the engine running away from you on a side-track. Upon my conscience, I believe some of these pretty women detach their minds entirely, sometimes, from their talk,—and, what is more, that we never know the difference. Their lips let off the fluty syllables just as their fingers would sprinkle the music-drops from their pianos; unconscious habit turns the phrase of thought into words just as it does that of music into notes.—Well, they govern the world, for all that,—these sweet-lipped women,—because beauty is the index of a larger fact than wisdom.

—The Bombazine wanted an explanation.

Madam,—said I,—wisdom is the abstract of the past, but beauty is the promise of the future.

—All this, however, is not what I was going to say. Here am I, suppose, seated—we will say at a dinner-table—alongside of an intelligent Englishman. We look in each other's faces,—we exchange a dozen words. One thing is settled: we mean not to offend each other,—to be perfectly courteous,—more than courteous; for we are the entertainer and the entertained, and cherish particularly amiable feelings to each other. The claret is good; and if our blood reddens a little with its warm crimson, we are none the less kind for it.

—I don't think people that talk over their victuals are like to say anything

very great, especially if they get their heads muddled with strong drink before they begin jabberin'.

The Bombazine uttered this with a sugary sourness, as if the words had been steeped in a solution of acetate of lead.—The boys of my time used to call a hit like this a "side-winder."

—I must finish this woman.—

Madam,—I said,—the Great Teacher seems to have been fond of talking as he sat at meat. Because this was a good while ago, in a far-off place, you forget what the true fact of it was,—that those were real dinners, where people were hungry and thirsty, and where you met a very miscellaneous company. Probably there was a great deal of loose talk among the guests; at any rate, there was always wine, we may believe.

Whatever may be the hygienic advantages or disadvantages of wine,—and I for one, except for certain particular ends, believe in water, and, I blush to say it, in black tea,—there is no doubt about its being the grand specific against dull dinners. A score of people come together in all moods of mind and body. The problem is, in the space of one hour, more or less, to bring them all into the same condition of slightly exalted life. Food alone is enough for one person, perhaps,—talk, alone, for another; but the grand equalizer and fraternizer, which works up the radiators to their maximum radiation, and the absorbents to their maximum receptivity, is now just where it was when

"The conscious water saw its Lord and blushed,"

—when six great vessels containing water, which seems to have been carefully purified, so as to be ready for the marriage-feast, were changed into the best of wine. I once wrote a song about wine, in which I spoke so warmly of it, that I was afraid some would think it was written *inter pocula*; whereas it was composed in the bosom of my family, under the most tranquillizing domestic influences.

—The divinity-student turned towards me, looking mischievous.—Can

you tell me,—he said,—who wrote a song for a temperance celebration' once, of which the following is a verse?—

Alas for the loved one, too gentle and fair
The joys of the banquet to chasten and share!
Her eye lost its light that his goblet might
shine,
And the rose of her cheek was dissolved in
his wine!

I did,—I answered.—What are you going to do about it?—I will tell you another line I wrote long ago:—

Don't be "consistent,"—but be simply true.

The longer I live, the more I am satisfied of two things: first, that the truest lives are those that are cut rose-diamond-fashion, with many facets answering to the many-planed aspects of the world about them; secondly, that society is always trying in some way or other to grind us down to a single flat surface. It is hard work to resist this grinding-down action.—Now give me a chance. Better eternal and universal abstinence than the brutalities of those days that made wives and mothers and daughters and sisters blush for those whom they should have honored, as they came reeling home from their debauches! Yet better even excess than lying and hypocrisy; and if wine is upon all our tables, let us praise it for its color and fragrance and social tendency, so far as it deserves, and not hug a bottle in the closet and pretend not to know the use of a wine-glass at a public dinner! I think you will find that people who honestly mean to be true really contradict themselves much more rarely than those who try to be "consistent." But a great many things we say can be made to appear contradictory, simply because they are partial views of a truth, and may often look unlike at first, as a front view of a face and its profile often do.

Here is a distinguished divine, for whom I have great respect, for I owe him a charming hour at one of our literary anniversaries, and he has often spoken noble words; but he holds up a remark of my friend the "Autocrat,"—which I

grieve to say he twice misquotes, by omitting the very word which gives it its significance,—the word *fluid*, intended to typify the mobility of the restricted will,—holds it up, I say, as if it attacked the reality of the self-determining principle, instead of illustrating its limitations by an image. Now I will not explain any farther, still less defend, and least of all attack, but simply quote a few lines from one of my friend's poems, printed more than ten years ago, and ask the distinguished gentleman where *he* has ever asserted more strongly or absolutely the independent will of the "subcreative centre," as my heretical friend has elsewhere called man.

—Thought, conscience, will, to make them
all thy own

He rent a pillar from the eternal throne!

—Made in His image, thou must nobly dare
The thorny crown of sovereignty to share.

—Think not too meanly of thy low estate;
Thou hast a choice; to choose is to create!

If he will look a little closely, he will see that the profile and the full-face views of the will are both true and perfectly consistent.

Now let us come back, after this long digression, to the conversation with the intelligent Englishman. We begin skirmishing with a few light ideas,—testing for thoughts,—as our electro-chemical friend, De Sauty, if there were such a person, would test for his current; trying a little litmus-paper for acids, and then a slip of turmeric-paper for alkalis, as chemists do with unknown compounds; flinging the lead, and looking at the shells and sands it brings up to find out whether we are like to keep in shallow water, or shall have to drop the deep-sea line;—in short, seeing what we have to deal with. If the Englishman gets his *His* pretty well placed, he comes from one of the higher grades of the British social order, and we shall find him a good companion.

But, after all, here is a great fact between us. We belong to two different civilizations, and, until we recognize what separates us, we are talking like Pyramus

and Thisbe, without any hole in the wall to talk through. Therefore, on the whole, if he were a superior fellow, incapable of mistaking it for personal conceit, I think I would let out the fact of the real American feeling about Old-World folks. They are children to us in certain points of view. They are playing with toys we have done with for whole generations. That silly little drum they are always beating on, and the trumpet and the feather they make so much noise and cut such a figure with, we have not quite outgrown, but play with much less seriously and constantly than they do. Then there is a whole museum of wigs, and masks, and lace-coats, and gold-sticks, and grimaces, and phrases, which we laugh at, honestly, without affectation, that are still used in the Old-World puppet-shows. I don't think we on our part ever understand the Englishman's concentrated loyalty and specialized reverence. But then we do think more of a man, as such, (barring some little difficulties about race and complexion which the Englishman will touch us on presently,) than any people that ever lived did think of him. Our reverence is a great deal wider, if it is less intense. We have caste among us, to some extent, it is true; but there is never a collar on the American wolf-dog such as you often see on the English mastiff, notwithstanding his robust, hearty individuality.

This confronting of two civilizations is always a grand sensation to me; it is like cutting through the isthmus and letting the two oceans swim into each other's laps. The trouble is, it is so difficult to let out the whole American nature without its self-assertion seeming to take a personal character. But I never enjoy the Englishman so much as when he talks of church and king like Manco Capae among the Peruvians. Then you get the real British flavor, which the cosmopolite Englishman loses. The best conversation I have had with one of them for a long time, lively, fluent, courteous, delightful, was a variation and illustrative

development in elegant phrases of the following short sentences.

Englishman.—Sir, your New-World civilization is barbarism.

American.—Sir, your Old-World development is infancy.

How much better this thorough interpenetration of ideas than a barren interchange of courtesies, or a bush-fighting argument, in which each man tries to cover as much of himself and expose as much of his opponent as the tangled thicket of the disputed ground will let him!

—My thoughts flow in layers or strata, at least three deep. I follow a slow person's talk, and keep a perfectly clear under-current of my own beneath it. My friend the Autocrat has already made a similar remark. Under both runs obscurely a consciousness belonging to a third train of reflections, independent of the two others. I will try to write out a mental movement in three parts.

A.—First part, or Mental Soprano,—thought follows a woman talking.

B.—Second part, or Mental Barytone,—my running accompaniment.

C.—Third part, or Mental Basso,—low grumble of an importunate self-repeating idea.

A.—White lace, three skirts, looped with flowers, wreath of apple-blossoms, gold bracelets, diamond pin and earrings, the most delicious *berthe* you ever saw, white satin slippers —

B.—Deuse take her! What a fool she is! Hear her chatter! (Look out of window just here.—Two pages and a half of description, if it were all written out, in one tenth of a second.)—Go ahead, old lady! (Eye catches picture over fireplace.) There's that infernal family nose! Came over in the "May-flower" on the first old fool's face. Why don't they wear a ring in it?

C.—You'll be late at lecture,—late at lecture,—late,—late,—late —

I observe that a deep layer of thought

sometimes makes itself felt through the superincumbent strata, thus:—The usual single or double currents shall flow on, but there shall be an influence blending with them, disturbing them in an obscure way, until all at once I say,—Oh, there! I knew there was something troubling me,—and the thought which had been working through comes up to the surface clear, definite, and articulates itself,—a disagreeable duty, perhaps, or an unpleasant recollection.

The inner world of thought and the outer world of events are alike in this, that they are both brimful. There is no space between consecutive thoughts, or between the never-ending series of actions. All pack tight, and mould their surfaces against each other, so that in the long run there is a wonderful average uniformity in the forms of both thoughts and actions,—just as you find that cylinders crowded all become hexagonal prisms, and spheres pressed together are formed into regular polyhedra.

Every event that a man would master must be mounted on the run, and no man ever caught the reins of a thought except as it galloped by him. So, to carry out, with another comparison, my remark about the layers of thought, we may consider the mind, as it moves among thoughts or events, like a circus-rider whirling round with a great troop of horses. He can mount a fact or an idea, and guide it more or less completely, but he cannot stop it. So, as I said in another way at the beginning, he can stride two or three thoughts at once, but not break their steady walk, trot, or gallop. He can only take his foot from the saddle of one thought and put it on that of another.

—What is the saddle of a thought? Why, a word, of course.—Twenty years after you have dismissed a thought, it suddenly wedges up to you through the press, as if it had been steadily galloping round and round all that time without a rider.

The will does not act in the interspaces

of thought, for there are no such interspaces, but simply steps from the back of one moving thought upon that of another.

—I should like to ask,—said the divinity-student,—since we are getting into metaphysics, how you can admit space, if all things are in contact, and how you can admit time, if it is always *now* to something.

—I will thank you for the dry toast,—was my answer.

—I wonder if you know this class of philosophers in books or elsewhere. One of them makes his bow to the public, and exhibits an unfortunate truth bandaged up so that it cannot stir hand or foot,—as helpless, apparently, and unable to take care of itself, as an Egyptian mummy. He then proceeds, with the air and method of a master, to take off the bandages. Nothing can be neater than the way in which he does it. But as he takes off layer after layer, the truth seems to grow smaller and smaller, and some of its outlines begin to look like something we have seen before. At last, when he has got them all off, and the truth struts out naked, we recognize it as a diminutive and familiar acquaintance whom we have known in the streets all our lives. The fact is, the philosopher has coaxed the truth into his study and put all those bandages on; of course it is not very hard for him to take them off. Still, a great many people like to watch the process,—he does it so neatly!

Dear! dear! I am ashamed to write and talk, sometimes, when I see how those functions of the large-brained, thumb-opposing plantigrade are abused by my fellow-vertebrates,—perhaps by myself. How they spar for wind, instead of hitting from the shoulder!

—The young fellow called John arose and placed himself in a neat fighting attitude.—Fetch on the fellow that makes them long words!—he said,—and planted a straight hit with the right fist in the concave palm of the left hand with a click like a cup and ball.—You small boy there, hurry up that “Webster’s Unabridged!”

The little gentleman with the malformation, before, described, shocked the propriety of the breakfast-table by a loud utterance of three words, of which the two last were "Webster's Unabridged," and the first was an emphatic monosyllable.—Beg pardon,—he added,—forgot myself. But let us have an English dictionary, if we are to have any. I don't believe in clipping the coin of the realm, Sir! If I put a weathercock on my house, Sir, I want it to tell which way the wind blows up aloft,—off from the prairies to the ocean, or off from the ocean to the prairies, or any way it wants to blow! I don't want a weathercock with a winch in an old gentleman's study that he can take hold of and turn, so that the vane shall point west when the great wind overhead is blowing east with all its might, Sir! Wait till we give you a dictionary, Sir! It takes Boston to do that thing, Sir!

—Some folks think water can't run down-hill anywhere out of Boston,—remarked the Koh-i-noor.

I don't know what *some folks think* so well as I know what *some fools say*,—rejoined Little Boston.—If importing most dry goods made the best scholars, I dare say you would know where to look for 'em.—Mr. Webster couldn't spell, Sir, or wouldn't spell, Sir,—at any rate, he didn't spell; and the end of it was a fight between the owners of some copyrights and the dignity of this noble language which we have inherited from our English fathers,—language!—the blood of the soul, Sir! into which our thoughts run and out of which they grow! We know what a word is worth here in Boston. Young Sam Adams got up on the stage at Commencement, out at Cambridge there, with his gown on, the Governor and Council looking on in the name of his Majesty, King George the Second, and the girls looking down out of the galleries, and taught people how to spell a word that wasn't in the Colonial dictionaries! *Re-e, re, s-i-s, sis, t-a-n-c-e, tance, Resistance!* That was in '43, and it was a good

many years before the Boston boys began spelling it with their muskets;—but when they did begin, they spelt it so loud that the old bedridden women in the English almshouses heard every syllable! Yes, yes, yes,—it was a good while before those other two Boston boys got the class so far along that it could spell those two hard words, *Independence* and *Union!* I tell you what, there are a thousand lives, aye, sometimes a million, go to get a new word into a language that is worth speaking. We know what language means too well here in Boston to play tricks with it. We never make a new word till we have made a new thing or a new thought, Sir! When we shaped the new mould of this continent, we had to make a few. When, by God's permission, we abrogated the primal curse of maternity, we had to make a word or two. The cutwater of this great Leviathan clipper, the OCCIDENTAL,—this thirty-masted wind-and-steam wave-crusher,—must throw a little spray over the human vocabulary as it splits the waters of a new world's destiny!

He rose as he spoke, until his stature seemed to swell into the fair human proportions. His feet must have been on the upper round of his high chair;—that was the only way I could account for it.

Puts her through fust-rate,—said the young fellow whom the boarders call John.

The venerable and kind-looking old gentleman who sits opposite said he remembered Sam Adams as Governor. An old man in a brown coat. Saw him take the Chair on Boston Common. Was a boy then, and remembers sitting on the fence in front of the old Hancock house. Recollects he had a glazed 'lection-bun, and sat eating it and looking down on to the Common. Lallocks flowered late that year, and he got a great bunch off from the bushes in the Hancock front-yard.

Them 'lection buns are no go,—said the young man John, so called.—I know the trick. Give a fellah a fo'penny bun in the mornin', an' he downs the whole

of it. In about an hour it swells up in his stomach as big as a football, and his feedin's spilt for *that* day. That's the way to stop off a young one from eatin' up all the 'lection dinner.

Salem! Salem! not Boston,—shouted the little man.

But the Koh-i-noor laughed a great rasping laugh, and the boy Benjamin Franklin looked sharp at his mother, as if he remembered the bun-experiment as a part of his past personal history.

Little Boston was holding a fork in his left hand. He stabbed a boukder of home-made bread with it, mechanically, and looked at it as if it ought to shriek. It did not,—but he sat as if watching it.

—Language is a solemn thing,—I said.—It grows out of life,—out of its agonies and ecstasies, its wants and its weariness. Every language is a temple, in which the soul of those who speak it is enshrined. Because time softens its outlines and rounds the sharp angles of its cornices, shall a fellow take a pickaxe to help time? Let me tell you what comes of meddling with things that can take care of themselves.—A friend of mine had a watch given him, when he was a boy,—a “bull's eye,” with a loose silver case that came off like an oyster-shell from its contents; you know them,—the cases that you hang on your thumb, while the *core* or the real watch lies in your hand as naked as a peeled apple. Well, he began with taking off the case, and so on from one liberty to another, until he got it fairly open, and there were the works, as good as if they were alive,—crown-wheel, balance-wheel, and all the rest. All right except one thing,—there was a confounded little *hair* had got tangled round the balance-wheel. So my young Solomon got a pair of tweezers, and caught hold of the *hair* very nicely, and pulled it right out, without touching any of the wheels,—when,—buzzzzzz! and the watch had done up twenty-four hours in double magnetic-telegraph time! —The English language was wound up to run some thousands of years, I trust; but if everybody is to be pulling at every-

thing he thinks is a *hair*, our grandchildren will have to make the discovery that it is a *hair-spring*, and the old Anglo-Norman soul's-timekeeper will run down, as so many other dialects have done before it. I can't stand this meddling any better than you, Sir. But we have a great deal to be proud of in the lifelong labors of that old lexicographer, and we mustn't be ungrateful. Besides, don't let us deceive ourselves,—the war of the dictionaries is only a disguised rivalry of cities, colleges, and especially of publishers. After all, the language will shape itself by larger forces than phonography and dictionary-making. You may spade up the ocean as much as you like, and harrow it afterwards, if you can,—but the moon will still lead the tides, and the winds will form their surface.

—Do you know Richardson's Dictionary?—I said to my neighbor the divinity-student.

Haöw?—said the divinity-student.—He colored, as he noticed on my face a twitch in one of the muscles which tuck up the corner of the mouth, (*zygomaticus major*), and which I could not hold back from making a little movement on its own account.

It was too late.—A country-boy, lassoed when he was a half-grown colt. Just as good as a city-boy, and in some ways, perhaps, better,—but caught a little too old not to carry some marks of his earlier ways of life. Foreigners, who have talked a strange tongue half their lives, return to the language of their childhood in their dying hours. Gentlemen in fine linen, and scholars in large libraries, taken by surprise, or in a careless moment, will sometimes let slip a word they knew as boys in homespun and have not spoken since that time,—but it lay there under all their culture. That is one way you may know the country-boys after they have grown rich or celebrated; another is by the odd old family names, particularly those of the Hebrew prophets, which the good old people have saddled them with.

—Boston has enough of England

about it to make a good English dictionary,—said that fresh-looking youth whom I have mentioned as sitting at the right upper corner of the table.

I turned and looked him full in the face,—for the pure, manly intonations arrested me. The voice was youthful, but full of character.—I suppose some persons have a peculiar susceptibility in the matter of voice.—Hear this.

Not long after the American Revolution, a young lady was sitting in her father's chaise in a street of this town of Boston. She overheard a little girl talking or singing, and was mightily taken with the tones of her voice. Nothing would satisfy her but she must have that little girl come and live in her father's house. So the child came, being then nine years old. Until her marriage she remained under the same roof with the young lady. Her children became successively inmates of the lady's dwelling; and now, *seventy* years, or thereabouts, since the young lady heard the child singing, one of that child's children and one of her grandchildren are with her in that home, where she, no longer young, except in heart, passes her peaceful days.—Three generations linked together by so light a breath of accident!

I liked the sound of this youth's voice, I said, and his look when I came to observe him a little more closely. His complexion had something better than the bloom and freshness which had first attracted me;—it had that diffused *tone* which is a sure index of wholesome lusty life. A fine liberal style of nature it seemed to be: hair crisped, moustache springing thick and dark, head firmly planted, lips finished, as one commonly sees them in gentlemen's families, a pupil well contracted, and a mouth that opened frankly with a white flash of teeth that looked as if they could serve him as they say Ethan Allen's used to serve their owner,—to draw nails with. This is the kind of fellow to walk a frigate's deck and bowl his broadsides into the "Gadlant Thudnderbomb," or any forty-portholed adventurer

who would like to exchange a few tons of iron compliments.—I don't know what put this into my head, for it was not till some time afterward I learned the young fellow had been in the naval school at Annapolis. Something had happened to change his plan of life, and he was now studying engineering and architecture in Boston.

When the youth made the short remark which drew my attention to him, the little deformed gentleman turned round and took a long look at him.

Good for the Boston boy!—he said.

I am not a Boston boy,—said the youth, smiling,—I am a Marylander.

I don't care where you come from,—we'll make a Boston man of you,—said the little gentleman.—Pray, what part of Maryland did you come from, and how shall I call you?

The poor youth had to speak pretty loud, as he was at the right upper corner of the table, and Little Boston next the lower left-hand corner. His face flushed a little, but he answered pleasantly,—telling who he was, as if the little man's infirmity gave him a right to ask any questions he wanted to.

Here is the place for you to sit,—said the little gentleman, pointing to the vacant chair next his own, at the corner.

You're go'n' to have a young lady next you, if you wait till to-morrow,—said the landlady to Little Boston.

He did not reply, but I had a fancy that he changed color. It can't be that *he* has susceptibilities with reference to a contingent young lady! It can't be that he has had experiences which make him sensitive! Nature could not be quite so cruel as to set a heart throbbing in that poor little cage of ribs! There is no use in wasting notes of admiration. I must ask the landlady about him.

These are some of the facts she furnished.—Has not been long with her. Brought a sight of furniture,—couldn't hardly get some of it up-stairs. Hasn't seemed particularly attentive to the ladies. The Bombazine (whom she calls Cousin something or other) has tried to enter into

conversation with him, but retired with the impression that he was indifferent to ladies' society. Paid his bill the other day without saying a word about it. Paid it in gold,—had a great heap of twenty-dollar pieces. Hires her best room. Thinks he is a very nice little man, but lives dreadful lonely up in his chamber. Wants the care of some capable nuss. Never pitied anybody more in her life,—never see a more interestin' person.

—My intention was, when I began making these notes, to let them consist principally of conversations between myself and the other boarders. So they will, very probably; but my curiosity is excited about this little boarder of ours, and my reader must not be disappointed, if I sometimes interrupt a discussion to give an account of whatever fact or traits I may discover about him. It so happens that his room is next to mine, and I have the opportunity of observing many of his ways without any active movements of curiosity. That his room contains heavy furniture, that he is a restless little body and is apt to be up late, that he talks to himself, and keeps mainly to himself, is nearly all I have found out.

One curious circumstance happened lately, which I mention without drawing an absolute inference.—Being at the studio of a sculptor with whom I am acquainted, the other day, I saw a remarkable cast of a *left arm*. On my asking where the model came from, he said it was taken direct from the arm of a *deformed person*, who had employed one of the Italian moulders to make the cast. It was a curious case, it should seem, of one beautiful limb upon a frame otherwise singularly imperfect.—I have repeatedly noticed this little gentleman's use of his left arm. Can he have furnished the model I saw at the sculptor's?

—So we are to have a new boarder to-morrow. I hope there will be something pretty and pleasant about her. A woman with a creamy voice, and finished in *alto rilievo*, would be a variety in the boarding-house,—a little more marrow and a little less sinew than our landlady

and her daughter and the bombazine-clad female, all of whom are of the turkey-drumstick style of organization. I don't mean that these are our only female companions; but the rest being conversational non-combatants, mostly still, sad feeders, who take in their food as locomotives take in wood and water, and then wither away from the table like blossoms that never come to fruit, I have not yet referred to them as individuals.

I wonder what kind of a young person we shall see in that empty chair to-morrow!

—I read this song to the boarders after breakfast the other morning. It was written for our fellows;—you know who they are, of course.

THE BOYS.

Has there any old fellow got mixed with the boys?
If there has, take him out, without making a noise!
Hang the Almanac's cheat and the Catalogue's spite!
Old Time is a liar! We're twenty to-night!

We're twenty! We're twenty! Who says we are more?
He's tipsy,—young jackanapes!—show him the door!—
“Gray temples at twenty?”—Yes! *white*, if we please;
Where the snow-flakes fall thickest there's nothing can freeze!

Was it snowing I spoke of? Excuse the mistake!
Look close,—you will see not a sign of a flake;
We want some new garlands for those we have shed,—
And these are white roses in place of the red!

We've a trick, we young fellows, you may have been told,
Of talking (in public) as if we were old;—
That boy we call “Doctor,” and this we call “Judge”;—
It's a neat little fiction,—of course it's all fudge.

That fellow's the "Speaker,"—the one on the right;

"Mr. Mayor," my young one, how are you to-night?

That's our "Member of Congress," we say when we chaff;

There's the "Reverend" What's his name?—don't make me laugh!

That boy with the grave mathematical look
Made believe he had written a wonderful book,

And the ROYAL ACADEMY thought it was true!

So they chose him right in; a good joke it was, too!

There's a boy,—we pretend,—with a three-decker-brain,

That could harness a team with a logical chain;

When he spoke for our manhood in syllabled fire,

We called him "The Justice,"—but now he's "The Squire."

And there's a nice youngster of excellent pith,—

Fate tried to conceal him by naming him Smith,—

But he shouted a song for the brave and the free,—

—Just read on his medal,—“My country,”—“of thee!”

You hear that boy laughing?—You think he's all fun,—

But the angels laugh, too, at the good he has done;

The children laugh loud as they troop to his call,

And the poor man that knows him laughs loudest of all!

Yes, we're boys,—always playing with tongue or with pen,—

And I sometimes have asked,—Shall we ever be men?

Shall we always be youthful and laughing and gay,

Till the last dear companion drops smiling away?

Then here's to our boyhood, its gold and its gray!

The stars of its Winter, the dews of its May!

And when we have done with our life-lasting toys,

Dear Father, take care of thy children, the Boys!

WHITE'S SHAKSPEARE.*

(SECOND NOTICE.)

WE doubt if posterity owe a greater debt to any two men living in 1623 than to the two obscure actors who in that year published the first folio edition of Shakspeare's plays. But for them, it is more than likely that such of his works as had remained to that time unprinted would have been irrecoverably lost, and among them were "Julius Cæsar," "The Tempest," and "Macbeth." But are we to believe them when they assert that they present to us the plays which

they reprinted from stolen and surreptitious copies "cured and perfect of their limbs," and those which are original in their edition "absolute in their numbers as he [Shakspeare] conceived them"? Alas, we have read too many theatrical announcements, have been taught too often that the value of the promise was in an inverse ratio to the generosity of the exclamation-marks, too easily to believe that! Nay, we have seen numberless processions of healthy kine enter our native village unheralded save by the lusty shouts of drovers, while a wretched calf, cursed by stepdame Nature with two heads, was brought to us in a tri-

* *The Works of William Shakspeare*. Edited, etc., by RICHARD GRANT WHITE. Vols. II., III., IV., and V. Boston: Little, Brown, & Co. 1858.

umphal car, avant-couriered by a band of music as abnormal as itself, and announced as the greatest wonder of the age. If a double allowance of vituline brains deserve such honor, there are few commentators on Shakspeare that would have gone afoot, and the trumpets of Messieurs Heminge and Condell call up in our minds too many monstrous and deformed associations.

What, then, is the value of the first folio as an authority? We are inclined to think that Mr. Collier (for obvious reasons) underrates it, and that Mr. White sometimes errs in the opposite direction. For eighteen of the plays it is the only authority we have, and the only one also for four others in their complete form. It is admitted that in several instances Heminge and Condell reprinted the earlier quarto impressions with a few changes, sometimes for the better and sometimes for the worse; and it is most probable that copies of those editions (whether surreptitious or not) had taken the place of the original prompter's books, as being more convenient and legible. Even in these cases it is not safe to conclude that all or even any of the variations were made by the hand of Shakspeare himself. And where the players printed from manuscript, is it likely to have been that of the author? The probability is small that a writer so busy as Shakspeare must have been during his productive period should have copied out their parts for the actors, himself, or that one so indifferent as he seems to have been to the mere literary fortunes of his works should have given any great care to the correction of such copies, if made by others. The copies exclusively in the hands of Heminge and Condell were, it is manifest, in some cases, very imperfect, whether we account for the fact by the burning of the Globe Theatre or by the necessary wear and tear of years, and (what is worthy of notice) they are plainly more defective in some parts than in others. "Measure for Measure" is an example of this, and we are not satisfied with being told that its rugged-

ness of verse is intentional, or that its obscurity is due to the fact that Shakspeare grew more elliptical in his style as he grew older. Profounder in thought he doubtless became; though, in a mind like his, we believe that this would imply only a more absolute supremacy in expression. But, from whatever original we suppose either the quartos or the first folio to have been printed, it is more than questionable whether the proof-sheets had the advantage of any revision other than that of the printing-office. Steevens was of opinion that authors in the time of Shakspeare never read their own proof-sheets; and Mr. Spedding, in his recent edition of Bacon, comes independently to the same conclusion.* We may be very sure that Heminge and Condell did not, as vicars, take upon themselves a disagreeable task which the author would have been too careless to assume.

Nevertheless, however strong a case may be made out against the Folio of 1623, whatever sins of omission we may lay to the charge of Heminge and Condell, or of commission to that of the printers, it remains the only text we have with any claims whatever to authenticity. It should be deferred to as authority in all cases where it does not make Shakspeare write bad sense, uncouth metre, or false grammar, of all which we believe him to have been more supremely incapable than any other man who ever wrote English. Yet we would not speak unkindly even of the blunders of the Folio. They have put bread into the mouth of many an honest editor, publisher, and

* Vol. III. p. 348, *note*. He grounds his belief, not on the misprinting of words, but on the misplacing of whole paragraphs. We were struck with the same thing in the original edition of Chapman's *Biron's Conspiracy and Tragedy*. One of the misprints which Mr. Spedding notices affords both a hint and a warning to the conjectural emendator. In the edition of *The Advancement of Learning* printed in 1605 occurs the word *dusnesse*. In a later edition this was conjecturally changed to *business*; but the occurrence of *vertigine* in the Latin translation enables Mr. Spedding to print rightly, *dizziness*.

printer, for the last century and a half; and he who loves the comic side of human nature will find the serious notes of a *variorum* edition of Shakspeare as funny reading as the funny ones are serious. Scarce a commentator of them all, for more than a hundred years, but thought, as Alphonso of Castile did of Creation, that, if he had only been 'at Shakspeare's elbow, he could have given valuable advice; scarce one who did not know off-hand that there was never a seaport in Bohemia,—as if Shakspeare's world were one which Mercator could have projected; scarce one but was satisfied that his ten finger-tips were a sufficient key to those astronomic wonders of poise and counterpoise, of planetary law and cometary seeming-exception, in his metres; scarce one but thought he could gauge like an ale-firkin that intuition whose edging shallows may have been sounded, but whose abysses, stretching down amid the sunless roots of Being and Consciousness, mock the plummet; scarce one but could speak with condescending approval of that prodigious intelligence so utterly without congener that our baffled language must coin an adjective to qualify it, and none is so audacious as to say Shakspearian of any other. And yet, in the midst of our impatience, we cannot help thinking also of how much healthy mental activity this one man has been the occasion, how much good he has indirectly done to society by withdrawing men to investigations and habits of thought that secluded them from baser attractions, for how many he has enlarged the circle of study and reflection; since there is nothing in history or politics, nothing in art or science, nothing in physics or metaphysics, that is not sooner or later taxed for his illustration. This is partially true of all great minds, open and sensitive to truth and beauty through any large are of their circumference; but it is true in an unexampled sense of Shakspeare, the vast round of whose balanced nature seems to have been equatorial, and to have had a southward exposure and a summer

sympathy at every point, so that life, society, statecraft serve us at last but as commentaries on him, and whatever we have gathered of thought, of knowledge, and of experience, confronted with his marvellous page, shrinks to a mere footnote, the stepping-stone to some hitherto inaccessible verse. We admire in Homer the blind placid mirror of the world's young manhood, the bard who escapes from his misfortune in poems all memory, all life and bustle, adventure and picture; we revere in Dante that compressed force of lifelong passion which could make a private experience cosmopolitan in its reach and everlasting in its significance; we respect in Goethe the Aristotelian poet, wise by weariless observation, witty with intention, the stately *Geheimerrath* of a provincial court in the empire of Nature. As we study these, we seem in our limited way to penetrate into their consciousness and to measure and master their methods;—but with Shakspeare it is just the other way; the more we have familiarized ourselves with the operations of our own consciousness, the more do we find, in reading him, that he has been beforehand with us, and that, while we have been vainly endeavoring to find the door of his being, he has searched every nook and cranny of our own. While other poets and dramatists embody isolated phases of character and work inward from the phenomenon to the special law which it illustrates, he seems in some strange way unitary with human nature itself, and his own soul to have been the law- and life-giving power of which his creations are only the phenomena. We justify or criticize the characters of other writers by our memory and experience, and pronounce them natural or unnatural; but he seems to have worked in the very stuff of which memory and experience are made, and we recognize his truth to Nature by an innate and unacquired sympathy, as if he alone possessed the secret of the "ideal form and universal mould," and embodied generic types rather than individuals. In this Cervantes alone has approached

him; and Don Quixote and Sancho, like the men and women of Shakspeare, are the contemporaries of every generation, because they are not products of an artificial and transitory society, but because they are animated by the primeval and unchanging forces of that humanity which underlies and survives the forever-fickle creeds and ceremonies of the parochial corners which we who dwell in them sublimely call *The World*.

But the dropping of our *variorum* volume upon the floor recalls us from our reverie, and, as we pick it up, we ask ourselves sadly, Is it fitting that we should have a Shakspeare according to plodding Malone or coarse-minded Steevens, both of whom would have had the headache all their lives after, could one of the Warwickshire plebeian's conceptions have got into their brains and stretched them, and who would have hidden under their bed-clothes in a cold-sweat of terror, could they have seen the awful vision of Macbeth as he saw it? No! and to every other commentator who has wantonly tampered with the text, or obscured it with his inky cloud of paraphrase, we feel inclined to apply the quadrisyllabic name of the brother of Agis, king of Sparta. Clearly, we should be grateful to an editor who feels it his chief duty to scrape away these barnacles from the brave old hull, to replace with the original heart-of-oak the planks where these small but patient terebrators have bored away the tough fibre to fill the gap with sawdust!

This task Mr. White has undertaken, and, after such conscientious examination of his work as the importance of it demands, after a painful comparison, note by note, and reading by reading, of his edition with those of Messrs. Knight, Collier, and Dyce, our opinion of his ability and fitness for his task has been heightened and confirmed. Not that we always agree with him,—not that we do not think that in respect of the Folio text he has sometimes erred on the side of superstitious reverence for it, and sometimes in too rashly abandoning it,—but, making all due exceptions, we think that his edition

is, in the phrase of our New England fathers in Israel, for substance, scope, and aim, the best hitherto published. The chief matter must in all cases be the text, and the faults we find in him do not, as a general rule, affect that. Some of them are faults which his own better judgment, we think, will lead him to avoid in his forthcoming volumes; and in regard to some, he will probably honestly disagree with us as to their being faults at all. No conceivable edition of Shakspeare would satisfy all tastes;—sometimes we have attached associations to received readings which make impartial perception impossible; sometimes we have imparted our own meaning to a passage by too steady pondering over it, just as in twilight an inanimate thing will seem to move, if we look at it long, though the wavering be truly in our own overstrained vision; sometimes our personal temperament will insensibly warp our judgment;—but Mr. White has generally shown so just a discrimination, that there are few instances where we dissent, and in these a pencil will enable every one to edit for himself. Any criticism of an edition of Shakspeare must necessarily concern itself with seemingly insignificant matters, often with a comma or a syllable,—and the danger is always of degenerating into a captiousness and word-catching unworthy the lover of truth for its own sake. We shall endeavor to be minute without being small.

Mr. White reserves for a first volume (not yet published) his notices of Shakspeare's life, his remarks upon the text, and other general introductory topics. In the second volume, he gives us an excellent copy of the Droeshout portrait, the preliminary matter of the Folio of 1623, with notices of the writers of commendatory verses thereto prefixed, and of the principal actors who performed parts in Shakspeare's plays. We notice particularly his discussion of the authorship of the verses signed J. M. S. as a good example of the delicacy and acuteness of his criticism. Though he has the great authority of Coleridge

against him, we think that he has constructed a very ingenious, strong, and even convincing argument against the Milton theory. Each play is preceded by an Introduction, remarkably well digested and condensed, giving an account of the text, and of the sources from which Shakspeare helped himself to plots or incidents. We cannot but commend highly the self-restraint which marks these brief and pithy prefaces, and the pertinency of every sentence to the matter in hand. The Germans, (to whom we are undeniably indebted for the first philosophic appreciation of the poet,) being debarred by their alienage from the tempting parliament of verbal commentary and conflict, have made themselves such ample amends by expatiations in the unfenced field of æsthetics and of that constructive criticism which is too often confined to the architecture of Castles in Spain, that we feel as if Dogberry had charged us in relation to them with that hopelessly bewildering commission to "*comprehend* all vagrom men" which we have hitherto considered applicable only to peripatetic lecturers. Mr. White wisely and kindly leaves us to Shakspeare and our own imaginations,—two very potent spells to conjure with,—and seems to be aware of the fact, that, in its application to a creative mind like that of the great Poet, the science of teleology may sometimes find itself as much at fault as it so often is in attempting to fathom the designs of the Infinite Creator. Rabelais solves the grave problem of the goodliness of Friar John's nose by the comprehensive formula, "Because God willed it so"; and it is well for us in most cases to enjoy Shakspeare in the same pious way,—to smell a rose without bothering ourselves about its having been made expressly to serve the turn of the essence-peddlers of Shiraz. We yield the more credit to Mr. White's self-denial in this respect, because his notes prove him to be capable of profound as well as delicate and sympathetic exegesis. Shakspeare himself has left us a pregnant satire

on dogmatical and categorical æsthetics (which commonly in discussion soon lose their ceremonious tails and are reduced to the internecine dog and cat of their bald first syllables) in the cloud-scene between Hamlet and Polonius, suggesting exquisitely how futile is any attempt at a cast-iron definition of those perpetually metamorphic impressions of the beautiful, whose source is as much in the man who looks as in the thing he sees. And elsewhere more directly,—Mr. White must allow us the old reading for the sake of our illustration,—he has told us how

"Affection,
Master of passion, sways it to the mood
Of what it likes or loathes."

We are glad to see, likewise, with what becoming indifference the matter of Shakspeare's indebtedness to others is treated by Mr. White in his Introductions. There are many commentators who seem to think they have wormed themselves into the secret of the Master's inspiration when they have discovered the sources of his plots. But what he took was by right of eminent domain; and was he not to resuscitate a theme and make it immortal, because some botcher had tried his hand upon it before, and left it for stone-dead? Because he could not help throwing sizes, was he to avoid the dice which for others would only come up ames-ace?

Up to the middle of 1854,* there had been published in England and on the Continent eighty-eight complete editions of Shakspeare in English, thirty-two in German, six in French, and five, more or less complete, in Italian. Beside these, his works had been translated into Dutch, (1778–82,) into Danish, (1807–28,) into Hungarian, (1824,) into Polish, (1842,) and into Swedish (1847–51). The numerous American editions are not reckoned in this statement; and, to give an adequate notion of the extent of the Shakspeare-literature, we should add that the number of separately-printed

* *Die Shakspeare-Literatur bis Mitte 1854.* Zusammenge stellt und herausgegeben von P. H. SILLIG. Leipzig. 1854.

comments and other illustrative publications already exceeds five hundred. No other poet except Dante has received such appreciation,—and not even he, if we consider in Shakspeare's case the greater bulk of the works and the difficulty of the language. After so many people had used their best wit and had their say, could there be any unconsidered trifle left for a new editor? Could the sharpest eyes find more needles in this enormous haystack? We do not pretend to have examined the whole of this polyglot library, nay, but for Herr Sillig, we had never heard of most of the books in it, but we are tolerably familiar with the more important English editions, and with some of the German comments,* and we must say that the freshness of many of Mr. White's observations struck us with very agreeable surprise. We are not fond of off-hand opinions on any subject, much more on one so multifarious and complex as this,—we are a great deal too ready with them in America, and pronounce upon pictures and poems with a *Whoyish* nonchalance that would be amusing, were it not for its ill consequence to Art,—but we love the expression of honest praise, of sifted and considerate judgment, and we think that a laborious collation justifies us in saying that in acute discrimination of æsthetic shades of expression, and often of textual niceties, Mr. White is superior to any previous editor.

In proof of what we have said, we will refer to a few of the notes which have particularly pleased us, and which show originality of view.

(*Tempest*, Act ii. Sc. 2.)

"*'Nor scrape trenchering, nor wash dish.'*"

"Dryden, Theobald, Dyce, Halliwell, and Hudson would have 'trenchering' a typographical error for 'trencher,' which they introduce into the text. Surely they must all have forgotten that *Caliban* was drunk, and, after singing 'firing' and 'requiring,' would naturally sing 'trenchering.' There is

a drunken swing in the original line which is entirely lost in the precise, curtailed rhythm of—

"*'Nor scrape trencher, nor wash dish.'*"

Other editors had retained "trenchering," but none, that we know, ever gave so good a reason for it. Equally good is his justification of himself for omitting Theobald's interpolation of "Did she nod?" in "Two Gentlemen of Verona," Act i. Sc. 1. Other examples may be found in the readings, "There is a lady of Verona here," (same play, Act iii. Sc. 1); "Yet reason dares her on," (*Measure for Measure*, Act iv. Sc. 4); "Hark, how the villain would *glose* now," (same play, Act v. Sc. 1); "The forced fallacy," (*Comedy of Errors*, Act ii. Sc. 1); in the note on "Cupid is a good hare-finder," (*Much Ado*, Act i. Sc. 3); the admirable note on "Examine those men," (same play, Act iii. Sc. 1); the readings, "Out on thee! Seeming!" (same play, Act iv. Sc. 1); "For I have only silent been," (*ibid.*); "Goodly Count-Confèct," and note, (same play, Act iv. Sc. 2); the note on "I do beseech thee, remember thy courtesy," (*Love's Labor's Lost*, Act v. Sc. 1); on "Mounsieur Cobweb," and "Help Cavalery Cobweb to scratch," (*Mid. Night's D.*, Act iv. Sc. 1); on "Or in the night," etc. (same play, Act v. Sc. 1); on "Is sum of nothing," (*Merchant of Venice*, Act iii. Sc. 2); on "Stays me here at home unkept," (*As you like it*, Act i. Sc. 1); on "Unquestionable spirit," (same play, Act iii. Sc. 2); on "Move the still-piecing air," (*All's Well*, etc., Act ii. Sc. 2); and on "What is not holy," (same play, Act iv. Sc. 2). We have referred to a few only out of the many instances that have attracted our notice, and these chiefly for their bearing on what we have said of the editor's refinement of appreciation and originality of view. The merely illustrative and explanatory notes are also full and judicious, containing all that it is important the reader should know, and a great deal which it will entertain him to learn. In the Introductions to the several plays, too, we find many *obiter*

* Among which (setting aside a few remarks of Goethe) we are inclined to value as highly as anything Tieck's *Essay on the Element of the Wonderful in Shakspeare*.

dicta of Mr. White which are excellent in their clearness of critical perception and conciseness of phrase. From that to the "Comedy of Errors" we quote the following sentence:—

"Concerning the place and the period of the action of this play, it seems that Shakspeare did not trouble himself to form a very accurate idea. The Ephesus of "The Comedy of Errors" is much like the Bohemia of "The Winter's Tale,"—a remote, unknown place, yet with a familiar and imposing name, and therefore well suited to the purposes of one who, as poet and dramatist, cared much for men and little for things, and to whose perception the accidental was entirely eclipsed by the essential. Anachronisms are scattered through it with a profusion which could only be the result of entire indifference,—in fact, of an absolute want of thought on the subject."—Vol. III. 189.

We think this could not be better said, if only we might supplant "things" with the more precise word "facts"; for about *things* Shakspeare was never careless. It is only that deciduous foliage of facts which every generation leaves heaps of behind it dry, and dead, that he rustles through with eyes so royally unconcerned. As a good example of Mr. White's style, we should be inclined to cite the Introduction to "Love's Labor's Lost," from which we detach this single crystal:—

"It is ever the ambitious way of youthful genius to aim at novelty of form in its first essays, while yet in treatment it falls unconsciously into a vein of reminiscence; afterward it is apt to return to established forms, and to show originality of treatment."

The temptation which too easily besets an editor of Shakspeare is to differ, if possible, from everybody who has gone before him, though but as between the N.E. and N.N.E. points in the circumference of a hair. We do not find Mr. White guilty in this respect for what he has done, but sometimes for what he has left undone in allowing the Folio text to remain. The instance that has surprised us most is his not admitting (*As You Like it*, Act iv. Sc. 1) the reading,—"The foolish *coroners* of that age found

it was Hero of Sestos," instead of the unmeaning one, "*chroniclers*." He has been forced, for the sake of sense, to make some changes in the Folio text which seem to us quite as violent, and we cannot help thinking that the gain in aptness of phrase and coherence of meaning would have justified him in doing as much here. He admits, in his note on the passage, that the change is "very plausible"; but adds, "If we can at will reduce a perfectly appropriate and uncorrupted word of ten letters to one of eight, and strike out such marked letters as *h*, *l*, and *e*, we may re-write Shakspeare at our pleasure." Mr. White has already admitted that "*chroniclers*" is not *perfectly* appropriate in admitting that the change is "very plausible"; and he has no right to assume that the word is uncorrupted,—for that is the very point in question. As to the disparity in the number of letters, no one familiar with misprints will be surprised at it; and Mr. Spedding, in the edition of Bacon already referred to, furnishes us with an example of blunder* precisely the reverse, in which one word of eight letters is given for two of ten, (*sciences* for *six princes*,)—the printer in both cases having set up his first impression of what the word was for the word itself. Had this occurred in Shakspeare, instead of Bacon, we should have had a series of *variorum* notes like this:—

"That *sixpence* was the word used by our author scarcely admits of doubt. From a number of parallel passages we select the following:—

'Live on *sixpence* a day, and earn it.'—*Abernethy*.

'I give thee *sixpence*? I will see thee and-so-forth first!'—*Cunning*.

'Be shot for *sixpence* on a battlefield.'—*Tennyson*.

'Half a crown, two shillings and *sixpence*.'—*Niemand's Dictionary*.

Moreover, we find our author using precisely the same word in the 'Midsummer Night's Dream':—

* Bacon's Works, by Ellis, Spedding, & Heath. Vol. III. p. 303, note.

'Thus hath he lost sixpence a day during his life.' JONES.

"Had the passage read '*two princes*,' we might have thought it genuine; since 'the two kings of Brentford' must have been familiar to our great poet, and he was also likely to have that number deeply impressed on his mind by the awful tragedy in the tower, (see *Richard the Third*,) where, it is remarkable, precisely that number of royal offspring suffered at the hands of the crook-backed tyrant. The citation from Niemand's Dictionary, by the Rev. Mr. Jones, tells as much in favor of *two princes* as of *sixpence*; for how could the miseries of a divided empire be more emphatically portrayed than in the striking, and, as it seems to me, touching phrase, *HALF a crown*? Could we in any way read '*three princes*,' we should find strong support in the tradition of 'the three kings of Cologne,' and in the Arabian story of the 'Three Calenders.' The line quoted by Thomson, (Shakspeare, by Thomson, Vol. X. p. 701,)

'Under which King Bezonian, speak or die!' (though we agree with him in preferring his pointing to the ordinary and meaningless

'Under which King, Bezonian,' etc.)

unhappily can throw no light on the present passage till we know how many King Bezonians are intended, and who they were. Perhaps we should read *Belzonium*, and suppose a reference to the Egyptian monarchs whose tombs were first explored by the intrepid Belzoni. The epithet would certainly be appropriate and in Shakspeare's best manner; but among so many monarchs, a choice of two, or even three, would be embarrassing and invidious." BROWN.

"As for the '*Three Calenders*,' there can be no reasonable question that Shakspeare was well acquainted with the story; for that he had travelled extensively in the East I have proved in my 'Essay to show that Sir Thomas Roe and William Shakspeare were identical'; and that he was familiar with the Oriental languages must be apparent to any one who has read my note on '*Concolinel*' (*Love's Labor's Lost*, Act iii. Sc. 1). But that '*six princes*' is the true reading is clear from the parallel passage in "*Richard the Third*," which I am surprised that the usually accurate Mr. Brown should have overlooked,—

'Methinks there be *SIX* Richmonds in the field.' ROBINSON.

"I was at first inclined to the opinion of the late Mr. Robinson, but maturer consideration has caused me to agree with the eloquent and erudite Jones. There is a definite meaning in the word *sixpence*; and a similar error of the press in Lord Bacon's '*Advancement of*

Learning,' where the context shows that *sixpences* and not *sciences* was the word intended, leads me to suspect that the title of his *opus magnum* should be *De Augmentis Siſpenciſarum*. Viewing the matter as a political economist, such a topic would have been more worthy of the Lord Chancellor of England; it would have been more in accordance with what we know of the character of 'the meanest of mankind'; and the exquisite humor of the title would tally precisely with what Ben Jonson tells us in his '*Discoveries*,' under the head *Dominus Verulninus*, that 'his language (*where he could spare or pass by a jest*) was nobly censorious.' Sir Thomas More had the same proneness to merriment, a coincidence the more striking as both these great men were Lord Chancellors. A comic stroke of this description would have been highly attractive to a mind so constituted, and might easily escape the notice of a printer, who was more likely to be intent upon the literal accuracy of the Latin than on the watch for extraordinary flights of humor." SMITH.

But we must return from our excursion into an imaginary *variorum*, delightful because it requires no eyesight and no thought, to the more serious duty of examining the notes of Mr. White. We have mentioned a single instance in which we differ with him as to the propriety of a fanatical adherence to the text of the Folio of 1623. We differ, because we think that sense is not all that we have a right to expect from Shakspeare,—that it is, indeed, merely the body in which his genius creates a soul of meaning, nay, oftentimes a double one, exoteric and esoteric, the *spiritus astralis* and the *anima celestis*. Had the passage been in verse, where the change might have damaged the rhythm,—had it been one of those ecstasies of Shakspearian imagination, to tamper with which because we could not understand it would be Bottom-like presumption,—one of those tempests of passion where every word reeks hot and sulphurous, like a thunderstone new-fallen,—in any of these cases we should have agreed with Mr. White that to abstain was a duty. But in a sentence of light-some and careless prose, and where the chances are great that the word to be changed is the accident of the printer

and not the choice of the author, we say, give us a text that is true to the context and the æsthetic instinct rather than to the Folio, even were that Pandora-box only half as full of manifest corruptions as it is.

In the "Two Gentlemen of Verona," (Act iii. Sc. 1.) Mr. White prefers, "She is not to be fasting in respect of her breath," to "She is not to be *kissed* fasting in respect of her breath,"—an emendation made by Rowe,* and found also in Mr. Collier's Corrected Folio of 1632. We cannot agree with him in a reading which seems to us to destroy all the point of the passage.

In Dumain's ode, (*Love's Labor's Lost*, Act iv. Sc. 3.) beginning,

"On a day, (alack the day!)

Love, whose month is ever May,"

Mr. White chooses to read

"Thou, for whom Jove would swear

Juno but an Ethiop were,"

rather than accept Pope's suggestion of "ev'n Jove," or the far better "great Jove" of Mr. Collier's Corrected Folio,—affirming that "the quantity and accent proper to 'thou' make any addition to the line superfluous." We should like to hear Mr. White read the verse as he prints it. The result would be something of this kind :—

Thou-ou for whom Jove would swear,—

which would be like the 'bow-wow-wow' before the Lord' of the old country-choirs. To our ear it is quite out of the question; and, moreover, we affirm that in dissyllabic (which we, for want of a better name, call iambic and trochaic) measures the omission of a half-foot is an impossibility, and all the more so when, as in this case, the preceding syllable is strongly accented. Even had the poem been meant for singing, which it was not, for Dumain reads it, the quantity would be false, though the ear might more easily excuse it. Such an omission would be not only possible, but sometimes very effective, in trisyllabic measures,—

* Mr. Dyce says the word supplied by Rowe was "fasting," a manifest slip of the pen, and worth notice only as showing how easily errors may be committed.

as, for instance, in anapests like these,—

" 'Tis the middle of night by the castle clock,
And the owls have awakened the crowing
cock,"—

where iambs or spondees may take the place of the first or second foot with no shock to the ear, though the change of rhythm be sensible enough,—as

'Tis thē dēep midnīght by the castle clock,
And ōwls have awakened the crowing cock.

We quite agree with Mr. White and Mr. Knight in their hearty dislike of the Stevens-system of versification, but we think that Coleridge (who, although the best English metrist since Milton, often thought lazily and talked loosely) has misled both of them in what he has said about the pauses and retardations of verse. In that noblest of our verses, the unrhymed iambic pentameter, two short or lightly-accented syllables may often gracefully and effectively take the place of a long or heavily-accented one; but great metrists contrive their pauses by the artistic choice and position of their syllables, and not by leaving them out. Metre is the solvent in which alone thought and emotion can perfectly coalesce,—the thought confining the emotion within decorous limitations of law, the emotion beguiling the thought into somewhat of its own fluent grace and rebellious animation. That is ill metre which does not read itself in the mouth of a man thoroughly penetrated with the meaning of what he reads; and only a man as thoroughly possessed of the meaning of what he writes can produce any metre that is not sing-song. Not that we would have Shakspeare's metre tinkered where it seems defective, but that we would not have palpable gaps defended as intentional by the utterly unsatisfactory assumption of pauses and retardations. Mr. White has in many cases wisely and properly made halting verses perfect in their limbs by easy transpositions, and we think he is perfectly right in refusing to interpolate a syllable, but wrong in assuming that we have Shakspeare's metre where we have no metre at all. We are not speaking of seeming irregularities, of

lines broken up by rapid dialogue or cut short by the gulp of voiceless passion, nor do we forget that Shakspeare wrote for the tongue and not the eye, but we do not believe he ever left an unmusical period. Especially is this true of passages where the lyrical sentiment predominates, and we beg Mr. White to reconsider whether we owe the reading

"All overcanopied with luscious woodbine"
(instead of *lush*)

to the printers of the Folio or to Shakspeare. Even if we accept Steevens's "whereon" instead of "where" in the first verse of this exquisite piece of melody, and read (as Mr. White does not)

"I know a bank whereon the wild thyme grows,"

it leaves the peculiar *lift* of the metre unchanged. The varied accentuation of the verses is striking; and would any one convince himself of the variety of which this measure is capable, let him try to read this passage, and the speech of Prospero, beginning "Ye elves of hills," to the same tune. In the verses,

"And ye that on the sands with printless foot

Do chase the ebbing Neptune, | and do fly him

When he comes back,"

observe how the pauses are contrived to echo the sense and give the effect of flux and reflux. Versification was understood in that day as never since, and no treatise on English verse so good, in all respects, as that of Campion (1602) has ever been written. Coleridge learned from him how to write his "Catullian hendeca-syllables," and did not better his instruction.*

In "Measure for Measure," (Act i. Sc. 1.) in this passage,—

"what's open made

To justice, that justice seizes: what knows the law

That thieves do pass on thieves?"

does Mr. White believe the "that" and

* For the comprehension of the laws of some of the lighter measures, no book is so instructive as *Mother Goose's Melodies*. That excellent lady was one of the best metrists the language has produced.

"what" are Shakspeare's? Does he consider

"To justice, that justice seizes: what knows the law"

an alexandrine,—and an alexandrine worthy of a student and admirer of Spenser? Should we read it thus, we should dread Martial's sarcasm of, *Sed male cum recitas*. We believe that Shakspeare wrote

"What's open made

To Justice, Justice seizes: knows the Law
That thieves do pass on thieves?"

We have pointed out a passage or two where we think Mr. White follows the Folio text too literally. Two instances we have noted where he has altered, as we think, for the worse. The first is (*Tempest*, Act iii. Sc. 3) where Mr. White reads,

"You are three men of sin whom Destiny
(That hath to instrument this lower world
And what is in't) the never-surfeited sea
Hath caused to belch you up,—and on this island

Where man doth not inhabit; you 'mongst men

Being most unfit to live. I have made you mad."

The Folio reads, "Hath caused to belch up you"; and Mr. White says in his note, "The tautological repetition of the pronoun was a habit, almost a custom, with the Elizabethan dramatists." This may be true, (though we think the assertion rash,) but certainly never as in this case. We think the Folio right, except in its punctuation. The repetition of the "you" is emphatic, not tautological, and is demanded by the whole meaning of the passage. Ariel is taunting the persons she addresses, with the intention of angering them; and the "you" is repeated because those highly respectable men cannot at first bring their minds to believe that such unsavory epithets are addressed to them. We should punctuate thus, following the order of the words in the Folio,—

"Hath caused to belch up,—you! and on this island,

Where man doth not inhabit;—you 'mongst men

Being most unfit to live. I have made you mad."

In the "Comedy of Errors," (Act ii. Sc. 2,) Adriana, suspecting her husband of unfaithfulness, says to him,—

"For, if we two be one, and thou play false,
I do digest the poison of thy flesh,
Being strumpeted by thy contagion.
Keep, then, fair league and truce with thy
true bed;
I live distained, thou undishonored."

Such is the reading of the Folio. Mr. White reads,

"I live distained, thou one dishonored."

But we cannot help thinking that the true reading should be,

"I live distained, though undishonored,"

which is a less forced construction, and coincides with the rest of the passage,—

"I am contaminate through thee, though in myself immaculate."

In "As You Like it," (Act ii. Sc. 3,) Mr. White (with the Folio and some recent editors) calls the Duke's wrestler, "the *bonny* priser of the Duke." The common reading is "bony," which seems to us better, though we believe *brawny* to be the word intended. We likewise question Mr. White's explanation of the word *priser*, which, he says, "is prize-fighter, one who wins prizes." One who "fights for prizes" would have been better; but we suspect that the word is more nearly akin with the French *prise* (in the sense of *venir aux prises*) than with *priz*. We should prefer also "Aristotle's ethicks" (*Taming of the Shrew*, Act i. Sc. 1) to the ordinary "Aristotle's checks," which is retained by Mr. White. In "Much Ado about Nothing," (Act ii. Sc. 1,) we have no doubt that Mr. Collier's corrector is right in reading "*sink* apace," though Mr. White states authoritatively that Shakspeare would not have so written. It is only fair to Mr. White, however, to say that he is generally open-minded toward readings suggested by others, and that he accepts nearly all those of Mr. Collier's Corrected Folio on which honest lovers of Shakspeare would be likely to agree. In comparing his notes with the text, our eye was caught by a verse in which there seems so manifest a corrup-

tion that we shall venture to throw down the discord-apple of a conjectural emendation. In the "Merchant of Venice," (Act iii. Sc. 2,) where Bassanio is making his choice among the caskets, after a long speech about "outward shows" and "ornament," he is made to say that ornament is,

"in a word,

The seeming truth which cunning *tunes* put on
To entrap the wisest."

We find it hard to believe that *times* is the right word here, and strongly suspect that it has stolen the place of *tires*. The whole previous tenor of the speech, and especially of the images immediately preceding that in question, appears to demand such a word.

We have said, that we considered the style and matter of Mr. White's notes excellent. Indeed, to the purely illustrative notes we should hardly make an exception. There are two or three which we think in questionable taste, and one where the temptation to say a sharp thing has led the editor to vulgarize the admirable Benedick, and to misinterpret the text in a way so unusual for him that it is worth a comment. When Benedick's friends are discussing the symptoms which show him to be in love, Claudio asks,

"When was he wont to wash his face?"

Mr. White annotates thus:—

"That the benign effect of the tender passion upon *Benedick* in this regard should be so particularly noticed, requires, perhaps, the remark, that in Shakspeare's time our race had not abandoned itself to that reckless use of water, whether for ablation or potation, which has more recently become one of its characteristic traits."

Now, if there could be any doubt that "wash" means *cosmetic* here, the next speech of Don Pedro ("Yea, or to *paint* himself?") would remove it. The gentlemen of all periods in history have been so near at least to godliness as is implied in cleanliness. The very first direction in the old German poem of "Tisch-zucht" is to wash before coming to table; and in "Parzival," Gurnamanz specially inculcates on his catechumen the social duty of always thoroughly cleansing himself

on laying aside his armor. Such instances could be multiplied without end.

In annotating Shakspeare, it would, perhaps, be asking too much of an editor to give credit to its first finder for every scrap of illustration. The immense mass of notes already existing may, perhaps, be fairly looked upon as a kind of dictionary, open to every one, and the use of which implies no indebtedness. Mr. White, in general, indicates the source whence he has drawn, though we have sometimes found him negligent in this respect. He says, in the Advertisement prefixed to his second volume, "that in every case, where no such credit is given for a restoration, a conjecture, or a quotation, the editor is responsible for it; and as he is disinclined to the giving of much prominence to claims of this sort, he has, in those cases, merely remarked, that 'hitherto' the text has stood thus or so." We have not been at the trouble of verifying every one of Mr. White's "hithertos," but we did so in two plays, and found in "Midsummer Night's Dream" four, and in "Much Ado" two cases, where the reading claimed as a restoration occurred also in Mr. Knight's excellent edition of 1842. These oversights do not affect the correctness of Mr. White's text, but they diminish our confidence in the accuracy of the collation to which he lays claim.

The chief objection which we have to make against Mr. White's text is, that he has perversely allowed it to continue disfigured by vulgarisms of grammar and spelling. For example, he gives us *misconster*, and says, "This is not a misspelling or loose spelling of 'misconstrue,' but the old form of the word." Mr. Dyce insisted on the same cographical nicety in his "Remarks" on the editions of Mr. Collier and Mr. Knight, but abandons it in his own with the artless admission that *misconstrue* also occurs in the Folio. In one of the Camden Society's publications is a letter from Friar John Hylsey to Thomas Cromwell, in which we find "As God is my juggle";*

* *Suppression of the Monasteries*, p. 13.

but we do not believe that *jug* was an old form of *judge*, though a philological convict might fancy that the former word was a derivative of the latter. Had the phrase occurred in Shakspeare, we should have had somebody defending it as tenderly poetical. We cannot but think it a sacrifice in Mr. White that he has given up the *whatsomeres* of the Folio. He does retain *puisny* as the old form, but why not spell it *puisné* and so indicate its meaning? Mr. White informs us that "the grammatical form in use in Shakspeare's day" was to have the verb govern a nominative case! Accordingly, he perpetuates the following oversight of the poet or blunder of the printer:—

"What he is, indeed,
More suits you to conceive, than *I* to speak
of."

Again, he says that *who*, as an objective case, "is in accordance with the grammatical usage of Shakspeare's day," (Vol. II. p. 86,) and that, "considering the unsettled state of minor grammatical relations in Shakspeare's time," it is possible that he wrote *whom* as a nominative (Vol. V. p. 393). But the most extraordinary instance is where he makes a nominative plural agree with a verb in the second person singular, (Vol. III. p. 121,) and justifies it by saying that "such disagreements . . . are not uncommon in Shakspeare's writings, and those of his contemporaries." The passage reads as follows in Mr. White's edition:—

"A breath thou art,
Servile to all the skiey influences
That dost this habitation where thou keep'st
Hourly afflict."

Hammer (mistaking the meaning) read *do*. Porson objected, on the ground that it was *thou* and not *influences* which governed *dost*. Porson was certainly right, and we wonder how any one could ever have understood the passage in any other way. The mediævals had as much trouble in reconciling free-will with judicial astrology as we with the divine foreknowledge. A passage in Dante, it appears to us, throws light on the meaning of the Duke's speech:—

"Lo cielo i vostri movimenti inizia;
Non dico tutti; ma posto ch' io 'l dica
Lume v' è dato a bene ed a malizia,
E libero voler che, se fatica
Nelle prime battaglie col ciel dura,
Poi vince tutto se ben si notrica."

Purg., Cant. xvi.

Cielo is here used for the influence of the stars, as is clear from a parallel passage in the "Convito." Accordingly, "Though servile to all the skyey influences, it is thou, breath as thou art, that dost hourly afflict thy body with the results of sin." But even if this be not the meaning, is Mr. White correct in saying that *influence* had no plural at that time? * Had he forgotten "the sweet *influences* of Pleiades"? The word occurs in this form not only in our version of the Bible, but in that of Cranmer, and in the "Breeches" Bible. So in Chapman's "Byron's Conspiracy," (Ed. 1608, B. 3.) "Where the beames of starres have carv'd Their powerful *influences*."

Mr. White repeatedly couples together the translators of the Bible and Shakspeare, but he seems to have studied their grammar but carelessly. "Whom therefore ye ignorantly worship, him declare I unto you," is a case in point, and we ought never to forget our danger from that dusky personage who goes about "seeking *whom* he may devour." At a time when correction of the press was so imperfect, one instance of true construction should outweigh twenty false, and nothing could be easier than the mistake of *who* for *whom*, when the latter was written *whō*. A glance at Ben Jonson's English Grammar is worth more than all theorizing. Mr. White thinks it probable that Shakspeare understood French, Latin, and Italian, but not—English!

The truth is, that, however forms of spelling varied, (as they must where both writers and printers spelt phonographically,) the forms of grammatical construction were as strict then as now. There were some differences of usage, as where two nominatives coupled by

* Mr. White cites Dr. Richardson, but the Doctor is not always a safe guide.

a conjunction severally governed the verb, and where certain nouns in the plural were joined with a verb in the singular, — as *dealings*, *doings*, *tidings*, *odds*, and as is still the case with *news*. It is not impossible that the French termination in *esse* helped to make the confusion. We have in the opposite way made a plural of *riches*, which was once singular. Some persons used the strong preterites, and some the weak, — some said *snew*, *thew*, *sew*, and some *snowed*, *thawed*, *sowed*. Bishop Latimer used the preterite *shew*, which Mr. Bartlett, in his "Dictionary of Americanisms," pronounces to be the *shibboleth* of Bostonians. But such differences were orthoepic, and not syntactic.

We regret Mr. White's glossological excursions the more because they are utterly supererogatory, and because they seem to imply a rashness of conclusion which can very seldom be laid to his charge as respects the text. He volunteers, without the least occasion for it, an opinion that *abye* and *abide* are the same word, (which they are not,) suggests that *vile* and *vild* (whose etymology, he says, is obscure) may be related to the Anglo-Saxon *hyldan*, and tells us that *dom* is Anglo-Saxon for *house*. He pronounces *ex cathedrâ* that *besides* is only a vulgar form of *beside*, though the question is still *sub judice*, and though the language has contrived adverbial and prepositional forms out of the distinction, as it has, in the case of the compounds with *ward* and *wards*, adverbial and adjectival ones.* He de-

* It is singular, if the *s* be a corruption, that the Germans should have fallen into the same in their *vorwärts* and *rückwärts*. We are inclined to conjecture the *s* a genitival one, supplying the place of a missing *of* and *von* respectively. We formerly said, "of this side," "of that side," etc.; but the idiomatic sense of *of* is so entirely lost, that Mr. Craik (*English of Shakspeare*) actually supposes *o'clock* and *o'night* to be contractions of "*on the clock*," "*on nights*," and that, although we still say habitually, "*of late*," "*of old*," The French use of *de*, and the Italian of *di*, is parallel. The Italians have also their *avanti* and *davante*, and no one forgets Dante's

"Di quà, di là, di su, di giù, gli mena."

clares that the distinction between *shall* and *will* was imperfectly known in Shakspeare's time, though we believe it would not be difficult to prove that the distinction was more perfect in some respects than now. We the less value his opinion on these points as he himself shows an incomplete perception of the difference between *would* and *should*. (See Vol. V. pp. 114, 115, "We *would* now say, 'all liveliness,'" and "We *would* now write, 'the traits of,'" etc.) He says that the pronunciation *commandement* was already going out of use two centuries and a half ago. Mr. Pegge speaks of it as a common Cockneyism at the beginning of this century. Sometimes this hastiness, however, affects the value of an elucidatory note, as where he tells us that a principality is "an angel of the highest rank next to divinity" [deity], and quotes St. Paul, breaking off the passage at the word in question. But St. Paul goes on to say *powers*,—and there were, in fact, three orders of angels above the principalities, the highest being the Seraphim. An editor should be silent or correct, especially where there is no need of saying anything.

But it is after Mr. White has been bitten by the *æstrum* of Shakspearian pronunciation that he becomes thoroughly contradictory of himself, especially after he has taken up the notion that "Much Ado about Nothing" is "Much Ado about Noting," and that the *th* was not sounded in the England of Shakspeare. After that, his theory of rhetorical variety seems to become that of Geoffroy, "*dire, redire, et se contredire*." First he tells us, (Vol. II. p. 94,) that "the old form 'murther' should be retained because it is etymologically correct, and because it was the uniform orthography of the day, [a hasty assumption,] and the word was pronounced in accordance with it." Next, (in order to sustain his anti-*th* theory,) he says, (Vol. III. p. 227,) that "the last syllable of 'murder,' then written *murther*, seems to have been pronounced somewhat like the same syllable of the French *meurtre*." He assures us (Vol. III. p. 340)

that *raisin* was pronounced as we now pronounce *reason*, and adds, "The custom has not entirely passed away." Certainly not, as any one who knows Thackeray's "Mulligan of Ballymulligan" is aware. But Mr. White (having forgotten for a moment his conclusion that *swears* was anciently *sweers*) quotes (Vol. V. pp. 399–400) from the "Haven of Health" as follows:—"Among us in England they be of two sorts, that is to say, great *Raysons* and small *Raysons*" (the Italics are our own). In "Love's Labor's Lost," he spells Biron *Birone*, (Chapman spelt it *Byron*,) as being nearer the supposed pronunciation of Shakspeare's day; but finding it rhyming with *moon*, he is obliged also to assume that *moon* was called *moun*, and is severe on Mr. Fox for saying *Touloon*. He forgets that we have other words of the same termination in English for whose pronunciation Mr. Fox did not set the fashion. The French termination *on* became *oon* in *bassoon*, *pontoon*, *balloon*, *galloon*, *spoon*, *raccoon*, (Fr. *raton*,) *Quiberoon*, *Cape Bretoon*, without any help from Mr. Fox. So also *croon* from (Fr.) *carogne*,—of which Dr. Richardson (following Jamieson) gives a false etymology. The occurrence of *pontoon* in Blount's "Glossographia," published before Mr. Fox was born, shows the tendency of the language.* Or did Mr. Fox invent the word *boon*?

The pronunciation of words in Shakspeare's time is a matter of no particular consequence, except that it may be made the basis of conjectural emendation. This consideration gives the question some importance, and, as error is one of those plants which propagate themselves from the root, it is well to attempt its thorough eradication at the outset.

Autolycus sings,—

"If tinkers may have leave to live,
And bear the sow-skin bowget;

* Let us remark, in passing, that the spellings "Berowne," "Petruchio," and "Borachio" are strong indications that the manuscript copies of the plays in which they occur were dictated to an amanuensis.

Then my account I well may give,
And in the stocks avouch it."

Upon this Mr. White has the following note:—

"The sow-skin bowget":—i. e. budget; the change of orthography being made for the sake of the rhyme; about which our early writers, contrary to the received opinion, were very particular. Even Ben Jonson, scholar and grammarian as he was, did not hesitate to make radical changes in orthography to obtain a perfect, in place of an imperfect rhyme. The fact is important in the history of our language." (Vol. V. pp. 398-9.)

Readers of our older literature are familiar with what the early writers of treatises on poetry say upon this subject, concerning which, under the head of *licentia poetica*, they give some rather minute directions. But we think Mr. White's expression "*radical changes*" a little strong. The insurmountable difficulty, however, in the way of forming a decided judgment, is plain at the first glance. You have not, as Dr. Kitchener would say, caught your hare; you have no standard. *Quis custodiet ipsos custodes?* How shall you determine how your first word is pronounced? and which of two rhyming words shall dominate the other? In the present instance how do we know that *avouch* was sounded as it is now? Its being from the French would lead us to doubt it. And how do we know that *bowget* was not pronounced *boodget*, as it would be, according to Mr. White, if spelt *budget*? Bishop Hall makes *fool* rhyme with *cowl*. That *ou* was sometimes pronounced *oo* is certain. Gill (of whom *infra*) says that the *Boreales* pronounced *wound*, *waund*, and *gown*, *gaun* or *geaun*.

Mr. White supposes that *ea* was sounded like *ee*. We are inclined to question it, and to think that here again the French element in our language has made confusion. It is certain that *ea* represents in many words the French *e* and *ai*,—as in *measure* and *pleasure*. The Irish, who were taught English by Anglo-Normans, persist in giving the *ea* its original sound (as *baste* for *beast*); and we Northern Yankees need not go five miles in

any direction to hear *maysure* and *playsure*. How long did this pronunciation last in England? to how many words did it extend? and did it infect any of Saxon root? It is impossible to say. Was *beat* called *bate*? One of Mr. White's variations from the Folio is "bull-baiting" for "bold-beating." The mistake could have arisen only from the identity in sound of the *ea* in the one with *ai* in the other. Butler, too, rhymes *drum-beat* with *combat*. But *beat* is from the French. When we find *least*, (Saxon,) then, rhyming with *feast*, (French,) and also with *best*, (Shakspeare has *beast* and *blest*,) which is more probable, that *best* took the sound of *beest*, or that we have a slightly imperfect rhyme, with the *a* somewhat shorter in one word than the other? We think the latter. One of the very words adduced by Mr. White (*yeasty*) is spelt *yesty* in the Folio. But will rhymes help us? Let us see. Sir Thomas Wyat rhymes *heares* and *hairs*; Sir Walter Raleigh, *teares* and *despairs*; Chapman, *tear* (verb) with *ear* and *appear*; Shakspeare, *ear* with *hair* and *fear*, *tears* with *hairs*, and *sea* with *play*; Bishop Hall, *years* with *rehearse* and *expïres*, and *meales* with *quailles*. Will Mr. White decide how the *ea* was sounded? We think the stronger case is made out for the *a* than for the *ee*,—for *swears* as we now pronounce it, than for *sweers*; though we fear our tired readers may be tempted to perform the ceremony implied by the verb without much regard to its orthoëpy.

Mr. White tells us that *on* and *one* were pronounced alike, because Speed puns upon their assonance. He inclines to the opinion that *o* had commonly the long sound, as in *tone*, and supposes both words to have been pronounced like *own*. But was absolute identity in sound ever necessary to a pun, especially in those simpler and happier days? Puttenham, in his "English Poesy," gives as a specimen of the art in those days a play upon the words *lubber* and *lover*, appreciable now only by Ethiopian minstrels, but interesting as showing that the tendency of *b* and *v* to run together was

more sensible then than now.* But Shakspeare unfortunately rhymes *on* with *man*, in which case we must either give the one word the Scotch pronunciation of *mon*, or Hibernicize the other into *ahn*. So we find *son*, which according to Mr. White would be pronounced *sone*, coquetting with *sun*; and Dr. Donne, who ought to have called himself Doane, was ignorant enough to remain all his life Dr. Dunn. But the fact is, that rhymes are no safe guides, for they were not so perfect as Mr. White would have us believe. Shakspeare rhymed *broken* with *open*, *sentinel* with *kill*, and *downs* with *hounds*,—to go no farther. Did he, (dreadful thought!) in that imperfect rhyme of *leap* and *swept*, (*Merry Wives*), call the former *lape* and the latter (*Yankicè*) *swept*? This would jump with Mr. White's often-recurring suggestion of the Elizabethan-ism of our provincial dialect.

Mr. White speaks of the vowels as having had their "pure sound" in the Elizabethan age. We are not sure if we understand him rightly; but have they lost it? We English have the same vowel-sounds with other nations, but indicate them by different signs. Slight changes in orthoëpy we cannot account for, except by pleading the general issue of custom. Why should *foot* and *boot* be sounded differently? Why *food* and *good*? Why should the Yankee mark the distinction between the two former words, and blur it in the case of the latter, thereby incurring the awful displeasure of the "Autocrat," who trusses him, falcon-like, before his million readers and adorers? Why should the Frenchman call his wooden shoe a *sabot* and his old shoe a *savate*, both from the same root? Alas, we must too often in philology take Rabelais's reason for Friar John's nose! With regard to the pronunciation of the vowels in Queen Bess's days, so much is probable,—that the *a* in words from the French had more of the *ah* sound than now, if rhymes may be

trusted. We find *placed* rhyming with *past*; we find the participle *saft* formed from *save*. One relic of this occurs to us as still surviving in that *slang* which preserves for us so many glossologic treasures,—*chauffer*,—*to chafe*, (in the sense of angering,)—*to chaff*. The same is true of our Yankee *chämber*, *dänger*, and *mänger*, cited by Mr. White.

If we have apprehended the bearing of Mr. White's quotation from Butler's English Grammar, we think he has misapprehended Butler. We wish he had not broken the extract off so short, with an *etc*. What did Butler mean by "*oo* short"? Mr. White draws the inference that *Puck* was called *Pook*, and that, since it was made to rhyme with *luck*, that word and "all of similar orthography" were pronounced with an *oo*. Did our ancestors have no short *u*, answering somewhat to the sound of that vowel in the French *un*? We have little doubt of it; and since Mr. White repeats so often that we Yankees have retained the Elizabethan words and sounds, may we not claim their pronunciation of *put* (like *but*) and *sut* for *soot*, as relics of it? If they had it not, how soon did it come into the language? Already we find Lord Herbert of Cherbury using *pundonnore*, (*point d'honneur*), which may supply Dr. Richardson with the link he wants between *pun* and *point*, for the next edition of his Dictionary. Alexander Gill, head-master of St. Paul's School and Milton's teacher, published his "*Logonomia Anglica*" in 1621, a book which throws more light on the contemporary pronunciation of English than any other we know of. He makes three forms of *u*: the *tenuis*, as in *use*,—the *crassa brevis*, as in *us*,—and the *longa*, as in *ooze*. The Saxons had, doubtless, two sounds of *oo*, a long and a short; and the Normans brought them a third in the French liquid *u*, if they had it not before. We say *if*, because their organs have boggled so at the sound in certain combinations, ending in such vine-thick success as *piktcher*, *porträitcher*.

"On earth's green cinkcher fell a heavy Jew!"

* Everybody remembers how Scaliger illustrated it in the case of the Gascons,—*Felices, quibus vivere est bibere*.

That the *u* had formerly, in many cases, the sound attributed to it by Mr. White, we have no question; that it had that sound when Shakspeare wrote "Midsummer Night's Dream," and in such words as *luck*, is not so clear to us. We suspect that form of it was already retreating into the provincial dialects, where it still survives.

Another of Mr. White's theories is that *moon* was pronounced *mown*. Perhaps it was; but, if so, it is singular that this pronunciation is not found in any dialect of our language where almost every other archaism is caught skulking. And why was it spelt *moon*? When did *soon* and *spoon* take their present form and sound? That *oo* was not sounded like *o* long is certain from Webbe's saying, that, to make *poore* and *doore* rhyme with *more*, they must be written *pore* and *dore*. Mr. White says also that *shrew* was pronounced *shrow*, and cites as parallel cases *sew* and *shew*. If New England authority be worth anything, we have the old sound here in the pronunciation *soo*, once universal, and according both with Saxon and Latin analogy. Moreover, Bishop Hall rhymes *shew* with *mew* and *sue*; so that it will not do to be positive.

We come now to the theory on which Mr. White lays the greatest stress, and for being the first to broach which he even claims credit. That credit we frankly concede him, and we shall discuss the point more fully because there is definite and positive evidence about it, and because we think we shall be able to convince even Mr. White himself that he is wrong. This theory is, that the *th* was sounded like *t* in the word *nothing*, and in various other words, at the beginning of the seventeenth century. This certainly seems an unaccountable anomaly at very first sight; for we know that two sounds of *th* existed before that period, and exist now. What singular frost was it that froze the sound in a few words for a few years and left it fluent in all others?

Schoolmaster Gill, in his "Logonomia,"

already referred to, gives an interesting and curious reason for the loss from our alphabet of the Anglo-Saxon signs for the grave and acute *th*. He attributes it to the fact, that, when Henry VII. invited Wynken de Word over from Germany to print for the first time in English, the foreign fount of types was necessarily wanting in signs to express those Saxon sounds. Accordingly, the form *th* was required to stand for both. For the Germans, he says, call *thing*, *Ding*, and *father*, *Vater*.* In his alphabet he gives *though* and *thistle* as expressing the two sounds, which is precisely consonant with present usage. On page 152, speaking of the difficulties of English pronunciation to a foreigner, he says, "Etenim si has quinque vocalas, *What think the chosen judges?* quid censent electi iudices? rectè protuleris. omnem loquendi difficultatem superasti." Ben Jonson in his Grammar gives similar examples, and speaks also of the loss of the Saxon signs as having made a confusion. It is certain, then, at least, that Shakspeare did not pronounce *thing*, *ting*,—or, if he did, that others did not, as we shall presently show.

Most of Mr. White's arguments in support of his opinion are theoretic; the examples by which he endeavors to sustain it tell, with one exception, against him. That exception is his quoting from one of Shakspeare's sonnets the rhyme *doting* and *nothing*. But this proves nothing (noting?); for we have already shown that Shakspeare, like all his contemporaries, was often content with assonance, where identity could not be had, in rhyming. Generally, indeed, the argument from rhymes is like that of the Irishman who insisted that *full* must be pronounced like *dull*, because he found it rhyming with *bull*. Mr. White also brings forward the fact, that *moth* is spelt *mote*, and argues therefrom that the name of the Pigo Moth has hitherto been misconceived. But how many *th* sounds does he mean to rob us of? And how was *moth* really pronounced? Ben Jon-

* *Præfatio*, p. 6. We abridge his statement.

son rhymes it with *sloth* and *cloth*; Herrick, with *cloth*. Alexander Gill tells us (p. 16) that it was a Northern provincialism to pronounce *cloth* long (like *both*), and accordingly we are safe in believing that *moth* was pronounced precisely as it is now. Mr. White again endeavors to find support in the fact that *Armado* and *renegado* are spelt *Armatho* and *renegatho* in the Folio. Of course they were, (just as the Italian *Petruccio* and *Boraccio* are spelt *Petruchio* and *Borachio*,) because, being Spanish words, they were so pronounced. His argument from the frequent substitution of *had* for *hath* is equally inconclusive, because we may either suppose it a misprint, or, as is possible, a mistake of the printer for the Anglo-Saxon sign for *th*, which, as many contractions certainly did, may have survived in writing long after it was banished from print, and which would be easily confounded with *d*. Can Mr. White find an example of *dod* for *doth*, where the word could not be doubtful to the compositor? The inability of foreigners to pronounce the *th* was often made a source of fun on the stage. Puttenham speaks of *dousand* for *thousand* as a vulgarism. Shakspeare himself makes Caius say *dat*, and "by my *troi*"; and in Marston's "Dutch Courtezan," (Act ii. Sc. 1,) we find Francischina, (a Dutch woman,) saying, "You have brought mine love, mine honor, mine body, all to *noting*!" — to which her interlocutrix answers, "To nothing!" It is plain that Marston did not harden his *this* into *ts*, nor suppose that his audience were in the habit of doing so. How did Ben Jonson pronounce the word? He shall answer for himself (*Vision of Delight*):—

"Some that are proper and signify o'thing,
And some another, and some that are *nothing*."

But perhaps he pronounced *thing*, *ting*? If he did, Herrick as surely did not, for he has

"Maides should say, or virgins sing,
Herrick keeps, as holds, *nothing*,"

where the accent divides the word into its original elements, and where it is out

of the question that he should lay the emphasis on a bit of broken English. As to the *hs* which Mr. White adduces in such names as *Anthony* and such words as *authority*, they have no bearing on the question, for those words are not English, and the *h* in them is perhaps only a trace of that tendency in *t* to soften itself before certain vowels and before *r*, as *d* also does, with a slight sound of *theta*, especially on the thick tongues of foreigners. Shakspeare makes Fluellen say *athversary*; and the Latin *t* was corrupted first to *d* and then to *dth* in Spanish. The *h* here has not so much meaning as the *h* which has crept into *Bosporus*, for that is only the common change of *p* to *f*, corresponding to *v* for *b*. So when Mr. White reads *annotanize* rather than *anatomize*, because the Folio has *annothanize*, we might point him to Minsheu's "Spanish Dictionary," where, in the earlier editions, we find *anathomia*. In *lanthorn*, another word adduced by Mr. White, the *h* is a vulgarism of spelling introduced to give meaning to a foreign word, the termination being supposed to be derived from the material (horn) of which lanterns were formerly made,—like *Bully Ruffian* for *Bellerophon* in our time, and *Sir Piers Morgan* for *Primauguet* three centuries ago. As for *'tone* and *'tother*, they should be *'tone* and *'tother*, being elisions for *that one* and *that other*, relics of the Anglo-Saxon declinable definite article, still used in Frisic.

We have been minute in criticizing this part of Mr. White's notes, because we think his investigations misdirected, the results at which he arrives mistaken, and because we hope to persuade him to keep a tighter rein on his philological zeal in future. Even could he show what the pronunciation of Shakspeare's day was, it is idle to encumber his edition with such disquisitions, for we shall not find Shakspeare clearer for not reading him in his and our mother-tongue. The field of philology is famous for its mare's-nests; and, if imaginary eggs are worth little, is it worth while brooding on imaginary chalk ones, nest-eggs of delusion?

Life is short and Shakspeare long. We believe the pronunciation of Shakspeare's day to have been so qualified with perfectly understood provincialisms as to have allowed puns and rhymes impossible now. It is not eighty years since you could tell the county* of every country member of Parliament by his speech. Speculations like Mr. White's would be better placed in a monograph by themselves. We have subjected his volumes to a laborious examination such as few books receive, because the text of Shakspeare is a matter of common and great concern, and they have borne the trial, except in these few impertinent particulars, admirably. Mr. Dyce and Mr. Singer are only dry commonplace-books of illustrative quotations; Mr. Collier has not wholly recovered from his "Corr. fo."-madness; Mr. Knight (with many eminent advantages as an editor) is too diffuse; and we repeat our honest persuasion, that Mr. White has thus far given us the best extant text, while the fulness of his notes gives his edition almost the value of a *variorum*. We shall look with great interest for his succeeding volumes.

In the introductory part of this article, we said that it was doubtful if Shakspeare had any conscious moral intention in his writings. We meant only that he was purely and primarily poet. And while he was an English poet in a sense that is true of no other, his method was thoroughly Greek, yet with this remarkable difference,—that, while the Greek dramatists took purely national themes and gave them a universal interest by their mode of treatment, he took what may be called cosmopolitan traditions, legends of human nature, and nationalized them, by the infusion of his perfectly Anglican breadth of character and solidity of understand-

* Mr. White is mistaken in thinking that to say "my country" for "my county" was a peculiarity of Shallow. It was common in the last century in England. He is wrong also in thinking that he was restoring a characteristic vulgarism in *aleven*. Gabriel Harvey uses it, and says there is no difference in sound between that and a *leaven*.

ing. Wonderful as his imagination and fancy are, his perspicacity and artistic discretion are more so. This country tradesman's son, coming up to London, could set high-bred wits, like Beaumont, uncopyable lessons in drawing gentlemen such as are seen nowhere else but on the canvas of Titian; he could take Ulysses away from Homer and expand the shrewd and crafty islander into a statesman whose words are the pith of history. But what makes him yet more exceptional was his utterly unimpeachable judgment, and that poise of character which enabled him to be at once the greatest of poets and so unnoticeable a good citizen as to leave no incidents for biography. His material was never far-sought; (it is still disputed whether the fullest head of which we have record were cultivated beyond the range of grammar-school precedent!) but he used it with a poetic instinct which we cannot parallel, identified himself with it, yet remained always its born and questionless master. He finds the Clown and Fool upon the stage,—he makes them the tools of his pleasantry, his satire, and even his pathos; he finds a fading rustic superstition, and shapes out of it ideal Pucks, Titianias, and Ariels, in whose existence statesmen and scholars believe forever. Always poet, he subjects all to the ends of his art, and gives in Hamlet the churchyard-ghost, but with the cothurnus on,—the messenger of God's revenge against murder; always philosopher, he traces in Macbeth the metaphysics of apparitions, painting the shadowy Banquo only on the o'erwrought brain of the murderer, and staining the hand of his wife-accomplice (because she was the more refined and higher nature) with the disgusting blood-spot that is not there. We say he had no moral intention, for the reason, that, as artist, it was not his to deal with the realities, but only with the shows of things; yet, with a temperament so just, an insight so inevitable as his, it was impossible that the moral reality, which underlies the *mirage* of the poet's vision, should not always be suggested. His humor and satire are never of the de-

structive kind; what he does in that way is suggestive only,—not breaking bubbles with Thor's hammer, but puffing them away with the breath of a Clown, or shivering them with the light laugh of a genial cynic. Men go about to prove the existence of a God! Was it a bit of phosphorus, that brain whose creations are so real, that, mixing with them, we feel as if we ourselves were but fleeting magic-lantern shadows?

But higher even than the genius, we rate the character of this unique man,

and the grand impersonality of what he wrote. What has he told us of himself? In our self-exploiting nineteenth century, with its melancholy liver-complaint, how serene and high he seems! If he had sorrows, he has made them the woof of everlasting consolation to his kind; and if, as poets are wont to whine, the outward world was cold to him, its biting air did but trace itself in loveliest frost-work of fancy on the many windows of that self-centred and cheerful soul.

NEW PUBLICATIONS

For the Quarter ending December 31, 1858.

Life in a Risen Saviour. By Robert S. Candlish, D.D. 12mo. 75 cts. Philadelphia. Lindsay & Blakiston.

Life of Lord Timothy Dexter, etc. By Samuel L. Knapp. 16mo. 50 cts. Boston. J. E. Tilton & Co.

Principles of Social Science. By H. C. Carey. Vol. 2. 8vo. \$2.50. Philadelphia. J. B. Lippincott & Co.

THE
ATLANTIC MONTHLY.

A MAGAZINE OF LITERATURE, ART, AND POLITICS.

VOL. III.—MARCH, 1859.—NO. XVII.

HOLBEIN AND THE DANCE OF DEATH.

AT the northwest corner of Switzerland, just on the turn of the Rhine from its westward course between Germany and Switzerland, to run northward between Germany and France, stands the old town of Bâle. It is nominally Swiss; but its situation on the borders of three countries, and almost in them all, has given to the place itself and to its inhabitants a somewhat heterogeneous air. "It looks," says one traveller, "like a stranger lately arrived in a new colony, who, although he may have copied the dress and the manner of those with whom he has come to reside, wears still too much of his old costume to pass for a native, and too little to be received as a stranger." Perhaps we may get a better idea of the mixed nationality of the place by imagining a Swiss who speaks French with a German accent.

Bâle is an ancient city; though Rome was bending under the weight of more than a thousand years when the Emperor Valentinian built at this angle of the river a fortress which was called the Basilia. Houses soon began to cluster round it upon the ruins of an old Helvetic town, and thus Basel or Bâle obtained its existence and its name. Bâle suffered many calamities. War, pesti-

lence, and earthquake alternately made it desolate. Whether we must enumerate among its misfortunes a Grand Ecclesiastical Council which assembled there in 1431, and sat for seventeen years, deposing one infallible Pope, and making another equally infallible, let theological disputants decide. But the assembling of this Council was of some service to us; for its Secretary, Æneas Sylvius, (who, like the saucy little *prima donna*, was one of the noble and powerful Italian family, the Piccolomini, and afterward, as Pope Pius II., wore the triple crown which St. Peter did not wear,) in his Latin dedication of a history of the transactions of that body to the Cardinal St. Angeli, has left a description of Bâle as it was in 1436.

After telling us that the town is situated upon that "excellent river, the Rhine, which divides it into two parts, called Great Bâle and Little Bâle, and that these are connected by a bridge which the river rising from its bed sometimes carries off;" he, naturally enough for an ecclesiastic and a future Pope, goes on to say, that in Great Bâle, which is far more beautiful and magnificent than Little Bâle, there are handsome and commodious churches; and he naïvely adds, that, "*although these are not adorn-*

ed with marble, and are built of common stone, they are much frequented by the people." The women of Bâle, following the devotional instincts of their sex, were the most assiduous attendants upon these churches; and they consoled themselves for the absence of marble, which the good Æneas Sylvius seems to imply would partly have excused them for staying away, by an arrangement in itself as odd as in Roman Catholic places of worship—to their honor—it is, and ever was, unusual. Each of them performed her devotions in a kind of inclosed bench or solitary pew. By most of these the occupant was concealed only to the waist when she stood up at the reading of the Gospel; some allowed only their heads to appear; and others of the fair owners were at once so devout, so cruel, and so self-denying as to shut out the eyes of the world entirely and at all times. But instances of this remorseless mortification of the flesh seem to have been exceedingly rare. Queer enough these structures were, and sufficiently gratifying to the pride and provocative of the envy which the beauties of Bâle (avowedly) went to churches in which there was no marble to mortify. For they were of different heights, according to the rank of the occupant. A simple burgher's wife took but a step toward heaven when she went to pray; a magistrate's of the lower house, we must suppose, took two; a magistrate's of the upper house, three; a lady, four; a baroness, five; a countess, six; and what a duchess, if one ever appeared there, did to maintain her dignity in the eyes of God and man, unless she mounted into the pulpit, it is quite impossible to conjecture. Æneas Sylvius gives it as his opinion that these things were used as a protection against the cold, which to his Italian blood seemed very great. But that notion was surely instilled into the courtly churchman by some fair, demure Bâloise; for had it been well-founded, the sentry-boxes would have risen and fallen with the thermometer, and not with the rank of the occupant.

The walls of the churches were hung around with the emblazoned shields of knights and noblemen, and the roofs were richly painted in various colors, and glowed with splendor when the rays of the sun fell upon them. Storks built their nests upon these roofs, and hatched their young there unmolested; for the Bâlois believed, that, if the birds were disturbed, they would fire the houses.

The dwellings of men of any wealth or rank were very curiously planned, elaborately ornamented, richly painted, and adorned with magnificent tapestry. The tables were covered with vessels of wrought silver, in which Sylvius confesses that the Bâlois surpassed even the skillful and profuse Italians. Fountains, those sources of fantastic and ever-changing beauty, were numerous,—so numerous, says our afterward-to-be-infallible authority, that the town of Viterbo, in Tuscany, had not so many,—and Viterbo was noted for its beauty, and for being surrounded with the villas of wealthy Italians, who have always used water freely in the way of fountains.

Bâle, although it then—four hundred and twenty years ago—acknowledged the Emperor for its sovereign, was a free town, as it is now; that is, it had no local lord to favor or oppress it at his pleasure, but was governed by laws enacted by representatives of the people. The spirit of a noble independence pervaded the little Canton of which it was and is the capital. Though it was fortified, its stone defences were not strong; but when Sylvius tells us that the Bâlois thought that the strength of their city consisted in the union of its inhabitants, who preferred death to loss of liberty, we see what stuff its men were made of, and why the town was free.

Among its peculiarities, Bâle had no lawyers,—this happy and united Bâle. The Bâlois did not trouble themselves about the Imperial law, says Sylvius; but when disputes or accusations were brought before the magistrates, they were decided according to custom and the equity of each case. They were never-

theless inexorably severe in administering justice. A criminal could not be saved either by gold, or by intercession, or by the authority and influence of his family. He who was guilty must be punished; and the punishments were terrible. Criminals were banished, hung, beheaded, broken on the wheel, drowned in the Rhine, (a bad use to which to put that "excellent river,") left to starve on a gradually diminished supply of bread and water. To compel confessions, tortures inconceivably horrible were used, to which the alternative of death would have been a boon; and yet there were not wanting those among the Bâlois who would endure these torments rather than utter their own condemnation.

They were devoted to religion, and held in great reverence the pictures and images of the Saints; but not on account of any admiration of the skill of painter or sculptor; for they cared little for the arts, and were so ignorant of literature that "no one of them had ever heard of Cicero or of any other orator."

The men of Bâle were of noble presence, and dressed well, although they avoided magnificence. Only those of knightly rank wore purple; the wealthy burghers confined themselves to black velvet; but their wives, on fête-days, blazed in splendid silk and satin and jewels. The boys went with naked feet, and, adds the reverend divine, the women wore upon their white legs only shoes. There was no distinction of age by costume, among the women,—a very great singularity in those days, when every stage and rank of life was marked by some peculiar style of dress; but in Bâle the face alone distinguished the young girl from the matron of mature years. It may, however, be doubted by some, whether this is peculiar to the town of Bâle or to the time of Sylvius. The men were addicted to voluptuous pleasures; they lived sumptuously, and passed a long time at table. In the words of our churchman, "They were too much devoted to Father Bacchus and Dame Venus,"—faults which they deemed ve-

nial. But he adds, that they were jealous of their honor, and held to what they promised; they would rather be upright than merely seem to be so. Though provident, they were content, unless very poor.

Another peculiarity of Bâle: its clocks were one hour ahead of all others, and so continued at least till the middle of the last century. This of course depended on no difference of time; it was merely that when, for instance, at mid-day, the clocks of neighboring towns struck twelve, the clocks of Bâle struck one. The origin of this seeming effort to hasten him who usually moves rapidly enough for us all is lost in obscurity.

And now why is it that we have gone back four hundred years and more, to linger thus long with the Secretary of the Great Ecclesiastical Council of Bâle, in that quaint and queer old town, with its half French, half German look, its grand, grotesque old churches, hung round with knightly shields and filled with women, each in a pulpit of her own, its stork-crowned roofs, its houses blazing with wrought gold and silver, its three-score fountains, and the magnificence in which, without a court, it rivalled the richest capitals of Italy, its noble-spirited and pleasure-loving, but simple-minded and unlearned burghers, its white-limbed beauties, and its deceitful clocks? It is not because that town is now one of the principal ribbon-factories of the world, and exports to this country alone over \$1,200,000 worth yearly; although some fair readers may suppose that an all-sufficient reason,—and some of their admirers and protectors, too, for that matter. Think of it! nearly one million two hundred and fifty thousand dollars' worth of ribbons coming to us every year from a single town in Switzerland! The statement is enough to carry horror and dismay to the heart and the pocket of every father and brother, and above all, of every husband, actual or possible, who hears of it. It is a godsend to the protectionists, who might reëdify their party on the basis of a prohibitory tariff

against ribbons. If they were successful, their success would be brilliant; for if our fair tyrants could not get ribbons—those necessities of life—from Bâle in Switzerland, they would tease and coax us to build them a Bâle in America; and we should do it.

We have gone back to the old Bâle of four hundred and twenty years ago, because there, and not long after that time,—about 1498,—according to general belief, Hans Holbein was born; because these were the surroundings under the influence of which he grew to manhood; and because there, about sixty years before his birth, a Dance of Death was painted, the most ancient and important of which we have any remaining memorial. This Dance was painted upon the wall of the churchyard of the Dominican Convent in Great Bâle, by order of the very Ecclesiastical Council of which our Æneas Sylvius was Secretary, and in commemoration of a plague which visited the town during the sitting of that Council, and carried off many of its members.

What is a Dance of Death? and why should Death be painted dancing? Some readers may think of it as a frantic revel of grim skeletons, or perhaps—like me in my boyish musings—imagine nameless shapes with Death and Hell gleaming in their faces, each clasping a mortal beguiled to its embrace, all flitting and floating round and round to unearthly music, and gradually receding through vast mysterious gloom till they are lost in its horrible obscurity.

But neither of these notions is near the truth. The Dance of Death is not a revel, and in it Death does not dance at all. A Dance of Death, or a Dance Macabre, as it was called, is a succession of isolated pictures, all informed with the same motive, it is true, but each independent of the others, and consisting of a group, generally of but two figures, one of which is the representative of Death. The second always represents a class; and in this figure every rank, from the

very highest to the lowest, finds its type. The number of these groups or pictures varies considerably in the different dances, according to the caprice of the artist, or, perhaps, to the expense of his time and labor which he thought warranted by the payment he was to receive. But all express, with sufficient fulness, the idea that Death is the common lot of humanity, and that he enters with impartial feet the palace and the cottage, neither pitying youth nor respecting age, and waiting no convenient season.

The figure of Death in these strange religious works of Art,—for they were as purely religious in their origin as the Holy Families and Madonnas of the same and a subsequent period,—this figure of Death is not always a skeleton. It is so in but one of the forty groups in the Dance at Bâle, which was the germ of Holbein's, and which, indeed, until very recently, was attributed to him, although it was painted more than half a century before he was born. It is generally assumed that a skeleton has always been the representative of Death, but erroneously; for, in fact, Holbein was the first to fix upon a mere skeleton for the embodiment of that idea.

The Hebrew Scriptures, which furnish us with the earliest extant allusion to Death as a personage, designate him as an angel or messenger of God,—as, for instance, in the record of the destruction of the Assyrian host in the Second Book of Kings (xix. 35). The ancient Egyptians, too, in whose strange system of symbolism may be found the germ, at least, of most of the types used in the religion and the arts of more modern nations, had no representation of Death as an individual agent. They expressed the extinction of life very naturally and simply by the figure of a mummy. Such a figure it was their custom to pass round among the guests at their feasts; and the Greeks and Romans imitated them, with slight modifications, in the form of the image and the manner of the ceremony. Some scholars have found in this custom a deep moral and religious significance,

akin to that which certainly attached to the custom of placing a slave in the chariot of a Roman conquering general to say to him at intervals, as his triumphal procession moved with pomp and splendor through the swarming streets, "Remember that thou art a man." But this is too subtle a conjecture. The ceremony was but a silent way of saying, "Let us eat and drink, for to-morrow we die," which, as Paul's solemn irony makes but too plain, must be the philosophy of life to those who believe that the dead rise not, which was the case with the Egyptians and the Greeks, and the Hebrews also. An old French epitaph expresses to the full this philosophy:—

"Ce que j'ai mangé,
Ce que j'ai bu,
Ce que j'ai dissipé,
Je l'ai maintenant avec moi.
Ce que j'ai laissé,
Je l'ai perdu."

What I ate,
What I drank,
What I dissipated,
I have with me.
That which I left
I lost.

The figure of the sad youth leaning upon an inverted torch, in which the Greeks embodied their idea of Death, is familiar to all who have examined ancient Art. The Etruscan Death was a female, with wings upon the shoulders, head, and feet, hideous countenance, terrible fangs and talons, and a black skin. No example of the form attributed to him by the early Christians has come down to us, that I can discover; but we know that they, as well as the later Hebrews, considered Death as the emissary of the Evil One, if not identical with him, and called him impious, unholy. It was in the Dark Ages, that the figure of a dead body or a skull was first used as a symbol of Death; but even then its office appears to have been purely symbolic, and not representative;—that is, these figures served to remind men of their mortality, or to mark a place of sepul-

ture, and were not the embodiment of an idea, not the creation of a personage,—Death. It is not until the thirteenth or fourteenth century that we find this embodiment clearly defined and generally recognized; and even then the figure used was not a skeleton, but a cadaverous and emaciated body.

Among the remains of Greek and Roman Art, only two groups are known in which a skeleton appears; and it is remarkable that in both of these the skeletons are dancing. In one group of three, the middle figure is a female. Its comparative breadth at the shoulders and narrowness at the hips make at first a contrary impression; but the position of the body and limbs is, oddly enough, too like that of a female dancer of the modern French school to leave the question in more than a moment's doubt. Thus the artists who did not embody their idea of death in a skeleton were the first to conceive and execute a real Dance of Death. In both the groups referred to, the motive is manifestly comic; and neither of them has any similarity to the Dances of Death of which Holbein's has become the grand representative. These had their origin, we can hardly tell with certainty how, or when, or where; although the subject has enlisted the investigating labors of such accomplished scholars and profound antiquaries as Douce and Ottley in England, and Peignot and Langlois in France. But a story with which they are intimately connected, even if it is not their germ, has been discovered; ancient customs which must have aided in their development are familiar to all investigators of ancient manners, and especially of ancient amusements; and the motives which inform them all, and the moral condition of Christendom of which they were the result, are plain enough.

We have seen before, that this Dance consisted of several groups of two or more figures, one of which was always Death in the act of claiming a victim; and for the clear comprehension of what

follows, it is necessary to anticipate a little, and remark, that there is no doubt that the Dance was first represented by living performers. Strange as this seems to us, it was but in keeping with the spirit of the time, which we call, perhaps with some presumption, the Dark Ages.

The story which is probably the germ of this Dance was called *Les Trois Morts et les Trois Vifs*,—"The Three Dead and the Three Living." It is of indefinable antiquity and uncertain origin. It is said, that three noble youths, as they returned from hunting, were met in the gloom of the forest by three hideous spectres, in the form of decaying human corpses; and that, as they stood rooted to the ground by this appalling sight, the figures addressed them solemnly upon the vanity of worldly grandeur and pleasure, and admonished them, that, although in the heyday of youth, they must soon become as they (the spectres) were. This story, or *dit*, "saying," as it was called in French, was exceedingly popular throughout Europe five or six hundred years ago. It is found in the language of every Christian nation of the period, and, extended by means of accessory incidents and much moralizing, is made to cover several pages in more than one old illuminated manuscript. In the Arundel MSS., in England, there is one of the many versions of the legend written in French so old that it is quite as difficult for Frenchmen as for Englishmen to read it. But over an illuminated picture of the incident, in which three kings are shown meeting the three skeletons, are these lines in English, as old, but less obsolete :—

Over the Kings.

"Ich am afert
Lo whet ich see
Methinketh hit be develes thre."

Over the Skeletons.

"Ich wes wel fair
Such schel tou be
For Godes love be wer by me."

In these rude lines is the whole moral of the legend, and of the Dance of Death

which grew out of it. That growth was simple, gradual, and natural. In the versions and in the pictorial representations of the legend there soon began to be much variety in the persons who met the spectres. At first three noble youths, they became three kings, three noble ladies, a king, a queen, and their son or daughter, and so on,—the rank of the persons, however, being always high. For, as we shall have occasion to notice hereafter more particularly, the mystery of the Dance had a democratic as well as a religious significance; and it served to bring to mind, not only the irresistible nature of Death's summons, but the real equality of all men; and this it did in a manner to which those of high condition could not object.

The legend was made the subject of a fresco, painted about 1350, by the eminent Italian painter and architect, Orcagna, upon the walls of the Campo Santo at Pisa,—which some readers may be glad to be reminded was a cemetery, so called because it was covered with earth brought from the Holy Land. It is remarkable, however, that in this work the artist embodied Death not in the form commonly used in his day, but in the old Etruscan figure before mentioned. Orcagna's Death is a female, winged like a bat, and with terrible claws. Armed with a scythe, she swoops down upon the earth and reaps a promiscuous harvest of popes, emperors, kings, queens, churchmen, and noblemen. In the rude manner of the time, Orcagna has divided his picture into compartments. In one of these we see St. Macarius, one of the first Christian hermits, an Egyptian, sitting at the foot of a mountain; before him are three kings, who have returned from the chase accompanied by a gay train of attendants. The Saint calls the attention of the kings to three sepulchres in which lie the bodies of three other kings, one of which is much decomposed. The three living kings are struck with horror; but the painter has much diminished the moral effect of his work, for this century, at least, by making one of them hold his

nose ;—which is regarded by Mr. Ruskin as an evidence of Oreagna's devotion to the truth ; but in this case that brilliant writer, but most unsafe critical guide, commits an error of a kind not uncommon with him. The representation of so homely an action, in such a composition, merely shows that the painter had not arrived at a just appreciation of the relative value of the actual,—and that he failed to see that by introducing this unessential incident he diverted attention from his higher purpose, dragged his picture from a moral to a material plane, and went at a bound far over the narrow limit between the horrible and the ludicrous.

St. Macarius is frequently introduced in the pictures of this subject ; and some antiquaries suppose that hence the Dance of Death derived the name, Dance Macabre, by which it used to be generally known. Others derive it from the Arabic *mac-bourah*,—a cemetery. Neither derivation is improbable ; but it is of little consequence to us which is correct.

It may seem strange that such a legend as this of "The Three Dead and the Three Living," with such a moral, should become the origin of a dance. But we should remember that in many countries dancing has been a religious ceremony. It was so with the Greeks and Romans, and also with the Hebrews, among whom, however, saltatory worship seems, on most occasions, to have been performed spontaneously, and by volunteers. All will remember the case of Miriam, who thus danced to the sound of her timbrel after the passage of the Red Sea ; and who that has read it can forget the account of the dance which King David executed before the ark, dancing with all his might, and girded only with a linen ephod ? Dancing has always seemed to us to be an essentially ridiculous transaction,—for a man, at least ; and we confess that we sympathize with David's wife, Michal, who, seeing this extraordinary *pas seul* from her window, "despised David in her heart," and treated him to

a little conjugal irony when he came home. What would the lovely Eugénie have thought, if, after the fall of Sebastopol, she had seen his Majesty, the Emperor of the French, "cutting it down," in broad daylight, before the towers of Notre Dame, girded only with a linen ephod,—though that's not exactly the name we give the garment now-a-days ? But David was master, not only in Israel, but in his own household, (which is not the case with all kings and great men,) and he said to Michal,—“It was before the Lord, which chose me before thy father and before all his house ; therefore will I play before the Lord ; and of the maid-servants which thou hast spoken of, of them shall I be had in honor.” And Michal all her life repented bitterly the offence that she had given her husband.

But dancing was not one of the regular ceremonies of the Christian Church, even in its corruptest days ; and yet dances were performed four hundred years ago in the churches and in churchyards, as a part of, or an appendage to, entertainments of a religious character. These were the Mysteries and Moralities, which are the origin of our drama ;—and it is remarkable that in all countries the drama has been at first a religious ceremony. These Mysteries and Moralities were religious plays of the rudest kind ; the Mysteries being a representation, partly by dumb show and partly by words, of some well-known incident related in the Bible ; and the Moralities, a kind of discussion and enforcement of religious doctrine or moral truth by allegorical personages. They were performed at first almost entirely in the churches, upon scaffolds erected for the purpose.

In a Mystery called "Candlemas Day, or the Killing of the Children of Israel," which represented the Massacre of the Innocents, and in which Herod, Simeon, Joseph, the Virgin Mary, Watkin, a comic character, and Anna the Prophetess, appeared, there was a general dance of all the characters after the Prologue ; and at the close of the play, there

is a stage-direction for another, in response to a command of Anna the Prophetess, who says,—

“Shewe ye sune plesur as ye can

In the worship of Jesu, our Lady, and St. Anne.”

And thereupon King Herod, Simeon, Joseph, the Virgin Mary, Watkin the funny man, and the Prophetess well stricken in years, proceed to forward four, and end with a promenade all around. Indeed, our ancestors seem to have found it edifying, not to say entertaining, to go to a cathedral to see Satan and an Archbishop dance a hornpipe with the Seven Deadly Sins and the Five Cardinal Virtues.

A Morality called “Every Man,” written about 1450, has a direct connection with the subject which we are considering. Every Man, the principal personage of the piece, is an allegorical representation of all mankind; and the purpose of the play is told in this sentence, which introduces it:—

“Here begynneth a Treatyse how the Hye Fader of Heven sendeth Deth to somon every creature to come & gyve a count of theyr lyves in this worlde, & is in maner of a Morall Playe.”

On the title-page of an edition printed in 1500, only one copy of which exists, is a very rude wood-cut, in which an individual, who is labelled “Every Man,” is startled at the sight of Death standing at the door of a church and summoning him. In this Moral Play, Fellowship, Good Deeds, Worldly Goods, Knowledge, Beauty, Strength, Discretion, and Five Wittes are characters; and they cannot interpose between Every Man and the summons of Death, nor will any of them, except Good Deeds, go with him. The representation of this play was a kind of Dance of Death, and from the acting of “Every Man” to the execution of that Dance was but a short step.

But the Dance of Death had been performed before “Every Man” was written; and dances in churches and churchyards were of yet greater antiquity. For,

by an order of a Roman council under Pope Pius II. in the tenth century, priests were directed “to admonish men and women not to dance and sing in the churches on feast-days, like Pagans.” The evil increased, however, until, according to the old chroniclers, a terrible punishment fell upon a party of dancers. One of them, Ubert, tells the story. It was on Christmas Eve, in the time of the Emperor Henry II., who assumed the imperial diadem in the year 1002, that a company of eighteen men and women amused themselves by dancing and singing in the churchyard of St. Magnus, in the diocese of Magdeburg, to the annoyance of a priest who was saying mass in the church. He ordered them to desist; but they danced on in reckless mirth. The holy father then invoked God and St. Magnus to keep them dancing for a whole year; and not in vain. For twelve months they danced in spite of themselves. Neither dew nor rain fell upon them; and their shoes and their clothes were not worn away, although by their dancing they buried themselves waist-high. Yet, fatigued and famished beyond human endurance, they danced on, unable to stop an instant for rest or food. The priest’s own daughter was among the dancers; and, unable to undo what the Saint had done, he sent his son to drag her out of the dance. But when her brother pulls her by the arm it comes off in his hand, and he in horror takes it to his father. No blood flows from the wound. The priest buries the arm, and the next morning he finds it upon the top of the grave. He repeats the burial, and with the same result. He makes a third attempt, and the grave casts out the limb with violence before his eyes. Meanwhile the girl and her companions continue dancing, and the Emperor, having heard of this strange occurrence, travels from Rome to see so sad a sight. He orders carpenters to inclose the dancers in a building, but in vain; for that which is built in the day falls down in the night. The dancers have neither rest nor mitigation of their curse until the expiration

of the year, when they all rush into the church and fall before the altar in a swoon, from which they are not recovered for three days. Then they immediately flee each other's faces, and wander solitary through the world, still dancing at times in spite of themselves. In the olden time this was believed to be the origin of St. Vitus's dance; but we can now see that the dance is the origin of the story.

The Dance of Death was performed by a large company dressed in the costumes of various classes of society, which were then very marked in their difference. One by one the dancers suddenly and silently slipped off, thus typifying the departure of all mankind at Death's summons. That this Dance was performed, not only with the consent, but by the procurement of the clergy, is made certain by the discovery, in the archives of the Cathedral of Besançon, of the account of the payment of four measures of wine by the seneschal to those persons who performed the Dance Macabre on the 10th of July, 1453.

The moral lesson conveyed by this strange pastime or ceremony seems hardly calculated to secure for it a noteworthy popularity in any age; but for a long time it was, either as a ceremony or as a picture, very popular throughout Europe. We know of forty-four places in which it was painted or sculptured in some large public building; the oldest example being that at Little Bâle, which was painted in 1312. This, like that in Great Bâle, and most of the others, has been destroyed by time or violence. The Dance was made the ornament of books of devotion, and the subject of ornamental initial-letters; groups from it were engraved repeatedly by those fantastic designers and exquisite workmen known as the Little Masters of Germany; a single group was assumed as a device, or trade-mark, by more than one printer; and it was sung in popular ballads. There is now at Aix-la-Chapelle a huge state-bedstead, on the posts, sides, and footboards of which it is elaborately carved, in the

manner of the sixteenth century; and it was even made the ornament of ladies' fans.

The reasons for this popularity were a certain strange fascination in the subject,—yet not so strange at a time when women would crowd to see men burned or hanged and quartered;—but chiefly, the grand democratic significance of the dance. Death has ever been, and ever will be, the greatest leveller; and at a time when rank had an importance and bestowed advantages of which we can form little idea, while at the same time men had begun to ask why this should be, such a satire as this Dance of Death, sanctioned by the Church, that great protector of established rights and dignities, and yet sparing neither noble nor hierarchy, not even the Pope himself, satisfied an eager craving in the breast of poor, envious, self-asserting human nature. In one of those ornamental initial-letters above mentioned, the date of which was some years prior to the execution of Holbein's Dance, Death appears as a gravedigger, and lifts on his spade, out of the grave which he is making, two skulls, one crowned, the other covered with a peasant's hat. He grins with savage glee at seeing these remnants of the two extremes of society, side by side; and underneath them, on the shovel, is written *Idem*,—"The Same." In this word is the key to the popularity of the Dance.

The most important and interesting of these pictured Dances of Death were those at Bâle, at Strasbourg, and at Rouen. That at Bâle consisted of thirty-nine groups, in the first three of which appear a Pope, an Emperor, and a King. These were portraits of Pope Felix V., the Emperor Sigismund, and King Albert II., of Rome, all of whom were present at the Council, by whose order, as we have seen, the Dance was painted. The last group of this Dance shows the seizure of the painter's child by Death. It having been almost destroyed by time, the wall on which it was painted was torn down about a hundred years ago; but engravings had been made of it in the latter part of

the seventeenth century. The Dance at Strasbourg, like that at Bâle, and many others, was on the wall of a Dominican convent. It was painted in arched compartments, and is peculiar in that its groups consist of many figures, among whom Death intrudes, and carries off one, generally the principal personage of the company. It was painted about 1450, and probably by the eminent German painter, Martin Schongauer; but having been utterly neglected and forgotten, it was finally plastered over, no one knows when. In repairing the church in 1824, it was accidentally discovered, and carefully exposed; but it was so much injured that it fell into decay soon after drawings had been made from it.

The Dance at Rouen was in the still existing Cemetery of St. Maclou, and was not a painting, but a sculpture. It was not entirely completed until 1526. The cemetery is surrounded by a covered gallery open on the inside, where it was supported by thirty-nine columns, distant about eleven feet from each other. Thirty-one of these still exist; and upon the shaft of all but four of them, on the side facing the court of the cemetery, is sculptured, in high relief, a group of two figures,—one a living personage, and the other the cadaverous body by which Death was represented. On the remainder were sculptured the Christian Virtues and the Fates,—two on each column. The capitals of these columns are decorated with figures quite in another manner. Cupids, naked female figures, grotesque masks, and shapes—human and bestial—are ingeniously substituted for the foliage usually found on that part of a column. The execution of these figures is of quite a high order. They have all been sadly mutilated; but, fortunately, that which has suffered least is a beautiful figure of Eve. Her head is gone; but the flowing lines of the lovely torso are unbroken, and the round and graceful limbs are almost as perfect as when they came from the sculptor's chisel. This figure is so like the Venus de Medici that it might have been copied from it.

But what is Eve doing in a Dance of Death? Alas! she took the first step of that dance in Paradise, and the artists of the olden time did not deprive her of her due precedence. She leads the Dance, but with this difference from those who follow her:—they, cowering and muffled, go off the scene with Death; she, upright in her naked innocence and beauty, brings him on. Poor Eve! she had her punishment and made her atonement to man for leading him to death, in becoming the source and the joy and solace of his life; but it was not for the artists of the Dance of Death to embody this phase of her existence. So essential a part of the Dance is the temptation of Eve, that the whole subject was concentrated into the representation of that event by a German engraver, in this singular manner:—Adam and Eve stand by the Tree of Knowledge, around which twines the serpent, from whom Eve is receiving the apple; but the trunk of the tree is formed by the twisted legs and the ribs of a skeleton, from the head and the outstretched arms of which spring the branches and the foliage. It is worthy of remark, that many painters, the greatest of them (Raphael) at their head, have represented the tempter of Eden as a beautiful woman, whose body terminates in a serpent. It was a mistake on their part to do so. They knew how much of the Devil a woman might have in her, and how irresistible a temptress she is; but they forgot, that, on this occasion, woman, not man, was tempted.

There was a Dance of Death in Old St. Paul's Church, in London,—the one burned down in the Great Fire; and another in the beautiful little parish church of Stratford-on-Avon,—but this, too, has disappeared. It is interesting to know that they were there, and that Shakespeare saw them; for he has woven some of the thoughts that they awakened in his mind into a noble passage in one of his historical plays. We shall recur to it in examining Holbein's Dance.

The Dance was represented, and still

exists, in one very singular place. At Lucerne, in Switzerland, it appears upon a covered bridge, in the triangles formed by the beams which support the roof. The groups, of which there are thirty-six, are double, looking away from each other, and are so arranged, that the passenger, on entering the bridge, has before him a long array of these grotesque and gloomy pictures. The motive for placing the Dance in such a place is unknown, and it is difficult to conjecture what it was. It could hardly have been to enforce the old adage,—Speak well of the bridge that carries you over.

While we have been thus endeavoring to discover the origin of the Dance of Death, what it was, and what it meant, Holbein has been waiting more patiently than he was wont, for us to see who he was, and why the Dance, which was known three hundred years at least before he was born, is now universally spoken of as his.

Hans Holbein, the greatest painter of the German school, came honestly by his talent and his name. He was the son of Hans Holbein, a painter, who was the son of another Hans Holbein, also a painter. The first Hans was a poor painter; the second a good one; and the third so great, that the world, when it speaks their common name, means only him. The father and grandfather were born at Augsburg, in Bavaria, and of late years it has been asserted by mousing antiquaries that the grandson was born there too; but this, perhaps, is not quite certain; and it is much pleasanter to adhere to the ancient faith, and believe that he was born at that strange old Bâle, in sight of that great Dance, the reproduction, or rather recreation, of which was to make so great a part of his fame,—especially as he was quite surely an inhabitant of the town at such tender years, that the veriest Know-Nothing in the place would not have deprived him of his citizenship.

Of Holbein's life we unfortunately know very little. He showed his tal-

ent early, as all the great painters have done. Conscious of his abilities, he devoted himself eagerly to the study of the profession to which his genius urged him. He learned not only painting, but engraving, the sculpture of metals, and architecture; and of all these, it will be remembered, Bâle offered him facilities for study, in examples which must have stimulated both his imagination and his ambition. He did not lack encouragement; for the nobles and burghers of Bâle had begun to acquire a taste for the arts, which their ruder fathers contemned; and they had, at this time, a university in their city, which made them acquainted with Cicero and the orators, of whom Æneas Sylvius found them so ignorant.

But Holbein, although eminent and well employed, did not thrive. He had some Bâlois failings, and, as Æneas Sylvius would have said, worshipped Father Bacchus and Dame Venus with too much devotion;—not that he was a drunkard or a debauchee; but he sought in conviviality with men of talent, and in the company of beautiful women, too happy in the caresses of the great painter, who was generous with his florins, that happiness which he could not find at home. For poor Hans was afflicted with what has been the moral and social ruin of many a better, if not greater man than he,—a froward, shrill-tongued wife. Luckily, however, the great scholar and philosopher, Erasmus, went into retirement at Bâle, in 1521; and he soon recognized the genius of Holbein, and became his admirer and friend. By his advice, and at the solicitation of an English nobleman, and, poor fellow, seeking refuge from the temper of his wife, whom even the sweet cares of maternity could not mollify, Holbein determined to leave Bâle for England. What was the great cause of Frau Holbein's tantrums,—whether Hans's ears were pierced with conjugal clamors, as poor Albert Dürer's, the other great German painter's, were, because he could not supply all his wife's demands for money, to enable her, perhaps, to exhibit herself

at church on holy days in one of those precious pulpits, splendid in velvet and jewels, to the discomfiture of the other painters' wives,—we do not know; but whatever was the cause of her oft-recurring outbreaks, they made him not unwilling to put France and the English Channel between himself and her, his children, and the home of his childhood.

He gave out, at first, that his absence from Bâle would be temporary,—only for the purpose of raising the value of his works, by making them more difficult to obtain. Before he went, he finished and sent home a portrait on which he was engaged. It was one of his best pictures; and the person for whom it was painted, lost for a while in admiration of its beauty, noticed at last that a fly, which had settled upon the forehead, remained there motionless. He stepped up to brush the insect away, and found that it was a part of the picture. This story has, since Holbein's time, been told of many painters,—among others, of Benjamin West. Such a piece of mere imitation should have added nothing to the reputation of a painter of Holbein's powers; but the story was soon told all over Bâle, and orders were given to prevent the loss to the city of so great an artist. But Holbein had quietly gone off, furnished with letters of introduction from Erasmus, who wrote in one of them that in Bâle the arts were chilled; which might well be true of a place where so much ado was made about the painting of a fly.

In England, Holbein found a friend and patron in Sir Thomas More, Henry the Eighth's great Lord Chancellor; and a sight of some of his works won him, ere long, the favor of the King himself. He was appointed Court Painter, with apartments at the palace, and a yearly salary of two hundred florins, (or thirty pounds, equal to about two hundred pounds now,) which he received in addition to the price of his pictures. After about three years of prosperity he went home to his wife and children; but as he soon returned to England, we may safely conclude that his visit was to pro-

vide for the latter, and with no hope of living with the former. Some years after, in 1538, when his fame was still increasing, the city of Bâle, proud of its son, offered him a handsome annuity, in the hope that that might induce him to return to his country, his children, and his wife. But he could not be tempted. Though not the wisest of men, he was Solomon enough to know that "it is better to dwell in a corner of the house-top than with a brawling woman and in a wide house"; and as he was successful and held in honor in England as well as Bâle, he contented himself with a corner of King Henry's palace.

But although he fled from his wife, he painted her portrait; and we need no testimony to warrant the likeness. She is the very type of one of those meek shrews, alternately a martyr and a fury, that drive a man to madness when they speak and to despair when they are silent. We might reasonably wonder that he would paint so vivid a representation of that which he so sedulously shunned. But poor Hans, who probably had some lingering remains of his early love, knew, that, although he should make a speaking likeness, it would be a silent one, and that this Frau Holbein must keep the look which he chose to summon to her face. That, indeed, was knowledge that was power! How he must have chuckled as he saw his wife looking at him more natural than life and yet without the power to worry him! His own portrait shows us a broad, good-natured, ruddy face, in which we see marks of talent when we know that it is Holbein's. But in spite of its strength, its bronze, and its beard, it has a somewhat sad and subdued air; and its heavy-lidded, pensive eyes look deprecatingly at a Frau Holbein in the distance.

While he lived at Greenwich palace, an incident occurred which may not be known to all our readers, and which is a striking illustration of the esteem in which he was held by Henry. It is not a little to the honor of that monarch, who, arbitrary and sensual as he was, had some noble traits of character. One day, as

Holbein was painting a lady's portrait in his private studio, a nobleman intruded upon him rudely. Holbein resented the discourtesy, and, as it was doggedly persisted in, finally threw my lord downstairs. There was an outcry; and the painter, bolting his door on the inside, escaped from his window along the eaves of the roof, and, making his way directly to the King, threw himself before him and begged a pardon, without telling his offence. Henry promised forgiveness on condition of a full confession, which the painter began. But meantime the nobleman arrived, and Henry, in deference to his rank, gave him precedence, and stepped into another apartment to hear his story. He accused Holbein of the violence, but suppressed the provocation; whereat Henry broke into a towering Tudor rage, and, after reproaching the nobleman for his prevarication, said, "You have to do with me, Sir. I tell you, that of seven peasants I could make seven earls like you; but of seven earls I could not make one Holbein. Do not molest him, if you value your head." And as second-hand heads, though plentiful about those days, were found to be of no value, even to the original owner, Holbein remained unmolested.

Holbein is known chiefly by his portraits. He painted some historical and sacred pictures; but though they all bear witness to his genius, it can hardly be denied that they also show that that genius was not suited to such works. Holbein had an objective perception;—that is, his mind received impressions entirely uninfluenced by its own character or condition; and his pictures, therefore, seem like literal transcripts of what was before his eyes. He nowhere shows that he had an idea of abstract beauty, or the power of generalizing from individuals, or that he was at all discontented with the subjects which he painted; so that his works leave an impression of absolute faithfulness. But to suppose, therefore, that his portraits have merely the merit of reproducing the external facts of Nature, like photographs, would do him wrong; for

he was faithful to expression as well as form, and has perpetuated upon his canvas the voluptuous sweetness of Anne Boleyn, the courtliness and manly grace of Wyatt, and the severity, the energy, and the penetrating judgment of Sir Thomas More. His portrait of the last is one of the greatest portraits ever painted. Some competent critics consider it the greatest. It is so real, so human, that we might be well content, if one in twenty of the actual men we meet were half as real and human; and it expresses, with equal strength and subtilty, the large and noble nature of the man. Holbein was a great colorist, and imitated all the rich and tender hues of Nature, in their delicate and almost imperceptible gradations, with a minute truthfulness which is quite marvellous.

This being the character of his mind, it would hardly be supposed that he could produce such a work as the great *Dance of Death*, which has caused all others to be forgotten, except by antiquarians. For this *Dance* is the most remarkable embodiment in Art of that fantastic and grotesque idealism which has found its best expression in the works of German poets and painters; and the pre-eminence of Holbein's over all the other representations of the same subject consists in this,—that, while they are but a dull and formal succession of mere costumed figures seized by a corpse and shrinking away from its touch, Holbein's groups are instinct with life, character, and emotion. In particular is this true of the figure of Death, although it is a mere skeleton,—the face without a muscle, and for the eye but a rayless cavern. Death is not one whom "a limner would love to paint or a lady to look upon"; but Holbein has given a strange and fascinating interest to the figure, which in all other hands is merely repulsive. The grim monarch sat to a painter who not only added to the truthfulness of his portrait the charm of poetic feeling, but the magic touch of whose pencil made his dry bones live.

The insignificance of the material in

which the painter worked, when compared with the effect which he produced, is also remarkable in this unique work of Art. For Holbein's Dance of Death is not, like the others, either a great fresco painting, or a series of sculptures; it is not a painting at all,—but merely a series of very small woodcuts, fifty-three in number, forty-six of which were published at Lyons in 1538, and the whole afterwards at Bale in 1554, under the title, *Simulachres de la Mort, Icones Mortis*: that is, in French and Latin, "Images of Death,"—for the title "Dance of Death" is of recent origin. The leaves on which the cuts are printed make but part of a little book not so large as a child's primer; but a copy of it is now worth ten times its weight in gold. It was copied and republished in numberless editions, as a popular book, merely for the sake of the subject, and the great lesson taught by it,—each print being accompanied by an admonitory stanza, and a quotation from the Bible. Beside these editions, endeavors have been made of later years to imitate it satisfactorily as a work of Art,—but in vain. Great as we think our advancement in the arts has been,—the mechanical part of them, at least,—all the efforts of the lithographer, the wood-cutter, and even the line-engraver, to reproduce the spirit or the very lines of this work, have been but partially successful. There is as much difference between the most carefully-executed and costliest copies and good impressions of the original wood-cuts, made three hundred years ago, and sold for a franc or two, as there is between pinchbeck and gold.

Any attempt to reproduce the effect of those groups in words can hardly fail to fall equally short of the mark; but we will tell our readers what they are, and endeavor to give some notion of their purpose and spirit.

The first shows the Creation of Woman;—we have seen before why she is made thus prominent in the Dance. The composition is crowded with the denizens of the earth, the air, and the water; the sun, the moon, and the stars all appear;

the four winds of heaven issue from the laboring cheeks of figures that impersonate them. The Creator, in the form of an aged man in royal robes, and wearing the imperial crown, lifts Eve bodily from the side of the sleeping Adam.

The second represents the Temptation. Eve reclines upon the ground, and shows Adam the fruit which she has plucked. Adam stands grasping the tree with his left hand, and raises his right to gather for himself. The serpent, who looks down upon Eve, has the face and body of a woman. The forms in this group are fine; Adam's is remarkable for its symmetry and grace; but Eve's face is ignoble. Indeed, Holbein, like Rembrandt, seems to have been incapable of an idea of female beauty.

In the third we see the Expulsion from Paradise; and here the Dance begins. Our guilty parents fly before the flaming sword,—poor Eve cowering, and her hair streaming in a wavy flood upon the wind; and before them, but unseen, Death leaps and curvets to the sound of a vielle or rote,—an old musical stringed instrument,—which he has hung about his neck. His glee, as he leads forth his victims into the valley where his shadow lies, is perceptible in every line of his angular anatomy; his very toes curl up like those of a baby in its merriment.

In the fourth, Adam has begun to till the ground. The pioneer of his race, he is uprooting a huge tree, all unconscious that another figure is laboring at his side. It is not Eve, who sits in the background with her first-born at her breast and her distaff by her side,—but Death, who, with a huge lever in his bony gripe, goes at his work with a fierce energy which puts the efforts of his muscular companion to shame. The people of Holbein's day not only saw in this subject the beginning of that toil which is the lot of humankind, but, as they looked upon the common ancestors of all men, laboring for the means of life, they asked, in the words of an old distich,—

"When Adam delved and Eve span,
Where was then the gentleman?"

The fifth composition seems to represent a general rejoicing over the Triumph of Death. It shows a churchyard and porch filled with skeletons, who blow trumpets of all sorts and sizes; one beats frantically upon a pair of kettle-drums, and another, wearing a woman's night-cap, with a broad frill border, plays the hurdy-gurdy.

In the sixth, a Pope, the highest earthly potentate, is in the act of crowning an Emperor, who kneels to kiss his toe. But the successor of St. Peter does not see, as he sits upon his throne, giving authority and sanction to the ruler of an empire, that a skeleton leans from behind that throne, and grins in his face, and that another in a cardinal's hat mingles with the throng before him.

The seventh is one of the finest of the series. An Emperor is enthroned, with his courtiers round him. He is threatening one with his sword for some act of injustice from which a poor peasant who kneels before him has suffered. But, unseen by all, a skeleton bestrides the shoulders of the monarch and lays his hand upon his very crown. There can be no doubt that Shakspeare had this subject in his mind when he wrote that fine passage in "King Richard the Second,"—

"Within the hollow crown
That rounds the mortal temples of a king
Keeps Death his court; and there the antic
sits,

Scoffing his state and grinning at his pomp;
Allowing him a breath, a little scene
To monarchize, be feared, and kill with looks;
Infusing him with self and vain conceit,
As if this flesh which walls about our life
Were brass impregnable; and humored thus,
Comes at the last, and with a little pin
Bores through his castle wall, and—farewell,
King!"

In the eighth we see a King (it is unmistakably Francis I.) dining under a canopy, and served by a splendid retinue. He stretches out his hand to receive a wine-cup; for he does not see that Death is filling it.

A Cardinal appears in the ninth, selling an indulgence for a heavy bribe; and we all rejoice to see that Death has laid

hands upon his hat,—the symbol of his rank,—and is about to tear it from his head.

In the tenth, an Empress, passing through her palace-yard, attended by her ladies, is led by the favorite on whom she leans, and who she does not see is Death, into an open grave.

Death, in the next, has assumed the guise of a Court Fool, and has seized a Queen at the very gate of her palace. She recognizes him, and struggles, shrieking, to free herself from his grasp; but in vain. With a grin of fierce delight, he lifts up his hour-glass before her, and, in spite of her resistance and that of a gentleman who attends her, is about to bear her off. Every line of this composition is instinct with life.

In the twelfth, Death carries off a Bishop from his flock.

In the thirteenth, an Elector of the Empire, surrounded by his retinue, is approached by a poor woman, who begs his aid in behalf of herself and her child; he repulses her scornfully; for he does not see that Death, the avenger of the oppressed poor, and who is here crowned with oak-leaves, has laid his gripe upon him. Holbein has put such an expression of power into the arm and of wrath into the face of this skeleton, that we expect to see his victim haled off into the air before our very eyes.

The Abbot and the Abbess are the subjects of the next two cuts. In the former, Death has assumed the mitre and the crosier of his victim, and drags him off with such an expression of fun and burlesque pomp as we sometimes see in the face of a mischievous boy who mocks his betters. In the companion group his look is that of a demon; and with his head fantastically dressed, he drags the Abbess off by the scapulary which hangs from her neck.

A Nobleman and a Canon are his prey in the sixteenth and seventeenth groups. We lack space to describe any but the most remarkable with particularity.

The satire of the next three is levelled against the Lawyers, who were held in

such little respect in Bâle. They show a Judge who takes a bribe from a rich to wrong a poor suitor, and a Counsellor and an Advocate who lend their talents to wealthy clients, but turn their backs upon the poor victims of "the oppressor's wrong." In one, a demon is blowing suggestions into the Counsellor's ear from a pair of bellows, which he has doubtless used elsewhere for other purposes; in all, Death stands ready to avenge the poor.

In the twenty-first, a Preacher addresses a Congregation, whose interested attention the painter has portrayed with great skill, knowledge of character, and consequent variety and truth of expression. Behind the Preacher stands Death, and, with a kind of grotesque practical pun, holds the jaw of a skeleton over his head, as far more eloquent than his own.

A Priest and a Mendicant Friar are the subjects of the twenty-second and twenty-third.

The twenty-fourth is of peculiar interest. In it we see a youthful Nun, who, it is clear, has taken her vows too hastily, kneeling before the oratory in her cell. But her heart is not in her devotions; for the lover whom she abandoned has made his way into the apartment, and sits on her bed singing to his lute. Her hands are clasped, not in prayer, but in an agony of love and apprehension. She turns from the crucifix to gaze at him; and we see how the interview will end: for an aged female attendant, in coif and scapulary, leans over to extinguish the candles. We see, too, what its consequence will be; for that attendant is Death.

Among the remaining subjects, which we cannot examine particularly, or in their order, are those of the Old Man and Old Woman led by Death, each to the sound of a dulcimer;—the Physician, to whom in mockery Death himself brings a patient;—the Astronomer, to whom the skeleton offers a skull in place of a celestial globe;—the Miser, from whom Death snatches his hoarded gold; and the Merchant, whom the same inexorable hand tears away from his ships and his

merchandise;—the storm-tossed ship, with Death snapping the mast;—a Count, dressed in the extreme of courtly splendor, who recognizes Death in the disguise of a peasant who has flung down his flail to seize his lordship's emblazoned shield and dash it to pieces;—a Duchess, whom one skeleton drags rudely from her canopied bed, while another scrapes upon a violin;—a Peddler;—a Ploughman, of whose four-horse team Death is the driver;—Gamblers, Drunkards, and Robbers, all interrupted in their wickedness by Death;—a Wagoner, whose wagon, horse, and load have been tumbled in a ruinous heap by a pair of skeletons;—a Blind Beggar, who stumbles over a stony path after Death, who is his deceitful leader, and who turns back with a look of malicious glee to see his bewilderment and suffering;—and a Court Fool, whom Death, playing on bagpipes, and dancing, approaches, and, plucking him by the garment, wins him, with a coaxing leer, to join his pastime.

A few others claim our more particular attention. Among them is a Knight, armed cap-a-pie, who is run through and through, from back to front, by Death, himself half armed in mockery. There is a concentrated vigor in the thrust of the lance, and a cool venom in the countenance of the assailant, that we may seek in vain in the works of famous battle-painters; and it must always be remembered that Holbein's figure is entirely without those indications of muscular movement by which we express our feelings,—in fact, a mere bare-boned skeleton.

A Bride at her wedding-toilet, whom Holbein has contrived to make almost beautiful, receives a robe from one attendant; another clasps round her neck a collar—of gold and jewels? No,—of bones, and with bony fingers. And the next cut to this shows us the Bridegroom and Bride walking through an apartment hung with arras, while before them dances Death, beating a tabor, like a child beside himself with joy.

One of the finest and most touching conceptions in the whole series represents a dilapidated Cottage,—a mere shanty, so wretched that the love of those who live in it is all their happiness,—nay, all their comfort. The mother is preparing for two little children the simplest and poorest of meals, at a fire made of a few small sticks. She finds consolation in the very pranks that hinder her humble task. Death enters,—there is no door to keep him out,—and, seizing the hand of the younger child, who turns and stretches out the other imploringly to his mother, carries him off, remorseless and exulting, leaving her frantic with grief. We may look with comparative indifference, and sometimes even with sympathy, upon his other feats,—but who is there that does not hate that grinning skeleton?—And yet, perhaps, he exults that he has saved one soul, yet pure, from misery and crime.

For vigor of movement the group of Death and the Soldier is preëminent. The field is covered with the wounded and the slain, in the midst of which the soldier encounters his last enemy. The man is armed in panoply, and wields a huge two-handed sword with a vigor unabated by former struggles. Death has caught a shield from the arm of some previous victim; but his only offensive weapon is a huge thigh-bone, which we plainly see will bear down all before it. In the distance another figure of Death flies madly over the hills, beating a drum which summons other soldiers to the field. It is impossible to convey in words the fierce eagerness of this figure, minute as it is, and composed of a few lines.

The forty-seventh composition is one which has puzzled the critics and antiquaries; but it is not easy to conjecture why. It shows us a wretched Beggar, naked, sick, lame,—utterly destitute, miserable, and forsaken,—suffering at once all the ills that flesh is heir to. He sits huddled together on some straw, near a large building, and lifts his hands and face up piteously to heaven. Death is not there; and the antiquaries ask in

wonder, Why is the subject introduced? Why, but to show that to him alone who would gladly welcome Death; Death will not come?

The work ends, as a connected series, with the Last Judgment, where Christ, who conquered Death, appears seated on the bow of promise,—with his feet resting on a celestial sphere, attended by angels, and showing to a throng of those who have risen from the grave the wounds by which he redeemed them from its power.

To this is added an ornamental tail-piece called Death's Arms. It shows a skull in a battered shield, which has for a crest a regal helmet surmounted by an hour-glass and two bony arms grasping a stone. The supporters to the shield are a gentleman and lady richly dressed,—said to represent Holbein and his wife.

It is not known, positively, when Holbein drew these designs upon the blocks (for of course he did not engrave them); and it has even been disputed by one or two eminent antiquarian critics, that he designed them at all. But there does not appear to be a single valid reason for thus diminishing his fame. He probably was engaged on them between 1531, the date of his first return to Bâle, and 1538, when they were published,—the year in which he refused the solicitation of his townsmen to return to the home of his childhood and the bosom of his family.

Holbein continued to live in London until the year 1554, when that city suffered a visitation of the plague, similar to that which was the occasion of the painting of the Great Dance of Death at Bâle. Holbein was struck by the disease; and Death, knowing gratitude as little as remorse, triumphed over him who had blazoned his triumphs. Upon the painter's fame, however, and that of his great work, Death could not lay his hand; but so long as the grim tyrant shall claim his victims, so long will he perpetuate the memory of Hans Holbein.

Though he was a royal favorite, it is not known where he died; and the place where lie the ashes of him who, on a king's word, was greater than seven earls,

is equally unknown; there is not a line or a stone to mark it. So soon after his death as in the reign of Charles I., (within one hundred years,) a nobleman—noble by nature as well as by birth—desirous of erecting a monument to him, sought his grave, but in vain, and was compelled to abandon his design. And thus was Holbein driven to live among strangers, to die without a wife to console or children to mourn him, and to lay his bones in a nameless grave in a foreign land.

Such is an imperfect and brief account of the origin, the various forms, and the meaning of the Dance of Death, and of the life and character of him whose genius has caused it to be called by his name. It may smell too much of mortality and antiquity for this fast-living and forward-looking age; for

it is not only a monument of the past, but an exponent of its spirit. We can look back at it, through the mellowing mist of centuries, with curiosity not unmixed with admiration; but we should turn with aversion from such a work, coming from the hands of an artist of our own day. We think, and with some reason, that we do not need its teachings; for we are freed from the thralldom that gave edge to its democratic satire; and we have learned to look with greater calmness, if not with higher hope, upon the future, to which the grave is but the ever-open portal. But we may yet profit by a thoughtful consideration of the eternal truths embodied by Holbein in his Dance of Death; and in the story of his life there is a lesson for every man, and every woman too, if they will but find it.

LIZZY GRISWOLD'S THANKSGIVING.

"So John a'n't a-comin', Miss Gris'ld," squeaked Polly Mariner, entering the great kitchen, where Mrs. Griswold was paring apples and Lizzy straining squash. "Isn't he?" quietly replied the lady addressed, as the tailoress sat down in the flag-bottomed rocking-chair, and began rocking vehemently, all the time eyeing Lizzy from the depths of her poke-bonnet with patient scrutiny.

"No, he a'n't,—so Mr. Gris'ld says," went on Polly. "You see, I was a-comin' up here from the Centre, so's to see if Sam couldn't wait for his roundabout till arter Thanksgiving; for Keziah Perkins, she 't was my sister's husband's fust wife's darter, 'n' finally married sister's fust husband's son, she's a real likely woman, and she's wrote over from Taunton to ask me to go there to Thanksgiving; 'n' to-day's Monday; 'n' I was a-comin' here Tuesday so's to make Sam's roundabout; 'n' yesterday Miss Luken's boy Simon, he 't a'n't but three year old,

he got my press-board, when he was a-crawlin' round, 'n' laid it right onto the cookin'-stove, and fust thing Miss Lukens know'd it blazed right up, 'n' I can't get another fixed afore Wednesday, and then I'd ought to be to Taunton, 'cause there a'n't no stage runs Thursday, and there hadn't oughter, of course"—

"We have got a press-board," said Mrs. Griswold, quietly.

"Yes, and I a'n't goin' to grandfather's in my old jacket, Miss Poll," interposed Sam, one of the "terrible" children who are scattered here and there through this world. "Catch me where all the folks are, in that old butternut suit!" added Sam.

But here his father stepped in at the door,—a fine, sturdy, handsome farmer, one of New England's model men, whose honesty was a proverb, and whose goodness a reliance to every creature in Greenfield.

"John isn't coming, wife," said Mr.

Griswold, in a steady, sober tone. "He says business will delay him, so that he can only get to Coventry just as we do."

"So you had a letter," said Mrs. Griswold, carefully avoiding a look at Lizzy.

"Yes," said Mr. Griswold, in a very abrupt way.—"Are you ready to go back, Miss Polly? for I've got to go down to the Centre again with a load of wheat."

"Well, yes, I don't know but I be. I ken stay over, if you want help, Miss Gris'd. I'm a-goin' to the minister's to help Miss Fletcher a little mite this afternoon, but I guess she don't lot on it none; 'n' seein' it's you, I ken stay, if you want help."

Lizzy looked quickly across the kitchen at her mother.

"Oh! no, thank you, Miss Polly, I know Mrs. Fletcher would feel very badly to lose your help, and I really don't need it until to-morrow."

"Then I'll come round to the door as quick as I've loaded up," said Mr. Griswold; and Miss Polly settled back in her chair to wait comfortably; a process much intensified by a large piece of Mrs. Griswold's gingerbread and a glass of new cider, both brought her by Lizzy's hospitable hands,—readier even than usual just now, in the vain hope of stopping Polly Mariner's clattering tongue. But neither gingerbread nor cider was a specific to that end: Polly talked while she ate, and ate while she talked. But while she finishes her luncheon, let us make known to the patient reader whom and what the tailoress discusses.

John Boynton was a step-cousin of Lizzy Griswold's. Her youngest aunt had married a widower, with one son, some five years older than Lizzy, and had always lived in the old homestead at Coventry, with her father; while the other daughters and sons, six in number, were scattered over the State, returning once a year, at Thanksgiving, to visit their birthplace, and bring their children into acquaintance with each other. Eben Griswold, who lived at Greenfield, was nearer home than any of the others, and Lizzy, consequently,

oftener at her grandfather's house than her cousins. She and John Boynton were playmates from childhood, and it was not strange that John, who had never known a pleasure unshared by Lizzy, or suffered a pain without her consolation, should grow up in the idea that he could not possibly live without her, an idea also entertained half-consciously by Miss Lizzy, though neither of them ever yet had expressed it; for John was poor, and had no home to offer any woman, much less the petted child of a rich farmer. So Mr. Boynton, Jr., left home to teach school in Roxbury, five years before the date of our story, without making any confidences on the subject of his hopes and fears to Miss Griswold; and she knit him stockings and hemmed pocket-handkerchiefs for him with the most cold-blooded perseverance, and nobody but the yarn and the needles knew whether she dropped any tears on them or not.

Now it had always been John Boynton's custom to give his school Thanksgiving-week as a vacation,—to take the train on Monday for Greenfield, and stay there till Wednesday, when the whole family set off together for Coventry, to spend the next day, according to time-honored precedent.

Whatever John and Lizzy did in those two dull November days, it never has been made known to the present chronicler; it is only understood that no point-blank love-making went on; yet the days always ran away, instead of creeping; and neither of the twain could believe it was Wednesday when Wednesday came. But this year those forty-eight hours were destined to drag past, for John wasn't coming; why, we shall discover,—for Polly Mariner has finished the cider, and the gingerbread is as much subject of inquiry as "The Indians,—where are they?"

"So John Boynton a'n't a-comin'?" Well! Hetty Maria Clapp's jest got home from Bunkertown, that's tew mile from Roxbury, 'n' she told Miss Lucas that Miss Perrit, whose sister's son keeps a grocer's store to Roxbury, told that Mr.

Boynton, their teacher to the 'Cadeny, was waitin' on Miss Roxany Sharp's cousin, a dreadful pretty gal, who'd come down from Boston to see Roxany, an' liked it so well she staid to Roxbury all through October. I do'no's I should ha' remembered it, only 't I hed the dredfullest jumpin' toothache that ever yon did, 'n' Miss Lucas, she'd jest come in to our house, an' she run an' got the lodlum an' was a-puttin' some on't onto some cotton so's to plug the hole, while she was tellin'; 'n' I remember I forgot all about the jumpin' while 't she was talkin', so I ses, ses I, 'Miss Lucas, I guess your talkin's as good as lodlum'; 'n' she bu'st out larfin', 'n' ses she, 'Polly Mariner, I declare for't, you do beat all!' 'Well,' ses I, 'I'd die content, ef I could beat John Boynton; fur ef ever I see a feller payin' attention to a gal, he's been payin' on't to Lizzy Gris'd this four year; and 'ta'n't no wonder 't I think hard on't, for there never was a prettier-behaved gal than her on Greenfield Hill'; an' I ses"—

Lizzy was on the point of "freeing her mind" just at this juncture, when Mrs. Griswold interposed her quiet voice,—

"Don't trouble yourself to defend Lizzy, Miss Mariner; you know John Boynton is her cousin, and he has been here a good deal. Folks will talk, I suppose, always; but if John Boynton marries well, I don't think anybody 'll be more forward to shake hands with him than our Lizzy."

"Of course I shall," said the young lady, with a most indignant toss of her head. "Pray, keep your pity, Miss Polly, for somebody else. I don't need it."

"H'm," sniffed the sagacious Polly. "Well, I didn't suppose you'd allow 't you felt put out about it; and I wouldn't, if I was you. Besides, there's as good fish in the sea as—— I declare for 't! there's Mr. Gris'd! I'll come round early to-morrer. Good-day, all on ye!"

So Polly departed.

"I don't care, if he is!" said Lizzy, flinging herself down on the settle, when the door closed behind Polly's blue cloak.

Mrs. Griswold said nothing, but Sam

looked up from his whittling, and coolly remarked,—

"It looks as if you did, though!"

"Sam!" said his mother, with—emphasis.

Sam whistled, and, with his hands in his pockets, having shut his jack-knife with a click, and kicked his shavings into the fire, muttered something about feeding the pigs, and beat an ignominious retreat,—snubbed, as the race of Adam daily are, and daily will be, let us hope, for telling "the truth, the whole truth, and nothing but the truth."

For Lizzy certainly did look as if she cared. A pretty enough picture she made, too, flung down on the old black settle, one well-shaped hand pinching the arm as if it had been—John Boynton's!—the other as vigorously clenched on a harmless check-apron that showed no disposition to get away; her bright red lips trembling a little, and her gray eyes suspiciously shiny about the lashes, while her soft black hair had fallen from part of its restraints on to the gay calico dress she wore, and her foot beat time to some quick step that she didn't sing!

Mrs. Griswold did not care for the picturesque, just then; she cared much more for Lizzy, and her acute feminine instinct helped her to the right word.

"I don't believe it, dear!" said she; "you'd better finish straining that squash, or Widow Peters won't have her pies for Thursday."

Lizzy went to work,—work is a grand panacea, even for sentimental troubles,—and in doing battle with the obstinate squash,—which was not as well cooked as it might have been,—Lizzy, for the moment, looked quite bright, and forgot John, till her father came in to dinner.

Somebody once said that Mrs. Griswold was "a lesser Providence," and Lizzy thought so now; for scarce were they all seated at dinner, when she remarked, in a very unconcerned and natural way,—

"What keeps John in Roxbury so long, father?"

"He has business in Boston," curtly answered Mr. Griswold.—"Sam, did you

go over to the Corners, yesterday, about those sheep?"

Sam answered, and the conversation went on, but John's name did not enter it, nor did Mr. Griswold offer to show his letter either to mother or Lizzy.

Now the latter lady, not being a perfect woman, had sundry small faults; she was proud, after a certain fashion of her own; slightly sentimental, which is rather a failing than a fault; but her worst trait was a brooding, fault-seeing, persevering tact at making herself miserable, scarce ever equalled. The smallest bit of vantage-ground was enough for a start, and on that foundation Lizzy took but a few hours of suspicion and imagination to build up a whole Castle Doubting. The cause she had to-day was even greater than was necessary; it was peculiar that her father should be so reserved; it was more strange that he so perseveringly withheld John's letter; and certainly he watched Lizzy at her work with unusually tender eyes, that sometimes filled with a sort of mist. All these things heaped up evidence for the poor girl; she brooded over each separate item all night, and added to the sum Polly Mariner's gossip, and looked forward to the day when everybody in Greenfield should say, "Lizzy Griswold's had a disappointment of John Boynton!" Poor, dear, Lizzy! as if that were an unheard-of pang! as if nine-tenths of her accusers were not "disappointed" themselves,—some before, some after marriage,—some in themselves, some in their children, some in their wretched, dreary lives! But there was only one John and only one heart-break present to her vision.

Polly Mariner came to breakfast next day, and pervaded the kitchen like a daily paper. Horrible murders, barn-burnings, failures, deaths, births, marriages, separations, lawsuits, slanders, and petty larcenies outran each other in her glib speech, and her fingers flew as fast on Sam's blue jacket as her tongue clapped above it.

Lizzy's pride kept her up before the old woman; she was in and out and

everywhere, a pretty spot of crimson on either fair cheek, her eyes as sparkling and her step as light as any belle's in a ballroom, and her whole manner so gay and charming that Polly inwardly pronounced John Boynton a mighty fool, if he dodged such a pretty girl as that, and one with "means."

But night came, and Polly went. Lizzy went to bed with a bad headache,—convenient synonyme for aches of soul or body that one does not care to christen! Sleep she certainly did that night, for she dreamed John was married to a rich Boston girl with red hair and a yellow flannel dress, and that Polly Mariner was bridesmaid in the peculiar costume of a blue roundabout and pantaloons! But sleep with such dreams was scarcely a restorer; and Wednesday morning, when Mrs. Griswold asked Lizzy if she had put up her carpet-bag to go to Coventry, she received for answer a flood of tears, and a very earnest petition to be left at home.

"Leave you, Lizzy! Why, grandfather couldn't have Thanksgiving without you! And Uncle Boynton! And Aunt Lizzy is coming up from Stonington with the new baby;—and—John, too! You must go, Lizzy, dear!"

"I can't, mother! I can't!" said the poor girl, sobbing after every word; "please don't ask me. I can't! I've got a headache; oh, dear!" Here a fresh burst of tears followed, as Lizzy buried her head in her mother's lap.

Mrs. Griswold was both grieved and astonished; she sat speechless, stroking the soft hair that swept over her knee, till Lizzy's sobs quieted, and then said,—

"Well, dear, if you're set on staying at home, I won't oppose it, if your father thinks best; but I must ask him; only what will you do, Lizzy, here alone all night?"

"Chloe and Peter will be here, mother; and I'll make Chloe sleep in Sam's room, and leave the door open; and when they go down to Dinah's, I'll lock up, and I shan't feel afraid in broad day."

Mrs. Griswold shook her head doubt-

fully. "I'll see what father says," said she. So Lizzy lifted her head, and smoothed her hair, while her mother went out to the barn to consult "father."

Here she was, if anything, more puzzled. Mr. Griswold heard the proposal with a rather misty look, as if he didn't see why, and when his wife finished, said, gravely,—

"What is it, Susan? Anybody 't has lived as long as I have knows pretty well that a woman's headache stands for a whole dictionary."

"Why, you see," said Mrs. Griswold, twisting a little lock of hay in her fingers, and faintly blushing, as if the question had been of herself rather than Lizzy, "she—well, the fact is, husband, she's kind 'of riled about John's not coming; you see we haven't been real particular about the children, and so"——

"You needn't spell it, Susan," said Mr. Griswold, with a half smile; "Polly Mariner's tongue helped on, I guess. You let Lizzy stay, if she wants to; 'twon't hurt her; when folks want to sulk, I generally let 'em. She can stay."

He began to whistle "Yankee Doodle" and pitch hay energetically, while "Susan" was within hearing; but how would that dear woman's soul have floundered deeper and deeper in the fog that clouded it now, had she seen her grave husband sit down on one end of the hay-mow and laugh till the tears stood in his keen eyes, and then, drawing his coat-sleeve across the shaggy lashes, say to himself, "Poor child!" and begin his work with fresh strength!

So matters were all arranged. After dinner, the rusty, dusty, old carriage appeared at the door, with the farm-horses harnessed thereto, jingling, and creaking, and snapping, as if oil and use were strange to its dry joints and stiff straps. Mrs. Griswold mounted to the back seat, after kissing Lizzy with hearty regret and tenderness,—her old gray pelisse and green winter bonnet harmonizing with the useful age of her conveyance. "Father," in a sturdy great-coat and buckskin mittens, took the reins; and

Sam, whose blue jacket was at that moment crushing his mother's Sunday cap in a bandbox that sat where Lizzy should have been, clambered over the front wheel, to the great detriment of the despised butternut suit, and, seizing the whip, applied it so suddenly to Tom and Jerry that they started off down the Coventry road at a pace that threatened a solution of continuity to bones and sinews, as well as wood and leather.

Lizzy turned away sadly from the door. Who can say that just at that minute she did not wish she had gone, too? But nobody heard her say so. She went up-stairs to her room, and tried to read, but couldn't attach any ideas to the words; she was half an hour over a page of a very good book, and then flung it upon the bed with an expression of disgust, as if it were the book's fault. Poor authors! toil your fingers off, and spin your brains out! be as wise as Solomon, or witty as Sheridan! your work is vanity and vexation of spirit, unless the reader's brain choose to receive and vivify the hieroglyphs of your ideas; think yourselves successful because a great man praises you, and to-morrow that man is twisted with dyspepsia, or some woman passes him without a smile, and your sparkling sketch, your pathetic poem are declared trash! Such is fame! Of which little homily the moral is,—Write for money! What a thing it is to be worldly-wise! So was not Lizzy; if she had been, she would now be at Coventry, kissed and caressed by grandfather, aunts, uncles, cousins, and—— But we won't anticipate.

Lizzy flung down the book, and went to her closet for another; but it was as good (or as bad) as Bluebeard's closet, for there hung the pretty crimson merino, with delicate lace at the throat and round the short sleeves, in which Miss Lizzy Griswold once intended to electrify Mr. John Boynton this very evening. True it is that short sleeves are not the most sensible things for November; but Lizzy was twenty, and had such round, white arms, that she liked to

wear short sleeves, as any girl would; and who is going to blame her? Not I! A girl doesn't know her privileges who was never just a little vain,—just a little glad to be pretty when John is by. Lizzy looked at the crimson merino, and at the smart slippers on the floor with a shining black bow on each instep. There, too, on a little low table, was a green box; somebody had left it open,—mother, perhaps,—so she saw on its cotton bed a red coral bracelet, that came from Roxbury, or thereabout, last year at this time. Lizzy shut up the box, and went down-stairs to get tea.

Chloe was indignant to think "Miss 'Lisbeth" thought she couldn't get supper without help, and Miss 'Lisbeth was vexed with Chloe for being cross. And then, when supper came, the tea seemed to be very unwilling to be swallowed, and the new bread was full of large lumps that choked a person, and the lamps didn't burn clearly at all,—and —and—when Chloe, still sulky, had cleared the table, Lizzy sat down on a low cricket beside her mother's stuffed rocking-chair, and had as good a cry as ever she had in her life, and felt much better for it.

So she sat there, with her head on the arm of the chair, rather tired with the cry, rather downhearted for want of the supper she hadn't eaten, and making pictures in the fire, when all of a sudden it came into her head to wonder what they were doing at Coventry. There was grandfather, no doubt, in the keeping-room, telling his never-tiring stories of Little Robby, and Old Bose, and the Babes in the Wood; or singing the ever-new ditty of

"Did you ever, ever, ever, ever, ever, ever, ever,"—

and so on, *ad infinitum*, till you got to—

"See a man eat a whale?"

to some half dozen children; while sweet Aunt Lizzy, serenely smiling, rocked the fair little baby that fifteen cousins had kissed for welcome that day; and Uncle Boynton trotted the baby's brother on his knee, inviting him persistently to go to

Boston and buy a penny-cake, greatly to little Eben's aggravation, who would end, Lizzy knew, by crying for the cake, and being sent to bed. Then there were Sam, and Lucy Peters, and Jim Boynton, up to all sorts of mischief in the kitchen,—Susan Boynton and Nelly James cracking nuts and their fingers on the hearth,—father and mother up-stairs in grandmother's room; for grandmother was bed-ridden, but kindly, and good, and humorous, and patient, even in her hopeless bed, and nobody was dearer to the whole family than she. Then, of course, there was a fire in the best parlor, and there were all the older cousins, telling conundrums and stories, and playing grown-up games, and some two, or four, may-be, looking out in couples at the moonshine, from behind the curtains,—Sue James, perhaps, and John. Sue was so pretty!

Lizzy's head bent lower on the arm of the chair; her thoughts travelled back over a great many Thanksgivings,—years ago, when she wore short frocks, and used to go with John to see the turkeys fed, and be so scared when they gobbled and strutted with rage at her scarlet bombazette;—how they used to pick up frozen apples and thaw them in the dish-kettle—how she pounded her thumb, cracking butternuts with a flat-iron, and John kissed it to make it well,—only it didn't! And then how they slid down-hill before church, and sat a long two hours thereafter in the square pew, smelling of "meetin'-seed," and dinted with the kicks of weary boys in new boots; and finally, after the first anthem and the two hymns and the three prayers and the long sermon were over, came home to dinner, where the children had their own table at the end of the grown people's board, and Lizzy always took the head and John the foot,—till, exhausted by the good things they had eaten, and tantalized by the good things they couldn't eat, they crept away to the fire and their picture-books for a quiet hour, winding up the day with all the plays that country and city children alike delight in.

Then came recollections of later days,

when John was a young man, and Lizzy still a little girl,—when long talks banished turkeys and apples and sliding,—when new books or sleigh-rides crowded out the old games,—when the two days of John's yearly visit were half-spent in the leafless, sunny woods, gathering mosses and acorn-cups, delicate fern-leaves, and clusters of fire-moss, and red winter-green berries, for the pretty frames and baskets Lizzy's skilful fingers fabricated,—when he shook hands at coming and going, instead of kissing her;—but it seemed just the same, somehow. Dear me! those days were all gone! John didn't care about her any more! he was in love with a beautiful Boston lady. Why should he care about a homely little country cousin? He would go to live in Boston in a great big house, and he'd be a great man, and people would talk about him, and she should see his name in the papers, but he never would come to Coventry any more! And he'd acted as if he did love her, too!—that was men's way,—heartless things! If John had a good time, what did he care if Lizzy did grow into a gray-haired, puckered-up old maid, like Miss Case, with nobody to love her, or take care of her, or ask about her, or—or—kiss her?—The climax was too much for Lizzy; great big tears ran down on the arm of the stuffed chair, and she would have sobbed out loud, only Chloe opened the door, to put up the tea-things, I suppose, and Lizzy wouldn't cry before her. But, for all that, she didn't hear Chloe come to the fireplace; she only felt her sit down in the big chair, and, simultaneously, a pair of strong arms lifted Miss Lizzy on to John Boynton's knee, and held her there. It wasn't Chloe.

I declare, one gets out of patience with these men! they do astonish a person so sometimes, one doesn't know what to do or say. Lizzy had been thinking to herself, not two minutes ago, with what cool and smiling reserve she should meet John Boynton, how dignified and kindly distant she would be to him,—and now,—well! it was so sudden,—and then, as I said before, these men do get round one

so,—if you happen to love them.—Lizzy forgot, I suppose; at any rate, she wasn't dignified, or reserved, or proper, or anything of the kind, for she just hid her pretty head on his square shoulder, and said, "Oh, John!"—"slowly, and nothing more,"—as Mr. Tennyson remarks about cutting Iphigenia's head off with a sharp knife.

I don't know that John talked much, either. I rather think Lizzy got over the climax that had troubled her a little while ago. Presently, she raised her head and gathered up her hair that had fallen down, and became painfully aware that she had on only a blue calico! John never knew it; he knew somebody had a very sweet face, full of cloudy blushes and sunshiny smiles, and, not being a Pre-Raphaelite, the foreground was of no consequence to him.

So, after a time, Lizzy slipped down to her cricket again, still leaning on the arm—of the chair,—and John expounded to her the excellent reason that had delayed his coming home. He had been offered a large salary to take the head of a public school in Boston, and those two days had been devoted to arranging the affair; he had satisfied the school-committee as to his capacity, and made up his mind on several points of minor importance to them,—but, perhaps, greater to him. Among others, he had found a house, a tiny house, with a little yard behind, and a view of Boston Harbor from the upper windows, all at a reasonable rent, prospect thrown in; this house he had hired, and now—he had come to Greenfield for a housekeeper.

Lizzy suddenly discovered that she was hungry, and invited John into the kitchen to get a piece of pie; but, after all, instead of eating hers while he was eating his, she went up-stairs, brushed out her hair and coiled it up with a coral-topped comb, that came to light, very strangely, just in time,—put on her merino frock, her bracelet, and her slippers,—rolled herself up in shawls and hoods and mittens, and was lifted into John's buggy, to old Chloe's great delight, who held the

lamp, grinning like a lantern herself, and tucking "Mr. John's" fox-skin round his feet, as if he had been ten years old.

So Lizzy Griswold did get to Coventry the night before Thanksgiving, after all; and when Uncle Boynton met her at the door, he called her "my dear daughter." Perhaps, as John had told Lizzy, on the drive over, that her father had heard all about his business and his intentions, in that letter she did not see, the young lady had decided to disinherit him, and adopt Uncle Boynton in his place; rather an unfair proceeding, it is true, since the letter was withheld by John's special request; and, indeed, Lizzy didn't act like a "cruel parient" to her father, when he came, after uncle, to give her a welcome.

They had a merry time at Coventry that Thanksgiving,—even merrier than another smaller assemblage, that took

place at Greenfield about Christmas, when Polly Mariner came over a week beforehand to make Sam a new suit through-out, and Lizzy looked prettier than anybody ever did before, in a fresh white dress, and a white rose, off grandmother's tea-rose-bush, in her hair. It is on record, that she behaved no better than she did that evening when somebody found her crying in a blue calico; for Sam was overheard to say, as Polly hustled him off to bed, that, "if ever he was married, he guessed they wouldn't catch him makin' a fool of himself by kissin' a girl right before the minister!—if he'd have been Lizzy, John Boynton's ears would have sung for one while; but girls were fools!"

So John Boynton got a housekeeper; and Lizzy had more than one Thanksgiving-day in her life, beside the Governor's appointments.

ACHMED AND HIS MARE.

AN old Arabian tale the truth conveys,
That honor's passion avarice outweighs.

.

Brave Achmed owned a mare of wondrous speed;
He prized her much above his wife or creed.

And lest some one should steal that precious mare,
He guarded her with unremitting care.

He tied her every night before his tent;
The fastening-cord then round his pillow went.

When all in slumber lay, the robber crept,
Unloosed the cord, and on the courser leapt.

"Wake up!" he cries,—"'tis I, the thief, who call;
See now if she in flight is chief of all!"

Mount Achmed and his tribe in wrath and shame,
And chase him as a tempest chases flame.

Hot Achmed nearly to the robber came,
When thus he thought :—" My mare will lose her fame.

" If I o'ertake her, she is then outrun ;
But if I reach her not, I am undone.

" Oh, better she were stolen before my face
Than have her vanquished in this desperate race ! "

One secret sign his mare was taught to heed,
Whenever she must try her utmost speed.

He to the robber screamed, " Quick, pinch her ear ! "
The sign she felt with answering love and fear.

As like a level thunderbolt she flew,
All chase was vain, the vexed pursuers knew.

Before this self-betrayal blank surprise
Fills Achmed's comrades, and their wondering cries

Demand, " How shall thy foolish act be named ? "—
" My mare is lost, her glory is not shamed,"

He says : " I knew, that, if her ear he nipped,
The darling prize could never be outstripped."

CHARLES LAMB AND SYDNEY SMITH.

THERE were in Great Britain, soon after the commencement of the present century, three remarkable groups of young men. Distinct schools of thought, like the philosophic schools of Greece, each of the groups was marked by peculiar ideas, tastes, and sympathies. The French Revolution, with its menace of fundamental changes, clashing with sentiments and convictions which ages had rendered habitual and dear, called for an inquiry into great principles and the grounds of things. The Napoleonic age had the terrific formlessness of chaos. Did it premonish the passing away of old things, and herald the birth of a new order and a new social state ? or did the trouble spring from innate madness in the " younger strengths " which were

trying to overthrow the world's kingdoms ? Should venerable Royalty, after howling in the wilderness and storm, be again enthroned ? or should men attempt to realize the fair ideals which the word Republic suggested ? Should religion be supplanted ? should Protestantism be confirmed ? or should, perchance, the crosier of the Old Church be again waved over Europe ? These were the questions that were mooted, and they aroused unwonted activity and vigor of thought as well in literature as in politics.

The old century left in England few celebrated names to take part in the literature of the new. The men who made the poems, romances, dramas, reviews, and criticisms for the first quarter of our century had almost all been in

youth contemporaries of the Reign of Terror, and had been tried in that unparalleled period as by a fiery furnace, while their opinions were in a formative state. Crabbe and Rogers were traditions of the time of Goldsmith and Johnson; Gifford wrote with a virulence and ability which he might have learned in boyhood from Junius; but with these exceptions, English literature fifty years ago was represented by young men.

We mention, as the first group of young thinkers, the founders of the "Edinburgh Review,"—Sydney Smith, Francis Jeffrey, Francis Horner, and Henry Brougham,—whose united ages, when the first number of that review appeared in 1802, made one hundred and seven years. Members of the Whig party, possessing much learning and more vivacity and earnestness, and having among them, if not severally, abundance both of daring and prudence, they startled conservative people, evoked the best efforts of authors by their brilliant castigations, and inaugurated the discussion of measures of reform which it took thirty years to get through Parliament. The critic of the company was Francis Jeffrey, whose happiness it was to live just when he was needed. Without capacity to excel either in the realm of ideas or of facts, he was unrivalled in the power of discovering the relations between the two. He was neither a statesman, philosopher, nor poet; but while the heavens and the earth threatened to rush in confusion together, he was an admirable *cicerone* to the troubled and wandering wits of men. He had no inherent qualities, and, if other people had not existed, would not have been alive himself; his faculty was simply an eye for relations, and his mental life began when some one threw a series of thoughts across his line of vision. He could tell all about those thoughts,—how large each was, what complexion they had, how they stood in order with each other, and how they compared with other thoughts which he remembered having seen before. Such a mind might have achieved success among the technicali-

ties of the law, but nowhere else, had not the "Edinburgh Review" been created. Jeffrey's critical articles have little value when regarded according to their aim and as integral compositions; the arguments which they contain are often insufficient, and the literary judgments wrong. But they are full of the scattered elements of thought. Many of the best ideas of the books and men of which they treat are stated in them with admirable clearness and piquancy, and they are, therefore, pleasant secondary sources of information.

Francis Horner died of consumption in Italy before he was forty years of age, and there is nothing of surpassing brilliancy or power in any of his writings. Yet he made a most extraordinary impression upon his contemporaries. His name is never mentioned by his associates except with unusual respect. Brougham, when he alludes to him, even in a letter, seems to check his pen into soberness, and to be as cautious as if he were speaking on a religious subject. Search through the published correspondence of Jeffrey, Sydney Smith, and Mackintosh, and Horner is found uniformly mentioned, not with peculiar affection or kindness, not with any intention of doing him honor, but as a man whose qualities were quite superior to those of other men, and whose destiny it was to be the first statesman of his country. Lord Cockburn, who was a school-mate of Horner, relates that the latter was at one time selected by his class to present a book to the master, and adds: "As he stepped forward at the close of a recitation, and delivered the short Latin presentation-address, I thought him to be a god." This fascination is hard to be explained. The great seriousness of Horner's character may in part account for it. He could not bear trifling on important subjects, and could not help frowning on all jests which were not more wise than witty. The calm determination, the unvarying earnestness of his character, may aid in explaining it. From a boy, he never swerved from great

purposes, pursued the most useful though difficult knowledge, and cultivated with equal zeal the ornaments of taste and those recondite historical and statistical studies which are the roots of political science. He was as far from being flighty as Immanuel Kant. Everything that he did was marked both by temperance and sagacity. Philosophically speaking, a personality, any personal being, is undoubtedly the most mysterious thing in the universe. How abstract ideas come together to grow and bloom in a young bosom is wholly past the comprehension of philosophy. As personality in the abstract fascinates a philosopher by its mystery, so a personality of uncommon purity, intensity, and completeness fascinates all men, and thus, perhaps, is explained the high estimation in which Horner was held. He was regarded by those who knew him, as Pythagoras was by his disciples, with the deference commanded by a superior person.

The indefatigable character of Lord Brougham, the only survivor of this group, cannot yet be sketched in a paragraph. To Sydney Smith we shall presently return.

The second group of young men was formed fifteen years later. They were the antagonists of the Edinburgh reviewers, the authors of the "*Noctes Ambrosianæ*," the main support of "*Blackwood's Magazine*," almost from its beginning. Their names were John Wilson, J. G. Lockhart, James Hogg, and, for a time, William Maginn. These were very high, as well as, excepting Hogg, very young Tories. It would be an apotheosis of loyalty to say that they were also eminently religious, though they drank many bumpers to their religion. When they meet in the third of the "*Noctes*" and have taken their places at the table, North proposes: "A bumper! The King! God bless him!" and three times three are given. Then Tickler proposes: "A bumper! The Kirk of Scotland!" and the rounds of cheers are repeated. These indispensable ceremonies being over, the Blackwood council proceeds to discuss

men and things over nectar and ambrosia.

Wilson was the centre and best representative of this group. At Oxford, he had been so democratic that he blacked his own boots on principle. On leaving Oxford, he had roamed for a time as a wild man in a band of gypsies. He next took a cottage in the lake district in the North of England, where he associated with Wordsworth, and occupied himself alternately with desperate gymnastic exercises and composing slight descriptive poems. Even after connecting himself with the magazine and becoming the symposiarch of the "*Noctes*," and perhaps the greatest Tory in all broad Scotland, he did not renounce his home among the lakes. He was a lover of scenery, and an enthusiast and master in manly sports. He is said to have fished in every trout-brook north of the Clyde, and he wandered every season over the Highlands. In his sportsman's accomplishments he took a truly English pride, and made fun of the Edinburgh Whigs by representing a company of them as getting by chance into the same room with himself and his associates, and then, pipes and tobacco being brought, as being fairly smoked out, sickened, and obliged to retreat by the superior smoking capacities of the Tories. He ridiculed Leigh Hunt for fancying in one of his poems that he should like a splendid life on a great estate, when (as Wilson says) he couldn't even ride without being thrown. Yet, of all the men of this time, there was probably no one who had wider sympathies or more delightful prejudices than Professor Wilson, or who made more sagacious reflections. The centre of a literary clique, he loved to associate with all the other cliques, and was one of the first to recognize and proclaim the great merits of Wordsworth.

The third group was larger than either of the preceding, retained its *esprit de corps* longer, and may be most conveniently defined as the associates of Charles Lamb. Beside Lamb, there were Coleridge, Southey, Lovel, Dyer, Lloyd, and

Wordsworth, among the earlier members of it,—and Hazlitt, Talfourd, Godwin, De Quincy, Bernard Barton, Procter, Leigh Hunt, Cary, and Hood, among the later. This group, unlike the others, did not make politics, but literature, its leading object. It was composed of literary men,—a title of doubtful import, but which certainly in civilized society will always designate a class. Political life has more of outward importance, religious life is holier, but literary life is the most humane of all the avocations. It is to the professions what pastoral occupations are to the trades. Politics and religion both have something to do with institutions. A mechanical man can play a part in them not very well, but passably well. But the literary man is sheer humanity, with nothing to help him but his thoughtfulness and sensibility. He is the unfelled tree, not the timber framed into the ship of state or carved into ecclesiastic grace. He lives as Nature lives, putting on the splendor of green when the air is sunny, and of crystal when the blasts sweep by; and while his roots reach down into the earth, there rises nothing above him but the heavens. Past experience shows that he may be harsh, prejudiced, and unhappy; but it shows also that the richest human juices are within him, and that not only the most peculiar and most sensitive, but also the most highly-endowed characters are named in the list of authors. The central and most admirable figure in this particular group of literary men is Charles Lamb; and as each of the other groups clustered around an organ, so at a later period Lamb and his associates supported the "London Magazine," in which the "Essays of Elia" first appeared.

If it be asked what gave that strong coherence to these associates which constituted them groups, a wise man would answer,—congeniality of character. A wiser man, however, would not overlook the element of *suppers*. The "Edinburgh Review" seems to have been first suggested over a quiet bottle of wine; and at a later day the Edinburgh review-

ers, increased in number by the accession of Mackintosh and one or two others, formed an honored clique by themselves in the splendid society of Holland House. The "Noctes Ambrosianæ" is the enduring monument of the way in which the Blackwood men passed their nights, and not the less so from the fact that they were for the most part written out by Wilson in sober solitude. Charles Lamb began his career of suppers with Coleridge, as the latter came up to London from the University to visit him, and the famous Wednesday-evening parties given by him and his sister Mary would occupy a large space in the literary history of this epoch. It is a true proverb, that people are but distant acquaintances till they have eaten salt together.

The sketches which we have thus given will indicate the leading tendencies that were operating in English literature, though the groups themselves did not include all the eminent literary men. Campbell, Shelley, and Byron were single lights, and did not form constellations,—unless, perhaps, Shelley and Byron may be regarded as a wayward and quickly-disappearing Gemini. Sir Walter Scott, and, in their later years, Southey, Wordsworth, and Coleridge, were of a cosmopolitan character, and served as links between different parties. And it may be added, that diplomatic relations and frequent intercommunication existed between all the groups.

Passing from the general schedule to the characters and careers of Charles Lamb and Sydney Smith, it will be our aim to show how these two most witty men were also intensely serious and dutiful,—how they were both disciplined by a great sorrow, and obedient to a noble purpose,—and thus to relieve wit from the charge of having any natural alliance with frivolity.

A thorn, it needs not a sage to say, vexes the side of every human being. Poetry laments the inadequacy of men to their ideals, philosophy declares an error in the figures which sum up life, religion reveals the fall of the race. The thorn

is known which pierced the matchless joyousness of Charles Lamb. His family, highly gifted with wit, tenderness of feeling, and mutual love, had a tinge of madness in the blood. At twenty years of age he was himself shut up six weeks in a madhouse, his imagination in a vagary. He was not again affected; but the poison had sunk deeper into the veins of his sister. The shadow of a deed done in the dark ever pursued her. Charles devoted his life to her whose life was an intermittent madness, yet who, in her months of sanity, was a worthy sister of such a brother. His kindness to her knew no bounds. It was strange that she had premonition of the recurring fits of her disorder; and when the ghost of unreason beckoned, Charles took her by the hand and led her to the appointed home. Charles Lloyd relates, that, at dusk one evening, he met them crossing the field together on their melancholy way toward the asylum, both of them in tears. In the smiles of Charles Lamb, and they were many, his friends always remarked a prevailing expression of sadness. The "fair-haired maid," who had been the theme of his first poetizing, appears not again in his verses or in his life. He and Mary lived together, received evening visitors together, went to the theatre and picture-gallery together, visited the lakes and the poets together; and if he was ever seen in public without her, his friends knew there could be but one reason for it, and did not ask. When he left the India House, he had reserved from his income a considerable sum for her support; though the liberality of his employers, as it proved, rendered this precaution unnecessary. She was his partner in writing the Shakspearian tales, and he always affirmed that hers were better done than his own. To her he dedicated the first poems that he published; and she, too, was a poetess, excellent in her simple way. Thus was Charles Lamb's life saddened by a great affliction ever impending over it, and sanctified by a great duty which he never for a moment forgot.

It was his good-fortune, while at school at Christ's Hospital, to become acquainted with Samuel Taylor Coleridge. A timid boy, creeping around among his boisterous companions like a little monk, it was that soaring spirit which first taught him to look up. Two men whose intellects more strongly contrasted could not be found. Coleridge suffered throughout life from over-much speculation. Could he have had his eye less upon the heavens and more upon the earth, could he have been concentrated upon some human duty, he would have been a much wiser and better man. Even in his youth he was the rhapsodist of old philosophies, had resolved social life into its elements, and dreamed of putting it together again to suit himself on the banks of the Susquehannah. Though Lamb wondered at the speculations of Coleridge, and, loving him, loved the metaphysics which were a part of him, yet it was without changing his own essentially opposite disposition. Lamb clung to the earth. He cultivated the excellency of this life. He was concrete, and hugged the world as he did his sister. He reverently followed the discourses of Coleridge, admiring, perhaps, "the beauty of the words, but not the words themselves"; but when the Opium-Eater also began to take speculative flights before Lamb, the latter stopped him at once by jangling his metaphysics into jokes. It was in conversation with Coleridge, begun at school and continued afterward at frequent meetings, that Lamb first ventured to try his own powers and was prompted to literary activity. But for a slight defect in his speech, he would probably have followed Coleridge to the University with the intention of going into the Church. A delightful clergyman he would have been, if he had duly undertaken the office, and one would have walked far to see him in the priestly robe, to hear him chant the service, to receive pastoral advice from him; yet we fear the "Essays of Elia" would have been less admirable than now. He was roused by Coleridge; and though he could not put the aureole of the latter about

his own head, he began to do the best he could in his own way.

Life is a play between accident and purpose. Why was it, that, of all the books in the world, Charles Lamb should have fixed his affections chiefly on the old English dramatists? He might have turned to old Greece, admired the fruits of the classic ages, and become one of those sparkling artistic Hellenists that are occasionally seen in modern times. He might have turned to the mediæval period. He had an eye for cloisters and nuns. His fancy would have been struck with the grotesqueness of many of the ideas and institutions of those times. He would have got on finely with Gurth the swineherd and Burgundy the tusk-toothed, and one of his masterly witticisms would have upset Duns Scotus. Perhaps, of all the mediæval characters, he would have been most smitten with the court fool, and, if he could have been seated at a princely table of the twelfth century, the bowl surely would not have been round many times before he and the fool would have had a few passes at each other. There was enough in the Middle Ages to have fascinated him; and could he, like some romantic Novalis, have once penetrated thither, and tasted the fruit, he would have found it a lotus, and would have wished never to depart. His soul would have clung to church architecture,—under which term may be included all the religious, political, poetical, moral, and practical life of the Middle Ages. The accident in the case, however, was, that his uncle's library did not contain the Greeks, nor the Middle Ages, but did contain the old English authors. These he mastered; and out of these he created his ideals. In the affluent vigor of the Elizabethan age, in the buoyant *négligé* of the times of merry Charles, he found people that he liked. To every reflective and slightly scholastic mind, there is a charm in looking at things in the distance. The perspective fits the eye. This may have helped the enthusiasm with which he looked upon the writers and heroes of the old English literature; but its prin-

cipal cause was their open-heartedness, their informality, their stout and free humanity underneath laces and uniform.

Having thus found his place in literature, he began also to be rich in friends, and his life was devoted every moment to thought and affection. The time that he passed at the desk of the India House was time in which he did not live; or perhaps, while he autographed the mercantile books, there was a higher half-conscious life of the fancy which lightly flitted round and round the steady course of his pen. He thus exults, after his emancipation from his clerkship upon a pension:—"I came home FOREVER on Tuesday in last week. The incomprehensibility of my condition overwhelmed me. It was like passing from life into eternity. Every year to be as long as three; that is, to have three times as much time that is real time—time that is my own—in it. I wandered about thinking I was happy, but feeling I was not. But the tumultuousness is passing off, and I begin to understand the nature of the gift." For this one-third of his waking time, to have and to hold unhampered by any dependence, he had most willingly consigned the rest to drudgery. The value which he set upon it appears from the following answer which he made to Bernard Barton, who thought of abandoning his place in a bank and of relying upon literary labor for support:—"Throw yourself on the world without any rational plan of support beyond what the chance employ of booksellers would afford you! Throw yourself, rather, my dear Sir, from the steep Tarpeian rock, slap-dash, headlong, upon iron spikes. If you have but five consolatory minutes between the desk and the bed, make much of them, and live a century in them, rather than turn slave to the booksellers. Hitherto you have been at arm's length from them,—come not within their grasp. I have known many authors want for bread,—some repining, others enjoying the blessed security of a counting-house, all agreeing that they would rather have been tailors, weavers,—what not?—rath-

er than the things they were. I have known some starved, some go mad, one dear friend literally dying in a mad-house. Oh! you know not—may you never know!—the miseries of subsisting by authorship.” Thus he esteemed of priceless worth honestly-earned independent time for the pursuits that were dearest to him.

His literary and social avocations were so intimately blended that they seem to have been almost the same. He was as thoughtful in his evening parties as he was in the act of composition, and as gentle and kindly in writing as he was to his friends. He gathered about him not many of the most famous, but many of the most original and peculiar men of his time. His Wednesday-evening parties were assemblies of thinkers. They were composed in large part of men who were not balanced by a profession, who were devoted only to wit, fancy, or speculation, who cultivated each a peculiar field and cherished each peculiar tastes and opinions, who were interested in different quarters of the heavens, and yet who came together, prompted by the spirit of sociality and kindness, to lay perhaps the backs of their heads together, and to talk always sincerely and wisely, but in the form of sense or nonsense, as the case might be. Lamb and his sister were always ready to appreciate every variety of goodness, and doubtless their guests received an order something like that which was addressed to the dwellers in Thomson’s enchanting castle:—

“Ye sons of Indolence! do what you will,
And wander where you list, through hall or glade;
Be no man’s pleasure for another stayed;
Let each as likes him best his hours employ,
And cursed be he who minds his neighbor’s trade!”

To these parties sometimes came Coleridge, who in conversation seems to have been a happy mixture of a German philosopher and an Italian *improvvisatore*. Here Hazlitt learned to utter the philosophic criticisms which he most passionately believed in; and Lloyd, whose in-

tellect was one of peculiar refinement, discoursed modestly of metaphysical problems, analyzing to an extent that Talfourd says was positively painful. Here the social reformer Leigh Hunt came, and for the moment forgot that social reforms were needed. Here the Opium-Eater came, and his cloudy abstract loves and hates and visions were exploded by the sparks of Elia’s wit. Here the philosopher Godwin developed philosophy out of whist. Here the pensive face of the Quaker poet, Bernard Barton, shed a mild light upon the scene; and here the lawyer Thomas Noon Talfourd came to admire the finest characters that he knew of.

Having thus noticed the painful experience and unflinching devotion to noble aims which marked the career of Charles Lamb, we leave him with his friends, and pass to notice the same elements in the life of his brother wit.

Sydney Smith preferred the legal profession, and esteemed himself a victim in entering the Church. His practical wisdom informed him, that, from the beginning even until then, qualities like his had not found a happy sphere of action in the pulpit, but, on the contrary, had rusted or grown ugly in it. He had as much sentiment as Sterne, and perhaps as much political sagacity as Swift, yet the finest instincts within him recoiled from following in the path of either the one or the other. With a subtle and exuberant wit,—he knew that wit touches not sacred things. With great practical prudence and a brilliant speculative capacity,—in a clergyman, prudence is less than faith, and brilliancy of thought than the glow of the heart. In his rich composite character he had, indeed, the qualities which make the clergyman; his disposition was religious, his heart was tender and Christian, he could give the best advice to the people; and though his appearance was not quite saint-like, it was at least suggestive of a good man who was walking in the way which he pointed out to others. But these qualities were not those with which he was most highly en-

dowed. Energy and sterling common-sense, which he had inherited from his father, an elastic, mercurial, and passionate nature, which had come to him from his Huguenot mother,—these were the strong points in his character, and it belongs to neither of them to take the lead in the Church. Sydney had scanned the whole field. Having questioned well his desires, examined well his blood, derived what wisdom he could from history and observation, he deliberately chose the law. Why, then, did he take to theology? We read that his father had incurred so much expense in educating his eldest son for the legal profession, and in fitting out two others for India, that he could not well furnish the means for Sydney's education, and strongly recommended him to go into the Church; and that the son sacrificed his own to his father's inclination.

We may imagine Sydney Smith's reflections. With his versatile talent, honorable ambition, and consciousness that he could have made a shining name in political life, his object now was to find a sufficient sphere for the exercise of all his powers in the Church. It was no fault of his that he was unwilling to settle as curate and have no aim beyond his parish except to go to heaven at last. With his superfluity of human nature, for him to become a saint was out of the question. What then? Should he enter the realm of dogmatics, and become a learned and redoubted champion of the faith, passing his life amid exegesis? Should he renounce thorough thinking, and become a polished and popular pastor, an ornament of the pulpit and of society? Should he signalize himself for gravity, orthodoxy, and ability, seek the earthly prizes of his profession, and perhaps become Archbishop of Canterbury? Should he become a jolly, vinous, and Friar-Tuck sort of clergyman? God forbid! he said to each of these queries, and rushed forward into his profession. Regarding himself as a lamb for the slaughter, yet tremendously in earnest not to be sacrificed, he went into the Church groping and fearing, but resolute.

Trembling lest he should not do his duty both to himself and to his sacred office, he yet determined to try. Thus the thorn which troubled Sydney Smith was not an affliction, but was what he regarded as a danger; and, though less patent and pointed than that in the life of Charles Lamb, probably had not less influence in the discipline of character.

Behold, then, the long and venerable line of the clergy opening to receive him, and behold him entering it! The clergy, the priesthood, the holy fathers, the strong bishops, the monks, the ghostly race, the retired enthusiasts, now melancholy, now rapt, now merry-making, the consolers of sorrow, the divine heroes in an earthly life,—even one of this family does Sydney propose to be. At the age of twenty-four he becomes curate in the little hamlet of Salisbury Plain,—the young graduate of Oxford sent into the country to be pastor to the inmates of half-a-dozen hovels! Then he writes his description of a curate:—"The poor working man of God,—a learned man in a hovel, good and patient,—a comforter and a teacher,—the first and purest pauper of the hamlet; yet showing that in the midst of worldly misery he has the heart of a gentleman, the spirit of a Christian, and the kindness of a pastor." He regards himself as almost excluded from his kind, and quotes (or originates) the proverb, that there are three sexes, men, women, and clergymen. He took long solitary walks over the plains of Salisbury, reflecting upon the manifold activities of the world, in which he had no part. The only society that he had was during the occasional visits of the squire to the neighborhood, who, surprised to find the curate so interesting a person, gave him frequent invitations to dinner. Thus passed two years, when the squire consigned his son to the curate to be educated, and Sydney Smith, starting with the young man for the Continent, was driven by stress of war to Edinburgh.

There he met Horner, Jeffrey, Brougham, and others, young thinkers and full of matter,—Horner the philosopher, Jef-

frey the critic, Brougham the statesman, and Sydney Smith the divine,—and the divine was unsurpassed by any of the others in wit, energy, or decision of character. While the events with which the times were rife were striking fire in all their brains, it was the divine who first turned their thoughts to account by suggesting that they should start a review. The suggestion was acted upon, and under his editorial care the first numbers of the “Edinburgh Review” appeared. His prudence and remonstrances saved it from manifold excesses; for Jeffrey was not a man to be moderate in times like those. The brilliant critic received not a few such lectures as the following:—“I certainly, my dear Jeffrey, in conjunction with the Knight of the Shaggy Eyebrows [Horner], do protest against your increasing and unprofitable skepticism. I exhort you to restrain the violent tendency of your nature for analysis, and to cultivate synthetical propensities. What is virtue? What’s the use of truth? What’s the use of honor? What’s a guinea but a d—d yellow circle? The whole effort of your mind is to destroy. Because others build slightly and eagerly, you employ yourself in kicking down their houses, and contract a sort of aversion for the more honorable, useful, and difficult task of building well yourself.” It was the boast of Sydney Smith in old age that he had very little to change in the opinions which he had at various times advanced,—that he had seen every important measure which he had advocated passed and become recognized as beneficent. The variety of the review suited the versatility of his talent; the problem, What worthy thing shall I employ myself in doing? was solved; and an ample public career was opened to him. When, after five years, he passes from Edinburgh to London, he is not only a poor clergyman, but a famous Edinburgh reviewer. He becomes popular in society and as a preacher, and delivers lectures on Moral Philosophy to crowded houses of the *élite* of the metropolis.

When he is again exiled as a curate,

his solitude is not unbroken, but he receives and returns the visits of the most eminent people. His neighbors ran to him one day, shortly after his arrival, exclaiming,—“Please your honor, a coach! a coach! a coach!” Sydney saw in the distance the equipage of Lord Holland, and challenged the admiration of his parishioners by boldly answering,—“Well, my good friends, *stand firm*; never mind, even if there should be a coach; it will do us no harm;—let us see.” A simple pastor and an eminent man, with flashing energy he approves himself a good man. Sunday he preached, Monday he doctored the sick, Tuesday Sir James Mackintosh visited him for a week, Wednesday he read Ariosto, Thursday he began an article, Friday he reviewed his patients, Saturday he repaired his barn. Now he is laying down a rule that no day shall pass in which he will not make somebody happy; now he is fixing a bar whereon it shall be convenient for his cows to scrape their backs; now he is watching by the side of his sleeping baby, with a rattle in hand to wake the young spirit into joyousness the moment its sleep breaks. He goes through the parish as doctor, wit, and priest, guide, philosopher, and friend, studying the temper and needs of the simple congregation to which he preaches on Sunday, while his brain is racking with great thoughts. With these higher thoughts he has to do as he sits at his desk and writes an article for the larger parish of the United Kingdom. With a wild play of wit and fancy and laughter he graces the sturdy column of his virtue and fidelity. He lived in what was said to be the ugliest and most comfortable house in England, admired by every visitor for his independence, manliness, refinement, and liveliness. When he visited London, as he often did, and when in later years he lived there and was *lionné*, his simplicity of character remained. To the last he was one of the sincerest and most active of clergymen and of men.

It is probable that there were not living

at the time two more serious men than the two wits whose careers we have outlined. Indeed, it is quite a mistake to suppose that wit has anything to do with temper or sentiment at all. A man may be perpetually sulky, and yet habitually witty,—may smile, and smile, and smile, and yet be a most melancholy individual. Wit is simply a form of thought, and is as intellectual as scientific study. It differs from other thought only in being a little *outré*,—a little in excess; it overdoes the thing only because it has so much energy in it. It is what Charles Lamb said a pun was,—“a sole digest of wisdom.” All great thoughts are at first witty, and afterward come to be common and flat. When Pythagoras discovered the theorem of the squares erected on the sides of a right-angled triangle, it had the effect on him of a most preposterous joke. The apple dropping on the head of Newton struck him like a very far-fetched pun. Show a child the picture of a wild Tartar, and his first motion will be to laugh at it. We have seen a man while reading Kant, the driest of metaphysicians, slap his knee, leap upon his feet, and swear, in exuberance of mirth, that Kant had said a good thing. If it were discovered to-morrow to be a scientific truth that this world is wrong side out, and if inventive genius should discover a way to put the other side out, we should all of us think it a funny thing, but our transversed descendants would regard the matter as a commonplace. New proposals in the arts, and new discoveries in the sciences are always at first laughed at. Thus wit is only thought that is beyond the present capacity of the listeners, thought of whose meaning they can catch only a glimpse; it is the forerunner of what our very stupid race, which is always a little behind the times, is wont to call wisdom. If the race should ever become completely sage, nothing less than a joke would ever be uttered.

The likenesses of Charles Lamb and Sydney Smith make them both very severe-looking men. Like marble, which in costume takes the appearance of the

finest lace, so that it seems as if it would yield to the touch of a finger, their delicate fancies and sentiments were but the surface of a solid and thorough character.

They lived in different spheres, corresponding to the difference in their genius. Sydney Smith had the more versatile and fruitful mind. With restless energy he supported various characters, being equally famous as a wit, Whig, Edinburgh reviewer, eloquent preacher, brilliant man of society, and canon of Saint Paul's. His biographer well describes him as a rough rider of subjects, and with surpassing good sense he overran every problem with which the public mind was occupied. He was a reformer, but it was after the English and not the French fashion. He had unbounded respect for existing human blessings, believed in things substantially as they were, and couldn't have been persuaded to try an experiment that had much of hazard in it. A Frenchman is always at home amid earthquakes and volcanoes and hurricanes, and the immediate prospect of an end to everything that is and a beginning of something the like of which never has been. The spirit of the great French Revolution was to exterminate all the results of time up to that point, and, having made a clear field, to begin over again. Hence heads went off, religion was proscribed, thrones were burned, the calendar was changed; even the heavenly bodies should no longer bear down their freight of old associations, and Orion received the name of Napoleon. Could the earth have in any way been transformed, could grass possibly have been made blue and the heavens green, or could man have been done over into any other sort of animal, there is not the slightest doubt that those Frenchmen would have undertaken it. In comparison with such men, Sydney Smith sank into insignificance as a reformer. He lived under a religion, government, and system of manners, all of which he was desirous to retain. He did not wish for his children any institutions very much more comfortable than

England offered at the moment. He regarded the advantages of life with great complacency, thinking, doubtless, that men had better opportunities than they availed themselves of; and the chief intensity of his purpose was not to make better opportunities, but to improve them better. He probably did not approve of all the men and customs that he saw, was decidedly opposed both to wickedness and stupidity; but he did not propose, like a Frenchman, at the first fault, to blot out the heavens and the earth. He demonstrated in his life how genial, under existing institutions, a clergyman could be, how discreet a young enthusiast could be, how widely active a curate could be, how acceptable in society an honest man could be, how brilliant a plain Englishman could be. A great reformer he was, — but the spirit of his reform consisted chiefly, not in changing, but in making better use of the blessings which we already possess. Compared with this prevailing spirit of personal reform, the reformatory public measures which he was prominent in advocating were of slight consequence. Merry on the surface, with an iron core of stubborn resolution within, he equally delighted his most homely and his most elegant friends, and while he sympathized with humble life, he had a profound respect for the technically best society.

Charles Lamb lived within a narrower and peculiar range. With more of concentration, he had a less abounding energy than Sydney Smith. His character was an odd and elegant miniature, while that of Sydney Smith was voluminous. He loved a particular sort of men, and that sort was honest men; while the merry divine could deal with politicians and even with Talleyrand himself. Sydney was playing a part in the Whig party, among the advocates of reforms; the sympathies of Elia went for the reform of the United Kingdom, and of the universe, too, if possible, — but he was more interested in a profound thought, brought forth from the struggling breast of Hazlitt, than in any bill introduced into Parlia-

ment. He was occupied with his old books, his sincere friends, his beloved sister. He cared little for the *beau monde*, would rather not look upon a duke or a duchess without a grating between; but, turning from the current into an eddy, content with the many thoughtful and original persons whom he had about him, he delighted to fish for the shyest tenants of the stream and to dive for strange pearls. He loved remote thoughts, quaint expressions, fantastic ideas. He especially attached himself to any violent symptoms of human nature. Being in a picture-gallery, he observed a stout sailor in towering disgust at one of the old masters, spit his tobacco-juice at it, and swear, with an expletive, that he could do better himself. The honest opinion honestly expressed, the truth and vigor of the man, delighted Lamb, and he rushed up to him to shake hands. Whenever the sailor, after that, wrote to his friends in London, he wished to be particularly remembered to Mr. Charles Lamb, who wouldn't be humbugged about that old painting.

It was this strong sympathy with human character which made Elia rather a contemner of the worship of Nature. He liked things that were as definite as the works of men, and found great difficulty in sympathizing with a landscape. There was nothing on Fleet Street for which he did not feel a personal attachment; all the hurry and majestic order of a great city, all the little by-ways and hedges of city life, the wealth, the poverty, the splendor, the rags, the men and women, all acting under the stern discipline of an immense society, the boys, the beggars, the chimney-sweeps, the hilarious and the sorrowful, the fine ladies and noble lords, were all duly appreciated by him. If he had been taken up to the pinnacle of a mountain, instead of entertaining one of Wordsworth's sublime contemplations, he would have been very likely to flap his arms and crow like chanticleer. Indeed, in middle age he was accustomed to boast that he had never seen a mountain. Born in London, and always re-

siding in London till the last years of his life, esteeming man the crown and purpose of the universe, he was much inclined to regard the love of Nature, which figures so largely in modern literature, as a popular delusion. He would have sympathized with the French philosopher who, after accompanying a young lady to the Highlands of Scotland, surprised her raptures by saying to her,—“*Aimez-vous les beautés de la nature? Pour moi, je les abhorre.*”

The diverse religious character of these two men may be illustrated by an allusion to their different habits with respect to Art. Sydney Smith, visiting Paris, satisfied himself by a fifteen-minutes' observation in the galleries of the Louvre. His mind, almost orbicular in its various capacity, took in the scene at a glance. There were pictures from almost every country, statues from almost every age, representations of the finest imaginations of the mind and of the noblest labors of history. He was not a barbarian with respect to the Louvre, but understood all about it, and knew its excellence and value; yet he mingled his sentiment and common-sense well together, and took a rapid walk from chamber to chamber. He probably entertained large views of Art during his impetuous progress through the ages, from battle-field to battle-field, from saint to saint, from philosopher, poet, and hero, to landscape, shepherdess, and domestic scene. He took in thought with lightning swiftness, and lived for fifteen minutes amid statues and paintings which collected scenes from all the universe. He went forth, satisfied that the Louvre was a fine gallery of Art, that Art was a very fine thing, that painters and sculptors ought to be encouraged, and that he had been looking at many things which were worthy a man's consideration. If he had been called upon at once to preach a sermon, there is no doubt that he would have made very judicious reflections upon the spectacle which he had beheld.

Charles Lamb, too, visited Paris, and though it is not recorded that he went

into the Louvre, yet we can hardly be mistaken in conjecturing that he did, and the thoughts with which he went. He would have entered those galleries with timid ecstasy. He would at first have shrunk away from the full splendor, and made acquaintance with some modest painting in a corner. Happy would some friend near him be to hear the half-tender, half-witty, yet most appreciative conceit which should first come stammering from his lips. He would have advanced slowly, and only after much delay would have ventured to stand before the great masters, and to look up eye to eye at the spirit of the Louvre. After taking his departure, he would never have thought familiarly of the scene, but it would have remained in his mind as terrible and sacred an episode as was the descent into Hades to Virgil's hero.

Not only in the Louvre, but in the world, Charles Lamb was the more timid worshipper. The whole character of his mind, the intensity of his thought within a narrow sphere, made him reverent of the Infinite. The thought of departure from the life which he now lived was to him a very solemn one. Religious ideas were so sacred to him that he never referred to them lightly, and seldom at all. When he did mention them, it was with peculiar impressiveness. No one can read the account of his share in a conversation on “persons one would like to have seen,” without admiring the energy and pathos with which he alluded to one Person, whose name, however, he did not utter. Discussions on religious subjects he never tolerated in anybody but Coleridge. One evening, after he and Leigh Hunt had returned from a visit to Coleridge, Hunt began to express his surprise that a man of so much genius as the Highgate sage should entertain such religious opinions as he did, and mentioned one of his doctrines for especial reprobation. Lamb, who was preparing the second bowl of punch, answered, hesitatingly, with a gentle smile,—“Never mind what Coleridge believes; he is full of fun.” He was an

humble, sinful worshipper, and while he bowed his head tremblingly before Heaven, he poured out the stream of his affections to his sister and his friends.

The religious character of Sydney Smith was less peculiar than that of Elia. An earnest Christian, with a will too resolute to allow the aid of the punch-bowl in vanquishing trouble, professionally wielding the religious and moral ideas, and habitually obeying them, he stood erect and looked at the life to come with a firm eye. "The beauty of the Christian religion," he says, "is that it carries the order and discipline of heaven into our very fancies and conceptions, and, by hallowing the first shadowy notions of our minds, from which actions spring, makes our actions themselves good and holy." This central and vital beauty he had cultivated in a very diversified life, and he looked with confidence for the prize which is laid up for the well-doer.

Probably, if any successful life were examined, it would be found to consist of a series of hairbreadth escapes. Every movement would be the crossing of the Rubicon. That man is of little account who at every step that he has taken has not been weighing matters as nicely as if he were matching diamonds. How narrowly did Coleridge escape being the greatest preacher, philosopher, poet, or author of his time! Almost everything was possible to him; and one can but marvel how he went through life avoiding in turn each of his highest possibilities. It is the glory of Charles Lamb and Sydney Smith, that, as far as it can be said of any men, they did the best that was possible with their circumstances and endowments. The old fancy which says of every person, that there is an ideal character which he can attain, in which he shall be peculiar and unsurpassed, was in their cases realized.

Their characters were projected into literature, where they remain as permanent blessings. The style of writing of both of them approaches to the simplest way of saying things. Elia employed the choicest language of the seventeenth century, and the divine used the plainest English of the day. The perpetual danger of literature is of becoming rhetorical; and hardly fares vigor of thought when long words and periods are preferred to short ones, and when the native shape and properties of ideas are less cared for than the abundant drapery. The style of the "Essays of Elia" is as admirable as their fancy. The author hated a formal sentence as much as he disliked stately and insipid society. Unlike Thomas Carlyle, in avoiding the faults of rhetorical culture, he did not become a literary barbarian. In refusing to comb his hair like a prig, he did not go to the extreme of making himself horridly uncomely. His sentences are unsurpassed for neatness, are as graceful as they are quaint and clear. The writings of Sydney Smith rarely attain the perfect grace which uniformly distinguishes Elia; yet he never attempts magnificence, and he so unites brilliancy and plainness as to make his statements seem equally felicitous to the rude and the scholarly ear. His Peter Plymley letters are remarkable examples of the way in which one yeoman speaks to another. His literary bequest, however, is neither so valuable nor so charming as that of Charles Lamb. His powers were too various, and he engaged in too many fields of labor, to attain supreme success in any direction. The best result of his life is his own exuberant and unresting character, which harmonized all the diversities in his career; and adequately to behold this there is needed a fuller and more philosophical biography of him than has yet been written.

BULLS AND BEARS.

[Continued.]

CHAPTER XV.

ON the morning of the day which brought the downfall of Stearine and his indorsers, Sandford and Fayerweather, with the Vortex, whose funds they had misappropriated, Monroe came to the counting-room unusually cheerful. His anxiety respecting his little property was relieved, for he thought the monetary crisis was past, and that thenceforth affairs would improve. He had reasoned with himself that such a pressure could not last always, and that this had certainly reached its limit. The clear, bracing air of the morning had its full influence over his sensitive nature. All Nature seemed to rejoice, and he, for the time, forgot the universal distress, and sympathized with it. But the thermometer fell rapidly as he caught the expression which the face of his employer wore. Mr. Lindsay, of the house of Lindsay & Co., was usually a reserved, silent man,—in business almost a machine, honest both from instinct and habit, and proud, in his quiet way, of his position and his stainless name. He had a wife and daughter, and therefore was presumed to have affections; but those whom he met in the market never thought of him, save as the systematic merchant. Well as Monroe knew him, being his confidential clerk, he never had seen more than the case in which the buying, selling, and note-paying machinery was inclosed. He respected the evident integrity and worth of the head of the house, but never dreamed of a different feeling; he could as easily have persuaded himself into cherishing an affection for the counting-house clock.

This morning, Mr. Lindsay's face wore an unusually sleepless, anxious look. The man of routine was but a man, after all, and, in his distress, he longed for some intelligent, friendly sympathy. Monroe

recognized the mute appeal, but, from long habits of reticence, he was at a loss how to approach his stately chief. Determined, however, to give him an opportunity to speak, if he chose, Monroe asked after the news, the day's failures, and the prospects of business. The merchant needed only a word, and broke out at once,—

"Prospect? there is no prospect but ruin. If a whirlwind would bury the city, or a conflagration leave it a heap of ashes, it would be better for all of us."

"But don't you think the darkest time has past?"

"Not at all; the pressure will continue until scores more are brought down. Better fail at once than live in dread of it."

"You surprise me! Why, you are not in danger?"

"Did you ever consider? Look at the bales of goods in our lofts,—goods which nobody will buy and nobody can pay for. And our acceptances have been given to the manufacturers for them,—acceptances that are maturing daily. Up to this time I have taken up all our paper, as it became due; but God knows how the next payments are to be made."

"I had not thought of that."

"The house of Lindsay & Co. has never known dishonor!"—

The merchant wiped his spectacles,—but it was the eyes that were dim, not the glasses. His lips quivered and his breath came hard, as he continued,—

"But the time has come; the house must go down."

"I hope not," said Monroe, fervently. "Can nothing be done?"

"Nothing. Every resource has been used. The banks won't discount; and I suppose they can't; they are fully as weak as their customers."

"I don't know but the offer may be useless, contemptible, even; but I have a small sum, in good notes, that may be available."

The merchant shook his head.

"Whatever it is, you are welcome to it. Perhaps ten thousand dollars" —

"Ten thousand dollars!" exclaimed Mr. Lindsay,—"you have that sum?"

"Yes,—the little property that was my father's. Let me go and get the notes, and see if I can't get some money upon them."

Mr. Lindsay rose and took the clerk's hand with a heartiness that astonished him.

"God bless you, Monroe," he said. "I may be saved, after all. Ten thousand dollars will be enough for the present pinch, and before the next acceptance is due some relief may come."

"Don't speak of thanks. I'll get the notes in a moment."

Tears stole silently down the unaccustomed furrows; the gateway of feeling was open, but the tremulous lips refused to speak. Before he could recover his self-possession, Monroe was gone. Mr. Lindsay tried to read the newspapers, but the print before his eyes conveyed no idea to his preoccupied brain. Then his thoughts turned to his beautiful villa in Brookline, and he remembered how that morning his daughter stepped lightly into the brougham with him at the back piazza, rode down the winding path between the evergreen-hedges, and, after giving him a kiss, sprang out when they reached the gate. He knew, that, when he returned in the evening, he should find her in her place under the great horse-chestnut, at the foot of the hill, ready to ride to the house. How could he meet her with the news he would have to carry?—how crush the spirits of his invalid wife? Humiliating as the idea of failure was when considered in his relations with the mercantile world, the thought of home, with its changed feelings and circumstances, and the probable deprivation of habitual indulgences, was far more poignant.

It was not long before Monroe returned, but with a less buoyant air. Mr. Lindsay's spirits fell instantly. "I see it all," said he, "you can't do anything."

"Perhaps I may, yet. The notes I spoke of, though due to me, are in the hands of Mr. Sandford, Secretary of the Vortex Insurance Company. I have been there, and cannot see him. His shutting himself up, I am afraid, bodes me no good. However, I'll go again an hour hence."

"No harm in trying. Did you indorse the notes to him?"

"No. They were merely left with him for convenience' sake, as he was my agent in loaning the money."

"Then he can't make way with them,—honestly."

Monroe seemed hurt by the implied suspicion, but did not reply, thinking it best, if possible, to change the subject of conversation.

Mr. Lindsay sat in silence, a silence that was broken only once or twice during the morning, and then by some friend or business acquaintance asking, in hurried or anxious tones, "Anything over to-day?" A mournful shake of the head was the only answer, and the merchant sunk into a deeper gloom.

Again Monroe went to see Mr. Sandford, but with no better success. The third time he naturally spoke in a peremptory tone, and, giving his name and business, said, that he must and would see Mr. Sandford, or get the notes. The weight of his employer's trouble rested on him, and gave an unwonted force to his usually kind and modest temper. The clerk, not daring to break his instructions, and seeing that it was not far from two o'clock, intimated, in a half-confidential tone, that he would do well to ask Mr. Tonsor, the broker, about them. Nervous with apprehension, Monroe walked swiftly to Tonsor's office. At the door he met Fletcher coming out with exultation in every feature. Within stood Bullion, his legs more astride than usual, his chin more confidently settled over his collar, and the head of his cane pressed against

his mouth. As Monroe entered, Tonsor ceased the conversation, and, looking up, said, blandly, "My young friend, can I do anything for you?" Bullion at the same time turned the eyes that might have been only glittering petrifications, and pointed the long eyebrow at him inquiringly.

"I hope so," was the reply. "Have you some notes in your possession payable to Walter Monroe?"

"Who asks the question?"—very civilly.

"My name is Monroe."

"Ah! Mr. Sandford is your agent, I presume?"

"Yes. I left the notes with him."

"And you wanted to raise some money on them?"

"Yes, that is what I wish."

"Then you'll be pleased to know that Mr. Sandford has anticipated you. I loaned him eight thousand dollars upon them this morning."

"Loaned *him* eight thousand dollars?"

"Certainly. Is it extraordinary that your agent has done what you desired?"

"I never asked him to borrow for me; and I never authorized him to transfer the notes."

"He hasn't transferred them; he has only pledged them."

"He couldn't pledge them; he had no legal right in them."

"But he *has* pledged them, and they are in my safe, subject to the repayment of the sum I loaned."

"If you have loaned Mr. Sandford money, that is your affair."

"And yours, too, my friend, you will find, if he doesn't pay it."

"You haven't a right to detain the notes a moment."

"I have the possession, which will answer as well as the right. And let me advise you,—don't get excited and conclude that everything is wrong. You are not so well posted as you might be. Go and see Mr. Sandford, and I haven't a doubt you'll find the money ready for you."

"I shall go. But I wish you to under-

stand, that, if I am not 'posted,' as you say, I do know my rights, and I shall take proper measures to get possession of my property. You have no more hold upon it than a pawnbroker has upon a stolen spoon."

Trembling with the unusual excitement, and despairing of being able to aid his employer, Monroe did not wait for a reply, but rushed to the Vortex again. Mr. Sandford had gone out on business, was the answer. He had not gone far, if the truth were known; for his position commanded the office-door, and he saw every visitor.

Time did not lag that eventful day; the hands seemed to sweep round the dial on the Old State House as though they had been swords in pursuit of some dilatory debtor. It now lacked only fifteen minutes of two, and Monroe, sick at heart, turned his steps towards Milk Street, to announce the utter failure of his plan. Mr. Lindsay received the intelligence with more firmness than might have been expected.

"Monroe, my friend,—for I can truly call you so,—you have done what you could. It was not your fault that your agent deceived and swindled you. You generously offered me your all. I shall never forget it. I can't say more now. Please stay and inform the notary, when he comes, that he must take the usual course. Tell John, when he comes with the brougham, that he may drive back. I shall take the cars to-day, and shall not be at home, probably, until after tea. I pray God, Monroe, that you may never go home as I do now.—O Clara, my daisy, my darling! how can I tell you?"

Still murmuring to himself, Mr. Lindsay slowly walked out of the counting-room.

It was not strange, that, under the pressure of his own calamity, Mr. Lindsay had no thought for the losses of others. He forgot that Monroe was really in a far worse position, since, if the ten thousand dollars were lost, it was his all. Neither did Monroe, at first, reflect upon his own impending misfortune; he had

been so intent upon preserving the credit of the house, that his own interest had been lost sight of.

Presently the notary came with the inevitable demand. He was a cheerful fellow in his sorry business, blithe as an old stager of an undertaker at a first-class funeral. He chatted about the crisis, and, as a matter of course, brought all the latest news from State Street. Monroe listened to one piece of news, but had ears for no more. "Sandford and Fayerweather had failed, and the old Vortex, which they had managed, was dead broke, cleaned out."

Mr. Lindsay was not the only heart-stricken man who left the counting-room that day.

CHAPTER XVI.

MONROE was walking sorrowfully homeward, when he met Easelmann near the corner of Summer Street. He was in no humor for conversation, but he could not civilly avoid the painter, who evidently was waiting to speak to him.

"Glad to see one man that isn't a capitalist. You and I, Monroe, are independent of banks and brokers."

Monroe faintly smiled:

"This is a deadly time here in Boston,—a horrible stagnation. Every man avoids his neighbor as though he had the plague; and we have no Boccaccio to tell us stories while the dead-carts go by."

"The dead-cart went through our street to-day."

"You don't tell me! Who is the lucky corpse that is out of his misery?"

"Mr. Lindsay. Our house is shut up, and I am a vagrant."

"A pair of us! For the last month I have performed the Wandering Jew all by myself. Now I have company. What shall we do to be jolly?"

"Jolly!"—with a tone of melancholy surprise.

"When should a man be jolly, if he can't when he's nothing to do? I am the slave of gold, you understand. If any rich magician rubs his double-eagles

before me, woe is me, if I don't paint! When the magicians send their eagles on other errands, I am free from their drudgery. Meanwhile, I live on air, flattened out and packed away, like a Mexican horned-frog, or a dreaming toad, in a fissure of a preadamite rock."

"I am sorry I haven't your art of making misfortune comfortable."

"Misfortune? My philosophical friend, there isn't any such thing. The true man is superior to circumstances or accidents. (Some old fellow, I believe, has said that; somebody always says my good things before me; but no matter.) Nothing can happen amiss to the wise and good."

"Then I am neither wise nor good, for I have lost my all, and it comes confoundedly amiss to me."

"Your all? That's what the shoemaker said; but he bought a new one for sixpence. But how happened it?"

"By my folly."

"I knew that, of course; but I wanted to know what folly in particular."

"I trusted it to a man whom I thought not only honest, but my friend, and he has proved a scoundrel."

"You shouldn't have led him into temptation. You are *particeps criminis*, and the partaker is as bad as the thief. Don't trust without taking security, my friend; it's offering a premium to crime. Consider your guilt now! Think of the family into whose innocent bosom you have brought sin and remorse! Who is the luckless person?"

"Sandford!"

"I knew it. I expected it. He was too good by half. I didn't blame him for his widow-and-orphan business; somebody must do it; but I made up my mind some time ago that he would come to grief."

"Prophets are always plenty after the event."

"True, my friend. But just think! He passed by my pictures in the Exhibition, and bought the canvas of my friend Greenleaf,—a man of genius, doubtless, but young, you understand, young. Can

you conceive of the wickedness? I felt sure from that moment, that, if he were not totally depraved, he at least had a moral inability, as the preachers call it, that would be his ruin."

"Well, he is ruined effectually; but the worst of it is, that he has dragged innocent people down with him."

"'Innocent,'—yes, you have the word. A man that cares for money at all, and trusts all he has without security to any fair-spoken financier, is an innocent, truly."

"Well, there is no use in lamenting, and just as little in the consolation of thinking how the loss might have been avoided."

"I don't know. I don't admit that. I am not to be deprived of the rights of a freeborn American. The 'I told-you-so' is a fine balm for all sorts of wounds,—rather more soothing to physician than patient, perhaps. Combined with the 'You-might-have-known-it,' it gets up a wholesome blister in the least possible time, especially where 'a raw' has been established previously."

"I don't think I was prudent."

"Of course not; if you had been, you wouldn't have lost. There are no such things as mistakes in the world.—But to look at affairs. *Imprimis*,—Lindsay smashed, house closed, salary stopped."

"I suppose so."

"*Item*,—private funds gone; owner taken in by the patent-safe game."

"*Item*,—dwelling-house standing; so much gain,—but

"*Item*,—the dweller is not alone, having other mouths to feed."

"But don't be discouraged. I don't doubt you will find something to do in good time."

"But when is the good time coming? I must earn something at once."

"The danger of being made to work isn't pressing. Ships will have time to get well rested. Truckmen are actually growing civil with a little starvation. The beggars don't hold out their hands for coppers; they make more money by haul-

ing out their old stockings and lending at five per cent. a month."

"You will laugh me out of my misery in spite of myself"

"I hope so; but I am not sure that a man can be laughed out of a thing he wasn't laughed into. Now, Monroe, I am going to surprise you. I am going to bore you, annoy you; for I am to see you every day for the next week. Can you bear it? I shall be worse than the balm of 'I-told-you-so.'"

Monroe pressed his friend's hand.

"Come, by all means. And now we are near my house; go in and take tea with us."

"No, not to-day. It is *dies nefastus*. Good-bye!"

Twirling his grizzly moustaches and humming to himself, Easelmann turned back. He did not go to his room, however, but went down a quiet street, apparently guided by instinct, and rang the bell at a well-known door.

"Is Mr. Holworthy at home?"

The servant-girl nodded and smiled, and Easelmann entered. Mr. Holworthy was emphatically at home, for he was on all-fours, his three children riding cock-horse, with merry shouts, varied by harmless tumbles and laborious clamberings up. Mr. Holworthy rose with a flushed and happy face, and the children rushed at once to clasp the knees of their familiar old friend.

"We all have to come down at times, I believe," said Mr. Holworthy, smoothing the few thin hairs on his handsomely arched crown.

"Certainly; a man that can't be a boy with his children deserves to have none. Now the reason I am a bachelor is that I feared I could never unbend, being somewhat remarkable for my perpendicular"—

The word was cut off by a sudden movement; the children in their playful struggles had, in fact, thrown him down. In a moment more they were on his back and he trotting round the room with the grace of an elephant.

"Come, children," said the father, "that

was a rough joke. Get off, now, and go for your bread and milk."

Rather reluctantly they obeyed, casting wishful glances backward to the grown-up boy with whom they had hoped to have a frolic.

"Glad to see you," said Mr. Holworthy. "You have been unsocial, lately."

"Yes; all the effect of the panic. I am such a butterfly that I seem out of place in a work-a-day community. I am constantly advised, like the volatile person in the fable, to learn wisdom from my aunt; but I can't, for the soul of me."

"You ought to visit the more, to cheer the wretched and downcast."

"Oh, but it's a fearful waste of magnetism. Five minutes' talk with a man who has notes to pay draws all the virtue out of me. It lowers my vital tone like standing in an ice-house. You feel such a man from afar like a coming iceberg. *You* don't have notes to pay? I thought not. I should go at once."

"No, my little shop pays its way. I buy for cash. I pay my hands when they bring in their work, and I have customers enough who ask me for no credit."

"Happy man! most fortunate of tailors!—I have been thinking, Holworthy, among your many benevolent projects, why you never devised some means of relieving people who are supposed to be in good circumstances,—a society for ameliorating the condition of the rich."

"Bless me! the poor are quite numerous enough, and are in unusual straits just now."

"I know, and for that reason they are better off than usual. People say, 'How the poor must suffer in these pinching times!' So they double their charities."

"Poverty is an ocean without bottom, my friend. All that is given is like emptying stones into the sea; the waves swallow them and sweep over as before."

"True, you can't satisfy the beggars till you drown 'em. Wouldn't a gentle asphyxia by water, now, be the best thing for some of the Broad-Street cellarers?"

"Very likely; but they would probably object to the remedy."

"But to return to my project. I see some forms of distress that seem to me far more painful than utter poverty. I won't expatiate, but state a case. I know a man of good sense and culture, able and willing to do his part in the world. His employer has failed, so that his salary will stop. He is unmarried, but has a mother, an invalid, who never stirs out of doors; and besides has some poor relation or other to support. He has a house, it is true; so they needn't sleep in the street; but how are the mouths to be fed, the backs to be clothed?"

"Let him sell his house and wait till better times for employment."

"It is easy to say *sell*; but who will buy? A house won't fetch half its value, and there isn't any money to be had. Besides,—and this is the hardship,—the pride and the feelings of association cling round a house that has been consecrated by years of affection and by the memory of the dead.—I believe I am making an oration; but I despair of expressing myself."

"I understand you perfectly; it is sad, indeed."

"Excuse me, you don't understand me. Some men put off old houses and put on new ones, like their clothes, without a thought. Others grow into their habitations and become a part of them. You might as well say to a lobster, 'Get out of your shell,' when you know that the poor wretch will die when his naked, quivering members are exposed to the sharp-edged stones. A delicate nature, proud, but gentle, too sensitive to accept charity, and doubtful of a friendly service even, suffers more anguish in one hour, under such circumstances, than your brazen beggar feels from his dirty cradle to his nameless grave."

Mr. Holworthy mused.

"He has nothing to do, then?"

"Nothing, but to suck his thumbs."

"Is he willing to work, even if the task should appear irksome?"

"I haven't a doubt. He has no *false* pride. Anything honorable would be welcome."

"Perhaps I can find something for him to do; it will be temporary, but its continuance will depend upon himself"

"And what is it?"

"In visiting the district which has been allotted to me, I have found an unusual number of ignorant, vicious boys, cared for by no one, growing up for the prison or the gallows. I have thought of making some effort to gather them together and start a ragged school. Some friends have agreed to provide the means. But the pay would necessarily be small, and the labor and difficulty great."

"A teacher of tattereddemalions! It *isn't* an inviting field of labor."

"No, to a refined man it must be repulsive. Nothing but the idea of doing good would make it a pleasure or even endurable."

"I confess myself utterly without any such motive. I hate poor people, and ragged children, and sick women, the forlorn wives of drunken brutes. I shut my eyes to all such odious sights. They say, in a hotel you must never go into the kitchen, if you would keep your appetite; and I am sure one must avoid these wretches in the cellar, if he would have a cheerful view of life in his attic."

"You are not so hard-hearted as you would have me believe. Somebody must relieve their distresses."

"Somebody, too, must cut off legs, and sew up spouting arteries, and extirpate cancers. Ugh! but I shan't. I leave such jobs to the doctors, whose ears are familiar with shrieks, and whose appetites are not disturbed by the sight of blood."

"So the Levite left the wounded man by the wayside, in disgust at his bruises; but still the good Samaritan who helped him hadn't a doctor's degree."

"Oh, I know. You have me, I acknowledge. But I can't change my temper, and I shrink from suffering as from death. I would rather bear it than see it. Society always provides its good Samaritans; and you are one of them. Don't look modest. I went once through some of those damnable alleys near Half-Moon Court, the agreeable place where

you spend so much of your leisure. I was looking for a subject to paint. For curiosity, I asked an urchin if he knew you. He flung his ragged cap twenty feet into the air, turned a somerset, and came up smiling as well as he could through the dirt,—'Don't I, though? He brung us meal an' 'taters when dad broke his leg, and he fetched oranges in his pocket when marm had the fevers. He's one of 'em, he is.'—Don't interrupt me.—An old woman, whom I asked, said, 'Do I know Mister 'Olworthy? A blissed saint in the flesh; my poor ol' bones would 'ave hached many a cold night but for the blankets he brought me. God in 'eaven reward 'im for that same!' I spare you the rest of the answers. Oh, you *are* a saint, without robe or wings."

"Hadt we better come back to the subject," said Mr. Holworthy, in a mild voice. "We shan't aid your friend in this way."

"Right, my considerate Mentor. But talk is tempting. I believe I should forget my errand and let a friend hang, if I got into an argument with the Governor while he was filling out the pardon."

"I hope the gentleman you speak of is not so much afraid of contact with what is disagreeable as you are?"

"Perhaps not; he has an artistic temperament, and therefore loves what is comely; but he would go through fire to what he thought his duty."

"And wouldn't you?"

"What a question! Go through fire? No, I should bawl for the engine."

"It's plain, then, that he will answer better than you for the place."

"No doubt. I shouldn't answer at all. I tell you I never talk with these creatures. I can't. If an old woman stops me, with her dried-apple face and whining voice, I give her a sixpence and tell her to hush up and go about her business. I fling coppers to the boys with slit breeches before they ask me, for I know they will tell me of mothers sick with consumption. Their devilish tears are contagious; and I can't cry; it chokes me. So I buy apples and oranges from the imploring-

looking girls; it's the easiest way of getting rid of them. The little change don't amount to much in a day, and I save my nerves and my digestion at a cheap rate."

Mr. Holworthy smiled at Easelmann's notion of his own hard-heartedness, and said, hesitatingly,—

"I am afraid that some professedly charitable persons don't do so much."

"Of course they don't. I don't mean that I do anything. It's pure selfishness on my part, as I told you. But you may feel pretty sure, that, if a man's name is always in the papers, as 'our estimable fellow-citizen, President This, Director That, and Treasurer T'other,' he 'does not give indiscriminate alms':—I believe that is the phrase. Perhaps he won't rob, like my friend Sandford; but his 'disinterested labors' are an economical substitute for substantial charity, and his desire for a place in the public eye is the mainspring of all his actions."

"Most of the distress in the community is relieved by organized effort; individual charities, however well meant, would be entirely inadequate. Besides, you should not be severe upon all because one prominent person has proved unworthy."

"Sandford is a type of the class. If there is anybody I hate worse than a sick beggar, it is a man who makes a trade of philanthropy."

"And yet you are consenting to your friend's earning a living by teaching a ragged school."

"True, one may stop at any place in a storm, just for shelter."

"And you can console yourself further with the assurance that your friend won't make enough in this place to induce him to take up the 'trade,' as you call it."

"I hope not. Starve him judiciously. If he should come out, after a year or so, with a white neckcloth, spectacles, and a sanctified face, soliciting aid for his school, in Pecksniffian tones, I should regret that I hadn't furnished him with a cord and a bag of stones to drop himself into the dock with."

"I don't know why a teacher or a street-missionary may not be a gentleman."

"Sure enough, why not? Whatever Walter Monroe is, *he* will always be a gentleman."

"Suppose you bring him to see me to-morrow or next day; we will talk about this."

"I will. Now, good-bye! My regrets to the children that we couldn't finish our romp."

"Good-bye," said Holworthy. "Come again; the children will be glad to see you."

CHAPTER XVII.

As Mr. Sandford walked homeward, the streets seemed to close up behind him; he was shut out from the scenes of his activity, no more to return; State Street was henceforth for him a thing of memory. He had played his game there, while admirers and friends watched his far-seeing moves. He had lost; and now, after checkmate, he must resign his place. How he struggled against the idea! He could not bring himself to acknowledge that the past was irretrievable. His spirit seemed in prison, shut in as by the bars of a dungeon, against which he might tug and rage in vain.

At home, dinner was on the table, waiting for him. As he entered the hall, he met his sister-in-law. She saw the fatal news in his face, and with a sinking heart gave him her usual greeting. Marcia took her place at the table, but with less animation than usual. Charles sat down with his studied indifference. Each one seemed to be absorbed in separate spheres of thought, and the courses came on and were removed in painful silence. At last Mr. Sandford spoke.

"I suppose I need not tell you that it is all over."

"All over!" exclaimed Marcia.

"Yes,—I have failed; so has Fayerweather; so has Stearine."

"Failed?" said Marcia, in an incredulous tone. "I thought it was the great

people,—I mean people in business, or with estates, that failed.”

“Well, have I not been in business?”

“Yes,—as secretary, and you have a salary. How can a man with a salary fail?”

“Quite easily. Suppose the Vortex fails? My salary would stop.”

“That isn’t failing, is it? Then Pompey might fail, if he didn’t get his pay for brushing your boots.”

Mr. Sandford gave a contemptuous look.

“That shows how much you know about business.”

“I never did know about your business; nor does anybody, I believe. I never could understand how, with your little property, you had these ‘transactions,’ as you call them, where you owed people and people owed you so many thousands.”

“It is not necessary for you to know. Women can’t understand these things.”

“But women feel their effects, and it’s a pity they could not learn about what concerns them.”

“Will it change your situation at once?” asked Mrs. Sandford of her brother.

“I can’t say; probably not at once; but without some aid, all I have must go.”

“What! the house?” exclaimed Marcia.

“Yes,—the house, Marcia, and the furniture. We shall be stripped.”

“The deuce!” said Charles.

“Heaven help us! what shall we do?”

“I haven’t had time to form any plan. I trust, indeed, that Heaven *will* help us, as you rather lightly wished.”

His face wore a touching look of faith and resignation, while at the same time his hand rested with secret satisfaction upon his pocket-book.

The conversation was disagreeable to Charles, and he sauntered off to the drawing-room.

Mrs. Sandford inwardly determined to return to her home, or at least to go elsewhere in the city, so as not to be a bur-

den to her brother-in-law; but she remained silent. Mr. Sandford balanced his knife, sliced his bread into figures, then hummed and beat a tattoo upon the table,—sure indications of forgetfulness in one so scrupulous as he. At length, with a bland voice, but a sharp, inquiring eye, he said,—

“How is it about this painter, Marcia? Are you going to marry him?”

She looked fixedly, as she replied,—

“Why do you ask? You know I am going to marry him.”

“Oh, it’s settled, is it? You know, sister, you have had similar intentions before,—several times, in fact,—intentions that haven’t come to much.”

She did not answer further; a flush of anger came, then went, leaving her pale face with a rather sterner expression.

“While I was prosperous, I was not disposed to be mercenary; though I did think you were not worldly-wise. Now that I am destitute, you can see that to marry a man not worth a dollar, and with a precarious profession, is not what it would have been.”

“Mr. Greenleaf earns a good income, doesn’t he?”

“He hasn’t sold a picture, except to friends whom I persuaded to buy.”

“You have friends and influence still?”

“I don’t know; a man’s friends don’t last long after his money is gone. Besides, nobody wants to buy now. Raphael himself couldn’t sell a picture here till times improve. A painter is a pretty butterfly for fine weather; what is he to do with his flimsy wings in such a hurricane as this?”

“I think I understand you, Brother Henry. You begin afar off; but I know what you are coming to. You want to bring up that odious Denims again,—a man whom I hate, and whom you yourself would show out of doors, like a vagrant, if it were not for his money!”

The effort exhausted her, and she breathed painfully.

“You think yourself quick. I haven’t mentioned Denims. In fact, you have

treated him in such a way that I am quite sure he would never trouble himself to be even civil to you again."

"I am glad of it,—the fool!"

"Sister Marcia, I have borne much from your turbulent temper. You are a spoiled child. Fortune has let you have your own way hitherto; so much the worse for you. But circumstances have changed. I can no longer supply you as though you were a duchess. In fact, I don't know what may be before us. I hope no actual want. [*Another grip of the pocket-book.*] But I advise you to consider whether it is for the interest of a dependent woman to go out of her way to thwart and insult me."

"You would compel me, then, and threaten starvation as the alternative?"

"What odiously blunt language you use!"

"I only translated your roundabout phrases as I understood them."

"You need not be violent."

"You cannot cajole me by soft words, when your purposes are so obvious. You think Denims may save the wreck of your fortune; and you are willing to sacrifice me, if he were ten times the brute he is, to further your ends. But I shall marry Greenleaf."

"Greenleaf will be a powerful protector! I doubt if he can raise money enough to pay the clergyman for marrying you! He will be without a shilling in a month, if he is not now. Go to him, Sister Marcia. I would, now. You can live in his attic studio, you know. In such a romantic place you would never be hungry, of course."

Mrs. Sandford interposed,—

"Don't, Henry! This is not the way."

Marcia's eyes flashed through her tears, as she answered,—

"You say *you* are ruined,—that the house and furniture must go. How much better off shall I be here?"

"Well, you have your choice."

"And when the time comes, I shall take it."

Sobs and tears followed, but her lips were firm and her hands clenched.

"As you please, sister."

"You come home ill-tempered, and the rage which you could not or dared not give vent to in the street you pour out here."

"Perhaps you would have been pleased, if I had not come home at all?"

"I'm sure we should have been quite as happy without you."

"Very well. I may leave you, yet."

"I don't care how soon."

New sobs and a firmer pressure of the lips.

Oddly enough, at that moment, Mr. Sandford was summoned to the drawing-room, where a man was waiting for him. Fearful of the result, he went to his own room, first, and left the precious pocket-book, and then descended to the hall.

Notwithstanding the words she had spoken, Marcia waited with breathless anxiety her brother's return; for the sound of voices, in earnest, if not angry, conversation, rose through the house. Presently he came back with a look his face seldom wore,—a fierce look that transformed his handsome features to a fiend's.

"You have your wish, Sister Marcia,"—and the words were shot out like fiery arrows,—*"I am to leave you, and go to jail."*

"To jail?" exclaimed both at once, in terror.

"Yes,—to jail. Gratifying to you, I suppose. 'Tis to me,—very."

"What is the meaning of this?" asked Mrs. Sandford.

"It means, that one of my creditors pretends to believe that I am about to abscond, and has had me arrested, that I may give bail not to run away with an empty pocket."

"Can't you get out?"

"Some time, undoubtedly; but not till I give bail."

"For how much?"

"Twenty thousand dollars."

"Can't you get some one to become security?"

"I don't know. Perhaps I might get Greenleaf!"

"Ooo-arr-awkk!" said the man, under the pressure of a tightening cravat, at the same time giving the assailant "a settler," as he had threatened. The two unfortunate women had hitherto looked down upon the conflict, as celestial beings might upon the affairs of men, with no small degree of interest, but clad in robes too ethereal to descend. But when they saw Charles felled to the floor, and a deathlike silence ensued, they forgot their fears, and rushed down the stairs. The officer had already raised Charles up. He was stunned, senseless, and his face was covered with blood.

"You brute! you have murdered him!" exclaimed Marcia.

"Guess not, Ma'am. Wet his head in col' water, put him to bed, an' he'll sleep it off."

"It's useless to talk to such a fellow," whispered Mrs. Sandford; "besides, we want his aid to carry Charles upstairs."

"Ye see, I couldn't help it, Ma'am. He nigh about choked me to death, and I give him fair warnin'."

"Never mind now about the quarrel," said Mrs. Sandford; "you help him upstairs to his room, and we'll bathe his head."

While the officer was carrying the young man upstairs, Mrs. Sandford put on a shawl, and, by the time he had reached the second flight, she opened a door, and lighted the gas with a taper, saying,—

"In here, if you please. My brother Henry's room is the most convenient."

The officer's eyes twinkled.

"So this is Mr. Sandford's room?"

"Yes, but he is absent, as you were told before. Lay Charles on the bed, if you please. There, that will do. I will attend to him now. You can return to the lower story."

"In a minit, Ma'am. Duty is duty, and this 'ere accident saves some trouble," casting sharp glances around the room.

The facts, that Sandford had drawn from the bank, and that he had bor-

rowed from Tonsor, were known to the creditors. The officer had determined, therefore, to make what search he could for the money. The unlooked-for accident had given him the opportunity he wanted.

"What do you mean, Sir? Go back to your place."

"Softly, Ma'am, softly! Duty is duty; an' 'f any damage is done, I'm responsible."

His eyes fastened upon a dressing-case that lay on a table near the mirror,—apparently the last article handled by the occupant of the room.

"No robbery, Ma'am," said he, opening the case, and taking out its contents. "Razors and brushes, and such like, is personal, and not subject to levy; but these, Ma'am, you see, air."

He held up a pocket-book full of bank-notes.

"I'll count 'em before you, Ma'am, if you please, so's there 'll be no mistake. Thirteen thousand! A pretty good haul! I'll go down, now. If anythin's wantin' for the chap when he comes to, jest le'me know."

With a gleam of intense satisfaction on his sharp and vulgar features, the officer descended the stairs.

CHAPTER XVIII.

JOHN FLETCHER sat by his fireside, reading the evening papers. The failures of the day, of course, engaged his attention; among them, those of Sandford and his associates were not unexpected. His little wife sat by him, fondling the weakly baby.

"Old Sandford has gone by the board, ducky. Good enough for him! He's come to grief, as he deserved. He'll never trouble me any more."

"I'm afraid a good many more 'll come to grief, as you say, before this panic is over."

"Some, of course; the dead trees, and the worm-eaten, powder-posted ones, will fall in the high winds, naturally. But old Bullion is safe. No rotten hollow in his

old white-oak trunk;—sound as a ship's mainmast."

"Is it Bullion who owes you?"

"Yes. I have his notes for ten thousand dollars; and our next settlement, I calculate, will give me as much more."

"Why don't you get your pay?"

"What should I do with it, my duck? I couldn't lend it to anybody safer. If I deposit, the bank is as likely to fail as he. As long as he has the whole capital to swing, he will make the more for us both."

"I would rather have the money."

"That shows how little you know about it."

"I know, if you had it, and didn't lend it nor speculate with it, you couldn't lose it."

"Now, ducky, don't interfere. You take care of babies nicely. Let me manage my own affairs."

"You always treat me like a child that has to be petted with sugar-plums."

"That's because you are a child. What the devil does a woman know about business?"

The "ducky" cried a little, and was quite sure that John would go on and risk what he had, till he lost all.

"Little woman, none of your blubbering! It annoys me. Am I to be harassed by business all day, and have no peace when I come home?"

He settled himself to read the papers, once more, and the wife picked up the fretful, puny infant, and retreated to the kitchen, where she could indulge her sorrow without rebuke or interruption.

Presently, Bullion entered, though not unexpected; for he had given Fletcher an intimation, that, in order to have a private interview, he would endeavor to see him at home.

"Nice little box," said the capitalist, looking around. "Any babies?"

"One," said Fletcher.

"Boy or girl?"

"A girl."

"Bad. Girls always an expense. Dress, piano, parties, and d—d nonsense.

Boys, you put 'em into harness and work 'em till they're willing to eat their wild oats; he! he!"

The eyebrow flourished over the jocose idea; the stony eye glittered a moment like a revolving light, and then relapsed into darkness.

"However, I have but one, and I think I can make her comfortable."

"Yes, my boy, quite comfortable. Let me see, I owe you ten thousand. How does the new account stand?"

"Here are the figures, taken from Tonsor's book," said Fletcher. "Seventy-nine thousand eight hundred and forty-three. Ten per cent. to me is seven thousand nine hundred and eighty-four."

"A big pile of money, Fletcher."

"Yours, you mean? Yes, seventy thousand and odd is a big pile."

"Yours,—I meant yours."

"Why, yes," replied Fletcher, indifferently, "a good fair sum, for a man that hadn't any before."

"Don't you think, now, Fletcher, that the ten thousand pays you for all you've done? Isn't it enough for a month or two's work?"

"I think I am paid when I get what was agreed on," replied Fletcher, stoutly.

The eyebrow was raised with a deprecatory, inquiring look.

"Why, Fletcher, sharp's the word, is it?"

"That's what you said, when we started."

"Suppose I pay you the notes and a thousand or two more, and we call it square? Then you salt down what you got."

"And you propose to haul off from operating?"

"Well, no, I can't say I do. I may try the bulls another fall or two. But you haven't anything else. If we lose, you are smashed. I have other property to fall back on."

"So it's merely to do me a kindness and make me safe and snug that you propose to keep back the six thousand that belong to me?"

"You put it rather strong, youngster.

I didn't agree to pay till the scheme was carried out. But we've done better than we expected, and, to take you out of danger, I offered to pay part down. In a business as ticklish as stocks, you don't expect a man to come down with the ready without a consideration?"

"You know you could never have kept the run of the market, if it hadn't been for me; and the ten per cent. is no more than a fair share. This isn't a matter of dollars altogether, though dollars are useful, but of information, activity, brains."

"Well, remember, young man, I offer you now twelve thousand. If anything happens, don't squawk nor play baby."

"Why, you're not going to fail?"

"No,—not if the world don't tip over."

"And you're going on with your operations?"

"Yes,—till the wind shifts. It's due east yet."

"Well, I think the ship that carries you is safe enough for me. Make me the notes, and let the operations go on another week."

With an increased respect for his agent, when he found that he could neither humbug nor frighten him, Bullion filled out and signed the notes. Next they reviewed the stock-market, and decided upon the course to be pursued. Bullion then fell into a profound meditation, and did not speak for five minutes, though the busy eyebrow showed that his mind was not lost in vacancy. At last he started up, saying,—

"I must go. But, Fletcher, any reason why you particularly wanted to pay Sandford that thousand, to-day?"

Fletcher turned pale, and his heart rose in his mouth.

"No,—no reason,—that is—he wanted it—I—I was willing to oblige" —

"No matter about reasons," said Bullion, with a quiet air. "I never tread on people's corns. Only when it's wanted let me know. You see he went by the board. He begged me to save him.

How could I? I've done enough for other people. Must take care of number one, now. Kerlstone, he begs, too. I shan't help him."

Fletcher felt relieved; at the same time he determined without delay to make a new effort to get the fatal evidence of his former crime into his own possession.

"Oh," said Bullion, as if he had forgotten something, "the wife and baby, let's see 'em."

Fletcher called his wife, who came in timidly, and shrank from the fierce look of the man of money.

"How d'e do, Ma'am? Your servant, Ma'am. Glad to see you. But the baby?"

"Fetch the baby, lovey," said Fletcher.

Baby was brought, smiling with as little reason as possible, and winking very hard in the light.

"Pretty dear!" said Bullion, chucking her under the chin.

"I wonder what the devil this means," thought Fletcher.

How was his surprise increased when, after a moment, Bullion inquired,—

"Teeth cut yet? Some of 'em, I see. More to come. Want something to bite, little one?"

He pulled out his purse and gave the child three or four large gold pieces. The little hands could not hold them, and they fell on the carpet, rolling in different directions. Bullion left hastily, with a quick nod and a clipped "Good-bye."

"Well, I vow!" said Fletcher, with a long breath. "It's well he didn't stay to pick 'em up; they'd 'ave stuck to his fingers like wax. He couldn't have let 'em alone."

"What a good man he is!" said the overjoyed little woman.

"Good man! He's crazy. Old Bullion giving away gold pieces to a baby! He's lost his wits, sure. He never gave away a sixpence before in his life. Oh, he's cracked, without a doubt. I must keep watch of him. When he grows generous, there's something wrong."

THE WATERFALL.

Down across the green and sunny meadow,
Where the grass hangs thick with glistening dew,—
In the birch-wood's flickering light and shadow,
Where, between green leaves, the sun shines through,—

Plunging deeper in the wood's dark coolness,
Where the path grows rougher and more steep,
Where the trees stand thick in leafy fulness,
And the moss lies green in shadows deep:—

Hark! the wind amid the tree-tops rushing
In a sudden gust along the hills!—
No,—the leaves are still,—'tis water gushing
From some hidden haunt of mountain-rills.

Upward through the rugged pathway struggling,
Loud and louder yet the music grows;
Near and nearer still, the water's gurgling
Guides me where o'er moss-grown rocks it flows.

Breathless, for its welcome coolness thirsting,
On I haste, led by 'the rushing sound,
Till upon my full sight sudden bursting,
Lo, the forest's hidden treasure found!

See the gathered waters madly leaping,
Plunging from the rocks in headlong chase,
Boiling, eddying, whirling, downward sweeping
All that meets them in their foaming race!

From the broken waters riseth ever,
Fresh and cool, a soft and cloud-like spray;
And where through the boughs slant sunbeams quiver,
On the mist the sudden rainbows play.

On a branch high o'er the torrent swinging
Sits a bird, with joyful-swelling throat;—
Only to the eye and heart he's singing;
Through the roar below I hear no note.

All the forest seems as if enchanted,
Seems to lie in wondrous stillness bound;
Hushed its voices, silenced and supplanted,
Interwoven with this ceaseless sound.

Gazing on the whirl of waters meeting,
Dizzy with its rush, I stand and dream,
Till it almost seems my own heart's beating,
And no more the voice of mountain-stream.

THE WINTER-BIRDS.

WE are prone to set an extraordinary value upon all sources of pleasure that arrive in a season when they are few and unexpected. Hence the peculiar charm of the early flowers of spring, and of those equally delightful flowers that come up to cheer the short and melancholy days of November. The winter-birds, though they do not sing, are, on the same account, particularly interesting. The Chickadees and the little speckled Woodpeckers, that tarry with us in midwinter, and make the still cold days lively and cheerful by their merry voices, are, in animated nature, what flowers would be in inanimate nature, if they were found blooming under the snow. Nature does not permit, at any season, an entire dearth of those sources of enjoyment that spring from observation of the external world; and as there are evergreen mosses and ferns that supply in winter the places of the absent flowers, in like manner there are chattering birds that linger in the wintry woods; and Nature has multiplied the echoes at this season, that their few and feeble voices may be repeated by their lively responses among the hills.

To those who look upon Nature with the feelings of a poet or a painter, we need not speak of the value of the winter-birds as enliveners of the landscape. Any circumstance connected with scenery, that exercises our feelings of benevolence, adds to the picturesque charms of a prospect; and no man can see a little bird, or any other animal, at this time, without feeling a lively interest in its welfare. The sight of a flock of Snow-Buntings descending, like a shower of meteors, upon a field of grass, and eagerly devouring the seeds contained in its drooping panicles that extend above the snow-drifts,—of a company of Crows rejoicing with noisy sociability over some newly-discovered feast in the pine-wood,—of the party-colored Woodpeckers wind-

ing round the trees and hammering upon their trunks,—all these, and many other sights and sounds, are associated with our ideas of the happiness of these creatures; and while our benevolent feelings are thus agreeably exercised, the objects that cause our emotions add a positive charm to the dreary aspects of winter. These reflections have always led me to regard the birds and other interesting animals as having a value to mankind not to be estimated in dollars and cents, and which is entirely independent of any services they may render to the farmer or the orchardist by preventing the over-multiplication of noxious insects.

The greater number of small birds that remain in northern latitudes during winter, except the Woodpeckers and their congeners, are such as subsist chiefly upon seeds. Those insectivorous species that gather their food chiefly from the ground are under a particular necessity of migrating. Hence the common Robin, living entirely on insects and a little fruit, that serves him rather as a dessert than as substantial fare, a bird that never feeds upon grain or seeds of any kind, but devours the insects that are found upon the surface of the soil, cannot subsist in our latitude, except in open winters. During such favorable seasons, the Robins are able to collect vast quantities of dormant insects from the open ground. These birds always endeavor to keep on the outside of extensive snows; and if in any year, very early in November, a large quantity of snow should fall in the latitude of New Jersey and Pennsylvania, while north of it the ground remained uncovered, the Robins would be retarded in their journey and tarry with us in unusual numbers. A great many of them must perish of hunger, or be reduced to the necessity of feeding on the berries of the Viburnum and Juniper, should they be overtaken by an extensive and enduring

snow that cuts off their journey of emigration.

The Woodpeckers and their allied species, though insectivorous, are not thus affected by the winter. Gathering all their food, consisting of larvæ and insects, from the bark and wood of trees, the snow cannot conceal it or place it beyond their reach. The quantity of this kind of food is less than in summer, but the birds can obtain it with about the same facility at all times, because other species of birds are diminished, which in summer divide with them this spoil. Hence, Woodpeckers, Creepers, and Tomtits do not migrate. They simply scatter more widely over the country, instead of keeping in the woods, and thus accommodate themselves to their more limited supplies of food. The Swallow tribes, that catch their food in the air, are the first to migrate, because the swarms of insects are vastly diminished by the early frosts of autumn.

It is not often that we are led to reflect upon the extreme loneliness that would prevail in all solitary places in winter, were all the birds to migrate at this season to a warmer climate, or to sink into a state of torpidity, like frogs, dormice, and other small animals. But Nature, to preserve the pleasantness of this season, has endowed certain birds with power to endure the severest cold, and with the faculty of providing for their wants at a time when it would seem that there was not sustenance enough among the hidden stores of the season to keep them from starvation. The woodman, however insensible he may be to the charms of all such objects, is gladdened and encouraged in his toils by the sight of these sprightly creatures, some of which, like the Jay and the Woodpecker, are adorned with the most beautiful plumage, and are all pleasantly garrulous, filling the otherwise silent woods with constant and vociferous merriment.

In my early days, for the supposed benefit of my health, I passed a winter in Tennessee, and, being unoccupied, except with my studies, I spent a great por-

tion of my time in botanical and zoölogical excursions in the woods adjoining the city of Nashville. It was during that season I experienced the full power of the winter-birds to give life and beauty to the scenes of Nature; for, though not one was heard to sing, they seemed as active and as full of merriment as in the early summer. The birds that most particularly attracted my attention at this time were the Woodpeckers, of which several species were very numerous. Conspicuous among them was the Pileated Woodpecker, (*Picus pileatus*), a bird with rusty-black plumage, a red crest and moustaches, and a white stripe on each side of the neck,—one of the largest of the tribe. His loud croaking note was heard at all times in the deep woods, and his great size and his frequent hammering upon the resounding boles of the trees attracted every one's attention.

A more beautiful, but smaller species, was the Redheaded Woodpecker. (*P. erythrocephalus*), with head, neck, and throat of crimson, and other parts of his plumage variously marked with white and changeable blue. This species, though never seen in Eastern Massachusetts, is a common resident in this latitude, west of the Green-Mountain range. The birds of this species were very numerous, during my excursions, and the woods were constantly flushing with their bright colors as they flitted among the trees. They were sometimes joined by another species, hardly less beautiful, the Redbreasted Woodpecker (*P. Caroliniensis*).

It is impossible to describe the charm which these birds afforded to the otherwise solitary woods. The loud croaking of the Log-cock, the cackling screams of the Redheaded Woodpecker, and the solemn, tolling note of the Redbreast, blended with the occasional cooing of Turtle-doves, formed a sylvan charm, that made my winter-rambles, at this period, as interesting as any I ever pursued in summer or autumn.

In our latitude, after the first flight of snow has covered the ground, the winter-birds, pressed by hunger, are compelled

to make extensive forages in quest of food. Hence our attention is more closely attracted to them at this time, as many parties of them will visit our neighborhood in the course of the day, when, if no snow had fallen, they would have confined themselves to a more limited range. One of the most attractive sights on such occasions is caused by the flocks of Snow-Buntings, which are particularly gregarious in their habits. In Sweden they are called "Bad-Weather-Birds," because they are mostly seen when the fallen snow has caused them to roam from place to place, in quest of their subsistence. They are far from being birds of ill-omen, however, as we see them commonly when the storm is past. Few sights are more picturesque than these flocks of Snow-Buntings, whirling with the subsiding winds, and moving as if they were guided by an eddying breeze, now half-concealed by the direction in which they meet the rays of the sun, then suddenly flashing, as with a simultaneous turn they present the under white side of their wings to the light of heaven. The power which these diminutive creatures seem to possess, of enduring the cold of winter, and of contending with the storm, attaches to their appearance a quality which is allied to sublimity. I cannot look upon them, therefore, in any other view than as important parts in that ever-changing picture of light, motion, and beauty, with which Nature benevolently consoles us for those evils which are assigned by fate to all the inhabitants of the earth.

The common Snow-Birds (*Fringilla nivalis*) are more interesting as individuals, but they are never seen in compact flocks. They go usually in scattered parties, and appear in Massachusetts about the middle of autumn, arriving from Canada and Labrador, where they spend the summer. They have many of the habits of the common Hair-Bird, (*Fringilla socialis*), assembling around our houses and barns, and picking up crumbs of bread and other fragments of food. They differ entirely from the Buntings in their appearance,

the latter being called White Snow-Birds, to distinguish them from the others, which are slate-colored. These birds are quite as remarkable, however, for their power of enduring the cold, and of sustaining the force of the tempest. In the midst of a snow-storm, they may often be seen sporting, as it were, in the very whirlpool of the driving snows, and alighting upon the tall sedges and weeds, and eagerly gathering the produce. The Hemp-Bird often joins their parties, and his cheerful and well-known twitter may be heard, as he hurriedly flits from one bush to another, hunting for the seeds of the golden-rods and asters.

The cause of the migration of these birds from their native northern latitudes is not, probably, the severe cold of those regions, but the deep snows that bury up their cereal stores at a very early period. But even if the grounds in those cold latitudes were only partially covered, these birds must scatter themselves over a wide extent of territory, in proportion as their food becomes less abundant. They live principally upon seeds, and hence their forages are made chiefly in the tilled lands, where the weeds afford them an abundance of food. The negligence of the tiller of the soil is, therefore, a great gain to the small birds, by leaving a supply of seeds in the annual grasses that grow thriftily with his crops.

Among these flocks of Snow-Birds, a few individuals of the common Hair-Bird (*Fringilla socialis*) may frequently be seen. The majority of this species migrate to a more open clime; but sufficient numbers remain to entitle them to be included with other Snow-Birds of the Finch tribe. He is one of the smallest of the Sparrows, of a brownish ash color above, and grayish white beneath. He wears a little cap or turban of brown velvet on his head, and by this mark he is readily distinguished from his kindred Sparrows. Relying on his diminutive size for his security, he comes quite up to our door-step, mindless of the people who are assembled round it, and, fearless of

danger, picks up the crumbs that are scattered there. He may be seen at all seasons of the year, though his voice is not heard in the spring so early as that of the Song-Sparrow or the Blue-Bird. He lives chiefly on seeds, though, like other granivorous birds, he feeds his young with grubs and small insects. This is a general practice with the granivorous tribes, in order to provide their young with soft and digestible food before they are strong enough to digest the hard, coriaceous seed. Nature has formed an exception in the Pigeon tribe; but has compensated them by providing that the parent bird shall soften the food in her own crop before it is given to the tender young. From the peculiar manner in which the young are fed comes the epithet, "sucking doves."

It is common to speak disparagingly of the little Hair-Bird, as if he were good for nothing, without beauty and without song, and, what is of still more consequence in the eyes of the sordid epicure, too small to be eaten, his weight of flesh not being worth a charge of powder and shot. We can never sufficiently rejoice that there are some birds too small to excite the avaricious feelings of these knights of the fowling-piece and the rifle. The Hair-Bird is not to be despised, except by epicures. Though he is contemptuously styled the "Chipping-Sparrow," — a name which I will never consent to apply to him,—his voice is no mean accompaniment to the general chorus which may be heard every still morning before sunrise, during May and June. His continued trilling note is to this warbling band what the octave flute is to a grand concert of artificial instruments. The voices of numbers of these birds, which are the very first to be heard and the last to become silent in the morning, serve to fill up the pauses in this sylvan anthem, like a running *appoggiatural* accompaniment in certain admired musical compositions. How little soever the Hair-Bird may generally be valued as a songster, his voice, I am sure, would be most sadly missed,

were it never more to be heard charmingly blending with the other louder voices of the feathered choristers.

How often, on still, sultry nights in July, when scarcely a breath of air is stirring among the foliage of the trees, when the humming of the Moth might be plainly heard, as it glided by my open window, have I been charmed with the voice of this little bird, uttered in a low, trilled note, from the branch of some neighboring tree! He seems to be the sentinel whom Nature has appointed to watch for the first gleam of dawn, which he always faithfully announces before any other bird has begun to stir. Two or three strains from his octave pipe are the signal for a general awakening of the birds, and one by one they join the song, until the whole air resounds with an harmonious medley of voices. The Hair-Bird has a singular habit of sitting upon the ground, while chirping in the early morning. His nest is placed commonly upon an apple-tree, sometimes in a bush, but never on the ground. It is very neatly constructed of the fibres of roots closely woven together, and beautifully lined with fine soft hair, whence he has obtained his name. It is not surpassed in neatness and beauty by the nest of any other bird.

I will leave the granivorous birds to speak of another class, equally hardy, but of habits more like those of the Woodpecker. I allude to the Chickadees, to whose lively notes we are indebted for a great part of the cheerfulness of a winter's walk. These notes are not a song; but there is a liveliness in their sound, most frequently uttered during a pleasant winter-day, causing them to be associated with these agreeable changes in the weather. The Chickadees are not seen, like Snow-Birds, most numerous during a snow-storm, or after a fall of snow. Their habits are nearly the same in all weathers, except that they are more prone to be noisy and loquacious on pleasant, sunny days.

The sounds from which the Chickadee has derived his name appear to be his

call-notes, like the crowing of a Cock or the gobbling of a Turkey, and are probably designed by Nature to enable the birds, while scattered singly over the forest, to signalize their presence to others of the same species. Hence it may be observed, that, when the call is rapidly repeated, a multitude of his kindred will immediately assemble around the one that gave the alarm. When no alarm is intended to be given, the bird utters these notes but seldom, and only as he passes from one tree to another. He is probably accustomed to hearing a response, and, if one is not soon heard, he will repeat his call until it is answered; for as these birds do not forage the woods in flocks, this continual hailing is carried on between them to satisfy their desire for each other's company. A similar conversation passes between the individuals of a flock of Chickens, when scattered over a farmyard; one, on finding itself alone, will chirp until it hears a response, when it seems immediately satisfied. The call-notes of the Chickadee are very lively, with a mixture of querulousness in their tone, that renders them the more pleasing.

The Chickadee is the smallest of the birds that remain with us during the winter. He is a permanent resident, and everybody knows him. He is a lively chatterer and an agreeable companion; and as he never tarries long in one place, he does not tire one with his garrulity. He is our attendant in all our pleasant winter-walks, in the orchard or the wood, in the garden or by the rustic wayside. We have seen him, on still winter-days, flitting from tree to tree, with the liveliest motions and in the most engaging attitudes, examining every twig and branch, and winding over and under and in and out among them, and, after a few lively notes, hopping to another tree to pass through the same manœuvres. Even those who are confined to the house are not excluded from a sight of these birds; one cannot open a window, on a bright winter's morning, without a greeting from one of them on the nearest tree.

Beside the note from which the Chickadee derives his name, he sometimes utters two very plaintive notes, which are separated by a regular musical interval, making a fourth on the descending scale. They slightly resemble those of the Pewee, and are often supposed to come from some other bird, so different are they from the common note of the Chickadee. I have not been able to ascertain the circumstances under which the bird repeats this plaintive strain, but it is uttered both in summer and winter. Indeed, there is such a variety in the notes uttered at different times by this bird, that, if they were repeated in uninterrupted succession, they would form one of the most agreeable of woodland melodies.

The Chickadee is not a singing-bird. He utters his usual notes at all times of the year; but in the early part of summer he is addicted to a very low but pleasant kind of warbling, considerably varied, and wanting only more loudness and precision to entitle him to a rank with the singing-birds. This warbling does not seem intended to cheer his partner, but it is rather a sort of soliloquizing for his own amusement. If it was uttered by the young birds only, we might suppose them to be taking lessons in music, and that this was a specimen of their first attempts. I have often heard the Golden Robin warbling in a similar manner.

In company with the Chickadees in their foraging excursions, we often see two Speckled Woodpeckers, differing apparently only in size, each having a sort of red crest. The smaller of the two (*Picus pubescens*) is the Downy Woodpecker. The birds of this species are called "Sap-Suckers," from their habit of making perforations in the sound branches of trees through the bark without penetrating the wood, as if they designed only to obtain the sap. These perforations are often made in a circle round the branch, and it is highly probable that they follow the path of a grub that is concealed underneath the bark. Our farmers, who suspect every bird of some mis-

chievous designs, accuse them of boring into the tree for the purpose of drinking the sap.

The Woodpecker is a more restless, though not a more industrious bird than the Chickadee, and seldom gives the branches so thorough an examination as the latter. He searches for grubs that are concealed in the wood of the tree; he examines those spots only where he hears their scratchings, bores the wood to obtain them, and then flies off. But the Chickadee looks for insects on or near the surface, and does not confine his search to trees. He examines fences, the under part of the eaves of houses, and the wood-pile, and destroys, in the course of his foraging, many an embryo moth and butterfly which would otherwise become the parent of noxious larvæ. The Woodpecker is often represented as the emblem of industry; but the Chickadee is more truly emblematical of this virtue, and the Woodpecker of perseverance, as he never tires when drilling into the wood of a tree in quest of his prey.

Another of the companions of the Chickadee is the Brown Creeper, (*Certhia familiaris*), of similar habits, and commonly seen moving in a spiral direction around the trunks and branches of trees, and, when he is conscious of being observed, keeping on the further side of the branch. He is more frequently seen in the winter than in the summer, when he confines himself to the seclusion of the pine forest.

The different birds which I have named, as companions of the Chickadee, often assemble by seeming accident in large numbers upon one tree, and meeting with more company than is agreeable to them, they will often on these occasions make the wood resound with their noisy disputes. They may have been assembled by some accidental note of alarm, and on finding no particular cause for it, they raise a shout that reminds one of the extraordinary vociferation with which young men and boys conclude a false alarm of fire in the early part of the night. These different birds, though evidently social, are not gregarious, and sel-

dom, without vexation, endure the presence of more than two or three companions.

The Nut-Hatch (*Sitta Caroliniensis*) is often found among these assemblages, and may be recognized by his piercing trumpet-like note. This bird resembles the Woodpeckers in the shape of the bill, but has only one hinder toe, instead of two; and is said to have derived its name from a habit of breaking open or hatching nuts, to obtain the kernel. He is a permanent inhabitant of the cold parts of the American continent, resembling the Titmouse in his diligence and activity, and in the various manœuvres he performs while in quest of his insect-food.

There are times when even this class of birds, that collect their food from the bark and wood of trees, are driven to great extremities. When the trees are incased with ice, which, though not impenetrable by their strong bills, prevents their laying hold of the bark with their claws for support, they are in some danger of starving. It is at such times that the gardens and barnyards are frequented by large numbers of Woodpeckers, Creepers, and Nut-Hatches, driven by this necessity from their usual haunts. A piece of suet fastened to the branch of a tree, at any time of the winter, would soon be discovered by these birds and afford them a grateful repast. I have frequently assembled them under my windows by this allurements.

I will leave the Chickadees and their companions to speak of another class of birds of different character and habits: these are the Jays, and their sable-plumed congeners of the Crow family. In all parts of the country that abound in woods of any description, we are sure to be greeted by the loud voice of the Blue Jay, one of the most conspicuous tenants of the forest. He has a beautiful outward appearance, under which he conceals an unamiable temper and a propensity to mischief. Indeed, there is no other bird in our forest that is arrayed in equal splendor. His neck of fine purple, his pale azure crest and head with

silky plumes, his black crescent-shaped collar, his wings and tail-feathers of bright blue with stripes of white and black, and his elegant form and vivacious manners, combine to render him attractive to all observers.

But with all this beauty, he has, like the Peacock, a harsh voice; he is a thief, and a disturber of the peace. He is a sort of Ishmael among the sylvan tribes, who are startled at the sound of his voice, and fear him as a bandit. The farmer, who is well acquainted with his habits, is no friend to him; for he not only takes what is required for his immediate wants, but hoards a variety of articles in large quantities for future use. It would seem as if he were aware when he was engaged in an honest and when in a dishonest expedition; for while searching for food in the wood or open field, he is extremely noisy,—but when he ventures into a barn, to take what does not belong to him, he is silent and stealthy, and exhibits all the peculiar manners of a thief.

It would be no mean task to enumerate all the acts of mischief perpetrated by this bird; and I cannot but look upon him as one of the most guilty of the feathered tribe. He plunders the cornfield both at seed-time and harvest; he steals everything that is eatable, and conceals it in his hoarding-places; he destroys the eggs of smaller birds and devours their young; he quarrels with all other species, and his life is a constant scene of contentions. He is restless, pugnacious, and irascible, and always seems like one who is out on some expedition. Yet, though a pest to other birds, he is a watchful parent and a faithful guardian of his offspring. It is dangerous to venture near the nest of a pair of Jays, as they immediately attack the adventurer, aiming their blows at his face and eyes with the most savage determination.

Like the Magpie, the Jay has considerable talent for mimicry, and in a state of domestication may be taught to articulate words like a Parrot. At certain times I have heard this bird utter a few notes resembling the tinkle of a bell, and

which, if syllabled, might form such a word as *dilly-lily*; but it is not a musical strain. Indeed, there is no music in his nature, and in all his imitations of other sounds he prefers the harsh to the melodious, such as the voice of the Hawk, the Owl, and other unmusical birds.

The Blue Jay is a true American; he is known throughout this continent, and never visits any other country. At no season is he absent from our woods, and he is an industrious consumer of the larger insects and grubs, atoning in this way for some of his evil deeds. In this respect, however, his services are not to be compared to those of the Robin and the Blue-Bird. Yet I am not prepared to say that I would consent to his banishment, for he is one of the most cheering tenants of the groves, at a season when they have but few inhabitants; and I never listen to his voice without recalling a crowd of charming reminiscences of pleasant winter excursions and adventures at an early period of my life. The very harshness of his voice has caused it to be impressed more forcibly upon the memory, in connection with these scenes.

The common Crow may be considered the representative, in America, of the European Rook, which he resembles in many of his habits, performing similar services, and being guilty of the same mischievous deeds. It is remarkable that in Europe, where land is more valuable than in this country, and where agriculture is carried on with an amount of skill and nicety that would astonish an American farmer, the people are not so jealous of the birds. In Great Britain rookeries are regular establishments, and the Rooks, notwithstanding the mischief they do, are protected, on account of their services to agriculture. The farmers of Europe, having learned by repeated observation, that, without the aid of mischievous birds, the work of the farmer would be sacrificed to the more destructive insect-race, forgive them their trespasses, as we forgive the trespasses of cats and dogs. The respect shown to birds by any people seems to bear a certain ratio to the an-

tiquity of the nation. Hence the sacredness with which they are regarded in Japan, where the population is so dense that the inhabitants would feel that they could ill afford to divide the produce of their fields with the birds, unless they were convinced of their usefulness.

The Crow is one of the most unfortunate of the feathered tribe in his relations to man; for by almost all nations he is regarded with hatred, and every man's hand is against him. He is protected neither by custom nor superstition; the sentimentalist cares nothing for him as an object of poetical regard, and the utilitarian is blind to his services as a scavenger. The farmer considers him as the very ringleader of mischief, and uses all means he can invent for his destruction; the friend of the singing-birds bears him a grudge as the destroyer of their eggs and young; and even the moralist is disposed to condemn him for his cunning and dissimulation.

Hence he is everywhere hated and persecuted, and the expedients used for his destruction are numerous and revolting to the sensibilities. He is outlawed by acts of Parliament and other legislative bodies; he is hunted with the gun; he is caught in crow-nets; he is hoodwinked with bits of paper smeared with bird-lime, in which he is caught by means of a bait; he is poisoned with grain steeped in hellebore and strychnine; the reeds in which he roosts are treacherously set on fire; he is pinioned by his wings, on his back, and is made to grapple his sympathizing companions who come to his rescue; like an infidel, he is not allowed the benefit of truth to save his reputation; and children, after receiving lessons of humanity, are taught to regard the Crow as an unworthy subject when they carry their precepts into practice. Every government has set a price upon his head, and every people holds him up to public execration.

As an apology for these atrocities, might be enumerated a long catalogue of misdemeanors of which he is guilty. He pillages the cornfield, and pulls up the

young shoots of maize to obtain the kernels attached to their roots; he destroys the eggs and the young of innocent birds which we should like to preserve; he purloins fruit from the garden and orchard, and carries off young ducks and chickens from the farmyard. Beside his mischievous propensities and his habits of thieving, he is accused of cunning, and of a depraved disposition. He who would plead for the Crow will not deny the general truth of these accusations, but, on the other hand, would enumerate certain special benefits which he confers upon man.

In the catalogue of the services of this bird we find many details which should lead us to pause before we consent to his destruction. He consumes, in the course of the year, vast quantities of grubs, worms, and noxious vermin; he is a valuable scavenger, and clears the land of offensive masses of decaying animal substances; he hunts the grass-fields, and pulls out and devours the underground caterpillars, wherever he perceives the signs of their operations, as evinced by the wilted stalks; he destroys mice, young rats, lizards, and the smaller serpents; lastly, he is a volunteer sentinel about the farm, and drives the Hawk from its inclosures, thus preventing greater mischief than that of which he himself is guilty. It is chiefly during seed-time and harvest that the depredations of the Crow are committed; during the remainder of the year we witness only his services; and so highly are these services appreciated by those who have written of birds, that I cannot name an ornithologist who does not plead in his behalf.

Let us turn our attention, for a moment, to his moral qualities. In vain is he accused of cunning, when without this quality he could not live. His wariness is really a virtue, and, under the circumstances in which he is placed, it is his principal means of self-preservation. He has no moral principles, no creed, to which he is under obligations to offer himself as a martyr. His cunning is his armor; and I am persuaded that the per-

secutions to which he has always been subjected have caused the development of an amount of intelligence that elevates him many degrees above the majority of the feathered race.

There are few birds that equal the Crow in sagacity. He observes many things that would seem to require the faculties of a rational being. He judges with accuracy, from the deportment of the person approaching him, if he is prepared to do him an injury; and seems to pay no regard to one who is strolling the fields in search of flowers or for recreation. On such occasions, one may get so near him as to observe his manners, and even to note the varying shades of his plumage. But in vain does the sportsman endeavor to approach him. So sure is he to fly at the right moment for his safety, that one might suppose he could measure the distance of gunshot.

The voice of the Crow is like no other sound uttered by the feathered race; it is harsh and unmelodious, and though he is capable, when domesticated, of imitating human speech, he cannot sing. But *Æsop* mistook the character of this bird when he represented him as the dupe of the fox, who gained the bit of cheese he carried in his mouth by inducing him to exhibit his musical powers. The Crow could not be fooled by any such appeals to his vanity.

The Crow is commonly regarded as a homely bird; yet he is not without beauty. His coat of glossy black with violet reflections, his dark eyes and sagacious expression of countenance, his stately and graceful gait, and his steady and equable flight, combine to give him a proud and dignified appearance. The Crow and the Raven have always been celebrated for their gravity,—a character that seems to be the result of their black sacerdotal vesture, and of certain manifestations of intelligence in their ways and general deportment. Indeed, any one who should watch the motions of the Crow for the space of five minutes, either when he is stalking alone in the field, or when he is careering with his fellows

around some tall tree in the forest, would acknowledge that he deserves to be called a grave bird.

Setting aside the services rendered by the Crow to agriculture, I esteem him for certain qualities which are agreeably associated with the charms of Nature. It is not the singing-birds alone that contribute by their voices to gladden the husbandman and cheer the solitary traveller. The crowing of the Cock at the break of day is as joyful a sound, though not so musical, as the voice of the Robin who chants his lays at the same early hour. To me the cawing of the Crow is cheering and delightful, and it is heard long before the majority of birds have left their perch. If not one of the melodious of morn, it is one of the most notable sounds that herald its approach. And how intimately is the voice of this bird associated with the sunshine of calm winter-days,—with our woodland excursions during this inclement season,—with the stroke of the woodman's axe,—with open doors in bright and pleasant weather, when the eaves are dripping with the melting snow,—and with all those cheerful sounds that enliven the groves during that period when every object is valuable that relieves the silence or softens the dreary aspect of Nature!

If we leave the open fields and woods, and ramble near the coast to some retired and solitary branch of the sea, our meditations may be suddenly startled by the harsh voice of the Kingfisher, like the sound of a watchman's rattle. This bird is seldom seen in winter in the interior; most of his species migrate southwardly and to the sea-coast, just so far as to be within reach of the open waters. As they subsist on the smaller kinds of fishes, they would perish with hunger, after the waters are frozen, if they did not migrate. But the Kingfisher often remains on the coast during open winters, and may therefore be considered one of our winter-birds.

This bird is the celebrated *Alcedo*, or *Halecyon*, of the ancients, who attribut-

ed to him many apparently supernatural powers. He was supposed to construct his nest upon the waves, on which it was made to float like a skiff. But as the turbulence of a storm would be likely to cause its destruction, Nature had gifted him with the extraordinary power of stilling the motions of the winds and waves, during the period of incubation. Hence the serene weather that accompanies the summer solstice was supposed to be occasioned by the benign influence of this bird, and the term "halecyon days" was applied to this period. It is remarkable that the fable should add to these supernatural gifts the power of song, as one of the accomplishments of the Kingfisher. These superstitions must have been very general among the ancients, and were not confined to the Greeks and Romans. Some of the Asiatic nations still wear the skin of the Kingfisher about their persons, as a protection against both moral and physical evils; the feathers are used as love-charms; and it is believed, that, if the body of the Kingfisher be evenly fixed upon a pivot, it will turn its head to the north, like the magnetic needle.

This bird is singularly grotesque in his appearance, though not without beauty of plumage. With his long, straight, and quadrangular bill, his short and diminutive feet and legs, and his immense head, his plumage of a handsome dusky blue, with a bluish band on the breast and a white collar around the neck,—when this mixture of the grotesque and the beautiful is considered in connection with the singularity of his habits, we need not marvel at the superstitions connected with his history. He sits patiently, like an angler, on a post at the head of a wharf, or on a branch of a tree that extends over the bank, and, leaning obliquely, with extended head and beak, he watches for his finny prey. There, with the light blue sky above him and the dark blue waves beneath, nothing on the surface of the water can escape his penetrating eyes. Quickly, with a sudden swoop, he seizes a single fish from an unsuspecting

shoal, and announces his success by the peculiar sound of his rattle.

It may not have been observed by all that the most interesting periods or situations for rambling are not those which most abound with exciting scenes and objects. There must be a certain dearth of individual objects that draw the attention, intermingled with occasional remarkable or mysterious sights and sounds, to yield an excursion its greatest interest. The hunter (unless he be a purveyor for the market) understands this philosophy, and knows that there is more pleasure in chasing a single deer or a solitary fox over miles of pasture and moorland, than in hunting where these animals are abundant, and slaughtering them as fast as one can load his gun. The pleasures attending a rural excursion in the winter are founded on this fact, and may be explained by this principle. There, amid the general silence, every sound attracts attention and is accompanied by its echo; and since the trees and shrubs have lost their leafy garniture, every tree and other object has its own distinct shadow, and we fix our attention more easily upon anything that excites our interest than when it is distracted by the confusion of numbers.

Hence it is in the winter that the picturesque character of the flight of birds is particularly noticeable. In summer, and in autumn, before the fall of the leaf, birds are partially concealed by the foliage of trees, so that the manner of their flight does not become so readily apparent. But in winter, if we start a flock of birds from the ground, we can hardly avoid taking notice of all the peculiarities of their movements. I have alluded to the descent of Snow-Buntings upon the landscape as singularly picturesque; but the motions of a flock of Quails, when suddenly aroused from a thicket, are not less so. When a Pigeon, or any other bird with strong and large wings, takes flight, the motions of its wings are not vibratory, and its progress through the air is so rapid as to injure the pleasing effect of its motions, because we obtain

no distinct perception of the bird during its flight. It is quite otherwise with the Quail. The body of this bird is plump and heavy, and his wings are short, and have a peculiar concavity of the under surface when expanded; their motions are very rapid, and, having but little sweep, the bird seems to sail on the air, carried along by a gentle but rapid vibration of the wings, which describe only a very small arc of a circle. Hence we observe the entire shape of the bird during its flight. The Partridge, and other gallinaceous birds, fly in a similar manner; but, on account of their larger size, their motions are less attractive.

The Humming-Bird has proportionally larger wings than the Quail, and, when flying, his wings describe almost a complete circle in their rapid vibrations. If we look upon one during his flight, he seems to have no wings, but rather to be encircled by a semi-transparent halo. There are other birds that seem to be wings only, their bodies being hardly perceptible, on account of their small proportional size; such are the Swallow, the Pigeon, the Cuckoo, and the Night-Hawk.

Birds of prey are remarkable for their steady and graceful flight; the motion of their wings is slow, while, like the Pigeon, they are capable of propelling themselves through the air with great rapidity. The circumgyrations of a Hawk, when reconnoitring far aloft in the air, are singularly graceful. The flight of the Crow and the Raven is slow and apparently difficult, and they are easily overtaken and annoyed by the King-Bird and other small birds. They are not formed, like the Falcon, to catch their prey upon the wing, and, though their wings are large and powerful, they are incapable of performing those graceful and difficult evolutions which we observe in the flight of birds of prey. The

flight of Herons resembles that of the Raven.

Small birds, with the exception of a few species, move in an undulating course, alternately rising and sinking. Birds that move in this manner are, I believe, incapable of making a long journey on the wing without rest, and commonly perform their migrations by short daily stages.

The flight of the little Sand-Pipers, which frequent the salt marshes in numerous flocks, is particularly worthy of study. It is not unlike the flight of Quails, but more evenly sustained, on account of the greater length and power of their wings. These birds are capable of holding an even flight in a perfectly horizontal line, only a few inches above the surface of the ground. When they alight, they seldom make a curve or gyration, but descend in a straight and oblique course. Snow-Buntings usually turn about, just before they reach the ground; and I have seen them perform the most intricate changes, like the movements of a cotillon-party, executed with the rapidity of arrows, when suddenly checked in their flight by the discovery of a good tract of forage.

With these observations, which might be indefinitely extended, I take leave of the subject, simply remarking, that to the motions of birds, no less than to their beauty of plumage and the sounds of their voices, are we indebted for a great part of the picturesque attractions of landscape; and the more we study them, the more are we convinced, that, in whatever direction we turn our observations, we may extend them to infinity. There is no limit to any study of Nature, and even one so apparently insignificant as the flight of birds leads to an endless series of interesting facts, and opens the eyes to new beauties in the aspect of Nature and new sources of rational delight.

"THE NEW LIFE" OF DANTE.

[Concluded.]

III.

THE year 1289 was one marked in the annals of Florence and of Italy by events which are still famous, scored by the genius of Dante upon the memory of the world. It was in this year that Count Ugolino and his sons and grandsons were starved by the Pisans in their tower prison. A few months later, Francesca da Rimini was murdered by her husband. Between the dates of these two terrible events the Florentines had won the great victory of Campaldino; and thus, in this short space, the materials had been given to the poet for the two best-known and most powerful stories and for one of the most striking episodes of the "Divina Commedia."

In the great and hard-fought battle of Campaldino Dante himself took part. "I was at first greatly afraid," he says, in a letter of which but a few sentences have been preserved,*—"but at the end I felt the greatest joy,—according to the various chances of the battle." When the victorious army returned to Florence, a splendid procession, with the clergy at its head, with the arts of the city each under its banner, and with all manner of pomp, went out to meet it. There were long-continued feasts and rejoicings. The battle had been fought on the 11th of June, the day of St. Barnabas, and the Republic, though already engaged in magnificent works of church-building, decreed that a new church should be erected in honor of the Saint on whose day the victory had been won.

A little later in that summer, Dante was one of a troop of Florentines who joined the forces of Lucca in levying war upon the Pisan territory. The stronghold of Caprona was taken, and Dante was present at its capture; for he says,

* See Lionardo Aretino's *Vita di Dante*.

(*Inferno*, xxi. 94-96,) "I saw the foot-soldiers, who, having made terms, came out from Caprona, afraid when they beheld themselves among so many enemies."*

Thus, during a great part of the summer of 1289, Dante was in active service as a soldier. He was no lovesick idler, no mere home-keeping writer of verses, but was already taking his part in the affairs of the state which he was afterwards to be called on for a time to assist in governing, and he was laying up those stores of experience which were to serve as the material out of which his vivifying imagination was to form the great national poem of Italy. But of this active life, of these personal engagements, of these terrible events which took such strong possession of his soul, there is no word, no suggestion even, in the book of his "New Life." In it there is no echo, however faint, of those storms of public violence and private passion which broke dark over Italy. In the midst of the tumults which sprang from the jealousies of rival states, from the internal discords of cities, from the divisions of parties, from the bitterness of domestic quarrels,—this little book is full of tenderness and peace, and tells its story of love as if the world were the abode of tranquillity. No external excitements could break into the inner chambers of Dante's heart to displace the love that dwelt within them. The contrast between the purity and the serenity of the "Vita Nuova" and the coarseness and cruelty of the deeds that were going on while it was being

* Landino, and most of the commentators after him, state that Dante refers in this passage to the fear of the garrison taken in the place when it was recaptured the next year by the Pisans. But as Florence and Pisa continued at desperate enmity, Dante could hardly have witnessed this latter scene.

written is complete. Every man in some sort leads a double life,—one real and his own, the other seeming and the world's,—but with few is the separation so entire as it was with Dante.

But in these troubled times the "New Life" was drawing to its close. The spring of 1290 had come, and the poet, now twenty-five years old, sixteen years having passed since he first beheld Beatrice, was engaged in writing a poem to tell what effect the virtue of his lady wrought upon him. He had written but the following portion when it was broken off, never to be resumed:—

"So long hath Love retained me at his hest,
And to his sway hath so accustomed me,
That as at first he cruel used to be,
So in my heart he now doth sweetly rest.
Thus when by him my strength is dis-
sessed,

So that the spirits seem away to flee,
My frail soul feels such sweetness verily,
That with it pallor doth my face invest.
Then Love o'er me such mastery doth seize,
He makes my sighs in words to take their
way,

And they unto my lady go to pray
That she to give me further grace would
please.

Where'er she sees me, this to me occurs,
Nor can it be believed what humbleness is
hers."

"Quomodo sedet sola civitas plena populo! facta est quasi vidua domina gentium!" [How doth the city sit solitary that was full of people! how is she become as a widow, she that was great among the nations!]*

"I was yet engaged upon this Canzone, and had finished the above stanza, when the Lord of justice called this most gentle one unto glory under the banner of that holy Queen Mary whose name was ever spoken with greatest reverence by this blessed Beatrice.†

* *Lamentations*, I. 1.

† There is among the Canzoni of Dante one beginning,

"Morte poich' io non truovo a cui mi doglia," which seems to have been written during the illness of Beatrice, in view of her approaching death. It is a beautiful and touching poem. Death is besought to spare that

"And although it might give pleasure, were I now to tell somewhat of her departure from us, it is not my intention to treat of it here for three reasons. The first is, that it is no part of the present design, as may be seen in the poem of this little book. The second is, that, supposing it were so, my pen would not be sufficient to treat of it in a fitting manner. The third is, that, supposing both the one and the other, it would not be becoming in me to treat of it, since, in doing so, I should be obliged to praise myself,—a thing altogether blameworthy in whosoever does it,—and therefore I leave this subject to some other narrator.

"Nevertheless, since in what precedes there has been occasion to make frequent mention of the number nine,* and ap-

lady, "who of every good is the true gate."—"If thou extinguishest the light of those beautiful eyes, which were wont to be so sweet a guide to mine, I see that thou desirest my death."

"O Death, delay not mercy, if 'tis thine!

For now I seem to see the heavens ope,
And Angels of the Lord descending here,
Intent to bear away the holy soul
Of her whose honor there above is sung."

* In the earlier part of the *Vita Nuova* there are many references to this number. We translate in full the passage given above, as one of the most striking illustrations of Dante's youthful fondness for seeking for the mystical relations and inner meanings of things. The attributing such importance to the properties of the number nine, though it might at first view seem puerile and an indication of poverty of feeling, was a portion of the superstitious belief of the age, in which Dante naturally shared. The mysterious properties of numbers were a subject of serious study, and were connected with various branches of science and of life.

"Themistius vero, et Boethius, et Averrois Babylonius, cum Platone, sic numeros extollunt, ut neminem absque illis posse recte philosophari putent. Loquuntur autem de numero rationali et formali, non de materiali, sensibili, sive vocali numero mercatorum. . . Sed intendunt ad proportionem ex illo resultantem, quem numerum naturalem et formalem et rationalem vocant; ex quo magna sacramenta emanant, tam in naturalibus quam divinis atque cœlestibus. . . . In numeris

parently not without reason, and since in her departure this number appeared to have a large place, it is fitting to say something on this point, seeing that it seems to belong to our design. Wherefore I will first tell how it had place in her departure, and then I will assign some reason why this number was so friendly to her. I say, that, according to the mode of reckoning in Italy, her most noble soul departed in the first hour of the ninth day of the month; and according to the reckoning, in Syria, she departed in the ninth month of the year, since the first month there is Tismim, which with us is October; and according to our reckoning, she departed in that year of our indiction, that is, of the years of the Lord, in which the perfect number * was completed for the ninth time in that century in which she had been set in the world; and she was of the Christians of the thirteenth century.†

"One reason why this number was so friendly to her may be this: since, according to Ptolemy and the Christian truth, there are nine heavens which move, and, according to the common astrological opinion, these heavens work effects here below according to their relative positions, this number was her friend, to the end that it might be understood that at her generation all the nine movable heavens were in most perfect conjunction.‡ This is one reason; but considering more subtly and according to infallible truth, this number was she herself,—I speak in a similitude, and I mean as follows. The itaque magnam latere efficaciam et virtutem tam ad bonum quam ad malum, non modo splendidissimi philosophi unanimiter docent, sed etiam doctores Catholici."—Cornelii Agrippæ *De Occultâ Philosophiâ*, Liber Secundus, cc. 2, 3.

* The perfect number is ten.

† Thus it appears that Beatrice died on the 9th of June, 1290. She was a little more than twenty-four years old.

‡ Compare with this passage Ballata v.,

"Io'mi son pargoletta bella e nova,"

and Sonnet xlv.,

"Da quella luce che 'l suo corso gira";
the latter probably in praise of Philosophy.

number three is the root of nine, since, without any other number, multiplied by itself, it makes nine,—as we see plainly that three times three are nine. Then, if three is the factor by itself of nine, and the Author of Miracles * by himself is three,—Father, Son, and Holy Spirit, who are three and one,—this lady was accompanied by the number nine that it might be understood that she was a nine, that is, a miracle, whose only root is the marvellous Trinity. Perhaps a more subtle person might discover some more subtle reason for this; but this is the one that I see for it, and which pleases me the best."

After thus treating of the number nine in its connection with Beatrice, Dante goes on to say, that, when this most gentle lady had gone from this world, the city appeared widowed and despoiled of every dignity; whereupon he wrote to the princes of the earth an account of its condition, beginning with the words of Jeremiah which he quoted at the entrance of this new matter. The remainder of this letter he does not give, because it was in Latin, and in this work it was his intention, from the beginning, to write only in the vulgar tongue; and such was the understanding of the friend for whom he writes,—that friend being, as we may suppose, Guido Cavalcanti, whom Dante, it may be remembered, has already spoken of as the chief among his friends. Then succeeds a Canzone lamenting the death of Beatrice, which, instead of being followed by a verbal exposition, as is the case with all that have gone before, is preceded by one, in order that it may seem, as it were, desolate and like a widow at its end. And this arrangement is preserved in regard to all the remaining poems in the little volume. In this poem he says that the Eternal Sire called Beatrice to himself, because he saw that this world was not worthy of such a gentle thing; and he says of his own life, that no tongue could tell what it has

* The point is here lost in a translation,—factor and author being expressed in the original by one word, *fattore*.

been since his lady went away to heaven.

Among the sonnets ascribed to Dante is one which, if it be his, must have been written about this time, and which, although not included in the "*Vita Nuova*," seems not unworthy to find a place here. Its imagery, at least, connects it with some of the sonnets in the earlier portion of the book.

"One day came Melancholy unto me,
And said, 'With thee I will awhile abide';
And, as it seemed, attending at her side,
Anger and Grief did bear her company.

"Depart! Away!" I cried out eagerly.
Then like a Greek she unto me replied;
'And while she stood discoursing in her pride,

I looked, and Love approaching us I see.
"In cloth of black full strangely was he clad,
A little hood he wore upon his head,
And down his face tears flowing fast he had.

"Poor little wretch! what ails thee?" then I said.

And he replied, 'I woful am, and sad,
Sweet brother, for our lady who is dead.'"

About this time, Dante tells us, a person who stood to him in friendship next to his first friend, and who was of the closest relationship to his glorious lady, so that we may believe it was her brother, came to him and prayed him to write something on a lady who was dead. Dante, believing that he meant the blessed Beatrice, accordingly wrote for him a sonnet; and then, reflecting that so short a poem appeared but a poor and bare service for one who was so nearly connected with her, added to it a Canzone, and gave both to him.

As the months passed on, his grief still continued fresh, and the memory of his lady dwelt continually with him. It happened, that, "on that day which completed a year since this lady was made one of the citizens of eternal life, I was seated in a place where, remembering her, I drew an Angel upon certain tablets. And while I was drawing it, I turned my eyes, and saw at my side certain men to whom it was becoming to do honor, and who were looking at what I did; and, as was afterward told me, they had

been there now some time before I perceived them. When I saw them, I rose, and, saluting them, said, 'Another was just now with me, and on that account I was in thought.' When these persons had gone, I returned to my work, that is, to drawing figures of Angels; and while doing this, a thought came to me of saying words in rhyme, as for an anniversary poem for her, and of addressing them to those who had come to me. Then I said this sonnet, which has two beginnings:—

FIRST BEGINNING.

"Unto my mind remembering had come
The gentle lady, with such pure worth
gaced,
That by the Lord Most High she had been
placed
Within the heaven of peace, where Mary
hath her home."

SECOND BEGINNING.

"Unto my mind had come, indeed, in thought,
That gentle one for whom Love's tears are
shed,
Just at the time when, by his power led,
To see what I was doing you were brought.
"Love, who within my mind did her perceive,
Was roused awake within my wasted
heart,
And said unto my sighs, 'Go forth! depart!'
Whereon each one in grief did take its
leave.
"Lamenting they from out my breast did go,
And uttering a voice that often led
The grievous tears unto my saddened
eyes.
"But those which issued with the greatest
woe,
'O noble soul,' they in departing said,
'To-day makes up the year since thou to
heaven didst rise.'"

The preceding passage is one of the many in the "*Vita Nuova*" which are of peculiar interest, as illustrating the personal tastes of Dante, and the common modes of his life. "I was drawing," he says, "the figure of an Angel"; and this statement is the more noticeable, because Giotto, the man who set painting on its modern course, was not yet old enough to have exercised any influence upon Dante.* The friendship

* In this year, 1291, Giotto was but fifteen years old, and probably a student with Cima-

which afterwards existed between them had its beginning at a later period. At this time Cimabue still held the field. He often painted angels around the figures of the Virgin and her Child; and in his most famous picture, in the Church of Sta. Maria Novella, there are certain angels of which Vasari says, with truth, that, though painted in the Greek manner, they show an approach toward the modern style of drawing. These angels may well have seemed beautiful to eyes accustomed to the hard unnaturalness of earlier works. The love of Art pervaded Florence, and a nature so sensitive and so sympathetic as Dante's could not but partake of it in the fullest measure. Art was then no adjunct of sentimentalism, no encourager of idleness. It was connected with all that was most serious and all that was most delightful in life. It is difficult, indeed, to realize the delight which it gave, and the earnestness with which it was followed at this period, when it seemed, as by a miracle, to fling off the winding-sheet which had long wrapped its stiffened limbs, and to come forth with new and unexampled life.

The strength and the intelligence of Dante's love of Art are shown in many beautiful passages and allusions in the "Divina Commedia." There was something of universality, not only in his imagination, but also in his acquisitions. Of the sources of learning which were then open, there was not one which he had not visited; of the fountains of inspiration, not one out of which he had not drunk. All the arts—poetry, painting, sculpture, and music—were alike

bue. Benvenuto da Imola, who lectured publicly at Bologna on the *Divina Commedia* in the year 1378, reports, that, while Giotto, still a young man, was painting at Padua, Dante visited him. And Vasari says, that it was a tradition, that Giotto had painted, in a chapel at Naples, scenes out of the *Apocalypse*, from designs furnished him by the poet. If we may believe another tradition, which there seems indeed little reason to doubt, Giotto went to Ravenna during the last years of Dante's life, that he might spend there some time in company with his exiled friend.

dear to him. His Canzoni were written to be sung; and one of the most charming scenes in the great poem is that in which is described his meeting with his friend Casella, the musician, who sang to him one of his own Canzoni so sweetly, that "the sweetness still within me sounds."*

"Dante took great delight in music, and was an excellent draughtsman," says Aretino, his second biographer; and Boccaccio reports, that in his youth he took great pleasure in music, and was the friend of all the best musicians and singers of his time. There is, perhaps, in the whole range of literature, no nobler homage to Art than that which is contained in the tenth and twelfth cantos of the "Purgatory," in which Dante represents the Creator himself as using its means to impress the lessons of truth upon those whose souls were being purified for the final attainment of heaven. The passages are too long for extract, and though their wonderful beauty tempts us to linger over them, we must return to the course of the story of Dante's life as it appears in the concluding pages of the "New Life."

Many months had passed since Beatrice's death, when Dante happened to be in a place which recalled the past time to him, and filled him with grief. While standing here, he raised his eyes and saw a young and beautiful lady looking out from a window compassionately upon his sad aspect. The tenderness of her look touched his heart and moved his tears. Many times afterwards he saw her, and her face was always full of compassion, and pale, so that it reminded him of the look of his own most noble lady. But at length his eyes began to

* This Canzone, to the exposition of which the third Trattato of the *Convito* is devoted, has been inimitably translated by the Reverend Charles T. Brooks. We believe it to be the happiest version of one of Dante's minor poems that exists in our language,—and every student of the poet will recognize the success with which very great difficulties have been overcome. It appeared in the *Crayon*, for February, 1858.

delight too much in seeing her; wherefore he often cursed their vanity, and esteemed himself as vile, and there was a hard battle within himself between the remembrance of his lady and the new desire of his eyes.

At length, he says, "The sight of this lady brought me into so new a condition, that I often thought of her as of one who pleased me exceedingly,—and I thought of her thus: 'This is a gentle, beautiful, young, and discreet lady, and she has perhaps appeared by will of Love, in order that my life may find repose.' And often I thought more amorously, so that my heart consented in it, that is, approved my reasoning. And after it had thus consented, I, moved as if by reason, reflected, and said to myself, 'Ah, what thought is this that in so vile a way seeks to console me, and leaves me scarcely any other thought?' Then another thought rose up and said, 'Now that thou hast been in so great tribulation of Love, why wilt thou not withdraw thyself from such bitterness? Thou seest that this is an inspiration that sets the desires of Love before thee, and proceeds from a place no less gentle than the eyes of the lady who has shown herself so pitiful toward thee.' Wherefore, I, having often thus combated with myself, wished to say some words of it. And as, in this battle of thoughts, those which spoke for her won the victory, it seemed to me becoming to address her, and I said this sonnet, which begins, 'A gentle thought'; and I called it *gentle* because I was speaking to a gentle lady,—but otherwise it was most vile.

"A gentle thought that of you holds discourse

Cometh now frequently with me to dwell,
And in so sweet a way of Love doth tell,
My heart to yield unto him he doth force.

"Who, then, is this," the soul says to the heart,

'Who cometh to bring comfort to our mind?
And is his virtue of so potent kind,
That other thoughts he maketh to depart?'

"O saddened soul," the heart to her replies,

'This is a little spirit fresh from Love,
Whose own desires he before me brings;

"His very life and all his power doth move
Forth from the sweet compassionating
eyes
Of her so grieved by our sufferings.'"

"One day, about the ninth hour, there arose within me a strong imagination opposed to this adversary of reason. For I seemed to see the glorified Beatrice in that crimson garment in which she had first appeared to my eyes, and she seemed to me young, of the same age as when I first saw her. Then I began to think of her, and, calling to mind the past time in its order, my heart began to repent bitterly of the desire by which it had so vilely allowed itself for some days to be possessed, contrary to the constancy of reason. And this so wicked desire being expelled, all my thoughts returned to their most gentle Beatrice, and I say that thenceforth I began to think of her with my heart possessed utterly by shame, so that it was often manifested by my sighs; for almost all of them, as they went forth, told what was discoursed of in my heart,—the name of that gentlest one, and how she had gone from us. . . . And I wished that my wicked desire and vain temptation might be known to be at an end; and that the rhymed words which I had before written might induce no doubt, I proposed to make a sonnet in which I would include what I have now told."

With this sonnet Dante ends the story in the "Vita Nuova" of the wandering of his eyes, and the short faithlessness of his heart; but it is retold with some additions in the "Convito" or "Banquet," a work written many years afterward; and in this later version there are some details which serve to fill out and illustrate the earlier narrative.* The same tender and refined feeling which inspires the "Vita Nuova" gives its tone to all

* The differences in the two accounts of this period of Dante's experience, and the view of Beatrice presented in the *Convito*, suggest curious and interesting questions, the solution of which has been obscured by the dulness of commentators. We must, however, leave the discussion of these points till some other opportunity.

the passages in which the poet recalls his youthful days and the memory of Beatrice in this work of his sorrowful manhood. In the midst of its serious and philosophic discourse this little story winds in and out its thread of personal recollection and of sweet romantic sentiment. It affords new insight into the recesses of Dante's heart, and exhibits the permanence of the gracious qualities of his youth.

Its opening sentence is full of the imagery of love. "Since the death of that blessed Beatrice who lives in heaven with the angels, and on earth with my soul, the star of Venus had twice shone in the different seasons, as the star of morning and of evening, when that gentle lady, of whom I have made mention near the close of the "New Life," first appeared before my eyes accompanied by Love, and gained some place in my mind.

. . . And before this love could become perfect, there arose a great battle between the thought that sprang from it and that which was opposed to it, and which still held the fortress of my mind for the glorified Beatrice."*

And so hard was this struggle, and so painful, that Dante took refuge from it in the composition of a poem addressed to the Angelic Intelligences who move the third heaven, that is, the heaven of Venus; and it is to the exposition of the true meaning of this Canzone that the second book or treatise of the "Convito" is directed. In one of the later chapters he says, (and the passage is a most striking one, from its own declaration, as well as from its relation to the vision of the "Divina Commedia,")—"The life of my heart was wont to be a sweet and delightful thought, which often went to the feet of the Lord of those to whom I speak, that is, to God,—for, thinking, I contemplated the kingdom of the Blessed. And I tell [in my poem] the final cause of my mounting thither in thought, when I say, 'There I beheld a lady in glory'; [and I say this] in order that it may be understood that I was certain, and am certain,

through her gracious revelation, that she was in heaven, whither I in my thought oftentimes went,—as it were, seized up. And this made me desirous of death, that I might go there where she was."* Following upon the chapter in which this remarkable passage occurs is one which is chiefly occupied with a digression upon the immortality of the soul,—and with discourse upon this matter, says Dante, "it will be beautiful to finish speaking of that living and blessed Beatrice, of whom I intend to say no more in this book. . . . And I believe and affirm and am certain that I shall pass after this to another and better life, in which that glorious lady lives of whom my soul was enamored."†

But it is not from the "Convito" alone that this portion of the "Vita Nuova" receives illustration. In that passage of the "Purgatory" in which Beatrice is described as appearing in person to her lover the first time since her death, she addresses him in words of stern rebuke of his fickleness and his infidelity to her memory. The whole scene is, perhaps, unsurpassed in imaginative reality; the vision appears to have an actual existence, and the poet himself is subdued by the power of his own imagination. He tells the words of Beatrice with the same feeling with which he would have repeated them, had they fallen on his mortal ear. His grief and shame are real, and there is no element of feigning in them. That in truth he had seemed to himself to listen to and to behold what he tells, it is scarcely possible to doubt. Beatrice says,—

"Some while at heart my presence kept him sound;

My girlish eyes to his observance lending,
I led him with me on the right way bound.

When of my second age the steps ascending,

I bore my life into another sphere,

Then stole he from me, after others bending.

When I arose from flesh to spirit clear,

* *Convito*, Tratt. ii. c. 8.

† *Id.* c. 9.

* *Convito*, Tratt. ii. c. 3.

When beauty, worthiness, upon me grew,
I was to him less pleasing and less dear." *

But although Beatrice only gives utterance to the self-reproaches of Dante, we have seen already how fully he had atoned for this first and transient unfaithfulness of his heart. The remainder of the "*Vita Nuova*" shows how little she had lost of her power over him, how reverently he honored her memory, how constant was his love of her whom he should see never again with his earthly eyes. Returning to the "New Life,"—

"After this tribulation," he says, "at that time when many people were going to see the blessed image which Jesus Christ left to us as the likeness of his most beautiful countenance,† which my lady now beholds in glory, it happened that certain pilgrims passed through a street which is almost in the middle of that city where the gentlest lady was born, lived, and died,—and they went along, as it seemed to me, very pensive. And thinking about them, I said to myself, 'These appear to me to be pilgrims from a far-off region, and I do not believe that they have even heard speak of this lady, and they know nothing of her; their

* *Purgatory*, c. xxx. vv. 118–126. — CAYLEY'S Translation.

† The most precious relic at Rome, and the one which chiefly attracted pilgrims, during a long period of the Middle Ages, was the Veronica, or representation of the Saviour's face, supposed to have been miraculously impressed upon the handkerchief with which he wiped his face on his way to Calvary. It was preserved at St. Peter's and shown only on special occasions. Compare with this passage the lines in the *Paradiso*, c. xxxi. 103–8:—

"As one that haply from Croatia came
To see our Veronica, and no whit
Could be contented with its olden fame,
Who in his heart saith, when they're
showing it,
'O Jesu Christ! O very Lord God mine!
Does truly this thy feature counterfeit?'"
CAYLEY.

G. Villani says, that in 1300, the year of jubilee, for the consolation of Christian pilgrims, the Veronica was shown in St. Peter's every Friday, and on other solemn festivals." viii. 36.

thoughts are rather of other things than of her; for, perhaps, they are thinking of their distant friends, whom we do not know.' Then I said to myself, 'I know, that, if these persons were from a neighboring country, they would show some sign of trouble as they pass through the midst of this grieving city.' Then again I said, 'If I could hold them awhile, I would indeed make them weep before they went out from this city; for I would say words to them which would make whoever should hear them weep.' Then, when they had passed out of sight, I proposed to make a sonnet in which I would set forth that which I had said to myself; and in order that it might appear more pity-moving, I proposed to say it as if I had spoken to them, and I said this sonnet, which begins, 'O pilgrims.'

"I called them *pilgrims* in the wide sense of that word; for pilgrims may be understood in two ways,—one wide, and one narrow. In the wide, whoever is out of his own country is so far a pilgrim; in the narrow use, by pilgrim is meant he only who goes to or returns from the house of St. James.* Moreover, it is to be known that those who travel in the service of the Most High are called by three distinct terms. Those who go beyond the sea, whence often they bring back the palm, are called *palmer*s. Those who go to the house of Galicia are called *pilgrims*, because the burial-place of St. James was more distant from his country than that of any other of the Apostles. And those are called *romei* who go to Rome, where these whom I call pilgrims were going.

* The shrine of St. James, at Compostella, (contracted from *Giacomo Apostolo*), in Galicia, was a great resort of pilgrims during the Middle Ages,—and Santiago, the military patron of Spain, was one of the most popular saints of Christendom. Chaucer says, the Wif of Bath

"Had passed many a straunge streem;
At Rome sche hadde ben, and at Boloynne,
In Galice at Seynt Jame, and at Coloyne."

And Shakspeare, in *All's Well that Ends Well*, makes Helena represent herself as "St. Jacques's pilgrim."

"O pilgrims, who in pensive mood move
 slow,
 Thinking perchance of those who absent
 are,
 Say, do ye come from land away so far
 As your appearance seems to us to show?
 "For ye weep not, the while ye forward go
 Along the middle of the mourning town,
 Seeming as persons who have nothing
 known
 Concerning the sad burden of her woe.
 "If, through your will to hear, your steps ye
 stay,
 Truly my sighing heart declares to me
 That ye shall afterwards depart in tears.
 "For she* her Beatrice hath lost: and ye
 Shall know, the words that man of her
 may say
 Have power to make weep whoever
 hears."

Some time after this sonnet was written, two ladies sent to Dante, asking him for some of his rhymes. That he might honor their request, he wrote a new sonnet and sent it to them with two that he had previously composed. In his new sonnet, he told how his thought mounted to heaven, as a pilgrim, and beheld his lady in such condition of glory as could not be comprehended by his intellect; for our intellect, in regard to the souls of the blessed, is as weak as our eyes are to the sun. But though he could not clearly see where his thought led him, at least he understood that his thought told of his lady in glory.

"Beyond the sphere that widest orbit hath
 Passeth the sigh that issues from my
 heart,
 While weeping Love doth unto him impart
 Intelligence which leads him on his path.
 "When at the wished-for place his flight he
 stays,
 A lady he beholds, in honor dight,
 And shining so, that, through her splendid
 light,
 The pilgrim spirit upon her doth gaze.
 "He sees her such that his reporting words
 I understand not, for he speaketh low
 And strange to the sad heart which makes
 him tell;
 "He speaketh of that gentle one, I know,
 Since oft he Beatrice's name records;
 So, ladies dear, I understand him well."

This was the last of the poems which

* The city.

Dante composed in immediate honor and memory of Beatrice, and is the last of those which he inserted in the "*Vita Nuova*." It was not that his love grew cold, or that her image became faint in his remembrance; but, as he tells us in a few concluding and memorable words, from this time forward he devoted himself to preparation for a work in which the earthly Beatrice should have less part, while the heavenly and blessed spirit of her whom he had loved should receive more becoming honors. The lover's grief was to find no more expression; the lamentations for the loss which could never be made good to him were to cease; the exhibition of a personal sorrow was at an end. Love and grief, in their double ministry, had refined, enlarged, and exalted his spirit to the conception of a design unparalleled in its nature, and of which no intellectual genius, unpurged by suffering, and unpenetrated in its deepest recesses by the spiritualizing heats of emotion, would have been capable of conceiving. Moreover, as time wore on, its natural result was gradually to withdraw the poet from the influence of temporary excitements of feeling, resulting from his experience of love and death, and to bring him to the contemplation of life as affected by the presence and the memory of Beatrice in its eternal and universal relations. He tells us in the "*Convito*," that, "after some time, my mind, which neither such consolation as I could give it, nor that offered to it by others, availed to comfort, determined to turn to that method by which others in grief had consoled themselves. And I set myself to read that book, but little known, of Boethius, in which in prison and exile he had consoled himself. And hearing, likewise, that Tully had written a book, in which, treating of friendship, he had offered some words of comfort to Lælius, a most excellent man, on the death of Scipio, his friend, I read this also. And although at first it was hard for me to enter into their meaning, I at length entered into it so far as my knowledge of language, and such little capaci-

ty as I had, enabled me; by means of which capacity, I had already, like one dreaming, seen many things, as may be seen in the 'New Life.' And as it might happen that a man seeking silver should, beyond his expectation, find gold, which a hidden chance presents to him, not, perhaps, without Divine direction, so I, who sought for consolation, found not only a remedy for my tears, but also acquaintance with authors, with knowledge, and with books."

Nor did these serious and solitary studies withdraw him from the pursuit of wisdom among men and in the active world. Year by year, he entered more fully into the affairs of state, and took a larger portion of their conduct upon himself.

His heart kept fresh by abiding recollections of love, his faith quickened by and intermingled with the tenderest hopes, his imagination uplifted by the affection which overleaped the boundaries of the invisible world, and his intellect disciplined by study of books and of men, his experience enlarged by constant occupation in affairs, his judgment matured by the quick succession of important events in which he was involved,—every part of his nature was thus prepared for the successful accomplishment of that great and sacred design which he set before himself now in his youth. Heaven had called and selected him for a work which even in his own eyes partook somewhat of the nature of a prophetic charge. His strength was to be tested and his capacity

to be approved. Life was ordered for the fulfilment of his commission. The men to whom God intrusts a message for the world find the service to which they are appointed one in which they must be ready to sacrifice everything. Dante looked forward, even at the beginning, to the end, and saw what lay between.

The pages of the "New Life" fitly close with words of that life in which all things shall be made new, "and there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain; for the former things are passed away." The little book ends thus:—

"Soon after this, a wonderful vision appeared to me, in which I saw things which made me purpose to speak no more of this blessed one until I could more worthily treat of her. And to attain to this, I study to the utmost of my power, as she truly knoweth. So that, if it shall please Him through whom all things live, that my life be prolonged for some years, I hope to speak of her as never was spoken of any woman. And then may it please Him who is the Lord of Grace, that my soul may go to behold the glory of its lady, the blessed Beatrix, who in glory looks upon the face of Him, *qui est per omnia sæcula benedictus* [who is Blessed forever]!"

In 1320, or perhaps not till 1321, the "Paradiso" was finished; in 1321, Dante died.

THE DOUBLE-HEADED SNAKE OF NEWBURY.

"CONCERNING ye Amphibæna, as soon as I received your commands, I made diligent inquiry: . . . he assures me y^t it had really two heads, one at each end, two mouths, two stings or tongues."

REV. CHRISTOPHER TOPPAN to COTTON MATHER.

FAR away in the twilight time
Of every people, in every clime,
Dragons and griffins and monsters dire,
Born of water, and air, and fire,
Or nursed, like the Python, in the mud
And ooze of the old Deucalion flood,

Crawl and wriggle and foam with rage,
 Through dusk tradition and ballad age.
 So from the childhood of Newbury town
 And its time of fable the tale comes down
 Of a terror which haunted bush and brake,
 The Amphisbæna, the Double Snake !

Thou who makest the tale thy mirth,
 Consider that strip of Christian earth
 On the desolate shore of a sailless sea,
 Full of terror and mystery,
 Half-redeemed from the evil hold
 Of the wood so dreary and dark and old,
 Which drank with its lips of leaves the dew
 When Time was young and the world was new,
 And wove its shadows with sun and moon
 Ere the stones of Cheops were squared and hewn ;
 Think of the sea's dread monotone,
 Of the mournful wail from the pine-wood blown,
 Of the strange, vast splendors that lit the North,
 Of the troubled throes of the quaking earth,
 And the dismal tales the Indian told,
 Till the settler's heart at his hearth grew cold,
 And he shrank from the tawny wizard's boasts,
 And the hovering shadows seemed full of ghosts,
 And above, below, and on every side,
 The fear of his creed seemed verified ;—
 And think, if his lot were now thine own,
 To grope with terrors nor named nor known,
 How laxer muscle and weaker nerve
 And a feebler faith thy need might serve ;
 And own to thyself the wonder more
 That the snake had two heads and not a score !

Whether he lurked in the Oldtown fen,
 Or the gray earth-flax of the Devil's Den,
 Or swam in the wooded Artichoke,
 Or coiled by the Northman's Written Rock,
 Nothing on record is left to show ;
 Only the fact that he lived, we know,
 And left the cast of a " double head "
 In the scaly mask which he yearly shed.
 For he carried a head where his tail should be,
 And the two, of course, could never agree,
 But wriggled about with main and might,
 Now to the left and now to the right ;
 Pulling and twisting this way and that,
 Neither knew what the other was at.

A snake with two heads, lurking so near !—
 Judge of the wonder, guess at the fear !
 Think what ancient gossips might say,

Shaking their heads in their dreary way,
Between the meetings on Sabbath-day !
How urchins, searching at day's decline
The Common Pasture for sheep or kine,
The terrible double-ganger heard
In leafy rustle or whirr of bird !
Think what a zest it gave to the sport
In berry-time of the younger sort,
As over pastures blackberry-twined
Reuben and Dorothy lagged behind,
And closer and closer, for fear of harm,
The maiden clung to her lover's arm ;
And how the spark, who was forced to stay,
By his sweetheart's fears, till the break of day,
Thanked the snake for the fond delay !

Far and wide the tale was told,
Like a snowball growing while it rolled.
The nurse hushed with it the baby's cry ;
And it served, in the worthy minister's eye,
To paint the primitive Serpent by.
Cotton Mather came posting down
All the way to Newbury town,
With his eyes agog and his ears set wide,
And his marvellous inkhorn at his side ;
Stirring the while in the shallow pool
Of his brains for the lore he learned at school,
To garnish the story, with here a streak
Of Latin, and there another of Greek :
And the tales he heard and the notes he took,
Behold ! are they not in his Wonder-Book ?

Stories, like dragons, are hard to kill.
If the snake does not, the tale runs still
In Byfield Meadows, on Pipestone Hill.
And still, whenever husband and wife
Publish the shame of their daily strife,
And, with mad cross-purpose, tug and strain
At either end of the marriage-chain,
The gossips say, with a knowing shake
Of their gray heads, "Look at the Double Snake !
One in body and two in will,
The Amphisbæna is living still !"

A PLEA FOR THE FIJIANS;

OR, CAN NOTHING BE SAID IN FAVOR OF ROASTING ONE'S EQUALS?

IT is with a feeling of no mean satisfaction, that, in this year of 1859, the philosopher can calmly propose the investigation of a subject, the mere mention of which would have created universal disgust, and even horror, at a period not long past. Thanks to the progress of liberal ideas and sound criticism, we are able, in the middle of the ever-memorable Nineteenth Century, serenely to examine anew those questions which for entire centuries stolid prejudice and narrow dogmatism considered settled, and adjudicated in the High Court of Humanity for all times to come. However signal the progress of our age may be in the useful arts and in æsthetics, especially in upholstery, in chemistry, in the government of large cities, and in the purity of commerce, in pottery, pills, and poetry, and in the dignity of politics, nothing, we may venture to say, will so distinctly and so broadly characterize the period in which we happily live, when the future historian shall sweep with his star-seeker over the past, as the joyful fact, that we, above all others, have divested ourselves of long-cherished errors, hugged by our forefathers as truths full of life and vigor, and have, indeed, so to speak, founded a *Novum Organon* in fact and reality, while the great Bacon proposed one in mind and theory. To our enlightened age it was reserved to return to polygamy, after nearly three thousand dragging years of dull adhesion of our race to tiresome monogamy, leaping back by one bound over the whole European Past into ancient and respectable Asia. *Ex Oriente lux; ex Oriente gaudia seraglii!* It is in our blessed epoch that atheism, by some, and pantheism, by others, are boldly taught and vindicated, as once they were by Greeks or Orientals, and with an earnestness and enthusiasm very different from the sneer with which

Encyclopædists of Voltaire's time attacked Christianity and Deism. To prove, however, the magnificent many-sidedness of our noble times, it is we that have returned once more to pictures of the Virgin Mary with winking and with weeping eyes, or to her apparitions talking *patois*, as that of La Valette, and to a hundred things in the Church, cautiously passed over *sub silentio* in the last century, but now joyously proclaimed and sustained with defiant erudition by English and German *doctores graves*, and by the Parisian "Univers," which, openly rejoicing in the English blood spilt by the Sepoys,—for it is but Protestant blood, and that of hateful freemen,—heralds the second or third advent of universal love and Papacy. It is in our age that representative, and indeed all institutional government, for the first time, is called effete parliamentarism, a theatrical delusion, for which, according to the requirements of advanced civilization, the beneficent, harmonious, and ever-glorious Cæsarism, *pur et simple*, must be substituted, as it was once sublimely exhibited in the attractive Cæsars of Rome, those favorites of History and very pets of Clio. In the time of Tiberius, as President Troplong beautifully and officially expressed it, "Democracy at last seated herself on the imperial throne, embodied in the Cæsars,"—those worshipful incarnations of democracy, brought to our view in the *tableaux* of Suetonius and by the accounts of Tacitus. We have at last returned to Cæsarism, or Asiatic absolutism, improved by modern light, and making the emperor a Second Providence, opening and shutting the mouths of the universal-suffrage people, for words or bread, as imperial divinity finds best. This is the progress of our age in Europe, while we, in this hemisphere, have taken, for the first time in

history, a rational view of party strife, and with unclouded intelligence maintain that judges and presidents are, and ought to be, party exponents, doing away with those once romantic, but certainly superannuated ideas of Country, Justice, Truth, and Patriotism. All real progress tends toward simplification; and how simple are the idea of party and the associations clustering around this sacred word, compared with the confusing and embarrassing unreality of those ideas and juvenile feelings we have mentioned last!

But we have not done yet with the glory of our age. It is this, the decennium we are soon going to close, that has risen to that enviable eminence whence slavery is declared a precious good of itself, a hallowed agent of civilization, an indispensable element of conservatism, and a foundation of true socialism. From this lofty eminence the seer-statesman—rising far above the philosophical sagacity displayed by Aristotle and Varro, when they discussed the sacred topic—proclaims that Capital ought to own, and has a divine right to own, and always more or less does own, Labor; and that, since Labor constitutes the whole humanity of the laboring man, it clearly follows that he himself must be owned, if his labor be owned. Would you own the bird without its cage? Generous gospel of the rich! Blessed are the wealthy!

It is the destiny of the middle of the nineteenth century—well may we be forgiven, if we pronounce it with some pride—unhesitatingly to defend the African slave-trade, and to smile at what sickly philanthropists used to consider the unutterable woe, the unmeasured crime, and the diabolical hard-heartedness of that traffic. We have changed all this; and, to say the truth, it was high time to discover that the negro-trade forms a charming chapter in the history of Europe, and that the protracted efforts to put it down were unchristian and unstatesmanlike. Pitt, Roscoe, Wilberforce, Burke, Washington, Franklin, Madison,

Adams, Lowndes,—puny names! short-sighted men! By the African slave-trade, creatures that are hardly deserving the name of men, on account of organic, intellectual, and moral incapacity, are forcibly carried into the regions of Christian religion and civilization, there to become civilized in spite of their unfitness for civilization. The mariners, usually occupied in risking life or health merely for the sake of base traffic and filthy lucre, are suddenly transformed into ministering agents of civilization and religion. It gives a priestly character to the captain of a slave-ship,—to him that is willing to break the laws of his country, even daring the gallows, for the benefit of the sable brother, and of his law-abiding conservative society. How different from those dark times when the poet could say,—*Homo ignoto homini lupus est!* The missionary only endeavors to carry the Church to Africa; the slave-trader carries Africa to the Church, to civilization, and to the auction-table.

There are but two more returns to truth and justice necessary,—the Inquisition and the Witch-Trials. These restored, we may safely congratulate ourselves on having regained the ground on which our race stood before the Reformation, that untoward event, whence all the mischief dates that has befallen man in the shape of human rights, liberty, and other deplorable things, as lately a grave writer—not a Catholic, nor a Jew either—gravely assured us. Gentle readers, let us not be impatient. Progress has been of late so rapid, that many of you, it is to be hoped, will yet have an opportunity of hailing the return of those two noble institutions, *pro majore gloriâ Dei*, for which they always existed, as long as chill and misty skepticism did not extinguish their glowing poetry. Ah! happy times! poetic age! when there existed not only “words that burn,” but also laws that burned!

In the mean time, it may not be inappropriate to commence the consideration of a topic somewhat farther removed from us, but which, according to our

humble opinion, ought not to remain wholly beyond the limits of a candid, liberal, and unprejudiced examination,—we mean the important question, Whether the choicest of all substances, the most delicate of all muscular texture, that substance of which kings, philosophers, policemen, and supporters of crinoline are fashioned by the plastic hand of Nature, ought forever to be excluded from the reproductive process of wasted energy and proportionably consumed nervous and cerebral fibre. Reader, do not shrink; grant us a patient ear. You do not know how rapidly you may change your own opinion and feelings. Do you not remember with what awe we first read in the “*Almanach des Gourmands*,” that a certain *sauce piquante* was so fine that with it a man would eat his own mother? This was only twenty years ago; yet all of us, now, are helping a high-bred gentleman, trading, on a gigantic scale, in the bones of his great ancestor. What sublimity of peddling!

To those who say, It is unnatural to eat our friends, we would answer, that it is the office of civilization to remove us farther and farther from Nature. Analyze the present magnitude called Lady, and you can arithmetically state it, how little of it is nature-woman, and how much is hoop-civilization. To those, again, who object, that it is too primitive, we would reply, that the highest civilization is always a return to Nature, which is likewise exemplified by many of our ladies in the ball-room,—we mean by their upper portion.

But *revenons à nos moulons*. The Rev. Messrs. Williams and Calvert, missionaries, for many long years, among the Fijians, state, in their recently published work, that those unsophisticated children of Nature eat “long pig,”—as they call, with graceful humor, roast-man, in contradistinction to “short-pig,” by which they designate our squealing fellow-roasters,—from three different motives.—When a chief has a gala-day, or desires to signal his arrival by a right royal feast,

it is considered befitting to slaughter some men, to let the blood run in the path of royalty, and to have on the table some *roast-homme*. Our Captain Wilkins told us, years ago, that, for this *roast-homme*, a plump Fijiana, of some twelve or thirteen years, is preferred. They know very well what is good!—The second motive is hatred. When a Fijian mortally hates a person, he endeavors to kill him; and having killed the enemy, why should the victim not be eaten?—Lastly, it would seem that affectionate regard, especially for a favorite wife, sometimes rises to a mordant passion and an unconquerable longing for material assimilation,—so much so, that the loving husband roasts his Penelope, and neighbors are invited to participate in his better fourth or fifth; as the polygamic case may be. Perhaps, years after, when with less demonstrative nations the memory of the beloved one would have passed away, the Fijian Fidelio may smack his lips, and exclaim, with Petrarch’s fervor,—

“Perchè Morte furà

Prima i migliori, e lascia star i rei:
Questa aspettata al regno degli Dei
Cosa bella mortal passa e non dura.”

Now we are very anxious not to be misunderstood by our readers. In writing this paper, we do not mean to urge the reintroduction of Cannibalism among us at once. The public mind may not yet be ripe for it; but we desire to assist in placing the subject in its proper light, and in showing that an enlightened impartiality can find very much in defence of the Fijians,—more, indeed, than the Rev. Mr. Froude has been able to accumulate in favor of his wife-devouring hero,—or than Mr. Spratt can say in favor of humanization in general, and the breaking-up of the Union in particular, by the reopening of the African slave-trade,—or than our venerable chief-justice has contrived to say in favor of reintroducing slavery in conquered territory, where positive law had abolished or excluded it, by the abstract Constitution itself, *proprio vigore*, (not quite unlike a wagoner, it seems to us, that carries the soil of dis-

tant parts, *ipsâ adhesionem*, as it sticks to his boots, into the tavern-room,) without special law, which even the ancient civilians very stupidly declared to be necessary. First, you will remember, it was passionately maintained that the Constitution of the United States does not know the Common Law; and now it is insisted that Common Law (so far as slavery is concerned) is as inherent in the Constitution as the black pigment is in the negro. You cannot wash it out; it inheres physiologically in the Constitution. I tell you, reader, we are *fast* people indeed; we travel fast in our opinions, with now and then a somerset for the delectation of the philosopher.

Let us sit down, and have a philosophical conversation; above all, let us discard sentiment, feeling,—what you call heart, and all that sort of thing. You know how much mischief Las Casas has done by allowing his feelings to interfere when the Spaniards roasted Indians, from what he chose to call diabolical lust of gold, and sheer, abstract cruelty. Poor Bishop! He belonged to the softs. Let us be philosophers, economists, and, above all, Constitutionalists. Some philosophers, indeed, have said that all idea of Right and Wrong, and the idea that there is a difference between the two, must needs, first of all, start from sentiment; but leave, I implore you, such philosophic foggyism behind you.

First, then, as to the principle of Right. It is a fact, that most tribes and races, probably all nations in their earliest days, have killed old and useless parents, and have eaten enemies, once slain,—perhaps friends, too. Some nations carried the eating of human flesh far down into their civilized periods and into recent times. The Spaniards found the civilized Aztecs enjoying their *petits soupers* of babes à la Tartare, or gorgeous dinners on fattened heroes *aux truffes*. Have you forgotten that from that fine Introduction to Prescott's "Conquest of Mexico" a flavor of roast "long pig" steams into our nostrils as from a royal kitchen? Eating our equals, therefore, is sound Common

Law of all mankind, even more so than slavery, for it exists before slavery can be introduced. Slavery is introduced when the prisoner of war may be made to work,—when the tilling of the soil has commenced; though then not always; for we now know that slavery was introduced among the Greeks at a comparatively late period: but killing parents and eating enemies exists in the hunter's state, and at those periods when people find it hard work to obtain food, each one for himself, to keep even a starved body and a little bit of soul together. Chewing our neighbor is even better, for it is older Common Law, than the universal buying of a wife and consequent selling of daughters which exists even now over far the greater portion of the globe. We take it that our species began with eating itself without paying for the fare. Partaking of our neighbor precedes all *lex scripta*, all statute law, all constitutions. As to ourselves in particular, whose law is the English law, we know that the Druids sacrificed human beings to their gods; and every one knows full well, that man, when in gastronomic contact with the gods, always appropriates the most savory morsels and the largest portions of the sacrifice to himself, leaving to the ethereal taste of Jove or Tezcatlipoca the smell of some burnt bones or inwards. Yet there is no law on record abolishing human sacrifices. We know, indeed, that some Teutonic tribes, when they adopted Christianity, positively prohibited the eating of horse-flesh, but no law ever forbade to honor our fathers and mothers by making them parts of our feasts; so that no lawyer of the true sort will deny, that, to this day, the right of sacrificing fellow-men, and the reasonable concomitant of eating the better portion of the sacrifice, still exists. Greeks and Romans have sacrificed men; why should not we? That men have their individual rights is no valid objection. Rights depend exclusively upon the law; and the law, we have shown, does not grant equal rights (at least, not equal destinations) to the Eater and the Eatee; for it seems to

be one thing to eat, and another to be eaten. It was a very silly maxim of the ancient Civil Law, That the law, the *regula*, is derived from the right (*jus*), not the *jus* from the law. Has not a Supreme Court in one of our States lately denied to a negro even the right to choose between liberty and slavery,—the choice being left to him by his deceased master,—because the creature (which, when doing wrong, is responsible and has a will imputed to him) has no will to choose, because it cannot have any, says the Supreme Court of that State?

However, it will doubtless be objected by some, that it is simply disgusting to eat our fellow-creatures of the same species,—that it is unnatural and against our religion,—and that so remarkable a diversity of taste can be explained only on the ground of our belonging to different races. We do not believe that the Fijians belong to a different race. Fijian, or Fijician, results, by a slight change of letters, from the word Phœnician; and there can be no doubt that the Fijians are descendants of those Phœnicians who, according to Herodotus, sailed, in the reign of the Egyptian King Necho, from the Persian Gulf round the Cape of Good Hope, and entered the Mediterranean through the Pillars of Hercules. How they came to be wafted to the opposite hemisphere is not for us to explain, nor do we know it. Suffice it to say, that Fijician and Phœnician are the same word. Possibly old Admiral Hanno preceded Captain Cook. Who can prove the contrary?

As to the first of these objections, we admit that some people may feel a degree of aversion to *roast-homme*; but so does the Mahometan abominate roast "short pig"; and a Brahmin, taken to Cincinnati and its environs, at the sanguinary hog-murder time, would die outright, of horror. We almost died, ourselves, at the sickening sight of that porcian massacre. *De gustibus non est disputantibus*, as our colonel used to say. Disgust is the result of a special treaty of

amity and reciprocity between the stomach and the imagination, differing according to difference in the contracting parties. We have known many persons who would not touch mutton, and others who would rather starve than eat oysters; while we ourselves revolt at sour-kROUT, which, nevertheless, millions of Germans, French, and Americans consider delicious. Disgust is arbitrary; it does not furnish us with a philosophical ground for argumentation. The Fijian does not feel disgust at the flavor of a well-roasted white sailor; and as long as he does not insist upon our relishing his fare, what right have we to ask him to feel disgusted? When the panther-tailed Aztec priest fattened his prisoner, or carried along the children decked with wreaths, soon to be smothered in their own juice, he cannot have felt disgust, any more than the Malay, of whom Sir Thomas Stamford Raffles tells us, that, with epicurean refinement, he cut the choicest bits from his living prisoner, in order to baste them to a turn and season them with choice pepper.

Is it unnatural? We have once seen, with our own eyes, a very large unroasted "small pig" devour one of her own piglets, whilst the others lustily drew nourishment from the grunting mother. It took our appetite away for forty-eight hours; yet it was nature; and in some portions of Europe, people express the highest degree of fondness by the expressive phrase,—*"I could eat you."* We may rely upon it, that, as Mr. Agassiz says,—*"There is no difference in kind, but only in degree."*

With reference to religion, we readily acknowledge that dining *à la Fijienne* does not appear exactly to be a divine institution, as slavery has recently been discovered to be. From olden times it used to be the belief of superstitious man that there was a divine afflatus in liberty; but our profound theological scholars and Biblical critics have found out that the divinity is on the other side. Neither Tertullian nor Austin, neither St. Bernard nor any Pope, good or bad, neither

Luther, Bossuet, Calvin, nor Baxter, no commentator, exegetist, or preacher, ever found out, what these profoundest inquirers have at length discovered, that slavery is divine, like matrimony. Had they discovered this great truth before the Catholic Church settled the number of sacraments, there must have been eight instead of seven. Why was their advent so late?

Possibly these grave and candid, deep and fervent theologians, whose opinions on theology are quoted everywhere, whose works are spread over the globe, and whose lore is stupendous, may yet discover that there is a divine flavor even in a soup *à la Mexicaine*. One thing, however, is quite certain, namely,—that there is no prohibition of digestively assimilating our neighbor with ourselves, from one end of the Bible to the other. Was not Fielding's parson logical, who preferred punch to wine, because it is nowhere spoken ill of in Scripture? When Baron Viereck was rebuked by a friend for having given his daughter in marriage to the King of Denmark, the Queen, undivorced, continuing to occupy the throne, the shrewd father replied, that he had found no passage in the Bible that prohibits a King of Denmark from having two wives; and has not the democratic Fijian as good a right to that logic as the noble Baron had?

To say the truth, all these objections are founded mainly upon sentiment, and we trust that morbid sentimentality will have no weight in an age which ridicules the horror of the British Commons at the descriptions of the middle passage, and demands calm judgment when the question arises, how to increase the number of representatives and the profits on sugar and cotton,—in our poetic age, in which republican senators have openly declared their chivalrous allegiance to the sovereign substance of which night-caps are made, and petticoats,—to His Majesty, King Cotton,—not a very merry king, it must be owned, as young King Charles was, or old King Cole, but still a worthy sovereign; for, after all, he is but a new

and most bulky avatar of Almighty Dollar.

No objection whatsoever can be made to the *deglutination Fijiana* on the score of utility. The islands of the Fijians are but small; no Fijian Attila can lead forth his hosts into neighboring countries; no Fijian Goths can pour down from Polynesian Alps into an Oceanic Italy; no Athenians can there send sons and gods to a Coreyra; and no Fijian Miles Standish can there walk up and down before his pipe-clayed bandoleers in foreign colonies. How, then, can an over-increase of population be more harmoniously prevented than by making the young and sleek furnish the starving with a plump existence? Is it not, economically viewed, the principle of Dr. Franklin's smoke-consuming pipe applied to the infinitely more important sphere of human existence? The festive table, to which, according to the great Malthus, Nature declines inviting a large portion of every well-peopled country, will never be known by the happy Fijian Say or Senior, so long as wise conservatism shall not change its old and sacred laws, and shall allow Nature to invite one happy portion as guests, and another happy portion as savory dishes. It is Nature in naked simplicity, as it is exhibited in half-a-dozen mice in a deep kettle, of whom one survivor and material representative remains. The Chinese expose female infants, and lawful infanticide has been abolished in some districts of the British East Indies within these thirty years only. Would it not be wiser to reassimilate the tender dear ones, and think of them ever after with smacking memory?

It is true, indeed, that, upon the whole, Fijian gastronomy leans more toward the tender sex than toward that which in our country wears the trousers uncrinolined. But, we submit, is this a fair objection? Why is the tender sex more *tender*? Lately, when an orator had strongly expressed himself against the maxim of patriotic office-hunters,—“To the victor belong the spoils,” he was very logically asked,—“And pray, Sir, to whom should

the spoils belong, if not to the victor?" So we would ask, should any one complain of girls being thus economized by men,—“Who, in the name of common sense, should, if not men? Would you have them perform that sacrificial duty for one another?”

But whatever may be thought, by some of our lovely readers, of this last argument, (which henceforth may be termed *argumentum marcianum*,) and which, in the case before us, will always be an *ex parte* argument, all will agree that no objection can be taken to making repasts on *porcus longus* once fairly killed,—for instance, on heroes stretched on the battle-field. This was the cogent argument of the New Zealander, after baptism,—used in discussing the topic with the Rev. Mr. Yale. Willing to give up slaughtering fellow-men for the sake of eating them, he could not see why it was not wicked to waste so much good food.

If it were objected, that, admitting the making of your enemy's flesh flesh of your own flesh would necessarily lead to skirmishes, “surprise-parties,” and battles for the sole purpose of getting a dinner,—to a sort of pre-prandial exercise, as in fishing,—we would simply answer, “Too late!” Our friends who desire the reopening of the African slave-trade declare that they wish to buy slaves only. When statesmen, and missionaries, and simple people with simple sense and simple hearts, cry out to them, “Stop! for the sake of our common Father, stop! By reopening the slave-trade, you revive the vilest crimes, and, for every negro ultimately sold to you on the coast, you cause the murder of at least ten in the interior, not to speak of those that are coolly massacred in the barracoon, when no demand exists,”—the satisfactory reply is: “We have nothing to do with all that; we do not travel beyond the record. We buy the negro who is a slave; what made him a slave we do not care to know. The pearl in the market does not show the toil of the fisher.” And so the Fijian would properly reply: “Do

not mix up different subjects. I rescue my departed brother from ignominious decay, and remake a man of him. How he came to depart,—that belongs to quite a different chapter.”

This utilitarian view acquires a still greater importance when applied to criminals under sentence of capital punishment. Soon after Beccaria, it was asked, if we mistake not, by Voltaire: “Of what use is the dead body of a criminal? You cannot restore the victim to life by the execution of the murderer.” And many pardons in America have been granted on the assumption that no satisfactory answer could be given to the philosophical question: “What use can the swinging body of the poor creature be to any one?” The Fijian alone has a perfectly satisfactory reply.

The missionaries, already named in this paper, give a long account of the execution of a supposed Fijian conspirator, which ends with these words: “At last he was brought down to the ground by a club; after which he was eaten.”

We can discern many advantages to be derived from the introduction of what we will call *patés penitentiaires*.”

There would be no waste of food.

The sentence of the judge would sound more civilized; for, instead of hearing the odious words, “You shall be hanged by the neck until you are dead,” words would be pronounced somewhat like these: “You shall be taken to Delmonico, and there and by him be served up on such a day, as *scélérat en papillotes*.”

There would be a greater readiness in jurors to convict interesting criminals, who now-a-days cannot be found guilty, —especially were a law passed that the jury should have the criminal. We read in the “Scottish Criminal Trials,” that a woman, clearly convicted of an atrocious murder, was, nevertheless, found not guilty. The astonished lord justiciary asked the foreman, how it was possible to find the prisoner not guilty, with such overwhelming evidence, and was answered: “Beacause, my laird, she is purty.” Would not the delicacy of the prisoner have

been an additional reason for finding her guilty with Fijian jurors?

Fourthly, there would be an obvious national advantage in some countries, in which the government is at one and the same time busily engaged in finding cheap food for the people, and in transporting annually many hundreds of political suspects to killing colonies. It is, indeed, surprising, that so sagacious and parental a government as that of Napoleon the Third,—may His Majesty be long preserved for the civilization of France, the peace of Europe, and the glory of mankind in general!—it is surprising, that his all-providing and all-foreseeing government has not long ago discovered how the craving of the national stomach for food, and of the popular mind for political purification, might be stilled by no longer transporting political offenders and suspects to French Guiana or Lambessa, where they uselessly and ignobly perish, but by sentencing them, instead, to the enviable lot of making a feast for their brethren. Would not every Socialist, receiving permission thus to help feed society, exclaim: *C'est magnifique! mais c'est sublime!*

When Robespierre was in the zenith of his guillotinacious glory, the *bonnes* would sit around the scaffold, minding children and knitting stockings, to see the head of a marquis or of a shoemaker fall. We leave it to every reader, whether there would not be more historic unity and poetic completeness in the *tableau*, were we to read that these good creatures dined upon the *ci-devant*, after the execution.

Imperial Rome is the *beau idéal* of the present government of *la belle France*; and we must own, that, when perusing the exhilarating pages of Suetonius, it has often occurred to our mind that there is something wanting in the list of high deeds related of those superb specimens of humanity exhibited in the Caligulas and Heliogabali. They did so much for cookery! Yet they seem never to have risen above an indirect consumption of their subjects, by feeding their lobsters

with ignoble slaves; never did they directly bestow upon Roman freemen the honor of being served up for the imperial table. Nero murdered his mother and bade his teacher open his own veins. Would it not read much more civilized, if the annals of the empire were telling us: *Nero, jam dicus, leniter dixit: O Seneca, Pandit delectabilis et philosophe laute, quis dubitet te libentissime mihi hodie proferre artocreatem stoicum?*

Strange as it may appear to some readers, that thus the polished Romans might have learned a lesson of civilization from the Fijians, they will not reject our suggestion, when they reflect, that, only a short time ago, they were, probably, as much surprised at finding the government of so great a country as France adopting imperial Rome as a model body-politic. Familiarize your mind with the idea, and all difficulties vanish. It is only the last step which costs,—not the first.

There are many more reasons that might be urged in favor of the Fijians. We are not aware that the reverend missionaries have given any statistical tables, showing a regularity in the annual numbers of consumed persons, male and female, classed according to the reasons why consumed; but no one can doubt that such tables might be given, and if so, the whole question of anthropophagism could be very easily buckled up in a tidy little valise. The Fijians, in the plural, we take it, have little or nothing to do with it; it is the abstract, will-less, impersonal Fijian—who, according to the learned Ferrari,* would be called, now, Podestà Fijian, now Consul Fijian, now Papa Fijianus—that snuffs the flavor of his own dear natural *pot à feu*; and Right or Wrong, Just or Unjust, Commendable or Revolting, are school-boy distinctions, no longer recognized by the philosophical historian, who treats all moral questions and national movements like questions of natural philosophy,—like social chemistry, in which so puerile a word as poison has no place. Arsenic

* *Histoire des Révolutions d'Italie, ou Guelfs et Gibelins.* Par J. Ferrari. Paris, 1858.

is arsenic with certain effects, and nothing more; and society poisons itself annually to such an amount, arithmetically expressed.

We ask leave to add two suggestions in favor of the Fijians, both, it would seem, of philosophic importance. If you do not like the Fijian national dish,—*national* in more than one sense,—have the dear sons of Nature, as Carlyle probably would call them, not the right to reply,—“We do not like your *sauerkraut*, if you are a German; your *polenta*, if you are an Italian; your *olla podrida*, if you are a Spaniard; nor your *grüt*, if you are a Dane; your bacon and greasy greens, if you are a Southerner; nor your baked beans, if you are a Northerner; nor any other stuff called national dishes,—all of which are vile, except English roast-beef and plum-pudding, and Neapolitan macaroni.”

The other suggestion is this: Is it likely that Nature has placed the Fijians exactly in the same meridian with Greenwich, which in some measure may be called the meridian of civilization, for nothing?—is it likely that all the solar and cosmic influences which must result from this fact have really left the Fijian

in that state of hyper-brutality which you think is proved by his *ménage*? Is it, we ask, fairly to be supposed? We think not.

We do not presume to know whether we have carried conviction to the minds of our readers; but even if we have not,—if we have only been sufficiently fortunate to give the first impulse to the great inquiry, we shall be satisfied. If we consider the history of some opinions now openly preached and vehemently maintained,—how timidly they were first hinted at, within our own recollection, and with what surprising rapidity they have risen to an unblushing amplitude, rustling and sweeping proudly and defiantly along the Broadway of human events and opinions,—how that which but a lustre ago was wicked is now virtuous,—we see no reason for despair; and our century may yet witness the time when it will be considered the highest mixture of philosophic courtesy and Christian urbanity to make the most graceful semi-lateral bow, as you pass your friend in the street, and, kissing the tip of your finger, to lisp, with bending head and smiling eye,—

“May I never disagree with you!

THE PROFESSOR AT THE BREAKFAST-TABLE.

WHAT HE SAID, WHAT HE HEARD, AND WHAT HE SAW.

[*The Professor talks with the Reader. He tells a Young Girl's Story.*]

WHEN the elements that went to the making of the first man, father of mankind, had been withdrawn from the world of unconscious matter, the balance of creation was disturbed. The materials that go to the making of one woman were set free by the abstraction from inanimate nature of one man's-worth of masculine constituents. These combined to make our first mother, by a logical

necessity involved in the previous creation of our common father. All this, mythically, illustratively, and by no means doctrinally or polemically.

The man implies the woman, you will understand. The excellent gentleman whom I had the pleasure of setting right in a trifling matter a few weeks ago believes in the frequent occurrence of miracles at the present day. So do I. I believe, if you could find an uninhabited coral-reef island, in the middle of the Pacific Ocean, with plenty of cocoa-palms

and bread-fruit on it, and put a handsome young fellow, like our Marylander, ashore upon it, if you touched there a year afterwards, you would find him walking under the palm-trees arm in arm with a pretty woman.

Where would she come from?

Oh, that's the miracle!

—I was just as certain, when I saw that fine, high-colored youth at the upper right-hand corner of our table, that there would appear some fitting feminine counterpart to him, as if I had been a clairvoyant, seeing it all beforehand.

—I have a fancy that those Marylanders are just about near enough to the sun to ripen well.—How some of us fellows remember Joe and Harry, Baltimoreans, both! Joe, with his cheeks like lady-apples, and his eyes like black-heart cherries, and his teeth like the whiteness of the flesh of cocoa-nuts, and his laugh that set the chandelier-drops rattling overhead, as we sat at our sparkling banquets in those gay times! Harry, champion, by acclamation, of the College heavy-weights, broad-shouldered, bull-necked, square-jawed, six feet and trimmings, a little science, lots of pluck, good-natured as a steer in peace, formidable as a red-eyed bison in the crack of hand-to-hand battle! Who forgets the great muster-day, and the collision of the classic with the democratic forces? The huge butcher, fifteen stone,—two hundred and ten pounds,—good weight,—steps out like Telamonian Ajax, defiant. No words from Harry, the Baltimorean,—one of the quiet sort, who strike first, and do the talking, if there is any, afterwards. No words, but, in the place thereof, a clean, straight, hard hit, which took effect with a spank like the explosion of a percussion-cap, knocking the slayer of bees down a sand-bank,—followed, alas! by the too impetuous youth, so that both rolled down together, and the conflict terminated in one of those inglorious and inevitable Yankee *clinches*, followed by a general *melée*, which make our native fistic encounters so different from such admirably-ordered contests as that which I once

saw at an English fair, where everything was done decently and in order, and the fight began and ended with such grave propriety, that a sporting parson need hardly have hesitated to open it with a devout petition, and, after it was over, dismiss the ring with a benediction.

I can't help telling one more story about this great field-day, though it is the most wanton and irrelevant digression. But all of us have a little speck of fight underneath our peace and goodwill to men,—just a speck, for revolutions and great emergencies, you know,—so that we should not submit to be trodden quite flat by the first heavy-heeled aggressor that came along. You can tell a portrait from an ideal head, I suppose, and a true story from one spun out of the writer's invention. See whether this sounds true or not.

Admiral Sir Isaac Coffin sent out two fine blood-horses, Barefoot and Serab by name, to Massachusetts, something before the time I am talking of. With them came a Yorkshire groom, a stocky little fellow, in velvet breeches, who made that mysterious hissing noise, traditional in English stables, when he rubbed down the silken-skinned racers, in great perfection. After the soldiers had come from the muster-field, and some of the companies were on the village-common, there was still some skirmishing between a few individuals who had not had the fight taken out of them. The little Yorkshire groom thought he must serve out somebody. So he threw himself into an approved scientific attitude, and, in brief, emphatic language, expressed his urgent anxiety to accommodate any classical young gentleman who chose to consider himself a candidate for his attentions. I don't suppose there were many of the college boys that would have been a match for him in the art which Englishmen know so much more of than Americans, for the most part. However, one of the Sophomores, a very quiet, peaceable fellow, just stepped out of the crowd, and, running straight at the groom, as he stood there, sparring away, struck him

with the sole of his foot, a straight blow, as if it had been with his fist,—and knocked him heels over head and senseless, so that he had to be carried off from the field. This ugly way of hitting is the great trick of the French *savate*, which is not commonly thought able to stand its ground against English pugilistic science. —These are old recollections, with not much to recommend them, except, perhaps, a dash of life, which may be worth a little something.

The young Marylander brought them all up, you may remember. He recalled to my mind those two splendid pieces of vitality I told you of. Both have been long dead. How often we see these great red flaring flambeaux of life blown out, as it were, by a puff of wind,—and the little, single-wicked night-lamp of being, which some white-faced and attenuated invalid shades with trembling fingers, flickering on while they go out one after another, until its glimmer is all that is left to us of the generation it belonged to!

I told you that I was perfectly sure, beforehand, we should find some pleasing girlish or womanly shape to fill the blank at our table and match the dark-haired youth at the upper corner.

There she sits, at the very opposite corner, just as far off as accident could put her from this handsome fellow, by whose side she ought, of course, to be sitting. One of the "positive" blondes, as my friend, you may remember, used to call them. Tawny-haired, amber-eyed, full-throated, skin as white as a blanched almond. Looks dreamy to me, not self-conscious, though a black ribbon round her neck sets it off as a Marie-Antoinette's diamond-necklace could not do. So in her dress, there is a harmony of tints that looks as if an artist had run his eye over her and given a hint or two like the finishing touch to a picture. I can't help being struck with her, for she is at once rounded and fine in feature, looks calm, as blondes are apt to, and as if she might run wild, if she were trifled with.—It is just as I knew it would be,—

and anybody can see that our young Marylander will be dead in love with her in a week.

Then if that little man would only turn out immensely rich and have the good-nature to die and leave them all his money, it would be as nice as a three-volume novel.

Little Boston is in a flurry, I suspect, with the excitement of having such a charming neighbor next him. I judge so mainly by his silence and by a certain rapt and serious look on his face, as if he were thinking of something that had happened, or that might happen, or that ought to happen,—or how beautiful her young life looked, or how hardly Nature had dealt with him, or something which struck him silent, at any rate. I made several conversational openings for him, but he did not fire up as he often does. I even went so far as to indulge in a fling at the State House, which, as we all know, is in truth a very imposing structure, covering less ground than St. Peter's, but of similar general effect. The little man looked up, but did not reply to my taunt. He said to the young lady, however, that the State House was the Parthenon of our Acropolis, which seemed to please her, for she smiled, and he reddened a little,—so I thought. I don't think it right to watch persons who are the subjects of special infirmity,—but we all do it.

I see that they have crowded the chairs a little at that end of the table, to make room for another new-comer of the lady sort. A well-mounted, middle-aged preparation, wearing her hair without a cap,—pretty wide in the parting, though,—contours vaguely hinted,—features very quiet,—says little as yet, but seems to keep her eye on the young lady, as if having some responsibility for her.—

My record is a blank for some days after this. In the mean time I have contrived to make out the person and the story of our young lady, who, according to appearances, ought to furnish us a heroine for a boarding-house romance before

a year is out. It is very curious that she should prove connected with a person many of us have heard of. Yet, curious as it is, I have been a hundred times struck with the circumstance that the most remote facts are constantly striking each other; just as vessels starting from ports thousands of miles apart pass close to each other in the naked breadth of the ocean, nay, sometimes even touch, in the dark, with a crack of timbers, a gurgling of water, a cry of startled sleepers,—a cry mysteriously echoed in waking dreams, as the wife of some Gloucester fisherman, some coasting skipper, wakes with a shriek, calls the name of her husband, and sinks back to uneasy slumbers upon her lonely pillow,—a widow.

Oh, these mysterious meetings! Leaving all the vague, waste, endless spaces of the washing desert, the ocean-steamer and the fishing-smack sail straight towards each other as if they ran in grooves ploughed for them in the waters from the beginning of creation! Not only things and events, but our own thoughts, are so full of these surprises, that, if there were a reader in my parish who did not recognize the familiar occurrence of what I am now going to mention, I should think it a case for the missionaries of the Society for the Propagation of Intelligence among the Comfortable Classes.

There are about as many twins in the births of thought as of children. For the first time in your lives you learn some fact or come across some idea. Within an hour, a day, a week, that same fact or idea strikes you from another quarter. It seems as if it had passed into space and bounded back upon you as an echo from the blank wall that shuts in the world of thought. Yet no possible connection exists between the two channels by which the thought or the fact arrived. Let me give an infinitesimal illustration.

One of the Boys mentioned, the other evening, in the course of a very pleasant poem he read us, a little trick of the Commons table-boarders, which I, nourished at the parental board, had never heard of. Young fellows being always

hungry—Allow me to stop dead-short, in order to utter an aphorism which has been forming itself in one of the blank interior spaces of my intelligence, like a crystal in the cavity of a geode.

Aphorism by the Professor.

In order to know whether a human being is young or old, offer it food of different kinds at short intervals. If young, it will eat anything at any hour of the day or night. If old, it observes stated periods, and you might as well attempt to regulate the time of high-water to suit a fishing-party as to change these periods.

The crucial experiment is this. Offer a bulky and boggy bun to the suspected individual just ten minutes before dinner. If this is eagerly accepted and devoured, the fact of youth is established. If the subject of the question changes color and expresses surprise and incredulity, as if you could not possibly be in earnest, the fact of maturity is no less clear.

—Excuse me,—I return to my story of the Commons-table.—Young fellows being always hungry, and tea and dry toast being the meagre fare of the evening meal, it was a trick of some of the Boys to impale a slice of meat upon a fork, at dinner-time, and stick the fork holding it beneath the table, so that they could get it at tea-time. The dragons that guarded this table of the Hesperides found out the trick at last, and kept a sharp look-out for missing forks;—they knew where to find one, if it was not in its place.—Now the odd thing was, that, after waiting so many years to hear of this college trick; I should hear it mentioned a second time within the same twenty-four hours by a college youth of the present generation. Strange, but true. And so it has happened to me and to every person, often and often, to be hit in rapid succession by these twinned facts or thoughts, as if they were linked like chain-shot.

I was going to leave the simple reader to wonder over this, taking it as an un-

explained marvel. I think, however, I will turn over a furrow of subsoil in it.—The explanation is, of course, that in a great many thoughts there must be a few coincidences, and these instantly arrest our attention. Now we shall probably never have the least idea of the enormous number of impressions which pass through our consciousness, until in some future life we see the photographic record of our thoughts and the stereoscopic picture of our actions. There go more pieces to make up a conscious life or a living body than you think for. Why, some of you were surprised when a friend of mine told you there were fifty-eight separate pieces in a fiddle. How many “swimming glands”—solid, organized, regularly formed, rounded disks, taking an active part in all your vital processes, part and parcel, each one of them, of your corporeal being—do you suppose are whirled along, like pebbles in a stream, with the blood which warms your frame and colors your cheeks?—A noted German physiologist spread out a minute drop of blood, under the microscope, in narrow streaks, and counted the globules, and then made a calculation. The counting by the micrometer took him *a week*.—You have, my full-grown friend, of these little couriers in crimson or scarlet livery, running on your vital errands day and night as long as you live, sixty-five billions, five hundred and seventy thousand millions. Errors excepted.—Did I hear some gentleman say, “Doubted?”—I am the Professor. I sit in my chair with a petard under it that will blow me through the skylight of my lecture-room, if I do not know what I am talking about and whom I am quoting.

Now, my dear friends, who are putting your hands to your foreheads, and saying to yourselves that you feel a little confused, as if you had been waltzing until things began to whirl slightly round you, is it possible that you do not clearly apprehend the exact connection of all that I have been saying, and its bearing on what is now to come? Listen, then. The number of these living elements

in our bodies illustrates the incalculable multitude of our thoughts; the number of our thoughts accounts for those frequent coincidences spoken of; these coincidences in the world of thought illustrate those which we constantly observe in the world of outward events, of which the presence of the young girl now at our table, and proving to be the daughter of an old acquaintance some of us may remember, is the special example which led me through this labyrinth of reflections, and finally lands me at the commencement of this young girl's story, which, as I said, I have found the time and felt the interest to learn something of, and which I think I can tell without wronging the unconscious subject of my brief delineation.

IRIS.

You remember, perhaps, in some papers published awhile ago, an odd poem written by an old Latin tutor? He brought up at the verb *amo*, I love, as all of us do, and by and by Nature opened her great living dictionary for him at the word *filia*, a daughter. The poor man was greatly perplexed in choosing a name for her. *Lucretia* and *Virginia* were the first that he thought of; but then came up those pictured stories of Titus Livius, which he could never read without crying, though he had read them a hundred times.

—*Lucretia* sending for her husband and her father, each to bring one friend with him, and awaiting them in her chamber. To them her wrongs briefly. Let them see to the wretch,—she will take care of herself. Then the hidden knife flashes out and sinks into her heart. She slides from her seat, and falls dying. “Her husband and her father cry aloud.”—No,—not *Lucretia*.

—*Virginius*,—a brown old soldier, father of a nice girl. She engaged to a very promising young man. Decemvir Appius takes a violent fancy to her,—must have her at any rate. Hires a lawyer to present the arguments in favor of the view that she was another man's daughter.

There used to be lawyers in Rome that would do such things.—All right. There are two sides to everything. *Audi alteram partem*. The legal gentleman has no opinion,—he only states the evidence.—A doubtful case. Let the young lady be under the protection of the Honorable Decemvir until it can be looked up thoroughly.—Father thinks it best, on the whole, to give in. Will explain the matter, if the young lady and her maid will step this way. *That* is the explanation,—a stab with a butcher's knife, snatched from a stall, meant for other lambs than this poor bleeding Virginia!

The old man thought over the story. Then he must have one look at the original. So he took down the first volume and read it over. When he came to that part where it tells how the young gentleman she was engaged to and a friend of his took up the poor girl's bloodless shape and carried it through the street, and how all the women followed, wailing, and asking if that was what their daughters were coming to,—if that was what they were to get for being good girls,—he melted down into his accustomed tears of pity and grief, and, through them all, of delight at the charming Latin of the narrative. But it was impossible to call his child Virginia. He could never look at her without thinking she had a knife sticking in her bosom.

Dido would be a good name, and a fresh one. She was a queen, and the founder of a great city. Her story had been immortalized by the greatest of poets,—for the old Latin tutor clove to "*Virgilius Maro*," as he called him, as closely as ever Dante did in his memorable journey. So he took down his *Virgil*,—it was the smooth-leaved, open-lettered quarto of Baskerville,—and began reading the loves and mishaps of *Dido*. It wouldn't do. A lady who had not learned discretion by experience, and came to an evil end. He shook his head, as he sadly repeated,

"—misera ante diem, subitoque accensa furore";

but when he came to the lines,

"Ergo Iris croceis per cælum roscida pennis
Mille trahens varios adverso Sole colores,"

he jumped up with a great exclamation, which the particular recording angel who heard it pretended not to understand, or it might have gone hard with the Latin tutor some time or other.

"*Iris* shall be her name!"—he said. So her name was *Iris*.

—The natural end of a tutor is to perish by starvation. It is only a question of time, just as with the burning of college libraries. These all burn up sooner or later, provided they are not housed in brick or stone and iron. I don't mean that you will see in the registry of deaths that this or that particular tutor died of well-marked, uncomplicated starvation. They *may*, even, in extreme cases, be carried off by a thin, watery kind of apoplexy, which sounds very well in the returns, but means little to those who know that it is only debility settling on the head. Generally, however, they fade and waste away under various pretexts,—calling it dyspepsia, consumption, and so on, to put a decent appearance upon the case and keep up the credit of the family and the institution where they have passed through the successive stages of inanition.

In some cases it takes a great many years to kill a tutor by the process in question. You see, they do get food and clothes and fuel, in appreciable quantities, such as they are. You will even notice rows of books in their rooms, and a picture or two,—things that look as if they had surplus money; but these superfluities are the *water of crystallization* to scholars, and you can never get them away till the poor fellows effloresce into dust. Do not be deceived. The tutor breakfasts on coffee made of beans, edulcerated with milk watered to the verge of transparency; his mutton is tough and elastic, up to the moment when it becomes tired out and tasteless; his coal is a sullen, sulphurous anthracite, which rusts into ashes, rather than burns, in the shallow grate; his flimsy broadcloth is too thin for winter and too thick

for summer. The greedy lungs of fifty hot-blooded boys suck the oxygen from the air he breathes in his recitation-room. In short, he undergoes a process of gentle and gradual starvation.

—The mother of little Iris was not called Electra, like hers of the old story, neither was her grandfather Oceanus. Her blood-name, which she gave away with her heart to the Latin tutor, was a plain old English one, and her water-name was Hannah, beautiful as recalling the mother of Samuel, and admirable as reading equally well from the initial letter forwards and from the terminal letter backwards. The poor lady, seated with her companion at the chess-board of matrimony, had but just pushed forward her one little white pawn upon an empty square, when the Black Knight, that cares nothing for castles or kings or queens, swooped down upon her and swept her from the larger board of life.

The old Latin tutor put a modest blue stone at the head of his late companion, with her name and age and *Eheu!* upon it,—a smaller one at her feet, with initials; and left her by herself, to be rained and snowed on,—which is a hard thing to do for those whom we have cherished tenderly.

About the time that the lichens, falling on the stone, like drops of water, had spread into fair, round rosettes, the tutor had starved into a slight cough. Then he began to draw the buckle of his black pantaloons a little tighter, and took in another reef in his never-ample waistcoat. His temples got a little hollow, and the contrasts of color in his cheeks more vivid than of old. After a while his walks fatigued him, and he was tired and breathed hard after going up a flight or two of stairs. Then came on other marks of inward trouble and general waste, which he spoke of to his physician as peculiar, and doubtless owing to accidental causes; to all which the doctor listened with deference, as if it had not been the old story that one in five or six of mankind in temperate climates tells, or has told for him, as if it were something new. As

the doctor went out, he said to himself,—“On the rail at last. Accommodation train. A good many stops, but will get to the station by and by.” So the doctor wrote a recipe with the astrological sign of Jupiter before it, (just as your own physician does, inestimable reader, as you will see, if you look at his next prescription,) and departed, saying he would look in occasionally. After this, the Latin tutor began the usual course of “getting better,” until he got so much better that his face was very sharp, and when he smiled, three crescent lines showed at each side of his lips, and when he spoke, it was in a muffled whisper, and the white of his eye glistened as pearly as the purest porcelain,—so much better, that he hoped—by spring—he—might be able—to—attend—to—his class again.—But he was recommended not to expose himself, and so kept his chamber, and occasionally, not having anything to do, his bed. The unmarried sister with whom he lived took care of him; and the child, now old enough to be manageable, and even useful in trifling offices, sat in the chamber, or played about.

Things could not go on so forever, of course. One morning his face was sunken and his hands very, very cold. He was “better,” he whispered, but sadly and faintly. After a while he grew restless and seemed a little wandering. His mind ran on his classics, and fell back on the Latin grammar.

“Iris!” he said,—“*filiola mea!*”—The child knew this meant *my dear little daughter* as well as if it had been English.—“Rainbow!”—for he would translate her name at times,—“come to me,—*veni*”—and his lips went on automatically, and murmured, “*vel venito!*”—The child came and sat by his bedside and took his hand, which she could not warm, but which shot its rays of cold all through her slender frame. But there she sat, looking steadily at him. Presently he opened his lips feebly, and whispered, “*Moribundus.*” She did not know what that meant, but she saw that there was

something new and sad. So she began to cry; but presently remembering an old book that seemed to comfort him at times, got up and brought a Bible in the Latin version, called the Vulgate. "Open it," he said,—*"I will read,—segnius irritant,—don't put the light out,—ah! hæret lateri,—I am going,—vale, vale, vale, good-bye, good-bye,—the Lord take care of my child!—Domine, audi—vel audito!"* His face whitened suddenly, and he lay still, with open eyes and mouth. He had taken his last degree.

—Little Miss Iris could not be said to begin life with a very brilliant rainbow over her, in a worldly point of view. A limited wardrobe of man's attire, such as poor tutors wear,—a few good books, especially classics,—a print or two, and a plaster model of the Pantheon, with some pieces of furniture which had seen service,—these, and a child's heart full of tearful recollections and strange doubts and questions, alternating with the cheap pleasures which are the anodynes of childish grief; such were the treasures she inherited.—No,—I forgot. With that kindly sentiment which all of us feel for old men's first children,—frost-flowers of the early winter season,—the old tutor's students had remembered him at a time when he was laughing and crying with his new parental emotions, and running to the side of the plain crib in which his *alter ego*, as he used to say, was swinging, to hang over the little heap of stirring clothes, from which looked the minute, red, downy, still, round face, with unfixed eyes and working lips,—in that unearthly gravity which has never yet been broken by a smile, and which gives to the earliest moon-year or two of an infant's life the character of a *first old age*, to counterpoise that *second childhood* which there is one chance in a dozen it may reach by and by. The boys had remembered the old man and young father at that tender period of his hard, dry life. There came to him a fair, silver goblet, embossed with classical figures, and bearing on a shield the graven words, *Ex dono pupillorum*. The handle on its

side showed what use the boys had meant it for; and a kind letter in it, written with the best of feeling, in the worst of Latin, pointed delicately to its destination. Out of this silver vessel, after a long, desperate, strangling cry, which marked her first great lesson in the realities of life, the child took the blue milk, such as poor tutors and their children get, tempered with water, and sweetened a little, so as to bring it nearer the standard established by the touching indulgence and partiality of Nature,—who has mingled an extra allowance of sugar in the blameless food of the child at its mother's heart, as compared with that of its infant brothers and sisters of the bovine race.

But a willow will grow in baked sand wet with rain-water. An air-plant will grow by feeding on the winds. Nay, those huge forests that overspread great continents have built themselves up mainly from the air-currents with which they are always battling. The oak is but a foliated atmospheric crystal deposited from the aerial ocean that holds the future vegetable world in solution. The storm that tears its leaves has paid tribute to its strength, and it breasts the tornado clad in the spoils of a hundred hurricanes.

Poor little Iris! What had she in common with the great oak in the shadow of which we are losing sight of her?—She lived and grew like that,—this was all. The blue milk ran into her veins and filled them with thin, pure blood. Her skin was fair, with a faint tinge, such as the white rosebud shows before it opens. The doctor who had attended her father was afraid her aunt would hardly be able to "raise" her,—*"delicate child,"*—hoped she was not consumptive,—thought there was a fair chance she would take after her father.

A very forlorn-looking person, dressed in black, with a white neckcloth, sent her a memoir of a child who died at the age of two years and eleven months, after having fully indorsed all the doctrines of the particular persuasion to which he not only belonged himself, but thought

it very shameful that everybody else did not belong. What with foreboding looks and dreary deathbed stories, it was a wonder the child made out to live through it. It saddened her early years, of course,—it distressed her tender soul with thoughts which, as they cannot be fully taken in, should be sparingly used as instruments of torture to break down the natural cheerfulness of a healthy child, or, what is infinitely worse, to cheat a dying one out of the kind illusions with which the Father of All has strewed its downward path.

The child would have died, no doubt, and, if properly managed, might have added another to the long catalogue of wasting children who have been as cruelly played upon by spiritual physiologists, often with the best intentions, as ever the subject of a rare disease by the curious students of science.

Fortunately for her, however, a wise instinct had guided the late Latin tutor in the selection of the partner of his life, and the future mother of his child. The deceased tutoress was a tranquil, smooth woman, easily nourished, as such people are,—a quality which is inestimable in a tutor's wife,—and so it happened that the daughter inherited enough vitality from the mother to live through childhood and infancy and fight her way towards womanhood, in spite of the tendencies she derived from her other parent.

—Two and two do not always make four, in this matter of hereditary descent of qualities. Sometimes they make three, and sometimes five. It seems as if the parental traits at one time showed separate, at another blended,—that occasionally the force of two natures is represented in the derivative one by a diagonal of greater value than either original line of living movement,—that sometimes there is a loss of vitality hardly to be accounted for, and again a forward impulse of variable intensity in some new and unforeseen direction.

So it was with this child. She had glanced off from her parental probabili-

ties at an unexpected angle. Instead of taking to classical learning like her father, or sliding quietly into household duties like her mother, she broke out early in efforts that pointed in the direction of Art. As soon as she could hold a pencil she began to sketch outlines of objects round her with a certain air and spirit. Very extraordinary horses, but their legs looked as if they could move. Birds unknown to Audubon, yet flying, as it were, with a rush. Men with impossible legs, which did yet seem to have a vital connection with their most improbable bodies. By-and-by the doctor, on his beast,—an old man with a face looking as if Time had kneaded it like dough with his knuckles, with a rhubarb tint and flavor pervading himself and his sorrel horse and all their appurtenances. A dreadful old man! Be sure she did not forget those saddlebags that held the detestable bottles out of which he used to shake those loathsome powders which, to virgin childish palates that find heaven in strawberries and peaches, are— Well, I suppose I had better stop. Only she wished she was dead sometimes when she heard him coming. On the next leaf would figure the gentleman with the black coat and white cravat, as he looked when he came and entertained her with stories concerning the death of various little children about her age, to encourage her, as that wicked Mr. Arouet said about shooting Admiral Byng. Then she would take her pencil and with a few scratches there would be the outline of a child, in which you might notice how one sudden sweep gave the chubby cheek, and two dots darted at the paper looked like real eyes.

By-and-by she went to school, and caricatured the schoolmaster on the leaves of her grammars and geographies, and drew the faces of her companions, and, from time to time, heads and figures from her fancy, with large eyes, far apart, like those of Raffaele's mothers and children, sometimes with wild floating hair, and then with wings and heads thrown back

in ecstasy. This was about twelve, as the dates of these drawings show, and, therefore, three or four years before she came among us. Soon after this time, the ideal figures began to take the place of portraits and caricatures, and a new feature appeared in her drawing-books in the form of fragments of verse and short poems.

It was dull work, of course, for such a young girl to live with an old spinster and go to a village school. Her books bore testimony to this; for there was a look of sadness in the faces she drew, and a sense of weariness and longing for some imaginary conditions of blessedness or other, which began to be painful. She might have gone through this flowering of the soul, and, casting her petals, subsided into a sober, human berry, but for the intervention of friendly assistance and counsel.

In the town where she lived was a lady of honorable condition, somewhat past middle age, who was possessed of pretty ample means, of cultivated tastes, of excellent principles, of exemplary character, and of more than common accomplishments. The gentleman in black broadcloth and white neckerchief only echoed the common voice about her, when he called her, after enjoying, beneath her hospitable roof, an excellent cup of tea, with certain elegancies and luxuries he was unaccustomed to, "*The Model of all the Virtues*."

She deserved this title as well as almost any woman. She did really bristle with moral excellences. Mention any good thing she had not done; I should like to see you try! There was no handle of weakness to take hold of her by; she was as unseizable, except in her totality, as a billiard-ball; and on the broad, green, terrestrial table, where she had been knocked about, like all of us, by the cue of Fortune, she glanced from every human contact, and "*caramed*" from one relation to another, and rebounded from the stuffed cushion of temptation, with such exact and perfect angular movements, that the Enemy's corps of

Reporters had long given up taking notes of her conduct, as there was no chance for their master.

What an admirable person for the patroness and directress of a slightly self-willed child, with the lightning zig-zag line of genius running like a glittering vein through the marble whiteness of her virgin nature! One of the lady-patroness's peculiar virtues was calmness. She was resolute and strenuous, but still. You could depend on her for every duty; she was as true as steel. She was kind-hearted and serviceable in all the relations of life. She had more sense, more knowledge, more conversation, as well as more goodness, than all the partners you have waltzed with this winter past together.

Yet no man was known to have loved her, or even to have offered himself to her in marriage. It was a great wonder. I am very anxious to vindicate my character as a philosopher and an observer of Nature by accounting for this apparently extraordinary fact.

You may remember certain persons who have the misfortune of presenting to the friends whom they meet a cold, damp hand. There are states of mind in which a contact of this kind has a depressing effect on the vital powers that makes us insensible to all the virtues and graces of the proprietor of one of these life-absorbing organs. When they touch us, virtue passes out of us, and we feel as if our electricity had been drained by a powerful negative battery, carried about by an overgrown human torpedo.

"*The Model of all the Virtues*" had a pair of searching eyes as clear as Wenhams ice; but they were slower to melt than that fickle jewelry. Her features disordered themselves slightly at times in a surface-smile, but never broke loose from their corners and indulged in the riotous tumult of a laugh,—which, I take it, is the mob-law of the features,—and propriety the magistrate who reads the riot-act. She carried the brimming cup of her inestimable virtues with a cautious, steady hand, and an eye always

on them, to see that they did not spill. Then she was an admirable judge of character. Her mind was a perfect laboratory of tests and reagents; every syllable you put into breath went into her intellectual eudiometer, and all your thoughts were recorded on litmus-paper. I think there has rarely been a more admirable woman. Of course, Miss Iris was immensely and passionately attached to her.—Well,—these are two highly oxygenated adverbs,—grateful,—suppose we say,—yes,—grateful, dutiful, obedient to her wishes for the most part,—perhaps not quite up to the concert pitch of such a perfect orchestra of the virtues.

We must have a weak spot or two in a character before we can love it much. People that do not laugh or cry, or take more of anything than is good for them, or use anything but dictionary-words, are admirable subjects for biographies. But we don't always care most for those flat-pattern flowers that press best in the herbarium.

This immaculate woman,—why couldn't she have a fault or two? Isn't there any old whisper which will tarnish that wearisome aureole of saintly perfection? Doesn't she carry a lump of opium in her pocket? Isn't her cologne-bottle replenished oftener than its legitimate use would require? It would be such a comfort!

Not for the world would a young creature like Iris have let such words escape her, or such thoughts pass through her mind. Whether at the bottom of her soul lies any uneasy consciousness of an oppressive presence, it is hard to say, until we know more about her. Iris sits between the little man and the "Model of all the Virtues," as the black-coated gentleman called her.—I will watch them all.

—Here I stop for the present. What the Professor said has had to make way this time for what he saw and heard.

—And now you may read these lines, which were written for gentle souls who love music, and read in even tones,

and, perhaps, with something like a smile upon the reader's lips, at a meeting where these musical friends had gathered. Whether they were written with smiles or not, you can guess better after you have read them.

THE OPENING OF THE PIANO.

In the little southern parlor of the house you
may have seen
With the gambrel-roof, and the gable looking
westward to the green,
At the side toward the sunset, with the window
on its right,
Stood the London-made piano I am dreaming
of to-night.

Ah me! how I remember the evening when it
came!
What a cry of eager voices, what a group of
cheeks in flame,
When the wondrous box was opened that had
come from over seas,
With its smell of mastic-varnish and its flash
of ivory keys!

Then the children all grew fretful in the rest-
lessness of joy,
For the boy would push his sister, and the
sister crowd the boy,
Till the father asked for quiet in his grave
paternal way,
But the mother hushed the tumult with the
words, "Now, Mary, play."

For the dear soul knew that music was a very
sovereign balm;
She had sprinkled it over Sorrow and seen its
brow grow calm,
In the days of slender harpsichords with tap-
ping tinkling quills,
Or carolling to her spinet with its thin metal-
lic thrills.

So Mary, the household minstrel, who always
loved to please,
Sat down to the new "Clementi," and struck
the glittering keys.
Hushed were the children's voices, and every
eye grew dim,
As, floating from lip and finger, arose the
"Vesper Hymn."

—Catharine, child of a neighbor, curly and
rosy-red,
(Wedded since, and a widow,—something like
ten years dead.)

Hearing a gush of music such as none before,
Steals from her mother's chamber and peeps
at the open door.

Just as the "Jubilate" in threaded whisper
dies,

—"Open it! open it, lady!" the little maiden
cries,

(For she thought 'twas a singing creature
caged in a box she heard,)

"Open it! open it, lady! and let me see the
bird!"

THE UTAH EXPEDITION;

ITS CAUSES AND CONSEQUENCES.

IF General Henry Knox, of Revolutionary memory, the first Secretary of War of the Republic, had dreamed that the successor to his portfolio, after an interval of seventy years, would recommend to Congress the purchase of a thousand camels for military purposes, he would have attributed the fancy to excited nerves or a too hearty dinner. Had he dreamed, further, that the grotesque mounted corps was to be employed in regions two thousand miles beyond the frontier of the Anglo-Saxon pioneer of 1789, to guard travel to an actual El Dorado, the vision would have appeared still more extraordinary. And its absurdity would have seemed complete, if he had fancied the high road of this travel as leading through a community essentially Oriental in its social and political life, which was nevertheless ripening into a State of the American Union. Yet if General Knox could be roused from his grave at Thomaston, he would see the dream realized. On the Pacific lies El Dorado; among the fastnesses of the Rocky Mountains there is a community which blends the voluptuousness of Bagdad with the economy of Cape Cod; and within two years a regiment of camel-riders will be scouring the Great American Plains after Cheyennes, Navajoes, and Camanches.

The propagation of the religion of which Joseph Smith was the prophet has just begun to attract the notice its ex-

traordinary success deserves. So long as the head of the Mormon Church was considered a kind of Mahometan Sam Slick, and his associates a crazy rabble, it was vain to expect that the whole sect could be treated with more attention than any of the curiosities in a popular museum. But a juster appreciation of the constitution of the Mormon community begins to prevail, and with it comes a conviction that questions are involved in its relations to the parent government which are not exceeded in importance by any that have ever been agitated at Washington. Brigham Young no longer seems to the American public a religious mountebank, only one grade removed from the man Orr, who claimed to be the veritable Angel Gabriel, and was killed in a popular commotion which he had himself excited in Dutch Guiana. On the contrary, he begins to appear as a man of great native strength and scope of mind, who understands the phases of human character and knows how to avail himself of the knowledge, and who has acquired spiritual dominion over one hundred and fifty thousand souls, combined with absolute temporal supremacy over fifty thousand of the number.

The situation of the Mormon community in Utah has been peculiarly adapted, heretofore, to the eccentricities of its inhabitants. Isolated from Christendom on the east and west by plains incapable of settlement for generations to come,

and encompassed by mountain-ranges, the line of whose summits runs above the boundary of eternal snow, it was independent of the influences of Christian civilization. No missionary of any Christian sect ever attempted to propagate his doctrines in Utah,—nor, perhaps, would any such propagation have been tolerated, had it been attempted. The Mormon religion was free to run its own course and develop whatever elements it possessed of good and evil. When Brigham Young and his followers from Nauvoo descended the Wahsatch range in the summer of 1847, and took up their abode around the Great Salt Lake, the avowed creed of the Church was different from that proclaimed to-day. The secret doctrines entertained by its leaders were perhaps the same as, at present, but the religion of the people was a species of mysticism which it is not impossible to conceive might commend itself even to a refined mind. The existence of polygamy was officially denied by the highest ecclesiastical authority, although we know to-day that the denial was a shameless lie, and that Joseph Smith, during his lifetime, had a plurality of wives, and at his death bequeathed them to his successor, who already possessed a harem of his own. Property was almost equally distributed among the people, the leaders being as poor as their disciples. In this respect at that time they were accustomed exultantly to compare their condition with that of the early Christians.

Ten years passed, and the change was extraordinary. The doctrines of Mormonism, if plainly stated, are no longer such as can commend themselves to a mind not perverted nor naturally prurient. Polygamy is inculcated as a religious duty, without which dignity in the Celestial Kingdom is impossible, and even salvation hardly to be obtained. Property is distributed unjustly, the bulk of real and personal estate in the Territory being vested in the Church and its directors, between whom and the mass of the population there exists a difference in social welfare as wide as between the Rus-

sian nobleman and his serf. In brief, the Mormons no longer claim to be a Christian sect, but assert, and truly, that their religion is as distinct from Christianity as that is from Mahometanism. Many of the doctrines whispered in 1847 only to those who had been admitted to the penetralia of the Nauvoo Temple are proclaimed unblushingly in 1857 from the pulpit in the Tabernacle at Salt Lake City. A system of polytheism has been ingrafted on the creed, according to which there are grades among the Gods, there being no Supreme Ruler of all, but the primeval Adam of Genesis being the deity highest in spiritual rank, and Christ, Mahomet, Joseph Smith, and, finally, Brigham Young, partaking also of divinity. The business of these deities in the Celestial Kingdom is the propagation of souls to people bodies begotten on earth, and the sexual relation is made to permeate every portion of the creed as thoroughly as it pervaded the religions of ancient Egypt and India. In the Endowment House at Salt Lake City, secret rites are practised of a character similar to the mysteries of the Nile, and presided over by Young and Kimball, two Vermont Yankees, with all the solemnity of priests of Isis and Osiris. In these rites, which are symbolical of the mystery of procreation, both sexes participate, clad in loose flowing robes of white linen, with cleansed bodies and anointed hair. Since the revelation of the processes of the Endowment, which was first fully made by a young apostate named John Hyde, other dissenters, real and pretended, have attempted to impose on the public exaggerated accounts of these ceremonies; but in justice to the Mormon Church it ought to be said, that there is no foundation for the reports that they are such as would outrage decency. To be sure, an assemblage of members of both sexes, clad in white shifts, with oiled and dishevelled hair, in a room fitted up in resemblance of a garden, to witness a performance of the allegory of Adam and Eve in Eden, which is conducted so as to be sensually symbolic, is

not suggestive of refined ideas; but it is necessary to take into consideration the character both of performers and witnesses, which is not distinguished in any way by delicacy. According to their standard of morality and taste, the rites of the Endowment are devoid of immodesty.

In their political bearing, however, they are more important, and justly liable to the severest censure. It is established beyond question, that the initiated, clad in the preposterous costume before described, take an oath, in the presence of their Spiritual Head, to cherish eternal enmity towards the government of the United States until it shall have avenged the death of their prophet, Joseph Smith. And this ceremony is not a mere empty form of words. It is an oath, the spirit of which the Endowed carry into their daily life and all their relations with the Gentile world. In it lies the root of the evasion, and finally subversion, of Federal authority which occasioned the recent military expedition to Utah.

When the Territory was organized in 1850, the government at Washington, acting on an imperfect knowledge of the nature of Mormonism, conferred the office of Governor upon Brigham Young. For this act Mr. Fillmore has been unjustly censured. It appeared to him, at the time, a proper, as well as politic, appointment. But before the succession of General Pierce to the Presidency, its evil results became apparent, in the expulsion of civil officers from the Territory and the subversion of all law. A feeble, and of course unsuccessful, attempt was then made to supplant Young with Lieutenant-Colonel Steptoe, a meritorious, but too amiable officer of the regular army,—the same whose defeat by the Cayuses, Spokans, and Cœur d'Alènes, last May, occasioned the Indian war in Washington Territory. During the summer of 1855, he led a battalion overland, wintering in Salt Lake City. It was at his option, at any time during his sojourn, to have claimed the supreme executive authority. He did not do so, but even headed a recom-

mendation to President Pierce for the re-appointment of Brigham Young. This was the result of his winter's residence, during which he and some of his fellow-officers were feasted to their stomachs' content, and entirely careless concerning the political condition of the Territory. Late in the spring, he marched away to California, after having expressed to the President that it was "his unqualified opinion, based on personal acquaintance, that Brigham Young is [was] the most suitable person for the office of Governor." Brigham's views of the winter's proceedings, on the other hand, were expressed in a sermon preached in the Tabernacle, the Sunday after the departure of the Lieutenant-Colonel, in which he repeated his declaration of three years previous:—

"I am, and will be, governor, and no power can hinder it, until the Lord Almighty says, 'Brigham, you need not be governor any longer.'" And he added,—"I do not know what I shall say next winter, if such men make their appearance here as some last winter. I know what I think I shall say; if they play the same game again, let the women be ever so bad, so help me God, we will slay them."

Most of the other civil officers who were commissioned about the same time with Colonel Steptoe arrived the August after he had departed. Within eighteen months their lot was the same as that of their predecessors. In April, 1857, before the snow had begun to melt on the mountains, all of them, in a party led by Surveyor-General Burr, were on their way to the States, happy in having escaped with life. During the previous February, the United States District Court had been broken up in Salt Lake City. A mob had invaded the courtroom, armed with pistols and bludgeons, a knife was drawn on the judge in his private room, and he was ordered to adjourn his court *sine die*, and yielded. Indian-Agent Hurt was the only Gentile official who remained in the Territory.

In the mean while, however, a change of national administration had taken place, and General Pierce had been succeeded by Mr. Buchanan. For nearly three years the country had been convulsed by an agitation of the Slavery question, originating with Senator Douglas, which culminated in the Presidential election of 1856. The Utah question, grave though it was, was forgotten in the excitement concerning Kansas, or remembered only by the Republican party, as enabling them to stigmatize more pungently the political theories of the Illinois Senator, by coupling polygamy and slavery, "twin relics of barbarism," in the resolution of their Philadelphia Platform against Squatter Sovereignty. In the lull which succeeded the election, Mr. Buchanan had leisure, at Wheatland, to draft a programme for his incoming administration. His paramount idea was to gag the North and induce her to forget that she had been robbed of her birthright, by forcing on the attention of the country other questions of absorbing interest. One of the most obvious of these was supplied by the condition of affairs in Utah. It had been satisfactorily established, that the Mormons, acting under the influence of leaders to whom they seemed to have surrendered their judgment, refused to be controlled by any other authority; that they had been often advised to obedience, and these friendly counsels had been answered with defiance; that officers of the Federal Government had been driven from the Territory for no offence except an effort to do their sworn duty, while others had been prevented from going there by threats of assassination; that judges had been interrupted in the performance of their functions, and the records of their courts seized, and either destroyed or concealed; and, finally, that many other acts of unlawful violence had been perpetrated, and the right to repeat them openly claimed by the leading inhabitants, with at least the silent acquiescence of nearly all the rest of the population. In view of these

facts, Mr. Buchanan determined to supersede Brigham Young in the office of Governor, and to send to Utah a strong military force to sustain the new appointee in the exercise of his authority.

The rumors of the impending expedition reached the Mormons at the very moment they were prepared to apply to Congress for admission as a State. A Constitution had been framed by a Convention assembled without the sanction of an enabling act, and was intrusted to George A. Smith and John Taylor, two of the Twelve Apostles of the Church, for presentation to Congress. These men, both of them of more than ordinary ability, helped to present the Mormon side of the question to the country through the newspapers, during the winter of 1856-7. The essence of their vindication was, that the character of some of the Federal officers who had been sent to Utah was objectionable in the extreme; but, granting the truth of all their statements on this subject, they supplied no excuse for the utter subversion of Federal authority in the Territory. Their narrative, however, formed a most spicy chapter in the annals of official scandal. The three United States judges, Kinney, Drummond, and Stiles, were presented to the public stripped of all judicial sanctity;—Kinney, the Chief Justice, as the keeper of a grocery-store, dance-room, and boarding-house, enforcing the bills for food and lodging against his brethren of the law by expulsion from the bar in case of non-payment, and so tenacious of life, that, before departing from the Territory, he solicited and received from Brigham Young a patriarchal blessing; Drummond, as an amorous horse-jockey, who had taken to Utah, as his mistress, a drab from Washington, and seated her beside him once upon the bench of the court; Stiles as himself a Mormon, so far as the possession of two wives could make him one. From the early days of Joseph Smith, his disciples have never minced their language, and they expended their whole vocabulary now on such themes as have been cited, proving, to

the satisfaction of everybody, that, in respect to the judiciary, they had indeed had just cause for complaint. The mission of Smith and Taylor failed, as might have been expected,—the Chairman of the Committee on Territories, Mr. Grow, of Pennsylvania, refusing even to present their Constitution to the House,—and they prepared to return to Utah.

A month or two later, Mr. Buchanan was inaugurated, and preparations for the Utah Expedition were immediately ordered. In the first place, an opinion was solicited from General Scott as to the feasibility of the undertaking until the next year. That distinguished soldier gave a decision adverse to the immediate dispatch of the expedition. He considered that the arrangements necessary to be made were so extensive, and the distances from which the regiments must be concentrated so great, that the wiser plan was to consume the year in getting everything in readiness for the troops to march from the frontier early in the spring of 1858. It would have been well, had his advice prevailed; but it was overruled, and the preparations for the expedition were commenced. The troops detailed for the service were the Fifth Infantry, then busy fighting Billy Bowlegs among the everglades of Florida,—the Tenth Infantry, which was stationed at the forts in Upper Minnesota,—the Second Dragoons, which was among the forces assembled at Fort Leavenworth, to be used, if necessary, in Kansas, at the requisition of Governor Walker,—and Phelps's light-artillery battery, the same which so distinguished itself at Buena Vista, under the command of Captain Washington. An ordnance-battery, also, was organized for the purposes of the expedition. Brevet Brigadier-General Harney was assigned to the command-in-chief, an officer of a rude force of character, amounting often to brutality, and careless as to those details of military duty which savor more of the accountant's inkstand than of the drum and fife, but ambitious, active, and well acquainted with the character of the service for which he was detailed. He

was, at the time, in command in Kansas, subject in a measure to the will of Governor Walker.

The whole number of troops under orders for the expedition was hardly twenty-five hundred, but from this total no estimate can be predicated of the enormous quantities of commissary stores and munitions of war necessary to be dispatched to sustain it. It was thought advisable to send a supply for eighteen months, so that the trains exceeded in magnitude those which would accompany an army of twenty thousand in ordinary operations on the European continent, where *dépôts* could be established along the line of march. To appreciate such preparations, it is necessary to understand the character of the country to be traversed between the Missouri River and the Great Salt Lake.

The route selected for the march was along the emigrant road across the Plains, first defined fifty years ago by trappers and *voyageurs* following the trail by which the buffalo crossed the mountains, described by Lieutenant-Colonel Fremont, in the reports of his earlier explorations, and subsequently adopted by all the overland emigration across the continent. It is, perhaps, the most remarkable natural road in the world. The hand of man could hardly add an improvement to the highway along which, from the Missouri to the Great Basin, Nature has presented not a single obstacle to the progress of the heaviest loaded teams. From the frontier, at Fort Leavenworth, it sweeps over a broad rolling prairie to the Platte, a river shallow, but of great width, whose course is as straight as an arrow. Pursuing the river-bottom more than three hundred miles, to the Black Hills, steep mounds dotted with dark pines and cedars, it enters the broad belt of mountainous country which terminates in the rim of the Basin. Following thence the North Fork of the Platte, and its tributary, the Sweetwater,—so named by an old French trapper, who had the misfortune to upset a load of sugar into the stream,—it emerges from the Black Hills

into scenery of a different character. On the northern bank of the Sweetwater are the Rattlesnake Mountains, huge excrescences of rock, blistering out of an arid plain; on the southern bank, the hills which bear the name of the river, and are only exaggerations of the bluffs along the Platte. The dividing ridge between the waters of the Atlantic and Pacific is reached in the South Pass, at the foot of a spur of the Wind River range, a group of gigantic mountains, whose peaks reach three thousand feet above the line of perpetual snow. There the emigrant strikes his tent in the morning on the banks of a rivulet which finds its way, through the Platte, Missouri, and Mississippi, into the Gulf of Mexico,—and pitches it, at his next camp, upon a little creek which trickles into Green River, and at last, through the Colorado, into the Gulf of California. Not far distant spring the fountains of the Columbia. A level table-land extends to the fords of Green River, a clear and rapid stream, whose entire course has never yet been mapped by an intelligent explorer. Here the road becomes entangled again among mountains, and winds its way over steep ridges, across foaming torrents, and through cañons so narrow that only noon-day sunshine penetrates their depths, until it emerges, through a rocky gate in the great barrier of the Wahsatch range, upon the bench above Salt Lake City, twelve hundred miles from Fort Leavenworth. The view at this point, from the mouth of Emigration Cañon, is enchanting. The sun, sinking through a cloudless western sky, silvers the long line of the lake, which is visible twenty miles away. Beyond the city the River Jordan winds quietly through the plain. Below the gaze are roofs and cupolas, shady streets, neat gardens, and fields of ripening grain. The mountains, which bound the horizon on every side, except where a wavering stream of heated air shows the beginning of the Great Desert, are tinged with a soft purple haze, in anticipation of the sunset, but every patch of green grass on their slopes glows through

it like an emerald, while along the summits runs an undulating thread of snow.

Throughout this vast line of road, the only white inhabitants are the garrisons of the military posts, the keepers of mail-stations, and *voyageurs* and mountaineers, whose cabins may be found in every locality favorable to Indian trade. These last are a singular race of men, fast disappearing, like the Indian and the buffalo, their neighbors. Most of them are of French extraction, and some have died without having learned to speak a word of English. Their wealth consists in cattle and horses, and little stocks of goods which they purchase from the sutlers at the forts or the merchants at Salt Lake City. Some of the more considerable among them have the means of sending to the States for an annual supply of blankets, beads, vermilion, and other stuff for Indian traffic; but the most are thriftless, and all are living in concubinage or marriage with squaws, and surrounded by troops of unwashed, screeching half-breeds. Once in from three to six years, they will make a journey to St. Louis, and gamble away so much of their savings since the last visit as has escaped being wasted over greasy card-tables during the long winter-evenings among the mountains. The Indian tribes along the way are numerous and formidable, the road passing through country occupied by Pawnees, Cheyennes, Sioux, Arapahoes, Crows, Snakes, and Utahs. With the Cheyennes war had been waged by the United States for more than two years, which interfered seriously with the expedition; for, during the month of June, a war-party from that tribe intercepted and dispersed the herd of beef-cattle intended for the use of the army.

The natural characteristics of the entire route are as unpromising as those of its inhabitants. At the distance of about two hundred miles from the Missouri frontier the soil becomes so pervaded by sand, that only scientific agriculture can render it available. Along the Platte there is no fuel. Not a tree is visible, except the thin fringe of cottonwoods on

the margin of the river, all of which upon the south bank, where the road runs, were hewed down and burned at every convenient camp, during the great California emigration. When the Rocky Mountains are entered, the only vegetation found is bunch-grass, so called because it grows in tufts,—and the *artemisia*, or wild sage, an odorous shrub, which sometimes attains the magnitude of a tree, with a fibrous trunk as thick as a man's thigh, but is ordinarily a bush about two feet in height. The bunch-grass, grown at such an elevation, possesses extraordinary nutritive properties, even in midwinter. About the middle of January a new growth is developed underneath the snow, forcing off the old dry blade that ripened and shed its seed the previous summer. From Fort Kearney to Fort Laramie, almost the only fuel to be obtained is the dung of buffalo and oxen, called, in the vocabulary of the region, "chips,"—the *argal* of the Tartar deserts. Among the mountains the sage is the chief material of the traveller's fire. It burns with a lively, ruddy flame, and gives out an intense heat. In the settlements of Utah all the wood consumed is hauled from the cañons, which are usually lined with pines, firs, and cedars, while the broadsides of the mountains are nothing but terraces of volcanic rock. The price of wood in Salt Lake City is from twelve to twenty dollars a cord.

From this brief review of the natural features of the country, some idea may be formed of the intensity of the religious enthusiasm which has induced fifty thousand Mormon converts to traverse it,—many of them on foot and trundling handcarts,—to seek a home among the valleys of Utah, in a region hardly more propitious; and some idea, also, of the difficulties which were to attend the march of the army.

During the spring of 1857, the preparations for the expedition were hurried forward, and in June the whole force was collected at Fort Leavenworth. All Western Missouri was in a ferment. The river foamed with steamboats freighted

with military stores, and the levee at Leavenworth City was covered all summer long with the frames of wagons. Between the 18th and the 24th of July, all the detachments of the little army were on the march, except a battalion of two companies of infantry, which had been unable to join their regiment at the time it moved from Minnesota, and the Second Dragoons, which Governor Walker retained in Kansas to overawe the uneasy people of the town of Lawrence. General Harney also tarried in Kansas, intending to wait until after the October election there, at which disturbances were anticipated that it might be necessary to quell by force.

At Washington, movements of equal importance were taking place. The Postmaster-General, in June, annulled the contract held by certain Mormons for the transportation of the monthly mail to Utah, ostensibly on account of non-performance of the service within the stipulated time, but really because he was satisfied that the mails were violated, either *en route* or after arrival at Salt Lake City. The office of Governor of the Territory was offered by the President to various persons, and finally accepted, July 11th, by Alfred Cumming, a brother of the Cumming of Georgia who fought multitudinous duels with McDuffie of South Carolina, all of which both parties survived. Mr. Cumming had been a sutler during the Mexican War, and more recently a Superintendent of Indian Affairs on the Upper Missouri. He was reputed to be a gentleman of education, ambition, and executive ability. The office of Chief Justice was conferred on Judge D. R. Eckels, of Indiana, a person well fitted for the position by the circumstances of his early life, of the utmost determination, and whose judicial integrity was above suspicion.

The news of the stoppage of the mail reached Salt Lake Valley July 24th, an eventful anniversary in the history of Mormonism. It was on the 24th of July, 1847, that Brigham Young entered the Valley from the East, and the day had

always afterwards been kept as a holiday of the Church. On this occasion, the celebration was held in Cottonwood Cañon, one of the wildest and grandest gorges among the Wahsatch Mountains, opening at the foot of the Twin Peaks, about twenty miles southeast from Salt Lake City. Thither more than twenty-five hundred people had flocked from the city on the previous day, and prepared to hold their festival under bowers built of fragrant pines and cedars around a little lake far up among the mountains. During the afternoon of the 24th, while they were engaged in music, dancing, and every manner of lively sport, two dusty messengers rode up the cañon, bringing from the States the news of the stoppage of the mail and of the approaching march of the troops. This mode of announcement was probably preconcerted with Brigham Young, who was undoubtedly aware of the facts on the preceding day. A scene of the maddest confusion ensued, which was heightened by the inflammatory speeches of the Mormon leaders. Young reminded the fanatical throng, that, ten years ago that very day, he had said, "Give us ten years of peace and we will ask no odds of the United States"; and he added, that the ten years had passed, and now they asked no odds,—that they constituted henceforth a free and independent state, to be known no longer as Utah, but by their own Mormon name of Deseret. Kimball, the second in authority in the Church, called on the people to adhere to Brigham, as their "prophet, seer, and revelator, priest, governor, and king." The sun set on the first overt act in the rebellion. The fanatics, wending their way back to the city, across the broad plain, in the moonlight, were ready to follow wherever Brigham Young might choose to lead.

On the succeeding Sundays the spirit of rebellion was breathed from the pulpit in language yet more intemperate, and often profane and obscene. Military preparations were made with the greatest bustle; and the Nauvoo Legion—under which name, transplanted from Il-

linois, the militia were organized—was drilled daily in the streets of the city. The martial fervor ran so high that even the boys paraded with wooden spears and guns, and the little ragamuffins were inspected and patted on the head by venerable and veritable Fathers of the Church.

In total ignorance that the standard of rebellion had already been raised, General Harney, in the beginning of August, detached Captain Van Vliet, the Quartermaster on his staff, to proceed rapidly to Utah to make arrangements for the reception of the army in the Valley. He passed the troops in the vicinity of Fort Laramie. About thirty miles west of Green River he was met by a party of Mormons, who escorted him, accompanied only by his servant, to the city. There he was politely treated, but informed that his mission would be fruitless, for the Mormon people were determined to resist the ingress of the troops. At a meeting in the Tabernacle, at which the Captain was present on the platform, when Brigham Young called on the audience for an expression of opinion, every hand was raised in favor of the policy of resistance, and in expression of willingness, if it should become necessary, to abandon harvest and homestead, retreat with the women to the mountains, and wage there a war of extermination. They took pains to conduct the Captain through the well-kept gardens and blooming fields, to show him their household comforts, the herds of cattle, the stacks of hay and grain, and all their public improvements, in order to present a contrast between such plenty and prosperity and such a scene of desolation as they depicted. Profoundly impressed by the devotion of the people to their leaders, he started on his return, accompanied by Mr. Bernhisel, the Mormon delegate to Congress. Two days after he left the city, a proclamation was issued by Young, in his capacity of Governor, in which the army was denounced as a mob and forbidden to enter the Territory, and the people of Utah were summoned to arms to repel its advance.

When this document reached the troops, they had already crossed the Territorial line, and were prepared for its reception by the report of Captain Van Vliet as he passed them on his return to the States. Their position was embarrassing. In the absence of General Harney, each separate detachment constituted an independent command. The senior officer present was Colonel Alexander, of the Tenth Infantry, a thorough soldier in the minutiae of his profession, and distinguished by gallantry during the Mexican War. He resolved, very properly, in view of his seniority, to assume the command-in-chief until General Harney should arrive from the East. On the 27th of September, before the proclamation was received, the first division of the army crossed Green River, having accomplished a march of a thousand miles in little more than two months. That same night it hastened forwards thirty miles to Ham's Fork,—a confluent of Black's Fork, which empties into Green River,—where several supply-trains were gathered, upon which there was danger that the Mormons would make an attack. The other divisions followed within the week, and the whole force was concentrated. On the night of October 5th, after the last division had crossed the river, two supply-trains, of twenty-five wagons each, were captured and burned just on the bank of the stream, by a party of mounted Mormons led by a man named Lot Smith, and the next morning another train was destroyed by the same party, twenty miles farther east, on the Big Sandy, in Oregon Territory. The teamsters were disarmed and dismissed, and the cattle stolen. No blood was shed; not a shot fired. Immediately upon the news of this attack reaching Ham's Fork, Colonel Alexander, who had then assumed the command-in-chief, dispatched Captain Macey, of the Fifth Infantry, with four hundred men, to afford assistance to the trains, and punish the aggressors, if possible. But when the Captain reached Green River, all that was visible near the little French trading-post was two broad, black rings on the ground, be-

strewn with iron chains and bolts, where the wagons had been burned in *corral*. He was able to do nothing except to send orders to the other trains on the road to halt, concentrate, and await the escort of Brevet Colonel Smith, of the Tenth Infantry, who had started from the frontier in August with the two companies mentioned as having been left behind in Minnesota, and by rapid marches had already reached the Sweetwater. The condition of affairs at this moment was indeed critical. By the folly of Governor Walker's movements in Kansas the expedition was deprived of its mounted force, and consisted entirely of infantry and artillery. The Mormon marauding parties, on the contrary, which it now became evident were hovering on every side, were all well mounted and tolerably well armed. The loss of three trains more would reduce the troops to the verge of starvation before spring, in case of inability to reach Salt Lake Valley. Nothing was heard from General Harney, and in his absence no one possessed instructions adequate to the emergency.

To understand the movements which followed, it is necessary to describe briefly the topography of the country between Green River and the Great Salt Lake. The entire interval, one hundred and fifty miles in breadth, is filled with groups and chains of mountains, the direct route through which to Salt Lake City lies along water-courses, following them through cañons so narrow that little science is necessary to render the natural defences impregnable. In this respect, and in the general character of the scenery, it bears much resemblance to the Tyrol. In the narrowest of these gorges, Echo Cañon, twenty-five miles in length, whose walls of rock often approach within a stone's throw of each other, it became known that the Mormons were erecting breastworks and digging ditches, by means of which they expected to be able to submerge the road to the depth of several feet, for miles. The only known mode of avoiding a passage through this gorge was by a cir-

cuitous route, following the eastern slope of the rim of the Great Basin northward, more than a hundred miles, to Soda Springs, at the northern bend of Bear River, the principal tributary of the Salt Lake,—then crossing the rim along the course of the river, and pursuing its valley southward, and that of the Roseaux or Malade, into Salt Lake Valley. The distance of Salt Lake City from the camp on Ham's Fork was by this route nearly three hundred miles,—while the distance by the road past Fort Bridger, through the cañons, was less than one hundred and fifty miles. At that fort, about twenty miles west from the encampment of the army, the Mormon marauding parties had their head-quarters and principal *dépôt*. It was there that Colonel Alexander was ordered, about this time, by Brigham Young, to surrender his arms to the Mormon Quartermaster-General, on which condition and an agreement to depart eastward early the following spring, he and his troops should be fed during the winter; otherwise, Young added, they would perish from hunger and cold, and rot among the mountains. In his perplexity, Colonel Alexander called a council of war, and, with its approval, resolved to commence a march towards Soda Springs, leaving Fort Bridger unmolested on his left. For more than a fortnight the army toiled along Ham's Fork, cutting a road through thickets of greasewood and wild sage, incumbered by a train of such unwieldy length that often the advance-guard reached its camp at night before the rear-guard had moved from the camp of the preceding day, and harassed by Mormon marauding parties from the Fort, which hung about the flanks out of the reach of rifle-shot, awaiting opportunities to descend on unprotected wagons and cattle. The absence of dragoons prevented a dispersion of these banditti. Some companies of infantry were, indeed, mounted on mules, and sent to pursue them, but these only excited their derision. The Mormons nicknamed them "jackass cavalry." Their only exploit was the cap-

ture of a Mormon major and his adjutant, on whose person were found orders issued by D. H. Wells, the Commanding General of the Nauvoo Legion, to the various detachments of marauders, directing them to burn the whole country before the army and on its flanks, to keep it from sleep by night surprises, to stampede its animals and set fire to its trains, to blockade the road by felling trees and destroying river-fords, but to take no life. On the 13th of October, eight hundred oxen were cut off from the rear of the army and driven to Salt Lake Valley. Thus the weary column toiled along until it reached the spot where it expected to be joined by Colonel Smith's battalion, about fifty miles up Ham's Fork. The very next day snow fell to the depth of more than a foot. Disheartened, vacillating, and perplexed, Colonel Alexander called another council of war, and, acting on its judgment, resolved to retrace his steps. An express reached him that same day, from Colonel Smith, by which he was informed of the approach of Colonel Albert S. Johnston, of the Second Cavalry, who had been detailed to take command of the expedition in the place of General Harney, and now sent orders that the troops should return to Black's Fork, where he proposed to concentrate the entire army.

During the month of August, it having become evident that General Harney was reluctant to proceed to Utah, anticipating a brighter field for military distinction in Kansas, Colonel Johnston was summoned from Texas to Washington and there ordered to hasten to take command of the expedition. On the 17th of September, he left Fort Leavenworth, and by rapid travel overtook Colonel Smith while he was engaged in collecting the trains which he intended to escort to the main body. On the 27th of October, the column moved forwards. The escort had been reinforced by a squadron of dragoons from Fort Laramie, but its entire strength was less than three hundred men, a number obviously insufficient to defend a line of wagons six miles in

length. An attack by the Mormons was expected every day, but none was made; and on the 3d of November, the whole army, with its munitions, supplies, and commander, was concentrated on Black's Fork. Colonel Alexander had arrived at the place of rendezvous some days previously, being no nearer Salt Lake City November 3d than he had been a month before. The country was covered with snow, winter having fairly set in among the mountains, the last pound of forage was exhausted, and the cattle and mules were little more than animated skeletons.

Colonel Johnston had already determined, while in the South Pass, that it would be impracticable to cross the Wahsatch range until spring, and shaped his arrangements accordingly. He resolved to establish winter-quarters in the vicinity of Fort Bridger, and on the 6th of November the advance towards that post commenced. The day was memorable in the history of the expedition. Sleet poured down upon the column from morning till night. On the previous evening, five hundred cattle had been stampeded by the Mormons, in consequence of which some trains were unable to move at all. After struggling along till nightfall, the regiments camped wherever they could find shelter under bluffs or among willows. That night more than five hundred animals perished from hunger and cold, and the next morning the camp was encircled by their carcasses, coated with a film of ice. It was a scene which could be paralleled only in the retreat of the French from Moscow. Had there been any doubt before concerning the practicability of an immediate advance beyond Fort Bridger, none existed any longer. It was the 16th of November when the vanguard reached that post, which the Mormons had abandoned the week before. Nearly a fortnight had been consumed in accomplishing less than thirty miles.

It is time to return to the States and record what had been transpiring there, in connection with the expedition, while

the army was staggering towards its permanent winter-camp. The only one of the newly-appointed civil officials who was present with the troops was Judge Eckels, who had left his home in Indiana immediately after receiving his appointment, and started across the Plains with his own conveyance. Near Fort Laramie he was overtaken by Colonel Smith, whom he accompanied in his progress to the main body. Governor Cumming, in the mean while, dilly-dallied in the East, travelling from St. Louis to Washington and back again, begging for an increase of salary, for a sum of money to be placed at his disposal for secret service, and for transportation to the Territory,—all which requests, except the last, were denied. Towards the close of September, he arrived at Fort Leavenworth. Governor Walker had, by this time, released his hold on the dragoons, and, notwithstanding the advanced period of the season, they were preparing to march to Utah. The Governor and most of the other civil officers delayed until they started, and travelled in their company. The march was attended with the severest hardships. When they reached the Rocky Mountains, the snow lay from one to three feet deep on the loftier ridges which they were obliged to cross. The struggle with the elements, during the last two hundred miles before gaining Fort Bridger, was desperate. Nearly a third of the horses died from cold, hunger, and fatigue; everything that could be spared was thrown out to lighten the wagons, and the road was strewn with military accoutrements from the Rocky Ridge to Green River. On the 20th of November, Colonel Cooke reached the camp with a command entirely incapacitated for active service.

The place selected by Colonel Johnston for the winter-quarters of the army was on the bank of Black's Fork, about two miles above Fort Bridger, on a spot sheltered by high bluffs which rise abruptly from the bottom at a distance of five or six hundred yards from the channel of the stream. The banks of the

Fork were fringed with willow brush and cottonwood trees, blasted in some places where the Mormons had attempted to deprive the troops of fuel. The trees were fortunately too green to burn, and the fire swept through acres, doing no more damage than to consume the dry leaves and char the bark. The water of the Fork, clear and pure, rippled noisily over a stony bed between two unbroken walls of ice. The civil officers of the Territory fixed their quarters in a little nook in the wood above the military camp. The Colonel, anticipating a change of encampment, determined not to construct quarters of logs or sod for the army. A new species of tent, which had just been introduced, was served out for its winter dwellings. An iron tripod supported a pole from the top of which depended a slender but strong hoop. Attached to this, the canvas sloped to the ground, forming a tent in the shape of a regular cone. The opening at the top caused a draught, by means of which a fire could be kept up beneath the tripod without choking the inmates with smoke. An Indian lodge had evidently been the model of the inventor. Most of the civil officers, however, dug square holes in the ground, over which they built log huts, plastering the cracks with mud. Their little town they named Eckelsville, after the Chief Justice. A *dépôt* for all the military stores was established at Fort Bridger, where a strong detachment was encamped. At the time of its occupation, the Fort consisted merely of two stone walls, one twenty, the other about ten feet in height, inclosing quadrangles fifty paces long and forty broad. These walls were built of cobble-stones cemented with mortar. Half-a-dozen cannonballs would have knocked them to pieces, although they constituted a formidable defence against infantry. When the Mormons evacuated the post, they burned all the buildings inside these quadrangles. Colonel Johnston proceeded to set up additional defences for the *dépôt*, and within a month two lunettes were completed with ditches and *chevaux-de-frise*,

in each of which was mounted a piece of artillery.

The work of unloading the trains commenced, and after careful computation the Chief Commissary determined, that, by an abridgment of the ration, diminishing the daily issue of flour, and issuing bacon only once a week, his supplies would last until the first of June. All the beef cattle intended for the use of the army having been intercepted by the Cheyennes, it became necessary to kill those draught oxen for beef, which had survived the march. Shambles were erected, to which the poor half-starved animals were driven by hundreds to be butchered. The flesh was jerked and stored carefully in cabins built for the purpose.

The business of loading the trains had been carelessly performed at Fort Leavenworth. In this respect the quartermaster who superintended the work might have learned a lesson from the experience of the British in the Crimea. But, unwilling to take the trouble to assign to each train a proportionate quantity of all the articles to be transported, he had packed one after another with just such things as lay most conveniently at hand. The consequence was, that in the wagons which were burned were contained all the mechanics' implements, stationery, and horse-medicines, although the loss of the latter was not to be regretted. The rest of their contents was mostly flour and bacon. Had the Mormons burned the next three trains upon the road, they would have destroyed all the clothing intended for the expedition. As it was, upon searching those trains, only one hundred and fifty pairs of boots and shoes and six hundred pairs of stockings were found provided for an army of two thousand men, and some of the soldiers already had nothing but moccasins to cover their feet, with the thermometer at 16° below zero,—while there were found one thousand leather neck-stocks and three thousand bed-sacks, articles totally useless. "How not to do it" had evidently been the motto of the Quarter-

master's Department. The ample supplies of some articles were rendered unavailable by deficiencies in other articles equally necessary. In some of its arrangements it seemed to have proceeded on the presumption that there would be an armed collision, while in others the probability of such an event was entirely disregarded. One wagon was loaded wholly with boiling-kettles, but there was no brine to boil, and at the close of November not a pound of salt remained in the camp.

One of the first and most important of Colonel Johnston's duties was to provide for the keeping, during the winter, of the mules and horses which survived. On Black's Fork there was no grass for their support. It had either been burned by the Mormons or consumed by their cavalry. He decided to send them all to Henry's Fork, thirty-five miles south of Fort Bridger, where he had at one time designed to encamp with the whole army. The regiment of dragoons was detailed to guard them. A supply of fresh animals for transportation in the spring was his next care. The settlements in New Mexico are less than seven hundred miles distant from Fort Bridger, and to them he resolved to apply. Captain Marcy was the officer selected to lead in the arduous expedition. He had been previously distinguished in the service by a thorough exploration of the Red River of Louisiana. Accompanied by only thirty-five picked men, all volunteers, and by two guides, he started for Taos, November 27th,—an undertaking from which, at that season of the year, the most experienced mountaineers would have shrunk. A party was dispatched at the same time to the Flathead country, in Oregon and Washington Territories, to procure horses to remount the dragoons, and to induce the traders in that region to drive cattle down to Fort Bridger for sale.

On the day of Captain Marcy's departure, Governor Cumming issued a proclamation, declaring the Territory to be in a state of rebellion, and command-

ing the traitors to lay down their arms and return to their homes. It announced, also, that proceedings would be instituted against the offenders, in a court to be organized in the county by Judge Eckels, which would supersede the necessity of appointing a military commission for that purpose. This document was sent to Salt Lake City by a Mormon prisoner who was released for the purpose. The Governor sent also, by the same messenger, a letter to Brigham Young, in which there were expressions that indicated a disposition to temporize.

The whole camp, at this time, was a scene of confusion and bustle. Some of the stragglers around the tents were Indians belonging to a band of Pah-Utahs, among whom Dr. Hurt, already mentioned as the only Federal officer who did not abandon the Territory in the spring of 1857, had established a farm upon the banks of the Spanish Fork, which rises among the snows of Mount Nebo, and flows into Lake Utah from the East. Shortly after the issue of Brigham Young's proclamation of September 15th, the Mormons resolved to take the Doctor prisoner. No official was ever more obnoxious to the Church than he; for by his authority over the tribes he had been able to counteract in great measure the influences by which Young had endeavored to alienate both Snakes and Utahs from the control of the United States. On the 27th of September, two bands of mounted men moved towards the farm from the neighboring towns of Springville and Payson. Warned by the faithful Indians of his danger, the Doctor fled to the mountains, and twenty Pah-Utahs and Uinta-Utahs escorted him to the South Pass, where he joined Colonel Johnston on the 23d of October. It was an act of devotion which has rarely been excelled in Indian history. The sufferings of his naked escort on the journey were severe. They crossed the Green River Mountains, breaking the crust of the snow and leading their animals, being reduced at the time to tallow and roots for their own sustenance. On

the advance of the army towards Fort Bridger, they accompanied its march.

Another class of stragglers, and one most dangerous to the peace of the camp, was composed of the thousand teamsters who were discharged from employment on the supply-trains. Many of these men belonged to the scum of the great Western cities,—a class more dangerous, because more intelligent and reckless, than the same class of population in New York. Others had sought to reach California, not anticipating a state of hostilities which would bar their way. Now, thrown out of employment, with slender means, a great number became desperate. Hundreds attempted to return to the States on foot, some of whom died on the way,—and nine-tenths of them would have perished, had they encountered the storms of the preceding winter among the mountains. But the majority hung around the camp. To some of these the Quartermaster was able to furnish work, but he was obviously incapable of affording this assistance to all. Thefts and assaults became frequent, and promised to multiply as the season advanced. To remedy this trouble, Colonel Johnston assumed the responsibility of organizing a volunteer battalion. The term of service for which the men enlisted was nine months. For their pay they were to depend on the action of Congress. The four companies which the battalion comprised selected for their commander an officer from the regular army, Captain Bee, of the Tenth Infantry.

The organization of a District Court, by Judge Eckels, helped quite as essentially to enforce order. Its convicts were received by Colonel Johnston and committed to imprisonment in the guard-tents of the army. The grand jury, impanelled for the purposes of the court, were obliged to take cognizance of the rebellion, and, after thoroughly investigating the facts of the case, they returned bills of indictment against Brigham Young and sixty of his principal associates.

During "the campaign of Han's Fork," as Colonel Alexander's march up and

down that stream was facetiously called by the Mormons, he had been in constant receipt of communications from Young, of a character similar to the letter in which the army was commanded to surrender its arms at Fort Bridger. This correspondence was now abruptly terminated by Colonel Johnston. Two messengers came to the camp from Salt Lake City at the beginning of December, escorted by a party of Mormon militia, and bringing four pack-mules loaded with salt, which a letter from Young offered as a present, with assurances that it was not poisoned. This letter contained, besides, certain threats concerning the treatment of prisoners, and reminded Colonel Johnston that the Mormons also had prisoners in their power, on whom anything which might befall those in camp should be retaliated. The Colonel returned no other answer to this epistle than to dismiss its bearers with their salt, informing them that he could accept no favors from traitors and rebels, and that any communication which they might in future hold with the army must be under a flag of truce, although as to the manner in which they might communicate with the Governor it was not within his province to prescribe. A week or two later, a thousand pounds of salt were forced through to the camp from Fort Laramie, thirty out of the forty-six mules on which it was packed perishing on the way.

Thus the long and dreary winter commenced in the camp of the army of Utah. It mattered not that the rations were abridged, that communication with the States was interrupted, and that every species of duty at such a season, in such a region, was uncommonly severe. Confidence and even gayety were restored to the camp, by the consciousness that it was commanded by an officer whose intelligence was adequate to the difficulties of his position. Every additional hardship was cheerfully endured. As the animals failed, all the wood used in camp was obliged to be drawn a distance of from three to six miles by hand, but

there were few gayer spectacles than the long strings of soldiers hurrying the wagons over the crunching snow. They built great pavilions, decorated them with colors and stacks of arms, and danced as merrily on Christmas and New Year's Eves to the music of the regimental bands, as if they had been in cozy cantonments, instead of in a camp of fluttering canvas, more than seven thousand feet above the level of the sea. In the pavilion of the Fifth Infantry, there drooped over the company the flags which that regiment had carried, ten years before, up the sunny slopes of Chapultepec, and which were torn in a hundred places by the storm of bullets at Molinos del Rey.

Meanwhile, how hearts were beating in the States with anxious apprehension for the safety of kindred and friends, those who felt that anxiety, and not those who were the objects of it, best know.

Perhaps the disposition of the camp would have been more in harmony with the scenery and the season, if the army had dreamed that the administration, which had launched it so recklessly into circumstances of such privation and danger, was about to turn its labors and sufferings into a farce, and to claim the approval of the country for an act of mistaken clemency, which was, in reality, a grave political error.

[To be continued.]

THE MINISTER'S WOOING.

[Continued.]

CHAPTER VIII.

WHICH TREATS OF ROMANCE.

THERE is no word in the English language more unceremoniously and indefinitely kicked and cuffed about, by what are called sensible people, than the word *romance*. When Mr. Smith or Mr. Stubbs has brought every wheel of life into such range and order that it is one steady, daily grind,—when they themselves have come into the habits and attitudes of the patient donkey, who steps round and round the endlessly turning wheel of some machinery, then they fancy that they have gotten “the victory that overcometh the world.”

All but this dead grind, and the dollars that come through the mill, is by them thrown into one waste “catch-all” and labelled *romance*. Perhaps there was a time in Mr. Smith's youth,—he remembers it now,—when he read poetry, when

his cheek was wet with strange tears, when a little song, ground out by an organ-grinder in the street, had power to set his heart beating and bring a mist before his eyes. Ah, in those days he had a vision!—a pair of soft eyes stirred him strangely; a little weak hand was laid on his manhood, and it shook and trembled; and then came all the humility, the aspiration, the fear, the hope, the high desire, the troubling of the waters by the descending angel of love,—and a little more and Mr. Smith might have become a man, instead of a banker! He thinks of it now, sometimes, as he looks across the fireplace after dinner and sees Mrs. Smith asleep, innocently shaking the bouquet of pink bows and Brussels lace that waves ever her placid red countenance.

Mrs. Smith wasn't his first love, nor, indeed, any love at all; but they agree reasonably well. And as for poor Nellie,—well, she is dead and buried,—all that

was stuff and romance. Mrs. Smith's money set him up in business, and Mrs. Smith is a capital manager, and he thanks God that he isn't romantic, and tells Smith Junior not to read poetry or novels, and to stick to realities.

"This is the victory that overcometh the world,"—to learn to be fat and tranquil, to have warm fires and good dinners, to hang your hat on the same peg at the same hour every day, to sleep soundly all night, and never to trouble your head with a thought or imagining beyond.

But there are many people besides Mr. Smith who have gained this victory,—who have strangled their higher nature and buried it, and built over its grave the structure of their life, the better to keep it down.

The fascinating Mrs. T., whose life is a whirl between ball and opera, point-lace, diamonds, and schemings of admiration for herself, and of establishments for her daughters,—there was a time, if you will believe me, when that proud, worldly woman was so humbled, under the touch of some mighty power, that she actually thought herself capable of being a poor man's wife. She thought she could live in a little, mean house on no-matter-what-street, with one servant, and make her own bonnets and mend her own clothes, and sweep the house Mondays, while Betty washed,—all for what? All because she thought that there was a man so noble, so true, so good, so high-minded, that to live with him in poverty, to be guided by him in adversity, to lean on him in every rough place of life, was a something nobler, better, purer, more satisfying, than French laces, opera-boxes, and even Madame Roget's best gowns.

Unfortunately, this was all romance,—there was no such man. There was, indeed, a person of very common, self-interested aims and worldly nature, whom she had credited at sight with an unlimited draft on all her better nature; and when the hour of discovery came, she awoke from her dream with a start and

a laugh, and ever since has despised aspiration, and been busy with the *realities* of life, and feeds poor little Mary Jane, who sits by her in the opera-box there, with all the fruit which she has picked from the bitter tree of knowledge. There is no end of the epigrams and witticisms which she can throw out, this elegant Mrs. T., on people who marry for love, lead prosy, worky lives, and put on their best cap with pink ribbons for Sunday. "Mary Jane shall never make a fool of herself"; but, even as she speaks, poor Mary Jane's heart is dying within her at the vanishing of a pair of whiskers from an opposite box,—which whiskers the poor little fool has credited with a *résumé* drawn from her own imaginings of all that is grandest and most heroic, most worshipful in man. By-and-by, when Mrs. T. finds the glamour has fallen on her daughter, she wonders; she has "tried to keep novels out of the girl's way,—where did she get these notions?"

All prosaic, and all bitter, disenchanted people talk as if poets and novelists *made* romance. They do,—just as much as craters make volcanoes,—no more. What is romance? whence comes it? Plato spoke to the subject wisely, in his quaint way, some two thousand years ago, when he said, "Man's soul, in a former state, was winged and soared among the gods; and so it comes to pass, that, in this life, when the soul, by the power of music or poetry, or the sight of beauty, hath her remembrance quickened, forthwith there is a struggling and a pricking pain as of wings trying to come forth,—even as children in teething." And if an old heathen, two thousand years ago, discoursed thus gravely of the romantic part of our nature, whence comes it that in Christian lands we think in so pagan a way of it, and turn the whole care of it to ballad-makers, romancers, and opera-singers?

Let us look up in fear and reverence and say, "God is the great maker of romance. HE, from whose hand came man and woman,—HE, who strung the great harp of Existence with all its wild

and wonderful and manifold chords, and attuned them to one another,—HE is the great Poet of life." Every impulse of beauty, of heroism, and every craving for purer love, fairer perfection, nobler type and style of being than that which closes like a prison-house around us, in the dim, daily walk of life, is God's breath, God's impulse, God's reminder to the soul that there is something higher, sweeter, purer, yet to be attained.

Therefore, man or woman, when thy ideal is shattered,—as shattered a thousand times it must be,—when the vision fades, the rapture burns out, turn not away in skepticism and bitterness, saying, "There is nothing better for a man than that he should eat and drink," but rather cherish the revelations of those hours as prophecies and foreshadowings of something real and possible, yet to be attained in the manhood of immortality. The scoffing spirit that laughs at romance is an apple of the Devil's own handing from the bitter tree of knowledge;—it opens the eyes only to see eternal nakedness.

If ever you have had a romantic, uncalculating friendship,—a boundless worship and belief in some hero of your soul,—if ever you have so loved, that all cold prudence, all selfish worldly considerations have gone down like drift-wood before a river flooded with new rain from heaven, so that you even forgot yourself, and were ready to cast your whole being into the chasm of existence, as an offering before the feet of another, and all for nothing,—if you awoke bitterly betrayed and deceived, still give thanks to God that you have had one glimpse of heaven. The door now shut will open again. Rejoice that the noblest capability of your eternal inheritance has been made known to you; treasure it, as the highest honor of your being, that ever you could so feel,—that so divine a guest ever possessed your soul.

By such experiences are we taught the pathos, the sacredness of life; and if we use them wisely, our eyes will ever after be anointed to see what poems, what

romances, what sublime tragedies lie around us in the daily walk of life, "written not with ink, but in fleshly tables of the heart." The dullest street, of the most prosaic town has matter in it for more smiles, more tears, more intense excitement, than ever were written in story or sung in poem; the reality is there, of which the romancer is the second-hand recorder.

So much of a plea we put in boldly, because we foresee grave heads beginning to shake over our history, and doubts rising in reverend and discreet minds whether this history is going to prove anything but a love-story, after all.

We do assure you, right reverend Sir, and you, most discreet Madam, that it is not going to prove anything else; and you will find, if you will follow us, that there is as much romance burning under the snow-banks of cold Puritan preciseness as if Dr. H. had been brought up to attend operas instead of metaphysical preaching, and Mary had been nourished on Byron's poetry instead of "Edwards on the Affections."

The innocent credulities, the subtle deceptions, that were quietly at work under the grave, white curls of the Doctor's wig, were exactly of the kind which have beguiled man in all ages, when near the sovereign presence of her who is born for his destiny;—and as for Mary, what did it avail her that she could say the Assembly's Catechism from end to end without tripping, and that every habit of her life beat time to practical realities, steadily as the parlor clock? The wildest Italian singer or dancer, nursed on nothing but excitement from her cradle, never was more thoroughly possessed by the awful and solemn mystery of woman's life than this Puritan girl.

It is quite true, that, the next morning after James's departure, she rose as usual in the dim gray, and was to be seen opening the kitchen-door just at the moment when the birds were giving the first little drowsy stir and chirp,—and that she went on setting the breakfast-table for the two hired men, who were bound to

the fields with the oxen,—and that then she went on skimming cream for the butter, and getting ready to churn, and making up biseuit for the Doctor's breakfast, when he and they should sit down together at a somewhat later hour; and as she moved about, doing all these things, she sung various scraps of old psalm-tunes; and the good Doctor, who was then busy with his early exercises of devotion, listened, as he heard the voice, now here, now there, and thought about angels and the Millennium. Solemnly and tenderly there floated in at his open study-window, through the breezy lilacs, mixed with low of kine and bleat of sheep and hum of early wakening life, the little silvery ripples of that singing, somewhat mournful in its cadence, as if a gentle soul were striving to hush itself to rest. The words were those of the rough old version of the Psalms then in use:—

“Truly my waiting soul relies
In silence God upon;
Because from him there doth arise
All my salvation.”

And then came the busy patter of the little footsteps without, the moving of chairs, the clink of plates, as busy hands were arranging the table; and then again there was a pause, and he thought she seemed to come near to the open window of the adjoining room, for the voice floated in clearer and sadder:—

“O God, to me be merciful,
Be merciful to me!
Because my soul for shelter asks
Betakes itself to thee.

“Yea, in the shadow of thy wings
My refuge have I placed,
Until these sore calamities
Shall quite be overpast.”

The tone of life in New England, so habitually earnest and solemn, breathed itself in the grave and plaintive melodies of the tunes then sung in the churches; and so these words, though in the saddest minor key, did not suggest to the listening ear of the auditor anything more than that pensive religious calm in which he delighted to repose. A contrast indeed they were, in their melancholy earnest-

ness, to the exuberant carollings of a robin, who, apparently attracted by them, perched himself hard by in the lilacs, and struck up such a merry *roulade* as quite diverted the attention of the fair singer;—in fact, the intoxication breathed in the strain of this little messenger, whom God had feathered and winged and filled to the throat with ignorant joy, came in singular contrast with the sadder notes breathed by that creature of so much higher mould and fairer clay,—that creature born for an immortal life.

But the good Doctor was inly pleased when she sung,—and when she stopped, looked up from his Bible wistfully, as missing something, he knew not what; for he scarce thought how pleasant the little voice was, or knew he had been listening to it,—and yet he was in a manner enchanted by it, so thankful and happy that he exclaimed with fervor, “The lines are fallen unto me in pleasant places; yea, I have a goodly heritage.”

So went the world with him, full of joy and praise, because the voice and the presence wherein lay his unsuspected life were securely near, so certainly and constantly a part of his daily walk that he had not even the trouble to wish for them. But in that other heart how was it?—how with the sweet saint that was talking to herself in psalms and hymns and spiritual songs?

The good child had remembered her mother's parting words the night before,—“Put your mind upon your duties,”—and had begun her first conscious exercise of thought with a prayer that grace might be given her to do it. But even as she spoke, mingling and interweaving with that golden thread of prayer was another consciousness, a life in another soul, as she prayed that the grace of God might overshadow him, shield him from temptation, and lead him up to heaven; and this prayer so got the start of the other, that, ere she was aware, she had quite forgotten self, and was feeling, living, thinking in that other life.

The first discovery she made, when she looked out into the fragrant orchard,

whose perfumes steamed in at her window, and listened to the first chirping of birds among the old apple-trees, was one that has astonished many a person before her; it was this: she found that all that had made life interesting to her was suddenly gone. She herself had not known, that, for the month past, since James came from sea, she had been living in an enchanted land,—that Newport harbor, and every rock and stone, and every mat of yellow seaweed on the shore, that the two-mile road between the cottage and the white house of Zebedee Marvyn, every mullein-stalk, every juniper-tree, had all had a light and a charm which were suddenly gone. There had not been an hour in the day for the last four weeks that had not had its unsuspected interest,—because he was at the white house, because, possibly, he might be going by, or coming in; nay, even in church, when she stood up to sing, and thought she was thinking only of God, had she not been conscious of that tenor voice that poured itself out by her side? and though afraid to turn her head that way, had she not felt that he was there every moment,—heard every word of the sermon and prayer for him? The very vigilant care which her mother had taken to prevent private interviews had only served to increase the interest by throwing over it the veil of constraint and mystery. Silent looks, involuntary starts, things indicated, not expressed, these are the most dangerous, the most seductive aliment of thought to a delicate and sensitive nature. If things were said out, they might not be said wisely,—they might repel by their freedom, or disturb by their unfitness; but what is only looked is sent into the soul through the imagination, which makes of it all that the ideal faculties desire.

In a refined and exalted nature, it is very seldom that the feeling of love, when once thoroughly aroused, bears any sort of relation to the reality of the object. It is commonly an enkindling of the whole power of the soul's love for whatever she considers highest and fair-

est; it is, in fact, the love of something divine and unearthly, which, by a sort of illusion, connects itself with a personality. Properly speaking, there is but One true, eternal Object of all that the mind conceives, in this trance of its exaltation. Disenchantment must come, of course; and in a love which terminates in happy marriage, there is a tender and gracious process, by which, without shock or violence, the ideal is gradually sunk in the real, which, though found faulty and earthly, is still ever tenderly remembered as it seemed under the morning light of that enchantment.

What Mary loved so passionately, that which came between her and God in every prayer, was not the gay, young, dashing sailor,—sudden in anger, imprudent of speech, and, though generous in heart, yet worldly in plans and schemings,—but her own ideal of a grand and noble man,—such a man as she thought he might become. He stood glorified before her, an image of the strength that overcomes things physical, of the power of command which controls men and circumstances, of the courage which disdains fear, of the honor which cannot lie, of constancy which knows no shadow of turning, of tenderness which protects the weak, and, lastly, of religious loyalty which should lay the golden crown of its perfected manhood at the feet of a Sovereign Lord and Redeemer. This was the man she loved, and with this regal mantle of glories she invested the person called James Marvyn; and all that she saw and felt to be wanting she prayed for with the faith of a believing woman.

Nor was she wrong;—for, as to every leaf and every flower there is an ideal to which the growth of the plant is constantly urging, so is there an ideal to every human being,—a perfect form in which it might appear, were every defect removed and every characteristic excellence stimulated to the highest point. Once in an age, God sends to some of us a friend who loves in us, *not* a false imagining, an unreal character, but, looking through all the rubbish of our imper-

fections, loves in us the divine ideal of our nature,—loves, not the man that we are, but the angel that we may be. Such friends seem inspired by a divine gift of prophecy,—like the mother of St. Augustine, who, in the midst of the wayward, reckless youth of her son, beheld him in a vision, standing, clothed in white, a ministering priest at the right hand of God,—as he has stood for long ages since. Could a mysterious foresight unveil to us this resurrection form of the friends with whom we daily walk, compassed about with mortal infirmity, we should follow them with faith and reverence through all the disguises of human faults and weaknesses, “waiting for the manifestation of the sons of God.”

But these wonderful soul-friends, to whom God grants such perception, are the exceptions in life; yet sometimes are we blessed with one who sees through us, as Michel Angelo saw through a block of marble, when he attacked it in a divine fervor, declaring that an angel was imprisoned within it;—and it is often the resolute and delicate hand of such a friend that sets the angel free.

There be soul-artists, who go through this world, looking among their fellows with reverence, as one looks amid the dust and rubbish of old shops for hidden works of Titian and Leonardo, and, finding them, however cracked or torn or painted over with tawdry daubs of pretenders, immediately recognize the divine original, and set themselves to cleanse and restore. Such be God's real priests, whose ordination and anointing are from the Holy Spirit; and he who hath not this enthusiasm is not ordained of God, though whole synods of bishops laid hands on him.

Many such priests there be among women;—for to this silent ministry their nature calls them, endowed, as it is, with fineness of fibre, and a subtle keenness of perception outrunning slow-footed reason;—and she of whom we write was one of these.

At this very moment, while the crimson wings of morning were casting delicate

reflections on tree, and bush, and rock, they were also reddening innumerable waves round a ship that sailed alone, with a wide horizon stretching like an eternity around it; and in the advancing morning stood a young man thoughtfully looking off into the ocean, with a book in his hand,—James Marvyn,—as truly and heartily a creature of this material world as Mary was of the invisible and heavenly.

There are some who seem made to *live*;—life is such a joy to them, their senses are so fully *en rapport* with all outward things, the world is so keenly appreciable, so much a part of themselves, they are so conscious of power and victory in the government and control of material things, that the moral and invisible life often seems to hang tremulous and unreal in their minds, like the pale, faded moon in the light of a gorgeous sunrise. When brought face to face with the great truths of the invisible world, they stand related to the higher wisdom much like the gorgeous, gay Alcibiades to the divine Socrates, or like the young man in Holy Writ to Him for whose appearing Socrates longed;—they gaze, imperfectly comprehending, and at the call of ambition or riches turn away sorrowing.

So it was with James;—in full tide of worldly energy and ambition, there had been forming over his mind that hard crust, that skepticism of the spiritual and exalted, which men of the world delight to call practical sense; he had been suddenly arrested and humbled by the revelation of a nature so much nobler than his own that he seemed worthless in his own eyes. He had asked for love; but when *such* love unveiled itself, he felt like the disciple of old in the view of a diviner tenderness,—“Depart from me, for I am a sinful man.”

But it is not often that all the current of a life is reversed in one hour; and now, as James stood on the ship's deck, with life passing around him, and everything drawing upon the strings of old habits, Mary and her religion recurred to his mind

as some fair, sweet, inexplicable vision. Where she stood he saw; but how *he* was ever to get there seemed as incomprehensible as how a mortal man should pillow his form on sunset clouds.

He held the little Bible in his hand as if it were some amulet charmed by the touch of a superior being; but when he strove to read it, his thoughts wandered, and he shut it, troubled and unsatisfied. Yet there were within him yearnings and cravings, wants never felt before, the beginning of that trouble which must ever precede the soul's rise to a higher plane of being.

There we leave him. We have shown you now our three different characters, each one in its separate sphere, feeling the force of that strongest and holiest power with which it has pleased our great Author to glorify this mortal life.

CHAPTER IX.

WHICH TREATS OF THINGS SEEN.

As, for example, the breakfast. It is six o'clock,—the hired men and oxen are gone,—the breakfast-table stands before the open kitchen-door, snowy with its fresh cloth, the old silver coffee-pot steaming up a refreshing perfume,—and the Doctor sits on one side, sipping his coffee and looking across the table at Mary, who is innocently pleased at the kindly beaming in his placid blue eyes,—and Aunt Katy Scudder discourses of housekeeping, and fancies something must have disturbed the rising of the cream, as it is not so thick and yellow as wont.

Now the Doctor, it is to be confessed, was apt to fall into a way of looking at people such as pertains to philosophers and scholars generally, that is, as if he were looking through them into the infinite,—in which case, his gaze became so earnest and intent that it would quite embarrass an uninitiated person; but Mary, being used to this style of contemplation, was only quietly amused, and waited till some great thought should loom up before his mental vision,—in which case, she hoped to hear from him.

The good man swallowed his first cup of coffee and spoke:—

"In the Millennium, I suppose, there will be such a fulness and plenty of all the necessities and conveniences of life, that it will not be necessary for men and women to spend the greater part of their lives in labor in order to procure a living. It will not be necessary for each one to labor more than two or three hours a day,—not more than will conduce to health of body and vigor of mind; and the rest of their time they will spend in reading and conversation, and such exercises as are necessary and proper to improve their minds and make progress in knowledge."

New England presents probably the only example of a successful commonwealth founded on a theory, as a distinct experiment in the problem of society. It was for this reason that the minds of its great thinkers dwelt so much on the final solution of that problem in this world. The fact of a future Millennium was a favorite doctrine of the great leading theologians of New England, and Dr. H. dwelt upon it with a peculiar partiality. Indeed, it was the solace and refuge of his soul, when oppressed with the discouragements which always attend things actual, to dwell upon and draw out in detail the splendors of this perfect future which was destined to glorify the world.

Nobody, therefore, at the cottage was in the least surprised when there dropped into the flow of their daily life these sparkling bits of ore, which their friend had dug in his explorations of a future Canaan,—in fact, they served to raise the hackneyed present out of the level of mere commonplace.

"But how will it be possible," inquired Mrs. Scudder, "that so much less work will suffice in those days to do all that is to be done?"

"Because of the great advance of arts and sciences which will take place before those days," said the Doctor, "whereby everything shall be performed with so much greater ease,—also the great increase of disinterested love, whereby

the skill and talents of those who have much shall make up for the weakness of those who have less.

"Yes,"—he continued, after a pause,—
"all the careful Marthas in those days will have no excuse for not sitting at the feet of Jesus; there will be no cumbering with much serving; the Church will have only Maries in those days."

This remark, made without the slightest personal intention, called a curious smile into Mrs. Scudder's face, which was reflected in a slight blush from Mary's, when the crack of a whip and the rattling of wagon-wheels disturbed the conversation and drew all eyes to the door.

There appeared the vision of Mr. Zebedee Marvyn's farm-wagon, stored with barrels, boxes, and baskets, over which Candace sat throned triumphant, her black face and yellow-striped turban glowing in the fresh morning with a hearty, joyous light, as she pulled up the reins, and shouted to the horse to stop with a voice that might have done credit to any man living.

"Dear me, if there isn't Candace!" said Mary.

"Queen of Ethiopia," said the Doctor, who sometimes adventured a very placid joke.

The Doctor was universally known in all the neighborhood as a sort of friend and patron-saint of the negro race; he had devoted himself to their interests with a zeal unusual in those days. His church numbered more of them than any in Newport; and his hours of leisure from study were often spent in lowliest visitations among them, hearing their stories, consoling their sorrows, advising and directing their plans, teaching them reading and writing, and he often drew hard on his slender salary to assist them in their emergencies and distresses.

This unusual condescension on his part was repaid on theirs with all the warmth of their race; and Candace, in particular, devoted herself to the Doctor with all the force of her being.

There was a legend current in the neighborhood, that the first efforts to cat-

echize Candace were not eminently successful, her modes of contemplating theological tenets being so peculiarly from her own individual point of view that it was hard to get her subscription to a received opinion. On the venerable clause in the Catechism, in particular, which declares that all men sinned in Adam and fell with him, Candace made a dead halt:—

"I didn't do dat ar', for one, I knows. I's got good mem'ry,—allers knows what I does,—nebber did eat dat ar' apple,—nebber eat a bit ob him. Don't tell me!"

It was of no use, of course, to tell Candace of all the explanations of this redoubtable passage,—of potential presence, and representative presence, and representative identity, and federal headship. She met all with the dogged,—

"Nebber did it, I knows; should 'ave 'membered, if I had. Don't tell me!"

And even in the catechizing class of the Doctor himself, if this answer came to her, she sat black and frowning in stony silence even in his reverend presence.

Candace was often reminded that the Doctor believed the Catechism, and that she was differing from a great and good man; but the argument made no manner of impression on her, till, one day, a far-off cousin of hers, whose condition under a hard master had often moved her compassion, came in overjoyed to recount to her how, owing to Dr. H.'s exertions, he had gained his freedom. The Doctor himself had in person gone from house to house, raising the sum for his redemption; and when more yet was wanting, supplied it by paying half his last quarter's limited salary.

"He do dat ar'?" said Candace, dropping the fork wherewith she was spearing doughnuts. "Den I'm gwine to b'liebe every word *he* does!"

And accordingly, at the next catechizing, the Doctor's astonishment was great when Candace pressed up to him, exclaiming,—

"De Lord bress you, Doctor, for openin' de prison for dem dat is bound! I

b'liebes in you now, Doctor. I's gwine to b'liebe ebery word you say. I'll say de Catechize now,—fix it any way you like. I *did* eat dat ar' apple,—I eat de whole tree, an' swallowed ebery bit ob it, if you say so."

And this very thorough profession of faith was followed, on the part of Candace, by years of the most strenuous orthodoxy. Her general mode of expressing her mind on the subject was short and definitive.

"Law me! what's de use? I's set out to b'liebe de Catechize, an' I'm gwine to b'liebe it,—so!"

While we have been telling you all this about her, she has fastened her horse, and is swinging leisurely up to the house with a basket on either arm.

"Good morning, Candace," said Mrs. Scudder. "What brings you so early?"

"Come down 'fore light to sell my chickens an' eggs,—got a lot o' money for 'em, too. Missy Marvyn she sent Miss Scudder some turkey-eggs, an' I brought down some o' my doughnuts for de Doctor. Good folks must lib, you know, as well as wicked ones,"—and Candace gave a hearty, unctuous laugh. "No reason why Doctors shouldn't hab good tings as well as sinners, is dere?"—and she shook in great billows, and showed her white teeth in the *abandon* of her laugh. "Lor' bress ye, honey, chile!" she said, turning to Mary, "why, ye looks like a new rose, ebery bit! Don't wonder *somebody* was allers pryin' an' spyin' about here!"

"How is your Mistress, Candace?" said Mrs. Scudder, by way of changing the subject.

"Well, porly,—rader porly. When Massa Jim goes, 'pears like takin' de light right out her eyes. Dat ar' boy trains roun' arter his mudder like a cosset, he does. Lor', de house seems so still widout him!—can't a fly scratch his ear but it starts a body. Missy Marvyn she sent down, an' says, would you an' de Doctor an' Miss Mary please come to tea dis arternoon."

"Thank your mistress, Candace," said

Mrs. Scudder; "Mary and I will come,—and the Doctor, perhaps," looking at the good man, who had relapsed into meditation, and was eating his breakfast without taking note of anything going on. "It will be time enough to tell him of it," she said to Mary, "when we have to wake him up to dress; so we won't disturb him now."

To Mary the prospect of the visit was a pleasant one, for reasons which she scarce gave a definite form to. Of course, like a good girl, she had come to a fixed and settled resolution to think of James as little as possible; but when the path of duty lay directly along scenes and among people fitted to recall him, it was more agreeable than if it had lain in another direction. Added to this, a very tender and silent friendship subsisted between Mrs. Marvyn and Mary; in which, besides similarity of mind and intellectual pursuits, there was a deep, unspoken element of sympathy.

Candace watched the light in Mary's eyes with the instinctive shrewdness by which her race seem to divine the thoughts and feelings of their superiors, and chuckled to herself internally. Without ever having been made a *confidante* by any party, or having a word said to or before her, still the whole position of affairs was as clear to her as if she had seen it on a map. She had appreciated at once Mrs. Scudder's coolness, James's devotion, and Mary's perplexity,—and inly resolved, that, if the little maiden did not think of James in his absence, it should not be her fault.

"Laws, Miss Scudder," she said, "I's right glad you's comin'; 'cause you hasn't seen how we's kind o' splendified since Massa Jim come home. You wouldn't know it. Why, he's got mats from Mogadore on all de entries, and a great big 'un on de parlor; and ye ought to see de shawl he brought Missus, an' all de cur'us kind o' tings to de Squire. Tell ye, dat ar' boy honors his fader and mudder, ef he don't do nuffin else,—an' dat's de fus' commandment wid promise, Ma'am; an' to see him a-settin' up ebery day in

prayer-time, so handsome, holdin' Missus's han', an' lookin' right into her eyes all de time! Why, dat ar' boy is one o' de 'lect,—it's jest as clare to me; and de 'lect has got to come in,—dat's what I say. My faith's strong,—real clare, 'tell ye," she added, with the triumphant laugh which usually chorused her conversation, and turning to the Doctor, who, aroused by her loud and vigorous strain, was attending with interest to her.

"Well, Candace," he said, "we all hope you are right."

"*Hope*, Doctor!—I don't hope,—I *knows*. 'Tell ye, when I pray for him, don't I feel enlarged? 'Tell ye, it goes wid a rush. I can feel it gwine up like a rushin', mighty wind. I feels strong, I do."

"That's right, Candace," said the Doctor, "keep on; your prayers stand as much chance with God as if you were a crowned queen. The Lord is no respecter of persons."

"Dat's what he a'n't, Doctor,—an' dere's where I 'gree wid him," said Candace, as she gathered her baskets vigorously together, and, after a sweeping curtsy, went sailing down to her wagon, full laden with content, shouting a hearty "Good mornin', Missus," with the full power of her cheerful lungs, as she rode off.

As the Doctor looked after her, the simple, pleased expression with which he had watched her gradually faded, and there passed over his broad, good face a shadow, as of a cloud on a mountain-side.

"What a shame it is," he said, "what a scandal and disgrace to the Protestant religion, that Christians of America should openly practise and countenance this enslaving of the Africans! I have for a long time holden my peace,—may the Lord forgive me!—but I believe the time is coming when I must utter my voice. I cannot go down to the wharves or among the shipping, without these poor dumb creatures look at me so that I am ashamed,—as if they asked me what I, a Christian minister, was doing, that I did not come to their help. I must testify."

Mrs. Scudder looked grave at this earnest announcement; she had heard many like it before, and they always filled her with alarm, because—Shall we tell you why?

Well, then, it was not because she was not a thoroughly indoctrinated anti-slavery woman. Her husband, who did all her thinking for her, had been a man of ideas beyond his day, and never for a moment countenanced the right of slavery so far as to buy or own a servant or attendant of any kind; and Mrs. Scudder had always followed decidedly along the path of his opinions and practice, and never hesitated to declare the reasons for the faith that was in her. But if any of us could imagine an angel dropped down out of heaven, with wings, ideas, notions, manners, and customs all fresh from that very different country, we might easily suppose that the most pious and orthodox family might find the task of presenting him in general society and piloting him along the courses of this world a very delicate and embarrassing one. However much they might reverence him on their own private account, their hearts would probably sink within them at the idea of allowing him to expand himself according to his previous nature and habits in the great world without. In like manner, men of high, unworldly natures are often revered by those who are somewhat puzzled what to do with them practically.

Mrs. Scudder considered the Doctor as a superior being, possessed by a holy helplessness in all things material and temporal, which imposed on her the necessity of thinking and caring for him, and providing the earthly and material aspects of his affairs.

There was not in Newport a more thriving and reputable business at that time than the slave-trade. Large fortunes were constantly being turned out in it, and what better Providential witness of its justice could most people require?

Beside this, in their own little church, she reflected with alarm, that Simcon

Brown, the richest and most liberal supporter of the society, had been, and was then, drawing all his wealth from this source; and rapidly there flashed before her mind a picture of one and another, influential persons, who were holders of slaves. Therefore, when the Doctor announced, "I must testify," she rattled her tea-spoon uneasily, and answered,—

"In what way, Doctor, do you think of bearing testimony? The subject, I think, is a very difficult one."

"Difficult? I think no subject can be clearer. If we were right in our war for liberty, we are wrong in making slaves or keeping them."

"Oh, I did not mean," said Mrs. Scudder, "that it was difficult to understand the subject; the *right* of the matter is clear, but what to *do* is the thing."

"I shall preach about it," said the Doctor; "my mind has run upon it some time. I shall show to the house of Judah their sin in this matter."

"I fear there will be great offence given," said Mrs. Scudder. "There's Simeon Brown, one of our largest supporters,—he is in the trade."

"Ah, yes,—but he will come out of it,—of course he will,—he is all right, all clear. I was delighted with the clearness of his views the other night, and thought then of bringing them to bear on this point,—only, as others were present, I deferred it. But I can show him that it follows logically from his principles; I am confident of that."

"I think you'll be disappointed in him, Doctor;—I think he'll be angry, and get up a commotion, and leave the church."

"Madam," said the Doctor, "do you suppose that a man who would be willing even to give up his eternal salvation for the greatest good of the universe could hesitate about a few paltry thousands that perish in the using?"

"He may feel willing to give up his soul," said Mrs. Scudder, naively, "but I don't think he'll give up his ships,—that's quite another matter,—he won't see it to be his duty."

"Then, Ma'am, he'll be a hypocrite, a

gross hypocrite, if he won't," said the Doctor. "It is not Christian charity to think it of him. I shall call upon him this morning and tell him my intentions."

"But, Doctor," exclaimed Mrs. Scudder, with a start, "pray, think a little more of it. You know a great many things depend on him. Why! he has subscribed for twenty copies of your 'System of Theology.' I hope you'll remember that."

"And why should I remember that?" said the Doctor,—hastily turning round, suddenly enkindled, his blue eyes flashing out of their usual misty calm,—“what has my 'System of Theology' to do with the matter?"

"Why," said Mrs. Scudder, "it's of more importance to get right views of the gospel before the world than anything else, is it not?—and if, by any imprudence in treating influential people, this should be prevented, more harm than good would be done."

"Madam," said the Doctor, "I'd sooner my system should be sunk in the sea than it should be a millstone round my neck to keep me from my duty. Let God take care of my theology; I must do my duty."

And as the Doctor spoke, he straightened himself to the full dignity of his height, his face kindling with an unconscious majesty, and, as he turned, his eye fell on Mary, who was standing with her slender figure dilated, her large blue eye wide and bright, in a sort of trance of solemn feeling, half smiles, half tears,—and the strong, heroic man started, to see this answer to his higher soul in the sweet, tremulous mirror of womanhood. One of those lightning glances passed between his eyes and hers which are the freemasonry of noble spirits,—and, by a sudden impulse, they approached each other. He took both her outstretched hands, looked down into her face with a look full of admiration, and a sort of naïve wonder,—then, as if her inspired silence had been a voice to him, he laid his hand on her head, and said,—

"God bless you, child! 'Out of the mouth of babes and sucklings hast thou ordained strength because of thine enemies, that thou mightest still the enemy and the avenger!'"

In a moment he was gone.

"Mary," said Mrs. Scudder, laying her hand on her daughter's arm, "the Doctor loves you!"

"I know he does, mother," said Mary, innocently; "and I love him,—dearly!—he is a noble, grand man!"

Mrs. Scudder looked keenly at her daughter. Mary's eye was as calm as a June sky, and she began, composedly, gathering up the teacups.

"She did not understand me," thought the mother.

[To be continued.]

REVIEW.

The New Testament. Translated from the Original Greek, etc. By LEICESTER AMBROSE SAWYER. Boston: John P. Jewett & Co. 1858.

Few books merit the criticism which they receive; fewer receive all they merit. Here is a work, a translation, which is more likely than most to get its deserts, because its circle of critics will be unusually large. It purports to be a new and improved version of "the Book of Books," and puts forth claims which will be conceded only after it shall have sustained the most extensive, minute, and even prejudiced scrutiny. The Bible has more readers than any other book; and that which claims to be an improved Bible must, if it secure anything like a general attention, meet with criticisms from all quarters. Mr. Sawyer is fortunate in one respect: his work will be examined and judged by multitudes who never undertook to criticize any other book; he will have, therefore, ultimately, a popular judgment of his task and its performance. But he is unfortunate in another point: for he must meet that popular sentiment which at the outset looks with disfavor upon anything that has even the appearance of meddling with the commonly received and almost universally approved version of the Holy Scriptures. Let us, in a brief space and with as little of formal and scholastic criticism as possible, examine Mr. Sawyer's translation.

A work of such a character as this should be judged not more by its absolute or intrinsic merits than by a com-

parison of them with the design avowed and the claims advanced by the author. In a task of such magnitude we ought not to expect to find everything perfect. If the completed structure have a symmetry of proportions and excellence of finish approaching reasonably near to the plan proposed, we should not too severely censure minor defects. Critics rarely accord all that authors claim; the former measure the actual achievement,—the latter look to the ideal conception; if the one be in a reasonable degree commensurate with the other, we should be lenient toward the faults of the performance.

With this charitable substratum for our critical structure, let us test Mr. Sawyer's new version by contrasting it, with his own avowed design and the claims with which he introduces his completed task. In the Preface he says,—

"This is not a work of compromises, or of conjectural interpretations of the Sacred Scriptures, neither is it a paraphrase, but a strict [strictly] literal rendering. It neither adds nor takes away; but aims to express the original with the utmost clearness and force, and with the utmost precision."

This is a somewhat pretentious claim. A strictly literal rendering of any language into another is by no means always an easy task; and it is especially difficult to couple, as the translator in this case asserts he has done, the utmost clearness, force, and precision in the expression of the thought, with minute exactness of version. We are surprised that Mr. Sawyer should have rested his claim for the excel-

lence and superiority of his translation mainly upon this quality of literalism, for it is often the case that the closest literalist is the worst translator. It is often impossible to render the thoughts expressed in the peculiar idioms of one tongue into exactly corresponding idioms of another. There are idiomatic forms, especially in the Greek, which have no precisely correspondent forms in the English, and yet these are not unfrequently the most forcible expressions of any to be found in the original; any attempt to render these literally must be abortive; and a literal rendering, or as nearly literal as possible, is the worst translation, because it sacrifices the clearness, force, and precision, to say nothing of the grace and delicacy, of the original. The French language abounds in words and phrases the literal translation of which into English perverts the meaning and destroys the force of the original. Still more is a strictly literal rendering incompatible with the preservation and transference of the beauties of style and the strength of diction. The widest range of the thought, its more delicate shades and subtler connections, often depend in great part upon the peculiar forms of the language in which they are first clothed; and by a strictly literal translation the scope of the thought is narrowed, its finer lines obscured, and that which is of more importance than all else, the fitness of the expression, is altogether lost. The utmost strictness of literal translation is a poor compensation for the re-

sultant poverty of language and dilution of thought; and by as much as the original is more impressive in its rich and fitting garb, by so much the more is it made to appear mean and unlike itself when forced to clothe itself in scanty second-hand habiliments.

We have said thus much on this point for two reasons: first, because it is on this chiefly that Mr. Sawyer appeals to the public for a verdict in favor of his translation; and secondly, because it is a common and popular notion, that, the more literal a translation can be made, especially in the case of the Bible, the better and more trustworthy it will be. And we are willing to admit, that, in translating the Holy Scriptures, the greatest degree of strictness in literal rendering, compatible with the full and correct expression of the thought, is and should be a first consideration; the translator should take no liberties with the text, by way either of omission, alteration, or compromise; he must in no way vitiate the thought; and if he keep within this rule, he will have escaped just criticism, and may claim the merit of faithfulness to his task. Has Mr. Sawyer, then, in his New Testament, given a strictly literal rendering? and is it an improvement on the common version? We have space for only a few specimens of his translation, and we have taken some of the first that attracted our notice; it will be observed that they are none of them abstruse or disputed passages.

COMMON VERSION.

Matt. ii. 16.

"Then Herod, when he saw that he was *mocked* of the *wise men*, was exceeding wroth, and sent forth and *slew* all the children that were in Bethlehem and in all the coasts thereof, from two years old and under, according to the time which he *had diligently inquired* of the *wise men*."

Here is a comparison of the two translations of a simple narrative text taken at random. The essential changes (improvements?) made by Mr. Sawyer are in the words which we have italicized. Two of these changes, the substitution of "Magi" for "wise men," and of "destroyed" for "slew," we shall pass with the single observation, that the rendering of the common

SAWYER'S VERSION.

Chap. ii. verse 4.

"Then Herod seeing that he was *despised* by the *Magi*, was exceedingly angry, and sent and *destroyed* all the children in Bethlehem, and in all its borders, from two years old and under, according to the precise time which he *had learned* of the *Magi*."

version is in both instances the more accurate and better expressed. Mr. Sawyer substitutes "despised" for "mocked," as the translation of *ἐνπαίχθη*. Is this literal? or is it an improvement? The Greek verb *ἐνπαίω* has the signification primarily to *deride*, to *mock*, to *scoff* at, and secondarily to *delude*, to *deceive*, to *disappoint*, but it has not the meaning to *despise*. The word

mock is used in our language in both these significations,—in the secondary sense when it refers to men's hopes or expectations,—as, *to mock one's hopes*, that is, to delude or disappoint one's expectations. In this sense, and in this alone, it is obviously used in this passage. The wise men did not scoff at King Herod, but they did delude him; they mocked his expectation of their return, and went back to their own country without returning to report to him, because they had been "warned of God in a dream," not because they despised the king. To say, as Mr. Sawyer does, that they "despised" him, is neither warranted by the meaning of *ἐνεπαίχθη*, nor is such a rendering accordant with the facts of the story or the connections of the thought. It is a forced and far-fetched translation, and a change from the common version much for the worse. The same word is of frequent occurrence in the Scriptures. In the Septuagint, Jer. x. 14, it is used in the same sense as in Matt. ii. 16. It is worthy of note that in no other instance does Mr. Sawyer render it by "despised." In Luke xviii. 32 and xxii. 63, and Matt. xx. 19, he translates it "mocked," like the common version. Mr. Sawyer should be more consistent, if he would have us put faith in his scholarly pretensions and literal accuracy. The passage in which he indulges in this variation from his own rule is the one of all the list where such a translation is particularly fitting, and where neither force, clearness, nor precision is gained by the substitution.

Mr. Sawyer renders *κατὰ τὸν χρόνον ὃν ἠκρίβωσε* thus: "according to the precise time which he had learned."—Is this literal or correct? *Ἀκρίβω* signifies to *inquire diligently, assiduously, or accurately*, and has no such signification primarily as *to learn*. If the reader will now turn to Mr. Sawyer's translation of the 7th verse of the same chapter of Matthew, he will there find that he translates *ἠκρίβωσε* "asked"! And yet it stands in that passage in precisely the same connection of thought as in the 16th verse; so that we have our translator, who gives us only strictly literal renderings, translating the same word, occurring in the same relative connection, in the one instance by "asked," and in the other by "had learned,"—neither of them legitimate translations, and neither

precisely expressing the thought. The rendering "asked" falls as far short of the full and forcible meaning of *ἠκρίβωσε*, in the one case, as "had learned" varies from its strictly literal signification in the other.

We will now examine another passage illustrating Mr. Sawyer's consistent fidelity to literal renderings. He translates the word *ψυχὴ*, Luke xii. 19, 20, and 23, "soul"; thus, "I will say to my soul," and "Is not the soul more than the food?"—agreeing with the common version in the first instance, and differing from it in the second. But he renders *ψυχὴ* in Mark viii. 36, 37, Luke xvii. 33, and Matt. xvi. 26, "life"; thus, "For what is a man profited, if he shall gain the whole world and lose his life?" "For whoever wishes to save his life shall lose it." In these cases he seems to have made his choice between the renderings "soul" and "life" according to no rule of translation or of criticism in philology, but as his fancy dictated. How shall we explain these inconsistencies, and, at the same time, grant Mr. Sawyer his claim to literalness of rendering?

Luke ix. 24, 25, Mr. Sawyer translates *ψυχὴ* "life," and then renders *ἐαυτὸν δὲ ἀπολέσας ἢ ζημιωθείς* "and destroys himself or loses his life." The common version is "and lose himself or be cast away," which is not only more strictly literal, but far more forcible. *Ἀπόλλυμι* conveys the strongest idea of *total, irremediable ruin*; and *ζημιόω*, when used, as in this passage, in the aorist tense, has the signification of *bringing loss or ruin upon one's self*. Both these thoughts are lost in Mr. Sawyer's translation; and a more tame, insufficient, and tautological rendering than his could scarcely be imagined.

Another instance of Mr. Sawyer's singular choice of renderings, in his zeal for improvement, is found in Luke viii. 46, which he translates, "Some one touched me; for I perceived a power going from me." The common version, "Somebody touched me; for I perceive that *virtue* is gone out of me," is clear and precise; Mr. Sawyer's version, "a power," is more indefinite and less forcible. Any intelligent reader will at once perceive that the common version is the better, and that Mr. Sawyer's improved rendering is almost meaningless.

One more example of these strictly lit-

eral renderings must suffice. John iii. 4, common version,—“Nicodemus saith unto him, ‘How can a man be born when he is old? can he enter the second time into his mother’s womb and be born?’” Sawyer’s version,—“Nicodemus said to him, ‘How can a man be born when he is old? can he become an unborn infant of his mother a second time, and be born?’” The absurdity of the form of language put into the mouth of Nicodemus by Mr. Sawyer is obvious at a glance; no such thought was ever so expressed by any speaker in any language; it is wholly forced and unnatural; and upon comparing Mr. Sawyer’s translation with the original, we find that he has paraphrased the passage with a vengeance, altogether omitting to translate the clause *εἰς τὴν κοιλίαν... εἰσελθεῖν καὶ γεννηθῆναι*, and interpolating an expression, instead, which is neither in the original text nor in the thought. Probably Mr. Sawyer’s motive for taking this extraordinary liberty was a false delicacy, amounting to prudery; but it ill assorts with his assertion, that his work is not a paraphrase, nor one of compromises, or of conjectural interpretations.

We might proceed with numerous illustrations, exhibiting the weakness of Mr. Sawyer’s claim of an improved and strictly literal rendering, but these are enough. Before he claims much on the score of scholarly accuracy or critical rendering, he must explain these inconsistencies and remove these blemishes. But if such faults are patent in the simplest narrative passages, what confidence can we place in Mr. Sawyer as a translator of difficult; abstruse, doctrinal, and disputed texts? In every instance in which we have tested his translation of the original, the changes which he has made from the common version not only, in our judgment, are no improvements, but positively render the expression less clear, less forcible, and less precise; of course, as the language is made worse, the thought is, in the same proportion, obscured.

Another peculiarity of Mr. Sawyer’s translation, which we suppose he claims as an improvement, does not meet our approval. In all cases where there is no word in our language which expresses the signification of the Greek, as in the names of weights and measures, Mr. Sawyer substitutes for the language of the common

version the foreign word of the original,—sometimes merely giving the orthography of the Greek in English letters, sometimes affixing a termination,—and frequently he adds, in brackets, an explanation of his rendering. As examples of this, we quote the following:—

“Neither do men light a candle, and put it under a *modius* [1.916 gallon measure].”

“I tell you that you shall not go out thence till you have paid even the last *lepton* [2 mills].”

“It is like leaven which a woman took and hid in three *sata* [33 quarts] of flour.”

“And there were six stone water-jars there, placed for the purification of the Jews, containing two or three *metretes* [16.75 or 25.125 gallons] each.”

“And he desired to fill his stomach with the *carob pods* which the swine eat.”

“And one poor widow came and cast in two *lepta*, which is a *quadrans* [4 mills].”

It requires no knowledge of the original to pass judgment on such changes as are here made from the common version. The practice which Mr. Sawyer here introduces and sanctions is a vicious one in any translation, and is especially so in the case of the Holy Scriptures, which are to be read by the unlearned and ignorant as well as by the scholar and the critic. Mr. Sawyer’s translation of such words as we have noted above conveys no idea to the mind of the common reader, and requires a glossary to make it intelligible. There is in his choice of words a pedantry and affectation of learning that are in bad taste. But in this, as in his other strictly literal renderings, he is inconsistent, and does not adhere to his own rule. He translates Matt. vi. 30,—“And if God so clothes the grass of the field, which to-day is, and to-morrow is cast into the *oven*,” etc. If he were consistent in his practice, he would have rendered the word “oven” *klibanon*, and then, in parenthesis, explained that it signifies “a large round pot, of earthen or other material, two or three feet high, narrowing towards the top, on the sides of which the dough was spread to be baked in thin cakes.” Probably Mr. Sawyer was deterred from following his rule in this case by the formidableness of the necessary parenthesis; but there is as much reason why he should have written *klibanon* instead of “oven,” as there is for substituting *lepton* for “farthing,” or *modius*

for "bushel," or *carob pods* for "husks,"—and in fact more reason, because the word "oven," which he indorses and uses, conveys a far more imperfect idea of the original, *κλίβανον*, than those words of the common version which he has rejected do of their originals. All such changes as those instanced above, in our judgment, mar the simplicity and obscure the meaning of the passages where they occur.

But we will now notice what appears to us a more serious defect than any of those already mentioned. Mr. Sawyer throughout his translation substitutes vulgar Latinisms and circumlocutions for the vigorous phrases of the received version. Sometimes this is done at the expense of homely Saxon words which are the

very sinews of our language; and wherever such words are sacrificed for Latinisms, the beauty and force of the whole are impaired or destroyed. Again, the translator seems to have a peculiar antipathy to everything like poetical expressions or the euphonious arrangement of sentences. He has evidently fallen into the error of supposing that the most prosaic rendering is necessarily the most exact; whereas the fact is, that the most poetical form of expression of which a passage is susceptible is often the most clear, forcible, and precise. The best method of giving the reader an idea of the justice of this portion of our criticism of Mr. Sawyer's version is to quote some passages in contrast with the common version.

COMMON VERSION.

"If thou wilt, let us make here three tabernacles."

"So when they had dined, Jesus saith to Simon Peter, Simon, son of Jonas, lovest thou me more than these? He saith unto him, Yea, Lord: thou knowest that *I love thee*."

"God be merciful to me a sinner."

"Give us this day our *daily* bread."

"And therefore I cannot come."

"And to whom men have committed much, of him they will ask the more."

"I give tithes of all that I possess."

"For which of you intending to build a tower sitteth not down first and *counteth the cost*?"

"And upon this rock I will build my church."

"If thy brother trespass against thee, rebuke him; and if he *repent*, forgive him."

"And when he cometh home, he calleth together his friends and neighbors, saying unto them, *Rejoice with me*, for I have found my sheep which was lost."

"And he arose, and rebuked the wind, and said unto the sea, *Peace*, be still."

"As we were driven up and down in Adria, about midnight the shipmen *deemed that they drew near to some country*."

"Enter ye in at the strait gate; for wide is the gate and *broad* is the way that leadeth to destruction, and many there be which go in thereat; because strait is the gate and *narrow* is the way which leadeth unto life, and few there be that find it."

"Consider the lilies of the field, how they grow; they *will not*, neither do they spin."

SAWYER'S VERSION.

"If you please, we will make here three tabernacles."

"When therefore they had breakfasted, Jesus said to Simon Peter, Simon, son of John, do you love me more than these? He said to him, Yes, Lord, you know that *I am a friend to you*."

"God, be propitious to me a sinner."

"Give us to-day our *essential* bread."

"On this account I cannot come."

"And of him with whom men have deposited much, they will ask more."

"I tithe all I acquire."

"For what man of you wishing to build a tower, does not first sit down and *estimate the expense*?"

"And upon this rock will I build my assembly."

"If your brother sins, reprove him; and if he *changes his mind*, forgive him."

"And coming to the house, he calls together his friends and neighbors, saying, *Congratulate me*; for I have found my sheep that was lost."

"And he arose, and rebuked the wind, and said to the lake, *Hush!* Be still!"

"When we were borne along in the Adriatic, at about midnight the sailors *suspected that some land was approaching them*."

"Enter in through the narrow gate, for wide is the gate, and *spacious* the way which leads to destruction, and many are they that enter in by it; for narrow is the gate, and *compressed* the way which leads to life, and few are those who find it."

"Consider the lilies of the field, how they grow; they *perform no hard labor*, neither do they spin."

These must suffice. We cannot extend our quotations, nor is there occasion to do so. We think we have seen enough of Mr. Sawyer's use of words and phrases, enough of his improvements on the common version of the Bible, to convince any candid mind that his is neither a literal nor a correct translation; that so far from having improved the version, by adding clearness, force, or precision, he has injured it in each of these respects; and that the world would be immensely the loser by accepting him as a substitute for the forty-seven translators who composed the famous Council of King James in 1611. We are informed that Mr. Sawyer has completed his improved ver-

sion of the Old Testament, and will soon publish it. We almost shudder in anticipation of the sounds which he has probably evoked from the harp of Judah's minstrel king, of the colors which he has put on the canvas where are painted the glowing visions of Isaiah, and of the rude matter-of-fact method in which he has doubtless used the modern telescope to penetrate and scatter the glorious and solemn mysteries of the cloud-land of prophecy out of which spake the God of Daniel. But we forbear, and must wait till we have the remainder of this *magnum opus* before we venture to hazard an opinion of its merits.

VOL. III.—APRIL, 1859.—NO. XVIII.

AGRARIANISM.

IF we can believe an eminent authority, in which we are disposed to place great trust, the oldest contest that has divided society is that which has so long been waged between the House of HAVE and the House of WANT. It began before the bramble was chosen king of the trees, and it has outlasted the cedars of Lebanon. We find it going on when Herodotus wrote his History, and the historians of the nineteenth century will have to continue writing of the actions of the parties to it. There seems never to have been a time when it was not old, or a race that was not engaged in it, from the Tartars, who cook their meat by making saddle-cloths of it, to the Sybarites, impatient of crumpled rose-leaves. Spartan oligarchs and Athenian democrats, Roman patricians and Roman plebeians, Venetian senators and Florentine *ciompi*, Norman nobles and Saxon serfs, Russian boyars and Turkish spahis, Spanish hidalgos and Aztec soldiers, Carolina slaveholders and New England farmers,—these and a hundred other races or orders have all been parties to the great, the universal struggle which has for its object the acquisition of property, the providing of a shield against the ever-threatening fiend which we call

WANT. Property once obtained, the possessor's next aim is to keep it. The very fact, that the mode of acquisition may have been wrong, and subversive of property-rights, if suffered to be imitated, naturally makes its possessor suspicious and cruel. He fears that the measure he has meted to others may be meted to him again. Hence severe laws, the monopoly of political power and of political offices by property-holders, the domination of conquering races, and the practice of attributing to all reformers designs against property and its owners, though the changes they recommend may really be of a nature calculated to make the tenure of property more secure than ever. Even the charge of irreligion has not been found more effective against the advocates of improvement or change than that of Agrarianism,—by which is meant hostility to existing property-institutions, and a determination, if possible, to subvert them. Of the two, the charge of Agrarianism is the more serious, as it implies the other. A man may be irreligious, and yet a great stickler for property, because a great owner of it,—or because he is by nature stanchly conservative, and his infidelity merely a matter of logic. But if there be any reason for

charging a man with Agrarianism, though it be never so unreasonable a reason, his infidelity is taken for granted, and it would be labor lost to attempt to show the contrary. Nor is this conclusion so altogether irrational as it appears at the first sight. Religion is an ordinance of God, and so is property; and if a man be suspected of hostility to the latter, why should he not be held positively guilty towards the former? Every man is religious, though but few men govern their lives according to religious precepts; but every man not only loves property and desires to possess it, but allows considerations growing out of its rights to have a weight on his mind far more grave, far more productive of positive results, than religion has on the common person. If there be such a thing as an Agrarian on earth, he would fight bravely for his land, though it should be of no greater extent than would suffice him for a grave, according to the strictest measurement of the potter's field. Would every honest believer do as much for his religion?

But what is Agrarianism, and who are Agrarians? Though the words are used as glibly as the luring party-terms of the passing year, it is no very easy matter to define them. Indeed, it is by no means an easy thing to affix a precise and definite meaning to any political terms, living or dead. Let the reader endeavor to give a clear and intelligible definition of Whig and Tory, Democrat and Republican, Guelph and Ghibelline, Cordelier and Jacobin, and he will soon find that he has a task before him calculated to test his powers very severely. How much more difficult, then, must it be to give the meaning of words that are never used save in a reproachful sense, and which originated in political battles that were fought nearly two thousand years ago, and in a state of society having small resemblance to anything that has ever been known to Christendom! With some few exceptions, party-names continue to have their champions long after the parties they belonged to are as dead

as the Jacobites. Many Americans would not hesitate to defend the Federalists, or to eulogize the Federal party, though Federalism long ago ceased even to cast a shadow. The prostitution of the Democratic name has lessened in but a slight degree the charm that has attached to it ever since Jefferson's sweeping reflection had the effect of coupling with it the charming idea of success. But who can be expected to say a word for Agrarian? One might as well look to find a sane man ready to do battle for the Jacobin, which is all but a convertible term for Agrarian, though in its proper sense the latter word is of exactly the opposite meaning to the former. Under the term Agrarians is included, in common usage, all that class of men who exhibit a desire to remove social ills by a resort to means which are considered irregular and dangerous by the great majority of mankind. Of late years we have heard much of Socialists, Communists, Fourierites, and so forth; but the word Agrarians comprehends all these, and is often made to include men who have no more idea of engaging in social reforms than they have of pilgrimizing to the Fountains of the Nile. It is a not uncommon thing for our political parties to charge one another with Agrarianism; and if they used the term in its proper sense, it would be found that they had both been occasionally right, for Agrarian laws have been supported by all American parties, and will continue to be so supported, we presume, so long as we shall have a public domain; but in its reproachful sense Agrarianism can never be charged against any one of the party organizations which have been known in the United States. A quarter of a century ago, one of the cleverest of those English tourists who then used to contrive to go through—or, rather, over—the Republic, seeing but little, and not understanding that little, proclaimed to his countrymen, who had not then recovered from the agitation consequent on the Reform contest, that there existed here a regular Agrarian party, forming

"the *extrême gauche* of the Worky Parliament," and which "boldly advocated the introduction of an AGRARIAN LAW, and a periodical division of property." He represented these men as only following out the principles of their less violent neighbors, and as eloquently dilating "on the justice and propriety of every individual being equally supplied with food and clothing,—on the monstrous iniquity of one man riding in his carriage while another walks on foot, [there would have been more reason in the complaint, had the gigless individual objected to walking on his head,] and after his drive discussing a bottle of Champagne, while many of his neighbors are shamefully compelled to be content with the pure element. Only equalize property, they say, and neither would drink Champagne or water, but both would have brandy, a consummation worthy of centuries of struggle to attain." He had the sense to declare that all this was nonsense, but added, that the Agrarians, though not so numerous or so widely diffused as to create immediate alarm, were numerous in New York, where their influence was strongly felt in the civic elections. Elsewhere he predicted the coming of a "panic" time, when workmen would be thrown out of employment, while possessed of the whole political power of the state, with no military force to maintain civil order and protect property; "and to what quarter," he mournfully asked, "I shall be glad to know, is the rich man to look for security, either of person or fortune?"

Twenty-five years have elapsed since Mr. Hamilton put forth this alarming question, and some recent events have brought it to men's minds, who had laughed at it in the year of grace 1833. We have seen Agrarian movements in New York, demonstrations of "Workies," but nothing was said by those engaged in them of that great leveller, brandy, though its properties are probably better known to them than those of water. They have been dignified with the name of "bread riots," and the great English

journal that exercises a sort of censorship over governments and nations has gravely complimented us on the national progress we have made, as evidenced in the existence here of a starving population! One hardly knows whether to fret or to smile over so provoking a specimen of congratulation. Certainly, if a nation cannot grow old without bringing the producing classes to beggary, the best thing that could happen to it would be to die young, like men loved of the gods, according to the ancient idea. Whether such is the inevitable course of national life or not, we are confident that what took place a few months ago in New York had nothing to do with Agrarianism in reality,—using the word after the manner of the alarmists. It belonged to the ordinary bald humbug of American politics. It so happened that one of those "crises" which come to pass occasionally in all business communities occurred at precisely the time when a desperate political adventurer was making desperate efforts to save himself from that destruction to which he had been doomed by all good men in the city that he had misgoverned. What more natural than that he should seek to avail himself of the distress of the people? The trick is an old one,—as old as political contention itself. Was it not Napoleon who attributed revolutions to the belly?—and he knew something of the matter. The "bread riots" were neither more nor less than "political demonstrations," got up for the purpose of aiding Mr. Wood, and did not originate in any hostility to property on the part of the people. It is not improbable that some of those who were engaged in them were really anxious to obtain work,—were moved by fear of starvation; but such was not the case with the leaders, who were "well-dressed, gentlemanly men," according to an eye-witness, with excellent cigars in their mouths to create a thirst that Champagne alone could cure. The *juste milieu* of brandy, so favored in 1832, if we can believe Mr. Hamilton, was not thought of in 1857. A

quarter of a century had made a change in the popular taste. Perhaps the temperance reformation had had something to do with it. The whole thing was as complete a farce as ever was seen at an American or an English election, and those who were engaged in it are now sincerely ashamed—of their failure. If foreigners will have it that it was an outbreak of Agrarianism, the first in a series of outrages against property, so be it. Let them live in the enjoyment of the delusion. Nations, like individuals, seem to find pleasure in the belief that others are as miserable as themselves.

Of that feeling which is known as Agrarianism we believe there is far less in the United States now than there was at the time when Mr. Hamilton was here, and for a few years after that time. From about the year 1829 to 1841, there was in our politics a large infusion of Socialism. We then had parties, or factions, based on the distinctions that exist in the social state, and those organizations had considerable influence in our elections. The Workingmen's party was a powerful body in several Northern States, and, to an observer who was not familiar with our condition, it well might wear the appearance of an Agrarian body. No intelligent American, however, fell into such an error. It was evident to the native observer, that the Workingmen's party, while aiming at certain reforms which it deemed necessary for the welfare of the laboring classes, had no felonious purposes in view to the prejudice of property,—and this for the plain reason, that most workingmen were property-owners themselves. Few of them had much, but still fewer had nothing, and the aggregate of their possessions was immense. They would have been the greatest losers, had there been a social convulsion, for they would have lost everything. Then they were intelligent men in the ordinary affairs of life, and knew that the occurrence of any such convulsion would, first of all, cut off, not only their means of acquisition, but the very sources of their livelihood. Indus-

try wilts under revolutionary movements, as vegetation under the sirocco, and they bring to the multitude anything but a realization of Utopian dreams. In the long run, there has rarely been a revolution which has not worked beneficially for the mass of mankind; but the earliest effects of every revolution are to them bad, and eminently so. It is to this fact that we must look for an explanation of the slowness with which the masses move against any existing order of things, even when they are well aware that it treats them with singular injustice. For nothing can be better established than that no revolution was ever the work of the body of the people,—of the majority. Revolutions are made by minorities, by orders, by classes, by individuals, but never by the people. The people may be dragged into them, but they never take the initiative even in those movements which are called popular, and which are supposed to have only popular ends in view. That very portion of mankind who are most feared by timid men of property are those who are the last to act in any of the great games which mark the onward course of the world. Complain they do, and often bitterly, of the inequalities of society, but action is not their strong point.

The American observer of 1829-41 would have seen, too, in the Workingmen's party, and in other similar organizations, only sections of the Democratic party. They were the light troops of the grand army of Democracy, the *velites* who skirmished in front of the legions. They never controlled the Democratic party; but it is undeniable that they did color its policy, and give a certain tone to its sentiment, at a very important period of American history. The success of President Jackson, in that political contest which is known as "the Bank War," was entirely owing to the support which he received from the workingmen of some two or three States; and it is quite probable that the shrewd men who then managed the Democratic party were induced to enter upon that war by their

knowledge of the exalted condition of political opinion in those States. For their own purposes, they turned to account sentiments that might have worked dangerously, if they had not been directed against the Bank. One effect of this was, that the Democratic party was compelled to make use of more popular language, which caused it to lose some of its influential members, who were easily alarmed by words, though they had borne philosophically with violent things. For five years after the veto of the Bank Bill, in 1832, the Democratic party was essentially radical in its tone, without doing much of a radical character. In 1837, the monetary troubles came to a head, and then it was seen how little reliance could be placed on men who were supposed to be attached to extreme popular opinions. It was in the very States which were thought to abound with radicals that the Democracy lost ground, and the way was prepared for their entire overthrow in the memorable year 1840. That year saw American politics debauched, and from that time we find no radical element in any of our parties. The contest was so intense, that the two parties swallowed and digested all lesser factions. Since then, a variety of causes have combined to prevent the development of what is termed Agrarianism. The struggle of the Democracy to regain power; the Mexican war, and the extension of our dominion, consequent on that war, bringing up again, in full force, the slavery question; and the discovery of gold in California, which led myriads of energetic men to a remote quarter of the nation;—these are the principal causes of the freedom of our later party-struggles from radical theories. From radical practices we have always been free, and it is improbable that our country will know them for generations.

The origin of the word Agrarianism, as an obnoxious political term, is somewhat curious. It is one of the items of our inheritance from the Romans, to whom we owe so much, both of good and evil, in politics and in law.

The Agrarian contests of that people were among the most interesting incidents in their wonderful career, and are full of instruction, though, until recently, their true character was not understood; and their explanation affords a capital warning against the effects of partisan literature. The common belief was,—perhaps we should say is,—that the supporters of the Agrarian laws were, to use a modern term, *destructives*; that they aimed at formal divisions of all landed property, if not of all property, among the whole body of the Roman people. Nothing can be more unfounded than this view of the subject, which is precisely the reverse of the truth. No Roman, whose name is associated with Agrarian laws, ever thought of touching private property, or of meddling with it, illegally, in any way. Neither Spurius Cassius, nor Licinius Stolo, nor the Gracchi, nor any other Roman whose name is identified with the Agrarian legislation of his country, was a destructive, or leveller. Quite the contrary; they were all conservatives,—using that word in its best sense,—and the friends of property. The lands to which their laws applied, or were intended to apply, were public lands, answering, in some sense, to those which are owned by the United States. When Spurius Cassius, a quarter of a century after that revolution which is known as the expulsion of the Tarquins, proposed a division of a portion of the public land among the poor commons, he did no more than had often been done by the Roman kings, with good effect, and with strict legality. Much of the public land was *occupied* by wealthy men, as tenants of the state; and some of these his law would have ousted from profitable spots, while the rest were to be forced to pay their rents, which they had done very irregularly or not at all. The operation of all Agrarian laws like that of Cassius was, undoubtedly, a matter well to be considered; for, after a man has long occupied a piece of land, he regards it as an act of injustice to be peremptorily re-

moved therefrom, and he ought to have, at least, the privilege of buying it, if its possession be necessary to his support. This feeling must have been the stronger in the bosom of the Roman occupant in proportion to his poverty, but to legal possession he could make no claim. The position he held was that of tenant at will to the state, and he could be legally ejected at any moment. But it was not from poor occupants of the public domain, whose number was necessarily small, that opposition was experienced. It came from the rich, who had all but monopolized the use of that domain; and, in the time of Spurius Cassius, it was complicated with that quarrel of *caste* which we denominate the contest between the Patricians and the Plebeians. Property and political power were both involved in the dispute. The Patricians knew that the success of Cassius would make against them in two ways:—it would strengthen the Plebeians, by lifting them out of the degradation consequent on poverty, and so render them more dangerous antagonists in political warfare; and it would render the Patricians less able to contend with aspiring foes, by taking from them one of the sources of their wealth. Cassius failed, and was executed, having been tried and condemned by the Patricians, who then alone constituted the Roman people.

More than a century after the failure of Cassius, the Agrarian question was again brought before the Roman nation, on a large scale. This was the time when the famous Licinian rogations, by the adoption of which a civil revolution was effected in Rome, were brought forward. They provided for the passage of an Agrarian law, for an equitable settlement of debts, and that thereafter one of the two Consuls should always be a Plebeian. It is something to be especially noted, that C. Licinius Stolo, the man from whom these laws take their name, was not a needy political adventurer, but a very wealthy man, his possessions being mainly in land; and that he belonged to a *gens* (the Licinii) who

were noted in after days for their immense wealth, among them being that Crassus whose avarice became proverbial, and whose surname was *Dives*, or *the Rich*. The Licinian Agrarian law provided, that no one should *possess* more than five hundred jugers of the public land, (*ager publicus*,) that the state should resume lands that had been illegally seized by individuals, that a rent should be paid by the occupants of the public domain, that only freemen should be employed on that domain, and that every Plebeian should receive seven jugers of the public land in absolute property, to be taken from those lands which the state was to resume from Patricians who *possessed* (that is to say, who occupied) more than five hundred jugers. Such were the main provisions of the law, which did not touch private property of any kind. The state was merely to assert its undisputed legal right over the public domain, and the Plebeians became landholders, which was the best thing that could happen to the republic, and which was what was aimed at in every community of antiquity. Even the partial observance of this law was the cause of the supremacy of Rome being established over the finest portions of the ancient world. Had Licinius failed, Rome would have gone down in her contest with the Samnites, and the latter people would have become masters of Italy. As it was, his success created the Roman people; and from the time of that success must be dated the formation of the Roman constitution as it was recognized and acted on during the best period of the Republic. True, the Agrarian law was but one of three measures which he carried through in the face of all the opposition the Patricians could make; but the other laws were of a kindred character, and they all worked together for good. It was the triumph of the Plebeians for the benefit of all. The revolution then effected was strictly conservative in its nature, and whatever of internal evil Rome afterwards experienced was owing, not to the adoption of the Li-

cinian law, but to the departure by the state from the practice under it which it was intended permanently to establish.

The last great Agrarian contest which the Romans had was that which takes its name from the Gracchi, and which began at the commencement of the fourth generation before the birth of Christ. On the part of the reformers, it was as strictly legal a movement as ever was known. Not a single acre of private land was threatened by them; and whoever pays attention to the details of their measures cannot fail to be struck with the great concessions they were ready to make to their opponents,—the men who had literally stolen the public property, and who pretended to hold it as of right. Perhaps it was too late for any such reform as that contemplated by the Gracchi to succeed, the condition of Rome then being in no important respect like what it had been in the time of Licinius Stolo; but one of the most interesting chapters in the history of things which might have been is that which relates to the possible effect of the Sempronian legislation. Had that legislation been fairly tried, Roman history, and therefore human history, must have taken an entirely different course, with an effect on the fortunes of every man born since that time. Whether that effect would have been good or bad, who shall say? But one thing is certain, and that is, that the Gracchi and their supporters were not the enemies of property, and that their measures were not intended to interfere with the private estate of any citizen of the Roman Republic.

Such was the Agrarianism, and such were the Agrarian laws and the Agrarian contests of Rome, which were so long misunderstood; and through that misunderstanding has the word Agrarian, so proper in itself, been made to furnish one of the most reproachful terms that violent politicians have ever used when seeking to bespatter their foes. It will be seen that the word has been applied in "the clean contrary way" to that in which it should have been applied, and

that, strictly speaking, an Agrarian is a conservative, a man who asks for justice,—not a destructive, who, in his desire to advance his own selfish ends or those of his class, would trample on law and order alike. It is only within the last seventy years that the world has been made to comprehend that it had for fifty generations been guilty of gross injustice to some of the purest men of antiquity; and it is not more than thirty years since the labors of Niebuhr made the truth generally known,—if it can, indeed, be said to be so known even now. The Gracchi long passed for a couple of demagogues, who were engaged in seditious practices, and who were so very anxious to propitiate "the forum populace" that they were employed in perfecting plans for the division of all landed property amongst its members, when they were cut off by a display of vigor on the part of the government. "The Sedition of the Gracchi" was for ages one of the common titles for a chapter in the history of Republican Rome; yet it did not escape the observation of one writer of no great learning, who published before Heyne's attention was drawn to the subject, that, if there were sedition in the affair, it was quite as much the sedition of the Senate against the Gracchi as it was the sedition of the Gracchi against the Senate.*

* We have taken for granted the soundness of the views of Niebuhr on the Roman Agrarian contests and laws, that eminent scholar having followed in the track of Heyne with distinguished success; but it must be allowed that in some respects his positions have been not unsuccessfully assailed. Those who would follow up the subject are recommended to study Ihne's *Researches into the History of the Roman Constitution*, in which some of Niebuhr's views are energetically combated. The main points, however, that the Agrarian laws were not directed against private property, or aimed at placing all men on a social equality, may be considered as established. Yet it must in candor be admitted that the general subject is still involved in doubts, the German commentators having thrown as much fog about some portions of the Roman Constitution as they have thrown light upon other portions of it.

The feeling that was allowed to have such sway in Rome, and the triumph of which was followed with such important consequences, has often manifested itself in modern times, in the course of great political struggles, and has proved a powerful disturbing cause on several occasions. One of these occasions has fallen under the observation of the existing generation, and some remarks on it may not be out of place.

The French Revolution of 1848 was followed by an alarm on the part of men of property, or of those whose profits depended on the integrity of property being respected, which produced grave effects, the end whereof is not yet. That revolution was the consequence of a movement as purely political as the world ever saw. There was discontent with the government of M. Guizot, which extended to the royal family, and in which the *bourgeoisie* largely shared, the very class upon the support of which the House of Orléans was accustomed to rely. Had the government yielded a little on some political points, and made some changes in the administration, Louis Philippe might have been living at the Tuileries at this very moment, or sleeping at St. Denis. But, insanely obstinate, under dominion of the venerable delusion that obstinacy is firmness, the King fell, and with him fell, not merely his own dynasty, but the whole system of government which France had known for a generation, and under which she was, painfully and slowly, yet with apparent sureness, becoming a constitutional state. A warm political contest was converted into a revolution scarcely less complete than that of 1789, and far more sweeping than that of 1830. Perhaps there would have been little to regret in this, had it not been, that, instead of devoting their talents to the establishing of a stable republican government, several distinguished Frenchmen, whom we never can think capable of believing the nonsense they uttered, began to labor to bring about a sort of social Arcadia, in which all men were to be made happy, and which

was to be based on contempt for political economy and defiance of common sense. Property, with its usual sensitiveness, took the alarm, and the Parisians soon had one another by the throat. How well founded was this alarm, it would be difficult to say. Most likely it was grossly exaggerated, and had no facts of importance to go upon. That among the disciples of M. Louis Blanc there were gentlemen who had no respect for other men's property, because they had no property of their own, it is quite safe to believe; but that they had any fixed ideas about seizing property, or of providing labor at high wages for workmen, it would be impossible to believe, even if Albert, *ouvrier*, that most mythical of revolutionists, were to make solemn affidavit of it on the works of Aurora Dudevant. Some vague ideas about relieving the wants of the poor, Louis Blanc and his associates had,—just as all men have them who have heads to see and hearts to feel the existence of social evils. Had they obtained possession of the French government, immediately after Louis Philippe, to use his own words, had played the part of Charles X., they would have failed utterly, as Lamartine and his friends failed, and much sooner too. Lamartine failed as a statesman,—he lacked that power to govern which far less able men than he have exhibited under circumstances even more trying than those into which he so unguardedly plunged,—and Louis Blanc would have been no more successful than the poet. The failure of the "Reds" would have been the more complete, if they had had an opportunity to attempt the realization of the Socialistic theories attributed to them, but which few of their number could ever have entertained. They sought political power for the usual purposes; but as they stood in the way of several other parties, those parties united to crush them, which was done in "the Days of June." It is easy to give a fallen enemy a bad name, and the conquered party on that occasion were stigmatized as the enemies of everything that men hold dear, particular emphasis

being laid on their enmity to property, which men hold dearer than all other things combined. The belief seems to have been all but universal throughout Europe, and to have been shared by many Americans, that the party which was conquered in the streets of Paris by Cavaignac was really an organization against property, which it meant to steal, and so afford a lively illustration of the doctrine attributed to it, that property is theft. To this belief, absurd as it was, must we look for the whole course of European history during the last ten years. The restoration of the Napoleonic dynasty in France, the restoration of the Papacy by French soldiers, the reestablishment of Austrian ascendancy over Italy, and the invasion of Hungary by the Russians,—these and other important events that have happened under our eyes, and which have enabled us to see history in the making on a large scale, all are directly traceable to the alarm which property experienced immediately after the class of property-holders had allowed the Revolution of February to take place, and to sweep away that dynasty in which their principles stood incarnate. The French imperial throne is in an especial manner the result of that alarm. When General Cavaignac had succeeded in conquering the “Reds,” a military dictatorship followed his victory as a matter of course, and it remained with him to settle the future of France. The principles of his family led him to sympathize with the “oppressed nationalities” which were then struggling in so many places for freedom; and had he interfered decidedly in behalf of the Italians and Hungarians, he would have changed the fate of Europe. He would have become the hero of the great political movement which his country had inaugurated, and his sword would have outweighed the batons of Radetzky and Paskevitch. Both principle and selfishness pointed to such intervention, and there can be no doubt that the Republican Dictator seriously thought of it. But the peculiarities of his position forbade his following the path that was pointed

out to him. As the champion of property, as the chief of the coalesced parties which had triumphed over “the enemies of property” in the streets and lanes of “the capital of civilization,” he was required to concentrate his energies on domestic matters. Yet further: all men in other countries who were contending with governments were looked upon by the property party in France as the enemies of order, as Agrarians, who were seeking the destruction of society, and therefore were not worthy of either the assistance or the sympathy of France; so that the son of the old Conventionist of ’93 was forced, by the views of the men of whom he so strangely found himself the chief, to become in effect the ally of the Austrian Kaiser and the Russian Czar. The Italians, who were seeking only to get rid of “barbarian” rule, and the Hungarians, who were contending for the preservation of a polity as old as the English Constitution against the destructive of the imperial court, were held up to the world as men desirous in their zeal for revolution to overturn all existing institutions! Aristocrats with pedigrees that shamed those of the Bourbon and the Romanoff were spoken of in language that might possibly have been applicable to the lazzaroni of Naples, that lazzaroni being on the side of the “law and order” classes. As General Cavaignac did nothing to win the affections of the French people, as he was the mere agent of men rendered fierce by fear, it cannot be regarded as strange, that, when the Presidential election took place, he found himself nowhere in the race with Louis Napoleon. He was deserted even by a large portion of the men whose work he had done so well, but who saw in the new candidate for their favor one who could become a more powerful protector of property than the African general,—one who had a name of weight, not merely with the army, but with that multitudinous peasant class from which the French army is mainly conscribed, and which, containing numerous small property-holders, is fanatically

attached to the name of Napoleon. Thus the cry of "Property in danger" ended, in 1851, in the restoration of open despotism, which every sensible observer of French affairs expected after Louis Napoleon was made President, his Presidency being looked upon only as a pinchbeck imitation of the Consulate of 1799-1804. This is the ordinary course of events in old countries: revolution, fears of Agrarianism, and the rushing into the jaws of the lion in order to be saved from the devouring designs of a ghost.

Those who recollect the political literature of the years that passed between the Revolution of February and the commencement of those disputes which eventuated in the Russian War must blush for humanity. Writers of every class set themselves about the work of exterminating Agrarianism in France. Grave arguments, pathetic appeals, and lively ridicule were all made use of to drive off enemies of whose coming upon Europe there was no more danger than of a return of the Teutones and the Cimbri. Had the arguments and adjurations of the clever men who waged war on the Agrarians been addressed to the dust of the Teutones whom Marius exterminated in Provence, they could not have been more completely thrown away than they were. Some of these men, however, were less distinguished for cleverness than for malignity, and shrieked for blood and the display of brute force in terms that would have done dishonor even to a St. Bartholomew assassin or anti-Albigensian crusader. Monsieur Romieu held up *Le Spectre Rouge* to the eyes of a generation incapable, from fright, of distinguishing between a scarecrow and the Apollo. The Red Spectre haunted him, and the people for whom he wrote, as relentlessly as the Gray Spectre came upon the chiefs of Ivor. He saw in the working classes—those men who asked then, as in modern times they have only asked, "leave to toil"—millions of creatures "regimented by hatred," and ready to throw themselves upon society. In the past he saw nothing so much to be admired as the

Feudal System, it was so very summary and trenchant in its modes of dealing with masses of men so unreasonable as to grumble when they were starving. In the present, all that he could reverence was the cannonarchy of Russia, which he invoked to restore to France that golden age in which Crécy and Poitiers were fought, and when the Jacquerie illustrated the attachment of the serf to the seigneur. How this invoker of Cossacks and cannon from the Don and the Neva "to regulate the questions of our age" on the Seine and the Marne would have stared, could the curtain that hides the future have been drawn for a moment, to allow him to see a quarter of a million of French, English, and Italian soldiers on the shores of the Euxine, and eight hundred Western cannon raining that "hell-fire" upon the august city of Catherine under which it became a heap of ruins! Yet the man was undoubtedly sincere, as political fools almost invariably are. He had faith in nothing but armies and forts, but his faith in them was of the firmest. He despised the Bourbons and the *bourgeoisie* alike, and would be satisfied with nothing short of a national chief as irresponsible as Tamerlane; and if he should be as trueulent as Tamerlane, it was not difficult to see that M. Romieu would like him all the better for it. Your true fanatic loves blood, and is provokingly ingenious in showing how necessary it is that you should submit calmly to have your throat cut for the good of society. M. Marat was a logician of this sort, and M. Romieu is, after all, only a pale imitator of the cracked horse-leech; but as he wrote in the interest of "order," and for the preservation of property, we rarely hear of his thirst for blood. Had he been a disciple of Marat, his words would have been quoted annually in every abode of civilized men from Sacramento to Astrachan, as evidence of the desire of popular leaders to lap blood.

What has become of M. Romieu, and how he took Louis Napoleon's energetic measures for laying the Red Ghost in the

blood of aristocrats as well as of democrats, we know not. He ought to have been charmed with the *coup d'état*; for the man who conceived and executed that measure for his own benefit professed to act only for the benefit of society, the maintenance of the rights of property being kept by him especially in view. He, too, charged his enemies, or those whom he thought endowed with the desire and the ability to resist him, with Agrarianism; and such Agrarians as Thiers and Cavaignac were seized in their beds, and imprisoned,—to prevent their running away with the Great Book of France, one is at liberty to suppose. There was something shockingly ludicrous in charging the hero and victor of the Days of June with designs against property; but the charge may have led Cavaignac to have doubts whether he had not himself been a little too ready to believe the charge of Agrarianism when preferred against a large number of the people of France, whom he had treated with grape-shot by way of teaching them respect for the rights of property. There is nothing like bringing injustice home to a man to open his eyes to

its evil nature. Of all public men of our generation who have signally failed, Cavaignac must be held the most unfortunate; for his intentions were excellent, and he died just as circumstances were about to afford him an opportunity to retrieve his fame. His last days must have been the reverse of agreeable in their retrospect; for it must constantly have been forced upon his mind that he had been made the chief instrument in the work of fastening upon the country he loved the most odious of the many despotic governments it has known,—a government that confesses its inability to stand against the “paper shot” of journalists, and which has shackled the press after the fashion of Austrian and Russian dynasties; and all this had taken place, as he must have seen in his retirement, as the consequence of his having mistaken the voice of a party for the voice of France. The lesson is one that ought to go home to the hearts of all public men, and to those of American statesmen in particular, some of the ablest of whom are now engaged in doing the behests of an oligarchical faction in the name of the interests of property.

BULLS AND BEARS.

[Continued.]

CHAPTER XIX.

A SLOW and weary walk had Mr. Lindsay from the station to his house. It was after sunset, dark and cold, as he turned in at the gate. The house was dimly lighted, and no one save the Newfoundland dog came to greet him at the door. He did not hear his daughter singing as she was accustomed at evening. There were no pleasant voices, no light and cheerful steps in the rooms. All was silence. The ill news had preceded him.

His wife without a word fell on his bosom and wept. Clara kept her seat, trying in vain, while her lip quivered and her eyes dimmed, to fix her attention upon the magazine she had held rather than read. At length Mr. Lindsay led his wife to the sofa and sat beside her, holding her hand with a tenderness that was as soothing as it was uncommon. Prosperity had not hardened his heart, but business had preoccupied it; though his manner had been kind, his family had rarely seen in him any evidence of feeling.

Misfortune had now brought back the rule of his better nature, and the routine life he had led was at an end.

"My dear wife, what I have most dreaded in this crash is the pain, the anxiety, and the possible discomfort it would bring to you and to Clara. For myself I care nothing. It is a hard trial, but I shall conform to our altered circumstances cheerfully."

"And so shall we, father," said Clara. "We shall be happy with you anywhere."

"One thing, I am sure, you can never lose," said Mrs. Lindsay,—"and that is an honorable name."

"I have tried to do my duty. I gave up only when I found I must. But my duty is not yet done."

"Why, father?"

"My creditors have claims which I regard as sacred, and which must be paid, ultimately, at whatever sacrifice."

"Won't the property at the store be enough when you can sell it?" asked Mrs. Lindsay. "You have spoken of the quantity of goods you had on hand."

"I can't say, my dear. It depends upon how much time I have. If I could have effected sales, I should have been safe."

"If they have the goods, won't they be satisfied?" asked Clara.

"You don't understand, my daughter, that all I have is at their command. If the property does not liquidate the debts, then the house, the carriage and horses, the furniture, the"—

The possible surrender of all that had made life pleasant to his family was not to be considered without emotion, and Mr. Lindsay found himself unable to finish the sentence.

"Dear father!" exclaimed Clara, seizing and kissing his hand, as she sat down at his feet,—“you are just and noble. We could not be selfish or complaining when we think of you. Let everything go. I love the dear old house, the garden that has been your pride, the books and pictures; but we shall be nearer together—shan't we, papa?—in a cottage.

If they do sell my piano, I can still sing to you; nobody can take that pleasure from us."

"Bless you, my daughter! I feel relieved,—almost happy. Your cheerful heart has given me new courage. Perhaps we shall not have to make the sacrifices I dread. Whatever happens, my darling, your piano shall be kept. I will sell my watch first. Your music will be twice as dear in our days of adversity."

"Yes, papa,—if we keep the piano, I can give lessons."

"You give lessons? Nonsense! But get up, pussy; here, sit on my knee."

He fondled her like a child, and they all smiled through their tears,—heavenly smiles! blissful tears! full of a feeling of which the heart in prosperous days has no conception!

"One thing has happened to-day," said Mr. Lindsay, "that I shall never forget,—an action so generous and self-forgetful that it makes one think better of mankind. I remember hearing a preacher say that no family knew all their capabilities of love until death had taken one of their number,—not their love for the dead, but their deeper affection for each other after the loss. I suppose every calamity brings its compensations in developing noble traits of character; and it is almost an offset to failure itself to have such an overflowing feeling as this,—to know that there are so many sympathizing hearts. But what I was going to speak of was the conduct of my clerk, Monroe. He is a fine fellow,—rather more given to pictures and books and music than is good for a business man; but with a clear head, a man's energy, and a woman's heart. He has a widowed mother, whom he supports. I never knew he had any property till to-day. It seems his father left ten thousand dollars. He knew that my situation was desperate, and yet he offered me his all. It would only have put off the day of failure; but I was selfish enough to be willing to take it. He had deposited the securities for the amount with Sandford, who first borrowed money in the street by pledg-

ing them, and then failed to-day. Monroe has lost his all; but his intention was as noble as if he had saved me. I shall never forget it; and as long as I have a dollar he shall share it."

"What a noble fellow!" said Mrs. Lindsay. "How pleasant to think that in this terrible scramble for life there are some who have not lost their humanity, nor trampled down their finer feelings!"

"I couldn't but contrast this kindness on the part of a clerk, for whom I have never done anything beyond paying him his well-earned salary, with the conduct of Mr. Bullion. I gave him my indorsement repeatedly, and assisted him in procuring loans, when he was not so rich as he is now. I know he has resources, ready money,—money that he does not need for any outstanding debts, but which he must keep for speculation. But he refused to do anything. 'Couldn't,' he said, 'really; times were hard; everybody wanted to borrow; couldn't lend to everybody; hadn't the funds; much as he could do to stand up himself.' There was no sincerity in his look. I saw his soul skulking away behind his subterfuges like a spider in the depths of his flimsy web. He seems to thrive, however, in the midst of general ruin. I've no doubt he lives like a vulture, on the dead and dying."

"Is Mr. Bullion that short man, father, with the cold eyes and gruff voice, and the queer eyebrow which he seems to poke at people?"

"Yes, my daughter, that is the man."

"Well, I'm sure, he is coarse, disagreeable, hard-hearted. I'm glad you are not under obligations to him."

"My only regret is that I had the mortification of being refused. I wish I had never asked him. I can't think of his look and tone without a pang of shame, or wounded pride, if you choose to call it so, harder to bear than a blow in the face. I had a claim upon his gratitude, but he remembers a favor no more than a wolf does the mutton he ate a year ago.—But enough of business. The bitterness has passed since we have talked

together. Let us be cheerful. Come, Clara, sing some of those sweet old ballads!"

From her infancy until now in her twentieth year, Clara had been constantly with her father,—but she had never known him before.

CHAPTER XX.

EARLY next morning the officer in charge of Mr. Sandford's house was relieved by a brother constable. Number Two was a much more civil person in speech and manner than Number One; in fact, he speedily made himself so agreeable to the housemaid that she brought him a cup of coffee, and looked admiringly while he swallowed it. By the time Mrs. Sandford and Marcia came down to breakfast, he had established an intimacy with Biddy that was quite charming to look upon. One would have thought he was an old friend of the household,—a favored crony; such an easy, familiar air he assumed. He accosted the ladies with great gallantry,—assured them that they were looking finely,—hoped they had passed a pleasant night, and that Number One had given them no unnecessary inconvenience. Marcia met him with a haughty stare which nobody but a woman of fashion can assume. Turning to Mrs. Sandford, she exclaimed,—

"Who is this fellow?"

Number Two hastened to answer for himself:—

"My name, Ma'am, is Scarum,—Harum Scarum some of the young lawyers call me. Ha!" (*A single laugh, staccato.*)

"Well, Mr. Scarum, you can keep your compliments for those who appreciate them. Come, Lydia, let us go down to breakfast. The presuming fool!" she exclaimed, as she passed through the hall,—“he's worse than the other. One can put up with a coarse man, if he minds his own business; but an impudent, self-satisfied fellow must be made to know his place."

"High-strung filly! ha!" (*Sforzan-*

do.) "May have to speak to common folks, yet,—eh, Miss Bridget?"

But further conversation was interrupted for the time. Bridget was summoned by the bell to the dining-room, and gallant Number Two was left alone in the parlor. Meanwhile he surveyed the room as minutely as if it had been a museum,—trying the rocking-chair, examining pictures, snapping vases with his unpared nails, opening costly books, smelling of scent-bottles, scanning the anti-Macassars and the Berlin-wool mats. At last he opened the piano, and, in a lamentably halting style, played, "Then you'll remember me," using only a forefinger in the performance. He sang at the same time in a suppressed tone, while he cast agonizing looks at an imaginary obdurate female, supposed to be on the sofa, occasionally glancing with admiration in the mirror at the intensely pathetic look his features wore.

Marcia, meanwhile, had borne the noise as long as she could; so Biddy was dispatched to ask the singer if he would not *please* to do his practising at some other time.

"Practising, indeed!" exclaimed Number Two, indignantly, upon receiving the message. "There *are* people who think I can sing. These women, likely, a'n't cultivated enough to appreciate the 'way-up music. They're about up to that hand-organ stuff of Sig-ner Róssyni, likely. They can't understand Balfy; they a'n't up to it. What do *you* think, Miss Bridget? Nice figger, that of yours." (*Sotto voce.*) "None of the tall, spindlin', wasp-waisted, race-horse style about you, like that" (pointing down-stairs). "A good plump woman for me! and a woman with an ear, too! Now *you* know what good singin' is. I led the choir down to Jorumville 'bove six months b'fore I come down here and went into the law. Bnt *she* thinks I was practising! Ha!" (*Sempre staccato.*)

"La! did ye?" said the admiring Biddy.

Tinkle, tinkle, again. Biddy was now summoned to call Charles, and see if he

would breakfast. Number Two made another tour of the room, with new discoveries. While absorbed in this pleasing employment, the two women passed upstairs. Marcia could not restrain herself, as she saw him with her favorite bird-of-paradise fan.

"Don't spoil those feathers, you meddlesome creature!"

"Beg your pardon, Ma'am" (with an elaborate bow). "Merely admirin' the colors. Pretty sort of a thing, this 'ere! 'Most too light and fuzzy for a duster, a'n't it? Feathers ben dyed, most likely? Willin' to 'bleege the fair, however, especially one so handsome." (Rubbing it on his coat-sleeve.) "Guëss 't a'n't got dirty any."

Charles, meanwhile, had risen and dressed, and came out when Bridget knocked; a spectacle, indeed,—a walking sermon on the perils that may follow what are termed "good times." His face would have been pale, except that his nose, which was as puffy as an *omelette soufflée*, and his left eye with a drooping lid sustained by a livid crescent, gave it a rubicund expression. His knees were shaky, his pulse feeble, his head top-heavy. He declined assistance rather sulkily, and descended holding by the stair-rail and stepping gingerly. Number Two, in spite of his genial, unruffled temper, could not repress his surprise, as the apparition passed the parlor-door.

"A rum customer! Ha!" (*Con anima.*)

Before the repentant owner of the puffy nose and purple eyelid had finished his solitary breakfast, Mr. Sandford came home. He had obtained bail and was at large. Looking hastily into the parlor, he saw a stranger, with his hat jauntily on one side, seated in the damask-covered chair, with his feet on an embroidered ottoman, turning over a bound collection of sea-mosses, and Marcia's guitar lying across his lap. He was dumb with astonishment. Polite Number Two did not leave him to burst in ignorance.

"All right. Mr. Sandford, I suppose. An 'tachment put on, and I'm keeper. Sorry to disturb a family. But somebody has to. Can I do anything to oblige you?"

"Yes, by laying down that book which you are spoiling. And you may take your greasy boots off that worsted-work, and put the stopper into that Bohemian-glass bottle."

"Beg your pardon, Sir. Didn't intend to make trouble. Boots has to be greased, you know, else they crack all out, an' don't last no time; mine do. This 'ere Cologne is nice, to be sure. I jist poured out a bit on my pocket-handkercher."

"Cologne! It's attar of roses, and you've spilled more than your neck is worth,—taking yourself at your own valuation."

"Why, you don't say this is high-cost? It does smell good, though, ha!"

As he started to go up-stairs, Mr. Sandford saw the linen carpet-cover spattered with frequent drops of blood. He called aloud to his sister,—

"Marcia! are you there? alive? What's the meaning of this blood? Who has been murdered? Or is this turned into a butcher's shop?"

Marcia and her sister-in-law descended, and hurriedly explained the mystery. While they were standing at the head of the stairs, Charles made his appearance, and received such congratulations from his brother as might be expected. He vouchsafed no word of reply, but went into the room where he had slept to get some article he had left. A sudden thought struck Mr. Sandford. He followed Charles into the room, and in a moment after returned,—but so changed! Imagine Captain Absolute at the duelling-ground turned in a twinkling into Bob Acres, Lucy Bertram putting on the frenzied look of Meg Merrilies, or the even-tempered Gratiano metamorphosed into the horror-stricken, despairing Shylock at the moment he hears his sentence, and you have some notion of the expression which Sandford's face

wore. His eyes were fixed like baleful lights in a haggard, corpse-like countenance. His hair was disordered. He clutched his cravat as though suffocating. His voice was gone; he whispered feebly, like one of Ossian's ghosts,—

"Gone! gone! Who has it? Marcia! Lydia! Charles! Who's got it? Quick! The money! Gone?"

He rushed into the room again, deaf to any reply. He got upon his hands and knees, looked under the bed, the wardrobe, the dressing-table, the chairs, muttering all the while with a voice like a dying man's. He rose up, staggering, and seized Marcia by the arm, who trembled with terror at his ferocity.

"The money! Give me the money! You've got it! You know you have! Give it to me! Give!"

"Pray, be calm," said Mrs. Sandford; "you shall know all about it."

"I don't want to know," he almost screamed; "I want the money, the money!"

Then dropping his voice to a lower key, and with a tone which was meant to be wheedling, he turned to his sister-in-law:—

"You've got it, then? How you frightened me! Come, dear sister! don't trifle with me. I'm poor, very poor, and the little sum seems large. Give it to me. Let me see that it is safe. *Dear sister!*"

"I haven't it," said Mrs. Sandford. "But compose yourself. You shall know about it."

He cried audibly, like a sickly child. "It isn't gone? No, you play upon my fears. Where is the pocket-book?"

"How are you ever going to know, if you won't hear?" asked Marcia. "I wouldn't be so unmanly as to whine so even about a million."

"No, you think money is as plenty as buttons. Wait till you starve,—*starve*,—till you beg on a street-crossing."

"Listen," said Mrs. Sandford.

"Do, and stop your groaning like a madman," said Marcia, consolingly. "When Charles met with his mishap and fell senseless, we asked the officer

to carry him up-stairs. Rather than go up another flight, we had him taken into your chamber. Your dressing-case lay on the table, in the middle of the room, away from its usual place by the mirror. The officer at once seized and opened it. You had carelessly left your money in it. He was evidently informed of the fact that you had money, and was directed to attach it. He counted the package before me, and then put it into his pocket."

During this recital, Mr. Sandford's breath came quick and his eyes opened wider. His muscles all at once seemed charged with electricity. He dashed down-stairs, half-a-dozen steps at a time, and pounced upon unlucky Number Two, who, with the captivated Biddy, was leaning at the parlor-door, listening to the conversation above. Seizing the officer by the throat, Sandford shouted huskily,—

"Robber! thief! Give up that money! How dare you? Give it up, I say!"

Number Two could not answer, for his windpipe was mortally squeezed under the iron grip of his adversary; therefore, as the only reply he could make, he commenced the manual exercise right and left, and with such effect, that Sandford loosened his hold and staggered back.

"There! I guess you've got enough on't. What ye talkin' about money? I a'n't got any of your money."

Meanwhile, Mrs. Sandford, who had followed the infuriated man, though necessarily at some distance, came and grasped his arm.

"The man who seized the money is gone," she said. "This is the one who takes his place."

Sandford was speechless,—but not long. While hope remained, he had whined, begged, cried, implored. Now that he was baffled, discomfited, ruined, his rage broke out. The placid gentleman, whose glossy garb and quiet air a day before made such a picture of content, would hardly be recognized in this furious, gesticulating lunatic, whose oaths

and objurgations came belching forth like sulphurous flames. It was on his gentle sister-in-law that the weight of his wrath fell. She tried to pacify him, until she became actually alarmed for her safety, and turned to fly.

"Go!" he exclaimed. "You've done enough. You've ruined me. Pack off! You've beggared me. Now look out for yourself! Don't let me see your face again!"

Trembling and tearful, Mrs. Sandford went to her room to gather her wardrobe. She had not intended to remain a burden upon her brother-in-law. Now she must go at once. Even if he were to repent of his blind rage and ask her forgiveness, she felt that there was an impassable gulf between them.

During the confusion that followed, Number Two, feeling hungry, went down with Biddy to lunch.

"It's about the last ov it here, Sirr," said the girl, "an' we may as well ate what is good and dhrink something better than cold wather."

So saying, the best the house afforded was set out; wines of rare vintages were uncorked, and glasses hob-a-nobbed.

Mr. Sandford, exhausted with his delirium, went to his room, and there languidly paced the floor back and forth, without cessation, like a caged white bear in midsummer. Charles crawled up to his own bed. Marcia remained in the parlor, her busy brain turning over the unusual events of the day, and wondering what loop-hole of escape from their present difficulties could be found.

CHAPTER XXI.

THE door-bell rang. Biddy, occupied with her pleasing duties as hostess, and flushed with drinking crusty old Port and "Lafitte 1844," did not hear. Some sudden impulse or vague prescience moved Marcia to open the door herself. It was Greenleaf. Notwithstanding the untoward state of affairs, she could not deny herself the pleasure of meeting him, and

ushered him into the parlor, then fortunately vacant.

A cooler observer would have noticed something peculiar in his carriage as he crossed the hall,—an unnatural pallor, a sharpness in the angles of his mouth, a quicker respiration, and a look of mingled firmness and sorrow in his eyes. A stranger might have thought him in a state of chronic nervous irritability or mild insanity. And truly, a sensitive man, perplexed between conflicting duties, spurred by conscience, yet wanting in courage to do its bidding, presents a pitiable spectacle; it is a position of sharp suspense which no mind can hold long;—relief must come, in heart-break or darkness, if in no other way.

When Greenleaf parted from Marcia, the morning before, he intended to wait a week at least before telling her of his changed feelings. He did not know what a burden he had undertaken to carry; he staggered under it, like the pilgrim in Bunyan's immortal story. Besides, after he had once come to a determination, he was impatient to see Alice and implore her forgiveness. Minutes were days while he waited. To pass a week in this way was not to be thought of, unless by means of ether or mesmerism he could fly from himself and find peace in oblivion.

"My dear George," Marcia began, "it is so kind of you to come with your sympathy! We are dreadfully cast down. What is to be done I don't know."

"You surprise me! What has happened? I have scarcely been out of my studio since I last saw you."

"But it's in all the papers!"

"I haven't seen a paper."

"What I told you yesterday has come to pass. Henry has failed; so has the Vortex,—and Mr. Fayerweather, the President,—and Mr. Stearine,—and everybody else, I believe. We shall probably leave the house and take lodgings."

Every word was a pang to Greenleaf. Again his heart, full of sympathy for the woman's distress, whispered, "Wait! don't wound the stricken deer!" But he

hugged his resolve and steeled himself against pity.

"I am truly sorry to hear of your brother's misfortunes. But with his talents and reputation, and with his troops of friends in business circles as well as in the various charitable societies, it cannot be that he will long be depressed. He will work his way back to his old position, or even a higher one."

Marcia shook her head doubtfully. She had not heard the rumors affecting her brother's integrity, but she saw that his manly resolution was gone, that he was vacillating, broken-spirited, and needed but little more trouble to make him imbecile.

"I was thinking of a case of conscience, as I came here," said Greenleaf. "It was, how far a promise is binding, when it involves a lasting and irretrievable wrong in its fulfilment."

Marcia looked at him in dumb astonishment. He continued:—

"Suppose that you were to find, by-and-by, that your affections had cooled towards me,—that you discovered incompatibilities of taste and temper,—that you felt sure a true union of souls was impossible,—that marriage would be only a mockery?"

"Dear George, how you frighten me! Why do you ask such dreadful questions in such a solemn way? You know I love you, heart and soul."

"But consider the question as an abstract one. I ask you only to suppose the case. Should you thrust conscience into the cellar, stifle its outcries, and give your consent to a profanation of holy wedlock?"

"I can't suppose the case. And I don't see the use of torturing one's self with imaginary evils. The real troubles of life are quite enough to bear."

"I know such a case. I know a man who has to decide it. It is not a light matter for any man, and his is a soul as sensitive as God ever made. He was betrothed to a woman every way worthy; he loved her sincerely. His chief fault, and a serious one it is, came from

his susceptibility to fresh impressions. The pleasure of the present had more power over him than any recollections of the past. The influence of the living woman at his side was greater, for the moment, than that of any absent love. In an evil hour, he committed himself to another. She was, doubtless, formed to inspire his passion and to return it. But he was not free, and had no right to linger on forbidden ground. For weeks, nay, months, he lived this false and wicked life, of a different mind every day, and lacking the courage to meet the difficulty. At last he became sure that his love belonged where his faith was due,—that, if he would not live a wretched hypocrite, he must humble himself to confess his criminal weakness, and return to his first engagement."

He paused; he might well do so. Marcia, with some difficulty, was able to say, through her chattering teeth,—

"You seem to take a deep interest in this weak-minded person."

"I do,—the deepest. I am the man."

She rose to her feet, and, looking scornfully down upon him, exclaimed,—

"Then you acknowledge yourself a villain!—not from premeditation, which would give your baseness some dignity, but a weakly fool, so tossed about by Fate that he is made a villain without either desire or resistance!"

"You may overwhelm me with reproaches; I am prepared for them; I deserve them. But God only knows through what a season of torture I have passed to come to this determination."

"A very ingenious story, Mr. Greenleaf! Do you suppose that the world will believe it, the day after our losses? Do you expect me to believe it, even?"

"I told you that I had not heard of the failure. I am in the habit of being believed."

"For instance, when you vowed that you loved me, and me only!"

"You may spare your taunts. But, to show you how mercenary I am, let me assure you that the woman to whom my word is pledged, and to whom I must re-

turn, is without any property or expectations."

"Very well, Sir," said Marcia, rubbing her hands, in the endeavor to conceal her agitation; "we need not waste words. After what you have told me, I could only despise such a whiffler,—a scrap of refuse iron at the mercy of any magnet,—a miller dashing into every light. A lover so helpless must needs have some new passionate attraction—that is the phrase, I believe—with every changing moon. The man I love should be made of different stuff." She drew her figure up proudly, and her lips curled like a beautiful fiend's. "He should bury the disgraceful secret, if he had it, in his heart, and carry it to his grave. He would not cry out like a boy with a cut finger."

"Precisely, Miss Sandford. And for that reason you would be no mate for me. My wife must have no skeletons in her closet."

"Men generally claim the monopoly of those agreeable toys, I believe."

"Love is impossible where there are concealments. A secret is like a worm in the heart of an apple, and nothing but rottenness and corruption follow."

"Fortunately, you harbor none. You have turned your heart inside out, like a peddler's pack,—and a gratifying display it made! I am more than satisfied."

"The tone you have adopted is a warning to me to stop. I wish to bandy no epithets, or reproaches. I came sorrowfully to tell you what I have told. I had no fault to impute to you. But I must confess that this morning you have shown yourself capable of thoughts and feelings I never suspected, and I shall leave you with a far lighter heart than I came."

"You expected to see me at your feet, imploring your love and striving to melt you by tears,—did you? It would have been a pleasing triumph,—one that your sex prizes, I believe; but you have not been gratified. I know what is due to myself, and I do not stoop. But there may be ways to punish the betrayer of confidence," she said, with a heaving bos-

om and distended nostrils. "I have a brother; and even if he is forgetful, I shall not forget."

"I am obliged to you for putting me on my guard. I wished to part otherwise. Be it so, since you will."

He turned to leave the room. Swift as lightning, she ran to the front door and braced herself against it, at the same time calling loudly to her brother. Mr. Sandford came to the top of the stairs and listened with apparent apathy, while the maddened woman poured out her rage. He stood a moment like one in a dream, and then slowly came down.

"There is your cane," said Marcia, fiercely, pointing to the umbrella-stand.

"I give you fair warning," said Greenleaf, calmly, "that you will never strike more than one blow. No man shall assault me but at the risk of his life."

"What is the need of this fury?" asked Mr. Sandford. "I don't want to quarrel with a pauper. You are well rid of him. If you were to be married, you'd only have the pleasure of going to Deer Island for your bridal trip."

"Then you will see me insulted without lifting a finger? Coward! Broken down like a weed for the loss of a little money! I should be ashamed to have a beard, if I had such a timid soul!"

"I trust, Miss Sandford," said Greenleaf, "you do not wish to prolong this scene. Let me pass."

"Oh, yes,—you can go; can't he, brother?"

She opened the door, looking scornfully from the one to the other.

At that moment Mrs. Sandford came down, bringing a satchel, and asked Greenleaf to walk with her until she could get a carriage. He cheerfully promised his aid, and took the satchel. Her eyes were sadly beautiful, and still humid from recent tears; and her face wore a touching look of resignation. She did not speak to Mr. Sandford, who stood scowling at her; but, taking Marcia's hand, she said,—

"Good bye, sister! I never thought to leave you in this way. I hope we shall

never see a darker hour. I shall send for my trunks presently. Good bye!"

"Good bye!" replied Marcia, mechanically. "You have a brave gallant! See to it that he is not compelled by Destiny to make love to you on the way!"

Greenleaf, with his companion, descended the steps to the street, making no reply to this amiable God-speed.

Marcia shut the door, and with her brother returned to the parlor. At the head of the stairs that led to the dining-room stood Number Two and Biddy, who in stupid wonder had witnessed the scenes just described.

"Bridget," exclaimed the enraged mistress, "what are you staring at? Come here! Pah! you have been drinking! You, too, you creature!"

Number Two bowed with maudlin politeness.

"You-do-m'injustice, Ma'am. On'y a smallsup, a littlesup, ponmyhonorasgen'l'man."

"Bridget, do you pack up your baggage and be off! Rioting and feasting in the time of our trouble! Ungrateful hussy!"

"I'll do that same, Miss Marshy; but me waages, if ye plaze, Miss."

"Get your wages, if you can. You've broken more crockery and glass, and wasted more wines and preserves, than you ever earned."

"That's always the way, Miss, I've noticed, when missuses was o' mind to get claar of payin' the honest dues. But me brother"—

"Be off to your brother! But first go and cool your head under the water-faucet."

Muttering and whining, the disconsolate Biddy crept up to the attic for her scanty wardrobe.

"Here, fellow!" said Marcia to Number Two, whose foolish smiles at any other time would have been ludicrous,—*"go into the kitchen and get sober."*

"He obeyed like a spaniel."

"Now, Henry," said Marcia, rather more composed, "let us do something at once. It's plain that we can't live here

for the house will be stripped; and in our circumstances we would not stay, if we could. That fellow is so far stupefied that we can save what we can carry away. If you have any spirit left, help me pack our clothes and such things as can be put into our trunks. Come! are you dreaming?"

He started up and followed her like a child. With superhuman energy, she ransacked the house and gathered the most valuable articles. Plate, linen, dresses, Parian ware, books, furs, and jewelry were packed, as securely as the time allowed. A carriage and a baggage-wagon were ordered, and in an incredibly short period they were ready to start.

"We have forgotten Charles," said Mr. Sandford.

"True enough," said Marcia. "Go and call him; he is too handsome to be spared from our party just now. Tell him to bring his clothes."

The penitent came down, reluctantly; his nose was still puffy, and the crescent under his eye rather more livid; muffled and cloaked, he was led to the carriage. Mr. Sandford then remembered the cherished parchment certificates and votes of thanks,—his title-deeds to distinction.

"Leave them," said his sister, contemptuously. "What are they good for? A few commonplace autographs in tarnished gilt frames."

Bridget, meanwhile, went off, threatening all sorts of reprisals on the part of her brother, who "wouldn't see her imposed upon by the likes of thim, not he!" From the kitchen, at intervals, came up doleful snatches of "Then you'll remember me," interrupted by hiccoughs, and with involuntary variations and cadenzas that would have driven "Balfy" mad.

All was ready and they drove off. The house wherein had lived a Benefactor of Mankind was deserted.

CHAPTER XXII.

GREENLEAF found a carriage for Mrs. Sandford, and accompanied her to a pri-

vate boarding-house, where she took lodgings; he then sent the driver back for her trunks, and, having seen her comfortably provided for, returned to his own rooms,—but not to remain there. He desired only to leave a message on his door, explaining his absence. In less than an hour he was in the railway-train, on his way to Innisfield.

To the musing or drowsy traveller by rail how space and time are annihilated! He is barely conscious of progress, only when the brakeman with measured tone shouts the name of the station; he looks up from his paper or rouses from his doze, looks out at the cheerless prospect, and then settles himself for another thirty miles. Time passes as unobserved as the meadows or bushy pastures that flit by the jarring window at his ear. But with Greenleaf, the reader will believe, the case was far different. He had never noticed before how slowly the locomotives really moved. At each station where wood and water were to be taken, it seemed to him the delay was interminable. His eager desire shot along the track like electricity; and when at last he reached the place where he was to leave the train, he had gone through a year of ordinary hopes and fears. He mounted the stage-box and took his seat beside the buffalo-clad, coarse-bearded, and grim driver. The road lay through a hilly country, with many romantic views on either hand. It was late in the season to see the full glories of autumn; but the trees were not yet bare, and in many places the contrasts of color were exquisite. For once the driver found his match; he had a passenger as taciturn as himself. For the first few miles not a word was spoken, saving a few brief threats to the horses; but at last Jehu could hold out no longer; his reputation was in danger, if he allowed any one to be more silent than himself, and he cautiously commenced a skirmish.

"From Boston?"

A nod was the only reply.

"Belong about here?"

"No," with a shake of the head.

"Ben up here afore, though, I guess?"

"Yes."

"Thought I remembered. Year or so ago?"

"Ycs."

"Had a great white cotton umbrill, a box like a shoe-kit, and suthin' like a pair o' clo'es-frames?"

Greenleaf could but smile at the description of his easel and artist's outfit; still he contented himself with a brief assent.

"Keeps tight as the bark to a white-oak," muttered Jehu to himself. "Guess I'll try him on t'other side, seein' he's so offish."

Then aloud,—

"Knowed Square Lee, I b'lieve?"

"Yes," thundered Greenleaf, looking furiously at the questioner.

The glance frightened Jehu's soul from the red-curtained windows, where it had been peeping out, back to its hiding-place, wherever that might be.

"Well, yer needn't bite a feller's head off," muttered he, in the same undertone as before. "And if ye want to keep to yerself, shet up yer darned oyster-shell, and see how much you make by it. Not more'n four and sixpence, I guess. Maybe you'll come back 'bout's wise as ye come."

Thenceforward, Buffalo-coat was grim; his admonitions to the horses were a trifle more emphatic; once he whistled a fragment of a minor stave, but spoke not a word till the coach reached the tavern-door.

"You can drive to Mr. Lee's house," said Greenleaf.

"Want to go where he is?" replied Jehu, with a sardonic grin. "Wal, I'm goin' past the meetin'-us, and I'll set ye down at the graveyard."

"What do you mean?" asked Greenleaf, between anger and terror, at this brutal jest.

"Why, he's dead, you know, and ben layin' up there on the side-hill a fortnight."

"Take me to the house, nevertheless."

"Lee's house? 'Siah Stebbins, the lame shoemaker, he's jest moved into't. Miss Stebbins, she can't 'commodate ye, most likely; got too many children; a'n't over an' above neat, nuther."

"Where is Miss Lee,—Alice,—his daughter?"

"Wal, can't say;—gone off, I b'lieve."

"She has relatives here, has she not?"

"Guess not; never heerd of any."

With a heavy heart, Greenleaf alighted at the tavern. Mr. Lee dead! Alice left alone without friends, and now gone! The thought stunned, overpowered him. While he had been treading the paths of dalliance, forgetful of his obligations, the poor girl had passed through the great trial of her life, the loss of her only parent and protector,—had met the awful hour alone. Hardly conscious of what he did, he went to the churchyard and sought for a new-made grave. The whole scene was pictured to his imagination with startling vividness. He saw the fond father on his death-bed, leaving the orphan to the kindness of strangers to his blood,—the daughter weeping, disconsolate, the solitary mourner at the funeral,—the desolate house,—the well-meant, but painful sympathy of the villagers. He, meanwhile, who should have cheered and sustained her, was afar off, neglectful, recreant to his vows. Could he ever forgive himself? What would he not give for one word from the dumb lips, for one look from the eyes now closed forever?

But regrets were useless; his first duty was to the living; he must hasten to find Alice. But how, where? It occurred to him that the village lawyer was probably administrator of the estate, and could tell him where Alice was. He went, therefore, to the lawyer's office. It was shut, and a placard informed him that Mr. Blank was attending court at the county-seat. The lawyer's housekeeper said that "Alice was to Boston, with some relation or other,—a Mr. Monroe, she believed his name was, but couldn't say for sartin. The Square could tell; but

he wouldn't be back for three or four days."

Leaving his card, with a request that Mr. Blank would communicate to him Alice's address, Greenleaf hired a conveyance to the railway. He could not remain in Innisfield an hour; it was a tomb, and the air stifled him. On his way, he had ample opportunity to consider what a slender clue he had to find the girl; for he thought of the long column of Monroes in the "Directory"; and, besides, he did not feel sure that the housekeeper had correctly remembered the name, even.

We leave the repentant lover to follow on the track of Alice, assured that he will receive sufficient punishment for his folly in the remorse and anxiety he must feel.

It is quite time that our neglected heroine should appear upon the stage. Gentle Alice, orphaned, deserted, lonely; it is not from any distrust as to her talents, her manners, or her figure, that she has been made to wait so long for the call-boy. The curtain rises. A fair-haired girl of medium height, light of frame, with a face in whose sad beauty is blended the least perceptible trace of womanly resolution. She has borne the heaviest sorrow; for when she followed her father to the grave she buried the last object of her love. The long, inexcusable silence of Greenleaf had been explained to her; she now believed him faithless, and had (not without a pang) striven to uproot his memory from her heart. Courageous, but with more than the delicacy of her sex, strong only in innocence and great-heartedness, mature in character and feeling, but with fresh and tender sensibility, she appeals to all manly and womanly sympathy.

When the last ties that bound her to her native village were broken, she accepted the hearty invitation of her cousin, Walter Monroe, and went with him to Boston. The house at once became a home to her. Mrs. Monroe received her as though she had been a daughter.

Such a pretty, motherless child,—so loving, so sincere! How could the kind woman repress the impulse to fold her to her bosom? Not even her anxiety to retain undivided possession of her son's heart restrained her. So Alice lived, quiet, affectionate, but undemonstrative, as was natural after the trials she had passed. Insensibly she became "the angel in the house"; mother and son felt drawn to her by an irresistible attraction. By every delicate kindness, by attention to every wish and whim, by glances full of admiration and tenderness, both showed the power which her beauty and goodness exerted. And, truly, she was worthy of the homage. The younger men who saw her were set aflame at once, or sighed afar in despair; while the elderly felt an unaccountable desire to pat her golden head, pinch her softly-rounded cheek, and call her such pet-names as their fatherly character and gray hair allowed.

Fate had not yet done its worst; there were other troubles in store for the orphan. She knew little of her kinsman's circumstances, but supposed him to be at least beyond the reach of want. But not many days passed before the failure of Sandford deprived him of his little patrimony, and the suspension of Mr. Lindsay left him without employment. That evening, when Walter came home, she unwillingly heard the conversation between him and his mother in an adjoining room; and then she knew that her kind friends were destitute. Her resolution was at once formed. With as cheerful an air as she could assume, she took her place at the tea-table, and in the conversation afterwards strove to hide her desolate heart-sickness. On going to her room, she packed her simple wardrobe, not without many tears, and then, with only indifferent success, tried to compose her scattered senses in sleep.

Next morning she strove to appear calm and cheerful, but a close scrutiny might have detected the effort,—a deeper sorrow, perhaps, about the heavy eyelids, and certainly a firmer pressure of the sometimes tremulous lips. But Wal-

ter was too much occupied with the conflict of his own feelings to observe her closely. While his mother was engaged in her housewifely duties, he took Alice's hand, and for the first time spoke of his losses, but expressed himself confident of obtaining a new situation, and begged her to dismiss any apprehensions from her mind. She turned her face that he might not see the springing tears. He went on:—

"The sharpest pang I feel, Alice, is in the thought, that, with the loss of my little fortune, and with my present gloomy prospects, I cannot say to you what I would,—I cannot tell you what is nearest my heart. Since you came here, our sombre house has grown bright. As I have looked at you, I have dared to promise myself a happiness which before I had never conceived possible."

He hesitated.

"Don't, dear Walter! I beg of you, don't venture upon that subject!"

"Why? is it painful to you?"

"Inexpressibly! You are generous and good. I love and honor you as my cousin, my friend, my protector. Do not think of a nearer relationship."

Walter stood irresolute.

"Some other time, dear Alice," he faltered out. "I don't wish to pain you, and I have no courage to-day."

"Let me be frank, Cousin Walter. Under other circumstances, I would not anticipate the words I saw trembling on your lips. But even if the memory of my poor father were not so fresh, I could not hear you." She hid her face as she went on. "I have received a wound from the faithlessness of one lover which never will heal. I could not repay your love. I have no heart to give you."

Thus far she had controlled her feelings, when, kissing his hand with sudden fervor, she burst into tears, and hastily left the room.

She waited till Walter went out; then she wrote a brief note and placed it on the library-table at his favorite corner, and, after bidding Mrs. Monroe good morning, went out as though for a walk.

Frequently she looked back with tearful eyes at the home she felt constrained to leave; but gathering her strength, she turned away and plunged into the current that set down Washington Street.

Brave heart! alone in a great city, whose people were too much engrossed with their own distresses and apprehensions to give heed to the sufferings of others! Alone among strangers, she must seek a home and the means of support. Who would receive an unknown, friendless girl? Who, in the terrible palsy of trade, would furnish her employment?

CHAPTER XXIII.

THERE was naturally great surprise when Walter Monroe returned home to dinner and Alice was found to be missing. It was evident that it was not an accidental detention, for her trunk had been sent for an hour previous, and the messenger either could not or would not give any information as to her whereabouts. Mrs. Monroe was excessively agitated,—her faculties lost in a maze, like one beholding an accident without power of thought or motion. To Walter it was a heavy blow; he feared that his own advances had been the occasion of her leaving the house, and he reproached himself bitterly for his headlong folly. Their dinner was a sad and cheerless meal; the mother feeling all a woman's solicitude for a friendless girl; the son filled with a tumult of sorrow, remorse, love, and pity.

"Poor Alice!" said Mrs. Monroe; "perhaps she has found no home."

"Don't, inother! The thought of her in the streets, or among suspicious strangers, or vulgar people, is dreadful. We must leave no means untried to find her. Did she leave no word, no note?"

"No,—none that I know of."

"Have you looked?"

She shook her head. Walter left his untasted food, and hastily looked in the hall, then in the parlor, and at last in the library. There was the note in her own delicate hand.

"DEAR WALTER,—

"Don't be offended. I cannot eat the bread of idleness now that your fortune is gone and your salary stopped. If I need your assistance, you will hear from me. Comfort your mother, and believe that I shall be happier earning my own living. We shall meet in better times. God bless you both for your kindness to one who had no claim upon you!"

"ALICE."

"The dear creature!" said Mrs. Monroe, taking the note and kissing it.

"Why did you let her trunk go, mother? You might have detained the man who came for it, and sent for me. I would have followed him to the ends of the earth."

"I don't know, my son. I was confused. I hardly knew what happened. I shook so that I sat down, and Bridget must have got it."

Tears ran down her cheeks, and her hands trembled so that her fork dropped.

"Never mind, dear mother. Pray, be calm. I did not wish to disturb you."

There was a ring at the door. A gentleman wished to see Mr. Monroe. Rising from the table, he went into the parlor.

"Mr. Monroe," began the stranger, in an agitated manner, "do you know anything of a young lady named Lee, — Alice Lee?"

"Yes," replied Monroe, with equal excitement, "I know her well. What of her? Where is she? Have you found her?"

"Found her?" said the other, with surprise. "Is she not here?"

"No,—she left this morning."

"And left no word where she was going?"

"None."

"Let me beg of you not to trifle with me. Did she not hear my voice, my step, and attempt to excuse herself through you?"

"Sir!" exclaimed Walter.

"I beg pardon. I have been in search of her for two days. I could not believe she had eluded me just at the last. I do not wish to doubt your word."

"And who may you be, Sir, to take such an interest in the lady?"

"I can satisfy you fully. My name is Greenleaf."

"The painter?"

"Yes. You must have heard her speak of me."

"Never, to my recollection."

"Have you known her long?"

"She is my cousin. It is only recently that she came here, and her acquaintances of a year ago might naturally have been passed over."

"You seem surprised at her leaving you so abruptly. You will join me in making search for her?"

"I shall search for her, myself, as long as there is hope."

"Let me confess," said Greenleaf, "that I have the strongest reasons for my haste. She is betrothed to me."

"Since you have honored me with your confidence, I will return it, so far as to tell you what I heard from her this morning. I think I can remember the precise words:—'I have received a wound from the faithlessness of one lover, which never will heal.' If you are the person, I hope the information will be as agreeable to you as her absence and ill-judging independence are to me. I wish you good morning."

"Then she has heard!" said Greenleaf, soliloquizing. "I am justly punished." Then aloud. "I shall not take offence at your severity of tone. I have but one thought now. Good morning!"

He left the house, like one in a dream. Alice, homeless in the streets this bitter day,—seeking for a home in poverty-stricken boarding-houses,—asking for work from tailors or milliners,—exposed to jeers, coarse compliments, and even to utter want!—the thought was agony. The sorrows of a whole life were concentrated in this one hour. He walked on, frantically, peering under every bonnet as he passed, looking wistfully in at the

shop-windows, expecting every moment to encounter her sad, reproachful face.

Walter had been somewhat ill for several days, and the accumulation of misfortunes now pressed upon him heavily. He did not tell his mother of the strange interview, but sat down moodily by the grate, in the library. He was utterly perplexed where in the city to search for Alice; and with his mental depression came a bodily infirmity and nervousness that made him incapable of effort. An hour passed in gloomy reverie,—drifting without aim upon a shoreless ocean, under a sullen sky,—when he was roused by the entrance of Easelmann.

"In the dumps? I declare, Monroe, I shouldn't have thought it of you."

"I am really ill, my friend."

"Pooh! Don't let your troubles make you believe that. Cheer up. You'll find employment presently, and you'll be surprised to find how well you are."

"I hope I shall be able to make the experiment."

"Well, suppose you walk out with me. There is a tailor I want you to see."

"A tailor? I can't sew or use shears, either."

"No,—nor sit cross-legged; I know that. But this tailor is no common Snip. He is a man of ideas and character. He has something to propose to you."

"Indeed! I am much obliged to you. To-morrow I will go with you; but, really, I feel too feeble to-day," said Monroe, languidly.

"Well, as you please; to-morrow it shall be. How is your mother?"

"Quite well, I thank you."

"And the pretty cousin, likewise, I hope?"

"She was quite well this morning."

"Isn't she at home?"

"No,—she has gone out."

"Confound you, Monroe! you have never let me have a glimpse of her. Now I am not a dangerous person; quite harmless, in fact; received trustfully by matrons with grown-up daughters. You needn't hide her."

"I don't know. Some young ladies are quite apt to be fascinated by elderly gentlemen who know the world and still take an interest in society."

"Yes,—a filial sort of interest, a grand-daughterly reverence and respect. The sight of gray hair is a wonderful antidote to any tenderer feeling."

"I am very sorry not to oblige you; but the truth is, that Cousin Alice, hearing of my losses, has left the house abruptly, to earn her own living, and we do not know where she has gone."

"The independent little minx! Now I rather like that. There's the proper spirit. She'll take good care of herself, I haven't a doubt."

"But it is a most mortifying step to us. It is a reflection upon our hospitality. I would have worked my fingers off for her."

"No doubt. But she will merely turn hers into nutmeg-graters, by pricking them with her needle, and save you from making stumps of your own. Oh, never fear,—we shall find her presently. I'll make a description of her, and leave it with all the slop-shop fellows. 'Strayed or stolen: A young lady answering to the name of Alice; five feet and no inches; dressed in black; pale, blue-eyed, smiles when properly spoken to; of no use to any person but the owner. One thousand dollars reward, and no questions asked.' Isn't that it? It won't be necessary to add, that the disconsolate advertiser is breaking his heart on account of her absence."

"My dear Easelmann, I know your kindly heart; but I cannot be rallied out of this depression. I have only the interest of a cousin, a friend, a protector, in the girl; but her going away, after my other misfortunes, has plunged me into an abyss. I can't be cheerful."

"One word more, my dear fellow, and I go. You know I threatened to bore you every day; but I sha'n't continue the terebrations long at a time. You told me about the way your notes were disposed of. Now they are yours, beyond question, and you can recover them from

the holder; he has no lien upon them whatever, for Sandford was not authorized to pledge them. It's only a spoiling of the Egyptians to fleece a broker."

"Perhaps the notes themselves are worthless, or will be. Nearly everybody has failed; the rest will go shortly."

"I see you are incurable; the melancholy fit must have its course, I suppose. But don't hang yourself with your handkerchief, nor drown yourself in your wash-basin. Good bye!"

On his way down Washington Street, Easelmann met his friend Greenleaf, whom he had not seen before for many days.

"Whither, ancient mariner? That haggard face and glittering eye of yours might hold the most resolute passer-by."

"You, Easelmann! I am glad to see you. I am in trouble."

"No doubt; enthusiastic people always are. You fretted your nurse and your mother, your schoolmaster, your mistress, and, most of all, yourself. A sharp sword cuts its own scabbard."

"She is gone, — left me without a word."

"Who, the Sandford woman? I always told you she would."

"No,—I left her, though not so soon as I should."

"A fine story! She jilted you."

"No,—on my honor. I'll tell you about it some other time. But Alice, my betrothed, I have lost her forever."

"Melancholy Orpheus, how? Did you look over your shoulder, and did she vanish into smoke?"

"It is her father who has gone over the Styx. She is in life; but she has heard of my flirtation"—

"And served you right by leaving you. Now you will quit capering in a lady's chamber, and go to work, a sadder and a wiser man."

"Not till I have found her. You may think me a trifler, Easelmann; but every nerve I have is quivering with agony at

the thought of the pain I have caused her."

"Whew-w-w!" said Easelmann. "Found her? Then she's eloped, too! I just left a disconsolate lover mourning over a runaway mistress. It seems to be epidemic. There is a stampede of unhappy females. We must compress the feet of the next generation, after the wise custom of China, so that they can't get away."

"Whom have you seen?"

"Mr. Monroe, an acquaintance of mine."

"The same. The lady, it seems, is his cousin,—and is, or was, my betrothed."

"And you two brave men give up, foiled by a country-girl of twenty, or thereabouts!"

"How is one to find her?"

"What is the advantage of brains to a man who doesn't use them? Consider; she will look for employment. She won't try to teach; it would be useless. She is not strong enough for hard labor. She is too modest and reserved to take a place in a shop behind a counter, where she would be sure to be discovered. She will, therefore, be found in the employ of some milliner, tailor, or bookbinder. How easy to go through those establishments!"

"You give me new courage. I will get a trades-directory and begin at once."

"To-morrow, my friend. She hasn't got a place yet, probably."

"So much the better. I shall save her from the necessity."

"Go, then," said Easelmann. "You'll be happier, I suppose, to be running your legs off, if it is to no purpose. A lover with a new impulse is like a rocket when the fuse is lighted: he must needs go off with a rush, or ignobly fizz out."

"Farewell, for to-day. I'll see you to-morrow," said Greenleaf, already some paces off.

[To be continued.]

PRAYER FOR LIFE.

Oh, let me not die young !
 Full-hearted, yet without a tongue,—
 Thy green earth stretched before my feet, untrod,—
 Thy blue sky bending over,
 As her most tender lover,
 With infinite meaning in its starry eyes,
 Full of thy silent majesty, O God !
 And wild, weird whispers from the solemn deep
 Of the Great Sea ascending, with the sweep
 Of the Wind-angel's wings across the skies,
 Burdened with hints of awful memories,
 Whose half-guessed grandeur thrills us till we weep !—
 I love thy marvellous world too well—
 Its sunny nooks of hill and dell,
 Its majesty of mountains, and the swell
 Of volumed waters—for my heart to yearn
 Away from the deep truth which veils its splendor
 In beauty there less dazzling, but more tender.
 With grave delight I turn
 To all its glories, from the tiniest bloom
 Whose hour-long life just sweetens its own tomb
 As with funereal spices,
 To the far stars which burn
 And blossom in fire through their vast periods,—
 Borne in thy palm,
 Like the pale lotus in the hand of Isis,
 When thronèd white, and calm,
 In solemn conclave of the mythic gods.

Oh, let me not die young,
 A brother unclaimed among
 The countless millions of thy happy flock,
 Whose deepest joy is to obey,
 Whereby they feel the measured sway
 Of thy life in them, their own living part,
 Whether in centuried pulses of the rock
 By slow disintegration
 Ascending to its higher,
 Or the quick fluttering of the Storm-god's heart,—
 An instant's palpitation
 Through all its arteries of fire !
 One common blood runs down life's myriad veins,
 From Archangelic Hierarchs who float
 Broad-winged in the God-glory, to the mote
 That trembles with a braided dance
 In the warm sunset's vivid glance ;
 And one great Heart that boundless flow sustains !
 In all the creatures of thy hand divine

Thy love-light is a living guest,
 Whether a petal's palm confine
 Its glitter to a lily's breast,
 Or in unbounded space a starry line
 Stretches, till flagging Thought must droop her wing to rest.

Oh, let me not die young,
 A powerless child among
 The ancient grandeurs of thy awful world !
 I catch some fragment of the mighty song
 Which, ere to darkness hurled,
 My elder brothers in the eternal throng
 Have caught before,—
 Faint murmurs of the surge,
 The deep, surrounding, everlasting roar
 Of a life-ocean without port or shore,—
 Ere I depart, compelled to urge
 My fragile bark with trembling from the verge
 Of this Earth-island, into that Unknown,
 Where worlds, like souls forlorn, go wandering alone !

Oh, let me not die young,
 With all that song unsung,
 A swift and voiceless fugitive,
 From darkness coming and in darkness lost,
 Before thy solemn Pentecost,
 Dawning within the soul, shall give
 The burning utterance of its flaming tongue,—
 The boon whereby to other souls we live !
 Thy worlds are flashing with immortal splendor,
 For human speech on heights of human song
 Faintly to render,
 And pour back along
 Its mountain grandeur, the accumulate rain
 Of star-light, dream-light, thoughts of joy and pain,
 Of love, hate, right and wrong,
 In floods of utterance sublime and strong,
 In dewy effluence beautiful and tender.

The kindred darknesses
 Of caverned earth and fathomless thought,
 Of Life and Death, and their twin mysteries,
 Before and After, on my spirit press
 Tempting and awful, with high promise fraught,
 And guardian terrors, whose out-flashing swords
 Beleaguer Paradise and the holy Tree
 Sciential. Step by step the way is fought
 That leads from Darkness, through her miscreant hordes,
 Back to the heavens of wise, and true, and free :
 Minerva's Gorgon, Ammon's cyclic Asp,
 And the fierce flame-sword of the Cherubim,
 That flashed like hate across the pallid gasp

Of exiled Eve and Adam, flare, and glare,
 And hiss venenate, round the steps of him
 Who thirsts for heavenly Wisdom, if he dare
 Climb to her bosom, or with artless grasp
 Pluck the sweet fruits that hang around him, ripe and fair.

Oh ! glorious Youth
 Is the true age of prophecy, when Truth
 Stands bared in beauty, and the young blood boils
 To hurl us in her arms, before the blur
 Of time makes dim her rounded form,
 Or the cold blood recoils
 From the polluted swarm
 Of armed Chimeras that environ her.
 But worthy Age to ripened fruit shall bring
 The glorious blooming of its hopeful spring,
 And pile the garner of immortal Truth
 With sheaves of golden grain,
 To sow the world again,
 And fill the eager wants of the New Age's youth.

A thousand flashes of uncertain light
 Cleave the thick darkness, driving far athwart
 The up-piled glooms, as lightnings plough their bright
 Fire-furrows through the barren cloud
 They sow with thunders. Thought on burning thought
 Shatters the doubts and terrors which have bowed
 Weak hearts on weaker leaning in a crowd
 Self-crushing and self-fettering ; gleams are caught
 From some far centre set by God to keep
 His brave world spinning, or some drifting isle
 Of swift wildfire shot out by the wide sweep
 Of wings demoniac,
 Far winnowing and black,
 Our cheated souls to 'wilder and beguile.
 Only the years, the imperturbable,
 Impassionate years, can sheave the scattered rays
 Into one sun, these mingled arrows tell
 Each to its quiver, the divine and fell,
 And life's lone meteors to their centre trace.

O Father, let me not die young !
 Earth's beauty asks a heart and tongue
 To give true love and praises to her worth ;
 Her sins and judgment-sufferings call
 For fearless martyrs to redeem thy Earth
 From her disastrous fall.
 For though her summer hills and vales might seem
 The fair creation of a poet's dream,—
 Ay, of the Highest Poet,
 Whose wordless rhythms are chanted by the gyres
 Of constellate star-choirs,

That with deep melody flow and overflow it,—
 The sweet Earth,—very sweet, despite
 The rank grave-smell forever drifting in
 Among the odors from her censers white
 Of wave-swung lilies and of wind-swung roses,—
 The Earth sad-sweet is deeply attaint with sin !
 The pure air, which incloses
 Her and her starry kin,
 Still shudders with the unspent palpitating
 Of a great Curse, that to its utmost shore
 Thrills with a deadly shiver
 Which has not ceased to quiver
 Down all the ages, nathless the strong beating
 Of Angel-wings, and the defiant roar
 Of Earth's Titanic thunders.

Fair and sad,
 In sin and beauty, our beloved Earth
 Has need of all her sons to make her glad ;
 Has need of martyrs to re-fire the hearth
 Of her quenched altars,—of heroic men
 With Freedom's sword, or Truth's supernal pen,
 To shape the worn-out mould of nobleness again.
 And she has need of Poets who can string
 Their harps with steel to catch the lightning's fire,
 And pour her thunders from the clanging wire,
 To cheer the hero, mingling with his cheer,
 Arouse the laggard in the battle's rear,
 Daunt the stern wicked, and from discord wring
 Prevailing harmony, while the humblest soul
 Who keeps the tune the warder angels sing
 In golden choirs above,
 And only wears; for crown and aureole,
 The glow-worm light of lowliest human love,
 Shall fill with low, sweet undertones the chasins
 Of silence, 'twixt the booming thunder-spasms.
 And Earth has need of Prophets fiery-lipped
 And deep-souled, to announce the glorious dooms
 Writ on the silent heavens in starry script,
 And flashing fitfully from her shuddering tombs,—
 Commissioned Angels of the new-born Faith,
 To teach the immortality of Good,
 The soul's God-likeness, Sin's coeval death,
 And Man's indissoluble Brotherhood.

Yet never an age, when God has need of him,
 Shall want its Man, predestined by that need,
 To pour his life in fiery word or deed,—
 The strong Archangel of the Elohim !
 Earth's hollow want is prophet of his coming :
 In the low murmur of her famished cry,
 And heavy sobs breathed up despairingly,

Ye hear the near invisible humming
 Of his wide wings that fan the lurid sky
 Into cool ripples of new life and hope,
 While far in its dissolving ether ope
 Deep beyond deeps, of sapphire calm, to cheer
 With Sabbath gleams the troubled Now and Here.

Father! thy will be done,
 Holy and righteous One!
 Though the reluctant years
 May never crown my throbbing brows with white,
 Nor round my shoulders turn the golden light
 Of my thick locks to wisdom's royal ermine:
 Yet by the solitary tears,
 Deeper than joy or sorrow,—by the thrill,
 Higher than hope or terror, whose quick germen,
 In those hot tears to sudden vigor sprung,
 Sheds, even now, the fruits of graver age,—
 By the long wrestle in which inward ill
 Fell like a trampled viper to the ground,—
 By all that lifts me o'er my outward peers
 To that supernal stage
 Where soul dissolves the bonds by Nature bound,—
 Fall when I may, by pale disease unstrung,
 Or by the hand of fratricidal rage,
 I cannot now die young!

ODDS AND ENDS FROM THE OLD WORLD.

My first visit to Turin dates as far back as 1831. We are so personal, that our impressions of things depend less on their intrinsic worth than on such or such extrinsic circumstance which may affect our mental vision at the moment. I suppose mine was affected by the mist and rain which graced the capital of Piedmont on the morning of my arrival there. Another incident, microscopic, and almost too ludicrous to mention, had no less its weight in the scale of prepossession. I was tired and hungry, and, while the *diligence* was being unloaded, I entered a *caff  * close by, and called for some buttered toast. My hair (I had plenty at that time) stood on end at the answer I received. There was no buttered toast to be had, the waiter said. "It was not

the custom." I confess I augured ill of a city from whose *caff  s*, unlike all others throughout Italy, such a staple of breakfast was banished.

I am fond of buttered toast, I own. If it is a weakness, I candidly plead guilty. My mother—bless her soul!—brought me up in the faith of buttered toast. I had breakfasted upon it all my life. I could conceive of no breakfast without it. Hence the shock I felt. "Not the custom!" Why not, I wondered. A problem of no easy solution, I can tell you! It has been haunting me for the last seven-and-twenty years. If I had a thousand dollars,—a bold supposition for one of the brotherhood of the pen,—I would even now found a prize, and adjudge that sum to the best memoir on

this question:—"Why is buttered toast excluded from the *caffés* of Turin?" It is not from lack of proper materials,—for heaps of butter and mountains of rolls are to be seen on every side; it is not from lack of taste,—for the people which has invented the *grisini*, and delights in the white truffle, shows too keen a sense of what is dainty not to exclude the charge of want of taste.

"Pray, what are the *grisini*? what is the white truffle?" asks the inquisitive reader.—The *grisini* are bread idealized, bread under the form of walking-sticks a third of a little finger in diameter, and from which every the least particle of crumb has been carefully eliminated. It is light, easy of digestion, cracks without effort under your teeth, and melts in your mouth. It is savory eaten alone, excellent with your viands, capital sopped in wine. A good Turinese would rather have no dinner at all than sit down to one without a good-sized bundle of these torrified reeds on his right or left. Beware of the spurious imitations of this inimitable mixture of flour, which you will light on in some *passages* in Paris! They possess nothing of the *grisini* but the name.

"I have it!" I fancy I hear some imaginative reader exclaim at this place. "The passion for the *grisini* accounts most naturally for the want of buttered toast in Turin. Don't you see that it is replaced by the *grisini*?"

A mistake,—a profound mistake. *Grisini* are never served with your coffee or chocolate. Try again.

The white truffle,—white, mark you, and not to be confounded with its black, hard, knotty, poor cousin of Périgord,—well, the white truffle is — the white truffle. There are things which admit of no definition. It would only spoil them. Define the Sun, if you dare. "Look at it," would be your answer to the indiscreet questioner. And so I say to you,—Taste it, the white truffle. Not that you will relish it, on a first or second trial. No. It requires a sort of initiation. Ambrosia, depend upon it,

would prove unpalatable, at first, to organs degraded by coarse mortal food. It has,—the white truffle, I mean, not the ambrosia, which I have never tasted,—it has a shadow of a shade of mitigated garlic flavor, which demands time and a certain training of the gustatory apparatus, to be fully appreciated. Try again, and it will grow upon you,—again and again, and you will go crazy after the white truffle. I have seen persons, who had once turned up their noses at it, declare themselves capable of any crime to get at it. Nature gave it to Piedmont, "*e poi rompe la stampa.*" Gold you may find in different places, and under different latitudes;—the white truffle is an exclusive growth of Piedmont.

To return. If it is not the want of proper materials, or of taste to use them, what can be the cause of the unjust ostracism against buttered toast?

A Genoese friend of mine accounts for it on' the same principle on which another friend of mine, a Polish refugee in London, accounted for the difference, nay, in many points, the direct opposition, between English and French habits of life,—that is to say, on the principle of national antagonism. Why does the English Parliament hold its sittings at night? my Polish friend would ask. The reason is obvious. *Because* the French Parliament sits in broad day, when it sits at all. Why is winter the season of *villeggiatura* in England? *Because* in France it is summer and autumn. Why are beards and moustaches tabooed in Great Britain? *Because* it is common to wear them in France. Why are new pipes preferred in England for smoking? *Because* in France the older and more *culottée* a pipe, the more welcome it is. And so on, *ad infinitum*.

Arguing on the same principle, my Genoese friend avers that buttered toast is proscribed at Turin *because* it is so justly popular in Genoa. The Genoese, in fact, excel in the preparation of that dainty article. They have, for the purpose, delicious little rolls, which they cut

in two and suit to all tastes and whims. The upper or under crust, soft or hard, deep brown or light brown, with much or little butter, with cold or hot butter, with butter visible or invisible:—be as capricious in your orders as you like, and never fear tiring the waiter. Proteus himself never took so many shapes.

There is some speciousness in my Genoese friend's argument. The *Superba*, naturally enough, cannot forget that she was first and is now second. Turin, on her side, does not intend to have her official supremacy disputed. No wonder that the two noble cities should look at each other rather surlily, and stick to their own individuality. "Hence it is," concludes my friend, "that the comparatively easy Apennines have proved to this day an impassable barrier to the buttered toast on one side, and to the *grisini* on the other."

"But not so to the white truffle," I put in, triumphantly. "The Genoese have adopted that; and honor to them for having done so! What do you say to this, eh?"

My friend scratched his head in quest of a new argument. We will leave him to his embarrassment, and have done with this string of digressions.

I was saying, that my first visit to Turin dated as far back as 1831. On that journey I had a singular travelling-companion, a beautiful fish, a John Dory, carefully wrapped up, and neatly laid in a wicker-basket, like a babe in its cradle. The officers of the *octroi*, who examined my basket, complimented me on my choice,—nay, grew so enthusiastic about my John Dory, that, if I remember right, they let it pass duty-free. The mistress of the house, at whose table it was served, paid it a well-deserved tribute of admiration, but lamented the unskilfulness of the hand which had cleaned it: "How stupid to cut it to the very throat! See what a gap!" I laughed in my sleeve and held my tongue. It was a frightful gap, to be sure,—but not bigger than was necessary to admit of an oilskin-covered parcel, a pound at least in weight, a parcel full

to the brim of treasonable matter, revolutionary pamphlets, regulations of secret societies, and what not. My John Dory was a horse of Troy in miniature. But Turin stood this one better than Troy the other.

Turin was, or seemed to me, gloomy and chilly at that time, though the season was mild, and the sky had cleared up. Jesuits, carabinieri, and spies lorded it; distrust was the order of the day. People went about their business, exchanged a hasty and well-timed *sciaô*, (*schiavo*,) and gave up all genial intercourse. Far keener than the breath of neighboring snow-capped Mount Cenis, the breath of despotism froze alike tongues and souls. How could buttered toast, emblem of softness, thrive in so hard a temperature? I left as soon as I could, and with a feeling of relief akin to joy.

I was in no haste to revisit Turin, nor, had I been, would circumstances have permitted my doing so. The fish had a tail for me as well as for many others, and a very long tail too. Most of the years intervening between 1831 and 1848 I had to spend abroad,—out of Italy, I mean. Time enough for reflection. Plenty of worry and anxiety, and difficulties of many a kind. Rough handling from the powers that were, cold indifference from the masses. A flow of gentle sympathy, now and then, from a kindred heart or two,—God bless them!—a live spring in a desert. A hard apprenticeship,—still, useful in many ways, to develop the sense of realities, to teach one to do without a host of things deemed indispensable before to keep the soul in tune. I declare, for my part, I don't regret those long years of erratic life. I bless them, on the contrary; for they opened my eyes to the worth of my country. The right point of view to take in physical or moral beauty, in its fulness, is only at a distance.

The great convulsion of '48 flung wide the gates of Italy to the wanderer, and I returned to Turin. I had left it at freezing-point, and I found it at white-heat. Half Europe revolutionized,—France a

republic, Vienna in a blaze, Hungary in arms, Radetzky driven out of Milan, a Piedmontese army in Lombardy,—there was more than enough to turn the heads of the Seven Sages of Greece. No wonder ours were turned. Serve a splendid banquet and pour out generous wine to a shipwrecked crew who have long been starving, and ten to one they will overfeed themselves and get drunk and quarrel. We did both, alas!—and those who are drunk and quarrel are likely to be overpowered by those who keep sober and united. We were divided about the sauce with which the hare should be dressed, and, in the heat of argument, lost sight of this little fact, that a hare, to be dressed at all, must first be caught. The first reverses overtook us thus occupied. They did not sober us; quite the contrary; we fell to doing what Manzoni's capons did.

By-the-by, since that revered name comes under my pen, I may as well state, what every one will be glad to hear, that the author of the "Promessi Sposi" has perfectly recovered from his late illness. It cannot be but that the wail of a nation has reached even across the Atlantic, without the aid of an electric cable. He looks strong and healthy, and likely to be long spared to the love and veneration of his country. I have this on the authority of a witness *de visu et auditu*, a friend of his and mine, who visited the great man, not a fortnight ago, in his retreat of Brusuglio, near Milan.

To leave the author for his book. Do you recollect Renzo tying four fat capons by the legs, and carrying them, with their heads hanging down, to Signor Azzecagarbugli,—and the capons, in that awkward predicament, finding no better occupation than to peck at each other? "As is too often the case with companions in misfortune," observes the author, in his quiet, humoristic way. We were just as wise. Instead of saying, *Mea culpa*, we began to recriminate, and find fault with everything and everybody. It was the fault of the Ministers, of the *Camarilla*, of the army, of the big epau-

lets, of the King. Dynastic interest, of course, was not forgotten in the indictment.

Dynastic interest, forsooth! So long as it combines and makes but one with the interest of the nation, I should like to know where is the great harm of it. As if kings alone were defiled with that pitch! As if we had not, each and all of us, low and high, rich and poor, our dynastic interest, and were not eager enough in its pursuit! As if anybody scrupled at or were found fault with for pushing on his sons, enlarging his business, rounding his estate, in the view of transmitting it, thus improved, to his kindred and heirs!

But who thought of such things under the smart of defeat? I do not intend, by this *post-facto* grumbling, to give myself credit for having been wiser than others. By no means. I played my part in the chorus of fault-finders, and cried out as loud as anybody. The upshot was what might have been expected. Independence went to the dogs—for a while. Liberty, thank God, remained in this little corner, at least,—liberty, the great lever for those who use it wisely. I know of nations, far more experienced than we are in political matters, and whose programme in 1848 was far less complicated than ours, who cannot say as much for themselves.

The times were unpropitious to the buttered-toast question, and it had quite slipped out of my mind. I have never traced the string of associations which reminded me of it, on one certain morning. Once more I made bold to ask if I could have buttered toast. "Impossible," said the waiter, curtly. I was piqued. "How impossible?" said I. "Erase that word from your Dictionary, if you are to drive the Austrians from Italy. Take a roll, cut it in halves, have it toasted, and serve hot with butter." Long was the manipulation, and the result but indifferent,—the toast hard and cold, the butter far from fresh; but it was a step in advance, and I chuckled over it. For a short time, alas! Mine was the fate of

all reformers. Routine stood in my way. The waiters fled at my approach, and vied with each other as to who should *not* serve me. I gave up the attempt in disgust. Shortly after, I left Turin,—without joy this time, but also without regret.

Ten years have elapsed, and here I am again, on my third visit. The journey from Genoa to Turin took, ten years ago, twenty-four hours by *diligence*. Now it is accomplished in four by railway. To say that this accelerated ratio of travelling represents but fairly the average of progress realized in almost all directions, within this space of time, is no mere form of speech. To whatever side I turn, my eyes are agreeably surprised by material signs of improvement. From what but yesterday was waste land, where linen was spread to dry, steam-engines raise their shrill cry, and a double terminus sends forth and receives, in its turn, merchandise, passengers, and ideas. At the gate of the city, so to say, a gigantic work, the piercing of Mount Cenis, is actually going on. Where I left, literally left, cows browsing in peace, two new quarters have risen, as if by magic,—that of Portanuova, aristocratic and rich, and that of San Salvator, less showy, but not less comfortable. A third is in contemplation, nay, already begun,—to be raised on the spot where once stood the citadel, (and prison for political offenders,) of sinister memory, now levelled with the ground. I take this last as a capital novelty. Another, more significant still, is the Protestant Temple, which stares me in the face,—a poor work of Art, if you will, but no less the embodiment of one of the most precious conquests, religious freedom. I would fain not grow emphatic,—but when I contrast the present with the past, when I recollect, for instance, how the Jews were formerly treated, and see them now in Parliament, I cannot help warming up a little. Monuments to Balbo, the stanch patriot and nervous biographer of Dante,—to General Bava, the conqueror at Goito,—to Pepe, the heroic defender of Venice, grace the public walks. One to Gioberti,

the eminent philosopher, is in course of preparation. If these are not signs of radically changed times, and changed for the better, I don't know what are.

Nor is the moral less improved than the material physiognomy of the city. I see a thriving, orderly community,—no trace of antagonism, but a free, good-natured intercourse between all classes, and a general look of ease and contentment. Of course, there are poor in Turin, as everywhere else,—except Japan, if we may credit travellers; but nowhere are my eyes saddened by the spectacle of that abject destitution which blunts, nay, destroys, the sense of self-respect. The operatives, especially,—what are here called the *braccianti*,—this salt of all cities, this nursery of the army and navy, this inexhaustible source of production and riches, impress me by their appearance of comfort and good-humor. It gladdens one's heart to watch them, as they walk arm in arm of an evening, singing in chorus, or fill the pits of the cheaper theatres, or sit down at fashionable *caf  s* in their jackets, with a self-confidence and freedom of manner pleasant to behold. The play of free institutions is not counteracted here, thank God, by the despotism of conventionalities. No shadow of frigid respectability hangs over people's actions and freezes spontaneity.

But this is all on the surface; let us go deeper, if we can, and have a peep at the workings beneath. I knock for information on this head at the mind and heart of all sorts of people. I note down the answers of the Minister and of the Deputy, as well as those of the waiter who serves my coffee and of the man who blacks my shoes, and here is what I find,—a growing sense of the benefits of liberty, a deep-rooted attachment to the *R   galantuomo*, (the King, honest man,) a juster appreciation of the difficulties which beset the national enterprise, (the freeing of Italy from Austria,) and an honest confidence of overcoming them with God's help. This last feeling, I am glad to say, is, as it ought to be,

general in the army. This is what I find in the bulk. There is no lack of dissenters, who regret the past, and take a gloomy view of the future. I describe no Utopia. Unanimity is no flower of this earth.

This improved state of things and feelings, within so short a period of time, reflects equal credit on the people which benefits by it and on the men who have lately presided over its destinies. Among these last it were invidious not to mention, with well-deserved praise, the active and accomplished statesman who introduced free trade, caused Piedmont to take its share in the Crimean War, and last, not least, by a bold and skilful move, brought the Italian question before the Congress of Paris.

During the summer of 1848, I rented a couple of rooms in the Via dell' Arcivescovado. There often fell upon my ear, wafted across the court from the windows opposite mine, a loud and regular declamation. I fancied it was a preacher learning by heart his sermon, or an actor his part. I was told one day that it was Count Cavour, the owner of the house, who, as a prelude to his parliamentary career, was addressing an imaginary assembly. The fact struck me the more, as the Count was not a member of Parliament at the time. He was elected a Deputy and took his seat not long after. I was present at his *début*. It was not brilliant. Count Cavour was not born an orator; his delivery was far from fluent. He had many things to say, and wanted to say them all at once. The sense of the House was not favorable to the new member,—that of the public galleries still less so. No man was less spoiled by popularity than he. I have no other reason for mentioning these particulars than to put in relief the strength of will and the perseverance which one so situated must have brought to bear, in order to conquer his own deficiencies and the popular prejudice, and attain, against wind and tide, the high place he holds in the estimation of Parliament and of the country. That Count Cavour has made

himself, if not properly an orator, in the high sense of the word, a nervous, fluent, and most agreeable speaker, is sufficiently attested by the untiring attention with which his speeches, occupying sometimes two whole sittings, are listened to in both Houses. He never puts them in writing, and seldom, if ever, makes use of notes.

Life is substantial in Turin, and on a broad, homely scale. By which you are not to understand, either that the male portion of the inhabitants feast on whole oxen, like Homer's heroes, or that the fair sex are draped in tunics of homespun wool, like the Roman matrons of old. They are not so primitive as that. You may have at any restaurant a smaller morsel than an ox or even an ox's shoulder; and as to ladies' finery, there is no *article de Paris*, no indispensable utility, no crinoline, hoop, or cage, of impossible materials, shape, and dimensions, which you may not find under the Portici, or in Vianuova,—a facility of which the Turinese beauties give themselves the benefit rather freely. What I meant to say, when I spoke of life on a broad, homely scale, was simply this:—that in Turin, generally speaking, the great art of putting the appearance in the place of the substance, and juggling the principal under the accessories, has yet to be learned. If you ask for a room, a dinner, a bath, they take you in good earnest, and supply you with the genuine article. When I put up at the *Hôtel de Londres*, from which I am writing, I had to run no gantlet between a double line of solemn-looking, white-cravated waiters; yet I have only to ring my bell, to be attended to with promptitude, with zeal, nay, *con amore*. My kind hostess, Signora Viaren-go, does not wear a triple or quadruple row of flounces, but looks after my wardrobe when I am out, and, if anything wants mending, has it mended. The room which I occupy is not furnished in a dashing style, nor has it a *parquet ciré*, but it is on the first floor, and thrice as large and lofty and half as dear as that I had at Meurice's on the *quatrième*; and a Titan might stretch himself down at

ease on the bed in which I sleep. The dining-room of the hotel is not glittering with gilt stucco and chandeliers; but the dinner served to me there (and served at any hour) is copious and first-rate,—four dishes of *entremets*, butter, *salame*, celery, radishes, to whet the appetite,—a soup,—a first course of three dishes, two of meat, one of vegetables,—a second of three dishes, one of them a roasted fowl,—salad, a sweet dish,—a mountain of Parmesan, or Gorgonzola, with peaches, pears, and grapes, for dessert. Gargantua would cry for mercy. For all this, and a bottle of wine, I pay three francs. For the bath establishment, close by, I lack the satisfaction, it is true, of seeing my revered image reproduced *ad infinitum*, by a vista of mirrors; but I have a bathing-tub like a lake, and linen enough to dry a hippopotamus. If I go to the theatre, (there are five open at this season, November, without reckoning three or four minor ones: Italian opera at the Nazionale and the Carignano; Italian play at

the Gerbino and the Alfieri; French *vaudeville* at the d'Angennes,)—if I go to the theatre, the relative obscurity of the house, I own, allows me to enjoy but imperfectly the display of fine toilets and ivory shoulders; but the concentration of light on the stage enhances the scenic effect, and is on the side of Art. At least, they think so here, and like it so. It is the custom.

This takes me back some twenty-seven years, to the waiter's answer, *à propos* of buttered toast, "It is not the custom," and recalls to me that important question. Well, even that has not remained stationary in the general movement. Not that buttered toast has received its great or even small letters of naturalization. But you have only to ask for it, and it will be served without demur. So far the neck of routine is broken. What next? We shall find out on our fourth visit, if God grants us life. Meanwhile I feel that Turin will be regretted this time.

TWO SNIFFS.

FROM the lounge where Fred Shaw was lying, he could easily look out of the low window into Senter Place, and at the usually "uninterrupted view across the street." Just now it was interrupted so fully with a driving snow-storm, that the houses opposite were scarcely visible. The wind tossed the great flakes up and across and whirled them in circles, as if loath to let them go at all to the ground. There was something lively and merry in it, too, as if the flakes themselves were joyful and dancing in the abundance of their life,—as if they and the wind had a life of their own, as well as poor stupid mortals, that cowered under cover, and shut themselves away from the broad, free air. How foolish it is, to be sure! Here comes one now, turning into the place,—well covered, a fur tippet about

his face,—slapping his arms on his chest,—a defiant smile on his brown face, and a look of expectancy in his eyes. Yes! there they are at the window,—wife and children! The smile melts into a broad laugh, as the snow-flakes dash madly at his eyes and nose. There they are,—rosy, well, and warm! From the warmest corner of his heart comes up a quick throb that takes away his breath;—he runs up the steps,—the door opens,—one, two, three little faces,—it shuts. The snow-flakes gallop on again, madly, joyfully.

Behind the man who ran up the steps, a girl of eighteen walked swiftly and firmly over the drifting heaps on the sidewalk. Her eyes glanced upward at the sky. There are four immense clouds, of a very light gray, with silver edges,

trying to meet over a speck of blue. They tumble and clamber, and press all for the same point; but whether the wind is too variable for them to gather in one mass, or for whatever meteorological reason, she does not guess, but she is attracted to the sky and gazes at it as she walks rapidly on.

Fred recognizes the blue eyes and glowing face, as they go past the window. It is only Sister Minnie. Not coming here, after all! No. And the clouds could not overcome and hide the blue sky. It shone out serenely and hopefully, like Minnie's own encouraging spirit. She breasts the storm gallantly. If she can only get round the corner into C— Street! But here all the tempest seems collected to battle with her. She wraps herself a little closer, and holds her breath. A few steps more,—she turns round,—places her back full at the driving storm,—and draws a long breath. Now for it! The flakes stop suddenly, as if awed by the quiet determination in the young face. They fall to the ground, stilly. The blue sky looks out, the sun shimmers white for five minutes. Minnie walks rapidly,—runs up the steps,—rings,—and takes into the house with her a full, fresh life, that vibrates from cellar to attic in harmonious energy.

The afternoon wanes. Fred has dined. He takes his meerschaum from the teapoy by his side and examines it critically. How for the color? Is it just the right shade to stop? No. A very little darker. This is growing quite beautiful. Almost like an agate. Which of those six is the prettiest, after all? He thinks a seventh, which he remembers lying on Little's mantel-piece, outdoes the whole. That of Little's was not carved, nor silver-mounted even, and yet connoisseurs pronounced it worth a hundred and fifty dollars. Not one of these is worth ten. He smokes again, and looks at the cannel coal as it leaps into flame. The room is very still; not a footfall can be heard in the house;—partly because the doors are hung with a view to silence and the

floors thickly carpeted, and partly because there are only two servants in-doors, and those men. The cook cannot speak English, and Fred's own man, a jewel in his way, is taciturn to a fault. If Fred would be honest with himself, he would acknowledge that the third-hand chatter of anybody's kitchen would often be a delightful relief to his solitude. But then how could he follow up his system of self-culture? That and society are quite incompatible things. However, he yawns fearfully.

But what then? Has the man no mind, no cultivation, no taste? Things do not indicate any such want. The walls of the room in which he is just now lounging have their crimson and gold almost covered with pictures,—copies of rare Murillos and Raphaels, and an original head of a boy, by Greuze, with the lips as fresh as they were a hundred years ago. An exquisite "Dying Stork," in bronze, stands on a bracket below Sassoferrato's sweetest Madonna, and Retzsch's "Hamlet" lies open on a side-table. The three Canovian Graces stand in a corner opposite him, and he glances at the pedestal which stands ready to receive "Eve at the Fountain." The pedestal has been there two weeks already, waiting for the "Oxford" to arrive with its many precious Art-burdens. It stands near the window; it will be a good light for it. Fred wishes, for the hundredth time, that it would come along. There are books, surely? Oh, yes, one side of the room is a complete bookcase,—tasteful, inside and out.

The small room which opens into this luxurious sitting-room has a high north window, and near it stands Fred's easel, with a half-finished head on a canvas. Already it has changed its aspect twenty times. Sometimes it is a Nymph, sometimes a Naiad, sometimes Undine. Once, he dashed all the green of the wood-nymph's forest, with one stroke, into green water, intending to put in Undine, with a boat. He has not fulfilled his intention; but he works on, with the luxurious abandonment of genius to its spell, be it what

it may. He does not care what it ends in. One of Fred's theories is, that the imagination, by constant and intense exercise, may so project the image it conceives, as to make it the subject of ocular contemplation and imitation. Why not? All objects of sight are painted on a flat surface, and it is by experience, comparison, nay, in some measure by the will, that we get our ideas of their shape and distance. Poor Blake's insane painting of imaginary heads, which he saw three or six feet from him, was the only true and rational method of painting at all. Think of your thought,—intensify it,—create it,—create it perfectly,—define it carefully,—group it gracefully,—color it exquisitely,—project it, by an intense effort of the will, into the space before you. There it stands. Now paint it.

He is fond of dwelling on this theory; and as nobody takes the trouble to contradict him, he has come to believe it truth, through hearing it often repeated. He has explained it to Minnie more than twenty times, and says he is almost ready to paint. Not quite. He must lie on the sofa a year, perhaps two years longer, before he will be able to satisfy himself. But then, what is a year, two, ten years, in an eternity of fame?

The conception being completely projected from the brain in a visible form, what remains but the mechanical imitation of it? Anybody can do that. *The* thing is the conception. In vain Minnie suggests the vulgar notion of acquiring facility by drawing and copying things in general.

"Entirely unnecessary, Minnie. What! is not genius before rules? Why should I imitate Titian's tints, when I can copy my own fancies? When I get my ideal perfected, you will soon see it real. I can copy it in half an hour. If it is in me, it will come out of me, like Curran's eloquence."

"But," says Minnie, doubtfully, looking at the easel where the golden curls and heavenly eyes of an angel are obscured by the russet-brown of a beginning wood-

nymph, "why don't you keep to one idea, Fred?"

"Oh, because I choose to be fancy-free. I will not have my imagination trammelled. Let it wander at its own sweet will. You will see, Minnie, by-and-by. Now, here I have been getting up a head,—not painting it, you know. Sometimes I can almost see the eyes. But they elude me,—I haven't quite command of them yet. But I shall get it,—I shall get it yet!"

Minnie remembers the same things said to her ever since she was a child. Fred used to tell it all over to her then. He was so much older than she was,—fourteen years,—that she was quite flattered by being thought worthy to listen to his theories of all sorts. However, since she had come to think for herself, one by one all these theories had faded out of her mind and seemed like last year's clouds. She had discovered that it was useless to controvert them, and generally listened with some pretence of patience. The last time she had said, at the first pause,—

"Now, Fred, I must go. But I want you to contribute a little, if you will, to my poor's library,—and if you will, a little, too, to poor Sophia."

"Little Sister Minnie," answered Fred, curtly, "don't annoy me. If you enjoy digging out beggar-women, and adorning them with all sorts of comforts and pleasures, do it. I don't ask you not to. Will you give me the same privilege of following my own pleasure?"

"But, Fred!" said Minnie, astonished, "only last week, what did you do for poor Sophia? More than I could in a year,—two, three years! For you know I have only my thirty dollars quarterly for everything, and sometimes I have so little to give!"

"Why do you give, then, dear Minnie?" said Fred, languidly smiling.

"Oh, if you ask that, why did you give, last Monday? You gave—let me see—fifty-four dollars; every cent you had in your purse. Oh, the things I bought for her with it! Paid rent, bought

medicine, blankets,—oh, so many needed comforts! Now, why did *you* give?" said Minnie, with a triumphant smile,—“for now I have him,” she thought.

“To save myself pain,—that’s all.”

Minnie looked puzzled.

“Nothing else, I do assure you. No very great virtue in that. The fact was, I was bored, and, to tell the truth, somewhat shocked, by your ‘poor Sophia’s’ ailments, which I came upon so inopportunately,—and I was glad to empty my pockets to get rid of the uncomfortable feeling.”

“Well, then, save yourself pain again, Fred,—for I assure you she suffers constantly for want of simple alleviations, which a small sum of money would afford her. Oh, she needs so many things, and everything is so dear! And she has so many helpless children, and no husband, and so bowed with rheumatism!”—

“Minnie! excuse me for interrupting you; but can you find nothing but rheumatism to talk about? It is of all subjects the least tasteful to me.”

“My dear Fred!” And there Minnie stopped. She was both hurt and puzzled.

Fred laughed. His good-humor returned at the sight of her mystified face, and the opportunity of explaining some of his theories of morals.

“In the first place, Minnie, what do we live for?”

Minnie had not thought. She was only eighteen, and had acted.

“Well, I dare say you have never considered the subject. I have, a great deal. You see, Minnie, we are born to pursue happiness. You allow that.”

“Yes,—I suppose so,” said Minnie.

“Well, then, if I look at the wrong thing, and call it happiness, it is my mistake, and I only shall pay for it. You find your happiness in an active life and works of mercy. Very well, do so. You devote a certain part of your income, small as it is, to that sort of pleasure. I devote mine to my pleasures. They are different from yours. You might call them selfish. What then? So are yours.

I don’t say you are not modest and humble, and all that; but you do enjoy your old women, and your fussy charity-schools. Very well. That is all I do with my drawing, my lounging, my smoking, my reading. And I think, Minnie,” added Fred, laughing, “I have the added grace of humility; for I am far from making a merit of my sort of life.”

“No,—it would be difficult to make a merit of it,” said Minnie.

That was clear enough. Fred loved to have her for an auditor. So long as she could not see over him, he was as good as infinite to her.

“In the first place, Minnie, you must allow, it is a duty to surround ourselves with the beautiful in all things. It conduces to the highest self-culture; and self-culture is our first duty.”

“Is it? Surely, it cannot be! Oh, you mean we ought rather to attend to our own faults than those of others?”

“I mean as I say. Self-culture is our first duty, both moral and intellectual. I might add, also, that to take care of Number One is a dictate of common prudence. You allow that? Well. First, then, the body cared for, all right. Then the morals,—attend to your own, and let other people’s alone. Then, thirdly, your intellect. Now, then, it becomes a positive duty, ‘the duty that lies nearest to me,’ to cultivate that. And to do that, Minnie, I am obliged to draw on myself to my very last dollar. To refine the taste by familiarity with the highest objects of taste, to appreciate Art, to develop the intellect, to bring one’s self to conceive and grasp the Universal, the Beautiful, to raise one’s self in the scale of created things by creative fancies imitating the Highest,—ah! in fact, Minnie, self-culture becomes a duty,—indeed, our first duty.”

Something in Minnie’s face—it was not a smile—made Fred turn the subject a little.

“Now, really, if every one would take care of one, and that one himself, don’t you see there would be no more want or suffering in this weary world? no more

need of blankets or dispensaries? Each is happy, comfortable, and self-cultured in his proportion. A universal harmony prevails. Like the planets, self-revolving, and moving, each in his chosen orbit, they shout and sing for joy. How much better this than to be eccentrically darting off in search of somebody's tears to wipe, somebody's wounds to bandage,—who, indeed, would have neither wounds nor grief, if they would follow my simple rule!"

Minnie laughed a little at her brother's grave sophistry, but had no wish to contest the point with him.

"It is no merit in me, but, as you say, rather self-indulgence, to be looking up and relieving destitute cases. But it would be merit in you, if you don't like it; and you might have all that, and none of the annoyances."

Her bright face glowed; and Fred liked to look at her when she was excited; the coloring beat Titian's, he thought.

"You don't know how painful to me it is to hold out empty hands to so many sufferers"——

But now Minnie's face looked so sorrowful that there was nothing specially beautiful in the coloring, and Fred said, impatiently,—

"You bore me, Minnie. I am waiting to take my afternoon nap."

And he turned positively over towards the wall.

The sight of Minnie, swiftly walking through the driving storm to-day, brought up to Fred's memory all the talk they had had in that very room, he lying in the same place, a fortnight ago. Since that day he had not seen Minnie, except casually; and, indeed, she seemed very busy and very happy, if one might judge by her lighted face and her laden arm. Something keener than philosophy, subtler than Epicurus, pricked Fred, as Minnie vanished into the cloud of snow-flakes.

"Pshaw!"

He glanced around the apartment. It was still luxurious; but "custom had

staled the infinite variety" of its ornament and furnishing. Already he was dissatisfied with this and that. Where to place a new bas-relief that had struck him at Cotton's the day before, and which he had purchased on the spot, without considering that there was no room for it in the library? There it leaned against the wall,—not so big as the Vicar's family-picture, but quite as much in the way.

"The room looks loaded. I ought to have a gallery for these things. I wonder if I couldn't buy Carter's house, and push a gallery through from the top of my stairway."

He touched the bell, and lay down again.

Martin entered softly, let down the crimson curtains, so as to exclude the vanishing light, and stirred the crimson cannell into a newer radiance.

"This weather frets my nerves, Martin. My face aches. Give me the bottle of chloroform in my chamber."

He inhaled the subtle fluid two or three times, and handed it back to Martin. It made no difference, he said. He would try to sleep. So Martin went out on tiptoe and closed the door.

The chloroform probably did relieve him, for he thought no more of the uneasiness in his face; but he was not only not at all sleepy, but every sense seemed wide awake,—wide awake to its utmost capacity of perception. It was as if a misty veil were suddenly removed from before his eyes, and he saw, what indeed had always been there, but what in his abstraction or inattention he had never before noticed. For instance, he noticed at once that Martin had not quite closed the curtains, but had left an inch or two open, and the window open besides. The air, however, had grown soft, and the wind must have gone down, for it did not stir the drapery. He looked again, to be certain he was right. Yes,—there was an inch clear, where the wind might come in, if it liked. Martin was growing blind or stupid. However, he did not so much think that. On the whole, it was more likely that his own

senses were sharpening. That would be a good thing, though,—to be wiser and sharper and clearer-sighted than all the rest of the world! He would like that advantage. And why might he not have it? Already he perceived a marked difference from his usual sensuous condition. It was unnatural, preternatural,—and yet, a state which could be produced at will. It was easily done. Just homœopathy, in fact. A little sniff, a minute dose, and he could see and hear with a miraculous clearness; but people would take a dozen, and then they grew stupid.

He looked again around the room. Was it fancy, now? Perhaps it was. It was not likely the Madonna was winking in a heretic's parlor. Besides, it was the same sort of no-motion he had watched many a time in the twilight, when the door seemed to swing backward and forward in the dusky air, following the dilation and contraction of his own eyes. He tried it now on the Madonna. He opened his eyes as widely as possible, and the drooping lids of the picture evidently half-raised themselves from the dark, soft orbs. He nearly closed his own, and hers bent again in serenest contemplation.

He looked at the bronze figure of the "Dying Stork," which was placed below the picture, and started to see that it moved also, and with a strange, unnatural, galvanic sort of movement, like the "animated oat," which moves when placed on the hand after being warmed a moment in the mouth. The legs sprang against the reeds and flags, in the same way.

Lastly, he looked at the bas-relief which stood near, leaning against the wall. It was very, very strange. Had the old fable of Pygmalion a truth in it, then? And could the same genius that created also give life and warmth to its productions? Beneath the marble he could see the soft, living pulse, distinctly; and the wind that blew over the mountains, beyond the river, ruffled the waves about the tiny boat. Even the star above

the child's head sparkled in the depths of the sky.

Fred was delighted. "It is enchantment!" he said. But no,—it was one of those miracles that have not yet become commonplace. The poetic life that his perceptions were now able to enjoy, in inanimate nature, would be such a perpetual gratification to his taste,—such an incentive to explorations and discoveries! He could not felicitate himself enough.

"A thousand times better than the microscope," said he to himself again. "Atoms are annoying and disgusting to look at, with their incomprehensible and frightful minuteness, and their horrible celerity. One does not like to think that everything is composed of myriads, be they ever so beautiful,—which they are not, that ever I could see, but chiefly all head or a wriggling tail. Bah! This is much better. Hark! I can hear the waves dash,—the hope-song of the child,—and the breeze moving against the delicate sails!

"How delightful it will be to travel, with this new-found faculty! Whenever I choose, I can have the talking bird, the singing tree, and the laughing water! I always thought those peeps into irrational nature the chief charm of the Arabian tales. How little did I dream of ever being able to read with my own eyes the riddle of the world! By-the-way, let me look at my Graces, and see if they, too, are conscious forms of beauty."

He turned to the group. Alas! even the Graces were not proof against the ordeal of constant society. Perhaps, if he had reflected, he would not have expected it. In truth, it was surprising to see how many disagreeable sentiments they all three contrived to express, without untwining their arms, or loosening their fond and graceful hold on each other. A slight elevation of the eyebrow, a curve of the lovely mouth, or a shrug from the Parian shoulders,—how expressive,—how surprising! But Fred need not have been surprised; they never set up for Faith, Hope, and Charity. What he most wondered at was that they still

looked so lovely, when they were clearly full of all pagan naughtiness. They might as well have been women.

Fred pondered on this for some time. Then, it seemed, everything had a latent life in it. He had suspected as much. "There is always a something," said he, "in what we make, not only beyond what we intend to make, but different from it. We study a long time the powers of position,—in chess, for example;—how much is produced by one move that we did not anticipate, and perhaps cannot ascertain,—certainly not prevent! How many times we are wittier than we meant to be,—striking out, by our unconscious blow, thoughts related to the one we utter, but far more brilliant,—and ourselves becoming conscious of the very good thing we have said only by its effect on the company! So it is, I fancy, with all our mental movements. The brain acts independently of the will in sleep. Why not, in a great measure, when awake? Probably, as all Nature has a movement of its own, so all Art may be made to have, by the infusion and absorption of so much of the creative energy of the artist,—hidden to the common eye, but palpitating to the instructed touch, throbbing or sparkling to the instructed eye. Yes, it must be so. The south-wind sighs a thousand times more mournfully through the keyhole than Thalberg can make it do on the piano. What music there was in those stones the man brought round, the other day, and played on with a stick! And now, the sound here from the gas-tube, how wailing, how sorrowful!—now, how triumphant!"

Fred was so delighted with watching the gas-burner, and listening to the wild music which floated through it, that he did not at first observe that the wind had risen and was blowing almost a gale. Presently, in his speculations as to the cause of such a sudden flood of melody, he hit on the possibility of a current of air.

"But, then, how comes the air to be so full of music? Never mind,—I'll put the window down."

However, just as he was putting it down, a snow-flake, one of a hundred, all pressing for the same point, flew past him, and alighted on the green velvet tabouret.

It was nothing,—only a snow-flake,—and another time, Fred would have thought nothing of it. But in the novel awakening of his faculties, even a snow-flake had a new interest. With intense eagerness he watched the movement of the little thing,—and yet, feeling that he might be on forbidden ground, he had the presence of mind to seem not to see or hear. If inanimate Nature were once to suspect his new insight, what a bustle there would be! He almost closed his eyes, and lay still, where he could watch and yet seem asleep. His prudence and caution were well rewarded.

The snow-flake was, as he suspected, as much alive as the wind; and that was singing, shouting, dying away in ecstasies, at this very moment.

He glanced at her. Lithe, sparkling, graceful, she gathered her soft drapery about her, and stood poised delicately on one foot, while she looked around the apartment in which she found herself. Fred could see that she was moulded more beautifully than the Graces,—by so much more as Nature is fairer than all Art,—and that she had an inward pure coldness, beside which Diana's was only stone. Yet it was not indifference, like that of the wild huntress,—not an incapacity to feel, but only that her time had not come; when it should, she would melt as well as another. Now she stood still and calm. She did not once look at him. She had seen human beings before,—plenty of them. Something else attracted her,—thrilled her, evidently; for the faintest rose-color suffused her beautiful form; she changed her attitude, and bent forward her graceful head.

Something about "warming his hands by thinking on the frosty Caucasus" passed through Fred's mind, and some law of association impelled him to look at the fire. It was queer enough, that, as many times as he had looked at that fire by the

hour together, he had never before noticed its shape or expression. Only last night, he had watched it, dancing and flickering just as it did now, and never once suspected the truth!

Mailed figures! Yes, plenty of them,—golden-helmeted and sworded like the seraphim! A glorious band, gathering, twining, shooting past each other,—jousting, tilting,—with blazing banners, and a field broader than that of the “Cloth of Gold”; for this reached to and mingled with the clouds,—yea, tinted them with flame-color and roses,—and garlanded the earth with crimson blossoms that nestled among her forests on the far-off horizon. What a wide field, indeed! And how far might these blazes and flames go, when once they set out? To the stars, perhaps. Fred did not see what should stop them. The atmosphere might, possibly. He must study that out.

Meanwhile how strangely far he could see! What a power it was! What a new interest it gave to Nature! Nature, he must confess, had always seemed rather flat to him, on the whole. He had always liked the imitations better than the original,—pictures better than people,—busts better than philosophers. But now the case is altered. He has got what his friend Norris calls “glorification-spectacles.” Now he can have perpetual amusement. Why, it is vastly better than Asmodeus peeping in at the tops of houses. By the same token, snow-flakes are more interesting than humanity.

Speaking of snow-flakes, what does he see, but that she is evidently yielding to the soft enchantment of the nearest flame-god,—drawn thither by resistless affinity, and melting, in his burning arms, to the most delicate vapor! Snow-flake no more, yet not absorbed nor lost! Rather taking her true place, transported from the earth-tempests to a warmer and higher sphere of action.

That might be, but not yet. In their new vaporous condition, in which both had lost some of their prominent qualities, they had acquired new relations, perhaps new duties. At all events, they

did not at once ascend to their kindred ether,—but swam, glided, floated, above and around, and finally separated. Watching them keenly, Fred could distinctly see that the some-time snow-flake left her sphere and came gradually towards himself. As the vaporous shape floated nearer, it also grew larger, so that, although Fred could not have said certainly that the size was human, it relieved him from the impression of any fairy or elf or sprite. No, it was nothing of that sort. It was just the gentlest, calmest, serenest face and form in the world,—with the same look of pure sweetness he had noticed on her first entrance,—with a peculiar surprised look in her wide-open eyes, that he had seen but in one human face. As well tell the truth,—the face, expression, and all, were as like Annie Peyton’s, as her portrait, drawn in water-colors, could possibly have been.

The shape sat down by him,—her vaporous garment still folding softly around her, and her clear, open eyes fixed on him. There was no need of speech, for he read her face as if written by Heaven’s own hand; and the coarse and selfish philosophy which had sufficed partially to stun and confuse Minnie fled at the presence of the spirit. Not a word still from the calm, sweet face. It looked on him with pity and surprise. Then all the ideas and convictions that throng on the mind warped, but not lost, pressed on him. He hid his face in the sofa-cushions.

His presence of mind returned as a new thought struck him. It was an ocular delusion, surely. He sprang up, took three or four turns across the room, rubbed his eyes smartly, and took his seat again. For a moment he would not look towards the chair. When at last he did look, the airy, soft form was still there, looking steadily into his eyes.

“What an idea!” exclaimed he, impatiently. “I might put my hands through it, like the flame of a candle. It is nothing but vapor. What is it made of? Nothing but a snow-flake and the gas from cannel coal. I saw it, myself, melt-

ing and falling together into this beautiful shape. But then it is only a shape. It is not a body. Oh, but then it may be a soul! Who knows what souls are made of? Snow-flakes and vapor, perhaps. Who knows, indeed?"

He looked about the room. Everything was in its natural and usual place. The fire burned merrily; the wind swept fitfully without, and all was quiet within. A very uncomfortable feeling, of mingled awe and curiosity, took possession of him. He did not quite like to look at the shape. He thought,—

"Can this be the spiritual body that St. Paul says is to supersede the natural one? If this is, indeed, the soul of Annie Peyton,—why, she knows, somehow, what is in mine. And, by Jove! I can see her soul now, too, without any trouble! She can't hide her real feelings now from me, any more than I can my character from her. There's some good in it, anyhow!"

With some effort, he raised his eyes,—very respectfully, indeed; for though he was only about to look at a soul, he was full as much overpowered as if it had been the body. His eyes fell.

"If I dared to look! But she knows how I feel. I suppose she sees me now,—shivering from head to foot like a—¹ Somehow, I can't look her in the eyes. However, this won't do!" And he looked quickly and timidly into the now smiling face.

He need not have been so timid. If a soul could discern evil, it could, also, good; and this spirit was quick to see the last. Without a word,—but when were words necessary to souls?—with only a glance, she expressed so much love and pity for him, that Fred was ashamed to look her in the face. "Oh! if she could really see him," he thought, "would she look so?" Perhaps so. For the Intelligence that sees the evil can clearest of all see the mitigations, the causes, and the sore temptations; and the fruit of the widest knowledge is the widest love.

Something like this passed from the soul that sat opposite Fred into his awakening and sensitive consciousness:—

"You have never tasted the pleasures of useful activity," the sweet face said. "Come with me, and we will look together, and see what good may come, and also what enjoyment, from it."

Now it was, for the first time, that Fred fully understood his position. It came like a gleam of light on his puzzled intellect, and made that quite clear which had before been so mystical and clondy, that he had been ready to rub his eyes, and to doubt, almost, the evidence of his senses. He remembered his old and a thousand times repeated theory of "projected images." Here it was. Instead of a fancy, a thought, here was the whole of Annie Peyton's soul (which, to be sure, had often enough occupied his mind) projected from his own, perhaps, so as to be a subject of contemplation to his bodily eyes. Or, what was more likely, the soul itself of Annie Peyton might have left her body for a time in a dream. It was among the possibilities, though he had never before believed it to be. But then, again, how could his soul go off on an exploring tour with Annie's? His soul was safe in his body, and that, namely, the body, lying on the sofa,—the room close, the window down. Just then, he glanced toward the window, and remembered that he had not fastened it at all. There was room enough for a soul to pass easily. But then, again, how was his soul to pass,—to get out, in the first place, of his body? Easily enough. The concentrated effort of will, which could give shape to a fancy, and place it outside the eye, could, by sustained action, separate all the perceptive powers from the senses,—in short, the spirit from its envelope.

"To know, to perceive, to suffer, to rejoice, do not require skin and bones. The heart weeps while the eye is dry; the lips smile while the heart is breaking. One might have a conventional soul,—to keep house, as it were, and do all the honors of society, while the real one went abroad to regions of truth and beauty, and bathed in living waters!"

While Fred continued so to think and

speculate, and also to separate, and, as it were, classify his ideas, he was pleased to perceive, that, without any very strong volition on his part, but only from the analytical processes of his reason, that portion of his mind which perceived and enjoyed the truth of things became condensed and separated from the conventional, the factitious, and the merely sensual. The qualities, or states, or whatever the metaphysician calls them, fell off him, as garments do in a dream, and left himself, his very self, separate, and a little distant, from his body. He perceived this rather than saw it. He knew it, but could not assert it. The body, with its bodily wants and limitations, leaned on the couch, half slumberously; while the mind, himself, full of vague aspirations, keen intellectual hunger, and overlaid with error, obstinacy, and the thick crust of self-contemplation, which stifles all true progress,—these assimilated qualities made himself, what he felt he was, not an attractive object to himself more than to anybody else. All his perceptions pointed inward, and cramped and narrowed his existence. He felt very, very small.

"This is strange," he reasoned, "that I should have such a sense of contraction! I crowd on myself, as it were. My thoughts hit me, press me, instead of elevating me. I cannot see why; for the habit of looking up to no goodness or intelligence but the Supreme must surely be a good one, and self-education and development the noblest process for a human being."

He said this in a mechanical sort of way, as if it were a lesson he remembered at school. But it made no impression on him, and did not relieve his difficulty. He knew it, somehow, to be false, and felt it falling off as he spoke, as if it were the last remnant of gauzy sophistry.

Fred had never been fond of church-going, nor was he much given to reading the Holy Scriptures. Indeed, he rather affected the style of the Latter-Day Saints, who look for a better and nobler Messiah than came in the Son of Mary. But just

now, fifty texts of Scripture, which he must have learned long ago at his mother's knee, came crowding upon his memory.

"Though I have all gifts, and have not charity, I am nothing."

"He that is least in the kingdom of heaven is greater than he."

"He that loveth not his brother, whom he hath seen, how can he love God, whom he hath not seen?"

"Little children, love one another."

"Bear ye one another's burdens, and so fulfil the law of Christ."

And so on,—interminably. In a helpless, vague way, he looked at the shadow by his side.

"You like pictures, and paint them," said she, speaking for the first time;—and the voice was precisely the tone he had recognized in the music of the wind; he had thought then it was like hers;—"look with me at these two."

They were, indeed, magnificent pictures. They reached from floor to ceiling. Fred was artist enough to enjoy fully the wide sweep of sky and land,—the mountains in the distance, and the firmament studded with stars. A figure wandered up and down the space, sometimes to the tops of the mountains, sometimes to the clefts of the rocks. When he saw the stars, he calculated their distances;—when he saw the moon, he weighed her, and guessed about the atmosphere on the other side;—when the gold and diamonds shone in the clefts of the rocks, he gathered and analyzed them. The Leviathan he studied and classed. He groped and reached constantly, and, having gathered, looked at his gatherings, dissatisfied. He was ever searching out knowledge. Meanwhile, a gnat put him in a passion, and unleavened bread destroyed his peace. Though he might sleep on rose-leaves, as he could not command the wind, they came often to double under him, and annoy him with bad dreams.

"When shall I be a disembodied spirit, and no longer subject to the petty annoyances that belong to the flesh?"

cried he, fretfully. "My knowledge, too, is a moth,—only vexing me by a sense of the limitations of my condition. If I could grasp Nature,—if I could handle the stars,—if I could wake the thunder,—if I could summon the cloud! That would be worth something,—to send the comets on their errands! But what avails it, to know that they go?—how far from me when they start, and how many millions of miles before they turn to come back? If I could move only one of these subtle energies that mock me while I look them in the face!"

The philosopher dozed. A storm came on, and swept over all creation. When he awoke, it was clearing away, and one side of the heavens was heaped with gold-lined clouds, and the darkness of the other spanned with the seven-hued bow. He looked admiringly at the clouds and critically at the rainbow, and added to his memorandum-book.

"What use?" said he, mournfully; "delicate dew, and refracted light!"

He continued to ponder and murmur, to explore, to ascertain, to grumble. He had rheumatic pains, for the elements had no mercy on him; he rubbed himself as he was able, and added to his stores of knowledge. He was very, very learned. When he reached a shelter, he lay down. If no human love welcomed him, and no gentle lip soothed him, he had self-culture, especially in the sciences.

All this Fred knew as soon as he looked at him.

"If he were wise, he would not stop at knowledge, which is, of course, unsatisfactory,—but dive beyond, as I have done, into the essence of things," said Fred to himself. "If he could pierce through the veil that covers all things, he would find amusement enough to last a lifetime. In vegetable life, the jealousies and passions of flowers,—in the quiet eventfulness of the mineral kingdom, to see forms of living beauty in crystals,—finally, in all the under-mechanism of creation, what a fund of enjoyment and instruction! I think I should never cease to be delighted and entertained."

Fred glanced from the picture to the fireplace. The shovel and tongs were just laughing at him; and though they composed their countenances immediately, he had caught the expression, and was excessively annoyed. Philosophy at length came to his aid, especially as the poker expressed only profound deference, preserving a martial attitude and immovable features. After all, why should he care for a pair of tongs? One must cultivate phlegm, if one is a philosopher; and a shovel, after all, is not so bad as a pretty woman. He heard the cool wind distinctly blowing across the mountains in the picture, and saw the stars coming out again. Then Fred knew he had been looking at a diorama, and that the exhibition was over.

He heard a hearty laugh at a little distance, and perceived that the picture, which at first had seemed to spread out over the whole wall, was really divided into two parts, something like an exhibition he remembered of dissolving views. This was delightful. The first picture faded out into gloom, and gave place to a bright, cheerful room in the third story of a house in the city. There were only two rooms,—this, and a small anteroom. The furniture was simple, even poor. Through the window the snow was seen falling, and the blaze flickered, in cheerful contrast, on the hearth. A woman, neither young nor pretty, stood with an astonished expression, and an elderly man laughed loudly, and sat down before the fire.

"What in the world shall I do?" said the woman.

"Do, my dear?—why, bring me my dressing-gown"; said he, laughing again so cheerily, that it was contagious; and as she brought the coarse wadded garment he asked for, she laughed too.

"A pretty kettle of fish!" said she.

"Yes! Now what shall we do? Not a dollar in our pockets!"

"Nor a coat to your back!" broke in the woman.

Then they both laughed again, loudly and heartily.

Fred remembered now what they were laughing at. The man was a minister, well known in Boston, and the woman was his wife. He had just come in, running through the storm, and almost out of breath.

"Wife! my coat! Don't you see I am in my shirt-sleeves? I've got a snow-bank on my back!"

"Why! where in the world—what have you done with your coat?"

"Oh! that I am almost ashamed to tell you; it seems such a parading sort o' thing to do in the streets! But you may depend, I didn't stand at the corners long, to be seen of men, in this driving storm! Fact was, wife, I just took it off of my back, and gave it to poor old McCarty;—he'd nothing on but rags, and was fairly shaking with the cold. I knew I'd another to home,—and what does a man want of two coats? One's enough for anybody. Besides, didn't our Lord particularly tell his disciples not to have but one? Say, now, wife!"

The wife looked blank and embarrassed.

"Well, wife! what now?"

"Only"—— and she paused again.

"Only what? Out with it! You think it was silly! But, wife, you'd 'a' done the same thing;—you couldn't 'a' helped it, nohow. Providence seemed to 'a' cast him in my way o' purpose. I tell you, wife, it was as plain-spoken as it could be,—'Be ye warmed!' Why, you'd 'a' done the same thing, wife!"

"My goodness! I *have* done it, husband! A man and his wife and three little children came along, not half an hour ago, looking so miserable and cold, that, as I thought, as you say; you had one coat, and that was all you really needed, I just out with the other, and put it on the man's back. The thankfullest creature you ever saw!"

And here the man had broken into the hearty laugh Fred heard.

When the man put on his dressing-gown, which was comfortable for the fire-side, the wife renewed her question. He answered with a bright smile,—

"The Son of Man, my dear, we know, had not where to lay his head; but then he always trusted in God. God never fails his children. Thanks to Him!" added he, reverently, and raising loving eyes to heaven, as if he really spoke to somebody there,—*"Thanks to Him! there's bountiful hands and tender hearts, a plenty of 'em, in the city of Boston. I've only got to strike, and the waters 'll flow out! yes,—rivers of water!"*

The wife looked down, and said, meditatively, "It makes me think what our dear Saviour said to poor Peter,—*'O thou of little faith, wherefore didst thou doubt?'*"

The man answered in a clear, joyful tone, "Oh, you won't doubt more'n half a minute to time, wife!—and I won't doubt at all!"

With that, the two aged Christians struck up a sweet Wesleyan melody; and that, too, was in the same soft minor key that Fred had heard singing through the gas-burner. They finished the little hymn, and the woman scraped some corn from a cob into the corn-popper. In a few minutes, she had filled a large bowl with the parched corn.

"I declare, they look like them hyacinths in the window,—don't they? What a lovely white color!"

"I think, wife," answered the man, as he took a handful of the kernels and looked at them, "this corn is a good deal like human nature. When we're all shut up in ourselves, we're poor creatures;—but touch us with the live coals of the Holy Spirit, and we turn out something refreshing. Fact is, wife, we're good for nothing, till we're turned inside out."

The picture faded. It was a very homely one.

Fred turned to the soul by his side, but she was no longer visible.

"Escaped, somehow! I wonder, now, how?"

But he had scarcely spoken, when he saw, by a slight movement of the door, that she must have gone out that way. It was just closing. With a tremendous

effort of will, he tried to follow her, but in vain. He had been so much in the habit of looking after himself only, that his untrained faculties refused to obey him. As a last resource, he sank passively towards the form which still lay prone on the couch. How he was again to join soul and body he could not guess. But, apparently, there was no difficulty. The spirit which had called him out of himself, for a little while, had departed, and, with her, both the power and the desire of separation. He joined his sensuous existence with ease and pleasure, and with no perceptible lapse of consciousness. No sooner had he obtained the use of his tongue, than he made an inarticulate noise. The door, which had been all that time swing-

ing, opened again, and the velvet-footed Martin appeared.

"Who went out, Martin?"

"Out of here, Sir? No one, Sir."

"Who opened the door, then?—What's that in your hand?"

"The chloroform, Sir, you just handed me."

"Just handed you?"

"Yes, Sir;—you gave it back to me not a quarter of a minute ago."

"Have I been asleep, Martin?"

"I should judge not, Sir. You didn't take more than two sniffs at the bottle. I just had time to go to the door when you spoke to me."

"Martin,—is the window close?"

"Perfectly close, Sir."

"You may go."

PALFREY'S AND ARNOLD'S HISTORIES.*

THE London "Times," in its comments upon a recent desponding utterance of foreboding for our republic, by President Buchanan, in his Fort Duquesne Letter, affirms that the horizon of England is clearing while our own is darkening. Mr. Bright, true to the omen of his name, thinks better of our country. He seizes upon all fit occasions, as in his late speech at Manchester, to hold up to his countrymen the opposite view, so far at least as concerns our republic. He loves to recommend to his constituents American notions and institutions. Perhaps it may be allowed, —though this is hardly to be affirmed, if any decisive argument depends upon it,—

that the peculiar institutions, political and social, of the two nations, have been on trial long enough, side by side, through the same race of men and in the pursuit of the same interests, to enable a wise discernor to strike the balance between them, in respect to their efficiency and their security as intrusted with the welfare and destiny of millions. If we can learn to look at the large experiment in that light, all that helps to put the real issue intelligently before us will be of equal interest to us, from whichever side of the water it may present itself. For ourselves, we believe that the best security against despair for our country is a knowledge of its history. If the study of our annals does not train up patriots among us, we must consent to lose our heritage. We are glad to be assured that our historians do not intend to allow the republic to decay before they have written out in full the tale of its life. Their records, well digested, may prove to be the pledges of its vigor and perma-

* *History of New England during the Stuart Dynasties*. By John Gorham Palfrey. Vol. I. Boston: Little, Brown, & Co. 1858. 8vo. pp. 636.

History of the State of Rhode Island and Providence Plantations. By Samuel Greene Arnold. Vol. I. 1636-1700. New York: D. Appleton & Co. 1859. 8vo. pp. 574.

nence. There are those in the land, who, for reasons suggested by President Buchanan, and for others, of darker omen, to which he makes no reference, do despair, or greatly fear. What with an honest hate of some public iniquities among us,—the tolerance and strengthening of which many of our politicians regard as the vital conditions of our national existence,—and a dread of the excesses incident to our large liberty, it is not strange that some of our own citizens should accord in sentiment with the London "Times." Probably the same proportion of persons may be now living among the native population of our national soil, as appeared at the era of the Revolution, preferring English institutions to our own, and predicting that her government will outlast our own. Discussions raised upon the present aspect of affairs in either country will not settle the issue thus opened. A real knowledge of our own institutions and a reasonable confidence in their permanence are to be found only in an intelligent and very intimate acquaintance with their growth and development. In our histories are to be found the materials of our prophecies.

We welcome, therefore, with infinite satisfaction, the two admirable volumes whose titles we have set down. For reasons which will appear before we conclude our remarks upon them, we find it convenient to unite their titles and to write about them together; but for distinctness of subject and marked individuality in the mode of treatment, no two books can stand more widely apart. Abilities and culture and aptitudes of the very highest order have been brought to the composition of each of them. An exhaustive use of abundant materials, and a most conscientious fidelity in digesting them into high-toned philosophical narrations, are marked features of both the volumes, and we will not venture upon the ungracious office of instituting comparisons, in these respects, between their authors. We must make a slight report of the story of each of them,

and of the method and spirit in which it is told, and then confront them for mutual cross-examination.

Our historians have learned to write their books with full as much reference to their being read abroad as at home. The problem with which they first have to deal, therefore, is, how to make the men and the incidents and the cardinal points of our annals look as large to foreigners as they do to us. Many of our town-histories are written in the tone and style of Mr. Poole's "*Little Pedlington*,"—the epithet *Little* being suppressed in the title, but obtruded on every page. The intensity and emphasis of our historic strain appear to foreigners to be disproportionate to the subject-matter of the story. Mr. Punch always represents a Yankee as larger than his garments. His trousers never cover his ankles; his cuffs stop far short of his wrists; his long neck extends beyond the reach of even his capacious collar; and the bone in him lacks amplitude of muscle. But Mr. Punch, with all his wisdom, does not fully understand the composition of a Yankee, as the greatest common multiple of a Teuton, Dane, Norman, Frank, Kelt, and Englishman. Dr. Palfrey's volume will largely conciliate our cousins beyond the water to our own conceit of our annals, because, more distinctly and cogently than any previous record in pamphlet or folio, it identifies the springs and purposes of our heroic age with an era and a type of men which English historians now exalt on their own noblest pages.

Dr. Palfrey has had precisely that natural endowment, training, experience, mental discipline, and intercourse with the world in public and private relations, to furnish him with the best qualifications for the work to which he has devoted the autumn of an eminently useful and honored life. The sinewy fibre of his theme is religion. And he is a religious man of the highest pattern, deeply skilled in its scholarly lore, erudite in its Scriptural and controversial elements, and practised in the sagacity which it imparts for understanding and interpreting human na-

ture. Religion enters into the subject-matter of his narrative, not so much in its philosophical bearings as in its civic-ecclesiastical and institutional relations; where it becomes the spine of the social fabric, traversed and perforated with the nervous life-chords for all the members of the organism. His education has been that of the highest ideal of New England,—through books and men, through professional duties and public services, bringing him into relations with youth, with men and women, and with the forms and the routine work of civil and political administrations. He has at his command the language of devotion, the rhetoric and logic of philosophy, and the technicalities of jurisprudence. To his personal friends, and they are very many in every walk of life, it is a matter of grateful recognition that he escaped from a political arena whose conflicts were not congenial with his delicacy of taste or of conscience, in season to give the vigor of his best years to the composition of a work which will spread his fame to other lands and identify it forever with what is of most reverent and honored remembrance on his native soil.

The historian's work, when done after the best pattern, involves a duty to his readers and a privilege for himself. To them he is bound to present all the essential facts, authenticated, illustrated, and carefully disposed in their natural relations. For himself, having done this, he is at liberty to construct his own theory, to follow his own philosophy, and to pronounce judicial decisions. The highest exaction to be made of an historian, and the loftiest function which he could claim to exercise, are expressed in these two conditions. The noble privilege and opportunity secured in the latter condition are the only adequate reward for the drudgery of the labor required in the former. It would be foolish to raise a question whether it be more essential for an historian to be faithful in his narration or to be wise in his comments. Only the statement we have made will serve to remind us how essential the philosophy

of human nature is to throw life into a record of old annals.

The two books in our hands, where their specific themes are identical, substantially accord in their relation of facts,—allowing for a few exceptional cases,—but they differ widely in their philosophy. Very much of the fresh interest which both of them will create in their respective subjects will be found in the collisions of their philosophy.

Dr. Palfrey had a favorable opportunity for undertaking to write anew the history of New England. Those who have yet to acquaint themselves with that history say there was no occasion for this reiterated labor. If such persons will merely read over his notes, without wasting any of their precious time upon his text, they will discover their mistake. There are in those notes matters new even to adepts. All the recent materials which have been lavishly contributed from public and private stores by public and private researches amount in sum and in importance to an actual necessity for their digest and incorporation into a new history. Dr. Palfrey has used these with a most patient fidelity, and his references to them and his extracts from them convey to his readers the results of an amount of labor which the most grateful of them will not be likely to overestimate. While he speaks to us in his text, he allows those whom we most wish to hear to speak to us in his rich and well-chosen excerpts from a mountain-heap of authorities.

The Dedication of the volume to Dr. Sparks has in it a rare felicity, which is to be referred to two facts: first, that the writer had some peculiarly touching and grateful things to say; and, second, that he knew how to say them in language fitted to the sentiment. In his Preface, he announces his purpose with its plan, refers us to his authorities and sources, and recognizes his obligations to individual friends. Some of the choicest matters in his Notes are the results of his own personal research in England.

The limit which he sets for himself will

carry forward his History to the time of the English Revolution, thus embracing our annals during the vitality of our first Charter. That Charter, its origin, transfer, and subsequent service as the basis of government, the reiterated efforts to wrest it, and the persistent resolution to hold it, give to it a symbolic significance which warrants the dating of an epoch by it. Dr. Palfrey regards our local political existence as commencing from the hour in which that document, with its official representatives, reached these shores. We have seen criticisms disputing this position, but, as we think, not even plausible, still less effective to discredit it. We must have an incident, besides a *punctum temporis*, for our start in government; and where could we find a better one than that on which the whole subsequent course and character of the government depended? We go, then, for the old Charter, and for the setting up of a jurisdiction under it here. It was an admirable and every way convenient document; good for securing rights, impotent as impairing liberties. It comforted the "Magistrates" to have it to fall back upon, when its provisions harmonized with their purposes; nor did they allow themselves to be embarrassed by it, when it appeared that some of their purposes were not fully provided for in it. That Charter got wonderfully aired and invigorated on its ocean-passage. The salt water agreed with its constitution. In a single instance, at least, it falsified the old maxim,—*Cælum, non animum, mutant, qui trans mare currunt*. That was a marvellous piece of parchment. So far as Massachusetts was concerned, the Declaration of Independence was interlined upon it in sympathetic ink.

We hardly know of fifty octavo pages anywhere in which so much investigation and labor condense their results so intelligibly into such useful information as in each of the first two chapters of this volume. The first is devoted to the Physical Geography of the Peninsula of New England, its Natural History, and its Aborigines; the second is a summary sketch

of the Early Voyages and Explorations. In this we find the most discriminating view which we have ever seen of the marvellous adventures of John Smith,—so happily and suggestively described as the "fugitive slave" who was "the founder of Virginia." The notes on the credibility and authenticity of the narrations connected with his name are admirable. In reading these two chapters, one must muse upon the wilderness trappings and the ocean perils of the keen-set and all-enduring men who furnished the material for these high-seasoned pages.

"Puritanism in England" is, of course, the author's starting-point. Here he finds his men and their principles. A partial reformation is the most mischievous influence that can work in society. It unsettles, but is not willing to rebuild, even when it can learn how to do so. Reaction and excess are the Scylla and Charybdis of its perils. Compromise is the very essence of a partial reformation; and compromise in matters of moral and religious concern, where it is not folly, is crime. Where any party has been in earnest in a strife, there is no honest end at which it can rest till it reaches the goal of righteousness. The active element of Puritanism was the persistency of a religious party in pursuing a purpose which was yielded up, at a point short of its full attainment, by another branch of the party, which up to that point had made common cause with them. To speak plainly, the English Puritans regarded their former prelatist and conformist associates as traitors to a holy cause. They had engaged together in good faith in the work of reformation. They had suffered together. When the time came for triumph, a schism divided them; and the more zealous smarted from wounds inflicted by the lukewarm. It appeared that the Prelatists had been looking to ends of state policy, while the Puritans kept religion in view. The Conformists thought their ends were reached when Roman prelacy was set aside, and certain local ecclesiastical changes had been effected; but the real Puri-

tans wanted to get and to establish the essential Gospel.

Dr. Palfrey tells this story concisely, but emphatically. He takes two stages of the Puritan development in England, from which to deduce respectively the emigration to Plymouth and to Massachusetts Bay. Stopping at intervals to make intelligible the perplexities connected with the patents and charters, his narrative is thenceforward continuous, admitting new threads to be woven into it as the pattern and the fabric both become richer. For the first time we have the full connection presented in solid history between the Scrooby Church and Plymouth Colony. And the tracing is beautifully done. An artist may find his paintings in these pages. Our poets may here find themes which will be the more tempting and rewarding, the more closely they are held to severe historic verity. They will find, that, after all, the most promising materials for the imagination to deal with are *facts*. The residence of the exiles in Holland, their debates and arrangements with respect to a more distant remove, the ocean passage, the first forlorn experiences during two winters at Plymouth, are vividly presented. The paragraph, on page 182, beginning, "A visitor to Plymouth," gives us a picture better than that which hangs in the Pilgrim Hall. If the sternest foe of the Pilgrims across the water could have looked upon the exiles in their winter dreariness, hungry, wasted, dying, cowering beneath the accumulation of their woes, he might have regarded the scene as presenting but a reasonable retribution upon a stolid obstinacy in the most direful and needless self-inflictions. "Why could they not have been content to cling to the comforts of Old England, and to restrain their wilfulness of spirit?" The question is answered now differently from what it would have been then. We have used one wrong word about those exiles, in speaking of them as *cowering* under their woes. They did not *cower*, but *breasted* them.

After another most pregnant and ex-

haustive episode on Puritan politics in England, Dr. Palfrey brings in that thread of his story on which is strung the fortune of Massachusetts. It is here that Englishmen will find explained some of our vaunting views of the importance of our annals. Dr. Palfrey, in this and in other chapters, traces with skill and exactness the course of public measures and events in England, through kingly tyrannies and popular resistance, which ended by harmonizing the institutions of the mother country for a little while with those which had sprung up in this wilderness. He soon comes upon ticklish matters, but his touch and hold are firm, because he feels sure that he is dealing with men who understood themselves, and who were at least resolute and honest, to whatever degree they may have erred. Probably, like many of us who are aware that we could not possibly have lived comfortably with our ancestors, he feels all the more bound on that account to set their memory in the light of their noblest and least selfish ends. He is stout and unflinching in his championship of those ancestors: he sees in their experiment a lofty ideal; he vindicates their policy in the measures for realizing it; nor does he withhold apologetic or vindictory words where "unmeet persons" among the whites or Indians stood in the way of it.

Henceforward Dr. Palfrey has to follow out each thread of his story by itself, as by-and-by he will have to gather them into one cord. He traces the developments of months and years in the original settlements, and pursues them as they lead him to new territory in the Northeast and the Southwest, into Maine, Rhode Island, and Connecticut. Another episode on the opening of the Civil War at home, which invited a large return of the exiles, and a record of the original confederacy of the New England Colonies, bring us to the present close of his labors. May they be speedily continued! and may we enjoy the reality, as we now do the promise of them!

We turn now to Mr. Arnold's book. The field which it traverses is narrower as regards space, but its spirit is large and generous, and its subject-matter is of the loftiest significance. If the writer does not indulge us with many disquisitions, it is not from lack of ability. Wherever, as in his moralizings upon King Philip's War, and in his incidental comments upon the peculiarities and temper of his prominent men, he allows us to meet his own mind, he is uniformly wise and interesting. He stands by Rhode Island as does Dr. Palfrey by Massachusetts; and seeing that for a far longer period than the two books run on together the two Colonies were at strife, we are glad to have before us both the ways in which the story may be told. There are various sharp judgments on Massachusetts men and principles in the Rhode Island book. The argument is in good hands on either side.

Mr. Arnold begins with the first occupation of Rhode Island by white men, and conducts his narrative to the close of the century. His research has been faithful. His style is chaste, forcible, and often picturesque. He has seen the world widely, and he knows human nature. He understands very well what a place of honor and what a well-proved assurance of safety distinctive Rhode Island principles have attained. The issue, having been found so triumphant, has dignified to the historian the early, humble, and bewildering steps and processes through which it was reached. The narrative on his pages is the most distracting one ever written in the annals of civilized men. Every conceivable element of strife, discord, agitation, alarm, dissension, and bitterness is to be found in it,—redeemed only by a prevailing integrity, right-mindedness, and right-heartedness in all the leading spirits. Each man in each of the towns composing the original elements of the Colony was a whole "democratie" in himself, and generally a "fierce" one. Disputed boundaries with both the other Colonies, and an especial and continuous feud with Massachusetts,—unruly

spirits, bent upon working out all manner of impracticable theories,—the oddest and most original, as well as the most obstinate and indomitable dreamers and enthusiasts, furnished some daily nutriment to dissension with their neighbors or among themselves. Men of mark, like Roger Williams, Samuel Gorton, Governor Arnold, and William Harris, appear equally competent for fomenting strife of a sort to threaten every essential element of civil society, and for averting all permanent harm while putting on trial the most revolutionary theories. On page 337, Mr. Arnold has a note most characteristic of a large portion of his whole theme, as covering both his men and their measures. Many of the documents, of an official character, written by citizens, towns, or rulers in Rhode Island, were of such a sort in language and matter, that the town of Warwick did not think them fit for the public records, and so enjoined that the clerk should keep them in a file by themselves. This was known as "the Impertinent File," and, more profanely, but not less appropriately, as "the Damned File." A certain "perdition letter," written by Roger Williams himself, serves as the nucleus of this deposit; and we read of another of the documents as being as "full of uncivil language as if it had been indited in hell."

Mr. Arnold picks his way through all these dissensions, and finds a full reward in the nobleness of the men and the principles with which he has in the main to deal. His only abatement of praise to Roger Williams is on account of his bitter feud with William Harris. He repels, as slanderous, the imputations founded on alleged interpolations restricting religious liberty in the code, and cast at Roger Williams for undue severity to Quakers and for favoring Indian slavery. Randolph's visit, Andros's administration, the suspension and resumption of the Charter, bring him out into broader matters, which he treats with frankness and skill.

The more histories we have from the

pens of competent writers, even though they go over the same ground, the more lively and interesting will the pages be. We need not fear that like fidelity and ability in the use of the same materials by different writers will reduce our modern histories to a dead level of uniform narration. None but those well-skilled in our annals are aware what scope they afford, not only for special pleas, but also for honest diversity of judgment, in viewing and pronouncing upon many test-points vital to the theme. Indeed, when the historic vein shall have been exhausted, it will be found that there is more than a score of special and contested points, in each of our first two centuries, admirably suited for monographs. We have but to compare a few pages in each of the two excellent works now in our hands, to see how men of the highest ability, of rigid candor, and scrupulous fidelity in the use of the same materials, while spreading the same facts before their readers, may tell different tales, varying to the whole extent of the diversity in their respective judgments and moralizings. We can easily illustrate this assertion from the pages before us. Though Dr. Palfrey stops more than a half-century short of the date to which Mr. Arnold carries us, the former indicates exactly how and where he will be at issue with the latter, even to the end of the story common to both of them. So strong and clear is Dr. Palfrey's avowal of fealty to the honorable and unsullied fame of the founders of Massachusetts, that he will not be likely, on any later page, to qualify what he has already written. It happens, too, that the points in which any two of our historians would be most disposed to part in judgment lie within the space and the years common to both these writers. We can but indicate, in a very brief way, some of the more salient divergences between them, and we must preface the specification by acknowledging again the high integrity of both.

Dr. Palfrey writes, unmistakably, as a man proud of his Massachusetts line-

age. He honors the men whose enterprise, constancy, persistency, and wise skill in laying foundations have, in his view, approved their methods and justified them, even where they are most exposed to a severe judgment. He wishes to tell their story as they would wish to have it told. They stand by his side as he reads their records, and supply him with a running comment as to meaning and intention. Thus he is helped to put their own construction on their own deeds,—to set their acts in the light of their motives, to give them credit for all the good that was in their purposes, and to ascribe their mistakes and errors to a limitation of their views, or to well-founded apprehensions of evil which they had reason to dread. Under such pilotage, the passengers, at least, would be safe, when their ship fell upon a place where two seas met. Now Massachusetts and Rhode Island were in stiff hostility during the period here chronicled. The founder of Rhode Island and nearly all of its leading spirits had been "spewed out of the Bay Colony,"—and the institutions which the Rhode Islanders set up, or rather, their seeming purpose to do without any *institutions*, constituted a standing grievance to the rigid disciplinarians of Massachusetts. Indeed, we have to look to the relations of annoyance, jealousy, and open strife, which arose between the two Colonies in the ten years following 1636, for the real explanation of the severity visited upon the Quakers in Massachusetts in the five years following 1656. These early Quakers, when not the veritable persons, were the ghosts of the old troublers of "the Lord's people in the Bay." Gorton, Randall Holden, Mrs. Dyer, and other "exorbitant persons," who had been found "unmeet to abide in this jurisdiction," could not be got rid of once for all.

Mr. Arnold glories in the early reproach of Rhode Island. He finds its title to honor above every other spot on earth in the phenomena which made it so hateful to Massachusetts. In every issue raised between it and the Bay Col-

only from the very first, and in every element of its strife, he stands stoutly forth as its champion, and casts scornful reflections, though not in a scornful spirit. Wherever our two historians have the same point under treatment, we discern this antagonism between them,—never in a single case manifesting itself in an offensive or bitter way, but tending greatly to give a brisk and quickening vigor to their pages. Arnold claims that a perfectly democratical government and entire religious freedom are “exclusively Rhode Island doctrines, and to her belongs the credit of them both.” He might afford to give Massachusetts the appreciable honor of having been the indirect means of opening those large visions to the eyes of men who certainly were a most uncomfortable set of citizens while under pupillage. Mr. Bancroft had previously written thus:—“Had the territory of Rhode Island corresponded to the importance and singularity of the principles of its early existence, the world would have been filled with wonder at the phenomena of its history.”* It was only because the State was no larger that it was a safe field for the first trial of such principles. And it has often proved, that, the larger the principle, the more circumscribed must needs be the field within which it is first tested. It was well that the first experiments on the capabilities of steam were tried by the nose of a tea-kettle. Seeing that most of the early settlers of Rhode Island had very little property, and scarce anything of what Christendom had previously been in the habit of regarding as religion, the territory was the most fitting place for the trial of revolutionary principles. Mr. Arnold says, very curtly, but very truly, —“No form of civil government then existing could tolerate her democracy, and even Christian charity denied her faith.” (p. 280.) The wonder of the world, however, would have been more curiously engaged in watching what legislation for religion could possibly have

devised for a community made up of all sorts of consciences. The little State deserves the honor claimed for her. But had she any alternative course?

Mr. Arnold, we think, defines with more sharp and guarded accuracy than does Dr. Palfrey the ruling aim and motive of the founders of Massachusetts. An historian of Massachusetts, knowing beforehand through what a course of unflinching and resolute consistency with their first principles he is to follow her early legislators, has reason to limit their aim and motive at the start, that he may not assume for them more than he can make good. Especially if he intend to palliate, and, still more, to justify, some of the severer and more oppressive elements of their policy, he will find it wise to qualify their purpose within the same limitations which they themselves set for it. Dr. Palfrey parts with an advantage of which he afterwards has need to avail himself, when he states the motive of the exiles too broadly, as a search for a place in which to exercise liberty of conscience. He speaks of these exiles as recognizing in “religious freedom a good of such vast worth as to be protected by the possessor, not only for himself, but for the myriads living and to be born, of whom he assumes to be the pioneer and the champion.” (p. 301.) This large and unqualified claim might be advanced for the founders of Rhode Island, but it cannot be set up for the founders of Massachusetts. Whoever asserts it for the latter commits himself most unnecessarily to an awkward and ineffective defence of them in a long series of restrictive and severe measures against “religious freedom,” beginning with the case of the Brownes at Salem, and including acts of general legislation as well as of continuous ecclesiastical and judicial proceeding. Winthrop tells us that the aim of his brotherhood was “to enjoy the ordinances of Christ in their purity here.” The General Court repeatedly signified its desire to have a draft of laws prepared which might be “agreeable to the word of God.” Now either of these statements of the ruling

* BANCROFT'S *History of the United States*. I. 380.

purpose of the colonists, as then universally understood and interpreted, was inconsistent with what we now understand by "freedom in religion," or "liberty of conscience." What were regarded as "the pure ordinances of Christ" could not have been set up here, nor could such laws as were then considered as "agreeable to the word of God" have been enacted here, without impairing individual freedom in matters of religion. Indeed, it was the very attempt to realize these objects which occasioned every interference with perfect liberty of conscience. The fathers of Massachusetts avowed their purpose to be, not the opening of an asylum for all kinds of consciences, but the establishment of a Christian commonwealth. Their consistency can be vindicated by following out their own idea, but not by assigning to them a larger one.

Mr. Arnold, as we have said, is more sharply guarded in his statement of the aim of the founders of the Bay Colony in this respect; and it is all the more remarkable that he does not give them the benefit of the recognized limitation. He defines for them a restricted object, but he judges them by a standard before which they never measured themselves, and then condemns them for shortcomings. He tells us distinctly that the motives of the exiles "were certainly not those assigned them by Charles I., 'the freedom of liberty of conscience'" (p. 10); that "they looked for a home in the New World where they might erect an establishment in accordance with their peculiar theological views. 'They sought a faith's pure shrine,' based on what they held to be a purer system of worship, and a discipline more in unison with their notions of a church. Here they proceeded to organize a state, whose civil code followed close on the track of the Mosaic Law, and whose ecclesiastical polity, like that of the Jews, and of all those [Christian governments?] then existing, was identified with the civil power. They thus secured, what was denied them in England, the right to pursue their own

form of religion without molestation, and in this the object of their exile was attained." (p. 11.) And again, Mr. Arnold says,—“They founded a colony for their own faith, without any idea of tolerating others.” (p. 44.) All this is admirably said. It is precisely what the exiles would wish might be said of them in all the histories of them; for it is what they said of themselves, in defining their own object; it was, further, what they felt in their hearts to be their object, more intensely than they could give it utterance.

But the object is at once seen to be limited within the fearful license of religious freedom. The Scriptural and legislative fetters on such liberty were too repressive not to amount to an essential qualification of it. "The Simple Cobbler of Agawam," Ward of Ipswich, made a clean breast for himself and his contemporaries, when he numbered among the "four things which my heart hath naturally detested: Toleration of diverse Religions, or of one Religion in segregant shapes. He that willingly assents to this, if he examines his heart by daylight, his conscience will tell him he is either an Atheist, or an Heretigal, or an Hypocrite, or at best a captive to some lust. Poly-piety is the greatest impiety in the world." With such frank avowals on the part of those who had borne so much in the attempt to make themselves comfortable in their exile to these hard regions, that they might here try to work out their harder problem, it is a great deal too severe a standard for judging their acts which is set up for them in the fancied principle of religious liberty. We wonder that Mr. Arnold withholds from them the benefit of his and their own clear limitation of the principle,—a limitation so severe, as, in fact, to constitute quite another principle. Was it at all strange, then, that they should deal resolutely with Roger Williams, on account of "the firmness with which, upon every occasion, he maintained the doctrine, that the civil power has no control over the religious opinions of men." ? (p. 41.) It was for no other purpose than to engage the civil power

for a pure religion that they were dwelling in poor huts on these ocean headlands, and sustaining their lives upon muscles gathered on the shore after the receding of the tide.

Dr. Palfrey and Mr. Arnold hold and utter quite opposite judgments about the treatment of Roger Williams by Massachusetts. The latter, having stated more definitely than the former the limited aim of our colonists, which was utterly inconsistent with toleration in religion and with laxity in civil matters, nevertheless considers the men of Massachusetts unjustifiable in their course toward the founder of Rhode Island. Dr. Palfrey, on weaker grounds than those allowed by Mr. Arnold, thinks their most stringent proceedings perfectly defensible. He regards Mr. Williams as an intruder, whose opinions, behavior, and influence were perilous alike to the civil and the religious peace of the colonists; and he holds the colonists as not chargeable with any breach of the laws of justice or of mercy in sending out of their jurisdiction, into another patch of the same wilderness, a man all whose phenomena were of the most uncomfortable and irritating character. We confess that our reading and thinking identify our judgment on this matter with that of our own historian. There can be no question but that Roger Williams—whether he was thirty-two years old, as Mr. Arnold thinks, or, as Dr. Palfrey judges, in his twenty-fifth year, when he landed here—was, in what we must call his youth, seeing that he lived to an advanced age, a heady and contentious theorizer. Our fathers could not try more than one theory at a time; and the theory they were bent upon testing naturally preceded, in the series of the world's progressive experiments, the more generous, but, at the same time, more dangerous one which he advanced; and their theory had a right to an earlier and a full trial, as lying in the way of a safe advance towards his bolder Utopianism. The mild Bradford and the yet milder Brewster were glad when Plymouth was rid of

him. His first manifestation of himself, on his arrival here, requires to be invested with the halo of a later admiration, before it can be made to consist with the heralding of an apostle of the generous principles of toleration and charity in religion. Winthrop had recorded for us his refusal "to join with the congregation at Boston." This had been understood as referring to an unwillingness on the part of Williams to enter into communion with the church. But from a letter of his which has come to light within the year, it seems that he had been invited, previously to the arrival of Cotton, to become teacher of the church. And on account of what constraint of soul-liberty did he decline the office? Because the members of that church "would not make a public declaration of their repentance for having communion with the churches of England, while they lived there"! The good man lived to grow milder and more tolerant of the whims and prejudices and convictions of his fellow-men, through a free indulgence of his own. And, what is more remarkable, he found it necessary to apply, in restraint of others, several of the measures against which he had protested when brought to bear upon himself. He came to discover that there was mischief in "such an infinite liberty of conscience" as was claimed by his own followers. The erratic Gorton was to him precisely what the legislators of Massachusetts had feared that he himself would prove to be to them. He publicly declared himself in favor of "a due and moderate restraint and punishing" of some of the oddities of the Quakers. In less than ten years after he had so frightened Massachusetts by questioning the validity of an English charter to jurisdiction here, he went to England on a successful errand to obtain just such a document for himself and his friends.

Our two historians, with all the facts before them, honestly stated too, but diversely interpreted, stand in open antagonism of judgment about the proceedings of Massachusetts against the

Antinomians. That bitter strife — *Dux fœmina facti* — was in continuation of the issue opened by Roger Williams, though it turned upon new elements. Here, again, Mr. Arnold stands stoutly for the partisans of Mrs. Hutchinson, who moved towards the new home in the Narragensett country. He sees in the strife, mainly, a contest of a purely theological character, leading on to a development of democratical ideas. (p. 66.) Dr. Palfrey insists that it would be unjust to allege that the Antinomians were dealt with for holding "distasteful opinions on dark questions of theology," and affirms that they were put down as wild and alarming agents of an "immediate anarchy." (pp. 489, 491.) In this matter, also, our own judgment goes with our own historian. And the very best confirmation that it could have is found in the fact, that the prime movers in the most threatening stage of that dire conflict afterwards made ample confession of their heat, their folly, and their outrages,—approving the stern proceedings under which they had suffered. Wheelwright, especially, in whose advocacy the cause of his sister-in-law first assumed so threatening an aspect, most humbly avowed his sin and penitence.

One more very curious illustration of the divergence of judgment in our two new historians may be instanced. They have both written, as became them, quite brilliantly and vigorously, about the aborigines of the soil. But how marvellously they differ! Dr. Palfrey discredits the romance of Indian character and life. His mind dwells upon the squalor and wretchedness of their existence, the shiftlessness and incapacity of their natural development, their improvidence, their beastliness and forlorn debasement; and he is wholly skeptical about the savage

virtues of constancy, magnanimity, and wild-wood dignity. He sighs over them another requiem, toned in the deep sympathy of a true Christian heart; but he does not lament in their sad method of decay the loss of any element of manhood or of the higher ingredients of humanity. But Mr. Arnold pitches his requiem to a different strain. He reproduces and refines the romance which Dr. Palfrey would dispel. He exalts the Indian character; gathers comforts and joys and pleasing fashionings around their life; enlarges the sphere of their being, and asserts in them capacity to fill it. The wigwam of Massasoit is elegantly described by Mr. Arnold as "his seat at Mount Hope," (p. 23,)—and pun- gently, by Dr. Palfrey, as "his sty," in whose comfortless shelter, Winslow and Hopkins, of Plymouth, on their visit to the chief, had "a distressing experience of the poverty and filth of Indian hospitality." (pp. 183, 184.) Arnold tells us, the Indians "were ignorant of Revelation, yet here was Plato's great problem of the Immortality of the Soul solved in the American wilderness, and believed by all the aborigines of the West." (p. 78.) But Palfrey, knowing nothing of what his contemporary was writing, had already put into print this sentence:—"The New England savage was not the person to have discovered what the vast reach of thought of Plato and Cicero could not attain." (p. 49.)

Here are strange variances of judgment. But how much more of interest and activity lives in the mind, both of writers and readers, when history is written with such divergent philosophies and comments! Nobly, in both cases before us, have the writers done their work, and heartily do we render our tribute to them.

DRIFTING.

My soul to-day
Is far away,
Sailing the Vesuvian Bay;
My wingèd boat,
A bird afloat,
Swims round the purple peaks remote :—

Round purple peaks
It sails, and seeks
Blue inlets and their crystal creeks,
Where high rocks throw,
Through deeps below,
A duplicated golden glow.

Far, vague, and dim,
The mountains swim;
While on Vesuvius' misty brim,
With outstretched hands,
The gray smoke stands
O'erlooking the volcanic lands.

Here Ischia smiles
O'er liquid miles;
And yonder, bluest of the isles,
Calm Capri waits,
Her sapphire gates
Beguiling to her bright estates.

I heed not, if
My rippling skiff
Float swift or slow from cliff to cliff ;—
With dreamful eyes
My spirit lies
Under the walls of Paradise.

Under the walls
Where swells and falls
The Bay's deep breast at intervals,
At peace I lie,
Blown softly by,
A cloud upon this liquid sky.

The day, so mild,
Is Heaven's own child,
With Earth and Ocean reconciled ;—
The airs I feel
Around me steal
Are murmuring to the murmuring keel.

Over the rail
My hand I trail
Within the shadow of the sail,
A joy intense,
The cooling sense
Glides down my drowsy indolence.

With dreamful eyes
My spirit lies
Where Summer sings and never dies,—
O'erveiled with vines,
She glows and shines
Among her future oil and wines.

Her children, hid
The cliffs amid,
Are gambolling with the gambolling kid ;
Or down the walls,
With tipsy calls,
Laugh on the rocks like waterfalls.

The fisher's child,
With tresses wild,
Unto the smooth, bright sand beguiled,
With glowing lips
Sings as she skips,
Or gazes at the far-off ships.

Yon deep bark goes
Where Traffic blows,
From lands of sun to lands of snows ;—
This happier one,
Its course is run
From lands of snow to lands of sun.

Oh, happy ship,
To rise and dip,
With the blue crystal at your lip !
Oh, happy crew,
My heart with you
Sails, and sails, and sings anew !

No more, no more
The worldly shore
Upbraids me with its loud uproar !
With dreamful eyes
My spirit lies
Under the walls of Paradise !

ROBA DI ROMA.

ENTRANCE.

It was on the 6th of December, 1856, that I landed with my family at Civita Vecchia, on my return for the third time to Rome. Before we could make all our arrangements, it was too late to think of journeying that day towards the dear old city; but the following morning we set forth in a rumbling, yellow post-coach, with three horses, and a shabby, gaudy postilion,—the wheels clattering, the bells on the horses' necks jingling, the cock's-plumes on their heads nodding, and a half-dozen sturdy beggar-brats running at our side and singing a dismal chorus of "*Dateci qualche cosa.*" Two or three half-baiocchi, however, bought them off, and we had the road to ourselves. The day was charming, the sky cloudless, the air tender and with that delicious odor of the South which so soothingly intoxicates the senses. The sea, accompanying us for half our way, gleamed and shook out its breaking surf along the shore; and the rolling slopes of the Campagna, flattered by sunlight, stretched all around us,—here desert and sparkling with tall skeleton grasses and the dry canes' tufted feathers, and here covered with low, shrubby trees, that, crowding darkly together, climbed the higher hills. On tongues of land, jutting out into the sea, stood at intervals lonely watch-towers, gray with age, and at their feet shallow and impotent waves gnashed into foam around the black, jagged teeth of half-sunken rocks along the shore. Here and there the broken arches of a Roman bridge, nearly buried in the lush growth of weeds, shrubs, and flowers, or the ruins of some old villa, the home of the owl, snake, and lizard, showed where Ancient Rome journeyed and lived. At intervals, heavy carts, drawn by the superb gray oxen of the Campagna, creaked slowly by, the *contadino* sitting athwart the tongue; or some light wine *carrettino*

came ringing along, the driver fast asleep under its tall, triangular cover, with his fierce little dog beside him, and his horse adorned with bright rosettes and feathers. Sometimes long lines of mules or horses, tied one to another's tail, plodded on in dusty procession, laden with sacks;—sometimes droves of oxen, or *poledri*, conducted by a sturdy driver in heavy leathern leggings, and armed with a long, pointed pole, stopped our way for a moment. In the fields, the *pecoraro*, in shaggy sheep-skin breeches, the very type of the mythic Pan, leaned against his staff, half-asleep, and tended his woolly flock,—or the *contadino* drove through dark furrows the old plough of Virgil's time, that figures in the vignettes to the "*Georgics*," dragged tediously along by four white oxen, yoked abreast. There, too, were herds of long-haired goats, rearing mid the bushes and showing their beards over them, or following the shepherd to their fold, as the shadows began to lengthen,—or rude and screaming wains, tugged by uncouth buffaloes, with low heads and knotted knees, bred among the malaria-stricken marshes.

Half-way to Rome we changed horses at Palo,—a little grim settlement, composed of a post-house, inn, stables, a line of straggling fishermen's-huts, and a desolate old fortress, flanked by four towers. This fortress, which once belonged to the Odescalchi family, but is now the property of the Roman government, looks like the very spot for a tragedy, as it stands there rotting in the pestilential air, and garrisoned by a few stray old soldiers, whose dreary, broken-down appearance is quite in keeping with the place. Palo itself is the site of the city of Alsium, founded by the Pelasgi, in the dim gloom of antiquity, long before the Etruscans landed on this shore. It was subsequently occupied by the Etruscans, and afterwards became a favorite resort of the Roman nobility, who built there

the splendid villas of Antoninus, Porcina, Pompeius, and others. Of the Pelasgic and Etruscan town not a vestige remains; but the ruined foundations of Roman villas are still to be seen along the shore. No longer are to be found there the feasts described by Fronto,* of "fatted oysters, savory apples, pastry, confectionery, and generous wines in faultless transparent goblets,"—nor would it now be called "a voluptuous seaside retreat"; but good lobsters are still abundant there, and one can get a greasy beefsteak, black bread, an ill-cooked chicken, and sour wine, at only about twice their market value. The situation is lovely, with the sea washing in along the rounded rim of the coast, close up to the door of the inn; and on a sunny day, when the white wings of feluccas may be seen gleaming far off on the blue Mediterranean, and the fishermen are drawing their nets close into shore, it seems as if it might really be made "a voluptuous seaside retreat," but for the desolating malaria which renders it dangerous to rest there for a single night.

Here, of course, we stopped as short a time as possible; and then, bidding adieu to the sea, struck inland over the Campagna to Rome. The country now grows wild, desolate, and lonely; but it has a special charm of its own, which they who are only hurrying on to Rome, and to whom it is an obstruction and a tediousness, cannot, of course, perceive. It is dreary, weird, ghostly,—the home of the winds; but its silence, sadness, and solitude are both soothing and impressive. After miles and miles up and down, at last, from the crest of a hill up which we slowly toiled with our lumbering carriage and reeking horses, we saw the dome of St. Peter's towering above the city, which as yet was buried out of sight. It was but a glimpse, and was soon lost. The postilion covered the worn-out lace of his shabby livery with a heavy cloak, which he flung over his shoulder to keep out the dampening air, gave a series of

* *De Feriis Alsensibus*, Epist. III. See Dennis's *Etruscan Antiquities*, Vol. I.

wild flourishes with his whip, broke into guttural explosions of voice to urge along his horses, and on we went full-gallop. The road grew more and more populated as we approached the city. Carriages were out for a drive, or to meet friends on their way from Civita Vecchia; and on foot was many a little company of Romans, laughing and talking. At the *osterias* were groups seated under *frasche*, or before the door, drinking *fogliette* of wine and watching the passers-by. At last, toward sundown, we stopped at the Porta Cavalleggeri, where, thanks to our *lascia passare*, we were detained but a minute,—and then we were in Rome. Over us hung the great bulging dome of St. Peter's, golden with the last rays of sunset. The pillars of the gigantic colonnade of Bernini, as we jolted along, "seemed to be marching by," in broad platoons. The fountains piled their flexile columns of spray and waved them to and fro. The great bell clanged from the belfry. Groups wandered forth in the great Piazza. The old Egyptian obelisk in the centre pointed its lean finger to the sky. We were in Rome! This one moment of surprised sensation is worth the journey from Civita Vecchia. Entered by no other gate, is Rome so suddenly and completely possessed. Nowhere is the contrast so instantaneous and vivid as here, between the silent, desolate Campagna and the splendor of St. Peter's, between the burrows of primitive Christianity and the gorgeousness of ecclesiastical Rome.

After leaving the Piazza, we get a glimpse of Hadrian's Mole, and of the rusty Tiber, as it hurries, "*retortis littore Etrusco violentior undis*," as of old, under the statued bridge of St. Angelo,—and then we plunge into long, damp, narrow, dirty streets. Yet—shall I confess it?—they had a charm for me. Twilight was deepening into dark as we passed through them. Confused cries and loud Italian voices sounded about me. Children were screaming,—men howling their wares for sale. Bells were ringing everywhere. Priests, soldiers, *contadini*, and beggars

thronged along. The *Trasteverini* were going home, with their jackets hanging over one shoulder. Women, in their rough woollen gowns, stood in the doorways bare-headed, or looked out from windows and balconies, their black hair shining under the lanterns. Lights were twinkling in the little cavernous shops, and under the Madonna-shrines far within them. A funeral procession, with its black banners, gilt with a death's-head and cross-bones, was passing by, its wavering candles borne by the *confraternità*, who marched carelessly along, shrouded from head to foot in white, with only two holes for the eyes to glare through.

It was dirty, but it was Rome; and to any one who has long lived in Rome even its very dirt has a charm which the neatness of no other place ever had. All depends, of course, on what we call dirt. No one would defend the condition of some of the streets or some of the habits of the people. But the soil and stain which many call dirt I call color, and the cleanliness of Amsterdam would ruin Rome for the artist. Thrift and exceeding cleanness are sadly at war with the picturesque. To whatever the hand of man builds the hand of Time adds a grace, and nothing is so prosaic as the rawly new. Fancy for a moment the difference for the worse, if all the grim, browned, rotted walls of Rome, with their peeling mortar, their thousand daubs of varying grays and yellows, their jutting brickwork and patched stonework, from whose intervals the cement has crumbled off, their waving weeds and grasses and flowers, now sparsely fringing their top, now thickly protruding from their sides, or clinging and making a home in the clefts and crevices of decay, were to be smoothed to a complete level, and white-washed over into one uniform and monotonous tint. What a gain in cleanliness! what a loss in beauty! One old wall like this I remember on the road from Grotta Ferrata to Frascati, which was to my eyes a constant delight. One day the owner took it into his head to white-wash it all over,—to clean it, as some

would say. I look upon that man as little better than a Vandal in taste,—one from whom “knowledge at one entrance was quite shut out.” Take another modern instance: substitute for the tiled roofs of Rome, now so gray, tumbled, and picturesque with their myriad lichens, the cold, clean slate of New York, or the glittering zinc of Paris,—should we gain or lose? The Rue de Rivoli is long, white, and uniform,—all new and all clean; but there is no more harmony and melody in it than in the “damnable iteration” of a single note; and even Time will be puzzled to make it picturesque, or half as interesting as those old houses displaced in the back streets for its building, which had sprouted up here and there, according to the various whims of the various builders. Those were taken down because they were dirty, narrow, unsightly. These are thought elegant and clean. Clean they certainly are; and they have one other merit,—that of being as monotonously regular as the military despotism they represent. But I prefer individuality, freedom, and variety, for my own part. The narrow, uneven, huddled Corso, with here a noble palace, and there a quaint passage, or archway, or shop,—the buildings now high, now low, but all barnacled over with balconies,—is far more interesting than the unmeaning uniformity of the Rue de Rivoli. So, too, there are those among us who have the bad taste to think it a desecration in Louis Napoleon to have scraped the stained and venerable old *Nôtre Dame* into cleanliness. The Romantic will not consort with the Monotonous,—Nature is not neat,—Poetry is not formal,—and Rome is not clean.

These thoughts, or ghosts of thoughts, flitted through my mind, as the carriage was passing along the narrow, dirty streets, and brought with them after-trains of reflection. There may be, I thought, among the thousands of travellers that annually winter at Rome, some to whom the common out-door pictures of modern Roman life would have a charm as special as the galleries and antiquities, and to whom a

sketch of many things, which wise and serious travellers have passed by as unworthy their notice, might be interesting. Every ruin has had its score of *immortelles* hung upon it. The soil has been almost overworked by antiquarians and scholars, to whom the modern flower was nothing, but the antique brick a prize. Poets and sentimentalists have described to death what the antiquaries have left;—some have done their work so well that nothing remains to be done after them. Everybody has an herbarium of dried flowers from all the celebrated sites, and a table made from bits of marble collected in the ruined villas. Every Englishman carries a Murray for information and a Byron for sentiment, and finds out by them what he is to know and feel at every step. Pictures and statues have been staled by copy and description, until everything is stereotyped, from the Dying Gladiator, with his “young barbarians all at play,” and all that, down to the Beatrice Cenci, the Madame Tanson of the shops, that haunts one everywhere with her white turban and red eyes. All the public and private life and history of the ancient Romans, from Romulus to Constantine and Julian the Apostle, (as he is sometimes called,) is properly well known. But the common life of the modern Romans, the games, customs, habits of the people, the every-day of To-day, has been only touched upon here and there,—sometimes with spirit and accuracy, as by Charles McFarlane, sometimes with great grace, as by Hans Christian Andersen, and sometimes with great ignorance, as by Miss Waldie. This is the subject, however, which has specially interested me, and a life of several years in Rome has enabled me to observe many things which do not strike the hurried traveller, and to correct many false notions in regard to the people and place. To a stranger, a first impression is apt to be a false impression; and it constantly happens to me to hear my own countrymen work out the falsest conclusions from the slightest premises, and settle the character and deserts of the

Italians, all of whom they mass together in a lump, after they have been just long enough on the soil to travel from Civita Vecchia to Rome under the charge of a courier, when they know just enough of the language to ask for a coachman when they want a spoon, and when they have made the respectable acquaintance, beside their courier, of a few porters, a few beggars, a few shopkeepers, and the *padrone* of the apartment they hire.

No one lives long in Rome without loving it; and I must, in the beginning, confess myself to be in the same category. Those who shall read these slender papers, without agreeing to the kindly opinions often expressed, must account for it by remembering that “Love lends a precious seeing to the eye.” My aim is far from ambitious. I shall not be erudite, but I hope I shall not be dull. These little sketches may remind some of happy days spent under the Roman sky, and, by directing the attention of others to what they have overlooked, may open a door to a new pleasure. *Chi sa?* The plainest Ranz des Vaches may sometimes please when the fifth symphony of Beethoven would be a bore.

CHAPTER II.

STREET-MUSIC IN ROME.

WHOEVER has passed the month of December in Rome will remember to have been awakened from his morning-dreams by the gay notes of the *pifferari* playing in the streets below, before the shrines of the Madonna and Bambino,—and the strains of one set of performers will scarcely have ceased, before the distant notes of another set of pilgrims will be heard to continue the well-known *novena*. The *pifferari* are generally *contadini* of the Abruzzi Mountains, who, at the season of Advent, leave their home to make a pilgrimage to Rome,—stopping before all the way-side shrines, as they journey along, to pay their glad music of welcome to the Virgin and the coming Messiah. Their song is called a *novena*, from its being sung for nine

consecutive days,—first, for nine days previous to the Festa of the Madonna, which occurs on the 8th of December, and afterwards for the nine days preceding Christmas. The same words and music serve, however, for both celebrations. The *pifferari* always go in couples, one playing on the *zampogna*, or bagpipe, the bass and treble accompaniment, and the other on the *piffero*, or pastoral pipe, which carries the air; and for the month before Christmas the sound of their instruments resounds through the streets of Rome, wherever there is a shrine,—whether at the corners of the streets, in the depths of the shops, down little lanes, in the centre of the Corso, in the interior courts of the palaces, or on the stairways of private houses.

Their costume is extremely picturesque. On their heads they wear conical felt hats adorned with a frayed peacock's feather, or a faded band of red cords and tassels,—their bodies are clad in red waistcoats, blue jackets, and small-clothes of skin or yellowish homespun cloth,—skin sandals are bound to their feet with cords that interlace each other up the leg as far as the knee,—and over all is worn a long brown or blue cloak with a short cape, buckled closely round the neck. Sometimes, but rarely, this cloak is of a deep red with a scalloped cape. As they stand before the pictures of the Madonna, their hats placed on the ground before them, and their thick, black, dishevelled hair covering their sunburnt brows, blowing away on their instruments or pausing to sing their *novena*, they form a picture which every artist desires to paint. Their dress is common to nearly all the peasantry of the Abruzzi, and, worn and tattered as it often is, it has a richness and harmony of tint which no new clothes could ever have, and for which the costumes of the shops and regular models offer a poor substitute. It is the old story again. The new and clean is not so paintable, not so picturesque, as the tarnished and soiled. The worn blue of the cloak is softened by the dull gray of the threads

beneath,—patches of various colors are often let into the jacket or breeches,—the hat is lustreless from age, and rusty as an old wall,—and the first vivid red of the waistcoat is toned by constant use to a purely pictorial hue. Besides, the true *pifferaro* wears his costume as if it belonged to him and had always been worn by him,—so that it has none of that got-up look which spoils everything. From the sandals and corded leggings, which, in the Neapolitan dialect, are termed *ciocce*, the *pifferari* are often called *ciociari*.

Their Christmas pilgrimages are by no means prompted by purely religious motives, though, undoubtedly, such considerations have some weight with them, the common peasantry being a religiously inclined people, and often making pilgrimages simply from a sense of duty and propriety. But in these wanderings to Rome, their principal object is to earn a little money to support them during the winter months, when their "occupation is gone." As they are hired in Rome by the owners of the various houses adorned with a Madonna-shrine (of which there are over fifteen hundred in the city) to play before them at the rate of a paul or so for each full *novena*, and as they can easily play before thirty or forty a day, they often return, if their luck is good, with a tolerable little sum in their pockets. Besides this, they often stand as models, if they are good-looking fellows, and thus add to their store; and then again, the *forestieri* (for, as the ancient Romans called strangers *barbari*, so their descendants call them *foresters*, wood-men, wild-men) occasionally drop *baiocchi* and pauls into their hats, still further to increase it.

Sometimes it is a father and son who play together, but oftener two old friends who make the pilgrimage in pairs. This morning, as I was going out for a walk round the walls, two admirable specimens of the *pifferari* were performing the *novena* before a shrine at the corner of the street. The player of the *zampogna* was an old man, with a sad, but very

amiable face, who droned out the bass and treble in a most earnest and deprecatory manner. He looked as if he had stood still, tending his sheep, nearly all his life, until the peace and quiet of Nature had sunk into his being, or, if you will, until he had become assimilated to the animals he tended. The other, who played the *piffero*, was a man of middle age, stout, vigorous, with a forest of tangled black hair, and dark quick eyes that were fixed steadily on the Virgin, while he blew and vexed the little brown pipe with rapid runs and nervous *fioriture*, until great drops of sweat dripped from its round open mouth. Sometimes, when he could not play fast enough to satisfy his eagerness, he ran his finger up and down the vents. Then, suddenly lowering his instrument, he would scream, in a strong peasant-voice, verse after verse of the *novena*, to the accompaniment of the *zampogna*. One was like a slow old Italian *vettura* all lumbered with luggage and held back by its drag; the other panting and nervous at his work as an American locomotive, and as constantly running off the rails. Both, however, were very earnest at their occupation. As they stood there playing, a little group gathered round. A scamp of a boy left his sport to come and beat time with a stick on the stone step before them; several children clustered near; and two or three women, with rosy infants in their arms, also paused to listen and sympathize. At last the playing ceased. The *pifferari* took up their hats and looked smilingly round at us.

"Where do you come from?" I asked.

"*Eh!*" said the *piffero*, showing all his teeth, and shrugging his shoulders good-naturedly, while the other echoed the pantomime.

"*Dal Regno*,"—for so the Abruzzi peasants call the kingdom of Naples.

"And do you come every year?"

"*Sì, Signore. Lui* (indicating his friend) "*ed io*" (pointing to himself) "*siam' compagni per trenta tre anni. E siam' venut' a Roma per far la noven' ogn' anno.*" *

* "He and I have been companions for

To this the old *zampogna* bent his head on one side, and said, assentingly,—"*Eh! per trenta tre anni*"—

And, "*Ecco*," continued the *piffero*, bursting in before the *zampogna* could go on, and pointing to two stalwart youths of about twenty-two or -three years of age, who at this moment came up the street with their instruments,—"*These are our two sons. He is mine*,"—indicating one with his reversed thumb; "*and that other is his*,"—jerking his head towards his companion. "*And they, too, are going to play in company, as we do.*"

"For thirty-three years more, let us hope," said I.

"*Eh! speriamo*," (Let us hope so,) was the answer of the *piffero*, as he showed all his teeth in the broadest of smiles. Then, with a motion of his hand, he set both the young men going, he himself joining in, straining out his cheeks, blowing all the breath of his body into the little pipe, and running up and down the vents with a sliding finger, until finally he brought up against a high, shrill note, to which he gave the full force of his lungs, and, after holding it in loud blast for a moment, startled us by breaking off, without gradation, into a silence as sudden as if the music had snapped short off, like a pipe-stem.

On further conversation with my *cio-ciari*, I found that they came yearly from Sora, a town in the Abruzzi, about one hundred miles from Rome, making the journey on foot, and picking up by the way whatever trifle of copper they could. In this manner they travelled the whole distance in five days, living upon onions, lettuce, oil, and black bread. They were now singing the second *novena* for *Natale*, and, if one could judge from their manner and conversation, were quite content with what they had earned. I invited them up into my room, and there in the pleasantest way they stunned us with the noise of both their instruments, to the great delight of the children and the astonishment of the servants, for whom thirty-three years, and every year we have come to Rome to play the *novena*."

these common things had worn out their charm by constant repetition. At my request, they repeated the words of the *novena* they had been singing, and I took them down from their lips. After eliminating the wonderful *m-ms* of the Neapolitan dialect, in which all the words lay imbedded like shells in the sand, and supplying some of the curious elisions with which those Abruzzi Procrustean recklessly cut away the polysyllables, so as to bring them within the rhythmic compass, they ran thus:—

"Verginella figlia di Sant' Anna,
Nella ventre portasti il buon Gesù.
Si parturisti sotto la capanna,
E dov' mangiav'no lo bue e l' asinello.

"Quel Angelo gridava: 'Venite, Santi!
'Chè andato Gesù dentro la capanna,
Ma guardate Vergine beata,
Che in ciel in terra sia nostr' avvocata!'

"San Giuseppe andava in compagnia,
Si trovò al partorir di Maria.
La notte di natale è notte santa—
Lo Padre e l' Figliolo e lo Spirito Santo.
'Sta la ragione che abbiamo cantato;
Sia a Gesù bambino rappresentata."

The sudden introduction of "*Quel Angelo*" in this song reminds us of a similar felicity in the romantic ballad of "Lord Bateman," where we are surprised to learn that "*this Turk*," to whom no allusion had been previously made, "has one lovely daughter."

The air to which this is sung is very simple and sweet, though monotonous. Between the verses and at the close, a curious little *ritornello* is played.

The wanderings of the *pifferari* are by no means confined to the Roman States. Sometimes they stray "as far away as Paris is," and, wandering about in that gay capital, like children at a fair, play in the streets for chance *sous*, or stand as models to artists, who, having once been to Rome, hear with a longing Rome-sickness the old characteristic sounds of the *piffero* and *zampogna*. Two of them I remember to have heard thus, as I was at work in my studio in Paris; and so vividly did they recall the old Roman time, that I called them in for a chat.

Wonderful was their speech. In the few months of their wandering, they had put into their Neapolitan dough various plums of French words, which, pronounced in their odd way, "suffered a change into something peculiarly rich and strange." One of them told me that his wife had just written to him by the hand of a *scrivano*, lamenting his absence, and praying him to send her his portrait. He had accordingly sent her a photograph in half-length. Some time afterwards she acknowledged the receipt of it, but indignantly remonstrated with him for sending her a picture "*che pareva guardando per la finestra*," (which seemed to be looking out of the window,) as she oddly characterized a half-length, and praying to have his legs also in the next portrait. This same fellow, with his dull, amiable face, played the rôle of a ferocious wounded brigand dragged into concealment by his wife, in the studio of a friend next door; but, despite the savagery and danger of his counterfeited position, he was sure to be overpowered by sleep before he had been in it more than five minutes,—and if the artist's eye left him for a moment, he never failed to change his attitude for one more fitted to his own somnolent propensities than for the picture.

The *pifferari* are by no means the only street-musicians in Rome, though they take the city by storm at Christmas. Every day under my window comes a band of four or five, who play airs and concerted pieces from the operas,—and a precious work they make of it sometimes! Not only do the instruments go very badly together, but the parts they play are not arranged for them. A violone grunts out a low accompaniment to a vinegar-sharp violin which saws out the air, while a trumpet blares in at intervals to endeavor to unite the two, and a flute does what it can, but not what it would. Sometimes, instead of a violone, a hoarse trombone, with a violent cold in the head, snorts out the bass impatiently; gets ludicrously uncontrollable and boastful at times,

and is always so choleric, that, instead of waiting for the *cadenzas* to finish, it bursts in, knocks them over as by a blow on the head, roars away on false intervals, and overwhelms every other voice with its own noisy vociferation. The harmonic arrangements are very odd. Each instrument seems to consider itself ill-treated when reduced to an accompaniment or bass, and is constantly endeavoring, however unfitted for it, to get possession of the air,—the melody being, for all Italians, the principal object. The violin, however, weak of voice as it is, always carries the day, and the other instruments steal discontentedly back to their secondary places, the snuffy old violone keeping up a constant growl at its ill luck, and the trombone now and then leaping out like a tiger on its prey.

Far better and more characteristic are the ballad-singers, who generally go in couples,—an old man, dim of sight, perhaps blind, who plays the violin, and his wife or daughter, who has a guitar, tamborello, or at times a mandolin. Sometimes a little girl accompanies them, sings with them, and carries round a tin box, or the tamborello, to collect *baiocchi*. They sing long ballads to popular melodies, some of which are very pretty and gay, and for a *baiocco* they sell a sheet containing the printed words of the song. Sometimes it is in the form of a dialogue,—either a love-making, a quarrel, a reconciliation, or a leave-taking,—each singer taking an alternate verse. Sometimes it is a story with a chorus, or a religious conversation-ballad, or a story of a saint, or from the Bible. Those drawn from the Bible are generally very curious paraphrases of the original simple text, turned into the simplest and commonest idioms of the people;—one of them may be found in the Appendix to Goethe's "*Italienische Reise*." These Roman ballads and popular songs, so far as I am able to learn, have never been collected. Many of them do not exist in print, and are only traditional and caught from mouth to mouth. This is particularly the case with those in the Romanesque dialect,

which are replete with the peculiar wit and spirit of the country. But the memory of man is too perilous a repository for such interesting material; and it is greatly to be wished that some clever Italian, who is fitted for the task, would interest himself to collect them and give them a permanent place in the literature of his language.

But to return to our ballad-singers, whom we have left in the middle of their song, and who are now finishing. A crowd has gathered round them, as usual; out of the windows and from the balconies lean the occupants of the houses near by, and the *baiocchi* thrown by them ring on the pavement below. With rather Stentorian voices they have been singing a dialogue which is most elaborately entitled a "*Canzonetta Nuova, sopra un marinaio che da l'addio alla sua promessa sposa mentre egli deve partire per la via di Levante*. Sdegno, pace, e matrimonio dilli medesimi con intercalare sull' aria moderna. Rime di Francesco Calzaroni." I give my *baiocco* and receive in return a smiling "*Grazie*" and a copy of the song, which is adorned by a wood-cut of a ship in full sail.

Here is another, of a moral character, containing the sad history of Frederic the Gambler, who, to judge from the wood-cut accompanying the *Canzonetta*, must have been a ferocious fellow. He stands with his legs wide apart, in half-armor, a great sash tied over his shoulder and swinging round his legs, an immense sword at his side, and a great hat with two ostrich-feathers on his head, looking the very type of a "swashing blade."

The singers of longer ballads carry about with them sometimes a series of rudely-executed illustrations of different incidents in the story, painted in distemper and pasted on a large pasteboard frame, which is hung against a wall or on a stand planted behind the singer in the ground. These he pauses now and then in his song to explain to the audience, and they are sure to draw a crowd.

As summer comes on and the evenings grow warm, begin the street serenades,

—sometimes like that of Lindoro in the opening of the “Barbiere di Sevilla,” but generally with only one voice, accompanied by a guitar and a mandolin. These serenades are, for the most part, given by a lover or friend to his *innamorata*, and the words are expressive of the tender passion; but there are also *serenate di gelosia*, or satirical serenades, when the most impertinent and stinging verses are sung. Long before arriving, the serenaders may be heard marching up the street to the thrum of their instruments. They then place themselves before the windows of the fair one, and, surrounded by a group of men and boys, make proclamation of their love in loud and often violent tones. It seems sometimes as if they considered the best method of expressing the intensity of their passion was by the volume of their voice. Certainly, in these cases, the light of love is not hidden under a bushel. Among the Trasteverini, particularly, these serenades are common. Some of them are very clever in their improvisations and imitations of different dialects, particularly of the Neapolitan, in which there are so many charming songs. Their skill in improvisation, however, is not generally displayed in their serenades, but in the *osterias*, during the evenings of the *festas* in summer. There it is that their quickness and epigrammatic turn of expression are best seen. Two disputants will, when in good-humor and warmed with wine, string off verse after verse at each other's expense, full of point and fun,—the guitar burring along in the intervals, and a chorus of laughter saluting every good hit.

In many of the back streets and squares of the city, fountains jet out of lions' heads into great oblong stone cisterns, often sufficiently large to accommodate some thirty washerwomen at once. Here the common people resort to wash their clothes, and with great laughter and merriment amuse themselves while at their work by improvising verses, sometimes with rhyme, sometimes without, at the expense of each other, or perhaps of the passer-by,—particularly if he happen to be a

gaping *forestiere*, to whom their language is unintelligible. They stand on an elevated stone step, so as to bring the cistern about mid-height of their body, and on the rough inclined level of its rim they slash and roll the clothes, or, opening them, flaunt them into the water, or gather them together, lifting their arms high above their heads, and always treating them with a violence which nothing but the coarsest material can resist. The air to which they chant their couplets is almost always a Campagna melody. Sharp attacks are given and as sharp *répliques* received, in exceeding good-humor; and when there is little wit, there is sure to be much laughter. The salt is oftentimes pretty coarse, but it serves its purpose.

A remarkable trait among the Italians is the good-nature with which they take personal jokes, and their callousness to ridicule of personal defects. Jests which would provoke a blow from an Anglo-Saxon, or wound and rankle in the memory for life, are here taken in good part. A cripple often joins in the laugh at his own deformity; and the rough carelessness with which such personal misfortunes are alluded to is amazing to us of a more sensitive organization. I well remember the extreme difficulty I once had in breaking an Italian servant of the habit of announcing an acquaintance, whose foreign name he could not pronounce, and who had the misfortune to be humpbacked, as “*quel gobbo*” (that hunchback). He could not understand why he should not call him a *gobbo*, if he was a *gobbo*; and in spite of all I could do, he would often open the door and say, “*Signore, quel gobbo desidera farle una visita*,” (that hunchback wishes to make you a visit,) when “*quel gobbo*” was right on his heels. The Italians are also singularly free from that intense self-consciousness which runs in our English blood, and is the root of shyness, awkwardness, and affectation. Unconsciousness is the secret of grace, freedom, and simplicity. We never forget ourselves. The Italians always forget them-

selves. They are sometimes proud, very seldom vain, and never affected. The converse peculiarity follows, of course. Having no self-consciousness, they are as little sensitive to their defects as vain of their charms. The models who come to the studios, and who have been selected for their beauty, despite the silent flat-tery incident to their very profession, and the lavish praise they constantly hear expressed, are always simple, natural, and unaffected. If you tell them they are very beautiful, they say, "*Ma che?*" deprecatorily, or perhaps admit the fact. But they are better pleased to have their dress admired than their faces. Of the former they are vain, of the latter they are not. For the most part, I think they rather wonder what it is we admire in them and think worthy of perpetuating in stone or color. The other day I was so much struck with the ear of a model, from whom I was working, that I said to her,—“You have, without exception, the most beautiful ear I ever saw.” She laughed somewhat derisively, and said, "*Ma che?*"—"It does not seem to give you any pleasure," I continued, "to know that you have a very handsome ear."—" *Che mi importa,*" answered she, "*se sia bello o brutto? È sempre lo stesso, brutto o bello, bello o brutto. Ecco!*"*—"You don't care, then, whether you are handsome or ugly?"—" *Eh! cosa a me m' importa,—se sono brutto o bello non so,—a me è lo stesso.*" This was all I could get from her.

But to return to our washerwomen. In every country-town a large washing-cistern is always provided by the authorities for public use, and, at all hours of the day, the picturesque figures of the peasants of every age, from the old hag, whose skin is like a brown and crumpled palimpsest, (where Anacreontic verses are overwritten by a dull, monkish sermon,) to the round, dark-eyed girl, with broad, straight back and shining hair, may be seen gathered around it,—their heads

protected from the sun by their folded *tocaglia*, their skirts knotted up behind, and their waists embraced by stiff, red *busti*. Their work is always enlivened by song,—and when their clothes are all washed, the basket is lifted to the head, and home they march, stalwart and majestic, like Roman caryatides. The sharp Italian sun shining on their dark faces and vivid costumes, or flashing into the fountain, and basking on the gray, weed-covered walls, makes a picture which is often enchanting in its color. At the Emissary by Albano, where the waters from the lake are emptied into a huge cistern through the old conduit built by the ancient Romans to sink the level of the lake, I have watched by the hour together these strange pictorial groups, as they sang and thrashed the clothes they were engaged in washing; while over them, in the foreground, the great gray tower and granary, once a castle, lifted itself in strong light and shade against the peerless blue sky, while rolling hills beyond, covered with the pale green foliage of rounded olives, formed the characteristic background. Sometimes a *contadino*, mounted on the crupper of his donkey, would pause in the sun to chat awhile with the women. The children, meanwhile, sprawled and played upon the grass, and the song and chat at the fountain would not unfrequently be interrupted by a shrill scream from one of the mothers, to stop a quarrel, or to silence a cry which showed the stoutness of their little lungs.

The cobblers of Rome are also a gay and singing set. They do not imprison themselves in a dark cage of a shop, but sit "*sub Jove*," where they may enjoy the life of the street and all the "skyey influences." Their benches are generally placed near the *portone* of some palace, so that they may draw them under shelter when it rains. Here all day they sit and draw their waxed-ends and sing,—a row of battered-looking boots and shoes ranged along on the ground beside them, and waiting for their turn, being their only stock in trade.

* "What do I care whether it is handsome or ugly? It's all the same to me,—ugly or handsome,—handsome or ugly. There!"

They commonly have enough to do, and, as they pay nothing for shop-rent, every *baicco* they get is nearly clear profit. They are generally as poor as Job's cat; but they are far happier than the proprietor of that interesting animal. Figaro is a high ideal of this class, and about as much like them as Raffaello's angels are like Jeames Yellowplush. What the cobblers and Figaro have in common is song and a love of scandal. One admirable specimen of this class sits at the corner of the Via Felice and Capo le Case, with his bench backed against the gray wall. He is an oldish man, with a long, gray beard and a quizzical face,—a sort of Hans Sachs, who turns all his life into verse and song. When he comes out in the morning, he chants a domestic idyl, in which he narrates in verse the events of his household, and the differences and agreements of himself and his wife, whom I take to be a pure invention. This over, he changes into song everything and every person that passes before him. Nothing that is odd, fantastic, or absurd escapes him, or fails to be chronicled and sarcastically commented on in his verse. So he sits all day long, his mind like a kaleidoscope, changing all the odd bits of character which chance may show him into rhythmic forms, and chirps and sings as perpetually as the cricket. Friends he has without number, who stop before his bench, from which he administers poetical justice to all persons, to have a long chat, or sometimes to bring him a friendly token; and from the dark interior of his drawer he often brings forth an orange, or a bunch of grapes, or handful of chestnuts, supplied by them, as a dessert for the thick cabbage-soup which he eats at *mezzo giorno*.

In the busiest street of Rome, the pure Campagna song may often be heard from the throat of some *contadino*, as he slowly rumbles along in his loaded wine-cart,—the little dog at his side barking a sympathetic chorus. This song is rude enough, and seems in measure founded upon the Church chant. It is in the minor key, and consists ordinarily of two phrases,

ending in a screaming monotone, prolonged until the breath of the singer fails, and often running down at the close into a blurred chromatic. No sooner is one strain ended than it is suddenly taken up again in the *prestissimo* time and “slowed” down to the same dismal conclusion. Heard near, it is deafening and disagreeable. But when refined by distance, it has a sad and pleasant effect, and seems to belong to the place,—the long wail at the close being the very type of the melancholy stretches of the Campagna. In the same way I have frequently thought that the *Jodeln* of the Swiss was an imitation of the echo of the mountains, each note repeated first in octave, or fifth, and then in its third below. The Campagna song is to be heard not only in the Campagna, but everywhere in the country,—in the vineyards, in the grain-fields, in mountain and valley, from companies working together, and from solitary *contadini*,—wherever the influence and sentiment of the Roman Campagna is felt. The moment we get into Tuscany, on the one side, or over into Naples, on the other, it begins to be lost. It was only the other day, at nightfall, that I was sauntering out on the desolate Campagna towards Civita Vecchia. The shadows were deepening and the mists beginning to creep whitely along the deep hollows. Everything was dreary and melancholy enough. As I paused to listen to the solitude, I heard the grind of a distant invisible cart, and the sound of a distant voice singing. Slowly the cart came up over the crest of the hill, a dark spot against the twilight sky, and mounted on the top of a load of brushwood sat a *contadino*, who was singing to himself these words,—not very consolatory, perhaps, but so completely in harmony with the scene and the time that they struck me forcibly:—

“E, bella, tu non piangerà-a-a-i,
Sul giorno ch' io sarò mor-or-or-to-o-o-o-o-o.” *

* “And, dearest, you will never weep for me—
e-e-e,
The day when I shall be no mo-o-o-ore.”

Whether this constant habit of song among the Southern people, while at their work, indicates happiness and content, I will not undertake to say; but it is pleasanter in effect than the sad silence in which we Anglo-Saxons perform our tasks,—and it seems to show a less harassed and anxious spirit. But I feel quite sure that these people are more easily pleased, contented with less, less morose, and less envious of the ranks above them, than we are. They give little thought to the differences of caste, have little ambition to make fortunes or rise out of their condition, and are satisfied with the commonest fare, if they can get enough of it. The demon of dissatisfaction never harries them. When you speak to them, they answer with a smile which is nowhere else to be found. The nation is old, but the people are children in disposition. Their character is like their climate, generally sunny,—subject to violent occasional storms, but never growling life away in an uncomfortable drizzle of discontent. They live upon Nature,—sympathize with it and love it,—

are susceptible to the least touch of beauty,—are ardent, if not enduring, in their affections,—and, unless provoked and irritated, are very peaceful and amiable. The flaw in their nature is jealousy, and it is a great flaw. Their want of truth is the result of their education. We who are of the more active and busy nations despise them for not having that irritated discontent which urges us forward to change our condition; and we think our ambition better than their supineness. But there is good in both. We do more,—they enjoy more; we make violent efforts to be happy,—invent, create, labor, to arrive at that quiet enjoyment which they own without struggle, and which our anxious strife unfits us to enjoy when the means for it are, obtained. The general, popular idea, that an Italian is quarrelsome and ill-tempered, and that the best are only bandits in disguise, is quite a mistake; and when studied as they exist out of the track of travel, where they are often debased and denaturalized, they will be found to be simple, kind-hearted, and generous.

A LETTER TO A DYSPETIC.

Yes, my dear Dolorous, I commiserate you. I regard your case, perhaps, with even sadder emotions than that excellent family-physician who has been sounding its depths these four years with a golden plummet, and has never yet touched bottom. From those generous confidences which, in common with most of your personal acquaintances, I daily share, I am satisfied that no description can do justice to your physical disintegration, unless it be the wreck of matter and the crush of worlds with which Mr. Addison winds up Cato's Soliloquy. So far as I can ascertain, there is not an organ of your internal structure which is

in its right place, at present, or which could perform any particular service, if it were there. In the extensive library of medical almanacs and circulars which I find daily deposited by travelling agents at my front door, among all the agonizing vignettes of diseases which adorn their covers, and which Irish Bridget daily studies with inexperienced enjoyment in the front entry, there is no case which seems to afford a parallel to yours. I found it stated in one of these works, the other day, that there is iron enough in the blood of twenty-four men to make a broadsword; but, I am satisfied that it would be impossible to extract enough

from the veins of yourself and your whole family to construct a crochet-needle for your eldest daughter. And I am quite confident, that, if all the four hundred muscles of your present body were twisted together by a rope-maker, they would not furnish that patient young laborer with a needleful of thread.

You are undoubtedly, as you claim, a martyr to Dyspepsia; or if you prefer any other technical name for your disease or diseases, I will acquiesce in any, except, perhaps, the word "Neurology," which I must regard as foreign to etymological science, if not to medical. Your case, you think, is hard. I should think it would be. Yet I am impressed by it, I must admit, as was our adopted fellow-citizen by the contemplation of Niagara. He, you remember, when pressed to admire the eternal plunge of the falling water, could only inquire, with serene acquiescence in natural laws, "And what's to hinder?" I confess myself moved to similar reflections by your disease and its history. My dear Dolorous, can you acquaint me with any reason, in the heavens above or on the earth beneath, why you should *not* have dyspepsia?

My thoughts involuntarily wander back to that golden period, five years ago, when I spent one night and day beneath your hospitable roof. I arrived, I remember, late in the evening. The bed-room to which you kindly conducted me, after a light but wholesome supper of dough-nuts and cheese, was pleasing in respect to furniture, but questionable in regard to physiology. The house was not more than twenty years old, and the chamber must therefore have been aired within that distance of time, but not, I should have judged, more recently. Perhaps its close, oppressive atmosphere could not have been analyzed into as many separate odors as Coleridge distinguished in Cologne,—but I could easily identify aromatic vinegar, damp straw, lemons, and dyed silk gowns. And, as each of the windows was carefully nailed down, there were no obvious means of obtaining fresh

air, save that ventilator said to be used by an eminent lady in railway-cars,—the human elbow. The lower bed was of straw, the upper of feathers, whose extreme heat kept me awake for a portion of the night, and whose abundant fluffy exhalations suggested incipient asthma during another portion. On rising from these rather unrefreshing slumbers, I performed my morning ablutions with the aid of some three teacupsful of dusty water,—for the pitcher probably held that quantity,—availing myself, also, of something which hung over an elegant towel-horse, and which, though I at first took it for a child's handkerchief, proved on inspection to be "Chamber Towel, No. 1."

I remember, as I entered the breakfast-room, a vague steam as of frying sausages, which, creeping in from the neighboring kitchen, obscured in some degree the six white faces of your wife and children. The breakfast-table was amply covered, for you were always what is termed by judicious housewives "a good provider." I remember how the beefsteak (for the sausages were especially destined for your two youngest Dolorosi, who were just recovering from the measles, and needed something light and palatable) vanished in large rectangular masses within your throat, drawn downward in a maelstrom of coffee;—only that the original whirlpool is, I believe, now proved to have been imaginary;—"that cup was a fiction, but this is reality." The resources of the house also afforded certain very hot biscuits or breadcakes, in a high state of saleratus;—indeed, it must have been from association with these, that certain yellow streaks in Mr. Ruskin's drawing of the rock, at the Athenæum, awakened in me such an immediate sense of indigestion;—also fried potatoes, baked beans, mince-pie, and pickles. The children partook of these dainties largely, but without undue waste of time. They lingered at table precisely eight minutes, before setting out for school; though we, absorbed in conversation, remained at least ten;

—after which we instantly hastened to your counting-room, where you, without a moment's delay, absorbed yourself in your ledger, while I flirted languidly with the "Daily Advertiser."

You bent over your desk the whole morning, occasionally having anxious consultations with certain sickly men whom I supposed to be superannuated bookkeepers, in impoverished circumstances, and rather pallid from the want of nutritious food. One of them, dressed in rusty black, with a flabby white neckcloth, I took for an ex-clergyman; he was absorbed in the last number of the "Independent," though I observed, at length, that he was only studying the list of failures, a department to which, as it struck me, he himself peculiarly appertained. All of these, I afterwards ascertained from your office-boy, were eminent capitalists; something had gone wrong in the market,—not in the meat-market, as I should have supposed from their appearance, but in the money-market. I believe that there was some sudden fall in the price of indigo. I know you looked exceedingly blue as we walked home to dinner.

Dinner was ready the instant we opened the front door. I expected as much; I knew the pale, speechless woman who sat at the head of your table would make sure of punctuality, if she died for it. We took our seats without a word. The party was smaller than at breakfast. Two of the children had staid at school, having their luncheon-baskets well filled from the cold remains of breakfast. Your eldest girl, Angelina, aged ten, one of those premature little grown women who have learned from the cradle that man is born to eat pastry and woman to make it, postponed her small repast till an indefinite future, and sat meekly ready to attend upon our wants. Nathaniel, a thin boy of eight, also partook but slightly, having impaired his appetite, his mother suspected, by a copious luncheon of cold baked beans and vinegar, on his return from school. The two youngest (twins) had relapsed to their couches

soon after breakfast, in consequence of excess of sausage.

You were quite agreeable in conversation, I remember, after the first onset of appetite was checked. You gave me your whole theory of the indigo crisis, with minute details, statistical and geographical, of the financial condition and supposed present location of your principal absconding debtors. This served for what is called, at public dinners, the intellectual feast; while the carnal appetite was satisfied with fried pork, ditto roasted, strong coffee, turnips, potatoes, and a good deal of gravy. For dessert, (at which point Nathaniel regained his appetite,) we had mince-pie, apple-pie, and lemon-pie, the latter being a structure of a two-story description, an additional staging of crust being somehow inserted between upper and under. We lingered long at that noon meal,—fifteen minutes, at the very least; for you hospitably said that you did not have these little social festivals very often,—owing to frequent illness in the family, and other causes,—and must make the most of it.

I did not see much of you during that afternoon; it was a magnificent day, and I said, that, being a visitor, I would look about and see the new buildings. The truth was, I felt a sneaking desire to witness the match-game on the Common, between the Union Base-Ball Club, No. 1, of Ward Eleven, and the Excelsiors of Smithville. I remember that you looked a little dissatisfied, when I came into the counting-room, and rather shook your head over my narrative (perhaps too impassioned) of the events of the game. "Those young fellows," said you, "may not *all* be shiftless, dissipated characters, *yet*,—but see what it comes to! They a'n't content with wasting their time,—they kill it, Sir, actually kill it!" When I thought of the manly figures and handsome, eager faces of my friends of the "Union" and the "Excelsior,"—the Excelsiors won by ten tallies, I should say, the return match to come off at Smithville the next month,—and then looked

at the meagre form and wan countenance of their critic, I thought to myself, "Dolorosus, my boy, *you* are killing something besides Time, if you only knew it."

However, indigo had risen again, and your spirits also. As we walked home, you gave me a precise exhibit of your income and expenditures for the last five years, and a prospective sketch of the same for the next ten; winding up with an incidental delineation of the importance, to a man of business, of a good pew in some respectable place of worship. We found Mrs. D., as usual, ready at the table; we partook of pound-cake (or pound-and-a-half, I should say) and sundry hot cups of a very Cisatlantic beverage, called by the Chinese epithet of tea,—and went, immediately after, to a prayer-meeting. The church or chapel was much crowded, and there was a certain something in the atmosphere which seemed to disqualify my faculties from comprehending a single word that was spoken. It certainly was not that the ventilators were closed, for there were none. The minister occasionally requested that the windows might be let down a little, and the deacons invariably closed them again when he looked the other way. At intervals, females were carried out, in a motionless condition,—not, as it appeared, from conviction of sin, but from faintness. You sat, absorbed in thought, with your eyes closed, and seemed not to observe them. I remember that you were very much shocked when I suggested that the breath of an average sinner exhausted atmospheric air at the rate of a hog'shead an hour, and asked you how much allowance the laws of the universe made for the lungs of church-members? I do not recall your precise words, but I remember that I finally found it expedient, as I was to leave for home in the early train, to spend that night at the neighboring hotel, where I indulged, on an excellent mattress, in a slumber so profound, that it seemed next morning as if I ought, as Dick Swiveller suggested to the single gentleman, to pay for a double-bedded room.

Well, that is all over now. You have given up business, from ill health, and exhibit a ripe old age, possibly a little over-ripe, at thirty-five. Your dreams of the forthcoming ten years have not been exactly fulfilled; you have not precisely retired on a competency, because the competency retired from you. Indeed, the suddenness with which your physician compelled you to close up your business left it closed rather imperfectly, so that most of the profits are found to have leaked out. You are economizing rather strictly, just now, in respect to everything but doctors' bills. The maternal Dolorosa is boarding somewhere in the country, where the children certainly will not have more indigestible food than they had at home, and may get less of it in quantity,—to say nothing of more air and exercise to aid digestion. They are not, however, in perfect condition. The twins are just getting up from scarlet fever; Nathaniel has been advised to leave school for a time; and something is thought to be the matter with Angelina's back. Meanwhile, you are haunting water-cures, experimenting on life-pills, holding private conferences with medical electricians, and thinking of a trip to the Bermudas.

You are learning, through all this, the sagest maxims of resignation, and trying to apply them. "Life is hard, but short," you say; "Providence is inscrutable; we must submit to its mysterious decrees." Would it not be better, my dear Dolorosus, to say instead, "Life is noble and immortal; God is good; we must obey his plain laws, or accept the beneficent penalties"? The rise and fall of health are no more accidental than the rise and fall of indigo; and it is the duty of those concerned in either commodity to keep their eyes open, and learn the business intelligently. Of the three proverbial *desiderata*, it is as easy to be healthy as to be wealthy, and much easier than to be wise, except so far as health and wisdom mean the same thing. After health, indeed, the other necessities of life are very simple, and easily

obtained ;—with moderate desires, regular employment, a loving home, correct theology, the right politics, and a year's subscription to the "Atlantic Monthly," I have no doubt that life, in this planet, may be as happy as in any other of the solar system, not excepting Neptune and the fifty-five asteroids.

You are possibly aware, my dear Dolorous,—for I remember that you were destined by your parents for the physician of your native seaside village, until you found a more congenial avocation in curing mackerel,—that the ancient medals represented the goddess Hygeia with a serpent three times as large as that carried by Æsculapius, to denote the superiority of hygiene to medicine, prevention to cure. To seek health as you are now seeking it, regarding every new physician as if he were Pandora, and carried hope at the bottom of his medicine-chest, is really rather unpromising. This perpetual self-inspection of yours, registering your pulse thrice a day, as if it were a thermometer and you an observer for the Smithsonian,—these long consultations with the other patients in the dreary parlor of the infirmary, the morning devoted to debates on the nervous system, the afternoon to meditations on the stomach, and the evening to soliloquies on the spine,—will do you no good. The more you know, under these circumstances, the worse it will be for you. You will become like Boerhaave's hypochondriacal student, who, after every lecture, believed himself to be the victim of the particular disease just expounded. We may even think too much about *health*,—and certainly too much about *illness*. I solemnly believe that the very best thing that could be done for you at this moment, you unfortunate individual, would be to buy you a saddle-horse and a revolver, and start you tomorrow for the Rocky Mountains, with distinct instructions to treat any man as a Border Ruffian who should venture to allude to the subject of disease in your presence.

But I cannot venture to hope that you

will do anything so reasonable. The fascinations of your present life are too overwhelming; when an invalid once begins to enjoy the contemplation of his own woes, as you appear to do, it is all over with him. Besides, you urge, and perhaps justly, that your case has already gone too far, for so rough a tonic. What, then, can I do for you? Medicine I cannot offer; for even your respectable family-physician occasionally hints that you need something different from that. I suspect that all rational advice for you may be summed up in one prescription: Reverse instantly all the habits of your previous physical existence, and there may be some chance for you. But, perhaps, I had better enter more into detail.

Do not think that I am going to recur to the painful themes of doughnuts and diet. I fear my hints, already given, on those subjects, may wound the sensitive nature of Mrs. D., who suffers now such utter martyrdom from your condition that I cannot bring myself to heap further coals of fire on her head, even though the coals be taken from her own very ineffectual cooking-stove. Let me dwell rather on points where you have exclusive jurisdiction, and can live wisely or foolishly, at your pleasure.

It does not depend on you, perhaps, whether you shall eat bread or saleratus, meat or sole-leather; but it certainly does depend upon yourself whether you shall wash yourself daily. I do not wish to be personal, but I verily believe, O companion of my childhood! that, until you began to dabble in Hydropathy, you had not bestowed a sincere ablution upon your entire person since the epoch when, twenty years ago, we took our last plunge together, off Titecomb's wharf, in our native village. That in your well-furnished house there are no hydraulic privileges beyond pint water-pitchers, I know from anxious personal inspection. I know that you have spent an occasional week at the sea-shore during the summer, and that many people prefer to do up their cleanliness for the year during

these excursions; indeed, you yourself have mentioned to me, at such times, with some enthusiasm, your daily sea-bath. But I have been privately assured, by the other boarders, that the bath in question always consisted of putting on a neat bathing-dress and sitting awhile on a rock among the sea-weed, like an insane merman, with the highest waves submerging only your knees, while the younger Dolorosi splashed and gambolled in safe shallows behind you. Even that is better than nothing, but—Soul of Mohammed!—is that called bathing? Verily, we are, as the Turks declare, a nation of “dirty Franks,” if this be the accepted definition.

Can it be possible that you really hold with the once-celebrated Mr. Walker, “The Original,” as he was deservedly called, who maintained, that, by a correct diet, the system became self-purifying, through an active exhalation which repelled impurity,—so that, while walking on dusty roads, his feet, and even his stockings, remained free from dust? “By way of experiment, I did not wash my face for a week; nor did any one see, nor I feel, the difference.” My deluded friend, it is a fatal error. Mr. Walker, the Original, may have been inwardly a saint and a sage, but it is impossible that his familiar society could have been desirable, even to fools or sinners. Rather recall, from your early explorations in Lemprière’s Dictionary, how Medea renewed the youth of Pelias by simply cutting him to pieces and boiling him; whereon my Lord Bacon justly remarks, that “there may be some boiling required in the matter, but the cutting to pieces is not needful.” If you find that the water-cure agrees with your constitution, I rejoice in it; I should think it would; but, I implore you, do not leave it all behind you when you leave the institution. When you return to your family, use your very first dollars for buying a sponge and a tin-hat, for each member of the household; and bring up the five children to lead decent lives.

Then, again, consider the fact that our

lungs were created to consume oxygen. I suppose that never in your life, Dolorosus, did those breathing organs of yours inhale more than one half the quantity of air that they were intended to take in,—to say nothing of its quality. Yet one would think, that, in the present high prices of other food, you would make the most of the only thing you can put into your mouth gratis. Here is Nature constantly urging on us an unexceptionable atmosphere forty miles high,—for if a pressure of fourteen pounds to the square inch is not to be called urging, what is?—and yet we not only neglect, but resist the favor. Our children commonly learn to spell much better than they ever learn to breathe, because much more attention is paid to the former department of culture. Indeed, the materials are better provided; spelling-books are abundant; but we scarcely allow them time, in the intervals of school, to seek fresh air out of doors, and we sedulously exclude it from our houses and school-rooms. Is it not possible to impress upon your mind the changes which “modern improvements” are bringing upon us? In times past, if a gentleman finished the evening with a quiet cigar in his parlor, (a practice I deprecate, and introduce only for purposes of scientific illustration,) not a trace of it ever lingered to annoy his wife at the breakfast-table; showing that the draft up the open chimney had wholly disposed of it, the entire atmosphere of the room being changed during the night. Now, on the other hand, every whiff lingers persistently beside the domestic altar, and betrays to the youngest child, next day, the parental weakness. For the sake of family example, Dolorosus, correct this state of things, and put in a ventilator. Our natures will not adapt themselves to this abstinence from fresh air, until Providence shall fit us up with new bodies, having no lungs in them. Did you ever hear of Dr. Lyne, the eccentric Irish physician? Dr. Lyne held that no house was wholesome, unless a dog could get in under every door and a bird fly out at every window. He even went so far as

to build his house with the usual number of windows, and no glass in the sashes; he lived in that house for fifty years, reared a large family there, and no death ever occurred in it. He himself died away from home, of small-pox, at eighty; his son immediately glazed all the windows of the house, and several of the family died within the first year of the alteration. The story sounds apocryphal, I own, though I did not get it from Sir Jonah Barrington, but somewhere in the scarcely less amusing pages of Sir John Sinclair. I will not advise you, my unfortunate sufferer, to break every pane of glass in your domicile, though I have no doubt that Nathaniel and his boy-companions would enter with enthusiasm into the process; I am not fond of extremes; but you certainly might go so far as to take the nails out of my bed-room windows, and yet keep a good deal this side the Lyne.

I hardly dare go on to speak of exercise, lest I should share the reproach of that ancient rhetorician who,—as related by Plutarch, in his *Aphorisms*,—after delivering an oration in praise of Hercules, was startled by the satirical inquiry from his audience, whether any one had ever dispraised Hercules. As with Hercules, so with the physical activity he represents,—no one dispraises, if few practise it. Even the disagreement of doctors has brought out but little skepticism on this point. Cardan, it is true, in his treatise, "*Plantæ cur Animalibus diuturniores*," maintained that trees lived longer than men because they never stirred from their places. Exercise, he held, increases transpiration; transpiration shortens life; to live long, then, we need only remain perfectly still. Lord Bacon fell in with this fancy, and advised "oily unctions," to prevent perspiration. Mauderpertuis went farther, and proposed to keep the body covered with pitch for this purpose: conceive, Dolorosus, of spending threescore years and ten in a garment of tar, without even the ornament of feathers, sitting tranquilly in our chairs, waiting for longevity! In more recent

times, I can remember only Dr. Darwin as an advocate of sedentary living. He attempted to show its advantages by the healthy longevity attained by quiet old ladies in country-towns. But this is questioned by his critic, Dr. Beddoes, who admits the longevity, but denies the healthiness; he maintains that the old ladies are taking some new medicine every day,—at least, if they have a physician who understands his business.

Now I will not maintain, with Frederick the Great, that all our systems of education are wrong, because they aim to make men students or clerks, whereas the mere shape of the body shows (so thought King Frederick) that we are primarily designed for postilions, and should spend most of our lives on horseback. But it is very certain that all the physical universe takes the side of health and activity, wooing us forth into Nature, imploring us hourly, and in unsuspected ways, to receive her blessed breath into body and soul, and share in her eternal youth. For this are summer and winter, seed-time and harvest, given; for this do violet and bloodroot come, and gentian and witch-hazel go; for this do changing sunsets make yon path between the pines a gateway into heaven; for this does day shut us down within the loneliness of its dome of light, and night, lifting it, make us free of the vast fellowship of stars; for this do pale meteors wander nightly, soft as wind-blown blossoms, down the air; for this do silent snows transform the winter woods to feathery things, that seem too light to linger, and yet too vast to take their flight; for this does the eternal ocean follow its queen with patient footsteps round earth's human shores; for this does all the fair creation answer to every dream or mood of man, so that we receive but what we give;—all is offered to us, to call us from our books and our trade, and summon us into Nature's health and joy. To study, with the artist, the least of her beauties,—to explore, with the man of science, the smallest of her wonders,—or even simply

to wander among her exhaustless resources, like a child, needing no interest unborrowed from the eye,—this feeds body and brain and heart and soul together.

But I see that your attention is wandering a little, Dolorosus, and perhaps I ought not to be surprised. I think I hear you respond, impatiently, in general terms, that you are not “sentimental.” I admit it; never within my memory did you err on that side. You also hint that you never *did* care much about weeds or bugs. The phrases are not scientific, but the opinion is intelligible. Perhaps my ardor has carried me too fast for my audience. While it would be a pleasure, no doubt, to see you transformed into an artist or a *savant*, yet that is scarcely to be expected, and, if attained, might not be quite enough. The studies of the naturalist, exclusively pursued, may tend to make a man too conscious and critical,—patronizing Nature, instead of enjoying her. He may even grow morbidly sensitive, like Buffon, who became so impressed with the delicacy and mystery of the human organization, that he was afraid to stoop even to pick up his own pen, when dropped, but called a servant to restore it. The artist, also, becomes often narrowed and petty, and regards the universe as a sort of factory, arranged to turn out “good bits of color” for him. Something is needed to make us more free and unconscious, in our out-door lives, than these too wise individuals; and that something is best to be found in athletic sports. It was a genuine impulse which led Sir Humphrey Davy to care more for fishing than even for chemistry, and made Byron prouder of his swimming than of “Childe Harold,” and induced Sir Robert Walpole always to open his gamekeeper’s letters first, and his diplomatic correspondence afterwards. Athletic sports are “boyish,” are they? Then they are precisely what we want. We Americans certainly do not have much boyhood under the age of twenty, and we must take it afterwards or not at all.

Who can describe the unspeakable refreshment for an overworked brain, of laying aside all cares, and surrendering one’s self to simple bodily activity? Laying them aside! I retract the expression; they slip off unnoticed. You cannot embark care in your wherry; there is no room for the odious freight. Care refuses to sit behind the horseman, despite the Latin sentence; you leave it among your garments when you plunge into the river, it rolls away from the rolling cricket-ball, the first whirl in the gymnasium disposes of it, and you are left free, as boys and birds are free. If athletic amusements did nothing for the body, they would still be medicine for the soul. Nay, it is Plato who says that exercise will almost cure a guilty conscience,—and can we be indifferent to this, my fellow-sinner?

Why will you persist in urging that you “cannot afford” these indulgences, as you call them? They are not indulgences,—they are necessities. Charge them, in your private account-book, under the heads of food and clothing, and as a substitute for your present enormous items under the head of medicine. O mistaken economist! can you afford the cessation of labor and the ceaseless drugging and douching of your last few years? Did not all your large experience in the retail-business teach you the comparative value of the ounce of prevention and the pound of cure? Are not fresh air and cold water to be had cheap? and is not good bread less costly than cake and pies? Is not the gymnasium a more economical institution than the hospital? and is not a pair of skates a good investment, if it aids you to elude the grasp of the apothecary? Is the cow Pepsin, on the whole, a more frugal hobby to ride than a good saddle-horse? Besides, if you insist upon pecuniary economy, do begin by economizing on the exercise which you pay others for taking in your stead,—on the corn and pears which you buy in the market, instead of removing to a suburban house and raising them yourself,—and in the reluctant silver you pay the Irishman

who splits your wood. Or if, suddenly reversing your line of argument, you plead that this would impoverish the Irishman, you can at least treat him as you do the organ-grinder, and pay him an extra fee to go on to your next neighbor.

Dolorous, there is something very noble, if you could but discover it, in a perfect human body. In spite of all our bemoaning, the physical structure of man displays its due power and beauty when we consent to give it a fair chance. On the cheek of every healthy child that plays in the street, though clouded by all the dirt that ever incrustated a young O'Brien or M'Cafferty, there is a glory of color such as no artist ever painted. I can take you to-morrow into a circus or a gymnasium, and show you limbs and attitudes which are worth more study than the Apollo or the Antinoüs, because they are life, not marble. How noble were Horatio Greenough's meditations, in presence of the despised circus-rider! "I worship, when I see this brittle form borne at full speed on the back of a fiery horse, yet dancing as on the quiet ground, and smiling in conscious safety."

I admit that this view, like every other, may be carried to excess. We can hardly expect to correct our past neglect of bodily training, without falling into reactions and extremes, in the process. There is our friend Jones, for instance, "the Englishman," as the boys on the Common call him, from his cheery portliness of aspect. He is the man who insisted on keeping the telegraph-office open until 2, A. M., to hear whether Morrissey or the Benicia Boy won the prize-fight. I cannot say much for his personal conformity to his own theories at present, for he is growing rather too stout; but he likes vicarious exercise, and is doing something for the next generation, even if he does make the club laugh, sometimes, by advancing theories of training which the lower circumference of his own waistcoat does not seem to justify. But Charley, his eldest, can ride, shoot, and speak the truth, like an ancient

Persian; he is the best boxer in college, and is now known to have gone to Canada *incog.*, during the vacation, under the immediate supervision of Morris, the teacher of sparring, to see that same fight. It is true that the youth blushes, now, whenever that trip is alluded to; and when he was cross-questioned by his pet sister Kate, (Kate Coventry she delights to be called,) as to whether it wasn't "splendid," he hastily told her that she didn't know what she was talking about, (which was undoubtedly true,)—and that he wished he didn't, either. The truth is, that Charley, with his honest, boyish face, must have been singularly out of place among that brutal circle; and there is little doubt that he retired from the company before the set-to was fairly begun; and that respectable old Morris went with him. But, at any rate, they are a noble-looking family, and well brought up. Charley, with all his pugilism, stands fair for a part at Commencement, they say; and if you could have seen little Kate teaching her big cousin to skate backwards, at Jamaica Pond, last February, it would have reminded you of the pretty scene of the little cadet attitudinizing before the great Formes, in "Figaro." The whole family incline in the same direction; even Laura, the elder sister, who is attending a course of lectures on Hygiene, and just at present sits motionless for half an hour before every meal for her stomach's sake, and again a whole hour afterwards for her often (imaginary) infirmities,—even Laura is a perfect Hebe in health and bloom, and saved herself and her little sister when the boat upset, last summer, at Dove Harbor,—while the two young men who were with them had much ado to secure their own elegant persons, without rendering much aid to the girls. And when I think, Dolorous, of this splendid animal vigor of the race of Jones, and then call to mind the melancholy countenances of your forlorn little offspring, I really think that it would, on the whole, be unsafe to trust you with that revolver; you might be

tempted to damage yourself or somebody else with it, before departing for the Rocky Mountains.

Do not think me heartless for what I say, or assume, that, because I happen to be healthy myself, I have no mercy for ill-health in others. There are invalids who are objects of sympathy indeed, guiltless heirs of ancestral disease, or victims of parental folly or sin,—those whose lives are early blighted by maladies that seem as causeless as they are cureless,—or those with whom the world has dealt so cruelly that all their delicate nature is like sweet bells jangled,—or those whose powers of life are all exhausted by unnoticed labors and unseen cares,—or those prematurely old with duties and dangers, heroes of thought and action, whose very names evoke the passion and the pride of a hundred thousand hearts. There is a tottering feebleness of old age, also, nobler than any prime of strength; we all know aged men who are floating on, in stately serenity, towards their last harbor, like Turner's Old Téméraire, with quiet tides around them, and the blessed sunset bathing in loveliness all their dying day. Let hu-

man love do its gracious work upon all these; let angelic hands of women wait upon their lightest needs, and every voice of salutation be tuned to such a sweetness as if it whispered beside a dying mother's bed.

But you, Dolorous,—you, to whom God gave youth and health, and who might have kept them, the one long and the other perchance always, but who never loved them, nor revered them, nor cherished them, only coined them into money till they were all gone, and even the ill-gotten treasure fell from your debilitated hands,—you, who shunned the sunshine as if it were sin, and called all innocent recreation time wasted,—you, who staid under ground in your gold-mine, like the sightless fishes of the Mammoth Cave, till you were as blind and unjoyous as they,—what plea have you to make, what shelter to claim, except that charity which suffereth long and is kind? We will strive not to withhold it; while there is life, there is hope. At forty, it is said, every man is a fool or a physician. We will wait and see which vocation you select as your own, for the broken remnant of your days.

THE UTAH EXPEDITION:

ITS CAUSES AND CONSEQUENCES.

[Continued.]

In the mean while Congress had assembled. The agitation on the subject of Slavery, far from being suppressed, or even overshadowed, burned more fiercely than ever before. The Proslavery faction in Kansas, stimulated by the constant support of the National Administration, was engaged in a final effort to maintain a supremacy over the affairs of that Territory which the current

of immigration from the Free States had been steadily undermining. Against the will of nine-tenths of the population, it had framed, with a show of technical legality, a Constitution intended to perpetuate Slavery, which the Administration indorsed and presented to Congress with an urgent recommendation for the admission under it of Kansas as a State. In the commotion which these events ex-

cited throughout the country, the transient gleam of importance which had attached to the Mormon War was almost extinguished. The people of the States no longer felt a much more vital interest in news from that remote region than in tidings from the rebellion in India or of the wars in China. Their attention, sympathies, and curiosity were all fastened upon the action of Congress with respect to Kansas,—for therein, it was believed, were contained the germs of the political combinations for the Presidential election of 1860. The same listlessness with regard to affairs in Utah pervaded the Cabinet. All its *prestige* was staked on the result of the impending struggle in the House of Representatives over the Lecompton Constitution, and its energies were abstracted from every other subject, to be concentrated upon that alone.

Just at this time, Mr. Thomas L. Kane, of Pennsylvania,—son of the late Judge of the United States District Court for that State, and brother of the late Dr. Kane, the Arctic explorer,—solicited the Administration for employment as a mediator between the Mormons and the Federal Government. Mr. Kane was one of the few persons of education and social standing who were well acquainted with Mormon history. He had visited them at Winter Quarters, in Iowa, during their exodus from Nauvoo, in the capacity of a commissioner to enlist the Mormon battalion which served in the Mexican War. During an illness which attacked him there, he was treated with an unremitting kindness, for which his gratitude has been proportionate. Belonging to a family whose members have been distinguished by strong traits of individuality, not to say eccentricity, from that moment forward he displayed a practical interest in the welfare of the sect. It is said that he became a convert to the religious doctrines of Mormonism. Whether this be true at all, and, if so, to what extent, it would be profitless at the present time to inquire. For the purposes of this narrative, it is sufficient to assert only, what is unchallenged, that he

was a sincere admirer of the Mormons as a people, and for a long series of years had defended them from every reproach with a zeal which many of his friends thought inordinate.

Its experience in Kansas had familiarized the Cabinet with the use of secret agents; but, nevertheless, the proposition of Mr. Kane was coldly received. After a brief correspondence, he started for California, in no capacity a representative of the government, if he himself is to be believed, but bearing letters from Mr. Buchanan indorsing his character as a gentleman, and exhorting Federal officials to render him such courtesies as were within their power. Having arrived at San Francisco, he journeyed southward to the lately abandoned Mormon settlement of San Bernardino, near Los Angeles, travelling under the assumed name of Osborne, and proclaiming his business to be the collection of specimens for an entomological society in Philadelphia. There his real name and purpose were detected, but he succeeded in obtaining transportation to Salt Lake City, where he arrived on the 25th of February, 1858, and was greeted by Young and Kimball, and the rest of the Mormon magnates, as an old and cherished friend.

In the Annual Message of the President to Congress, his disposition to make every other issue subordinate to that of admitting Kansas under the Lecompton Constitution was manifest; and it influenced the tone of those paragraphs which treated of affairs in Utah. Notwithstanding the fact that the Mormons had committed every act of warfare against the United States short of taking life, Mr. Buchanan qualified his language concerning their conduct, stating, that, "unless Brigham Young should retrace his steps, the Territory of Utah will be in a state of open rebellion," but declining to accept the logical inference from his own expression, that the rebellion was at the time open and manifest. He recommended no further legislation concerning the matter than that four regiments

should be added to the army, to supply the place of those which had been withdrawn from service in the East.

It was evident that the purpose for which he had originally planned the expedition had failed. Forced, after all, no less by inclination than by circumstances, into such a revival of Slavery agitation as he had never contemplated during the interval between his election and inauguration, the Utah War only incumbered his administration, promoting neither its policy nor its prosperity. However it might result, it would not in the least advance his interests; and it became his opinion, that, the sooner it was quieted, the better for the welfare of the Democratic party, which would be held responsible by the country for all mistakes in its management. "After us the deluge," seemed to be adopted as the motto of the entire policy of the Administration.

The only movement in Congress concerning Utah, before the New Year, was the introduction into the House of Representatives, by Mr. Warren of Arkansas, of a badly-worded resolution, prefaced by a worse-worded preamble, looking to the expulsion from the floor of Mr. Bernhisel, the Mormon delegate from the Territory. A lively discussion ensued concerning the question of privilege under which Mr. Warren claimed the right to introduce the resolution,—and when it was ruled in order, much hesitation was evinced about adopting it, some members fearing that it would establish a dangerous precedent for emergencies that might arise in the future history of the country. The tone of debate showed that there was little difference of opinion in the House concerning Utah affairs,—the unanimity, however, being due in great part to ignorance and indifference. The issue of Slavery in Kansas was absorbing. Mr. Warren's resolution was referred to the Committee on Territories, and slumbered upon their table through the whole session. The only other movement in Congress, which deserves mention in this connection, was the introduction, towards

the close of January, by Senator Wilson of Massachusetts, of a joint resolution authorizing the appointment of commissioners to examine into the Mormon difficulties, "with a view to their adjustment." This was referred by the Senate to the Committee on Military Affairs, and was never heard of again.

The recommendation of the President for an increase of the army secured favorable consideration from committees of both Houses, and the discussion which ensued, upon the bills reported for that purpose, was filled with allusions to the Utah question. Mr. Thompson of New York, and Mr. Boyce of South Carolina, both made elaborate speeches on the subject; but neither of them proposed any scheme for its solution. Such a scheme, however, was suggested by Mr. Blair of Missouri, who advised a reorganization of the Territorial government, in order to vest the legislative power in the Governor and the Judges, for which a precedent existed in the instance of the old Northwestern Territory; but no action was had upon this suggestion. Through the entire debate, Mr. Bernhisel remained silent. During the winter, the President conferred upon Colonel Johnston the brevet rank of Brigadier-General, believing that the uniform discretion he had manifested entitled him to promotion; and the nomination was confirmed by the Senate.

While such were the transactions in Congress, the Mormons, in December, had organized a government like that under which they had hitherto subsisted. Their legislature—the same which had been elected under the Organic Act of the Territory—met at Salt Lake City on the second Monday of that month, in the hall of the Council House, and organized by the choice of Heber C. Kimball as President of the Council and John Taylor as Speaker of the House. Brigham Young retained the title and authority of Governor, and addressed to the legislature the customary annual message, reviewing the condition of the Territory. This document was prepared in reality by Taylor,

and was worded with considerable ingenuity. Not the slightest allusion was made to the declarations of independence that had been reiterated throughout the summer and autumn, but the relations of Utah to the United States were discussed as those of a Territory to the Union. The President was himself charged with treason in his action towards the Mormons, the Governor and Judges whom he had appointed were reviled as depraved and abandoned men, and the army was again proclaimed a mob,—while Utah was lauded as the “most loyal Territory known since the days of the Revolution.” The theory of Squatter-Sovereignty was the basis of the argument, and Mr. Buchanan was accused, and with some reason, of inconsistency in his application of that doctrine.

In response to this message, the legislature passed a series of resolutions, pledging itself to sustain “His Excellency Governor Young” in every act he might perform or dictate “for the protection of the lives, peace, and prosperity of the people of the Territory,”—asserting that the President had incurred the “contempt and decided opposition of all good men,” on account of the “act of usurped authority and oppression” of which he was guilty, in “forcing profane, drunken, and otherwise corrupt officials upon Utah at the point of the bayonet,”—expressing a determination to “continue to resist any attempt on the part of the Administration to bring the people into a state of vassalage by appointing, contrary to the Constitution, officers whom the people have neither voice nor vote in electing,”—avowing the purpose not to suffer “any persons appointed to office for Utah by the Administration either to qualify for, or assume, or discharge, within the limits of the Territory, the functions of the offices to which they have been appointed, so long as the Territory is menaced by an invading army,”—and declaring that the people of Utah *would* have their voice in the selection of their officers. These were sweet-scented blossoms to blow so early on the tree of Squatter-

Sovereignty, at that time scarcely four years old!

The only acts of the legislature were one disorganizing the County of Green River, in which the army was encamped, and attaching it for legislative and judicial purposes to Great Salt Lake County; another divesting the Governor of power to license the manufacture of ardent spirits, and conferring that authority upon the President of the Church of Jesus Christ of Latter-Day Saints; and several others in pursuance of the system of granting away large tracts of public domain to private persons, in direct contravention of a clause in the Organic Act of the Territory, which provides that “no law shall be passed interfering with the primary disposal of the soil.” To these acts Brigham Young attached his signature as Governor, and affixed the Territorial seal.

A Memorial to Congress was adopted also, which was transmitted to Washington, and received there and laid before the two Houses on the 16th of March. This document charged that the action of the National Government towards Utah was based upon the statements of “lying officials and anonymous letter-writers”; it rehearsed the history of the Mormons,—their persecutions in Missouri and Illinois,—and declared that the object of the Utah expedition was to inflict similar outrages. “Give us our constitutional rights,” it said; “they are all we ask; and them we have a right to expect. For them we contend, and feel justified in so doing. We claim that we should have the privilege, as we have the constitutional right, to choose our own rulers and make our own laws without let or hindrance.” Although this Memorial was nothing more than an infuriated tirade, it was honored in both Houses by reference to the Committees on Territories, from which it received all the consideration it deserved.

Indifferent and inactive as this review shows Congress and the President to have been concerning Utah, a similar apathy was impossible in the War De-

partment. Not only the welfare, but the lives even, of the troops at Fort Bridger, depended on its action. Transactions of such magnitude had not been incumbent on its bureaus since the Mexican War. The chief anxiety of General Johnston was for the transmission of supplies from the East as early as possible in the spring. The contractors for their transportation during the year 1857 had wintered several trains at Fort Laramie, together with oxen and teamsters. The General entertained a fear that so great a proportion of their stock might perish during the winter as to cripple their advance until fresh animals could be obtained from the States. Combined with this fear was an apprehension for the safety of Captain Marcy. A prisoner, whom the Mormons had captured in October on Ham's Fork, escaped from Salt Lake City at the close of December, and brought news to Camp Scott that they intended to fit out an expedition to intercept the command and stampede the herds with which that officer would move from New Mexico. The dispatches in which these anxieties were communicated to General Scott, together with suggestions for their relief, were intrusted in midwinter to a small party for conveyance to the States. The journey taught them what must have been the sufferings of the expedition which Captain Marcy led to Taos. Reduced at one time to buffalo-tallow and coffee for sustenance, there was not a day during the transit across the mountains when any stronger barrier than the lives of a few half-starved mules interposed between them and death by famine. All along the route lay memorials of the march of the army, and especially of Colonel Cooke's battalion,—a trail of skeletons a thousand miles in length, gnawed bare by the wolves and bleaching in the snow, visible at every undulation in the drifts.

But before the arrival of these dispatches at New York, the arrangements of the War Department to forward supplies to Utah had been completed. The

representations of the contractors' agents with regard to the condition of the cattle at Fort Laramie were received without question, and Brevet Lieutenant-Colonel Hoffmann, of the Sixth Infantry, was dispatched to that post to superintend the advance of the trains. Additional contracts, of an unprecedented character, were entered into for furnishing and transporting all the supplies which would be needed during the year 1858, both for the troops already in the Territory and for the reinforcements which were ordered to concentrate at Fort Leavenworth and march to Utah as soon as the roads should be passable. These reinforcements were about three thousand strong, comprising the First Cavalry, the Sixth and Seventh Infantry, and two artillery-batteries. The trains necessary for so large a force, in addition to that at Fort Bridger, it was estimated would comprise at least forty-five hundred wagons, requiring more than fifty thousand oxen, four thousand mules, and five thousand teamsters, wagon-masters, and other *employés*. To the shame of the Administration, these gigantic contracts, involving an amount of more than six million dollars, were distributed with a view to influence votes in the House of Representatives upon the Lecompton Bill. Some of the lesser ones, such as those for furnishing mules, dragoon-horses, and forage, were granted arbitrarily to relatives or friends of members who were wavering upon that question. The principal contract, that for the transportation of all the supplies, involving, for the year 1858, the amount of four millions and a half, was granted, without advertisement or subdivision, to a firm in Western Missouri, whose members had distinguished themselves in the effort to make Kansas a Slave State, and now contributed liberally to defray the election-expenses of the Democratic party.

It was said to have been contemplated, for a while, during the winter, to operate against the Mormons from California, and to send General Scott to San Francisco to direct arrangements for the pur-

pose; but the project, if ever seriously entertained, was soon abandoned, it being evident that for the speedy subjugation of Utah the Missouri frontier furnished the only practicable base-line of operations.

At Camp Scott, the winter dragged along wearily. Between November and March only two mails arrived there, and the great monetary crisis in the United States was unknown till months after it had subsided. The Mormons were constantly in possession of later intelligence from the States than the army; for, by a strange inconsistency, their mails to and from California were not interfered with. A brigade-guard was mounted daily at the camp larger than that of the whole American army on the eve of the battles before Mexico, and scouting parties were continually dispatched to scour the country in a circuit of thirty miles around Fort Bridger; for there was constant apprehension of an attempt by the Mormons to stampede the herds on Henry's Fork, if not to attack the regiment which guarded them. No tidings arrived from Captain Marcy, and a most painful apprehension prevailed as to his fate. At the close of January, Dr. Hurt, the Indian Agent, after consultation with General Johnston, started from the camp, accompanied only by four Pah-Utahs, and crossed the Uinta Mountains, through snow drifted twenty feet deep, to the villages of the tribe of Uinta-Utahs, on the river of the same name. It was his intention, in case of need, to employ these Indians to warn Captain Marcy of danger and afford him relief. It proved to be unnecessary to do so, and Dr. Hurt returned in April; but the hardships he endured in the undertaking resulted in an illness which threatened his life for weeks. On the 13th of March, an express had come in from New Mexico, bringing news of the safe arrival of Captain Marcy at Taos on the 22d of January. The sufferings of his whole party from cold and hunger had been severe. Their provisions failed them, and they had recourse to mule-meat. Many of the men were badly

frost-bitten, but only one perished on the journey.

On the previous evening, — March 12th, — the monotony of the camp had been unexpectedly disturbed by the arrival, from the direction of Salt Lake City, of a horseman completely exhausted by fatigue and cold, who proved to be no other than Mr. Kane, whose mission to the Mormons by way of California was at that time totally unknown to the army. The next morning he introduced himself to the Governor, was received as his guest, and remained in conference with him throughout the day. What was the character of their communication is unknown, except by inference from its results. When presented to Judge Eckels, on the following day, Mr. Kane exhibited to him the letters he bore from the President, and other letters, also, from Brigham Young, accrediting him as a negotiator in the existing difficulties. To General Johnston he showed nothing; nor did the Governor, to the knowledge of the camp, acquaint either that officer or any other person with the purport of his business. It was evident to everybody, however, that the Mormon leaders, conscious of their inability to resist the force by which they would be assailed so soon as the snow should melt upon the mountains, were engaged in an effort, of which Mr. Kane was the agent, to secure through the Governor, if possible, indemnity for their past offences, in consideration of acknowledgment of his authority.

The domestic condition of the people of the Valley confirmed the belief that this was the purpose of Mr. Kane's mission. Dependent as they had always been, since their settlement in Utah, upon Eastern merchants for an annual supply of groceries, dry goods, wearing-apparel of all descriptions, and every article of luxury, their stock of some of even the necessities of life—such as coffee, tea, sugar, tobacco, calicoes, boots and shoes, stationery—was at this time nearly exhausted. Many of the poorer families were actually half naked, and, to supply

them with covering, an ecclesiastical mandate had been issued, directing all persons who had spare clothing of any description to deposit it at the tithing-office in Salt Lake City, to be there exchanged for grain and cattle with those who were in need.

At the commencement of the rebellion, the Mormon settlements in Southern California had been broken up, and all the missionaries of the Church were summoned to return from foreign lands. The influx of population from these sources, though slight, yet increased the destitution. Almost all the people, too, had been withdrawn from productive employments throughout the autumn and winter. Although the number of militia kept under arms, after the formation of the camp at Fort Bridger, probably at no time reached fifteen hundred, while in October and November it had exceeded three thousand, still the fever of excitement which raged through the community distracted its members from any hearty labor. Great quantities of winter-wheat, to be sure, had been sown, and the fields were prepared for cultivation during the coming summer; but no public improvements were prosecuted, and everybody was prepared for such an exodus as had been predicted to Captain Van Vliet.

The complete subserviency of the people to the hierarchy was never more strikingly manifest than in a financial scheme which Brigham Young devised at this time. Among the Mormons there had always been a quantity of gold coin in circulation, much exceeding, in proportion to their number, the amount circulating in any other portion of America. This was owing to the fact, that the Church had unconstitutionally arrogated to itself the prerogative of coining and regulating the value of money. The Mormon battalion which had been enlisted at Winter Quarters in Iowa was disbanded in California at the close of the Mexican War, and most of its members went to the gold-diggings. The treasures they there accumulated were conveyed to Utah, where the Church established a

mint and coined gold pieces of \$2.50, \$5, \$10, and \$20. The device on the obverse was two hands clasped in one of the grips of the Endowment; on the reverse, a figure from the Book of Mormon, with the motto, "Holiness to the Lord." The intrinsic value of these coins being more than ten per cent. less than their denominations, they were all retained within the Territory. Young now prevailed upon his people to surrender whatever gold and silver they possessed, amounting to several hundred thousand dollars, and accept in return the notes of a banking association of which he himself was president and one of his numerous sons-in-law cashier. These notes were redeemable, in amounts of not less than one hundred dollars, in live stock, the appraisement of the value of which rested with the officers of the association. So absolute was the degradation and ignorance of the population, that they submitted to this extortion without a murmur.

Mr. Kane had remained in Salt Lake City eight days before starting towards Fort Bridger, — a period quite long enough for a trusted friend of the Mormon leaders to ascertain the extremities to which the people were reduced. To secure the safety of those leaders who were under indictment for treason, there was no choice except between flight and inducing the Federal authorities to temporize. Both he and they were conscious that the advance of the army could not be successfully resisted, when the snow should cease to bar its way. In case of the flight of the leaders, or of a general exodus of the population, only two courses lay open to them, — northward toward the British Possessions, southward toward the provinces of Upper Mexico.

The first two days of Mr. Kane's sojourn in camp satisfied him of the co-operation of Governor Cumming in a plan for temporizing, as well as of the impossibility of enlisting General Johnston or Judge Eckels in any such scheme. An imaginary affront, to which he believ-

ed himself at this time to have been subjected by the General, led him into a course of action which, had it been followed out, might have terminated his mission abruptly. Considering the fact that he was within the guard-lines of a military encampment, in a country where a state of warfare existed, it was perhaps too great forbearance on the part of the General not to have required to be informed of his business, since he himself volunteered no explanation. An invitation to dinner being dispatched to him from headquarters,—and such an invitation was no slight compliment in a camp where the rations were so abridged,—the orderly to whom it was intrusted for delivery, whether maliciously or not it does not appear, pretended to have mistaken his directions, and proceeded to place him under arrest. The mistake, when discovered, was of course immediately rectified; but Mr. Kane became so excited in consequence, that, with the assent of the Governor, he indited a challenge to the General, and applied to a gentleman from Virginia to act as his second. Having received a decided rebuff in that quarter, he was induced to abandon the design by the interposition of Judge Eckels, who became acquainted with what was passing, and informed the Governor that he had ordered the United States Marshal to arrest all the parties concerned, in case another step should be taken in the affair. It was not till some time afterwards that these transactions came to the knowledge of General Johnston.

Mr. Kane remained with the Governor until April, absenting himself once, however, for a day, in order to hold a secret interview with a party of Mormons who had come into the vicinity of the camp. Notwithstanding his presence, no precaution to protect the herds was neglected, nor was the guard-duty at all relaxed. On the 18th of March, although a furious snow-storm raged all day long, the encampment was moved down Black's Fork to the immediate neighborhood of Fort Bridger,—a spot less sheltered, but

far more secure from attack. On the 3d of April, an event occurred for which everybody was prepared. The Governor announced to General Johnston his intention to proceed to Salt Lake City in company with Mr. Kane; and on the 5th, they started upon the journey.

The District Court commenced its spring term at Fort Bridger the same day. In his charge to the grand jury, Judge Eckels was explicit on the subject of polygamy, instructing them substantially as follows:—That among the Territorial statutes there was no act legalizing polygamy, nor any act affixing a definite punishment to that practice as such; that, consequently, whether the old Spanish law or the Common Law constituted the basis of jurisprudence in the Territory, the definition of marriage recognized by both was to be received there, which limited that institution to the union of one man with one woman, and also the definition of adultery common to both, by which that crime consisted in the cohabitation of either the man or the woman with a third party; that among the Territorial statutes there was an act affixing a definite punishment to adultery, and accordingly that it was the duty of the grand jury to inquire whether that act had been infringed by parties liable to their inquisition.* No indictment, however, was re-

* As this charge has become of great importance in the affairs of the Territory, we subjoin the precise language of that portion of it which refers to polygamy:—

"It cannot be concealed, gentlemen, that certain domestic arrangements exist in this Territory destructive of the peace, good order, and morals of society,—arrangements at variance with those of all enlightened and Christian communities in the world; and sapping as they do the very foundation of all virtue, honesty, and morality, it is an imperative duty falling upon you as grand jurors diligently to inquire into this evil and make every effort to check its growth. It is well known that all of the inhabited portion of this Territory was acquired by treaty from Mexico. By the law of Mexico polygamy was prohibited in this country, and the municipal law in this respect remained unaltered by its cession to the United States. Has it been altered since

turned for the offence; neither were any proceedings had upon the indictments for treason. The business of the court was restricted to such crimes as larceny, and assault and battery, among the heterogeneous mass of camp-followers.

At the distance of a few miles from Fort Bridger, the Governor and Mr. Kane were received by a Mormon guard. At various points on their journey squads of militia were encountered, and in Echo Cañon there was a command of several hundred. The Big Mountain, which the road crosses twenty miles from Salt Lake City, was covered so deep with snow, that the party was obliged to follow the cañons of the Weber River into the Valley. Upon arriving at the city, on the 12th of April, the Governor was installed in the house of a Mr. Staines, one of the adopted sons of Brigham Young, and was soon after waited upon by Young himself, in company with numerous ecclesiastical dignitaries. The Territorial seal was tendered to him, and he was recognized to his full satisfaction in his official capacity. He remained more than three weeks. Except fugitive statements in newspapers, the only connected account of his proceedings is from his own pen, and consists of two official letters,—one

we acquired it? After a most diligent search and inquiry, I have not been able to find that any such change has been made: and presuming that this law remains unchanged by legislation, all marriages after the first are by this law illegal and void. If you are then satisfied that such is the fact, your next duty is to inquire by what law in force in this Territory are such practices punishable. There is no law in this Territory punishing polygamy, but there is one, however, for the punishment of adultery; and all illegal intercourse between the sexes, if either party have a husband or wife living at the time, is adulterous and punishable by indictment. No consequences in which a large proportion of this people may be involved in consequence of this criminal practice will deter you from a fearless discharge of your duty. It is yours to find the facts and to return indictments, without fear, favor, affection, reward, or any hope thereof. The law was made to punish the lawless and disobedient, and society is entitled to the salutary effects of its execution."

addressed to General Johnston, under date of April 15th, the other to the Secretary of State at Washington, dated May 2d. The former merely announces his arrival, reception, and recognition, transmits charges against Dr. Hurt, of having excited the Uinta Indians to acts of hostility against the Mormons, and suggests that he should desire a detachment of the army to be dispatched to chastise that tribe,—but a requisition for that purpose was made neither then nor subsequently. The letter to Secretary Cass states that his time was devoted to examining the public property of the United States which was in the city,—the records of the courts, the Territorial library, the maps and minutes of the Surveyor General,—and exculpates the Mormons, in great part, from the charge of having injured or embezzled it.

During his stay, information was communicated to him, that there was a number of persons who were desirous of leaving the Territory, but unable to do so, considering themselves restrained of their liberty. Accordingly, on the following Sunday, he caused notice to be given from the platform in the Tabernacle, that he assumed the protection of all such persons, and desired them to communicate to him their names and residences. During the ensuing week, nearly two hundred persons registered themselves in the manner he proposed, and a greater number would undoubtedly have been glad to follow their example, but were deterred by the surveillance to which they were subjected by certain functionaries of the Church before being admitted to his presence. Those who were registered were organized into trains, with the little movable property they possessed, and dispatched towards Fort Bridger. They arrived there in the course of May,—as motley, ragged, and destitute a crowd as ever descended from the deck of an Irish emigrant-ship at New York or Boston. The only garments which some possessed were made of the canvas of their wagon-cov-

ers. Many were on foot. For provisions, they had nothing except flour and some fresh meat. It is a fact creditable to humanity, that private soldiers, by the score, shared their own abridged rations and scanty stock of clothing with these poor wretches, and in less than a day after their arrival they were provided with much to make them comfortable.

On that same Sunday, the Governor made a speech to the congregation, being introduced by Brigham Young. He reviewed the relations of the Mormons to the Federal government; assumed that General Johnston and the army were under his control; pledged his word that they should not be stationed in immediate contact with the settlements; and gave assurances, also, that no military *posse* should be employed to arrest a Mormon until every other means had been tried and had failed. At the close, he invited any of their number to respond. Various persons immediately addressed the audience in almost frantic speeches, concerning the murder of Joseph and Hiram Smith at Carthage, the persecution of the Saints in Missouri and Illinois, the services rendered by the Mormon Battalion to an ungrateful country during the Mexican War, the toils and perils of the migration to Utah, and the character of the Federal officers who had been sent to rule the Territory. Personal insults were heaped upon the Governor, and a scene of the wildest confusion was the result, which was quieted with great difficulty by Young himself. It was manifest that the mass of the people, over-confident of their capacity to resist the troops, were not fully prepared for the capitulation the leaders were willing to make to save their own necks from the halter; and, at a second meeting during the afternoon, Young yielded somewhat to the popular clamor.

All this while, a movement of a most extraordinary character was being carried on, which had commenced before the Governor entered the Valley. The people of the northern settlements, along the base of the Wahsatch Mountains, in-

cluding Salt Lake City, were deserting their homes, abandoning houses, crops, and their heavier furniture, and migrating southward. Long wagon-trains were sweeping through the city every day, accompanied by hundreds of families; and droves of horses and cattle. A fair estimate of the entire Mormon population of Utah is about forty-five thousand. Of this number, ten thousand is the proportion of the towns north of Salt Lake City, and upward of fifteen thousand that of the city itself and the settlements in its immediate neighborhood. Considerably more than half the people of the Territory, therefore, shared in this emigration. What was its object and what its destination are still mysteries; but it was probably directed toward the mountain-ranges in the southwestern portion of the Great Basin, of the topography of which region—hitherto unvisited by Federal explorers—the Mormons undoubtedly possess accurate information. At any rate, it was initiated and conducted under the direction of the Church, and Young and Kimball were among the first to lead the way. Commencing late in March, it continued until June, and before the beginning of May more than thirty-five thousand people were concentrated on the western shore of Lake Utah, chiefly in the neighborhood of Provo, fifty miles south of Salt Lake City. Such a scene of squalid misery, such a spectacle of want and distress, was never before witnessed in America. More than half this multitude could not be accommodated in the towns, and lodged in board-shanties, wigwams, mud-huts, log-cabins, bowers of willow-branches covered with wagon-sheets, and even in holes dug into the hill-sides. The most common quarters, however, were made by removing a wagon-body from its wheels, placing it upon the ground, and erecting in front of it a bower of cedars. It is needless to dwell on the exasperation which animated all who submitted to these sacrifices. In the history of the Albigenses hunted through Languedoc; or of the Jews writhing under the Span-

ish Inquisition, a record of similar bitterness of feeling may be found, but its parallel does not exist outside the annals of religious persecution.

Governor Cumming returned to Fort Bridger during the second week in May, still accompanied by Mr. Kane, and also by a party of Mormons who intended to escort the latter to Missouri. Upon his arrival, he addressed a letter to General Johnston, stating, officially, that the people of Utah had acknowledged his authority, and that the roads between the camp and Salt Lake City were free for the transit of mails and passengers, the Mormon forces having withdrawn from the cañons, and none of the Territorial militia remaining under arms except with his consent and approbation. A day or two later, Mr. Kane bade him farewell and started toward the States, his mission having been completed.

It may be well to pause here and estimate its precise results. It had secured delay. The herds on Henry's Fork had thriven better than was expected, and toward the close of April the number of mules in working condition was sufficient to have dragged a train of two hundred wagons. The dragoon-horses which survived could have been assigned to the artillery-batteries, and the regiment have served as infantry. With this equipment, slight though it may appear, a rapid movement upon the Valley was possible; and whatever may have been the opinion during the previous autumn, it was the universal opinion in the spring that the force at Camp Scott could have routed any body of militia that might have opposed its advance, although, perhaps, it was not sufficient to subjugate the Territory, in case the Mormons should flee to the mountains. Provisions, also, were running low in the camp. The ration of flour had been further reduced. All the cattle had been slaughtered, and there was every prospect of recourse to mule-meat before the first of June. Everything, therefore, favored the plan of an early march toward the city; and it is certain that it would have been commenced

without awaiting reinforcements from the States, had not the Governor's scheme for pacification intervened. Distrustful of its expediency or propriety though General Johnston might have been, he deemed it his duty to await its result. Neither he nor the Governor being supreme in the direction of affairs, it was the duty of each to defer so far as might be to the action of the other.

In the next place, Mr. Kane's interposition had produced an irreconcilable difference of opinion between the civil and the military authority. This is evident from what has already been stated, and there is no need to confirm the fact by argument. The Governor returned to Fort Bridger in May, believing the Mormons to be an injured people, whose cause was in the main just. But his position was full of difficulties. He had been recognized in his official character, it is true; but he was conscious that every Mormon acknowledged a political influence superior to his own, which was directing the emigration southward, and leaving him Governor of empty villages and deserted fields. The only hope he entertained of checking this exodus was by quashing the indictments for treason which had been found against the Mormon leaders, and by insuring them against contact with the troops. The first he was powerless to effect; it was a matter beyond his control, — solely within the cognizance of the courts. The second he had assumed to be within his power, and had so assured the Mormons; but there he was at variance with General Johnston, who denied his claim to absolute authority over the movements of the army.

Unknown, however, to the parties who were agitating these perplexing questions, a superior power had already intervened and solved the difficulty. On the 6th of April, the President had signed a Proclamation, at Washington, rehearsing to the people of Utah Territory, at considerable length, their past offences, and particularly those which immediately preceded and followed the outbreak of the rebellion, and declaring them traitors;

but, "in order to save the effusion of blood, and to avoid the indiscriminate punishment of a whole people for crimes of which it is not probable that all are equally guilty," offering "a free and full pardon to all who will submit themselves to the authority of the Federal Government." This document was intrusted to two Commissioners for conveyance to the Territory;—one of them, Mr. L. W. Powell, lately Governor, and at the time Senator-elect, of the State of Kentucky; the other, Major Ben McCulloch, of Texas, who had served with distinction in Mexico. In their appointment, Mr. Buchanan imitated the example of President Washington, who designated a similar commission to convey his proclamation to the whiskey-insurgents in Pennsylvania.

The reinforcements and supply-trains for the army were at this time concentrating at Fort Leavenworth, Major-General Persifer F. Smith was assigned to the command-in-chief, and it was intended that the whole force, after concentration in Utah, should be divided into two brigades, one to be commanded by General Harney, the other by General Johnston. Leaving the columns preparing to advance over the Plains, the Commissioners started from the Fort on the 25th of April. On the same day, Lieutenant-Colonel Hoffmann advanced from Fort Laramie with several companies of infantry and cavalry, escorting the supply-trains which were parked there through the winter, and on the speedy arrival of which at Camp Scott the subsistence of General Johnston's command depended, unless it should force its way into the Valley. On the 1st of May, he had reached La Bonté, a tributary of the North Platte, fifty miles from the Fort. There he encountered the severest storm that had occurred in that region for many years. The snow fell breast-deep, and was followed by a pelting rain which killed his mules by scores. He was forced to remain stationary more than a week, and when he renewed the march the trains were clogged by mud foot-deep.

The Commissioners reached Camp Scott on the 29th of May. The President's Proclamation had been received the day before. With the exception of a few persons who were prepared for such a document by reflection on Mr. Kane's mission, everybody was astonished at its purport. It seemed incredible that a lenity should have been extended to the Mormon rebels which was refused to the Free-State men in Kansas, who were once indicted for treason and sedition,—and equally incredible that all the advantages for the solution of the Utah problem which had been gained by the rising of the Mormons in arms should be thrown away. There was none of the blood-thirsty excitement in the camp which was reported in the States to have prevailed there, but there was a feeling of infinite chagrin, a consciousness that the expedition was only a pawn on Mr. Buchanan's political chess-board; and reproaches against his folly were as frequent as they were vehement. Had he excepted from the amnesty the Mormon leaders, who alone had been indicted, the Proclamation might have been considered an act of judicious clemency; for that exception would have accomplished every object that could be desired. As it was, it annihilated all that had been gained by the enormous expenditures and the toils and sufferings of the past year, and it sentenced the army to an indefinite term of imprisonment in an American Siberia. For the sake of ridding the Administration of immediate trouble, it turned the Church leaders loose again upon the community, purged of all offence, and postponed to a future day a terrible issue, the ultimate avoidance of which is impossible. "After us the deluge," was still the motto of the President and his Cabinet.

At the camp the Commissioners remained only three days, which they employed in obtaining accurate information concerning the transactions of the last three months; for when they started from Missouri, no news of the result of Mr. Kane's mission had reached the frontier.

On the 2d of June, they started for the Valley, intending to summon the leading Mormons to an interview, and receive their formal acceptance of the terms of the Proclamation,—of which, of course, there could be no doubt. They were accompanied by the postmaster of Salt Lake City, with the mails for the Mormons, which had been detained at the camp since the commencement of the rebellion. The Governor and the Superintendent of Indian Affairs followed them the next day. The rest of the Federal officers refused to join the party, or to make any movement based on a supposed capitulation of the Mormons, until their submission should be perfected. There were many circumstances attending the departure of the Governor which showed that he was doubtful of the stability of the positions he had been led by Mr. Kane to assume. He expressed himself distrustful of the coöperation of the Commissioners in his plan for pacifying the Territory; and he protested vehemently against allowing persons to accompany the party in order to report for the press the proceedings at the expected conferences. Every day made it more and more evident that he had committed himself to the Mormons farther than he cared to acknowledge.

Before the Commissioners left the camp, they urged General Johnston not to delay the advance of the army one moment beyond the time when he should be ready and desire to march. On the 8th of June, Captain Marcy arrived at the Fort with a herd of nearly fifteen hundred mules and horses, and an escort of five companies of infantry and mounted riflemen. He left the village of Rayado, on the Canadian River, in New Mexico, on the 17th of March, and, instead of retracing the route pursued on his winter journey, which had led him near the sources of Grand River, one of the great forks of the Colorado, he returned along the eastern base of the Rocky Mountain range past Long's and Pike's Peaks. When he had reached Fontaine-qui-bouille Creek, an ex-

press overtook him from General Garland, who commanded the Department of New Mexico, enjoining him to halt and await reinforcements. There he camped more than three weeks. Renewing his progress, he was overtaken, on the 29th of April, by the same snow-storm which was so disastrous to Lieutenant-Colonel Hoffmann on La Bonté. It was accompanied by a furious wind, the force of which there was nothing to break. Snow fell to the depth of three feet, and, at the very height of the storm, a part of the mule herd stampeded and ran fifty miles before the wind, for shelter. When the march was resumed, after an interval of several days, hundreds of antelopes were found frozen and buried in the drifts,—a circumstance almost unparalleled among the mountains. With this exception, nothing occurred to obstruct the march. Captain Marcy brought with him specimens of sand from many of the tributaries of the South Platte, which were found, on analysis, to contain particles of gold; and within two months after he gathered them, the same discovery, confirmed by others, originated the emigration to that region, the progress of which now promises the speedy birth of another Free State in the very heart of the continent. On the 9th and 10th, Colonel Hoffmann reached the camp with all his supply-trains; and on the following day, General Johnston issued the welcome order to prepare for the march to Salt Lake City. A strong detachment of infantry and artillery was detailed to garrison Fort Bridger.

On the 13th of June, the long camp was broken up, and the army moved forward in three columns on the route through the cañons. Although the season was so far advanced, snow had fallen at the Fort only three days before. The streams were swollen and turbulent with spring floods, and difficulty was anticipated in crossing the Bear and Weber Rivers. Material for bridging had, therefore, been prepared, and accompanied the first column. Southwest of the Fort, at the distance of four or five miles, a sin-

gular butte, the top of which is as level as the floor of a ball-room, rises to the height of eight hundred feet above the valley of Black's Fork, and commands a view of the entire broad plateau between the Wind River and the Uinta and Wahsatch Ranges. Little parties of horsemen could be seen spurring up the gullies on its almost precipitous sides, to witness from its summit the departure of the army. The scene was in the highest degree picturesque. Almost at their feet lay the camp, the few tents which remained unstruck glittering like bright dots on the wing of an insect, the whitewashed wall of the Fort reflecting the sunshine, while stacks of turf chimneys, lodge-poles, and rubbish marked the spots where the encampment had been abandoned. The whole valley was in commotion. Along the strips of road were winding clumsy baggage-trains; the regiment of dragoons was trailing in advance; the gleam of the musket-barrels of the infantry was visible on all sides; and every puff of the breeze that blew over the bluff was freighted with the rumble of artillery-carriages and caissons. Here and there were groups of half-naked Indians galloping to and fro, with fluttering blankets, gazing at the show with the curiosity and delight of children.

The traveller who terminates his westward journey at Fort Bridger has entered only the portal of the Rocky Mountains. Along the interval between there and the Valley of the Great Lake, there is a panorama of mountain-scenery that cannot be surpassed in the Tyrol. For miles and miles in the gorges, at the season of the year when they were traversed by the army, the road winds through thickets of alders and willows and hawthorn-bushes, whose branches interlace and hang so low, under their load of leaves and blossoms, as to sweep the backs of horsemen. Through the interstices of the foliage, the sandstone cliffs that bound the cañons are seen surrounded by flocks of twittering birds which build their nests in the crevices of the rock. The ridges which the road sur-

mounts between cañon and cañon are covered with fields of luxuriant grass and flowers, in the midst of which patches of snow still linger. From them, in the clear noon sunshine, the broken line of the Wahsatch and Uinta Ranges is visible along the horizon; but through the morning and evening haze, only the tracery of their white crests can be discerned. The valleys of the Bear and Weber Rivers are peculiarly beautiful, the latter almost realizing the dream of the Valley of Rasselas. Corrugated and snow-capped ridges slope backward from the spectator, on whichever side he turns, until he wonders how and where the swift river, rushing under its canopy of rustling cotton-woods, finds a pathway through them.

It was into scenery like this that the troops advanced, speculating, along each day's march, upon what obstacles they would have encountered, had they attempted to reach the Valley during the winter. On the 14th, an express from the Commissioners arrived at the camp on Bear River, announcing that no resistance would be made by the Mormons, who pledged themselves to submit to Federal authority. It was suggested, at the same time, to General Johnston, that they apprehended ill-treatment from the army, which might feel an exasperation natural after the privations to which it had been subjected during the winter. To reassure them, the General immediately issued and forwarded to Salt Lake City a proclamation, informing them that no one should be "molested in his person or rights, or in the peaceful pursuit of his avocations." On the same day, Governor Cumming issued a proclamation announcing the "restoration of peace to the Territory."

The Commissioners had reached the city on the 7th. They were received there by the Mormon officers who commanded the few companies of militia which constituted the garrison, and were conducted to a restaurant, where meals were provided for them, but no lodgings; and accordingly they slept in their ambulances. The place was deserted by ev-

everybody except the garrison and a few individuals who were busily removing their property. Besides these, the only beings visible in the streets were here and there groups of half-naked Indian boys paddling in the gutters. Almost the only sound audible was the gurgling of the City Creek. Through the chinks of the heavy wooden portal of the Temple square, workmen were to be seen engaged in demolishing the roofs of the buildings within the inclosure. Over the windows of all the houses boards were nailed; the doors were locked; the gates closed; and in many of the gardens, crops of weeds were beginning to choke the flower-beds. From some of the houses of the more enthusiastic Saints all the wood-work was removed, leaving nothing standing except the bare *adobe* walls, while a few had been burned to the ground. In front of the tithing-office, a train of wagons was loading with grain for removal to Provo.

The Governor arrived on the 8th, and was conducted at once to the quarters he had occupied on his previous visit. The next day, he, together with the Commissioners, held an interview with the two messengers who had been sent up from Provo by Brigham Young. They returned to Lake Utah that same night, and on the 10th, about noon, Young, Kimball, and Wells, together with the Twelve Apostles, and twenty or thirty Bishops, High Priests, and Elders, embracing almost all the influential characters in the Church, rode into the city. Brigham's mansion was thrown open and the party dined there. They called afterwards in a body upon the Governor and the Commissioners, and made arrangements for a conference on the following day.

The President's pardon had reached the Mormon settlements along Lake Utah on the 6th, and the manner in which it was received by the populace showed that they were not satisfied with the position of their leaders. It was read from the steps of the tithing-offices, and at the street-corners, to crowds who de-

nounced in the fiercest language the recital of facts set forth in its preamble. The excitement, which had been steadily fostered by Young and Kimball ever since the commencement of the rebellion, had amounted to a frenzy which no authority less potent than such a hierarchy as theirs could possibly have controlled. Nevertheless, the morning Brigham rode into Salt Lake City, the capitulation had been preordained.

The conferences lasted through the 11th and 12th, the inflexibility of the Commissioners securing decency of language from the Mormons, if not decency of demeanor. All the participants, including Young himself, expressed their sentiments in turn. The opening speech was made by one of the Apostles, named Erastus Snow, who forgot for the moment that he was not addressing a congregation of his brethren on a Sunday morning, and indulged in a strain of obscene and profane remark which was checked at once by Senator Powell. Some of the speakers broke into savage tirades like those with which Governor Cumming was once greeted in the Tabernacle; but these were checked by Young. There were two subjects on which the Mormon leaders were particularly anxious, all fear of their own trial for treason being removed. They dreaded that the army should be quartered upon their settlements, and that the policy inaugurated by Judge Eckels in his recent charge to the grand jury at Fort Bridger should be pursued against polygamy. No assurances were given by the Commissioners upon either of these subjects. They limited their action to tendering the President's pardon, and exhorting the Mormons to accept it. Outside the conferences, however, without the knowledge of the Commissioners, assurances were given on both these subjects by the Governor and the Superintendent of Indian Affairs, which proved satisfactory to Brigham Young. The exact nature of their pledges will, perhaps, never be disclosed; but from subsequent confessions volunteered by the Superin-

tendent, who appears to have acted as a tool of the Governor through the whole affair, it seems probable that they promised explicitly to exert their influence to quarter the army in Cache Valley, nearly a hundred miles north of Salt Lake City, and also to procure the removal of Judge Eckels. The news of the issue of the order for the advance of the army reached the city on the 12th, and accelerated the result of the conferences, which concluded that evening with a pledge on the part of Young and his associates to submit unconditionally to the Federal authority. During the next few days, the Commissioners, accompanied by the Governor, travelled southward, and addressed large audiences at Provo and Lehi, specially exhorting the people to return to their homes in the northern settlements, assuring them that the troubles were ended, and that they need fear no molestation of person or property.

Whether all these proceedings—which were legitimate results of Mr. Buchanan's policy—were consistent with the honor of the country, the public can judge for themselves. The Commissioners certainly conducted themselves with dignity and credit; but it is doubtful whether they ever would have accepted their appointment, had they anticipated the nature of the duties they would be required to perform.

The army moved slowly forward during the progress of these negotiations. In Echo Cañon, it had an opportunity to inspect the bugbear of the previous autumn,—the Mormon fortifications. As the cañon—which is more than twenty miles long—approaches the Weber River, it dwindles in width from five or six hundred yards to as many feet. Its northern side becomes a perfect wall of rock, which rises perpendicularly to the height of several hundred feet above the road. The southern side retains the character of a steep mountain-slope covered with grass and stunted bushes. Echo Creek, a narrow streamlet, with its dense fringe of willows, fills the whole bottom between the road and the bluffs. The first indica-

tion of approach to the fortifications was the sight of piles of stones heaped into walls four or five feet high, pierced with loopholes, and visible on every projecting point of the cliffs along the northern side, from most of which a pebble could be snapped down upon the road. Just beyond, after turning a bend in the cañon, all the willows along the creek had been cut away, and through the cleared space a ditch five or six feet wide and ten feet deep was dug across the bottom. The dirt thrown from it was packed so as to form an embankment, on which logs were so arranged that it would answer for a breastwork, behind which riflemen could be posted under cover. At intervals of about a hundred yards were two similar lines of ditch and breastwork, by the first of which the road was forced to skirt the very base of a cliff which had probably been mined. The other line was constructed just above the mouths of two narrow gorges which enter the cañon, nearly opposite one another, from the north and south. By the aid of these dams the cañon might possibly have been overflowed for half a mile to the depth of several feet, but the water would have accumulated slowly on account of the insignificant size of the creek. Several dirt walls stretched also across the gorges, commanding the whole of the fortifications below. This whole system of defences possessed as little strength as merit. It served only to confirm the impression, which by this time had become general, that the capacity of the Mormons to resist the army had been greatly overrated, and that a vigorous effort to penetrate to the Valley early in the spring would inevitably have succeeded.

For nearly a mile beyond the two gorges, a chain of low hills, over which the road runs, extends below the loftier summits on the southern side of the cañon. The northern side becomes, in consequence, a deep glen, as the cliffs which form its wall rise abruptly from the level of the creek. This glen is filled with bushes, and in it, thus protected from

the wind, the Mormon militia had their winter-quarters. The huts they occupied had been constructed by digging circular holes in the ground, over which were piled boughs in the same manner as the poles of an Indian lodge. Around these boughs willow-twigs were plaited, and the entire hut was finally thatched with straw, grass, or bark. Many of them had chimneys built of sod and stones, like those which had been improvised at Camp Scott. An open spot, a few hundred feet below the beginning of the glen, was the site of the head-quarters of the command. Here the huts were built around a square, in the centre of which was planted a tall pine flag-pole. The scenery at this point is exceedingly picturesque. Out of a tangle of willows, alders, hawthorn, and wild cherry-trees spring the bold sandstone cliffs, in every crevice of which cedars and fir-trees cling to the jagged points of rock. On the other side of the cañon a sheet of rich verdure, all summer long, rolls up the mountain to its very summit. Down the glen ripples the little creek underneath an arch of fragrant shrubs twined with the slender tendrils of wild hop-vines. The whole number of huts was about one hundred and fifty, and they could accommodate, on an average, fifteen men apiece.

The troops did not emerge from Emigration Cañon into the Salt Lake Valley until the morning of the 26th. In the mean while, thirty or forty civilians had reached the city from the camp, and were quartered, like the Commissioners, in their own vehicles. The Mormons favored no one, except the Governor and his intimate associates, with any species of accommodation. Their demeanor was in every respect like that of a conquered people toward foreign invaders. During the week preceding the 26th, two or three hundred of those on Lake Utah received permission to go up to the city, and they alone, of the whole Mormon community, witnessed the ingress of the army.

It was one of the most extraordinary

scenes that have occurred in American history. All day long, from dawn till after sunset, the troops and trains poured through the city, the utter silence of the streets being broken only by the music of the military bands, the monotonous tramp of the regiments, and the rattle of the baggage-wagons. Early in the morning, the Mormon guard had forced all their fellow-religionists into the houses, and ordered them not to make their appearance during the day. The numerous flags, which had been flying from staffs on the public buildings during the previous week, were all struck. The only visible groups of spectators were on the corners near Brigham Young's residence, and consisted almost entirely of Gentile civilians. The stillness was so profound, that, during the intervals between the passage of the columns, the monotonous gurgle of the city-creek struck on every ear. The Commissioners rode with the General's staff. The troops crossed the Jordan and encamped two miles from the city on a dusty meadow by the river-bank.

The orders under which General Johnston was acting directed him to establish not more than three military posts within the Territory. One of these was already fixed at Fort Bridger, and the question where the others should be located was now no less important to the Mormons than to the army. The secret of the success of Mormonism is its exclusiveness, and of this fact the leaders of the sect are fully aware. Accordingly, they now put forth most strenuous efforts to secure the removal of the troops to as great a distance as possible from their settlements. But, wholly without regard to any understanding which they might have had with the Governor, General Johnston, after a careful *reconnaissance*, selected Cedar Valley, on the western rim of Lake Utah, separated from it only by a range of bluffs,—about equidistant from Salt Lake City and Provo,—for his permanent camp. The army moved southward from the city on the 29th, but so slowly that it did not

reach the Valley till the 6th of July. now entirely at their mercy. By their
 Not a field was encroached upon, not a strict subordination they entitled them-
 house molested, not a person harmed or selves to the respect of the country as
 insulted, by troops that had been so well as to the gratitude of the Mor-
 harassed and vituperated by a people mons.

[To be continued.]

OUR SKATER BELLE.

ALONG the frozen lake she comes
 In linking crescents, light and fleet;
 The ice-imprisoned Undine hums
 A welcome to her little feet.

I see the jaunty hat; the plume
 Swerve bird-like in the joyous gale,—
 The cheeks lit up to burning bloom,
 The young eyes sparkling through the veil.

The quick breath parts her laughing lips,
 The white neck shines through tossing curls;
 Her vesture gently sways and dips,
 As on she speeds in shell-like whorls.

Men stop and smile to see her go;
 They gaze, they smile in pleased surprise;
 They ask her name; they long to show
 Some silent friendship in their eyes.

She glances not; she passes on;
 Her steely footfall quicker rings;
 She guesses not the benison
 Which follows her on noiseless wings.

Smooth be her ways, secure her tread
 Along the devious lines of life,
 From grace to grace successive led,
 A noble maiden, nobler wife!

THE PROFESSOR AT THE BREAKFAST-TABLE.

WHAT HE SAID, WHAT HE HEARD, AND WHAT HE SAW.

I DON'T know whether our literary or professional people are more amiable than they are in other places, but certainly quarrelling is out of fashion among them. This could never be, if they were in the habit of secret anonymous puffing of each other. That is the kind of under-ground machinery, which manufactures false reputations and genuine hatreds. On the other hand, I should like to know if we are not at liberty to have a good time together, and say the pleasantest things we can think of to each other, when any of us reaches his thirtieth or fortieth or fiftieth or eightieth birthday.

We don't have "scenes," I warrant you, on these occasions. No "surprise" parties! You understand these, of course. In the rural districts, where scenic tragedy and melodrama cannot be had, as in the city, at the expense of a quarter and a white pocket-handkerchief, emotional excitement has to be sought in the dramas of real life. Christenings, weddings, and funerals, especially the latter, are the main dependence; but babies, brides, and deceased citizens cannot be had at a day's notice. Now, then, for a surprise-party!

A bag of flour, a barrel of potatoes, some strings of onions, a basket of apples, a big cake and many little cakes, a jug of lemonade, a purse stuffed with bills of the more modest denominations, may, perhaps, do well enough for the properties in one of these private theatrical exhibitions. The minister of the parish, a tender-hearted, quiet, hard-working man, living on a small salary, with many children, sometimes pinched to feed and clothe them, praying fervently every day to be blest in his "basket and store," but sometimes fearing he asks amiss, to judge by the small returns, has the first rôle,—not, however, by

his own choice, but forced upon him. The minister's wife, a sharp-eyed, unsentimental body, is first lady; the remaining parts by the rest of the family. If they only had a play-bill, it would run thus:—

ON TUESDAY NEXT
WILL BE PRESENTED
THE AFFECTING SCENE
CALLED

THE SURPRISE-PARTY,

OR

THE OVERCOME FAMILY;

WITH THE FOLLOWING STRONG CAST OF CHARACTERS:

The Rev. Mr. Overcome, by the Clergyman of this Parish.

Mrs. Overcome, by his estimable lady.

Masters Matthew, Mark, Luke, and John Overcome,

Misses Dorcas, Tabitha, Rachel, and Hannah Overcome, by their interesting children.

Peggy, by the female help.

The poor man is really grateful;—it is a most welcome and unexpected relief. He tries to express his thanks,—his voice falters,—he chokes,—and bursts into tears. That is the great effect of the evening. The sharp-sighted lady cries a little with one eye, and counts the strings of onions, and the rest of the things, with the other. The children stand ready for a spring at the apples. The female help weeps after the noisy fashion of untutored handmaids.

Now this is all very well as charity, but do let the kind visitors remember they get their money's worth. If you pay a quarter for *dry crying*, done by a second-rate actor, how much ought you to pay for real hot, wet tears, out of the honest eyes of a gentleman who is not acting, but sobbing in earnest?

All I meant to say, when I began, was, that this was *not* a surprise-party where I read these few lines that follow:—

We will not speak of years to-night;
For what have years to bring,
But larger floods of love and light
And sweeter songs to sing?

We will not drown in wordy praise
The kindly thoughts that rise;
If friendship owns one tender phrase,
He reads it in our eyes.

We need not waste our schoolboy art
To gild this notch of time;
Forgive me, if my wayward heart
Has throbb'd in artless rhyme.

Enough for him the silent grasp
That knits us hand in hand,
And he the bracelet's radiant clasp
That locks our circling band.

Strength to his hours of manly toil!
Peace to his starlit dreams!
Who loves alike the furrowed soil,
The music-haunted streams!

Sweet smiles to keep forever bright
The sunshine on his lips,
And faith, that sees the ring of light
Round Nature's last eclipse!

—One of our boarders has been talking in such strong language that I am almost afraid to report it. However, as he seems to be really honest and is so very sincere in his local prejudices, I don't believe anybody will be very angry with him.

It is here, Sir! right here!—said the little deformed gentleman,—in this old new city of Boston,—this remote provincial corner of a provincial nation, that the Battle of the Standard is fighting, and was fighting before we were born, and will be fighting when we are dead and gone,—please God! The *battle* goes on everywhere throughout civilization; but here, here, here! is the broad white flag flying which proclaims, first of all, peace and good-will to men, and, next to that, the absolute, unconditional spiritual liberty of each individual immortal soul!

The three-hilled city against the seven-hilled-city! That is it, Sir,—nothing less than that; and if you know what that means, I don't think you'll ask for anything more. I swear to you, Sir, I believe that these two centres of civilization are just exactly the two points that close the circuit in the battery of our planetary intelligence! And I believe there are spiritual eyes looking out from Uranus and unseen Neptune,—ay, Sir, from the systems of Sirius and Arcturus and Aldebaran, and as far as that faint stain of sprinkled worlds confluent in the distance that we call the nebula of Orion,—looking on, Sir, with what organs I know not, to see which are going to melt in that fiery fusion, the accidents and hindrances of humanity or man himself, Sir,—the stupendous abortion, the illustrious failure that he is, if the three-hilled city does not ride down and trample out the seven-hilled city!

—Steam's up!—said the young man John, so called, in a low tone.—Three hundred and sixty-five tons to the square inch. Let him blow her off, or he'll bu'st his boiler.

The divinity-student took it calmly, only whispering that he thought there was a little confusion of images between a galvanic battery and a charge of cavalry.

But the Koh-i-noor—the gentleman, you remember, with a very large *diamond* in his shirt-front—laughed his scornful laugh, and made as if to speak.

Sail in, Metropolis!—said that same young man John, by name. And then, in a lower tone, not meaning to be heard,—Now, then, Ma'am Allen!

But he *was* heard,—and the Koh-i-noor's face turned so white with rage, that his blue-black moustache and beard looked fearful, seen against it. He grinned with wrath, and caught at a tumbler, as if he would have thrown it or its contents at the speaker. The young Marylander fixed his clear, steady eye upon him, and laid his hand on his arm, carelessly almost, but the Jewel found it was held so that he could not move it. It

was of no use. The youth was his master in muscle, and in that deadly Indian hug in which men wrestle with their eyes;—over in five seconds, but breaks one of their two backs, and is good for three-score years and ten;—one trial enough,—settles the whole matter,—just as when two feathered songsters of the barnyard, game and dunghill, come together,—after a jump or two at each other, and a few sharp kicks, there is the end of it; and it is, *Après vous, Monsieur*, in all the social relations with the beaten party for all the rest of his days.

I cannot philosophically account for the Koh-i-noor's wrath. For though a cosmetic is sold, bearing the name of the lady to whom reference was made by the young person John, yet, as it is publicly asserted in respectable prints that this cosmetic is *not a dye*, I see no reason why he should have felt offended by any suggestion that he was indebted to it or its authoress. I have no doubt that there are certain exceptional complexions to which the purple tinge, above alluded to, is natural. Nature is fertile in variety. I saw an albinism in London once, for sixpence, (including the inspection of a stuffed boa-constrictor,) who looked as if she had been boiled in milk. A young Hot-tentot of my acquaintance had his hair all in little pellets of the size of marrowfat peas. One of my own classmates has undergone a singular change of late years,—his hair losing its original tint, and getting a remarkable discolored look; and another has ceased to cultivate any hair at all over the vertex or crown of the head. So I am perfectly willing to believe that the purple-black of the Koh-i-noor's moustache and whiskers is constitutional and not pigmentary. But I can't think why he got so angry.

The intelligent reader will understand that all this pantomime of the threatened onslaught and its suppression passed so quickly that it was all over by the time the other end of the table found out there was a disturbance; just as a man chopping wood half a mile off may be seen resting on his axe at the instant you hear

the last blow he struck. So you will please to observe that the Little Gentleman was not interrupted during the time implied by these *ex-post-facto* remarks of mine, but for some ten or fifteen seconds only.

He did not seem to mind the interruption at all, for he started again. The "Sir" of his harangue was no doubt addressed to myself more than anybody else, but he often uses it in discourse as if he were talking with some imaginary opponent.

—America, Sir,—he exclaimed,—is the only place where man is full-grown!

He straightened himself up, as he spoke, standing on the top round of his high chair, I suppose, and so presented the larger part of his little figure to the view of the boarders.

It was next to impossible to keep from laughing. The commentary was so strange an illustration of the text!

I thought it was time to put in a word; for I have lived in foreign parts, and am more or less cosmopolitan.

I doubt if we have more practical freedom in America than they have in England,—I said.—An Englishman thinks as he likes in religion and politics. Mr. Martineau speculates as freely as ever Dr. Channing did, and Mr. Bright is as independent as Mr. Seward.

Sir,—said he,—it isn't what a man thinks or says, but when and where and to whom he thinks and says it. A man with a flint and steel striking sparks over a wet blanket is one thing, and striking them over a tinder-box is another. The free Englishman is born under protest; he lives and dies under protest,—a tolerated, but not a welcome fact. Is not *free-thinker* a term of reproach in England? The same idea in the soul of an Englishman who struggled up to it and still holds it *antagonistically*, and in the soul of an American to whom it is congenital and spontaneous, and often unrecognized, except as an element blended with *all* his thoughts, a natural movement, like the drawing of his breath or the beating of his heart, is a very different thing. You

may teach a quadruped to walk on his hind legs, but he is always wanting to be on all-fours. Nothing that can be taught a growing youth is like the atmospheric knowledge he breathes from his infancy upwards. The American baby sucks in freedom with the milk of the breast at which he hangs.

—That's a good joke,—said the young fellow John,—considerin' it commonly belongs to a female Paddy.

I thought—I will not be certain—that Little Boston winked, as if he had been hit somewhere,—as I have no doubt Dr. Darwin did when the *wooden-spoon* suggestion upset his theory about why, etc. If he winked, however, he did not dodge.

A lively comment!—he said.—But Rome, in her great founder, sucked the blood of empire out of the dugs of a brute, Sir! The Milesian wet-nurse is only a convenient vessel through which the American infant gets the life-blood of this virgin soil, Sir, that is making man over again, on the sunset pattern! You don't think what we are doing and going to do here. Why, Sir, while commentators are bothering themselves with interpretation of prophecies, *we have got* the new heavens and the new earth over us and under us! Was there ever anything in Italy, I should like to know, like a Boston sunset?

—This time there was a laugh, and the little man himself almost smiled.

Yes,—Boston sunsets;—perhaps they're as good in some other places, but I know 'em best here. Anyhow, the American skies are different from anything they see in the Old World. Yes, and the rocks are different, and the soil is different, and everything that comes out of the soil, from grass up to Indians, is different. And now that the provisional races are dying out—

—What do you mean by the *provisional* races, Sir?—said the divinity-student, interrupting him.

Why, the aboriginal bipeds, to be sure,—he answered,—the red-crayon sketch of humanity laid on the canvas before the colors for the real manhood were ready.

I hope they will come to something yet,—said the divinity-student.

Irreclaimable, Sir,—irreclaimable!—said the little gentleman.—Cheaper to breed white men than domesticate a nation of red ones. When you can get the bitter out of the partridge's thigh, you can make an enlightened commonwealth of Indians. A provisional race, Sir,—nothing more. Exhaled carbonic acid for the use of vegetation, kept down the bears and catamounts, enjoyed themselves in scalping and being scalped, and then passed away or are passing away, according to the programme.

Well, Sir, these races dying out, the white man has to acclimate himself. It takes him a good while; but he will come all right by-and-by, Sir,—as sound as a woodchuck,—as sound as a musquash!

A new nursery, Sir, with Lake Superior and Huron and all the rest of 'em for wash-basins! A new race, and a whole new world for the new-born human soul to work in! And Boston is the brain of it, and has been any time these hundred years! That's all I claim for Boston,—that it is the thinking centre of the continent, and therefore of the planet.

—And the grand emporium of modesty,—said the divinity-student, a little mischievously.

Oh, don't talk to me of modesty!—answered Little Boston,—I'm past that! There isn't a thing that was ever said or done in Boston, from pitching the tea overboard to the last ecclesiastical lie it tore into tatters and flung into the dock, that wasn't thought very indelicate by some fool or tyrant or bigot, and all the entrails of commercial and spiritual conservatism are twisted into colics as often as this revolutionary brain of ours has a fit of thinking come over it.—No, Sir,—show me any other place that is, or was since the megalosaurus has died out, where wealth and social influence are so fairly divided between the stationary and the progressive classes! Show me any other place where every other drawing-room is not a cham-

ber of the Inquisition, with papas and mammas for inquisitors,—and the cold shoulder, instead of the “dry pan and the gradual fire,” the punishment of “heresy”!

—We think *Baltimore* is a pretty civilized kind of a village,—said the young Marylander, good-naturedly.—But I suppose you can’t forgive it for always keeping a little ahead of Boston in point of numbers,—tell the truth now. Are we not the centre of something?

Ah, indeed, to be sure you are. You are the gastronomic metropolis of the Union. Why don’t you put a canvas-back duck on the top of the Washington column? Why don’t you get that lady off from Battle Monument and plant a terrapin in her place? Why will you ask for other glories when you have soft crabs? No, Sir,—you live too well to think as hard as we do in Boston. Logic comes to us with the salt-fish of Cape Ann; rhetoric is born of the beans of Beverly; but *you*—if you open your mouths to speak, Nature stops them with a fat oyster, or offers a slice of the breast of your divine bird, and silences all your aspirations.

And what of Philadelphia?—said the Marylander.

Oh, Philadelphia?—Waterworks,—killed by the Croton and Cochituate;—Ben Franklin,—borrowed from Boston;—David Rittenhouse,—made an orrery;—Benjamin Rush,—made a medical system:—both interesting to antiquarians;—great Red-river raft of medical students,—spontaneous generation of professors to match;—more widely known through the Moyamensing hose-company, and the Wistar parties;—for geological section of social strata, go to *The Club*.—Good place to live in,—first-rate market,—tip-top peaches.—What do we know about Philadelphia, except that the engine-companies are always shooting each other?

And what do you say to Ne’ York?—asked the Koh-i-noor?

A great city, Sir,—replied Little Boston,—a very opulent, splendid city. A

point of transit of much that is remarkable, and of permanence for much that is respectable. A great money-centre. San Francisco with the mines above-ground,—and some of ’em under the sidewalks. I have seen next to nothing *grandiose*, out of New York, in all our cities. It makes ’em all look paltry and petty. Has many elements of civilization. May stop where Venice did, though, for aught we know.—The order of its development is just this:—Wealth; architecture; upholstery; painting; sculpture. Printing, as a mechanical art,—just as Nicholas Jensen and the Aldi, who were scholars too, made Venice renowned for it. Journalism, which is the accident of business and crowded populations, in great perfection. Venice got as far as Titian and Paul Veronese and Tintoretto,—great colorists, mark you, magnificent on the flesh-and-blood side of Art,—but look over to Florence and see who lie in Santa Croce, and ask out of whose loins Dante sprung!

Oh, yes, to be sure, Venice built her Ducal Palace, and her Church of St. Mark, and her Casa d’ Oro, and the rest of her golden houses; and Venice had great pictures and good music; and Venice had a Golden Book, in which all the large tax-payers had their names written;—but all that did not make Venice the brain of Italy.

I tell you what, Sir,—with all these magnificent appliances of civilization, it is time we began to hear something from the *jeunesse dorée* whose names are on the Golden Book of our sumptuous, splendid, marble-palaced Venice,—something in the higher walks of literature,—something in the councils of the nation. Plenty of Art, I grant you, Sir; now, then, for vast libraries, and for mighty scholars and thinkers and statesmen,—five for every Boston one, as the population is to ours,—*ten* to one more properly, in virtue of centralizing attraction as the alleged metropolis,—and not call our people provincials, and have to come begging to us to write the lives of Hendrik Hudson and Gouverneur Morris!

—The little gentleman was on his hobby, exalting his own city at the expense of every other place. I don't suppose he had been in either of the cities he had been talking about. I was just going to say something to sober him down, if I could, when the young Marylander spoke up.

Come, now,—he said,—what's the use of these comparisons? Didn't I hear this gentleman saying, the other day, that every American owns all America? If you have really got more brains in Boston than other folks, as you seem to think, who hates you for it, except a pack of scribbling fools? If I like Broadway better than Washington Street, what then? I own them both, as much as anybody owns either. I am an American,—and wherever I look up and see the stars and stripes overhead, that is home to me!

He spoke, and looked up as if he heard the emblazoned folds crackling over him in the breeze. We all looked up involuntarily, as if we should see the national flag by so doing. The sight of the dingy ceiling and the gas-fixtue depending therefrom dispelled the illusion.

Bravo! bravo!—said the venerable gentleman on the other side of the table.—Those are the sentiments of Washington's Farewell Address. Nothing better than that since the last chapter in Revelations. Five-and-forty years ago there used to be Washington societies, and little boys used to walk in processions, each little boy having a copy of the Address, bound in red, hung round his neck by a ribbon. Why don't they now? Why don't they now? I saw enough of hating each other in the old Federal times; now let's love each other, I say,—let's love each other, and not try to make it out that there isn't any place fit to live in except the one we happen to be born in.

It dwarfs the mind, I think,—said I,—to feed it on any localism. The full stature of manhood is shrivelled—

The color burst up into my cheeks. What was I saying,—I, who would not

for the world have pained our unfortunate little boarder by an allusion?

I will go,—he said,—and made a movement with his left arm to let himself down from his high chair.

No,—no,—he doesn't mean it,—you must not go,—said a kind voice next him; and a soft, white hand was laid upon his arm.

Iris, my dear!—exclaimed another voice, as of a female, in accents that might be considered a strong atmospheric solution of duty with very little flavor of grace.

She did not move for this address, and there was a *tableau* that lasted some seconds. For the young girl, in the glory of half-blown womanhood, and the dwarf, the cripple, the misshapen little creature covered with Nature's insults, looked straight into each other's eyes.

Perhaps no handsome young woman had ever looked at him so in his life. Certainly the young girl never had looked into eyes that reached into her soul as these did. It was not that they were in themselves supernaturally bright,—but there was the sad fire in them that flames up from the soul of one who looks on the beauty of woman without hope, but, alas! not without emotion. To him it seemed as if those amber gates had been translucent as the brown water of a mountain-brook, and through them he had seen dimly into a virgin wilderness, only waiting for the sunrise of a great passion for all its buds to blow and all its bowers to ring with melody.

That is my image, of course,—not his. It was not a simile that was in his mind, or is in anybody's at such a moment,—it was a pang of wordless passion, and then a silent, inward moan.

A lady's wish,—he said, with a certain gallantry of manner,—makes slaves of us all.—And Nature, who is kind to all her children, and never leaves the smallest and saddest of all her human failures without one little comfit of self-love at the bottom of his poor ragged pocket,—Nature suggested to him that he had turned his sentence well; and

he fell into a reverie, in which the old thoughts that were always hovering just outside the doors guarded by Common Sense, and watching for a chance to squeeze in, knowing perfectly well they would be ignominiously kicked out again as soon as Common Sense saw them, flocked in pell-mell,—misty, fragmentary, vague, half-ashamed of themselves, but still shouldering up against his inner consciousness till it warmed with their contact:—John Wilkes's—the ugliest man's in England—saying, that with half-an-hour's start he would cut out the handsomest man in all the land in any woman's good graces; Cadenus—old and savage—leading captive Stella and Vanessa; and then the stray line of a ballad,—“And a winning tongue had he,”—as much as to say, it isn't looks, after all, but cunning words, that win our Eves over,—just as of old, when it was the worst-looking brute of the lot that got our grandmother to listen to his stuff, and so did the mischief.

Ah, dear me! We rehearse the part of Hercules with his club, subjugating man and woman in our fancy, the first by the weight of it, and the second by our handling of it,—we rehearse it, I say, by our own hearth-stones, with the *cold* poker as our club, and the exercise is easy. But when we come to real life, the poker is *in the fire*, and, ten to one, if we would grasp it, we find it too hot to hold;—lucky for us, if it is not white-hot, and we do not have to leave the skin of our hands sticking to it when we fling it down or drop it with a loud or silent cry!

—I am frightened when I find, into what a labyrinth of human character and feeling I am winding. I meant to tell my thoughts, and to throw in a few studies of manner and costume as they pictured themselves for me from day to day. Chance has thrown together at the table with me a number of persons who are worth studying, and I mean not only to look on them, but, if I can, through them. You can get any man's or woman's secret, whose sphere is circumscribed by

your own, if you will only look patiently on them long enough. Nature is always applying her reagents to character, if you will take the pains to watch her. Our studies of character, to change the image, are very much like the surveyor's triangulation of a geographical province. We get a base-line in organization, always; then we get an angle by sighting some distant object to which the passions or aspirations of the subject of our observation are tending; then another;—and so we construct our first triangle. Once fix a man's ideals, and for the most part the rest is easy. *A* wants to die worth half a million. Good. *B* (female) wants to catch him,—and outlive him. All right. Minor details at our leisure.

What is it, of all your experiences, of all your thoughts, of all your misdoings, that lies at the very bottom of the great heap of acts of consciousness which make up your past life? What should you most dislike to tell your nearest friend?—Be so good as to pause for a brief space, and shut the pamphlet you hold with your finger between the pages. —Oh, that is it!

What a confessional I have been sitting at, with the inward ear of my soul open, as the multitudinous whisper of my involuntary confidants came back to me like the reduplicated echo of a cry among the craggy hills!

At the house of a friend where I once passed the night was one of those stately upright cabinet-desks and cases of drawers which were not rare in prosperous families during the last century. It had held the clothes and the books and the papers of generation after generation. The hands that opened its drawers had grown withered, shrivelled, and at last been folded in death. The children that played with the lower handles had got tall enough to open the desk,—to reach the upper shelves behind the folding-doors,—grown bent after a while,—and then followed those who had gone before, and left the old cabinet to be ransacked by a new generation.

A boy of ten or twelve was looking at

it a few years ago, and, being a quick-witted fellow, saw that all the space was not accounted for by the smaller drawers in the part beneath the lid of the desk. Prying about with busy eyes and fingers, he at length came upon a spring, on pressing which, a hidden drawer flew from its hiding-place. It had never before been opened but by the maker. The mahogany shavings and dust were lying in it as when the artisan closed it,—and when I saw it, it was as fresh as if that day finished.

Is there not one little drawer in your soul, my sweet reader, which no hand but yours has ever opened, and which none that have known you seem to have suspected? What does it hold?—A sin?—I hope not.

What a strange thing an old dead sin laid away in a secret drawer of the soul is! Must it some time or other be moistened with tears, until it comes to life again and begins to stir in our consciousness,—as the dry wheel-animalcule, looking like a grain of dust, becomes alive, if it is wet with a drop of water?

Or is it a passion? There are plenty of withered men and women walking about the streets who have the secret drawer in their hearts, which, if it were opened, would show as fresh as it was when they were in the flush of youth and its first trembling emotions. What it held will, perhaps, never be known, until they are dead and gone, and some curious eye lights on an old yellow letter with the fossil footprints of the extinct passion trodden thick all over it.

There is not a boarder at our table, I firmly believe, excepting the young girl, who has not a story of the heart to tell, if one could only get the secret drawer open. Even this arid female, whose armor of black bombazine looks stronger against the shafts of love than any cuirass of triple brass, has had her sentimental history, if I am not mistaken. I will tell you my reason for suspecting it.

Like many other old women, she shows a great nervousness and restless-

ness whenever I venture to express any opinion upon a class of subjects which can hardly be said to belong to any man or set of men as their strictly private property,—not even to the clergy, or the newspapers commonly called “religious.” Now, although it would be a great luxury to me to obtain my opinions by contract, ready-made, from a professional man, and although I have a constitutional kindly feeling to all sorts of good people which would make me happy to agree with all their beliefs, if that were possible, still I must have an idea, now and then, as to the meaning of life; and though the only condition of peace in this world is to have no ideas, or, at least, not to express them, with reference to such subjects, I can’t afford to pay quite so much as that even for peace.

I find that there is a very prevalent opinion among the dwellers on the shores of Sir Isaac Newton’s Ocean of Truth, that *salt fish*, which have been taken from it a good while ago, split open, cured and dried, are the only proper and allowable food for reasonable people. I maintain, on the other hand, that there are a number of live fish still swimming in it, and that every one of us has a right to see if he cannot catch some of them. Sometimes I please myself with the idea that I have landed an actual living fish, small, perhaps, but with rosy gills and silvery scales. Then I find the consumers of nothing but the salted and dried article insist that it is poisonous, simply because it is alive, and cry out to people not to touch it. I have not found, however, that people mind them much.

The poor boarder in bombazine is my dynamometer. I try every questionable proposition on her. If she winces, I must be prepared for an outcry from the other old women. I frightened her, the other day, by saying that *faith*, as an intellectual state, was *self-reliance*, which, if you have a metaphysical turn, you will find is not so much of a paradox as it sounds at first. So she sent me a book to read which was to cure me of that error. It was an old book, and looked as if it had

not been opened for a long time. What should drop out of it, one day, but a small heart-shaped paper, containing a lock of that straight, coarse, brown hair which sets off the sharp faces of so many thin-flanked, large-handed bumpkins? I read upon the paper the name "Hiram." —Love! love! love! —everywhere! everywhere! —under diamonds and Attleboro' "jewelry," —lifting the marrowy camel's-hair, and rustling even the black bombazine! —No, no, —I think she never was pretty, but she was young once, and wore bright gingham, and, perhaps, gay merinos. We shall find that the poor little crooked man has been in love, or is in love, or will be in love before we have done with him, for aught that I know!

Romance! Was there ever a boarding-house in the world where the seemingly prosaic table had not a living fresco for its background, where you could see, if you had eyes, the smoke and fire of some upheaving sentiment, or the dreary craters of smouldering or burnt-out passions? You look on the black bombazine and high-necked decorum of your neighbor, and no more think of the real life that underlies this despoiled and dismantled womanhood than you think of a stone trilobite as having once been full of the juices and the nervous thrills of throbbing and self-conscious being. There is a wild creature under that long yellow pin which serves as brooch for the bombazine cuirass, —a wild creature, which I venture to say would leap in his cage, if I should stir him, quiet as you think him. A heart which has been domesticated by matrimony and maternity is as tranquil as a tame bulfinch; but a wild heart which has never been fairly broken in flutters fiercely long after you think time has tamed it down, —like that purple finch I had the other day, which could not be approached without such palpitations and frantic flings against the bars of his cage, that I had to send him back and get a little orthodox canary which had learned to be quiet and never mind the wires or his keeper's handling. I will tell you my wicked, but involuntary

experiment on the wild heart under the faded bombazine.

Was there ever a person in the room with you, marked by any special weakness or peculiarity, with whom you could be two hours and not touch the infirm spot? I confess the most frightful tendency to do just this thing. If a man has a brogue, I am sure to catch myself imitating it. If another is lame, I follow him, or, worse than that, go before him, limping. I could never meet an Irish gentleman —if it had been the Duke of Wellington himself —without stumbling upon the word "Paddy," —which I use rarely in my common talk.

I have been worried to know whether this was owing to some innate depravity of disposition on my part, some malignant torturing instinct, which, under different circumstances, might have made a Fijian anthropophagus of me, or to some law of thought for which I was not answerable. It is, I am convinced, a kind of physical fact like *endosmosis*, with which some of you are acquainted. A thin film of politeness separates the unspoken and unspeakable current of thought from the stream of conversation. After a time one begins to soak through and mingle with the other.

We were talking about names, one day. —Was there ever anything, —I said, —like the Yankee for inventing the most uncouth, pretentions, detestable appellations, —inventing or finding them, —since the time of Praise-God Barebones? I heard a country-boy once talking of another whom he called *Elpit*, as I understood him. *Elbridge* is common enough, but this sounded oddly. It seems the boy was christened *Lord Pitt*, —and called, for convenience, as above. I have heard a charming little girl, belonging to an intelligent family in the country, called *Angēs* invariably; doubtless intended for *Agnes*. Names are cheap. How can a man name an innocent new-born child, that never did him any harm, *Hiram*? —The poor relation, or whatever she is, in bombazine, turned toward me, but I was stupid, and went on. —To think of

a man going through life saddled with such an abominable name as that!—The poor relation grew very uneasy.—I continued; for I never thought of all this till afterwards.—I knew one young fellow, a good many years ago, by the name of Hiram—

—What's got into you, Cousin,—said our landlady,—to look so?—There! you've upset your teacup!

It suddenly occurred to me what I had been doing, and I saw the poor woman had her hand at her throat; she was half-choking with the "hysteric ball,"—a very odd symptom, as you know, which nervous women often complain of. What business had I to be trying experiments on this forlorn old soul? I had a great deal better be watching that young girl.

Ah, the young girl! I am sure that she can hide nothing from me. Her skin is so transparent that one can almost count her heart-beats by the flushes they send into her cheeks. She does not seem to be shy, either. I think she does not know enough of danger to be timid. She seems to me like one of those birds that travellers tell of, found in remote, uninhabited islands, who, having never received any wrong at the hand of man, show no alarm at and hardly any particular consciousness of his presence.

The first thing will be to see how she and our little deformed gentleman get along together; for, as I have told you, they sit side by side. The next thing will be to keep an eye on the duenna,—the "Model" and so forth, as the white-neckcloth called her. The intention of that estimable lady is, I understand, to launch her and leave her. I suppose there is no help for it, and I don't doubt this young lady knows how to take care of herself, but I do not like to see young girls turned loose in boarding-houses. Look here now! There is that jewel of his race, whom I have called for convenience the Koh-i-noor, (you understand it is quite out of the question for me to use the family names of our boarders, unless I want to get into trouble.)—I say, the gentleman with the *diamond* is look-

ing very often and very intently, it seems to me, down toward the farther corner of the table, where sits our amber-eyed blonde. The landlady's daughter does not look pleased, it seems to me, at this, nor at those other attentions which the gentleman referred to has, as I have learned, pressed upon the newly-arrived young person. The landlady made a communication to me, within a few days after the arrival of Miss Iris, which I will repeat to the best of my remembrance.

He, (the person I have been speaking of,)—she said,—seemed to be kinder 'bankerin' round after that young woman. It had hurt her daughter's feelin's a good deal, that the gentleman she was a-keepin' company with should be offerin' tickets and tryin' to send presents to them that he'd never know'd till just a little spell ago,—and he as good as merried, so far as solemn promises went, to as respectable a young lady, if she did say so, as any there was round, whosoever they might be.

Tickets! presents!—said I.—What tickets, what presents has he had the impertinence to be offering to that young lady?

Tickets to the Museum,—said the landlady.—There is them that's glad enough to go to the Museum, when tickets is given 'em; but some of 'em ha'n't had a ticket sence Cenderilla was played,—and now he must be offerin' 'em to this ridiculous young paintress, or whatever she is, that's come to make more mischief than her board's worth. But it a'n't her fault,—said the landlady, relenting;—and that aunt of hers, or whatever she is, served him right enough.

Why, what did she do?

Do? Why, she took it up in the tongs and dropped it out o' window.

Dropped? dropped what?—I said.

Why, the *soap*,—said the landlady.

It appeared that the Koh-i-noor, to ingratiate himself, had sent an elegant package of perfumed soap, directed to Miss Iris, as a delicate expression of a lively sentiment of admiration, and that, after having met with the unfortunate

treatment referred to, it was picked up by Master Benjamin Franklin, who appropriated it, rejoicing, and indulged in most unheard-of and inordinate ablutions in consequence, so that his hands were a frequent subject of maternal congratulation, and he smelt like a civet-cat for weeks after his great acquisition.

After watching daily for a time, I think I can see clearly into the relation which is growing up between the little gentleman and the young lady. She shows a tenderness to him that I can't help being interested in. If he was her crippled child, instead of being more than old enough to be her father, she could not treat him more kindly. The landlady's daughter said, the other day, she believed that girl was settin' her cap for Little Boston.

Some of them young folks is very artful,—said her mother,—and there is them that would merry Lazarus, if he'd only picked up crtms enough. I don't think, though, this is one of that sort; she's kinder child-like,—said the landlady,—and maybe never had any dolls to play with; for they say her folks was poor before Ma'am undertook to see to her teachin' and board her and clothe her.

I could not help overhearing this conversation. "Board her and clothe her!"—speaking of such a young creature! Oh, dear!—Yes,—she must be fed,—just like Bridget, maid-of-all-work at this establishment. Somebody must pay for it. Somebody has a right to watch her and see how much it takes to "keep" her, and growl at her, if she has too good an appetite. Somebody has a right to keep an eye on her and take care that she does not dress too prettily. No mother to see her own youth over again in those fresh features and rising reliefs of half-sculptured womanhood, and, seeing its loveliness, forget her lessons of neutral-tinted propriety, and open the cases that hold her own ornaments to find her a necklace or a bracelet or a pair of earrings,—those golden lamps that light up the deep, shadowy dimples on the cheeks of young beauties,—swinging in a semi-

barbaric splendor that carries the wild fancy to Abyssinian queens and musky Odaliskues! I don't believe any woman has utterly given up the great firm of Mundus & Co., so long as she wears earrings.

I think Iris loves to hear the little gentleman talk. She smiles sometimes at his vehement statements, but never laughs at him. When he speaks to her, she keeps her eye always steadily upon him. This may be only natural good-breeding, so to speak, but it is worth noticing. I have often observed that vulgar persons, and public audiences of inferior collective intelligence, have this in common: the least thing draws off their minds, when you are speaking to them. I love this young creature's rapt attention to her diminutive neighbor while he is speaking.

He is evidently pleased with it. For a day or two after she came, he was silent and seemed nervous and excited. Now he is fond of getting the talk into his own hands, and is obviously conscious that he has at least one interested listener. Once or twice I have seen marks of special attention to personal adornment,—a ruffled shirt-bosom, one day, and a diamond pin in it,—not so *very* large as the Koh-i-noor's, but more lustrous. I mentioned the death's-head ring he wears on his right hand. I was attracted by a very handsome red stone, a ruby or carbuncle or something of the sort, to notice his left hand, the other day. It is a handsome hand, and confirms my suspicion that the cast mentioned was taken from his arm. After all, this is just what I should expect. It is not very uncommon to see the upper limbs, or one of them, running away with the whole strength, and, therefore, with the whole beauty, which we should never have noticed, if it had been divided equally between all four extremities. If it is so, of course he is proud of his one strong and beautiful arm; that is human nature. But he does not make himself ridiculous, at any rate, as people who have any one showy point are apt to do,—especially dentists with handsome

teeth, who always smile back to their last molars.

Sitting, as he does, next to the young girl, and next but one to the calm lady who has her in charge, he cannot help seeing their relations to each other.

That is an admirable woman, Sir,—he said to me one day, as we sat alone at the table after breakfast,—an admirable woman, Sir,—and I hate her.

Of course, I begged an explanation.

An admirable woman, Sir, because she does good things, and even kind things,—takes care of this—this—young lady—we have here, talks like a sensible person, and always looks as if she was doing her duty with all her might. I hate her because her voice sounds as if it never trembled, and her eyes look as if she never knew what it was to cry. Besides, she looks at me, Sir, stares at me, as if she wanted to get an image of me for some gallery in her brain,—and we don't love to be looked at in this way, we that have—I hate her,—I hate her,—her eyes kill me,—it is like being stabbed with icicles to be looked at so,—the sooner she goes home, the better. I don't want a woman to weigh me in a balance; there are men enough for that sort of work. The judicial character isn't captivating in females, Sir. A woman fascinates a man quite as often by what she overlooks as by what she sees. Love prefers twilight to daylight; and a man doesn't think much of, nor care much for, a woman outside of his household, unless he can couple the idea of love, past, present, or future, with her. I don't believe the Devil cares half so much for the services of a sinner as he does for those of one of these folks that are always doing virtuous acts in a way to make them unpleasing.—That young girl wants a tender nature to cherish her and give her a chance to put out her leaves,—sunshine, and not east winds.

He was silent,—and sat looking at his handsome left hand with the red stone ring upon it.—Is he going to fall in love with Iris?

Here are some lines I read to the boarders the other day:—

THE CROOKED FOOTPATH.

AN, here it is! the sliding rail
That marks the old remembered spot,—
The gap that struck our schoolboy trail,—
The crooked path across the lot.

It left the road by school and church,
A pencilled shadow, nothing more,
That parted from the silver birch
And ended at the farmhouse door.

No line or compass traced its plan;
With frequent bends to left or right,
In aimless, wayward curves it ran,
But always kept the door in sight.

The gabled porch, with woodbine green,—
The broken millstone at the sill,—
Though many a rood might stretch between,
The truant child could see them still.

No rocks across the pathway lie,—
No fallen trunk is o'er it thrown,—
And yet it winds, we know not why,
And turns as if for tree or stone.

Perhaps some lover trod the way
With shaking knees and leaping heart,—
And so it often runs astray
With sinuous sweep or sudden start.

Or one, perchance, with clouded brain
From some unholy banquet reeled,—
And since, our devious steps maintain
His track across the trodden field.

Nay, deem not thus,—no earth-born will
Could ever trace a faultless line;
Our truest steps are human still,—
To walk unswerving were divine!

Truants from love, we dream of wrath;—
Oh, rather let us trust the more!
Through all the wanderings of the path,
We still can see our Father's door!

THE MINISTER'S WOOING.

[Continued.]

CHAPTER X.

THE TEST OF THEOLOGY.

THE Doctor went immediately to his study and put on his best coat and his wig, and, surmounting them by his cocked hat, walked manfully out of the house, with his gold-headed cane in his hand.

"There he goes!" said Mrs. Scudder, looking regretfully after him. "He is *such* a good man!—but he has not the least idea how to get along in the world. He never thinks of anything but what is true; he hasn't a particle of management about him."

"Seems to me," said Mary, "that is like an Apostle. You know, mother, St. Paul says, 'In simplicity and godly sincerity, not with fleshly wisdom, but by the grace of God, we have had our conversation in the world.'"

"To be sure,—that is just the Doctor," said Mrs. Scudder; "that's as like him as if it had been written for him. But that kind of way, somehow, don't seem to do in our times; it won't answer with Simeon Brown,—I know the man. I know just as well, now, how it will all seem to him, and what will be the upshot of this talk, if the Doctor goes there! It won't do any good; if it would, I would be willing. I feel as much desire to have this horrid trade in slaves stopped as anybody; your father, I'm sure, said enough about it in his time; but then I know it's no use trying. Just as if Simeon Brown, when he is making his hundreds of thousands in it, is going to be persuaded to give it up! He won't,—he'll only turn against the Doctor, and won't pay his part of the salary, and will use his influence to get up a party against him, and our church will be broken up and the Doctor driven away,—that's all that will come of it; and all the good that he is doing now to these poor negroes

will be overthrown,—and they never did have so good a friend. If he would stay here and work gradually, and get his System of Theology printed,—and Simeon Brown would help at that,—and only drop words in season here and there, till people are brought along with him, why, by-and-by something might be done; but now, it's just the most imprudent thing a man could undertake."

"But, mother, if it really is a sin to trade in slaves and hold them, I don't see how he can help himself. I quite agree with him. I don't see how he came to let it go so long as he has."

"Well," said Mrs. Scudder, "if worst comes to worst, and he will do it, I, for one, shall stand by him to the last."

"And I, for another," said Mary.

"I would like him to talk with Cousin Zebedee about it," said Mrs. Scudder. "When we are up there this afternoon, we will introduce the conversation. He is a good, sound man, and the Doctor thinks much of him, and perhaps he may shed some light upon this matter."

Meanwhile the Doctor was making the best of his way, in the strength of his purpose to test the orthodoxy of Simeon Brown.

Honest old granite boulder that he was, no sooner did he perceive a truth than he rolled after it with all the massive gravitation of his being, inconsiderate as to what might lie in his way;—from which it is to be inferred, that, with all his intellect and goodness, he would have been a very clumsy and troublesome inmate of the modern American Church. How many societies, boards, colleges, and other good institutions, have reason to congratulate themselves that he has long been among the saints!

With him logic was everything, and to perceive a truth and not act in logical sequence from it a thing so incredible,

that he had not yet enlarged his capacity to take it in as a possibility. That a man should refuse to hear truth, he could understand. In fact, he had good reason to think the majority of his townsmen had no leisure to give to that purpose. That men hearing truth should dispute it and argue stoutly against it, he could also understand; but that a man could admit a truth and not admit the plain practice resulting from it was to him a thing incomprehensible. Therefore, spite of Mrs. Katy Scudder's discouraging observations, our good Doctor walked stoutly and with a trusting heart.

At the moment when the Doctor, with a silent uplifting of his soul to his invisible Sovereign, passed out of his study, on this errand, where was the disciple whom he went to seek?

In a small, dirty room, down by the wharf, the windows veiled by cobwebs and dingy with the accumulated dust of ages, he sat in a greasy, leathern chair by a rickety office-table, on which was a great pewter inkstand, an account-book, and divers papers tied with red tape.

Opposite to him was seated a square-built individual,—a man of about forty, whose round head, shaggy eyebrows, small, keen eyes, broad chest, and heavy muscles showed a preponderance of the animal and brutal over the intellectual and spiritual. This was Mr. Scroggs, the agent of a rice-plantation, who had come on, bringing an order for a new relay of negroes to supply the deficit occasioned by fever, dysentery, and other causes, in their last year's stock.

"The fact is," said Simeon, "this last ship-load wasn't as good a one as usual; we lost more than a third of it, so we can't afford to put them a penny lower."

"Ay," said the other,—"but then there are so many women!"

"Well," said Simeon, "women a'n't so strong, perhaps, to start with,—but then they stan' it out, perhaps, in the long run, better. They're more patient;—some of these men, the Mandingoes, particularly, are pretty troublesome to manage. We lost a splendid fellow, coming over, on this

very voyage. Let 'em on deck for air, and this fellow managed to get himself loose and fought like a dragon. He settled one of our men with his fist, and another with a marlinespike that he caught,—and, in fact, they had to shoot him down. You'll have his wife; there's his son, too,—fine fellow, fifteen year old by his teeth."

"What! that lame one?"

"Oh, he a'n't lame!—it's nothing but the cramps from stowing. You know, of course, they are more or less stiff. He's as sound as a nut."

"Don't much like to buy relations, on account of their hatching up mischief together," said Mr. Scroggs.

"Oh, that's all humbug! You must keep 'em from coming together, anyway. It's about as broad as 'tis long. There'll be wives and husbands and children among 'em before long, start 'em as you will. And then this woman will work better for having the boy; she's kinder set on him; she jabbars lots of lingo to him, day and night."

"Too much, I doubt," said the overseer, with a shrug.

"Well, well,—I'll tell you," said Simeon, rising. "I've got a few errands up-town, and you just step over with Matlock and look over the stock;—just set aside any that you want, and when I see 'em all together, I'll tell you just what you shall have 'em for. I'll be back in an hour or two."

And so saying, Simeon Brown called an underling from an adjoining room, and, committing his customer to his care, took his way up-town, in a serene frame of mind, like a man who comes from the calm performance of duty.

Just as he came upon the street where was situated his own large and somewhat pretentious mansion, the tall figure of the Doctor loomed in sight, sailing majestically down upon him, making a signal to attract his attention.

"Good morning, Doctor," said Simeon.

"Good morning, Mr. Brown," said the Doctor. "I was looking for you. I did not quite finish the subject we were talk-

ing about at Mrs. Scudder's table last night. I thought I should like to go on with it a little."

"With all my heart, Doctor," said Simeon, not a little flattered. "Turn right in. Mrs. Brown will be about her house-business, and we will have the keeping-room all to ourselves. Come right in."

The "keeping-room" of Mr. Simeon Brown's house was an intermediate apartment between the ineffable glories of the front-parlor and that court of the gentiles, the kitchen; for the presence of a large train of negro servants made the latter apartment an altogether different institution from the throne-room of Mrs. Katy Scudder.

This keeping-room was a low-studded apartment, finished with the heavy oaken beams of the wall left full in sight, boarded over and painted. Two windows looked out on the street, and another into a sort of court-yard, where three black wenches, each with a broom, pretended to be sweeping, but were, in fact, chattering and laughing, like so many crows.

On one side of the room stood a heavy mahogany sideboard, covered with decanters, labelled Gin, Brandy, Rum, etc.,—for Simeon was held to be a provider of none but the best, in his housekeeping. Heavy mahogany chairs, with crewel coverings, stood sentry about the room; and the fireplace was flanked by two broad arm-chairs, covered with stamped leather.

On ushering the Doctor into this apartment, Simeon courteously led him to the sideboard.

"We mus'n't make our discussions too dry, Doctor," he said. "What will you take?"

"Thank you, Sir," said the Doctor, with a wave of his hand,—“nothing this morning.”

And depositing his cocked hat in a chair, he settled himself into one of the leathern easy-chairs, and, dropping his hands upon his knees, looked fixedly before him, like a man who is studying how to enter upon an inwardly absorbing subject.

"Well, Doctor," said Simeon, seating himself opposite, sipping comfortably at a glass of rum-and-water, "our views appear to be making a noise in the world. Everything is preparing for your volumes; and when they appear, the battle of New Divinity, I think, may fairly be considered as won."

Let us consider, that, though a woman may forget her first-born, yet a man cannot forget his own system of theology,—because therein, if he be a true man, is the very elixir and essence of all that is valuable and hopeful to the universe; and considering this, let us appreciate the settled purpose of our friend, whom even this tempting bait did not swerve from the end which he had in view.

"Mr. Brown," he said, "all our theology is as a drop in the ocean of God's majesty, to whose glory we must be ready to make any and every sacrifice."

"Certainly," said Mr. Brown, not exactly comprehending the turn the Doctor's thoughts were taking.

"And the glory of God consisteth in the happiness of all his rational universe, each in his proportion, according to his separate amount of being; so that, when we devote ourselves to God's glory, it is the same as saying that we devote ourselves to the highest happiness of his created universe."

"That's clear, Sir," said Simeon, rubbing his hands, and taking out his watch to see the time.

The Doctor hitherto had spoken in a laborious manner, like a man who is slowly lifting a heavy bucket of thought out of an internal well.

"I am glad to find your mind so clear on this all-important point, Mr. Brown,—the more so as I feel that we must immediately proceed to apply our principles, at whatever sacrifice of worldly goods; and I trust, Sir, that you are one who at the call of your Master would not hesitate even to lay down all your worldly possessions for the greater good of the universe."

"I trust so, Sir," said Simeon, rather uneasily, and without the most distant

idea what could be coming next in the mind of his reverend friend.

"Did it never occur to you, my friend," said the Doctor, "that the enslaving of the African race is a clear violation of the great law which commands us to love our neighbor as ourselves,—and a dishonor upon the Christian religion, more particularly in us Americans, whom the Lord hath so marvellously protected, in our recent struggle for our own liberty?"

Simeon started at the first words of this address, much as if some one had dashed a bucket of water on his head, and after that rose uneasily, walking the room and playing with the seals of his watch.

"I—I never regarded it in this light," he said.

"Possibly not, my friend," said the Doctor,—"so much doth established custom blind the minds of the best of men. But since I have given more particular attention to the case of the poor negroes here in Newport, the thought has more and more labored in my mind,—more especially as our own struggles for liberty have turned my attention to the rights which every human creature hath before God,—so that I find much in my former blindness and the comparative dumbness I have heretofore maintained on this subject wherewith to reproach myself; for, though I have borne somewhat of a testimony, I have not given it that force which so important a subject required. I am humbled before God for my neglect, and resolved now, by His grace, to leave no stone unturned till this iniquity be purged away from our Zion."

"Well, Doctor," said Simeon, "you are certainly touching on a very dark and difficult subject, and one in which it is hard to find out the path of duty. Perhaps it will be well to bear it in mind, and by looking at it prayerfully some light may arise. There are such great obstacles in the way, that I do not see at present what can be done; do you, Doctor?"

"I intend to preach on the subject next Sunday, and hereafter devote my best energies in the most public way to this great work," said the Doctor.

"You, Doctor?—and now, immediately? Why, it appears to me you cannot do it. You are the most unfit man possible. Whosoever duty it may be, it does not seem to me to be yours. You already have more on your shoulders than you can carry; you are hardly able to keep your ground now, with all the odium of this new theology upon you. Such an effort would break up your church,—destroy the chance you have to do good here,—prevent the publication of your system."

"If it's nobody's system but mine, the world won't lose much, if it never be published; but if it be God's system, nothing can hinder its appearing. Besides, Mr. Brown, I ought not to be one man alone. I count on your help. I hold it as a special providence, Mr. Brown, that in our own church an opportunity will be given to testify to the reality of disinterested benevolence. How glorious the opportunity for a man to come out and testify by sacrificing his worldly living and business! If you, Mr. Brown, will at once, at whatever sacrifice, quit all connection with this detestable and diabolical slave-trade, you will exhibit a spectacle over which angels will rejoice, and which will strengthen and encourage me to preach and write and testify."

Mr. Simeon Brown's usual demeanor was that of the most leathery imperturbability. In calm theological reasoning, he could demonstrate, in the driest tone, that, if the eternal torment of six bodies and souls were absolutely the necessary means for preserving the eternal blessedness of thirty-six, benevolence would require us to rejoice in it, not in itself considered, but in view of greater good. And when he spoke, not a nerve quivered; the great mysterious sorrow with which the creation groaneth and travaileth, the sorrow from which angels veil their faces, never had touched one vibrating chord either of body or soul; and he laid down the obligations of man to unconditional submission in a style which would have affected a person of delicate sensibility much like being mental-

ly sawn in sunder. Benevolence, when Simeon Brown spoke of it, seemed the grimmest and unloveliest of Gorgons; for his mind seemed to resemble those fountains which petrify everything that falls into them. But the hardest-shelled animals have a vital and sensitive part, though only so large as the point of a needle; and the Doctor's innocent proposition to Simeon, to abandon his whole worldly estate for his principles, touched this spot.

When benevolence required but the acquiescence in certain possible things which might be supposed to happen to his soul, which, after all, he was comfortably certain never would happen, or the acquiescence in certain supposititious sacrifices for the good of that most intangible of all abstractions, Being in general, it was a dry, calm subject. But when it concerned the immediate giving-up of his slave-ships and a transfer of business, attended with all that confusion and loss which he foresaw at a glance, then he *felt*, and felt too much to see clearly. His swarthy face flushed, his little blue eye kindled, he walked up to the Doctor and began speaking in the short, energetic sentences of a man thoroughly awake to what he is talking about.

"Doctor, you're too fast. You are not a practical man, Doctor. You are good in your pulpit;—nobody better. Your theology is clear;—nobody can argue better. But come to practical matters, why, business has its laws, Doctor. Ministers are the most unfit men in the world to talk on such subjects; it's departing from their sphere; they talk about what they don't understand. Besides, you take too much for granted. I'm not sure that this trade is an evil. I want to be convinced of it. I'm sure it's a favor to these poor creatures to bring them to a Christian land. They are a thousand times better off. Here they can hear the gospel and have some chance of salvation."

"If we want to get the gospel to the Africans," said the Doctor, "why not send whole ship-loads of missionaries to them, and carry civilization and the arts

and Christianity to Africa, instead of stirring up wars, tempting them to ravage each other's territories, that we may get the booty? Think of the numbers killed in the wars,—of all that die on the passage! Is there any need of killing ninety-nine men to give the hundredth one the gospel, when we could give the gospel to them all? Ah, Mr. Brown, what if all the money spent in fitting out ships to bring the poor negroes here, so prejudiced against Christianity that they regard it with fear and aversion, had been spent in sending it to them, Africa would have been covered with towns and villages, rejoicing in civilization and Christianity!"

"Doctor, you are a dreamer," replied Simeon, "an unpractical man. Your situation prevents your knowing anything of real life."

"Amen! the Lord be praised therefore!" said the Doctor, with a slowly increasing flush mounting to his cheek, showing the burning brand of a smouldering fire of indignation.

"Now let me just talk common-sense, Doctor,—which has its time and place, just as much as theology;—and if you have the most theology, I flatter myself I have the most common-sense; a business-man must have it. Now just look at your situation,—how you stand. You've got a most important work to do. In order to do it, you must keep your pulpit, you must keep our church together. We are few and weak. We are a minority. Now there's not an influential man in your society that don't either hold slaves or engage in the trade; and if you open upon this subject as you are going to do, you'll just divide and destroy the church. All men are not like you;—men are men, and will be, till they are thoroughly sanctified, which never happens in this life, —and there will be an instant and most unfavorable agitation. Minds will be turned off from the discussion of the great saving doctrines of the gospel to a side issue. You will be turned out,—and you know, Doctor, you are not appreciated as you ought to be, and it won't be

easy for you to get a new settlement; and then subscriptions will all drop off from your book, and you won't be able to get that out; and all this good will be lost to the world, just for want of common-sense."

"There is a kind of wisdom in what you say, Mr. Brown," replied the Doctor, naively; "but I fear much that it is the wisdom spoken in James, iii. 15, which 'descendeth not from above, but is earthly, sensual, devilish.' You avoid the very point of the argument, which is, Is this a sin against God? That it is, I am solemnly convinced; and shall I 'use lightness? or the things that I purpose do I purpose according to the flesh, that with me there should be yea, yea, and nay, nay?' No, Mr. Brown, immediate repentance, unconditional submission, these are what I must preach as long as God gives me a pulpit to stand in, whether men will hear or whether they will forbear."

"Well, Doctor," said Simeon, shortly, "you can do as you like; but I give you fair warning, that I, for one, shall stop my subscription, and go to Dr. Stiles's church."

"Mr. Brown," said the Doctor, solemnly, rising, and drawing his tall figure to its full height, while a vivid light gleamed from his blue eye, "as to that, you can do as you like; but I think it my duty, as your pastor, to warn you that I have perceived, in my conversation with you this morning, such a want of true spiritual illumination and discernment as leads me to believe that you are yet in the flesh, blinded by that 'carnal mind' which 'is not subject to the law of God, neither indeed can be.' I much fear you have no part nor lot in this matter, and that you have need, seriously, to set yourself to search into the foundations of your hope; for you may be like him of whom it is written, (Isaiah, xlv. 20,) 'He feedeth on ashes: a deceived heart hath turned him aside, that he cannot deliver his soul, nor say, Is there not a lie in my right hand?'"

The Doctor delivered this address to his man of influence with the calmness of an ambassador charged with a mes-

sage from a sovereign, for which he is no otherwise responsible than to speak it in the most intelligible manner; and then, taking up his hat and cane, he bade him good morning, leaving Simeon Brown in a tumult of excitement which no previous theological discussion had ever raised in him.

CHAPTER XI.

THE PRACTICAL TEST.

THE hens cackled drowsily in the barnyard of the white Marvyn-house; in the blue June-afternoon sky sported great sailing islands of cloud, whose white, glistening heads looked in and out through the green apertures of maple and blossoming apple-boughs; the shadows of the trees had already turned eastward, when the one-horse wagon of Mrs. Katy Scudder appeared at the door, where Mrs. Marvyn stood, with a pleased, quiet welcome in her soft, brown eyes. Mrs. Scudder herself drove, sitting on a seat in front,—while the Doctor, apparelled in the most faultless style, with white wrist-ruffles, plaited shirt-bosom, immaculate wig, and well-brushed coat, sat by Mary's side, serenely unconscious how many feminine cares had gone to his getting-up. He did not know of the privy consultations, the sewings, stitchings, and starchings, the ironings, the brushings, the foldings and unfoldings and timely arrangements, that gave such dignity and respectability to his outer man, any more than the serene moon rising tranquilly behind a purple mountain-top troubles her calm head with treatises on astronomy; it is enough for her to shine,—she thinks not how or why.

There is a vast amount of latent gratitude to women lying undeveloped in the hearts of men, which would come out plentifully, if they only knew what they did for them. The Doctor was so used to being well dressed, that he never asked why. That his wig always sat straight and even around his ample forehead, not facetiously poked to one side, nor assuming rakish airs, unsuited to clerical

dignity, was entirely owing to Mrs. Katy Scudder. That his best broadcloth coat was not illustrated with shreds and patches, fluff and dust, and hanging in ungainly folds, was owing to the same. That his long silk stockings never had a treacherous stitch allowed to break out into a long running ladder was due to her watchfulness; and that he wore spotless ruffles on his wrists or at his bosom was her doing also. The Doctor little thought, while he, in common with good ministers generally, gently traduced the Scriptural Martha and insisted on the duty of heavenly abstractedness, how much of his own leisure for spiritual contemplation was due to the Martha-like talents of his hostess. But then, the good soul had it in him to be grateful, and would have been unboundedly so, if he had known his indebtedness, — as, we trust, most of our magnanimous masters would be.

Mr. Zebedee Marvyn was quietly sitting in the front summer parlor, listening to the story of two of his brother church-members, between whom some difficulty had arisen in the settling of accounts: Jim Bigelow, a small, dry, dapper little individual, known as general jobber and factotum, and Abram Griswold, a stolid, wealthy, well-to-do farmer. And the fragments of conversation we catch are not uninteresting, as showing Mr. Zebedee's habits of thought and mode of treating those who came to him for advice.

"I could 'ave got along better, if he'd 'a' paid me regular every night," said the squeaky voice of little Jim; — "but he was allers puttin' me off till it come even change, he said."

"Well, 'ta'n't always handy," replied the other; "one doesn't like to break into a five-pound note for nothing; and I like to let it run till it comes even change."

"But, brother," said Mr. Zebedee, turning over the great Bible that lay on the mahogany stand in the corner, "we must go to the law and to the testimony," — and, turning over the leaves, he read from Deuteronomy, xxiv. :—

"Thou shalt not oppress an hired servant that is poor and needy, whether he

be of thy brethren or of thy strangers that are in thy land within thy gates. At his day thou shalt give him his hire, neither shall the sun go down upon it; for he is poor, and setteth his heart upon it: lest he cry against thee unto the Lord, and it be sin unto thee."

"You see what the Bible has to say on the matter," he said.

"Well, now, Deacon, I rather think you've got me in a tight place," said Mr. Griswold, rising; and turning confusedly round, he saw the placid figure of the Doctor, who had entered the room unobserved in the midst of the conversation, and was staring with that look of calm, dreamy abstraction which often led people to suppose that he heard and saw nothing of what was going forward.

All rose reverently; and while Mr. Zebedee was shaking hands with the Doctor, and welcoming him to his house, the other two silently withdrew, making respectful obeisance.

Mrs. Marvyn had drawn Mary's hand gently under her arm and taken her to her own sleeping-room, as it was her general habit to do, that she might show her the last book she had been reading, and pour into her ear the thoughts that had been kindled up by it.

Mrs. Scudder, after carefully brushing every speck of dust from the Doctor's coat and seeing him seated in an arm-chair by the open window, took out a long stocking of blue-mixed yarn which she was knitting for his winter wear, and, pinning her knitting-sheath on her side, was soon trotting her needles contentedly in front of him.

The ill-success of the Doctor's morning attempt at enforcing his theology in practice rather depressed his spirits. There was a noble innocence of nature in him which looked at hypocrisy with a puzzled and incredulous astonishment. How a man *could* do so and be so was to him a problem at which his thoughts vainly labored. Not that he was in the least discouraged or hesitating in regard to his own course. When he had made up his mind to perform a duty, the question

of success no more entered his thoughts than those of the granite boulder to which we have before compared him. When the time came for him to roll, he did roll with the whole force of his being;—where he was to land was not his concern.

Mildly and placidly he sat with his hands resting on his knees, while Mr. Zebedee and Mrs. Scudder compared notes respecting the relative prospects of corn, flax, and buckwheat, and thence passed to the doings of Congress and the last proclamation of General Washington, pausing once in a while, if, peradventure, the Doctor might take up the conversation. Still he sat dreamily eyeing the flies as they fizzed down the panes of the half-open window.

"I think," said Mr. Zebedee, "the prospects of the Federal party were never brighter."

The Doctor was a stanch Federalist, and generally warmed to this allure-ment; but it did not serve this time.

Suddenly drawing himself up, a light came into his blue eyes, and he said to Mr. Marvyn,—

"I'm thinking, Deacon, if it is wrong to keep back the wages of a servant till after the going down of the sun, what those are to do who keep them back all their lives."

There was a way the Doctor had of hearing and seeing when he looked as if his soul were afar off, and bringing suddenly into present conversation some fragment of the past on which he had been leisurely hammering in the quiet chambers of his brain, which was sometimes quite startling.

This allusion to a passage of Scripture which Mr. Marvyn was reading when he came in, and which nobody supposed he had attended to, startled Mrs. Scudder, who thought, mentally, "Now for it!" and laid down her knitting-work, and eyed her cousin anxiously. Mrs. Marvyn and Mary, who had glided in and joined the circle, looked interested; and a slight flush rose and overspread the thin cheeks of Mr. Marvyn, and his blue eyes deepened in a moment with a

thoughtful shadow, as he looked inquiringly at the Doctor, who proceeded:—

"My mind labors with this subject of the enslaving of the Africans, Mr. Marvyn. We have just been declaring to the world that all men are born with an inalienable right to liberty. We have fought for it, and the Lord of Hosts has been with us; and can we stand before Him with our foot upon our brother's neck?"

A generous, upright nature is always more sensitive to blame than another,—sensitive in proportion to the amount of its reverence for good,—and Mr. Marvyn's face flushed, his eye kindled, and his compressed respiration showed how deeply the subject moved him. Mrs. Marvyn's eyes turned on him an anxious look of inquiry. He answered, however, calmly:—

"Doctor, I have thought of the subject, myself. Mrs. Marvyn has lately been reading a pamphlet of Mr. Thomas Clarkson's on the slave-trade, and she was saying to me only last night, that she did not see but the argument extended equally to holding slaves. One thing, I confess, stumbles me:—Was there not an express permission given to Israel to buy and hold slaves of old?"

"Doubtless," said the Doctor; "but many permissions were given to them which were local and temporary; for if we hold them to apply to the human race, the Turks might quote the Bible for making slaves of us, if they could,—and the Algerines have the Scripture all on their side,—and our own blacks, at some future time, if they can get the power, might justify themselves in making slaves of us."

"I assure you, Sir," said Mr. Marvyn, "if I speak, it is not to excuse myself. But I am quite sure my servants do not desire liberty, and would not take it, if it were offered."

"Call them in and try it," said the Doctor. "If they refuse, it is their own matter."

There was a gentle movement in the group at the directness of this personal application; but Mr. Marvyn replied, calmly,—

"Cato is up at the eight-acre lot, but you may call in Candace. My dear, call Candace, and let the Doctor put the question to her."

Candace was at this moment sitting before the ample fireplace in the kitchen, with two iron kettles before her, nestled each in its bed of hickory coals, which gleamed out from their white ashes like sleepy, red eyes, opening and shutting. In one was coffee, which she was burning, stirring vigorously with a pudding-stick,—and in the other, puffy doughnuts, in shapes of rings, hearts, and marvellous twists, which Candace had such a special proclivity for making, that Mrs. Marvyn's table and closets never knew an intermission of their presence.

"Candace, the Doctor wishes to see you," said Mrs. Marvyn.

"Bress his heart!" said Candace, looking up, perplexed. "Wants to see me, does he? Can't nobody hab me till dis yer coffee's done; a uinnit's a minnit in coffee;—but I'll be in dereckly," she added, in a patronizing tone. "Missis, you jes' go 'long in, an' I'll be dar dereckly."

A few moments after, Candace joined the group in the sitting-room, having hastily tied a clean, white apron over her blue linsey working-dress, and donned the brilliant Madras which James had lately given her, and which she had a barbaric fashion of arranging so as to give to her head the air of a gigantic butterfly. She sunk a dutiful curtsy, and stood twirling her thumbs, while the Doctor surveyed her gravely.

"Candace," said he, "do you think it right that the black race should be slaves to the white?"

The face and air of Candace presented a curious picture at this moment; a sort of rude sense of delicacy embarrassed her, and she turned a deprecating look, first on Mrs. Marvyn and then on her master.

"Don't mind us, Candace," said Mrs. Marvyn; "tell the Doctor the exact truth."

Candace stood still a moment, and the spectators saw a deeper shadow roll over her sable face, like a cloud over a dark

pool of water, and her immense person heaved with her labored breathing.

"Ef I must speak, I must," she said. "No,—I neber did tink 'twas right. When Ginerel Washington was here, I hearn 'em read de Declaration ob Independence and Bill o' Rights; an' I tole Cato den, says I, 'Ef dat ar' true, you an' I are as free as anybody.' It stands to reason. Why, look at me,—I a'n't a critter. I's neider huffs nor horns. I's a reasonable bein',—a woman,—as much a woman as anybody," she said, holding up her head with an air as majestic as a palm-tree;—"an' Cato,—he's a man, born free an' equal, ef dar's any truth in what you read,—dat's all."

"But, Candace, you've always been contented and happy with us, have you not?" said Mr. Marvyn.

"Yes, Mass'r,—I ha'n't got nuffin to complain ob in dat matter. I couldn't hab no better friends 'n you an' Missis."

"Would you like your liberty, if you could get it, though?" said Mr. Marvyn. "Answer me honestly."

"Why, to be sure I should! Who wouldn't? Mind ye," she said, earnestly raising her black, heavy hand, "'ta'n't dat I want to go off, or want to shirk work; but I want to *feel free*. Dem dat isn't free has nuffin to gib to nobody;—dey can't show what dey would do."

"Well, Candace, from this day you are free," said Mr. Marvyn, solemnly.

Candace covered her face with both her fat hands, and shook and trembled, and, finally, throwing her apron over her head, made a desperate rush for the door, and threw herself down in the kitchen in a perfect tropical torrent of tears and sobs.

"You see," said the Doctor, "what freedom is to every human creature. The blessing of the Lord will be on this deed, Mr. Marvyn. 'The steps of a just man are ordered by the Lord, and he delighteth in his way.'"

At this moment, Candace reappeared at the door, her butterfly turban somewhat deranged with the violence of her prostration, giving a whimsical air to her portly person.

"I want ye all to know," she said, with a clearing-up snuff, "dat it's my will an' pleasure to go right on doin' my work jes' de same; an', Missis, please, I'll allers put three eggs in de crullers, now; an' I won't turn de wash-basin down in de sink, but hang it jam-up on de nail; an' I won't pick up chips in a milkpan, ef I'm in ever so big a hurry;—I'll do eberyting jes' as ye tells me. Now you try me an' see ef I won't!"

Candace here alluded to some of the little private wilfulnesses which she had always obstinately cherished as reserved rights, in pursuing domestic matters with her mistress.

"I intend," said Mr. Marvyn, "to make the same offer to your husband, when he returns from work to-night."

"Laus, Mass'r,—why, Cato he'll 'do jes' as I do,—dere a'n't no kind o' need o' askin' him. 'Course he will."

A smile passed round the circle, because between Candace and her husband there existed one of those whimsical contrasts which one sometimes sees in married life. Cato was a small-built, thin, softly-spoken negro, addicted to a gentle chronic cough; and, though a faithful and skilful servant, seemed, in relation to his better half, much like a hill of potatoes under a spreading apple-tree. Candace held to him with a vehement and patronizing fondness, so devoid of conjugal reverence as to excite the comments of her friends.

"You must remember, Candace," said a good deacon to her one day, when she was ordering him about at a catechizing, "you ought to give honor to your husband; the wife is the weaker vessel."

"*I de weaker vessel?*" said Candace, looking down from the tower of her ample corpulence on the small, quiet man whom she had been fledging with the ample folds of a worsted comforter, out of

which his little head and shining bead-eyes looked, much like a blackbird in a nest,—"*I de weaker vessel? Umph!*"

A whole-woman's-rights' convention could not have expressed more in a day than was given in that single look and word. Candace considered a husband as a thing to be taken care of,—a rather inconsequent and somewhat troublesome species of pet, to be humored, nursed, fed, clothed, and guided in the way that he was to go,—an animal that was always losing off buttons, catching colds, wearing his best coat every day, and getting on his Sunday hat in a surreptitious manner for week-day occasions; but she often condescended to express it as her opinion that he was a blessing, and that she didn't know what she should do, if it wasn't for Cato. In fact, he seemed to supply her that which we are told is the great want in woman's situation,—an object in life. She sometimes heard expressing herself very energetically in disapprobation of the conduct of one of her sable friends, named Jinny Stiles, who, after being presented with her own freedom, worked several years to buy that of her husband, but became afterwards so disgusted with her acquisition that she declared she would "neber buy anoder nigger."

"Now Jinny don't know what she's talkin' about," she would say. "S'pose he does cough and keep her awake nights, and take a little too much sometimes, a'n't he better'n no husband at all? A body wouldn't seem to hab nuffin to lib for, ef dey hadn't an ole man to look arter. Men is nate'll'y foolish about some tings,—but dey's good deal better'n nuffin."

And Candace, after this condescending remark, would lift off with one hand a brass kettle in which poor Cato might have been drowned, and fly across the kitchen with it as if it were a feather.

[To be continued.]

REVIEWS AND LITERARY NOTICES.

The Works of Francis Bacon, Baron of Verulam, Viscount St. Alban, and Lord High Chancellor of England. Collected and edited by James Spedding, M.A., of Trinity College, Cambridge; Robert Leslie Ellis, M.A., late Fellow of Trinity College, Cambridge; and Douglas Denon Heath, Barrister-at-Law, late Fellow of Trinity College, Cambridge. Vols. I.—VI. London: Longman & Co. 1858.

"For my name and memory," said Bacon in his will, "I leave it to men's charitable speeches, and to foreign nations, and to the next ages." Scarcely was he dead when the first portion of this legacy received some part of its fulfilment in the touching and often quoted words of Ben Jonson:—"My conceit of his person was never increased toward him by his place or honors; but I have and do reverence him for the greatness that was only proper to himself, in that he seemed to me ever, by his work, one of the greatest men and most worthy of admiration that had been in many ages. In his adversity, I ever prayed that God would give him strength; for greatness he could not want. Neither could I condole in a word or syllable for him, as knowing no accident could do harm to virtue, but rather help to make it manifest." But it may fairly be doubted whether "the next ages" have done fitly by his memory, spite of the honor that has been indiscriminately lavished upon his name as a philosopher, and the mass of praise, for the most part ignorant, beneath which his works have been buried. The world of readers has been content to take Bacon's greatness upon trust, or to form such imperfect idea of it as was to be got from acquaintance with his "Essays," the only one of his works which has ever attained popularity. Even more thorough students have, for the most part, satisfied themselves with a general view of Bacon's philosophy, dwelling on disconnected passages of ample thought or aphoristic wisdom, and rarely attempting to gain an insight into the real character of his system. Indeed, "the system of Lord Bacon" became a sort of cabalistic

phrase. It meant anything and everything. It was like the English Constitution, venerable in authority and prescription, interpreted in contradictory methods, and never precisely defined. Few men undertook to study it with a zeal like that of Horner and his friend Lord Webb Seymour, when, in days of enthusiasm, they read and re-read the "*De Augmentis*" and the "*Novum Organum*," and Horner planned to do what Dr. Whewell seems to suppose he has done, bring Bacon up to the present time, by writing a work upon the basis of his, which should furnish a complete review of modern knowledge. Still, it has been part of an English birth-right to hold Bacon as the restorer of the sciences, the inventor or at least the re-inventor of the inductive method, and the father of all discovery since his time. These notions have been held firmly, while more special ones concerning his system and himself have been, for the most part, vague or unformed.

In great part, this fact is the result of the condition in which Lord Bacon left his works, the manner of their composition, and their intrinsic defects. He did not publish them in any systematic order, but printed one after another, as it was written, or as extraneous circumstances might induce. Nor did he leave his system complete in any one treatise. His mind discursive, his imagination easily fired, he seized subject after subject and discussed each in a separate treatise, all with more or less reference to a general plan, but not embodied in any consecutive and harmonious development. The growth of his ideas, the changes of his views, as his life advanced, are manifest in the want of connection, as well as in the connection, of these various fragments. Dr. Rawley, his chaplain, says,—and it is a marvellous illustration of Bacon's diligence and desire for perfection,—"I myself have seen, at the least, twelve copies of the '*Instauratio*,' revised year by year, one after another, and every year altered and amended in the frame thereof."

Such, then, being the state of Bacon's works at his death, much was left to the judgment of his editors, and, unfortunate-

ly, the labor of editing his books has, up to the present time, fallen into hands wanting in competence and discretion. It has consequently been a task of special difficulty to get from the ill-arranged mass of Bacon's writings a satisfactory view of the essential elements of his philosophy and a just knowledge of his final opinions.

But the reproach of non-fulfilment of the trust committed to them will rest upon "the next ages" no longer; for the edition which is now in course of publication amply redeems the faults of those that have preceded it, and is such a one as Bacon himself might have approved. In the second book of the "Advancement of Learning," in recounting "the works or acts of merit toward learning," he includes among them "new editions of authors, with more correct impressions, more faithful translations, more profitable glosses, more diligent annotations, and the like." In each of these respects the edition before us deserves the highest praise. The editors have engaged in their task as in a labor of love. It is the result of many years of study, and it exhibits the fruit of unwearied care, great learning, and excellent judgment. So far as it has advanced, it does the highest honor to English scholarship, and takes its place as one of the most remarkable editions in existence of any author whose works stand in need of editorial care. The plan upon which it is arranged is as follows. Bacon's works are divided into three broad classes:—first, the Philosophical; secondly, the Professional; thirdly, the Literary and Occasional. Each of these classes was undertaken by a separate editor. Mr. Robert Leslie Ellis engaged upon the Philosophical Works, and had advanced far in his task when he was suddenly compelled to relinquish it some years since by illness which completely disabled him for labor. What he had already accomplished is so well done as to excite sincere regret that he was unable to carry his work forward. But this regret is diminished by the ability with which Mr. James Spedding, who had taken charge of the Literary and Occasional Works, has supplied Mr. Ellis's place in the completion of the editing of the Philosophical. The burden of the edition has fallen upon his shoulders, and the chief credit for its excellence is due to

him. Up to the present time, the publication of the Philosophical Works is complete in five volumes, and the first volume of the Literary Works has just appeared. The separate treatises contained in the completed portion are distributed into three parts,—“whereby,” says Mr. Spedding, “all those writings which were either published or intended for publication by Bacon himself as parts of the Great Instauration are (for the first time, I believe) exhibited separately, and distinguished as well from the independent and collateral pieces which did not form part of the main scheme, as from those which, though originally designed for it, were afterwards superseded and abandoned.” Each piece is accompanied with a preface, both critical and historical, and with notes. It is in these prefaces that a great part of the value of the new edition consists; for they are in themselves treatises of elucidation and illustration of Bacon's opinions, and of investigation concerning the changes they underwent from time to time. They are written with great clearness and ability, and, taken together, present such a view of Bacon's philosophy as is to be found nowhere else, and amply answers the requirements of students, however exacting.

Far too much credit has been attributed to Bacon, in popular estimation, as the author of a system upon which the modern progress of science is based.* What-

* The tendency of scientific thought had been, for a considerable period before the time of Bacon, turned in the direction which he, perhaps, did more than any other single investigator to follow out and confirm. Leonardo da Vinci, the completest and most comprehensive genius of Modern Italy, had anticipated, by more than a century, several of the prominent features of the Baconian system. Too little of Leonardo's scientific writings has been published to furnish material for a satisfactory determination of their importance in promoting the advance of knowledge,—but the coincidence of thought, in some passages of his writings, with that in some of Bacon's weighty sentences, is remarkable. “I shall treat of this subject,” he says, in a passage published by Venturi, “but I shall first set forth certain experiments; it being my principle to cite experience first, and then to demonstrate why bodies are constrained to act in such or such a manner. This is the method to be observed in investigating the

ever his system may have been, it is certain that it has had little direct influence upon the advance of knowledge. But, perhaps, too little credit has been given to Bacon as a man whose breadth and power of thought and amplitude of soul enabled him to inspire into the pursuit of science a spirit that has at once stimulated its progress and elevated its disciples. That Bacon believed himself to have invented a system wholly new admits of no doubt; but it is doubtful whether he ever definitely arranged this system in his own mind. And it is a curious and interesting fact, and one illustrative, at least, of the imperfection of Bacon's exposition of his own meth-phenomena of Nature. It is true that Nature begins with the reason and ends with experience; but no matter; the opposite way is to be taken. We must, as I have said, begin with experience, and by means of this discover the reason."

Compare with this the two following passages from the "Novum Organum,"—the first being taken from the Ninety-ninth Axiom of the First Book. "Then only will there be good ground of hope for the further advance of knowledge, when there shall be received and gathered together into natural history a variety of experiments, which are of no use in themselves, but to discover causes and axioms."—The next passage is the Twenty-sixth Axiom of the same Book:—"The conclusions of human reason, as ordinarily applied in matter of nature, I call, for the sake of distinction, *Anticipations of Nature* (as a thing rash or premature). That reason which is elicited from facts by a just and methodical process I call *Interpretation of Nature*."

The first and famous axiom of the "Novum Organum" contains the phrase which Bacon constantly repeats,—“man being the interpreter of Nature.” Leonardo uses the same expression,—“li omini inventori e interpreti tra la natura e gli omini.” In another admirable passage of rebuke of the boastful and empty followers of old teachers, Leonardo says: “Though I might not cite authors as well as they, I shall cite a much greater and worthier thing, in citing experience, the teacher of their teachers” (*maestra ai loro maestri*). “And as for the overmuch credit,” says Bacon, “that hath been given unto authors in sciences, in making them dictators that their words should stand, and not counsellors to give advice, the damage is infinite that sciences have received thereby.”

Similar parallelisms of thought are to be found in some of Galileo's sentences, when brought into comparison with Lord Bacon.

od, that Mr. Ellis and Mr. Spedding, the two most conscientious investigators of Bacon's thought, should have arrived at different conclusions in regard to the distinctive peculiarities of the Baconian philosophy. Mr. Spedding, in his very interesting preface to the “Parasceve,” suggests, since his own and Mr. Ellis's conclusions, though different, do not appear irreconcilable, “whether there be not room for a third solution, more complete than either, as including both.” Both he and Mr. Ellis set out from the position, that “the philosophy which Bacon meant to announce was in some way essentially different, not only from any that had been before, but from any that has been since,”—a position very much opposed to the popular opinion. “The triumph of his [Bacon's] principles of scientific investigation,” said, not long since, a writer in the “Quarterly Review,” whose words may be taken as representative of the common ideas on the matter, “has made it unnecessary to revert to the reasoning by which they were established.”* But the truth seems to be, that the merits of Bacon belong, as Mr. Ellis well says, “to the spirit rather than to the positive precepts of his philosophy.” Nor does it appear that Bacon himself, although he indulged the highest hopes and felt the secure confidence in the results of his perfected system, supposed that he had given to it that perfection which was required. In the “De Augmentis Scientiarum,” published in 1623, two years and a half before his death, he says: “I am preparing and laboring with all my might to make the mind of man, by help of art, a match for the nature of things, (*ut mens per artem fiat rebus par*), to discover an art of Indication and Direction, whereby all other arts, with their axioms and works, may be detected and brought to light. For I have, with good reason, set this down as wanting.” (Lib. v. c. 2.) Bacon regarded his method, not only as one wholly new, but also of universal application, and leading to absolute certainty. Doubt was to be excluded from its results. By its means, all the knowledge of which men were capable was to be attained surely and in a comparatively brief space of time. Such a conviction, extravagant as it may seem, is

* Article on Whately's Edition of Bacon's Essays. September, 1856.

expressed in many passages. In the Preface to his "Parasceve," published in 1620, in the same volume with the "Novum Organum," he says, that he is about to describe a Natural and Experimental History, which, if it be once provided, (and he assumes, that, "etiam vivis nobis," it may be provided,) "paucorum annorum opus futuram esse inquisitionem naturæ et scientiarum omnium." Again, in the Proœmium of the "Novum Organum": "There was but one course left, to commence a total reconstruction of sciences, arts, and all human knowledge, raised upon the proper foundations." And in the Dedication to the same work, he says, with characteristic confidence, "Equidem Organum præbui,"—"I have provided the Instrument."

The cause of Bacon's error in this regard, an error in spite of which his philosophical works still remain the crowded repositories of true wisdom, seems to have arisen, in considerable part, from a defect of imagination. Knowledge is to be viewed in two aspects: one, that of its relation to the finite capacities of the human mind; the other, its relation to the infinity of Nature, that is, to the infinity of the subjects of knowledge. Bacon regarded it chiefly from the first point of view,—and, so far as we are aware, there is nowhere in his works any recognition of the fact, that each advance in knowledge only opens new and previously unknown regions of what is yet to be known. He supposed that by his process Nature could be simplified to her few primary elements, and that from these all other knowledge was to be deduced. But, although her laws and elementary forms may be few, their modifications, as affecting knowledge and consequently human power and interests, are unlimited. Moreover, in supposing that the discovery of Nature could be made certain, and that, by a proper collection of facts, the intellects of men might be brought upon a level of capacity for discovery,—that is, that the process of discovery could be reduced to a simple process of correct reasoning upon established facts,—Bacon omitted to take into account the essential part which the imagination plays in all discovery.

No discovery, properly so called, is the pure result of observation and induction. Maury takes the accumulated observations

of fifty years, deduces from them the existence of certain prevailing winds and currents, and states the fact. It is not properly a discovery, although a collection of similar facts may lead to the knowledge of a general law. Newton sees an apple fall; his imagination, with one of the vastest leaps that human imagination ever made, connects its fall with the motion of the planets, and makes an immortal discovery. James Watt said, "Nature has her blind side." True, but it is only the instinct of the imagination that discovers where the blind side lies. The tops of kettles had been dancing ever since kettles were first hung over fires, but no one caught the blind side of the fact till a Scotch boy saw it as he sat dreaming at his aunt's fireside.

But if Bacon's imagination was imperfect in some directions, it possessed in others a vision of the largest scope. No man ever saw more clearly or vindicated more nobly the dignity of knowledge, the capacity of the human mind, and the glory of God in the works of His hand. The impulse which he gave to thought is still gathering force, and many of the recommendations earnestly pressed in his works upon the attention of men are only now beginning to receive their recognition and accomplishment. When he sent a copy of the "Novum Organum" to Sir Henry Wotton, Wotton, in his letter of thanks, said, "Your Lordship hath done a great and everlasting benefit to the children of Nature, and to Nature herself in her utmost extent of latitude,"—and his eulogium had more truth than is common in contemporary compliments.

Great as a student of physical nature, Bacon was a master in the knowledge of human nature. Pope only chose the epithet which all the world had applied, when he wrote of the

"Words that wise Bacon or grave Raleigh spake."

And nowhere is his wisdom more apparent than in the book of his "Essays." The sixth volume of the edition before us contains, beside the "Essays," the "History of King Henry VII.," with other fragmentary histories, and the "De Sapientia Veterum," with a translation, which, like the translations of the principal philosophical works in previous volumes, is executed with admirable spirit and appropriate-

ness. All these works give the same evidence of editorial ability and skill as those in the division of Philosophy. Mr. Spedding's Preface to the "Henry VII." is not only an interesting essay in itself, but an able and satisfactory vindication of Bacon's general historic accuracy. Bacon's view of the true office of history is very different from the theory which has lately prevailed to a considerable extent, and it would be well, perhaps, were its wisdom more considered. "It is the true office of history," he says, (*Advancement of Learning*, Book II,) "to represent the events themselves, together with the counsels; and to leave the observations and conclusions thereupon to the liberty and faculty of every man's judgment." And to this he adds, with much pith, in the "De Augmentis," II. 9,—"*Licet enim Historia quæque prudentior politicis præceptis et monitis veluti impregnata sit, tamen scriptor ipse sibi obstetricari non debet.*" Bacon wrote history according to his own rule, and proved its value by the practical exemplification which he gave of it. There are few better pieces of historic narrative in English than this "History of Henry VII."

Special thanks are due to Mr. Spedding for having reprinted, in full, the first three editions of the "Essays,"—the three that were published by Bacon himself. The first appeared in 1597, and contained but ten essays; the second in 1612, when Bacon was in the height of prosperity, and contained thirty-eight; the third appeared in 1625, after his downfall, less than a year before his death, and contained fifty-eight essays. The three thus afford, as well by the successive additions of new essays as by the alterations which are made in the earlier, a most interesting exhibition of the direction of Bacon's thought at different periods of his life, and the changes in his style. The comparison is one of very great interest, but more space is required to develop it than we have for the present at command. One fact only may be noted in passing,—that the essay on Adversity, which contains that most memorable and noble sentence, "Prosperity is the blessing of the Old Testament, Adversity is the blessing of the New," is one of those added in the last edition, after Bacon himself had experienced all the bitterness of adversity.

Mr. Spedding proposes, in the forthcoming volumes of the *Occasional Works* of Lord Bacon, to connect his speeches and letters with an explanatory narrative,—thus presenting, he says, "a biography the most copious, the most minute, and, by the very necessity of the case, the fairest that I can produce." He promises "new matter which is neither little nor unimportant; but," he adds, "more important than the new matter is the new aspect which (if I may judge of other minds by my own) will be imparted to the old matter by this manner of setting it forth." We await this part of Mr. Spedding's work with especial interest, for in it will unquestionably be afforded, for the first time, the means of forming a correct judgment of Bacon's character, and just conclusions concerning those public actions of his which have hitherto stood in perplexing contradiction to his avowed principles, to the nobility of his views, to his religious professions, to the reverential love with which he was regarded by those who knew him best. It is not to be hoped that his life can be redeemed from stain; but it may be hoped that a true presentation of the grounds and bearings of his actions may relieve him from the name of "meanest of mankind," and may show that his faults were rather those of his time than of his nature. We shall keep our readers informed of the progress of this invaluable edition, which should lead to the more faithful and general study of the works of him whom "all that were great and good loved and honored."

A New History of the Conquest of Mexico.

In which Las Casas' Denunciations of the Popular Historians of that War are fully vindicated. By ROBERT ANDERSON WILSON, Counsellor at Law; Author of "Mexico and its Religion," etc. Philadelphia: James Challen & Son. Boston: Crosby, Nichols, & Co.

BEFORE touching on the subject-matter of this book, we have something to say respecting the spirit in which it appears to have been written, the style of its execution, and the manner in which it has been introduced to the world. As it is avowedly an attempt to refute the positions taken up by Mr. Prescott in his "History of the

Conquest of Mexico," and to destroy the established reputation of that work, we are naturally led into a comparison between the two writers, that extends beyond the theories and ideas which they have respectively adopted and maintained. We cannot but remember, (and such remembrances awaken now other feelings besides mere respect and admiration,) that, when Prescott was entering upon his literary career, he labored in silence and retirement; that, in the prosecution of his researches, in the gradual formation of his views, and in the preparation of his work, he spared no labor and made no account of time; that, devoting himself to his chosen pursuit with the ardor of a scholar and a searcher after truth, he felt a modest self-reliance, and a just confidence in the utility of his labors, without anticipating the reward of a wide-spread fame; that he was prompt to acknowledge every service, or offer of service, which had been made to him, and communicated to the public not only his information, but the sources from which it had been derived; that, where he rejected the conclusions of other writers, he treated those from whom he differed with the utmost courtesy and candor; and that, when his task was completed, he left it to the free judgment of the world, without soliciting approbation or courting any man's applause.

This is not the course which Mr. Robert Anderson Wilson has thought fit to take. An accidental visit to Mexico, for which he appears to consider himself entitled to no slight commendation, led him into some speculations on the origin and civilization of the Aztec race. Without waiting to inform himself of the ideas entertained on these subjects by other men, he hastened to put forth his own crude notions in a work entitled "Mexico and its Religion," and twice reprinted by its enterprising publishers, with titles varied to suit what was supposed to be the popular taste. Still entertaining an aversion to laborious study, (for which, indeed, his previous education, as well as precarious health, appears to have disqualified him,) he announced his purpose to write a History of the Conquest of Mexico "from the American stand-point," and issued what he himself called "a clap-trap advertisement," for the purpose of enlisting the sympathies of a class in whom hatred

of Romanism preponderates over knowledge and judgment. He had made some progress in his "History," when he found that the ideas which he had supposed to be original in his own brain were old and trite. Being thus precluded from claiming for himself the merits of a discoverer, he has shown an eagerness, every way praiseworthy, to place the laurel on the brow to which he supposes it rightfully belongs. Accordingly, he presents to the world, as his master and pioneer, that renowned authority on the antiquities of New Spain, the Hon. Lewis Cass, who, it appears, had published an essay on the subject in the "North American Review." While his work was passing through the press, Mr. Wilson wrote what he styles a "Chapter Preliminary," but what we suppose would have been styled by persons who affect the native idiom when writing their own language, a "Preliminary Chapter." This "Chapter Preliminary" he printed and circulated, in advance of the publication of his book; and though it contains not a single fact in support of his theory, nor even any clear statement of the theory itself, he was rewarded, as he expected, with *puffs preliminary* from a portion of the press, prompt to recognize the merit of a gentleman who had something to sell, and consequently something to be advertised. The "advance notices,"—so he calls them,—thus obtained, are made part of his book, and may there be read alike by discerning and undiscerning readers. With equal ingenuity he has prefixed to it a title-page, the grammar of which is questionable and the punctuation vile, but in which he has contrived to represent his opinions as identical with those of Las Casas, the great historian of the Spanish Conquests in America, although, in truth, this identity of opinion is purely imaginary, being founded on his mere conjectures in regard to the contents of a work of Las Casas, which, as he bitterly complains, has been withheld from the world. Then, with his two supporters, Las Casas on the one side, and Lewis Cass—we beg his pardon, we mean Lewis Cass—on the other, Mr. Wilson comes before the public, making first a bow "preliminary" to "Colonel and Mrs. Powell," "my dear Uncle," and "my dear Aunt," in a Dedication that reminds us of a certain form of invitations which our readers may

sometimes have received: "Miss Smith presents her compliments to Mr. Brown, and I hope you will do me the favor to take tea with me to-morrow evening."

But we have omitted to make mention of the letters "preliminary" which he has printed with the "advance notices." He indulges in frequent sneers at the "weight of authority" to which Mr. Prescott was accustomed to attach some importance in the discussion of a doubtful point. Nevertheless, in his extreme eagerness to obtain for his own opinions the sanction of an authoritative name, he publishes, as "Mr. Prescott's estimate of his researches," a letter which he had received from that gentleman, and, quite incapable of appreciating its quiet irony, evidently supposes that the historian of the Conquest of Mexico was prepared to retire from the field of his triumphs at the first blast of his assailant's trumpet. Next comes a letter from a gentleman whom Mr. Wilson calls "*Rousseau St. Hilaire*, author of '*The History of Spain*,' &c., and Professor of the Faculty of Letters in the University of Paris." This, we suppose, is the same gentleman who is elsewhere mentioned in the book as *Rousseau de St. Hilaire*, and as *Rosseau St. Hilaire*. Now we might take issue with Mr. Wilson as to the existence of his correspondent. It would be easy to prove that no person bearing the name is connected with the University of Paris. Adopting the same line of argument by which our author endeavors to convert the old Spanish chronicler, Bernal Diaz, into a myth, we might contend that the Sorbonne—the college to which M. St. Hilaire is represented as belonging—has been almost as famous for its efforts to suppress truth and the free utterance of opinion as the Spanish Inquisition itself,—that it would not hesitate at any little invention or disguise for the furtherance of its objects,—and hence, that the professor in question is in all probability a "myth," a mere "*Rousseau's Dream*," or rather, a "*Wilson's Dream of Rousseau*." But we disdain to have recourse to such evasions. We admit that there is in the University of Paris a professor "*agrégé à la faculté des lettres*," who bears the name of *Rosseeuw St. Hilaire*; we admit Mr. Wilson's incapacity to decipher foreign names or words, even when they stand before him in the clearest print,—an incapacity

of which his book affords numerous examples,—and that this incapacity, and not any mental hallucination, has been the cause of the blunder which we have corrected. But we must add that he does evidently labor under an hallucination when he calls this letter of M. St. Hilaire a "flattering notice." He has been misled by his inability to comprehend the employment of courteous language between persons who differ from each other in matters of opinion. With the accustomed suavity of a Frenchman and a gentleman, M. St. Hilaire declines entering into a discussion with Mr. Wilson, and leaves him to "settle this difference with his learned fellow-citizen," Mr. Prescott, mildly intimating at the same time that he will probably have "his hands full."

Something more remains to be said of the use which our author has made of the learned professor of the Sorbonne. One page of his book Mr. Wilson devotes to "Acknowledgments." These are few, but ponderous. "Acknowledgments are made" to the Hon. Lewis Cass, for having written—without any ulterior view, we imagine, to Mr. Wilson's advantage—the before-mentioned article in the "*North American Review*"; to the late Mr. Galatin, for the publication—also, we suspect, without any foresight of the tremendous uses to which it was to be turned—of a paper on the Mexican dialects; to "Aaron Erickson, Esq., of Rochester, N. Y., for the advantages he has afforded us in the prosecution of our arduous investigations"; to "Major Robert Wilson, now at Fort Riley, Kansas," for no particular reason expressed; and to "*M. Rousseau de St. Hilaire*, both for the flattering notice he has taken of our preliminary work" (why not, "work preliminary?") "on Mexico, and for the advantages derived from his writings." In regard to the "advantages" here mentioned, we are going to relieve Mr. Wilson's mind. His obligations to M. St. Hilaire are really far lighter than he supposes. It is true that he has picked most of the little information he possesses in regard to Spanish history out of the professor's work, and has strewed his pages with copious extracts from this recondite source. But, in making his acknowledgments, he might have gone still farther back. M. St. Hilaire is a laborious and enthusiastic schol-

ar. He has found time, in the midst of his professional duties, to write a really meritorious work on the history of Spain. But he had not the time, perhaps not the opportunity, for making a thorough examination of the original authorities. He was therefore obliged to take for his guide a modern author, who had made this history the peculiar field of his researches. The guide whom he selected, and he could have made no better choice, was William Hickling Prescott. So necessary was it for his purpose that the latter should precede him in a pathway so obscure, that he postponed the composition of a portion of his work until the publication of the first two volumes of the "History of Philip the Second," then in preparation, should supply him with the requisite light. His indebtedness to Mr. Prescott was frankly and fully acknowledged both in public and in private. In letters which now lie before us, he says,—“I am working hard on ‘Philip the Second,’ and blessing at the same time the learned pioneer who has traced for me so easy a road through this confused and difficult period of history.” “It is a piece of good-fortune which I cannot too highly appreciate, that your studies should have been directed to the most difficult portion of Spanish history, from which you have thus removed for me all the thorns. The conscientiousness and the thoroughness of your researches, the perfect trustworthiness of your conclusions, and the lofty calmness of your judgments, are the precious supports on which I lean; and I have now, for the reign of Philip the Second, a guide whom I shall be ever proud and happy to follow, as *I have before followed him through the reigns of the Catholic Kings and the Conquests of Mexico and Peru.*” That these expressions are no exaggeration of the facts of the case might be easily established by a comparison of the “*Histoire d’Espagne*” with the writings of the American historian. The passages in the former work cited by Mr. Wilson would form a portion of the proof; and thus, in following M. St. Hilaire, he has in fact been indirectly and ignorantly availing himself of labors which he affects to speak of with contempt.

But directly and knowingly, as we shall hereafter show, he has availed himself of Mr. Prescott’s labors to an extent which demanded the most ample “acknowledg-

ment.” No such acknowledgment is made. But we beg to ask Mr. Wilson whether there were not other reasons why he should have spoken of this eminent writer, if not with deference, at least with respect. He himself informs us that “the most kindly relations” existed between them. If we are not misinformed, Mr. Wilson opened the correspondence by modestly requesting the loan of Mr. Prescott’s collection of works relating to Mexican history, for the purpose of enabling him to write a refutation of the latter’s *History of the Conquest*. That the replies which he received were courteous and kindly, we need hardly say. He was informed, that, although the constant use made of the collection by its possessor for the correction of his own work must prevent a full compliance with this request, yet any particular books which he might designate should be sent to him, and, if he were disposed to make a visit to Boston, the fullest opportunities should be granted him for the prosecution of his researches. This invitation Mr. Wilson did not think fit to accept. Books which were got in readiness for transmission to him he failed to send for. He had, in the mean time, discovered that “the American stand-point” did not require any examination of “authorities.” We regret that it should also have rendered superfluous an acquaintance with the customs of civilized society. The tone in which he speaks of his distinguished predecessor is sometimes amusing from the conceit which it displays, sometimes disgusting from its impudence and coarseness. He concedes Mr. Prescott’s good faith in the use of his materials. It was only his ignorance and want of the proper qualifications that prevented him from using them aright. “His non-acquaintance with Indian character is much to be regretted.” Mr. Wilson himself enjoys, as he tells us, the inestimable advantage of being the son of an adopted member of the Iroquois tribe. Nay, “his ancestors, for several generations, dwelt near the Indian agency at Cherry Valley, on Wilson’s Patent, *though in Cooperstown village was he born.*” We perceive the author’s fondness for the inverted style in composition,—acquired, perhaps, in the course of his long study of Aboriginal oratory. Even without such proofs, and without his own assertion of the fact, it would not have been

difficult, we think, to conjecture his familiarity with the forms of speech common among barbarous nations.

But it is not merely through "his non-acquaintance with Indian character" that Mr. Prescott was at fault. He was also, it appears, in a hopeless state of ignorance in regard to the political institutions of Spain. He knew nothing of the Spanish censorship, and its restrictions upon the freedom of the press. "He showed his faith," writes Mr. Wilson, "by the expenditure of a fortune at the commencement of his enterprise, in the purchase of books and MSS. relating to 'America of the Spaniards.'" This last phrase is marked as quoted, but we believe it to be the author's own. "These were the materials out of which he framed his two histories of the two aboriginal empires, Mexico and Peru. At the time these works were written he could not have had the remotest idea of the circumstances under which his Spanish authorities had been produced, or of the external pressure that gave them their peculiar form and character. He could hardly understand that peculiar organization of Spanish society through which one set of opinions might be uniformly expressed in public, while the intellectual classes in secret entertain entirely opposite ones. He acted throughout in the most perfect good faith; and if, on a subsequent scrutiny, his authorities have proved to be the fabulous creations of Spanish-Arabian fancy, he is not in fault." (p. 104.)—We, also, desire to deal in "perfect good faith" with our readers, who will naturally inquire what new light has been thrown on the "peculiar organization of Spanish society," and on the conditions which limit the expression of opinions in Spain, since Mr. Prescott made those subjects his especial study. We have looked carefully through Mr. Wilson's book in the hope of being enabled to answer this inquiry; but we have found nothing but partial and incorrect statements of facts with which the public is already familiar,—nothing that had escaped the notice of Prescott himself,—nothing that Mr. Ticknor, in his "History of Spanish Literature," had omitted to state, and that had not been fully discussed between these two distinguished men during an intercourse that had originated not only in the warmest personal friendship, but in the similarity of their studies and pursuits.

On this, as on every other topic of which he treats, Mr. Wilson is reckless and arrogant in assertion; but on this, as on every other topic, he makes no show of proofs.

His compliment to Prescott's "good faith" seems, after all, to have been premature. In other parts of his book we find remarks that seem in conflict with this admission. He makes several severe strictures on Mr. Prescott's omission to give due credit to General Cass for his valuable contribution to Aztec history. "Mr. Prescott nowhere refers to the subject, as we think he ought to have done." (p. 30.) "The ink was hardly dry on the leaves of the North American Quarterly which contained the exposure of these fictions, when another contributor to the same periodical, Mr. Prescott, began his history, founded on authors already denounced as fabulous by so high an authority as the Hon. Lewis Cass!" Think of the unparalleled audacity of the author of the "History of Ferdinand and Isabella" in actually exercising his own judgment with regard to the credibility of the Spanish chroniclers, after so high an authority had pronounced against them! However, we are not yet prepared to abandon our own belief in Mr. Prescott's "good faith." We really believe that he was guilty of no intentional disrespect towards the Hon. Lewis Cass. It is possible that he may never have seen the article in question. Contributors to periodicals are sometimes sadly neglectful of the most brilliant performances of their *confères*. We doubt whether the "Autocrat" has ever read with proper attention any of our own modest, but not, we hope, inelegant effusions.

Mr. Wilson is not without a suspicion that the world may be slow to surrender its confidence in the veracity and accuracy of a writer whose works have already stood the test of many a severe and critical examination. When this idea breaks upon his mind, he manages to lash himself into a state of considerable excitement. He foresees the difficulty of convincing "those who take an array of great names for the foundation of their belief, and those who judge a work only by the elegance with which its periods are strung together. And, besides these two,"—meaning, we presume, not two men, but two classes of men,—“we have to encounter also the

opposition of *savans*—men who live and judge the outside world through the medium of books alone. These hold as of no account, all but Greece and Rome," [the proof-reader is requested not to disturb Mr. Wilson's punctuation,] "and receive no idea of antiquity that does not come through them. For any, then, too wise to learn or too thoughtless to inquire, this chapter is not designed. . . . Many there are," [how many, we wonder,] "who have dealt in Spanish romances, supposing them to be history; and these are slow to abandon their delusions. At enormous expense they have gathered volumes of authorities; will they readily admit them to be cheats and counterfeits? They grudge the time too they have spent in their perusal; and are loth, as well they may be, to lose it. But individual loss and injury *is*" [the proof-reader will please not to interfere with Mr. Wilson's grammar] "perhaps inevitable in the search after truth. Men cannot be held down to the theories of barbarism. These must give way to knowledge, or the intelligent, as in *Roman Catholic countries, be driven to infidelity.*" [The printer may venture to italicize the closing prediction, as we wish to bring it under the particular notice of school-committees and superintendents of education, who will see the fearful responsibility they incur by placing copies of Prescott's Histories, bound in sheep, in their school-libraries.]

But we interrupt the flow of our author's bile by these irrelevant remarks. Let him have a full hearing: "Before closing this chapter, the *status* of our literature suggests an apology is necessary, for having opened it in conformity with the, now neglected, rules of history—that we should try and snatch something from the wreck of antiquity." [We cheerfully offer a reward of one copy of the present number of the "Atlantic" to any person who will parse the last sentence, explain the punctuation of it, and interpret its meaning.] "In other countries, the standard of history has been steadily rising for centuries; but with us, it has been so lowered, as to sink every other qualification in the single one of turning faultless periods; and a gentleman possessing this, has been adjudged fully capable of purging the annals of Spain and her quondam colonies, from the mass of modern fable and

forgery which now disfigure them. Incapable of submitting Cortez' statement to the test, he assumes it to be true, even in those parts where it is impossible. Unable to detect the counterfeit in Diaz—he pronounces him the 'child of nature,' but does not on the testimony of this natural child reject the still more monstrous falsifier, *Gomora*; but adopts them both, according to the custom of novelists; and not the slightest objection is raised. Then descending lower and still lower; disregarding alike the warning of Lord Bacon 'a credulous man is a deceiver,' and of Tacitus *jungunt simul creduntque*—he rakes up even a devotee, Boturini, and makes him also an historic authority, without overtaxing public credulity; though this wretch, as we have seen, out-Munchausens Pietro himself, and as he may have surpassed every other man in Spain in drawing the long bow, was justly selected for historiographer, at a time when death was the penalty for possessing a book not licensed by the Inquisition. Thus are discarded and disgusting impostures brought up from the literary cesspools of Spain to form for us the history of events that transpired on this continent hardly more than three hundred years ago!" (pp. 263, 264.) Instead of noticing the blunders and absurdities with which this paragraph is filled, we shall simply call attention to the remarkable good taste displayed in its allusions to a person with whom the writer, as he boasts, had maintained "the most kindly relations," from whom, as we have seen, he had received friendly offers of aid, and to whom, but a short time before the occurrence of that event which has so lately thrown the whole nation into mourning, he had been indebted, by his own admission, for the warmest encouragement in the prosecution of his inquiries.

But, though Prescott is the principal object of Mr. Wilson's assaults, he does not fall, for he has not stood, alone. With the single exception of the Hon. Lewis Cass, every modern writer who has investigated the history and former condition of Spanish America, either with the help of books or of personal observation of the present state of that part of our continent, shares the same fate. Robertson, Dupaix, Stephens, Humboldt, are all objects of Mr. Wilson's vituperation or contempt. To say that Alexander von

Humboldt is probably the most learned man in Europe, and that Robert A. Wilson is undoubtedly one of the most ignorant men in America, would give but a slight notion of the contrast between them. Humboldt is not merely a man of science and a philosopher,—titles which the adopted Iroquois regards with natural scorn,—he has been also a great traveller, and knows almost every part of Spanish America from personal examination. Yet his claims to be considered as an authority on questions which no other living man is so competent to decide are disposed of by his shallow and conceited opponent in a single brief paragraph, which ends with a statement that “the only defect in his work is, that he started from false premises, and of course his conclusions amount to nothing.”

Robertson, however, is the especial butt of Mr. Wilson's unwieldy sarcasms. Robertson, he tells us, was the “principal of the University High School of Edinburgh,”—an institution of which we do not remember ever to have heard before. He is especially indignant that “Robertson—a Presbyterian minister!” (the Italics and note of admiration are Mr. Wilson's own) should have dared even to attempt to write a history of America. As Roman Catholics are also forbidden to venture on this ground, we should be glad to know the particular sect or sects to whose use it is to be appropriated. A principal cause of our author's spite against Dr. Robertson appears to have been a statement made by the latter, that the Iroquois are cannibals. This allegation evidently touches a sensitive point. It is indignantly denied by the adopted member of the tribe. The Iroquois, he says, like other Indians, never eat human flesh, unless driven to it by hunger. He turns the tables (on which this ill-omened repast is spread) against the worthy Doctor. He charges him (falsely, however) with having represented Charles the Fifth as “a pattern of abstinence,” when he was in fact one of the greatest of royal *gourmands*. On this point he is willing for once to accept even the authority of Mr. Prescott, who, he says, has upset Robertson's reputation as an historian by means of “the *Samanca* papers.”

Mr. Wilson so often returns to these “*Samanca*” papers, and appears to labor under so many delusions in regard to

them, that, hopeless as the attempt may seem, we cannot help trying to let a little daylight into his mind. “Mr. Prescott,” he writes, “having obtained copies of the most important *Sinanca*” [the reader must not be surprised at these little variations of orthography] “papers of Ximenes' collection, supposes them a new discovery, of great value. *Doubtless they are;*” [then there could be no great harm in supposing it;] “his agents did not fail to represent them to him in the most exalted terms, to enhance the value of their services according to the Spanish custom.” Now we can assure Mr. Wilson that Mr. Prescott had not in his possession a copy of a single document placed in the Archives of Simancas (for so an excusable partiality for custom, and not any want of respect for our author, obliges us to spell this name) by Cardinal Ximenes. He will also, we trust, be glad to learn, that, for the documents relating to the Emperor Charles the Fifth which Mr. Prescott did receive from Simancas, he paid not a *real* beyond the established charge of the official copyists,—a charge which is the same in all cases, whatever may be the value of the originals,—the task of examining the collection and selecting the letters suitable for the purpose having been a labor of love on the part of the distinguished scholar by whom it was undertaken.

Mr. Wilson is animated by a fervent hatred against Cardinal Ximenes,—or “Jim'nes,” as he sometimes calls him. He terms him “a monster,” and “a wretch,” and is especially indignant at his having “founded the *Samanca* collection of papers.” “Any one,” he adds, “who will carefully examine them will see that hardly a single paper has been put into this collection that does not, in some way, reflect glory on the church, or show the royal approval of the Inquisition.” We cannot undertake to say what discoveries might be made by a person who should carefully examine the collection of papers at Simancas. A scholar on whom the antediluvian length of life necessary for such a labor had been bestowed might also be endowed with commensurate powers of intellect that might lead to the most astonishing results. Our own knowledge of the collection is limited to a very small portion of its contents,—a mere drop in

the enormous bucket. We have been under the impression that explorers who had spent long periods of time in the examination,—Lembke or Gachard, for example,—had sunk their shafts but a little way into that great mine. At all events, we feel particularly certain that Mr. Wilson never in his life saw a single manuscript, or a single copy of a manuscript, from the Archives of Simancas.

"The monk Strada," our author goes on to inform us, "must have consulted them" [the "Samanca papers"] "in the composition of his history of the Low Country Wars, though he does not call the papers by that name." [We should hope not.] "The *Glanville* papers are not alone his authorities." With regard to the "*Glanville* papers," we cannot speak positively, never having seen them, or even heard of them. If an allusion is intended to the "State Papers of Cardinal *Granvelle*," we admit that these were not Strada's *only* authorities; in fact, they were not his authorities at all; he never had the opportunity of consulting them. "Robertson's convent life of Charles V.," Mr. Wilson continues, "is almost literally taken from Strada." Now, if Strada followed the "Samanca papers," and Robertson has followed Strada, how is it that these same papers have been the groundwork for a complete refutation of Robertson? Surely, when brought to light, they ought, on the contrary, to have confirmed his statements. The truth is, that Strada, who had access to no other manuscripts than those in possession of the Farnese family, never saw the "Samanca papers"; and Robertson, far from following Strada exclusively, relied much more on the authority of Sandoval and other Spanish writers.

But our readers will naturally inquire what these matters have to do with the Aztec civilization and the Conquest of Mexico. So far as we know, nothing at all. We have merely followed our Iroquois foe, and kept perseveringly upon his track in the jungle to which he has taken. Whatever course he may take, we are determined to follow him. He shall not elude us. Through all the windings of his eccentric route, through pathless forests, across rugged sierras, along the sides of nameless streams, we shall pursue his trail. On the summit of the great *teocalli* of Mexico, dedicated to

the fearful deity, *Huitzilopotchli*, he shall be offered up as a sacrifice, according to the awful customs in which he affects to disbelieve. We are compelled, indeed, by want of space, to grant him a respite for a month. Our present notice must be regarded only as a parboiling "preliminary." At the end of that time, with all due form and ceremony, we promise that the solemn rite shall be completed.

BUNSEN'S *Gott in der Geschichte*. (God in History.) Zweiter Theil. (Second Part.) Leipzig. 1858.

THERE is, probably, no philosophical author at the present day in Germany whose works are welcomed by so wide a circle of readers in America as those of Chevalier Bunsen. Though often more theoretical than exact in scholarship, and allowing his historical instincts to take the place of scientific conclusions, he not unfrequently anticipates thus the laborious efforts of scholars, while his peculiar *suggestiveness* of thought and his scope of view interest extremely the common student, and lend a charm to his works such as no other writer in the same field possesses. He has the art of making other men work for him, and, perhaps, has thus been tempted to write too much for his own fame.

The great service for which posterity will thank Chevalier Bunsen is, that, in an age of bigotry and of skepticism, he has especially represented the union of Philosophy and Christianity, and has shown that the freest historical criticism and the most open recognition of the moral principle through all faiths and races are harmonious with the most devout belief in the divine manifestation of Christ. This book, "God in History," is written from his most advanced and religious stand-point, and seems to us the best fruit, thus far, of his studies. It is compact, consistent, and not marred by his usual defect,—a certain mysticism or indefiniteness of thought,—but is clear and philosophical to the close. It is not to be looked upon as a complete philosophical history, but rather as a suggestive and introductory treatise on that grandest of all themes, the Progress of the Instinct of God through Human History. His own definition of his subject is, that it is a history of the "Consciousness of

God in Mankind"; but, as he unfolds his idea, it is evidently not always the consciousness, but the unconscious instinct of God, whose progress he is describing.

The first part of the present volume—the Third Book—is occupied with a brief, but exceedingly instructive investigation of the development of this instinct in the Aryans of Persia and of India; and in this inquiry the two prominent historical figures are Zoroaster and Buddha, or, as our author might have named them, the Moses and the Luther of the early Aryan religions,—the one the Lawgiver and the Founder of a pure monotheism in the place of a slavish belief in elementary powers, and the other the great Reformer of a corrupted faith in behalf of an oppressed people.

The illustrations which Bunsen gives of these two wonderful expressions of the instinct of God in the remote past, the religions of Zoroaster and Buddha, are exceedingly fresh and original. They are contained mostly in sacrificial and festal hymns and songs which have not hitherto been much known, even to scholars.

As an introduction to and historical preparation for these two great forms of belief, he describes also the instinct of Deity as it had developed itself among the Turanians, the Chinese, and the Egyptians.

The period embraced in the Third Book is about 2500 years, from the supposed epoch of Zoroaster (3000 B. C.) to that of Buddha (541 B. C.).

The Fourth Book treats of the instinct of God among the Greeks and Romans, "from the singer of the Iliad (900 B. C.) down to the Baruch of the Roman world, the prophet of the downfall of the Aryan Ante-Christian civilization,—Tacitus." This God-consciousness is found first in the Grecian feeling of the Commonwealth, —the idea of a common good surpassing a personal good; then in the conception of the Epic, which assumes a political as well as a physical Kosmos, or order; then in the grand moral ideas lying at the basis of the Mythology,—the myths, for in-

stance, of Prometheus, and the picture of Nemesis and the Fates. Next, the deep sense of God speaks out in Grecian Tragedy and the great works of Grecian Art; and in the highest degree, in the Philosophy which culminated in Socrates, Plato, and Aristotle.

The Roman expression of these profound instincts is placed by Bunsen far below the Grecian. It is manifested especially in their idea of Law, and even in the doubts and despair of their leading thinkers in the time of the Emperors.

The closing portion of the volume terminates the history of the progress of the idea of God before Christianity, among the Aryan races, by a description of the religious instincts of the Teutonic tribes. In their respect for woman and for marriage, in their political commonwealths, in their worship of one God, and their belief in a moral Kosmos, Bunsen beholds the expression of the Divine idea within them, preparing for the more full development which is to come through the ideas and spirit of Christianity. The book closes fitly with the grand prophecy of the Völuspá in the Scandinavian Edda.

We regret that want of space should prevent us from giving extracts from this most eloquent and philosophic work. Its glory is, that, breaking through the formulæ of creeds and the external signs of religious faith, it has the courage to listen to the voice of God all along the devious course of human history,—hearing that mysterious tone, not alone in the chants of the Hebrews or the confessions of the Christians, but in every smallest utterance of *truth*, every syllable of unselfish patriotism, every groan of offended conscience, every myth springing from the moral sense, every song, every speech which would exalt the True, the Beautiful, and the Good over the selfish and false and base. In Bunsen's philosophy, these, even more than all outward confession and ceremonial, are the true expression of the workings of the Divine Spirit in Human History.

A MAGAZINE OF LITERATURE, ART, AND POLITICS.

VOL. III.—MAY, 1859.—NO. XIX.

THE GYMNASIUM.

Two distinct yet harmonious branches of study claimed the early attention of the youth of ancient Greece. Education was comprised in the two words, Music and Gymnastics. Plato includes it all under these divisions:—"That having reference to the body is gymnastics, but to the cultivation of the mind, music."

Grammar was sometimes distinguished from the other branches classed under the term, Music; and comprehended, besides a knowledge of language, something of poetry, eloquence, and history. Music embraced all the arts and sciences over which the Muses presided.

Grammar, Music, and Gymnastics, then, comprised the whole *curriculum* of study which was prescribed to the Athenian boy. There were not separate and distinct learned professions, or faculties, to so great an extent as in modern times. The compass of knowledge was far less defined, and the studies and attainments of the individual more miscellaneous. Some of the arts rose to an unparalleled perfection. Architecture and sculpture attained an excellence which no subsequent civilization has reached. But the practical application of the sciences to daily use was almost entirely neglect-

ed; and inventions and mechanics languished until the far later uprising of the Saxon mind.

Yet the whole system of education among the Greeks was peculiarly calculated for the development of the powers of the mind and of the body in common. And it is from this point of view that we wish to consider it, and to show the nature and preëminence of gymnastics in their times as compared with our own.

Doubtless Grecian Art owed its superiority, in some degree, to the gymnasium. Living models of manliness, grace, and beauty were daily before the artist's eye. The *stadium* furnished its fleet runners, nimble as the wing-footed Mercury,—fit types for his light and airy conceptions; while the arena of the athletes offered marvellous opportunities for the study of muscle and posture, to show its results in the burly limbs of Hercules or the starting sinews of Laocoön. Many of the most lifelike groups of marble which remain to us from that time are but copies of the living statues who wrestled or threw the quoit in the public gymnasium.

It is worthy of remark, in corroboration of this view, that the department

of the fine arts which depended on outline surpassed that which derived its power from coloring and perspective. The sculptors far excelled the painters. The statue was the natural result of the imitative faculty surveying the nude human figure in every posture of activity or repose. Pictures came later, from more educated senses, and from minds which had first learned outward nature through the medium of the simpler arts.

The ancient gymnasium, apart from its baths and philosophic groves, was far from being, as with us, a mere appendage of the school. Modern instructors advertise, that, in addition to teachers of every tongue and art, "a gymnasium is attached" to their educational institutions. In old times, the gymnasium was the school,—the public games and festivals its "annual exhibitions."

The word *gymnasium* has reference in its derivation to the nude or semi-nude condition of those who exercised there. But in their proper classical interpretation the public gymnasia were, to a great extent, places set apart for physical education and training. Gymnastics, indeed, in the broadest sense of the word, have been cultivated in all ages. The spontaneous exercises and mimic contests of the boys of all countries, the friendly emulation of robust youth in trials of speed and strength, and the discipline and training of the military recruit have in them much of the true gymnastic element. In Attica and Ionia they were first adapted to their noblest ends.

The hardy Spartans, who valued most the qualities of bravery, endurance, and self-denial, used the gymnasia only as schools of training for the more sanguinary contests of war. So, too, the martial Roman despised those who practised gymnastics with any other object than as fitting them to be better soldiers. Yet to so great a degree were these exercises cultivated, even by the latter nation, that the Roman private of the line did his fifteen or twenty miles' daily march

under a weight of camp-equipage and weapons which would have foundered some of the best-drilled modern warriors, and concluded his day's labors by digging the trenches of his camp at night. The ponderous *pilum*, and the heavy, straight sword of the infantry were exchanged in the barrack-yard for drill-weapons of twice their weight; and so perfectly were the detail and regularity of actual service carried out in their daily discipline, that, as an ancient writer has remarked, their sham-fights and reviews differed only in bloodshed from real battles. The soldier of the early Republic was hence taught gymnastics only as a means of increasing his efficiency; the lax prætorian and the corrupt populace of the Empire turned gladly from the gymnasium to the circus and the amphitheatre.

In the same manner were these exercises regarded by the Dorians and the people of some other of the Grecian States. The inhabitants of Attica and of Ionia, on opposite shores of the Ægean, as more cultivated races, viewed them in a more correct physiological light. But it was at Athens that the gymnasium was held in highest repute.

We read that Solon, the Athenian lawgiver, first established particular regulations for its government. Attic legends, however, gratefully refer the earliest rules of the gymnasium to Theseus, as to one of the mightiest of the mythical heroes,—the emulator of Hercules, slayer of the Minotaur, and conqueror of the Amazons. Hermes was the presiding deity, which may appear strange to us, as he was as noted for an unworthy cunning as for his dexterity. Generous emulation and magnanimity were regarded as the noblest qualities called forth in gymnastic exercises; and Mercury seems a fitter tutelary divinity of the wary boxer and of the race-course than of the whole gymnasium.

Probably no Greek town of any importance was destitute of one of these schools of exercise. Athens boasted three public gymnasia,—the Cynosarges, the

Lyceum, and the Academy. These were the daily resort of young and old alike, though certain penal laws forbade them from exercising together at the same hour.

The school-boy frequented them as a part of his daily task; the young man of leisure, as an agreeable lounging-place; the scholar, to listen to the master in philosophy; the sedentary, for their customary *constitutional* on the foot-course; and the invalid and the aged, to court the return of health, or to retain somewhat of the vigor of their earlier years. The Athenians wisely held that there could be no health of the mind, unless the body were cared for,—and viewed exercise also as a powerful remedial agent in disease. Such a variety of useful purposes were thus subserved by the gymnasia, that it will be proper to look briefly at their internal arrangements. We shall follow the description which has been left us by Vitruvius.

The ancient gymnasium was generally situated in the suburbs, and was often as large as a *stadium* (six hundred and twenty-five feet) square. Its principal entrance faced the east. A quadrangular inclosure comprehended two principal courts, divided by a party-wall. The eastern court was called the *peristylum*, from the rows of columns which surrounded it; the western also was bordered by porticos, but for it we have no distinct name. The peristyle must have been from one to two hundred feet square. It was sometimes termed the *palæstra*, though this name was afterwards restricted to the training-school of the athletes proper, who made gymnastics the business of their lives. It was also styled the *sphaeristerium*, or ball-ground, to which the nearest approach in modern times is the tennis-court. The chief western inclosure was planted with plane-trees in regular order, with walls between them and seats of the so-called *signine* work, and was about one half larger than the peristyle. The space between the columns of the latter and the outer walls allowed sufficient room for rows of chambers, halls,

and corridors, whose uses we will next designate.

The first room on the right, as one entered the east gate, was the *loutron*, or room for washing, distinct from the regular baths. Next, in the northeast corner, was the *conisterium*, where sand was kept for sprinkling the wrestlers after they had been anointed for the struggle. West of this lay the *coryceum*, a hall for exercising with a sack of sand suspended from the roof. It seems plausible to suppose that this exercise corresponded with that more recently practised by Mr. Thomas Hyer, previously to his fight with Yankee Sullivan. A bag of sand, equal in weight to his adversary, was daily pommelled by the champion of America until he could make it swing and recoil satisfactorily.

Adjoining this room were two small apartments called the *ephebeum* and the *elæothesium* respectively. The former was devoted to preparatory exercises, probably by way of warming up for severer efforts; the latter was used for anointing, and was connected with the baths, which followed next in order. These were the *frigidarium*, the *caldarium*, the *sudatorium*, and the *tepidarium*, for the cold, the hot, the sweating or vapor, and the warm baths. They did not possess the magnitude and ornament of the Roman *thermæ*. They were used in connection with and after exercising, and were enough for all practical purposes. Bathing was not then the business of hours every day, as it was later in the Roman Empire, when the luxurious subjects of Caracalla indulged several times in the twenty-four hours in such a variety of ablutions as would have satisfied a Sandwich-Islander.

We have now arrived at a point nearly opposite our entrance at the east, and, continuing round the southwest, south, and southeast sides of the peristyle, find a large number of consecutive chambers devoted mainly to the philosophers, as lecture-rooms and auditories for their classes and followers. On the north side of the peristyle is a double portico contain-

ing the *exedrae*, or seats of the sophists, where each most cunning rhetorician delivered his opinions *ex cathedra*, and lay in wait for any passer whom he could insnare into an argument. The groves of the great western court were probably used by the loungee, the contemplative, and the studious, if we may judge by numerous seats and benches, at convenient intervals. On the south side of these was again a double portico; and on the north, outside the pillars, the *xystrus*, or covered porch, where the athletes exercised in winter and in bad weather. The arena was twelve feet wide, and sunk a foot and a half below a marginal path of ten feet, where spectators could walk. On the north and south sides of the whole building were wings, of less width, extending nearly its entire length. That on the north contained the *stadium*, or foot-race course, which was, however, sometimes disconnected from the gymnasium. The south wing was of like dimensions, and adorned with plane-trees and walks, forming a more private retreat.

It will be readily conceived that this vast area was not devoted exclusively to physical exercises. Logic, rhetoric, and metaphysics claimed their place in this common focus of the city's life, and were the delight of the subtle Greeks. The Socratic reasoning and the syllogisms of Aristotle met here on common ground. The Stoics, with their stern fatalism, derived their name from the *stoæ*, or porticoes; the Peripatetics imparted their ambulatory instructions under the plane-trees of the Lyceum; and Plato reasoned in the Academy, which he held with his school, and into which no ungeometrical mind was to enter. And though some dog of a Cynic might despise the union of the ornamental with the useful, and claim austerity as the rule of life, yet to the great body of the social Greek people the gymnasium offered all those attractions which *boulevards*, *cafés*, and *jardins-chantants* do now to the Gallic nation. There is more than one point of resemblance between the two countries; but

while the Athenian had the same mercenary qualities, which fitted him for outdoor life, he had even a less comfortable domestic establishment to retain him at home than the modern Parisian.

We must turn, however, rather to the physical view of the gymnasium. All the sports of the gymnasia were either games, or special exercises for the contests of the public festivals. And here a distinction must be made between amateur and professional gymnasts. The former were styled *agonistæ*, and exercised in the public gymnasium; the latter *athletæ*, and were trained fighters, whose school was the *palestra*. At first frequenting the same, they afterwards became divided between two institutions. Some of the harsher sports of the prize-fighters were not thought genteel for well-nurtured youths to indulge in. Among the simpler games were the ball, played in various ways, and the top, which was as popular with juveniles then as now. The sport called *skaperda* can be seen in any gymnasium of to-day, and consisted in two boys drawing each other up and down by the ends of a rope passing over a pulley. Familiar still is also a game of dexterity played with five stones thrown from the upper part of the hand and caught in the palm. Various other gentle exercises might be mentioned.

The training for the public games was comprised in the *pentathlon*, or five exercises,—which were running, leaping, throwing the *discus*, wrestling, boxing. The first four were practised also by amateurs, and by most persons who frequented the gymnasium for health.

The race, run upon the foot-race course, was between fixed boundaries, about a *stadium* apart. The distances run were from one to twenty *stadia*, or from one-eighth of a mile to two and a half miles, and sometimes more. This exercise was much followed. Horses were sometimes introduced, but then the hippodrome was the course. They ran without riders, as at the Roman carnival, or with chariots. Horse-racing was most popular in the Roman circus, whose ru-

ins still show its massiveness and great size.

Leaping was performed also within fixed limits,—generally with metallic weights in the hands, but sometimes attached to the head or shoulders.

The quoit, or *discus*, was made of stone or metal, of a circular form, and thrown by means of a thong passing through the centre. It was three inches thick and ten or twelve in diameter. He who threw farthest won. It is a modern game also, and is imitated in the Old-Country custom of pitching the bar.

Wrestling has been a favorite contest in all times. Milo of Crotona was the prince of wrestlers. He who threw his adversary three times conquered. The wrestlers were naked, anointed, and covered with sand, that they might take firm hold. Striking was not allowed. Elegance was studied in the attack, as well as force. There was a distinction between upright and prostrate wrestling. In the former the one thrown was allowed to get up; in the latter the struggle was continued on the ground. The vanquished held up his finger when he acknowledged himself beaten.

Boxing was a severer sport, and not much followed except by gentlemen of the "profession." It was practised with the clenched fists, either naked or armed with the deadly *cestus*. The "science" of the game was to parry the blows of the antagonist, as it is in the "noble and manly" art of self-defence now. The exercise was violent and dangerous, and the combatants often lost their lives, as they do at the present day. The *cestus*, like our "brass-knuckle," was a thong of hide, loaded with lead, and bound over the hand. At first used to add weight to the blow, it was afterwards continued up the fore-arm, and formed also a weapon of defence. Mr. Morrissey, or any other "shoulder-hitter," would hardly need more than a few rounds to settle his opponent, if his sinewy arm were garnished with the *cestus*.

We read that the late contest for the "American belt," though short, was un-

sually fierce, and afforded intense delight to the spectators,—in proportion, probably, to its ferocity. By all means let the "profession" take the *cestus* from the hands of the highwayman and adopt it themselves. It would be one step nearer the glorious days of the gladiators, and would render their combats more bloody and more exciting. Or, better still, let us revive the ancient mode of sparring called the *klimax*, where both parties "faced the music" without warding blows at all. We scarcely think the ancients were up to "countering," as it is understood now; but they fully appreciated the facetious practice of falling backwards to avoid a blow, and letting the adversary waste his strength on the air. The deceased Mr. Sullivan would hardly recognize his favorite dodge under its classic name of *hyptiasmos*, or be aware that it was in use by his very respectable predecessor, Sostratus of Sicyon, who was noted for such tricks.

The *pankration*, again, was a mode of battle which the modern prize-ring is yet too magnanimous to adopt, and which excelled in brutality the so-called "getting one's nob in chancery,"—the most stirring episode of our pugilistic encounters. The Greek custom alluded to was so named because it called all the powers of the fighter into action. It was a union of boxing and wrestling. It began by trying to get one's antagonist into the unfavorable position of facing the sun. Then the sport commenced with either wrestling or sparring. As soon as one party was thrown or knocked down, the other kept him so until he had pommelled him into submission; and when he arose, at last, to receive the plaudits of the assembly, it was often from the corpse of his adversary.

Beginning as the most promising pupils of the gymnasium, and becoming victors in the public games, certain gymnasts gradually grew into a distinct class of prize-runners, wrestlers, and fighters, called *Athletes*. They then devoted their lives to attaining excellence in these exercises, and withdrew to the *palestra*, or

training-school. Those who quitted the profession became instructors in the public gymnasium. To attain great bodily strength, they submitted to many rigid rules. By frequent anointing, rubbing, and bathing, they rendered their bodies very supple. The trainer, or teacher in the *palestra*, was termed *zystarch*. He was himself the Nestor of the "ring." The food of the athlete was mainly beef and pork. The latter, we believe, is excluded from the diet-list of the modern prize-fighter. Of their particular rules of living and "getting into condition" we know but little. Before being allowed to contend, they were subjected to a strict examination by the judges. In so high estimation were the victors held, that they were rewarded with a public proclamation of their names, the laudations of the poet, statues, banquets, and other privileges. The immediate material gain was not the winning of the stakes, but a simple crown or garland of laurel, olive, pine, or parsley, according to the festival at which they fought. Pindar has embalmed the names of many victors in his Olympic, Pythian, and other odes.

But let us leave the athletes for something more inviting. The *lampadephoria*, or torch-race, must have been a singular spectacle. There were five celebrations of this game at Athens, of which the most noted was at the Panathenæa, where horsemen often contended. The text describing it has been a puzzle to commentators;—the most rational and accepted interpretation seems to be, that it was a contest between opposite parties, and not between individuals. Lighted lamps, protected by a shield, were passed from runner to runner along the lines of players, to a certain goal. They who succeeded in carrying their lights from boundary to boundary unextinguished were declared the victors. This game will at once recall the *molcoletti*, which close the carnival at Rome.

~ Dancing to the sound of the *cithara*, flute, and pipe, was a favorite amusement with all classes. The grizzled veterans

and the younger soldiers all joined in martial dances. The dance and the game of ball were often connected. The Romaic dance, peculiar to the modern Greeks, is an inheritance from their ancestors. Dancing by youths and maidens formed part of the entertainment of guests. Tumblers threw somersets and leaped amid sharp knives, somewhat after the manner of the Chinese jugglers. Music was also usually associated with either poetry or dancing.

Incitements to the various gymnastic exercises which have been mentioned could be found only in public emulation, for which abundant opportunity was offered in the national games or festivals. These were a part of the religious customs of the Greeks, and were originally established in honor of the gods. It was their effect to bring into nearer contact people from the several parts of Greece, and to stimulate and publicly reward talent, as well as bodily vigor. They afforded orators, poets, and historians the best opportunities of rehearsing their productions. Herodotus is said to have read his History, and Isocrates to have recited his Panegyric at the Olympic games. The four sacred games were the Olympic, Pythian, Isthmian, and Nemean; and to these should be added the Panathenæa, or festival of Minerva. The five exercises before mentioned, together with music, in its classic sense, formed the programme. In the lesser Panathenæa occurred, first, the torch-race; next, the gymnastic exercises; thirdly, a musical contention, instituted by Pericles; and lastly, a competition of the poets in four plays. Numerous other observances, of a religious nature, were varied with the different festivals. It may be doubted whether subsequent times have seen any gatherings of equal magnitude for similar objects.

So rigid was the discipline of the ancient gymnasium, and so important was it considered that confidence should be undoubting there, that thefts, exceeding ten *drachmæ* in amount, committed

within its precincts, were punished with death.

The *Gymnasiarch*, or presiding magistrate, clothed in a purple cloak, with white shoes, possessed almost unlimited authority. He had the superintendence of the building, and could remove the teachers and under-officers at his pleasure. The exercises practised were ordained by law, subject to regulations and animated by the commendation of the masters. Instructions were given by the *gymnastæ* and the *pædotribæ*, two classes of officers. The former gave practical lessons, and were expected to know the physiological effect of the different exercises, and to adapt them to the constitution and needs of the youth. The latter possessed a knowledge of all the games, and taught them in all their variety. Nor were the morals of the young less cared for by the *sophronistæ*, a set of officials appointed for that purpose.

The plan and scope of Grecian education were more adapted to the common purposes of the community, and less to the individual aim of the pupil. Beside the public teachings of philosophers and sophists, common schools were established at Athens by Solon. Government provided for their management, and strict discipline was enforced. Here the boy was instructed in music and grammar. Until the age of sixteen, he pursued these two branches in connection with gymnastics. Some authorities assert, that, even at this period of his life, as much time was devoted to the latter as to the other two together. At sixteen, he left the school, and, until he was eighteen years of age, frequented the gymnasium alone; probably devoting most of his time to physical training, though enjoying opportunities of listening to the masters in philosophy. The period of adolescence past, and his growing frame expanded and well knit by exercise, he either continued to follow athletic sports, or began a military or other career. If a young man of leisure, he probably needed all the virtue imparted by his moral teachers to restrain him from dice, quail-fights, and fine hors-

es, and all his physical vigor to resist the dissipations of Athens or Corinth, and the potations of the *symposia*.

So far the male-rising generation was well cared for. What became of the girls?

In accordance with the freer manners, but not less virtuous habits of Lacedæmon, maidens were there admitted as spectators and sharers of the gymnastic sports. Though clad only in the Spartan *chiton*, they took vigorous part in dancing and probably wrestling. The Athenian maid could not air even her modest garments in public with the consent of popular opinion. The girls were educated and the women stayed at home. The *gynækeion*, or female apartment, was nearly as secluded as the *seraglio*. The females were under direct, though not slavish submission to the men. Modesty forbade their appearance in the gymnasium. Domestic occupations, the rearing of children, spinning, light work, and household cares filled up their time. We are told that an Athenian mother once ventured in male attire to mingle among the spectators of the Olympic games. Her cry of joy at the triumph of her son betrayed her. Because she was the mother of many victors, she was spared from infamy; and her services to the state, in rearing men, alone saved her from the consequences of an act which maternal solicitude could not have excused.

Too much license in the intermingling of the sexes formed part of the arguments of many distinguished Romans against the gymnasium. Habits of idle lounging and waste of time, together with even graver vices, were imputed to its influence. Some said it favored *poly-sarkia*, or obesity, and unfitted for military or other active life. The Romans were too utilitarian to see its higher aims. Though there was some justice, it must be confessed, in these accusations, yet they applied with more force to the *palæstra* than to the gymnasium,—to the trained fighters, who devoted their lives to exercise, than to the mass of the

Greeks, who cultivated it for nobler purposes.

The ancients valued gymnastics highly as curative agents in disease. Some of the gymnasia were dedicated to Apollo, god of physicians. The officers of these establishments passed for doctors, and were so called, on account of the skill which long experience had given them. The directors regulated the diet of the youth, the *gymnastæ* prescribed for their diseases, and the inferiors dressed wounds and fractures. Not only was the general idea entertained that bodily exercise is good for the health, but different kinds of exertion were selected as adapted to particular maladies. Upright wrestling was thought most beneficial to the upper portion of the body, and the cure of dropsy was believed to be peculiarly promoted by gymnastic sports. Hippocrates had some faith in the "motor cure." In some cases he advises common wrestling; in others, wrestling with the hands only. The practice with the *corycus*, or hanging-bag of sand, and a regular motion of the upper limbs, resembling the manual exercise of the soldier, were also esteemed by him. Galen inveighs against the more violent exercises, but recommends moderate ones as part of the physician's art. Asclepiades, in the time of Pompey the Great, called exercises the common aids of physic, and got great glory—and money, it is to be hoped—by various mechanical contrivances for the sick.

The ancients probably esteemed gymnastics too much, as the moderns do too little, for medical or sanative purposes. The Greeks, with a very limited knowledge of physiology and pathology, would be more apt to treat symptoms than to trace the causes of disease; and no doubt they sometimes prescribed exercises which were injudicious or positively injurious. We still trust too much, perhaps, to medication, and do not keep in view the great helps which Nature spreads around us. Truth lies between the two extremes; and we are beginning to recognize the fact, which expe-

rience daily teaches us, that light, air, and motion are more potent than drugs,—and that iron will not redden the cheeks, nor bark restraining the nerves, so safely and so surely as moderate daily exercise out of doors.

In the flourishing days of Attica, the gymnasium was in its perfection. It degenerated with the license of later times. It was absorbed and sunk in the fashions and vices of imperial Rome. Though Nero built a public gymnasium, and Roman gentlemen attached private ones to their country-seats, it gradually fell into disuse, or existed only for ignoble purposes. The gladiator succeeded naturally to the athlete, the circus to the stadium, and the sanguinary scenes of the amphitheatre brutalized the pure tastes of earlier years. Then came the barbarians, and the rough, graceless strength of Goths and Vandals supplanted the supple vigor of the gymnast. The rude, migratory life of the Dark Ages needed not the gymnasium as a means of physical culture, and was too changeable and evanescent to establish permanent institutions. Chivalry afforded some exception. The profession of knighthood and the calling of the men-at-arms gave ample scope to warlike exercises, reduced to something like a science in armor, horses, and modes of combat. The tournament recalled somewhat the generous emulation of the gymnasium; but bodily exercise for physiological ends was lost sight of in the midst of advancing civilization, until its culture was resumed in Sweden, in the latter half of the last century.

The reviver of gymnastics was PETER HENRY LING. Born of humble parentage, and contending in his earlier years with the extremest poverty, he completed a theological education, became a tutor, volunteered in the Danish navy, travelled in France and England, and began his career of gymnast as a fencing-master in Stockholm. He died a professor, a knight, and a member of the Swedish Academy, and was posthumously honored as a benefactor of his country.

While fencing, he was struck with the wholesome effects which may be produced on the body by a rational system of movements, and this suggested the idea which he developed by practice and precept through his entire life. It was, that "an harmonious organic development of the body and of its powers and capabilities by exercises ought to constitute an essential part in the general education of a people." Ling thought not of merely imitating the gymnastics of the ancients, but he aimed at their reformation and improvement. Wishing to put gymnastics in harmony with Nature, he studied anatomy, physiology, and the natural sciences. Of their value in directing rational exercise he says: "Anatomy, that sacred genesis, which shows us the masterpiece of the Creator, and which teaches us how little and how great man is, ought to form the constant study of the gymnast. But we ought not to consider the organs of the body as the lifeless forms of a mechanical mass, but as the living, active instruments of the soul." And even this is not sufficient; "for the gymnast, the ultimate aim of whose art is the *beau idéal* of humanity, must know what effects applied movements produce upon the corporeal and psychical condition of man; a knowledge which can be obtained only from the most careful and untiring examination."

It has been asserted, that, in pursuance of this plan, Ling invented a separate movement or exercise for every muscle in the body. This is not strictly true, for it is practically impossible. Few muscles act alone, and such as do are developed symmetrically, and are antagonized by those of the opposite side. Most movements are performed by groups of muscles. The cripple, swinging on his crutches, develops the broad sheet of muscular fibres which enfolds the back and loins, and approaches in form the simian tribe, the business of whose life is climbing. The sledge-hammer brings out the *biceps* of the blacksmith, and striking out from the shoulder the *triceps* of the pugilist. The calves of the ballet-dancer are noted

for the abrupt line which marks the transition from muscle to tendon; and other instances might be cited. As a general rule, however, numerous muscles act in concert. Trades stamp their impress on special groups; and the power of co-ordination, which is supposed to derive its impulse from the cerebellum, varies in different persons, and marks them as clumsy or dexterous, sure-footed or the reverse. Ling aimed only at the regulation of associated, or the equal development of antagonistic groups. For, as the Supreme Medical Board of Russia say in their report on his system, made to the Emperor in 1850, "empirical gymnastics develop the muscular strength sometimes to a wonderful degree, and teach the execution of movements combined with an extraordinary effort of the muscles; by these means, instead of fortifying the whole body equally and generally, they often contribute to the development of the most dangerous diseases, since they do not teach the evil which the injudicious use of movements may produce." It was the harmonious and equable increase of all the voluntary and some of the involuntary muscles which the Swedish system sought to attain.

The authority just quoted, in continuation, says:—"Notwithstanding bodily exercises under the name of *Turnen* were generally known and practised in Germany at the beginning of the present century, and many of its enlightened professional writers tried to give to them a proper direction by combining them with anatomy and physiology, Ling must be considered as the founder of the rational system of movements." We have all seen deformed gymnasts, with square shoulders and lank loins, or with some particular group of muscles projecting in ugly prominences from the violated outlines of nature. All this the followers of Ling claim that he avoided or overcame. His gymnastics were introduced years ago, not only into all the military academies of Sweden, but into all town-schools, colleges, and universities, and even orphan-asylums and country-schools. Three ob-

jects are asserted to be obtained by his disciples: development of muscular fibre, increased arterialization, and improved innervation. Increase of function promotes the growth and capability of organic structures, and causes an augmented afflux of arterial blood and nervous influence to the part.

The ambitious reformer of the gymnasium did not pause here; but, pursuing a still bolder course, undertook "to make gymnastics not only a branch of education for healthy persons, but to demonstrate them to be a remedy for disease." The new science was called *Kinesipathy*, or the "motor-cure." The curative movements were first practised in 1813, while Ling remained at Stockholm. A motor-hospital was established in connection with the gymnasium; and to accommodate the invalid and the feeble, new exercises, called "passive movements," were devised. These were executed by an external agent upon the patient,—that agent being usually the hand of the physician. The sick man, too weak for violent, voluntary effort, was stretched and champooed, the muscles of his trunk and limbs alternately flexed and extended by another person, until he gradually acquired strength to use active movements. As he gained power, he increased the voluntary resistance which he made to the operator, and thus, at the same time, the amount of his own muscular exertion. It is claimed that volition is thus called forth to neglected parts, and their innervation and vascularity increased; and that so at length the normal fulness of life and function is restored. This system confines itself mostly to chronic diseases. In the paralysis of the young, in defective volition from hysteria, in impaired local nutrition, in local deformities dependent on muscular contraction, and in lateral curvature of the spine, it unquestionably often produces the best results. Its advocates claim for it much more. On its further benefits we are unable to decide. Like all things else, it is susceptible of abuse.

Russia and Prussia have adopted, to a limited extent, the Ling system of corporeal training and the "motor-cure." In London there exists an institution of this kind, and more recently one has been established by the Doctors Taylor in New York. In a still less degree the Swedish gymnastics are used in some educational institutions here.

Ling died in 1839, in his seventy-third year. Even on his death-bed he spoke till the last hour, and gave instructions in his favorite science. His life is a remarkable instance of purity, energy, and devotion to a single end.

Meanwhile, what have modern nations done to atone for the neglect of the ancient gymnasium? Germany, to some extent, has supplied its place with the *Turnverein*. *Turnkunst*, or the gymnastic art, is cultivated by a limited number of youth. As we see the public exhibitions of the *Turners* in this country, they are as noted for their libations to Bacchus, and their sacrifices to the god of tobacco,—a deity still wanting in the Pantheon,—as for their culture and superiority in athletic sports. Still they exert a wide, and, for the most part, a good influence. Other continental nations of Europe furnish a large portion of their young men with the gymnastic element in the shape of military discipline and drill. As affording the best examples of martial training, Prussia and France are to be signalized,—the former for the universality, the latter for the kind of its instructions.

All young Prussians are liable to a call to actual service in the army for three years. After this, if they do not continue members of the regular standing army, they remain until a certain age in that portion of the active force which is mustered and drilled every year. Past the age referred to, they fall into the corps of reserve, a sort of National Guard of veterans, summoned to the field only in emergencies. Young men who have the means to purchase an immunity can obtain one for only two years. One year they must serve, parade, drill, march,

and mount guard, though they are not required to live in the barracks. Occasional cases of hardship or injustice occur. We know of a poor, but promising pianist whose studies were cut short and his fingers stiffened by the three-years' service. Leaving out of view exceptional facts, the system works well. All the youth of the country acquire health, strength, an upright carriage, and habits of punctuality and cleanliness. The clumsy rustic is soon licked into shape, and leaves his barrack, to return to the fields, a soldier and a more self-reliant man. Prussia, too, secures the services of an army, in time of need, commensurate in numbers with the adult male population.

The French conscript, if he draws the unlucky number, can buy a substitute. All are not enrolled as recruits; and all those so enrolled are not obliged to serve. The only sons of widows, and some other persons, are always exempt. Once in "the line," however, the young man is engaged for five or seven years, and receives a training in matters gymnastic and military which turns out the best soldiers in Europe.

Little would one imagine, as he passes the groups of dainty and scrupulously neat French officers upon the *boulevards*, looking the laziest persons in the world, that these seeming carpet-knights are out upon the *Champ de Mars* at three o'clock in the morning, and often drill until nine or ten in the forenoon,—or that the little *toulourou*, as he is nicknamed, or private of the *ligne*, in his brick-colored trowsers and clean gaiters, whose voice is the gayest and whose legs are the nimblest in the barrier-ball, has done a day's work of parade and gymnastics which equals the toil of an *ouvrier*. Running, swimming, climbing, and fencing with the bayonet, are often but the preludes of long marches on duty, or equally long walks to reach the parade-ground, or to fetch the daily rations of the "mess." Then, too, during several months of summer, camp-life is led on a grand scale. Vast encamp-

ments, which for size, regularity, and order vie with the old Roman *castra*, are formed at convenient spots. And here all the details of actual service are imitated; cavalry and infantry are disciplined in equally arduous labors; nor does the artillery escape the fatigue of mock-sieges, sham-fights, and reviews.

The *Chasseurs de Vincennes*, or rifle-corps, are the pride of the army. Their training is still more severe. They are all athletic men, taught to march almost upon the run, and to go through evolutions with the rapidity of bush-fighters. There are few more stirring sights than a French regiment upon the march. Advancing in loose order, and with a long, swinging gait, their guns at an angle of forty-five degrees, lightly carried upon the shoulder, they impart an idea of alertness and efficiency which no other soldiers present to the same degree.

Gymnasia are somewhat patronized by the civilians. The art of fencing is a national accomplishment, and few gentlemen complete their education without the instructions of the *maître d'escrime*. The *sarade* is a rude exercise in vogue among rowdies, and consists in kicking with the peasant's wooden shoe. The French are a tough, but not a large or powerful race. The same amount of training dispensed among as large a proportion of the youth of this country would show much greater results.

The British soldier has long been considered by his own nation as a model of manliness. He owes his long limbs and round chest to his ancestors and his mode of life before enlisting. While on the home-service, he does not yet exercise enough to harden him or to ward off disease. Recent returns show a higher comparative rate of mortality in the British army from consumption than among other Englishmen. His close barracks, unvarying diet, and listless life explain it all. His countrymen and countrywomen, however, who have the time and means, largely cultivate athletic sports. The English lady is noted for her long walks in the open air, and for the pres-

ervation of her youthful bloom,—the English gentleman for his red face, broad shoulders, and happy digestion.

How do we compare with them in vigor and attention to gymnastics and health-giving exercises? Better than we did ten years ago, but still not very favorably.

The Western Border-States are noted for the production of a large and hardy race. New Hampshire and Vermont contribute a good share of the tall and well-developed men who yearly recruit the population of our Eastern cities. Let a generation pass, however, and we find the offspring of such sires with equally capacious frames, but far less muscular power. The skeleton is laid of a man mighty in strength, but the filling-in is wanting. Broad-jointed bones swing listlessly in their sockets, the head projects, and the shoulders bend, under the influence of a sedentary life. The laboring and mechanical classes bring certain groups of muscles to perfection in development and dexterity, but present few instances of an harmonious organization. Commercial and professional men do not accomplish even a limited muscular development. For the other sex, Nature seems to have provided a certain immunity from the necessity of active exercise for the rounding and completion of their bodies. The lack of fresh air, however, soon tells with them a fatal story of fading complexions and departing bloom. That ethereal beauty which peculiarly marks the American woman is also the earliest to decay. As they are the prettiest, so are they the soonest *passées* of any Northern nation. Could they but realize that exercise in the open air is Nature's great and only cosmetic, the reproach of early old age would cease. Nothing will give that peach-bloom to the cheek and that peculiar sweetness to the eye which a long walk through the fields, of a clear October day, bestows unbought.

One evil breeds another. The brain fed only with thin blood gives rise to morbid thoughts. Activity, sharpness,

and quickness of perception are but poor compensations for the want of the milder and more generous attributes of the mind. Dyspepsia spawns a moody literature. Broad, manly views and hopeful thoughts of life exist less here, we think, than in England. The cities are supplied year by year with people from the country; yet the latter, the source of all this supply, does not produce so healthy mothers as the city; and were it not for the increasing study of physiology and its vital truths, we fear that we should awaken too late to a knowledge of our physical degeneration.

Now what means are in use among us to furnish the needed stimulant of exercise? It is paradoxical to say that the average of people take more exercise in the city than in the country; yet we believe it to be true. That exercise is only of one form, to be sure, namely, walking. The common calls of business, and the mere daily locomotion from point to point of an extended city, necessitate a large amount of this simplest exercise. Other sources of health, as sunlight and the vivifying influence of trees and grass upon the air, exist more in the real country. Yet as many girls attain a vigorous development in town as out of it; for in our smaller New England villages indoor cares and labors confine the females excessively and prevent their using much exercise in the open air.

Our militia system, including the exercises of volunteer companies, supplies but to a very limited extent the want of real gymnastics. The common militia meet too infrequently and drill too little to gain much sanative benefit. The old-fashioned "training-day" was always a day of drunkenness and subsequent sickness. The "going into camp" now adopted is even worse; for here youths taken from the sheltered counting-room and furnace-heated house are exposed to the inclemencies of the weather not long enough to harden them, but long enough to lay the foundation of disease. Volunteer companies parade and are reviewed oftener, and drill more constantly; but

the good effects of the manual exercise are rendered nugatory by its being conducted in confined armories and a bad atmosphere.

The frequency of conflagrations and the emulation of rival volunteer corps render the fire-companies an active school of exercise. But the benefits of this are neutralized by the violence and irregularity of their exertions. Quitting the workshop half-clad, and running long distances, the fireman arrives panting at the fire, to breathe in, with lungs congested by the unusual effort, the rarefied and smoky atmosphere of the burning buildings. We should naturally suppose this a fertile source of pulmonary complaints. Besides, were it the most healthy of exercises, it is followed only by the mechanic and the laborer, who use their muscles enough without it.

The "prize-ring" and the professed athlete still exist among us. Unfortunately, their habits brutalize the mind. A limited knowledge of sparring, and a full vocabulary of the slang of the pugilist, are fashionable among many youths. Few young men, however, can cultivate the one, or frequent the society of the other, without the risk of becoming rowdies or bullies, if nothing worse.

The revival of the Old-Country games of cricket and base-ball affords some of the best examples of a growing desire for athletic sports. They have many things to recommend them, and, as we conceive, no objectionable features.

The suicidal war waged against trees and birds alike by the early settlers has left but little inducement to follow in this country the field-sports so fashionable in England. Riding on horseback, however, is now more popular than it has been since our carriage-roads were first laid out. This exercise is peculiarly beneficial to the feeble in body. Accelerated inspiration of pure air and a gentle succession of all the internal organs are blended with that consciousness of power and that self-dependence which the good horseman always feels in the saddle. Hardly less do we val-

ue the intimate acquaintance into which it brings us with the noble animal who bears us, establishing a sympathy which no amount of driving can awaken to its full extent.

Our rivers, lakes, and bays spread around us a vast and inviting field for the cultivation of summer or winter sports. Boating and sailing are adapted, from their gentleness of motion, even to the most delicate organizations. Rowing is equally suited to the young and strong. Boat-clubs are quite popular in our colleges, and we hope they will ere long become so in our academies and minor schools. Few exercises bring more muscles into play than the steady stroke of the oar. Few are more exhilarating and pleasant to those who have tried them. Give us the strong pull through an open bay before all boating on placid lakes or rivers. The long, well-timed stroke becomes a mere mechanical effort, leaving the mind at liberty to enjoy the sense of freedom, the tonic salt-breeze, and the enlivening scenes of the sea.

When the boats are beached, and the wharf-logs grow, with successive layers congealed from every tide, into huge spindles of ice, the same element offers its glassy surface to the skater. That skating has actually become fashionable among the gentler sex we regard as the strongest indication of an awakening national taste for exercise. But there is need of caution. Most persons skate with too heavy clothes. The quick movements of the limbs in the changing evolutions of this pastime—though the practised skater is unconscious of much muscular effort—quicken the circulation enough to increase palpably the animal heat and produce a very sensible perspiration. In this exposed condition, the quiet walk home is taken without additional covering, and is the origin of many colds.

Returning to "first principles," we find one useful exercise more or less within reach of all, without preparation or expense. We mean walking. The flexors and extensors of the legs, the broad muscles of the back and abdomen, and

the slender and intricate bundles of fibres which support and steady the spine, are all gently exercised in locomotion. The respiration and circulation are moderately increased, and the blood aerated with fresh air. And all this can be had by simply stepping out of doors and setting in motion the muscular machinery, which moves so automatically that we soon become unconscious of its exertions. This, like all other exercise, should be taken at seasonable hours. We enter our protest against long walks before breakfast. To any but the robust they are positively injurious. The early riser and walker, unless long habituated and naturally vigorous, returns from his exercise dragged, faint, and exhausted, to begin the digestive labors of the day, and take his food with hunger rather than appetite. Abstinence has blunted the nicer perceptions of taste, and the jaded organs lose the power not only of discriminating flavors, but of knowing when to cry, "Enough!" "Brushing away the morning dew," like "love in a cottage," is very pretty in a book, but needs a solid basis in the stomach or in the larder.

Running is a very healthy and an equally neglected exercise. Few vocations call upon us to fully expand the chest once a month. Running improves the wind, it is said. We give the name of long-winded to those who have a reserve of breathing capacity which they do not use in ordinary exertions, but which lies ready to carry them through extraordinary efforts without distress or exhaustion. Such persons breathe quietly and deeply. Running forms part of the training of the prize-fighter. It should be begun and ended at a moderate pace, as a knowing jockey drives a fast horse; otherwise, panting, and even dangerous congestion, may arise from the too sudden afflux of blood to the lungs.

Nothing so pleasantly combines mental occupation with bodily labor as a pursuit of some one of the natural sciences, particularly zoölogy or botany. If our means allow a microscope to be added to our natural resources, the field of exercise

and pleasure is boundlessly enlarged. To the labor of collecting specimens is joined the exhilaration of discovery; and he who has once opened the outer gate of the sanctuary of Nature finds in the study of her *arcana* a pastime which will be a joy forever.

Our larger towns and cities still support gymnasia of greater or less size and perfectness. But the modern gymnasium has two great deficiencies: the lack of open air, and of the emulation arising from publicity. The first is a very grave objection. Not a tithe of the benefits of exercise can be obtained within-doors. The sallow mechanic and the ruddy farmer are the two points of comparison. The one may work as hard and be as strong as the other, and yet we cannot call him as healthy. Nothing short of Nature's own sweet air will supply the highest physical needs of the human frame. As our gymnasia are usually private, and only moderately frequented, the gymnast is not stimulated to those exertions which society and competition would arouse. *Ennui* often mars his enjoyment. We have seen men methodically pursuing, day after day, the same exercises, with all the listless drudgery of a hack-horse. Geniality and generous emulation are among the great benefits of the true gymnasium.

"But how shall I find time to follow out even one of these exercises?" objects the victim of American social life. It is true, he cannot. We live so fast that we have no time to live. Nevertheless, gymnastics have one advantage adapted to our hurried habits. They afford the most exercise in the shortest time. In no other way, so easily accessible, can as much powerful motion be used in so brief a space.

The tired clerk or merchant comes home late, with feverish brain and weary legs. His chest and arms have had no exercise proportional to the rest of his system. What shall he do to restore the balance? If he can, let him erect in some upper room, away from furnace-heat, instead of a billiard-table,

a private shrine to Apollo or Mercury. He will need but little apparatus. A set of weights and pulleys, a pair of parallel bars, two suspended rings, and a leaping-pole are all the necessary permanent fixtures. Other articles, as the dumb-bells, the Indian club, boxing-gloves, foils, or single-sticks, take up no room, and can be added as his growing taste for their use demands. We would single out the parallel bars and the weights as the most generally useful. The former develop particularly the chest, stretch the pectoral muscles, and lengthen the collar-bones. The latter increase the volume and power of the extensors of the shoulder, arm, and forearm, and are to be sedulously practised, because we have fewer common and daily movements of these muscles than of their antagonists, the flexors, and they are consequently weaker in most persons. The windows should be widely opened, and the room warmed by the sun alone.

Though, after the first few trials, the whole body will ache, and the astonished

muscles tremble with soreness, a week's perseverance will overcome these earlier drawbacks. The gymnast will be surprised at the new feeling of vigor in the back and shoulders, and to find the upright, military posture as natural as it was before difficult to maintain. Temper and digestion undergo a parallel improvement, and it will require much to make him forego the luxury of exercise which he at first thought so painful.

Many persons become discouraged by beginning too violently. Alarmed at the fatigue and suffering at first induced, they shrink from further efforts. Gymnastics are, to be sure, an injudicious mode of exercise for some. Children get a good many sprains, and sometimes permanent deformity, from their use. The growing period requires care to avoid injuring the articulations; yet it is the most favorable time to spread the shoulders and deepen the chest. The young grow most in height and can best gain an harmonious development by frequenting the GYMNASIUM.

WHY DID THE GOVERNESS FAINT?

WE were all sitting together in the evening, and my sister Fanny had been reading aloud from the newspaper. For my father's benefit, she had read all the political articles, and all about business, till he had said he had heard enough, and there was nothing in the papers, and then had left the room. So Fanny looked over the marriages and deaths, and read about the weather in New York and Chicago, and some other things that she thought would interest us while we were sewing. Suddenly I looked up, towards where Miss Agnes was sitting, far away at the other end of the room. She was leaning back in her chair, and, all in a moment, I thought she looked white, as

though she had fainted. I did not say a word, but got up and went quietly towards her. I found she had fainted quite away, and her lips were pale, and her eyes shut. I opened the window by her; for the night was cool, and all the windows were closed. There came in a little breeze of fresh air, and then I ran to fetch a glass of water. When I returned, I found Miss Agnes reviving a little. The air and the water served to refresh her, and very gradually she came back to herself. As she opened her eyes, she looked at me wonderingly, then round the room,—then a shudder came over her, as if with a sudden painful memory.

"I'm better,—thank you for the wa-

ter," she said; and then she rose up and went to the window, and leaned against the casement. I had a glimpse of her face; so sad a face I had never seen before.

For Miss Agnes was not often sad, though she was quiet in her ways and manners. She could be gay, when it was the time to be gay. She was our governess,—that is, she taught Mary and Sophy and me. Fanny was too old to be taught by her, and had an Italian master and a French teacher; but she practised duets for the piano with Miss Agnes, and read with her,—and she made visits with her, for Miss Agnes was a favorite everywhere. She had a kind word for everybody, and listened kindly to all that was said to her. She talked to everybody at the sewing societies, had something to say to every one, and when she came home she had always something to tell that was entertaining. I often wished I could be one-quarter as amusing, but I never could succeed in making my little experiences at all agreeable in the way Miss Agnes did. I have tried it often since, but I always fail. Only the other day, I quite prided myself that I had found out all about Mrs. Endicott's going to Europe, and came home delighted with my piece of news. She was going with her husband; two of the children she was to leave behind, and take the baby with her; they were to be gone six months; and I even knew the vessel they were going in, and the day they were to sail. My intelligence was very quickly told;—Miss Agnes and many others would have made a great deal more of it. I had no sooner come to the end than Fanny said, "Who is going to take care of the children she leaves at home?" I had never thought to ask! I was disappointed;—my news was quite imperfect; I might as well not have tried to bring any news. But it was never so with Miss Agnes. I believe it was because she was really interested in what concerned others, that they always told her willingly about themselves; and though she never was inquis-

itive about others' affairs, yet she knew very well all that was going on.

So she was a most valuable member of our home-circle, and was welcome also among our friends. And we thought her beautiful, too. She was very tall and slender, and her light-brown eyes were of the color of her light-brown hair. We liked to see her come into the room,—her smile and face made sunshine there; and she was more to us than a governess,—she was our dear friend.

But now she looked round at me, pale and sad. She suddenly saw that I looked astonished at her, and she said, "I am not well, Jeanie, but we will not say anything about it. I am going to my room; to-morrow I shall be better." She held her hand to her head, and I thought there must be some heavy pain there, she still looked so sad and pale. She bade us all good night and went away.

I did not tell the others what had happened,—partly because, as I have said, I was not in the way of telling things, and partly because they were all talking and had not observed what had been going on. But I found the paper Fanny had been reading, and wondered if there were anything in what she had read that could have moved Miss Agnes so much. I had not been paying much attention to the reading, but I knew upon which side of the paper to look. Fanny told me it was time for me to go to bed, however, and I left my search before I could find anything that seemed to concern Miss Agnes. I stopped at her door, and bade her good night again; and she came out to me, and kissed me, and said,—I was a good child, and I must not trouble myself about her.

The next day she seemed quiet, yet the same as ever. Though I said nothing to anybody else about her fainting, I could not help telling my friend Jessie of it;—for I always told Jessie everything. Fanny called us the two Jays, we chattered so when we were together. I knew she would not tell anybody, so I could not help sharing my wonder with her,—what could have made Miss Agnes

faint so suddenly? She thought it must have been something in the newspaper,—perhaps the death of some friend, or the marriage of some other. I was willing to look again, and this time remembered three things that Fanny had just been reading when I had looked up at Miss Agnes. One was about Mr. Paul Shattuck;—in descending from a haycart, he had fallen upon a pitchfork, and had seriously wounded his thigh. Another was the marriage of Mr. Abraham Black to Miss Susan Whitcomb, and Fanny had wondered if she were related to the Whitcombs of Hadley. Then she had read a singular advertisement for a lost ring, a seal ring, with some Arabic letters engraved upon it. I was of opinion that Miss Agnes was somehow connected with this signet-ring,—that it had some influence over her fate. Jessie thought that Miss Agnes must have been formerly engaged to Mr. Abraham Black, and that when she heard of his marriage—but I interrupted her in this suggestion. In the first place, she could never have been engaged to a Mr. Abraham Black; and then, nobody who could marry Miss Agnes would think of taking up with a Susan Whitcomb. So Jessie fell back upon Paul Shattuck, and, to tell the truth, we had some warm discussions on the subject.

Time passed on, and it was June. One lovely afternoon, we had quite a frolic with the hay, the grass having been cut on the lawn in front of the house. Miss Agnes had been with us. We had made nests in the hay, and had buried each other in deep mounds of it, and had all played till we were quite tired. I went into the house in search of Miss Agnes, after she had gone in, and found her sitting at one of the side windows. I came near, then wished to draw back again, for I saw there were tears in her eyes. But when I found she had seen me, I tried to speak as if I had seen nothing.

"How high the cat has to step, to walk over the grass!" I said, as I looked out of the window.

Miss Agnes put her arms about me. "You wonder, because you see me crying," she said, and looked into my face.

"I never before saw anybody cry that was grown up," said I.

Miss Agnes smiled and said, "They tell children it is naughty to cry; but sometimes you can't help crying, can you?" And her tears came dropping down.

"Oh, Miss Agnes," I said, "I wish I could help your crying! It is too bad!—it is too bad!"

"Yes, it is very bad," she said, as she held me in her arms, "it is very bad; but you do help me. You shall be my little friend."

That was all. She did not tell me anything;—yet I felt as if she had said a great deal, and I did not speak of this to Jessie.

A few days after, as I was passing the door of the parlor, I fancied I heard a little cry, and it sounded to me as if I had heard the voice of Miss Agnes. I hurried in. A stranger had just entered the room. But before me stood Miss Agnes, pale, erect, her lips quivering. She held fast a chair, which she had drawn up in front of her, as one would place a shield between one's self and some wild animal. How slender and defenceless she looked! I followed the terrified glance of her eyes. There, in the middle of the room, stood a stranger,—not so terrible to look upon, for he was young, and it seemed to me I had never seen so handsome a man. His black hair and eyes quite pictured the hero of my romance. He was strongly built, and directly showed his strength by seizing a large marble table that stood near the centre of the room, and wheeling it between himself and Miss Agnes.

"If you are afraid of me," he said, "I will build up a barrier between us. Poor lamb, you would like to be free from the clutches of the wolf!"

"I am afraid of you," said Miss Agnes, slowly,—and the color came into her cheeks. "You know your power

over me. I begged you, if you loved me, not to come to me."

"And all for that foolish ring! And the spirits of mischief betrayed its loss to you; it was none of my work that published it in the papers. Can you let a fancy, an old story in a ring, disturb your faith in me?"

"If the faith is disturbed," answered Miss Agnes, "what use in asking what has disturbed it? Ernest, as you stand there, you cannot say you love me as you once professed to love me!"

"I can say that you are my guiding star,—that, if you fail me, I fall away into ruin."

"Can my little light keep you from ruin?" said Miss Agnes, shuddering. "Do not talk to me so! Alas, you know how weak I am!"

"I know that you are an angel, and that I am too low a wretch to dare to speak to you. I came here to tell you I was worthy of your deepest hatred. But, Agnes, when you speak to me of my power over you, it tempts me to wield it a little longer, before I fall below your contempt."

He walked up and down the room, and presently saw me standing there.

"A listener!" he exclaimed; "you are afraid to be alone with me!"

I was about to leave the room, but he called me back.

"Stay, child!" he said; "if I can speak in *her* presence, it makes little difference that any one else should hear me. Agnes, little Agnes, you would not like to be quite alone;—let the child stay. Yet you know already that I am faithless to you. You know what I am going to tell you. I love you, passionately, as I have always loved you. But there are other passions hold me tighter. Money, and position,—I need them,—I cannot live without them. The first I have lost already, and the claims I have to reputation will follow soon. I am mad. I am flinging away happiness for the sake of its mask. Next week I marry riches,—a fortune. With the golden lady, I go to Europe. I forsake home,—my better

self. I leave you, Agnes;—and you may thank God that I do leave you; I am not worthy of you."

She lifted herself from the chair on which she was leaning, and walked towards him. She laid her hand upon his shoulder, and, white and pale, looked in his face.

"Do not go, Ernest!" she said. "You are mine. A promise cannot be broken;—you are promised to me.—Stay,—do not go away!"

"My beautiful Agnes!" he said, "do you come to lay your pure self down in the scale against my follies and all my passions? You stand before me too fair, too lovely for me. It is only in your presence that I can appear noble enough for you. Even here, by your side, I see the life I must lead with you, the struggle that you must share. In that life you would only see me fail. I am weak; I can never be strong. Let me go down the current. Your heart will not break;—I am not worth such a sacrifice."

"You are desperate," said she. "You say these cold, bitter words, and you must know that each word cuts me. Oh, Ernest, you are false, indeed, if you come to taunt me with your faithlessness!"

"I needed to see you once more," he said, imperiously,—"I needed it. But you were right, Agnes,—the ring was a true talisman. It seemed to me that its letters had changed color. I carried it to an old Eastern scholar. He declared that the letters could never have formed the word "Faith,"—that the word was some black word that meant death. I left it with him, that he might study it. When I saw him again, he declared he had lost it, and had advertised it. You see you can trust your talisman sooner than you can trust me."

At this moment the outer door opened, and presently Fanny came in, with one of her friends. Miss Agnes looked bewildered, but her visitor recovered his composure directly.

"Miss Fanny, I believe;—I have met you before. I have just been bidding good-bye to Miss Agnes, before leaving

for Europe. Can I be of service to you?"

Before we had time to think, he had said something to each one of us, and had left the house. Fanny turned to speak to Miss Agnes, but she had fallen to the ground before we could reach her.

She was ill, very ill, for a long time. She had the brain fever,—so the doctor said. They let me stay with her,—she liked to have me with her. I was glad to sit in the darkened room all the long day. I never was a "handy" child, but I learned to be useful to her. I waited on all her wants. I held her hand when she reached it out as if to meet some kindly touch.

In the quiet of her room, I had not heard the great piece of news,—of the terrible railroad accident: that Mr. Carr, the Ernest who had been to see Miss Agnes, was among those who were suddenly killed,—the very day he left our house! I had not heard it; so I was not able to warn Fanny, when she came into the sick room of Miss Agnes, the first day she was able to talk,—I could not warn Fanny that she must not speak of it. But she did. How could she be so thoughtless? Miss Agnes, it is true, looked almost well, as she was lying on her couch, a soft color in her cheeks. But then Fanny need not have told her anything so painful. Miss Agnes looked quite wild, and turned to me as if to know whether it were true. I could not say anything to her, but knelt by her,—and she seemed almost calm, as she asked to know all that was known, all the terrible particulars that Fanny knew so well.

She was worse after that. We thought she would die, one night. But she did not die. Either she was too weak or too strong to die of a broken heart. Perhaps she was not strong enough to love so earnestly such a one as Mr. Carr, or else she had such strength as could bear the trial that was given her to bear. She lived, but life seemed very feeble in her for a long time.

One day she began to talk with me.

"You would like to know, Jeanie, the story of that ring," she said.

I told her I was afraid to have her talk about it, but she went on:—

"It is an old heirloom, and all our family history is full of stories of this ring. There are so many tales connected with it, that every one of us has looked upon it with a sort of superstition, and cherished it as a talisman connected with our lives. It was always a test of constancy, and the stories of those occasions when it has detected falsehood have always been remembered. I suppose there are many when it has been quietly worn, undisturbed, that have been forgotten. It has told many a sad tale in my own family. It came back, broken, to my brother Arthur, and he died of a broken heart. My sister Eveline gave it to her young cousin, to whom she engaged herself. But afterwards, when she went to live with a gay and heartless aunt of mine, she broke her promise to him for the sake of a richer match. The day that she was married, our cousin far away saw the black letters turn red upon the signet-ring."

"Oh, Miss Agnes!" I exclaimed.

"And why should not letters change?" she asked, abruptly; and I saw her eyes look out dreamily, as if at something I did not see. "The letter clothes the spirit; and the spirit gives life to the form. A face grows lovely or unlovely with the spirit that lies behind it. I cannot say if there be a spirit in such things. Yet what we have worn we give a value to. It has an expression in our eyes. Do we give it all that expression, or has it some life of its own?"

She interrupted herself, and went on:—

"I had known that Ernest was not true to me. I had known it by the words he wrote to me. They did not have the ring of pure silver; there was a clang to them. When Fanny read aloud the loss of that ring, it spoke to a suspicion that was lying in the depth of my heart, and roused it

into life. My little Jeanie, I was very sad then.

"You do not know how deeply I loved Ernest Carr. You do not know how I might have loved your brother George,—yes, the noble, upright George. He loved me, and treated me most tenderly; he found this home for me. I did not banish him from it,—he would have stayed all these years in Calcutta, if it had not been for me,—so he said. You cannot understand how it was that Ernest Carr, whom I had known before, should have impressed me more. You do not know, yet, that we cannot command our love,—that it does not always follow where our ad-

miration leads. I loved Ernest for his very faults. The fascinations that made the world, its prizes, its money, its fame, so attractive to him, won me as I saw them in him. It is terrible to think of my last meeting with him; but his fate seems to me not so awful as the fate towards which he was hurrying,—the life which could never have satisfied him."

She left off speaking, and dreamed on, her eyes and thoughts far away. And I, too, dreamed. I fancied my brother George coming home, and that he would meet with that ring somehow. I knew it must come back to her. And it did; and he came with it.

TWO YEARS AFTER.

OH, I forgot that, long ago!

It was very fine at the time, no doubt,—

Remembering is so hard, you know;—

Well, you will one day find it out!

I love the life of the happy flowers,

But I hate the brown and crumbling leaves;

You cannot with spices embalm the hours,

Nor gather the sunshine into sheaves.

We are older now, and wiser, too.

Only two summers ago, you say,

Two autumns, two winters, two springs, since you—

Will you hold for a moment my bouquet?

Yes,—take that sprig of mignonette;

It will wither with you as it would with me:

Freshness and sweetness a half-hour yet,

Then a toss of the hand, and one is free.

Why will you talk of such silly things?—

What a pretty bride! Do you like her hair?

See Madam there, with her twenty rings,

Ogling the youth with the foreign air!—

The moon was bright and the winds were low,

The lilies bent listening to what we said?

I did not make your lilies grow;

Will they bloom for me now they are dead?

You hate the rooms and the heartless hum,
The thick perfumes and the studied smile ?
'Tis the air I love to breathe,—yet come,
I will watch the stars with you awhile ;
But you won't talk nonsense, you promise me ?
Tear from the book the page we read ;
We are friends,—dear friends. You must come and see
My new home, and soon.—What was it you said ?

Heartsick, and weary, and sad, and strange,—
Ashes and dust where swept the fire ?
I am sorry for you, but I cannot change.—
Did you see that star fall from the Lyre ?
A moment's gleam, and a deeper night
Closing around its wandering way :
But then there are other orbs as bright ;
Let your incense burn to them, I pray.

Oh, conjure your mighty manhood up !
Let it blaze its best in your flashing eyes !
Can it stare my womanhood down, or hope
To scorch my pride till it droops and dies ?—
There, do not be angry ;—take my hand ;
Forgive me ;—I meant not anything :
I am foolish, and cannot understand
Why you throw life out for one dumb string.

Sweeter its music than all the rest ?
It may be so, though I cannot tell ;
But take the good when you lose the best,
And school yourself till it seems as well.
Love may pass by, but here is fame,
And wealth, and power ;—when these are gone,
God is left,—and the altar-flame
May, brightening ever, burn on and on.

And yet to my heart at times there come
Tidings of lands I shall never see,
Sweet odors, and wooing winds, and hum
Of bees in the fields that are far from me,—
Far fields, and skies that are always fair ;
And I dream the old dreams of heaven, and you.—
But here comes the youth of the foreign air.
I will dance and forget,—and you must, too.

A BUNDLE OF OLD LETTERS.

To struggle painfully for years, spending all of life's energies for others, and then to be forgotten by those for whom all was hazarded and consumed, is a lot demanding the most unselfish aims. Yet this befell many a suffering patriot in our Revolutionary struggle. The names of those who were the leaders in battle and in council, men whose position in the field or whose words in Congress gave them a country's immortality, have remained bright in our memory. But others there were who cheerfully surrendered eminence in their private walks and happiness in social life to endure the hardships of a protracted contest till life was spent, and who, from the very nature of the services they rendered, have remained in obscurity. They would not themselves repine at this; for they gave their strength, not for their country's applause, but their country's good. They sought, not our remembrance, but our freedom.

In many an old garret, or treasured up in some old man's safest nook, are worn-out, faded letters, telling of struggles and hopes in that long contest, that would make their writers' names bright on the nation's record, were not the number of those who rendered that our golden age so countless. Pious is the task of tracing the services of some revered ancestor, who gave whatever he had to give, when his country called, but whose name is not now remembered. Those days are fast becoming to our younger race almost mythical, so that every living word from the actors in them is of use in vivifying scenes that else would seem dim fable.

From a somewhat bulky bundle of yellow, tattered letters, long cherished with fond and filial care, a few are selected to interest the readers of the "*Atlantic*," who, it is supposed, will first be glad to know a little about their writer.

town, Massachusetts, on the 28th of August, 1740. His father, in early life a sea-captain, making frequent voyages between Boston and Europe, was for many years a prominent citizen of Charlestown, participating largely in the measures that preceded and led to the Revolution. At the age of eighteen, Dr. Foster graduated at Harvard, in the class of 1758. He then studied medicine under Dr. Lloyd of Boston, and afterwards completed his studies in England. He married, as his first wife, Martha, daughter of Thaddeus Mason of Cambridge, and at her death, some years later, Mary, daughter of Richard Russell of Charlestown. In his profession he achieved a considerable reputation, acquired a large practice, and numbered among his pupils Doctors Bartlett, Welch, and Eustis.

But while he was working his way to position and influence, more exciting themes began to attract his attention. With the earliest signs of coming conflict he took a determined stand on the Colonial side. In the town-meetings of the day he seems to have been prominent, and his name appears on most of the important committees appointed by the town in reference to public affairs. Thus, when, as early as November, 1772, the Committee of Correspondence in Boston called upon the other towns "to stand firm as one man," his name is found upon a committee appointed to answer this letter and prepare instructions to the representative of the town in the General Court.* He was also one of a committee appointed to consult with the committees of other towns concerning the expected importation of a quantity of tea. This was November 24th. On the 22d of December of the same year, a petition numerously signed was presented to the selectmen, asking that a meeting might be called to take some effectual meas-

* FROTHINGHAM'S *History of Charlestown*, p. 286.

ures to prevent the consumption of tea. Among the signatures is Dr. Foster's.*

He was elected a delegate to the Convention in the County of Middlesex, in August, 1774, and a member of the first Provincial Congress of Massachusetts, in October, of the same year. Early in 1775, he was appointed a surgeon, and was, for some months, at the head of the military medical department, while General Ward commanded at Cambridge. The day after the battle of Concord, at the urgent request of General Ward and Dr. Warren, he gave up his private practice, then very large, to attend the wounded. On the 18th of June, he was appointed by the Committee of Safety to attend the men wounded on the previous day at the battle of Bunker's Hill. He was soon after appointed Surgeon of the State Hospital, and by General Washington, on the discovery of the treachery of Dr. Church, in October, Director-General, *pro tem.*, of the American Hospital Department. Congress soon nominated to this post Dr. John Morgan of Philadelphia, Dr. Foster remaining as the oldest surgeon in the hospital.

It seemed necessary, before selecting some of Dr. Foster's letters, to give this account of his earlier life, to show that he was no soldier of fortune or eleventh-hour laborer, but that his sympathies were enlisted and his aid given among the earliest of the friends of a then doubtful cause,—and that he ventured influence, wealth, and professional fame, and abandoned home and ease, at what seemed to him the call of his country.

The first extracts shall be from a letter to his wife, dated

*"New York, Sunday, P. M.,
June 2, 1776.*

"MY DEAR POLLY,

"I received your kind letter of the 27th last, and thank you for your ready acceptance of my invitation to come to me. Indeed, my dear, you could not have given a stronger proof of your

affection for me. Heaven only knows what dangers and difficulties you may be exposed to in this undertaking; but it shall be my constant endeavor to keep you out of the way of danger, and procure the best accommodation for you this country affords. If mother will add to her former kindness by taking the charge of our children, it will greatly ease my mind; and as our enemies have, by their wanton barbarity, from being inhabitants of Charlestown, made us citizens of the United Colonies at large, I believe you will be as safe and happy with or near me as anywhere. . . .

"The night before last, the city was much alarmed. A signal had been made from one of the islands of the arrival of a ship to join the small fleet at the Hook. Some one raised this to a large number of transports with the expected German forces; some of the Tories here had the impudence to affirm they had seen eleven sail. When I came from the hospital to my lodging, in the evening, I found the neighborhood in confusion, the women talking of and preparing for flight. I thought it my duty to wait on General Putnam, who at present commands here; in my way, I met Major Webb, who acquainted me with the truth of the matter. Upon this occasion, I could not help thinking I should go to my post with much more alacrity, if I might have the pleasure of seeing you again first. . . .

"Your affectionate husband,

"ISAAC FOSTER."

The next is a short extract from a letter to his father, bearing date June 6th, 1776. Speaking of his wife, he says:—

"I wish she may have a pleasant journey, and arrive here in season to see the city before our enemies attack us. We are in daily expectation of them, and tolerably prepared to receive them. I am under no apprehension of their being able to get footing here; but if they behave with spirit, the city must suffer in the contest."

The next is also to his father.

* FROTHINGHAM'S *History of Charlestown*, p. 293.

"New York, July 7th, 1776.

"HONORED SIR,

"It is with the greatest pleasure I embrace this opportunity of congratulating you on the most important event that has happened since the commencement of hostilities. On Tuesday, the 2nd inst., the Honorable the Continental Congress declared the Thirteen United Colonies free and independent States. This Declaration is to be published at Philadelphia to-morrow, with all the pomp and solemnity proper on such an occasion; and before the week is out, we hope to have the pleasure of proclaiming it to the British fleet, now riding at anchor in full view between this city and Staten Island, by a *feu de joie* from our musketry, and a general discharge of the cannon on our works. This step, whatever some lukewarm would-be-thought friends or concealed enemies may think, the cruel oppression, the wanton, insatiable revenge of the British Administration, the venality of its Parliament and Electors, and the unaccountable inattention of the people of Great Britain in general to their true interest and the importance of the contest with their late Colonies, had rendered absolutely necessary for our own preservation,—and has given great spirits to the army, as, by shutting the door against any reconciliation in the least degree connected with dependence on Great Britain, they know for what they are fighting, and are freed from the apprehension of being duped by Commissioners, after having risked their lives in the service of their country, and to secure the enjoyment of liberty to their posterity."

The next letters of public import are addressed to his father, and relate mainly to the expected attack upon New York.

"New York, July 22nd, 1776.

"HONORED SIR,

"I received your kind favor of the 15th inst. I am glad to hear our friends are all well. I congratulate you on the spirited behavior and glorious success of

our army under General Lee. It is generally thought to have been a decisive action, at least for this summer, as the two fifty-gun ships are never like to get to sea again. I hope by the next post you will hear some of our exploits, if the enemy have courage enough to attack us. It is my week at the hospital; and if anything happens, I hope to give you the particulars. Polly has got much better; she joins me in duty to mother and love to the children. There has been another flag from the fleet; the Adjutant-General of the British troops has been on shore to wait on his Excellency. He endeavored, but in vain, to persuade him to accept the letter which had been twice refused. In conversation he related its contents, much the same as those to the late Governor. He was answered, (as I am told from good authority,) that it could not be expected people who were sensible of having committed no offence should ask pardon,—that, as the American States owed no allegiance, so they were not accountable, to any earthly prince. He tarried about half an hour, and seemed pleased with the politeness of his reception."

"July 23d, P. M.

"I write to congratulate you on advice received this day from Virginia, an agreeable supplement to the paper I sent yesterday. On the 9th instant, Lord Dunmore with his slavish mercenaries and stolen negroes were driven from their post on Gwin Island in Virginia, and the piratical fleet from their station near it, with the loss of one ship, two tenders or armed vessels burnt by themselves, three armed vessels taken by our people, and Lord Dunmore wounded; on our side not a man lost. I would be more particular, but, as I had only time to read the Philadelphia paper of yesterday which contains the account, and Mr. Mayo is just setting out, it is not in my power."

"New York, Aug. 12, 1776

"Polly is still here with me, and we

are both very well, but disappointed in not hearing oftener from our friends at Boston. For news in general I must refer to the inclosed paper. I was in company the evening they came to this city with the two gentlemen who came from England in the packet. They say the British force on Staten Island is from twelve to fifteen thousand, of which about one thousand are Hessians; that Lord and General Howe speak very respectfully of our worthy commander-in-chief, at their tables and in conversation giving him the title of General; that many of the officers affect to hold our army in contempt, calling it no more than a mob; that they envy us our markets, and depend much on having their winter-quarters in this city, out of which they are confident of driving us, and pretend only to dread our destroying of it; that the officers' baggage was embarked, a number of flat-bottom boats prepared, and every disposition made for an attack, which we may hourly expect. On our side, we have not been wanting; our army has for several nights lain on their arms, occasioned by several ships of war and upwards of thirty transports going out at the Narrows and anchoring at that part of Long Island best calculated for their making a descent, and where they received, by means of flat-bottom boats, a large detachment from the army on Staten Island. But this fleet went to sea yesterday, where bound we know not; some think, to go round the east end of Long Island, come down the Sound, and land on our backs, in order to cut off any retreat, and oblige us to surrender ourselves and the city into their hands: but if they are so infatuated as to venture themselves into a broken, woody country, between us and the New England governments, I trust they will have cause to repent their rashness. Generals Heath, Spencer, Greene, and Sullivan are promoted by the Honorable Congress to the rank of Major-Generals; and the Colonels Reed, Nixon, Parsons, Clinton, Sinclair, and McDougall to be Brigadier-Generals. We have removed all our

superfluous clothing, and whatever is not necessary for present use, to Rye, whither General Putnam's lady has retired. Miss Putnam is yet in town, and the chaise is in readiness for her and Polly to remove at a minute's warning."

The following copy of an "Order from Head-Quarters" was found among the papers, directed apparently to his father; and as Washington's Orderly Books have never been published, with the exception of a few orders chiefly relating to court-martials, it has been thought that it would be interesting. Though dated on successive days, it seems to have been issued as one order. A note by Dr. Foster, at the close, says,—“This copy was made in a hurry by one of the mates. Some sentences are omitted. Imperfect as it is, I thought it would be agreeable. The principal omission is the order for having three days' provisions ready-dressed, and that all who do not appear at their posts upon the signal are to be deemed cowards, and prosecuted as such.”

“Head-Quarters, August 14, 1776.

“The enemy's whole reinforcement is now arrived, so that an attack must and soon will be made. The General, therefore, again repeats his earnest request, that every officer and soldier will have his arms and ammunition in good order, keep within their quarters and encampment as much as possible, to be ready for action at a moment's call,—and when called upon, to remember that liberty, property, and honor are all at stake, that upon their courage and conduct rest the hopes of their bleeding and insulted country, that their wives, children, and parents expect safety from them only, and that we have every reason to expect that Heaven will crown us with success in so just a cause.

“The enemy will endeavor to intimidate us by show and appearance; but remember how they have been repulsed on these occasions by a few brave Americans. Their cause is bad, their men are

conscious of it, and, if opposed with firmness and coolness at their first onset, with our advantages of works and knowledge of the ground, the victory is most assuredly ours. Every good soldier will be silent and attentive, wait for orders, and reserve his fire till he is sure of its doing execution;—the officers to be particularly careful of this. The colonels and commanding officers of regiments are to see their supernumerary officers so posted as to keep their men to their duty; and it may not be amiss for the troops to know, that, if any infamous rascal shall attempt to skulk, hide himself, or retreat from the enemy without the orders of his commanding officers, he will instantly be shot down as an example of cowardice. On the other hand, the General solemnly promises that he will reward those who shall distinguish themselves by brave and noble actions; and he desires every officer to be attentive to this particular, that such men may be afterwards suitably noticed.”

“Head-Quarters, August 15, 1776.

“The General also flatters himself that every man’s mind and arms are now prepared for the glorious contest upon which so much depends.

“The time is too precious, nor does the General think it necessary, to spend it in exhorting his brave countrymen and fellow-soldiers to behave like men fighting for everything that can be dear to freemen. We must resolve to conquer or die. With this resolution, victory and success certainly will attend us. There will then be a glorious issue to this campaign, and the General will reward his brave soldiers with every indulgence in his power.”

“New York, August 16, 1776.

“HONORED SIR,

“It is now past ten o’clock, and Mr. Adams, who favors me by carrying this, sets out by five o’clock to-morrow morning, so that I have only time to acknowledge the favors received by Dr. Welch. If I survive the grand attack hourly expected, or if it is delayed until then, I

will write again by next post. Polly has her things packed up; the chaise can be ready at a minute’s warning; if the wind favors our enemies, it is probable she will breakfast out of the way of danger. To-morrow is watched for by our army in general with eager expectation of confirming the independence of the American States. All the Ministerial force from every part of America except Canada, with the mercenaries from Europe, being collected for this attempt, God only knows the event. To His protection I commend myself, earnestly praying that in this glorious contest I may not disgrace the place of my nativity, nor, after it is over, be ashamed to see my wife, my children, and my parents again. To the care of Providence, and, under that, to you, honored Sir, with our other friends, I commend all that is near and dear to me, and am, with duty to mother, love to the children, &c., &c.,

“YOUR DUTIFUL SON.”

“P. S. Our troops are in good spirits, and, relying on the justice of their cause and favor of Heaven, assured of victory.”

The next four months were, of course, spent amid the hardships of camps and removals. The frequent letters sent to his father and other friends are all of interest to those who claim descent from him, but the general reader can be concerned in but a few of more public import, and, in most cases, only in extracts from these.

*“Bethlehem, State of Penn.,
Dec. 24, 1776.*

“HONORED SIR,

“I returned from General Washington’s head-quarters last evening, and had the pleasure of finding Polly well and as agreeably situated as I could expect. Were I to attempt writing all I wish to communicate, a week’s time and a quire of paper would hardly suffice. I fancy I shall be no gainer by lending my furniture to the General Court;—General

Washington would have paid me for the use of it before I left Cambridge, but, for the credit of Massachusetts, I declined it.'

*"Fishkill, State of N. York,
Jan. 20, 1777.*

"HONORED SIR,

"After spending the winter hitherto in Pennsylvania and the Jerseys, with frequent removals, some loss, much expense and fatigue, we are once more on the east side of Hudson's River. We arrived at this place last Friday, in good health, after a journey of more than one hundred miles, in severe weather, through the upper part of New Jersey, a new-settled, uncultivated country. The sight of a boarded house or glass window was a great rarity; a cordial welcome to any connected with the American army still greater. Altho' they are fully sensible of the value of money, and we offered cash for all we wanted, yet I believe we were not a little obliged to their fears for what civility we met with, except only from one family. But I must defer a particular account until I have the happiness to see you.

"I have nothing of news to write but what you must hear sooner in another way. General Heath and the militia are besieging Fort Independence; if they can carry that, they will attempt New York. It is not improbable I shall join him in a few days."

The office of Deputy Director-General of Hospitals was established by ordinance, April 7th, 1777; and four days later, Dr. Foster was chosen by Congress to this office, having charge of the Eastern Department. His subsequent residence was mainly at Danbury, Connecticut.

Of Tryon's expedition against Danbury we have the following account, differing in some respects from the common version:—

"Danbury, May 1, 1777.

"You have doubtless heard of the

enemy's expedition to this place, and been anxious for us. This is the first moment of leisure I have had, and, if not interrupted, I will endeavor to give you a particular account.

"On Saturday morning, about three o'clock, an express from Fairfield brought advice, that a large body, three or four thousand British troops, had landed from upwards of twenty transports, under cover of some ships of war near that place, and that it was probable their design was against the provision and other stores collected in this town; another express soon after sunrise informed us of their being on the march. The militia were mustered, and a few Continental troops that were here on their way to Peekskill prepared to receive them; but their number was so inconsiderable, and that of the enemy so large, with a formidable train of artillery, I had no hope of the place being saved.

"I had, upon the first alarm, ordered all the stores in my charge to be packed up, ready for removal at a minute's warning. Upon the second express, I persuaded Polly, with what money was in my hands, to quit the town: she was unwilling, but I insisted on it. We were so much put to it for teams to remove the medicines and bedding, that I determined rather to lose my own baggage than put it on any cart intended for that purpose; and had not a gentleman's team, already loaded with his own goods, taken it up, I must have lost it. As the enemy entered the town at one end, after our troops had retreated to the heights, I went out at the other, not without some apprehension (as I was to cross the route of their flank-guard) of being intercepted by the light horse.

"After having seen the medicines, all of them that were worth moving, safe at New Milford, I returned to town the next morning, and went with our forces in pursuit of the enemy. About noon the action began in their rear, and continued with some intermission until night; the running fight was renewed next morning, and lasted until the enemy got

under cover of their ships. We have lost some brave officers and men. Their loss is unknown, as they buried some of their dead, and carried off others; but, from the dead bodies they were forced to leave on the field, it must have greatly exceeded ours. General Wooster was wounded early in the action; he is in the same house with me, and I fear will not live till morning.

"Our loss in provisions, &c., is between two and three thousand barrels of pork, a quantity of flour, some wheat, and some bedding."

In this bundle are many letters from Mrs. Foster. They are interesting for their true-hearted patriotism and domestic love; but there is room for only a brief extract from a letter referring to this same expedition.

"Danbury, May 13, 1777.

"DEAR MADAM,

"I received yours and father's by Messrs. Russell and Gorham. Doctor had not the pleasure of seeing either of the gentlemen, as he was gone to Fish-kill to oversee the inoculation of the troops, which was a very great disappointment.

"I expected last Monday to have been with you by this time, as I was driven from here by the enemy (tho' very unexpected, as this place was thought to be very secure). I removed to New Milford, from whence I intended to have set out for Boston. On Sunday, the Doctor took his leave, and left me to take care of the wounded. Monday morning, everything was got ready for me to set out at twelve o'clock, when I received a note from the Doctor, desiring I would tarry a little longer. I have now returned to my old lodgings at Danbury, where the Doctor thinks of building a hospital. He joins me in duty and love.

"Your affectionate daughter,

"MARY FOSTER."

Much of Dr. Foster's time was necessarily spent in journeyings to the several

divisions of the army and various military stations. On such journeys his letters to his wife were very frequent. We extract a part of one.

*"Palmer, Thursday even'g,
July 31, 1777.*

"DEAR POLLY,

"I arrived here, which is eighty-three miles from Boston, about sunset this evening, in good health. The enemy's fleet has sailed from New York, and was seen standing to eastward. Some suppose them bound for Boston; but I cannot think so, as General Washington, who, I presume, has the best intelligence, is moving towards Philadelphia. Before you receive this, it will be made certain with you. Should they attack Boston, I would have you get as many of our effects as possible removed out of their way, and inform me by the post where you remove to. Should such an event take place, it will become my duty, after visiting Danbury, to return to the scene of action. To your own prudence and the care of Heaven I leave all, and am, with love to the children, ever yours."

In the lapse of years, many letters have, without doubt, been lost. Thus, but two remain bearing date of 1778. Neither of these contains matter of public import. In May, he speaks of intending a journey to Yorktown, and says, "if anything extraordinary happens between the two armies," he shall be on the spot. In a letter addressed to his father, dated November 27, 1778, he says,—

"Public business calls me to Philadelphia; but the state of your health, and my own, which is much impaired, determine me to visit Boston first. I expect a visit from the Marquis La Fayette next week, on his way to Boston, and shall set out with him."

May 11th, 1779, he writes,—

"To-morrow all the gentlemen of the department at this post [Danbury] dine with me, and the next morning I begin

my journey to Head-Quarters. I mean to take Newark in my way.

"General Silliman was taken prisoner last week, and carried to Long Island."

In the two following letters to his wife he speaks of this visit.

"Philadelphia, June 5, 1779.

"My business is almost completed, and to my mind. I now wait for nothing but the money which the Medical Committee recommended I should be furnished with; I expect to receive it the beginning of next week, when I shall set out immediately. Mr. Samuel Adams travels with me; indeed, the time seems tedious until I get away. Give my duty to our parents, love to the children, &c., and believe me to be, with the sincerest affection, my dearest Polly,

"Ever yours."

"Philadelphia, June 9, 1779.

"MY DEAR POLLY,

"Another post has arrived, and no letter from Boston. It is now a month, and near five weeks, since I have heard from you. If I thought you had neglected writing, it would make me very unhappy; but, from your usual goodness, I cannot think that is the case, but am confident your letters must have miscarried. I have wanted nothing but hearing from you to make my time here perfectly agreeable. I have been received with the greatest politeness and friendship, and every attention paid to me, by men I most esteem, I could wish for; at the same time my business has gone perfectly to my mind. I have leave to reside in Boston for the future, and shall be under no necessity of attending the camp, nor be obliged to visit Philadelphia often than once a year. I am to have a mode of settling my accounts pointed out to me, that will be easy, simple, and much to my mind. I now wait for nothing but money to begin my journey. The Treasury Board this morning passed a resolve recommending it to Congress to furnish me with \$150,000. I expect to receive

the warrant to-morrow, and as soon as I get the money shall set out, which I expect will be about next Monday, until which time I am engaged for almost every day. I dine this day with Mr. Adams; to-morrow with Dr. Shippen, in company with the New England delegation; Thursday and Friday I expect to spend with Dr. Craigie in visiting Red Bank, Mud Island, and other principal scenes of action while the enemy were here. We have an account that the enemy are in motion up the North River; but of them you will hear sooner than I can inform you. General Lincoln has actually defeated the enemy in Carolina, and is like to take them all prisoners. The express is on the road, and expected in town to-morrow, when there will be great rejoicing."

The following letter describes one of Dr. Foster's frequent journeys on business of his department.

"Windsor, October 7, 1779.

"MY DEAR POLLY,

"As I am waiting for Mr. De Lamater to come up, I will endeavor to give you an account of our journey. The evening we left Boston Dr. Warren rode with us as far as Jamaica Plains; after he left us we proceeded to Dedham, where we arrived about dark, and were exceedingly well entertained: we had a brace of partridges for supper. Colonel Trumbull spent the evening with us. The next morning we proceeded nine miles to Heading's to breakfast, and from thence seven miles to Mann's, where we fed our horses, and dined at Daggett's, nine miles further; that afternoon we arrived at Providence, and put up at our old friend Olney's. The next day we dined with Adams and Townshend at their quarters; the General honored us with his company; the same evening supped with the General. Sunday, dined with the General, in company with some of the principal ladies of the place; here I also saw your old acquaintance, General Stark; he drank tea at my quarters one afternoon, and inquired after you.

Having finished my business much to my mind, I continued my journey on Monday morning; the General, Colonel Armstrong, and Dr. Brown were so polite as to ride out four miles with us. After they left us, we proceeded to Angell's, twelve miles from Providence, where we dined,—not on the fat of the land. After dinner we rode to Dorrence's, an Irishman, but beyond all comparison the best house on the road; here we were exceedingly well entertained, and, as it looked like a storm, intended staying there, but, it growing lighter towards noon, we set out, but had not rode far before the rain came on; however, as we had begun, we determined to go through with it, and rode a very uncomfortable ten miles to Canterbury, where we dined, poorly enough, at one Backus's. Not liking our quarters, we proceeded, notwithstanding the rain, to Windham, eight miles further, where we were well entertained at one Cary's. As the storm looked likely to continue, and I was so near Windsor, I was determined, if I must lie by for it, to lie by in a place where I could do some business. I accordingly proceeded fifteen miles in the forenoon to Andover, where I dined at one White's, and fifteen miles in the afternoon to Bissell's at East Windsor, where I lodged. I was thoroughly soaked, but do not find that I have got any cold. Indeed, I find my health considerably better than when I left Boston. This morning it has cleared off very pleasant, and I crossed from East Windsor to this place. I have just returned from visiting Mr. Hooker's and Dr. Johonnot's stores. I find everything in such excellent order as to do credit to the department. Mr. De Lamater is not yet come up; as soon as he arrives we shall visit Springfield. I shall not close this letter until I meet the post; if anything worth notice occurs, I shall mention it. Adieu, my love.

"October 8.—Mr. De Lamater arrived last night. Altho' it is very raw and uncomfortable, I shall proceed immediately after dinner to Springfield. We

have certain advice that the Count D'Estaing has been at Georgia, and taken all the British ships there; it is reported, and believed by many, that he is arrived off Long Island. You see, my dear Polly, I have set you the example of a very long letter. I hope, as you have leisure enough, you will follow it, as nothing can give me greater pleasure."

"Fishkill, October 21, 1779.

"MY DEAR POLLY,

"I returned from Head-Quarters this forenoon. We went down yesterday morning, and dined with General Heath, who was so good as to lend us his barge to carry us to Head-Quarters. His Excellency received us as I could wish. He invited us to dine with him this day. Upon my excusing myself, as being in haste to finish my journey, he accepted the excuse, and invited us to breakfast with him, which we did. We returned last night to Robinson's house, and slept with our friend Eustis. General Heath favored us again with his barge to carry us to Head-Quarters, and after breakfast his Excellency ordered his own to convey us to our horses, which we had ordered four or five miles up the river. One principal reason of my declining the General's invitation to dinner was my impatience to return to Fishkill, that I might receive a letter from you. Judge, then, what was my disappointment to find the post arrived and no letter. I shall cross the North River to-morrow morning to proceed on my journey to Philadelphia. If the nature of the service will allow it, General Heath and his suit propose returning with me to spend the winter in Boston. Eustis desires you would look out some suitable object of his attentions, while in Boston. He pretends it is only with a view to keep him alert and properly attentive to the ladies in general; but I suspect he designs to become the domestic man."

"Morristown, Oct. 26th, 1779.

"MY DEAR POLLY,

"I wrote you from Fishkill the day

before I left it, and shall put this into the office here for the post to take as he comes along. On Friday, towards evening, we left Fishkill. It was dark and squally when we got to the landing, and we had nine horses in the boat, which made us a little uneasy, as a few days before a boat had been upset and some people drowned; however, we got safe over, and lay that night at Colonel Hawsbrook's, where you spent two or three days on your return from Bethlehem. The next morning we breakfasted with Dr. Craik at Murderer's Creek, and then proceeded through the Clove, a most disagreeable place, and horrid road. In the evening we got to Ringwood. Upon our arrival there, we were informed there was no public house in the place, and it was after dark. Colonel Biddle had favored me with an order on all his magazines to supply me with forage; he has one in this place. I waited on his deputy and presented the order; he went out of the room, and in a few minutes returned with a Mr. Erskine, who is surveyor-general of the roads; he gave me a polite invitation to spend the night at his house, where we were entertained in the most genteel, hospitable, and friendly manner. A shower of rain yesterday morning prevented our proceeding, but, as it cleared up about noon, we came on thirty-four miles to this place. I expect to reach Philadelphia the day after tomorrow. I have been from home almost a month, and have received but one letter, but hope to find several waiting for me at Philadelphia, as I cannot think you would miss a post. The enemy last Thursday left their posts at Stony Point and Verplanck's Point, and retired to New York."

"Bristol, October 27, 1779.

"MY DEAR POLLY,

"I wrote you from Morristown, which it is probable you will receive by this post. Lest that should miscarry, this will inform you that I am at length arrived within twenty miles of Philadelphia, where I expect to dine this day.

A few days will determine how long I am like to be detained there;—I think it upon every account best to finish all my business. The gentlemen have bound themselves to each other by an engagement upon honor, if nothing is done for our department by New Year's day, all to resign, and have informed Congress of it: I have joined in the engagement. If I find I am like to be detained here any time, it is not improbable I may put my accounts in the hands of the Commissioners, and, if I can get fresh horses, proceed with Mr. Lee on a visit to Mrs. Washington at Mount Pleasant in Virginia. Mr. Lee desires his compliments. Adieu, my love. I am, with the sincerest affection,

"Ever yours."

"Danbury, December 8, 1779.

"MY DEAR POLLY,

"I am once more returned to dear Danbury, on my way to Boston. I arrived here about an hour since, and never had a more fatiguing, disagreeable journey in my life than from Philadelphia here. I expected to have been in Boston by this time; but two severe storms, and one day waiting for his Excellency at Morristown, have made me twelve days performing a journey which according to my usual way of travelling I should have performed in four. I have, however, no reason to repent my undertaking this journey.

"If sickness or very bad weather does not prevent, I shall certainly be home by Christmas, and wish to have all our friends together;—I promise myself a great deal of happiness, and hope I shall not be disappointed. Adieu, my love."

September 30th, 1780, the Hospital Department was newly organized, and the office of Deputy Director-General was abolished, and of course the incumbents of that office were no longer in the hospital service.

Dr. Foster's health was irreparably injured by the fatigues and exposures he had undergone, and he lingered but a

few months longer, dying on the 27th of February, 1781, in his forty-second year.

One sentence in his will deserves record, as in harmony with the disinterestedness of his life. After desiring that all debts due him should be collected as soon as possible after his decease, he adds this clause: "But I would not have any industrious and really poor persons distressed for this purpose."

The writer of these letters needs no additional eulogy. He sacrificed all the prospects of his life to give his services in our struggle for freedom. He, too, was but one of that innumerable multitude who, in more exalted or in humbler stations, freely gave their exertions, their

wealth, their comfort, and their lives for freedom and right. It is possible so to linger by the grave of the past as to forget the living present; but the grateful memory of those who have in their times contended for truth with self-denial should be ever animating to those now laboring in the holy warfare, to which, in every age, whether the outward signs be of peace or strife, God calls the noble of mankind.

"Therefore bring violets! Yet, if we, self-balked,
Stand still a-strewing violets all the while,
These had as well not moved, ourselves not talked
Of these."

IN THE PINES.

If I were a crow, or, at least, had the faculty of flying with that swift directness which is proverbially attributed to the corvine tribe, and were to wing a south-westerly course from the truck of the flag-staff which rises from the Battery at New York, I should find myself, within a very short time, about fifty miles from the turbulent city, and hovering over a region of country as little like the civilized emporium just quitted as it is well possible to conceive. Not being a crow, however, nor fitted up with an apparatus for flying,—destitute even of a balloon,—I am compelled to adopt the means of locomotion which the bounty of God or the ingenuity of man affords me, and to spend a somewhat longer time in transit to my destination.

Over the New Jersey Railroad, then, I rattled, one fine, sunshiny autumn morning, in the year that has recently taken leave of us, as far as Bordentown, a distance of some fifty-seven miles, on my way to a locality the very existence of

which is scarcely dreamed of by thousands in the metropolis, who can tell you how many square miles of malaria there are in the Roman Campagna, and who have got the topography of Caffre Land at their fingers' ends. It is a region aboriginal in savagery, grand in the aspects of untrammelled Nature; where forests extend in uninterrupted lines over scores of miles; where we may wander a good day's journey without meeting half-a-dozen human faces; where stately deer will bound across our path, and bears dispute our passage through the cedar-brakes; where, in a word, we may enjoy the undiluted essence, the perfect wildness, of woodland life. Deep and far "under the shade of melancholy boughs" we shall be taken, if together we visit the ancient Pines of New Jersey.

In order to do so, we must make at Bordentown the acquaintance of Mr. Cox, and take our seats in his stage for a jolt, twelve miles long, to the village of New Egypt, on the frontier of the Pines. Al-

though the forest is accessible from many points, and may be entered by a number of distinct approaches, I, the writer hereof, selected that *viâ* New-Egypt as the most convenient to a comer from New York, and as, perhaps, the least fatiguing to accomplish.

But, oh! the horrors of those New Jersey roads! Mud? 'Tis as if all the rains of heaven had been concentrated upon all the marls and clays of earth, and all the sticky stratum plastered down in a wriggling line of unascertainable length and breadth! Holes? As if a legion of sharpshooters had been detailed for the defence of Sandy Hook, and had excavated for themselves innumerable rifle-pits or caverns for the discomfiture of unhappy passengers! Up hill and down dale,—with merciless ruts and savage ridges,—now, a slough, to all appearance destitute of bottom, and, next, a treacherous stretch of sand, into which the wheels sink deeper and deeper at every revolution, as if the vehicle were France, and the road disorder,—such is a faint adumbration of the state of affairs in the benighted interior of our petulant little whiskey-drinking sister State!

But all earthly things come to an end, and so, accordingly, did our three-hours' drive. The stage pompously rolled into the huddled street of its terminus, and deposited me, in the neighborhood of noon, on the stoop of the only tavern supported in the deadly-lively place. No long sojourn, however, was in store for me. Presently—ere I had grown tired of watching the couple of clodhoppers, well-bespattered as to boots and undergarments with Jersey mud, who, leaning against a fence in true agricultural laziness, deliberately eyed, or rather, gloated over the inoffensive traveller, as though he were that "daily stranger," for whom, as is well known, every Jerseyman offers up matutinal supplications—a buggy appeared in the distance, and I was shortly asked for. It was the vehicle in which I was to seek my destination in the Pines; and my back was speedily turned upon the queer little village with the curiously

chosen name. My driver, an intelligent, sharp-featured old man, soon informs me that he was born and has lived for fifty years in the forest. A curious, old-world mortal,—our father's "serving-man," to the very life! The Pines are to him what Banks and City Halls and Cooper Institutes and Astor Houses are to us poor *cittadini*; every tree is individualized; and I doubt not he could find his way by night from one end to the other of the forest.

We had driven no great distance, when my companion lifted his whip, and, pointing to a long, dark, indistinct line which crossed the road in the distance, blocking the prospect ahead and on either side, as far as the eye could reach, exclaimed: "Them's the Pines!" As we approached the forest, a change, theatrical in its suddenness, took place in the scenery through which our course was taken. The rich and smiling pasture-lands, interspersed with fields of luxuriant corn, were left behind, the red clay of the road was exchanged for a gritty sand, and the road itself dwindled to a mere pathway through a clearing. The locality looked like a plagiarism from the Ohio backwoods. On both sides of our path spread the graceful undergrowth, waving in an ocean of green, and hiding the stumps with which the plain was covered, while far away, to right and left, the prospect was bounded by forest walls, and gloomy bulwarks and parapets of pines arose in front, as if designed, in their perfect denseness, to exclude the world from some bosky Garden of Paradise beyond. Not so, however; for our pathway squeezes itself between two melancholy sentinel-pines, tracing its white scroll into the forest farther than the eye can follow, and in a few moments we leave the clearing behind, and pass into the shadow of the endless avenue, and bow beneath the trailing branches of the silent, stern, immovable warders at the gate. We were fairly in the Pines; and a drive of somewhat more than three miles lay before us still.

The immense forest region I had thus

entered covers an extensive portion of Burlington County, and nearly the whole of Ocean, beside parts of Monmouth, Camden, Atlantic, Gloucester, and other counties. The prevailing soils of this great area—some sixty miles in length by ten in breadth, and reaching from the river Delaware to the very shore of the Atlantic—are marls and sands of different qualities, of which the most common is a fine, white, angular sand, of the kind so much in request for building-purposes and the manufacture of glass. In such an arid soil the *coniferæ* alone could flourish, and accordingly we find that the wide-spreading region is overgrown almost entirely with white and yellow pine, hemlock, and cedar. Hence its distinctive appellation.

It was a most lovely afternoon, warm and serene as only an American autumn afternoon knows how to be; and while we hurried past the mute, monotonous, yet ever-shifting array of pines and cedars, the very rays of the sun seemed to be perfumed with the aroma of the fragrant twigs, about which humming-birds now and then whirled and fluttered as we startled them, scarcely more brilliant in color than the gorgeous maples which grew in one or two dry and open spots. For three-quarters of an hour our drive continued, until at length a slight undulation broke the level of the sand, and a fence, inclosing a patch of Indian corn, from which the forest had been driven back, betokened for the first time the proximity of some habitation. In fact, having reached the summit of the slope, I found myself in the centre of an irregular range of dwellings, scattered here and there in picturesque disregard of order, and next moment my hand was grasped by my friend B. I had reached my destination,—Hanover Iron-Works, —and was soon walking up, past the white gateway, to the Big House.

Somewhat less than eighty years ago, Mr. Benjamin Jones, a merchant of Philadelphia, invested a portion of his fortune in the purchase of one hundred thousand acres of land in the then un-

broken forest of the Pines. The site of the present hamlet of Hanover struck him as admirably adapted for the establishment of a smelting-furnace, and he accordingly projected a settlement on this spot. The Rancocas River forms here a broad embayment, the damming of which was easily accomplished, and one of the best of water-privileges was thus obtained. On the north of this bay or pond, moreover, there rises a sloping bluff, which was covered, at the period of its purchase, with ancient trees, but upon which a large and commodious mansion was soon erected. Here Mr. Jones planted himself, and quickly drew around him a settlement which rose in number to some four hundred souls; and here he commenced the manufacture of iron. At frequent intervals in the Pines were found surface-deposits of ore, the precipitate from waters holding iron in solution, which frequently covered an area of many acres, and reached a depth of from two or three inches to as many feet. The ore thus existing in surface-deposits was smelted in the iron-works, and the metal thence obtained was at once molten and moulded in the adjoining foundry. Here, in the midst of these spreading forests, many a ponderous casting, many a fiery rush of tons of molten metal, has been seen. Here, five-and-forty years ago, the celebrated Decatur superintended, during many weeks, the casting of twenty-four pounders, to be used in the famous contest with the Algerine pirates whom he humbled; and the echoes of the forest were awakened with strange thunders then. As the great guns were raised from the pits in which they had been cast, and were declared ready for proof, Decatur ordered each one to be loaded with repeated charges of powder and ball, and pointed into the woods. Then, for miles between the grazed and quivering boles, crashed the missiles of destruction, startling bear and deer and squirrel and raccoon, and leaving traces of their passage which are even still occasionally discovered. The cannon-balls

themselves are now and then found imbedded in the sand of the forest. In this manner the guns were tried which were to thunder the challenge of America against the dens of Mediterranean pirates.

Hanover, too, in its day of pride, furnished many a city with its iron tubes for water and for gas, many a factory and workshop with its castings, many a farmer with his tools; but the glow of the furnace is quenched forever now. The slowly gathering ferruginous deposits have been exhausted, and three years have elapsed since the furnace-fires were lighted. The blackened shell of the building stands in cold decrepitude, a melancholy vestige of usefulness outlived. In consequence of the stoppage of the works, Hanover has lost seven-eighths of its population, and only about fifty inhabitants remain in the white cottages grouped about the Big House, who are employed in agricultural labors and occupations connected with the forest. Yet in this solitary nook the elegances and the tastes of the most cultivated society are to be found. The Big House, surrounded by its well-trimmed gardens sloping down to the broad Rancocus, with its comfortable apartments, and the diversified prospect which it commands, offers a resting-place which, although deep in the genuine forest, combines urban refinement with the quiet and seclusion of country-life.

Bright and early on the morning after my arrival, Friend B. was at my door; and after a savory, if hasty breakfast, we sounded *boute-selle*. Outside the gate a couple of forest-ponies were waiting,—stout, lively, five-year-olds, equal, if not to a two-forty heat, yet to twenty miles of steady trot without distress,—brown and sleek as you please, with the knowingest eyes, and intelligence expressed in the impatient stamp of the fore-foot, and good-humor in the twitching of the ear. Into the saddle and off, with the cheery breeze to bathe us in exhilaration, as it went humming around us laden with aromatic odors and mysterious whisper-

ings of the pine-trees to the sea,—through the dew-diamonded grass of the little lawn at the top of the hill,—past the great elm with its glistening foliage, and its carolling crew of just-awakened birds,—then a canter down the sandy slope to the edge of the forest, and again the pines are around us.

Before us lay a four-mile ride over a devious track among trees which my companion knows by heart. Paths diverge into the forest on either side, running north and south, east and west, straight and crooked, narrow and broad; but B. follows unerringly the right, though undistinguished trail. This knowledge of woodcraft,—how it appalls and wonder-strikes the unlearned metropolitan, accustomed as he is to numbered houses and name-boarded streets! No omnibus-driver threading the confusion of a great thoroughfare could shape his course with greater assurance and lack of hesitation than does B. through these endless avenues of heavy-foliaged pines, broken only now and then by some tangled, impenetrable brake of cedars, or by a charred and blackened clearing, where the coaler has been at work. I gradually grew to believe that he could call every tree by its name, as generals have been said to know every soldier in their armies.

At length we reached a clearing of one or two acres in extent, the site of Cranberry Lodge, and the terminus of our ride. In the centre of the lone expanse two unusually tall pines were left standing, at the base of which a curious structure nestled, which had been for several weeks the occasional hermitage of my companion. It was built entirely with his own hands, of cedar rails and white-pine planks, which he had cut and sawed from trees that his own hands had felled. A queer little cabin, some nine feet in length by five or six in breadth, standing all alone in the forest, with not a neighbor within a distance of at least four miles!

Dismounting, we fastened our horses to a couple of saplings, and I was introduced to the interior of Cranberry Lodge,

which was tenanted only by the "hired man," who, in the absence of Mr. B., reigned supreme in the clearing. The dwelling I found no less primitive in internal than in its external appearance. Three persons, moderately doubled up and squeezed, could find room in the interior, which was furnished with a bench for the safe-keeping of sundry pots, pans, and other culinary necessities, and with a shelf on which some blankets were laid, constituting my companion's bedstead and bed, when he slept in Cranberry Lodge. Beneath the "bunk" a small hole scooped in the sand stood in lieu of a cellar, and contained a stock of provisions of Mr. B.'s own cooking.

Such a backwoodish dwelling as Cranberry Lodge, existing in the year 1858, within seventy miles of New York, requires some explanation. Its foundation is—pies! Cape Cod, the great emporium of the cranberry-trade, has been running short for the last few years; in other words, its supply is unequal to the demand. The heavy Britishers have awakened to the fact, since 1851, that, of all condiments and delicacies, cranberry-sauce and cranberry-pie are best in their way; and John Bull takes many a barrel clean out of our market now. It so happened that in the Pines of New Jersey cranberries superior to those of Cape Cod have grown unheeded for centuries,—grew red and purple and white and pink when Columbus was unthought of, as well as when Washington passed through the Pines,—and for sixty or seventy years have furnished a certain class of gypsies—of whom more anon—with merchandise which sold well in the neighboring villages and cities. No one thought of cultivating cranberries; no one, but the gypsies aforesaid, of gathering them for sale. But it came to pass that a certain farmer of Hanover was, like many another, unsuccessful during several years. As a last resource, he purchased of the owner of the Big House a cranberry-bog,—that is to say, one of the many marshy spots which are interspersed in the forest,—for which he paid

five dollars the acre. There were a little more than one hundred acres in the bog. At a cost of some six hundred dollars Mr. F. fenced in his bog, and spent three months in watching the cranberries as they ripened, to protect them from depredation. To his intense astonishment, he found, in October, that the yield was between two and three hundred bushels to the acre, and that his land and fencing were paid for, with a balance left over for next year. In consequence of this success, a little mania for cranberry-farming seized upon the denizens of the Pines, and bogs acquired a value they had never borne before. This was in 1857. Early in 1858, one of these plots of land, with an adjoining piece of forest, was rented by Mr. B., who, like a right-down Yankee, determined to cultivate it himself. So, with the aid of one hired man, a clearing was made in his forest-patch, a hut built, four miles from the nearest habitation, and the trees cut down were converted into rails, wherewith to fence in the cranberry-land. At the time of my visit, the crop was just beginning to think of getting ripe, and the great lazy vines, each one creeping for several feet along the ground, were severally loaded with dozens of delicately-tinted berries, plump and fair as British beauties, which silently drew to themselves and absorbed the rays of the sun, turning them to color and succulent subacidulousness. A most glorious sight that same hundred-acre bog must have been a couple of weeks later, when the berries had ripened, and a carpet of rosy redness blushed upwards to the waning sun! Yet 1858 (the even year) was a bad season for cranberries,—the yield was *only* sufficient to pay for the land and fencing, with a modicum over to begin 1859 with!

So cranberries grew to be institutions in the Pines, and all the bogs for miles around the site of the first experiment were hired by sanguine farmers. But the cranberry-cultivator has one enemy, which is neither bird, nor worm, nor blight, but biped,—a Rat, two-legged,

erect, or moderately so, talking, even, in audible and intelligible speech,—the Pine Rat, namely. Few but New Jerseymen, and of them chiefly those who dwell about the forest, have heard of this human species; it has not yet had its Agassiz nor its Wyman,—yet there it flourishes and repeats itself!

My friend, Mr. B., considerably undertook to initiate me into some of the mysteries of this race, which has proved minatory, though not destructive, to his blushing crop,—and accordingly led me through brake and brier, past wild and gloomy cedar-swamps, over brooks insecurely bridged with fallen logs, or, perchance, with stepping-blocks of pine-stumps, far into the silent forest, and to a little dell or dingle,—a natural clearing,—where a couple of tents were pitched, and the smoke of a struggling fire told infallibly of human neighborhood. The barking of a splenetic little terrier brought from one of the tents a man of some fifty years, lank and gaunt of visage, with matted hair, and wild, uncivilized eyes, dressed in a ragged jacket, and what had once been a pair of trousers. His face wore no expression of intelligence; but a look of intense, though animal cunning lurked in his eyes. While I was gazing on this individual, who stood in silence by his tent, there emerged from the other an ancient female, who might have been eighty years of age, but who hobbled towards us with much briskness.

“Good evening, Hannah Butler,” said Mr. B.; “I’ve brought you some tomatoes from the Big House. This is my friend, Mr. Smith of York.”

Mr. Smith of York (grimly repressing a smile, as his mischievous memory whispered something about Brooks of Sheffield) bowed gravely to Mrs. Butler. Mr. B. whispers,—“That’s the Queen of the Pine Rats!” Hannah meanwhile mumbled over one of the fleshy tomatoes.

The man whom we had first seen held in his hand a tattered shawl, with which he now began patching a portion of his tent, saying at the same time that there was a storm a-brewing.

“Ay, is there!” said Mrs. Butler; “and a storm like the one when I seed Leeds’s devil!”

“Hush!” interrupted her ragged companion, with a look of terror. “What’s the good o’ namin’ him, and allus talkin’ about him, when yer don’t never know as he ar’n’t byside ye?”

“I’ll devil yer!” shrieked the crone, through a half-eaten tomato. “Finish mendin’ up yer cover, yer mean cranberry-thief!”

The spiteful terrier, which had meanwhile evinced an unpleasant interest in the thickness of my pantaloons, added his yelping to the clamor, and Mr. B., pointing to the clouds, thought we had better hasten homewards. So we bade farewell to Hannah and her nephew, as I learned that the unfortunate vessel of her wrath in reality was, and dived into the gloomy recesses of the Pines again.

Long ere we got back to Cranberry Lodge, all doubts of an impending tempest had disappeared. The eastern sky, cloudless an hour before, was now overhung with a livid bank of ash-gray clouds, which were incessantly riven by broad and terrible flashes of silent lightning. A slight westerly breeze was blowing, and evidently impeded the progress of the storm, which was beating up from seaward against the wind. Plunging through prickly thickets and dashing through the turbid brooks, we hastened toward the clearing, committed Cranberry Lodge to the custody of the “hired man,” and untied our horses from the saplings to which they were made fast. In another moment we were on the back trail. Scarcely, however, was the clearing shut out of view when a little hesitating puff of wind from the east blew chill upon us; the breeze had veered, and the tempest was at hand. In the twinkling of an eye, the western horizon was overhung with the same ghastly storm-bank that threatened in the east, while a monitory gust rustled through the sighing pines, wildly twisting and tossing the undergrowth,—overspread with a quivering pallor as it bent before the breeze,

—and bade us be prepared. Next moment, a clap of thunder, rattling like the artillery of ten thousand sieges, or like millions of bars of iron dashed furiously together, broke upon the forest. It was the most awful sound, terrible even in its expected suddenness, that I ever heard. Simultaneously a flash of purple lightning fell from the zenith to the horizon, splitting the clouds asunder, and with it there descended rain in a cataract rather than in torrents, so that in the twinkling of an eye the thirsty sand was saturated, and bubbling pools of water pattered in the deluged path. Crash after crash, each clap more terrific than the one preceding, came the awful thunder; blinding flashes of lightning darted around us;—but still our phlegmatic ponies galloped on, and only once started violently, when a peal which really seemed as if its shock must burst the heavens asunder dazed us momentarily with its almost unendurable sound. The gloomy canopy above us, meanwhile, was overrun by incessant streams of purple lightning, and the deluge of rain still fell. At length we reached the Big House, (somewhat ostentatiously reducing the speed of our horses to a walk as we came within sight of its embowered windows,) and were soon dripping in the kitchen. A change of apparel, calling into requisition Mexican *ponchos* and other picturesque garments, with a smoke beside a roaring fire, completely obviated all dangerous consequences; nor was it without feelings of great satisfaction that B. and myself watched tranquilly from our comfortable ensconcement the beatings of the storm on the encircling forest.

The Big House, I found, was full of legends of the Pine Rats. This extraordinary race of beings are lineal descendants of the New Jersey Tories, who, during the Revolution, made the Pines their refuge, whence they sallied in perpetual forays against the farms and dwellings of the partisans of the opposite cause. Several hundreds of these fanatical desperadoes made the forest their home, and laid waste the surrounding townships by their

sudden raids. Most barbarous cruelties were practised on both sides, in the contests which continually took place between Whigs and Tories, and the unnatural seven-years' war possessed nowhere darker features than in the neighborhood of the New Jersey Pines. Remains of these forest-freebooters are still discovered from time to time, in the process of clearing the woods, and unmistakable relics are occasionally met with in the denser portions of the forest, which must have been comparatively open eighty years ago.

The degraded descendants of these Tories constitute the principal difficulty with which a proprietor in this region has to contend. Completely besotted and brutish in their ignorance, they are incapable of obtaining an honest living, and have supported themselves, from a time which may be called immemorial, by practising petty larceny on an organized plan. The Pine Rat steals wood, steals game, steals cranberries, steals anything, in fact, that his hand can be laid upon; and woe to the property of the man who dares attempt to restrain him! A few weeks may, perhaps, elapse, after the tattered savage has received a warning or a reprimand, and then a column of smoke will be seen stealing up from some quarter in the forest;—he has set the woods on fire! Conflagrations of this kind will sometimes sweep away many hundreds of acres of the most valuable timber; while accidental fires are also of frequent occurrence. When indications of a fire are noticed, every available hand—men, women, and children alike—is hurried to the spot for the purpose of “fighting” it. Getting to leeward of the flames, the “fighters” kindle a counter-conflagration, which is drawn or sucked against the wind to the part already burning, and in this manner a vacant space is secured, which proves a barrier to the flames. Dexterity in fighting fires is a prime requisite in a forest overseer or workman.

“And now, something about Leeds's devil!” I said to my friend, after satis-

factory definition of the Pine Rat; "what fiend may he be, if you please?"

"I will answer,—I will tell you," replies Mr. B. "There lived, in the year 1735, in the township of Burlington, a woman. Her name was Leeds, and she was shrewdly suspected of a little amateur witchcraft. Be that as it may, it is well established, that, one stormy, gusty night, when the wind was howling in turret and tree, Mother Leeds gave birth to a son, whose father could have been no other than the Prince of Darkness. No sooner did he see the light than he assumed the form of a fiend, with a horse's head, wings of bat, and a serpent's tail. The first thought of the newborn Caliban was to fall foul of his mother, whom he scratched and bellowed soundly, and then flew through the window out into the village, where he played the mischief generally. Little children he devoured, maidens he abused, young men he mauled and battered; and it was many days before a holy man succeeded in repeating the enchantment of Prospero. At length, however, Leeds's devil was laid,—but only for one hundred years.

"During an entire century, the memory of that awful monster was preserved, and, as 1835 drew nigh, the denizens of Burlington and the Pines looked tremblingly for his rising. Strange to say, however, no one but Hannah Butler has had a personal interview with the fiend; though, since 1835, he has frequently been heard howling and screaming in the forest at night, to the terror of the Rats in their lonely encampments. Hannah Butler saw the devil, one stormy night, long ago; though some skeptical individuals affirm, that very possibly she may have been led, under the influence of liquid Jersey lightning, to invest a pine-stump, or, possibly, a belated bear, with diabolical attributes and a Satanic voice. However that may be, you cannot induce a Rat to leave his hut after dark,—nor, indeed, will you find many Jerseymen, though of a higher order of intelligence, who will brave the supernatural terrors

of the gloomy forest at night, unless secure in the strength of numbers."

The Pine Rat, in his vocation as a picker-up of every unconsidered trifle, is an adept at charcoal-burning, on the sly. The business of legitimate charcoal-manufacture is also largely practised in the Pines, although the growing value of wood interferes sadly with the coalers. Here and there, however, a few acres are marked out every year for charring, and the coal-pits are established in the clearing made by felling the trees. The "coaling," as it is technically termed, is an assemblage of "pits," or piles of wood, conical in form, and about ten feet in height by twenty in diameter. The wood is cut in equal lengths, and is piled three or four tiers high, each log resting on the end of that below it, and inclining slightly inwards. An opening is left in the centre of the pile, serving as a chimney; and the exterior is overlaid with strips of turf, called "floats," which form an almost air-tight covering. When the pile is overlaid, fire is set at various small apertures in the sides, and when the whole "pit" is fairly burning, the chimney is closed, in order to prevent too rapid combustion, and the whole pile is slowly converted into charcoal. The application of the term "pit" to these piles is worthy of remark. It is due, of course, to the fact, that for centuries it was customary to burn charcoal in excavated pits, until it was discovered that gradual combustion could be as well secured by another and less tedious method.

The Pine Rat glories in his surreptitious coal-pits. In secluded portions of the forest, he may continually be discovered pottering over a "coaling," for which he has stolen the wood. This, indeed, is his only handicraft,—the single labor to which he condescends or is equal. Two or three men sometimes band together and build themselves huts after the curious fashion peculiar to the Rat, namely, by piling sticks or branches in a slope on each side of some tall pine, so that a wigwam, with the trunk of the

tree in the centre, is constructed. Inside this triangular shelter—the idea of which was probably borrowed from the Indians—the Pine Rat ensconces himself with his whiskey-bottle at night, crouching in dread of the darkness, or of Leeds's devil, aforesaid. In this respect he singularly resembles the Bohemian charcoal-burner, who trembles at the thought of Rübzahl, that malicious goblin, who has an army of mountain-dwarfs and gnomes at his command. So long as the sunlight inspires our Rat with confidence, however, he will work at his coal-pit, while one comrade is away in the forest, snaring game, and another has perhaps, been dispatched to the precincts of civilization with his wagon-load of coal. Yes! the Pine Rat sometimes treads the streets of cities,—nay, even extends his wanderings to the banks of the Delaware and the Hudson, to Philadelphia and Trenton, to Jersey City and New York. Then, who so sharp as the grimy tatterdemalion, who passes from street to street and from house to house, with his swart and rickety wagon, and his jangling bell, the discordant clangor of which, when we hear it, calls up horrible recollections of the bells that froze our hearts in plague-stricken cities of other lands, when doomed galley-slaves and *forçats* wheeled awful vehicles of putrefaction through the streets, clashing and clinking their clamorous bells for more and still more corpses, and foully jesting over the Death which they knew was already upon them! But the long-drawn, monotonous, nasal cry of the charcoal-vender—who has not heard it?—"Char-coa'! Char-coa'!"—is more cheerful than the demoniac laughter of the desperate galley-slaves, and his bell sounds musically when we hear it and think of theirs. Sometimes a couple of these peregrinants may be seen to encounter each other in the streets, and straightway there is an adjournment to the nearest bar-room, where the most scientific method of "springing the arch" is discussed over a glass of whiskey, at three cents the quart. Springing the

arch, though few may be able to interpret the phrase, is a trick by which every housewife has suffered. It is the secret of piling the coal into the measure in such a manner as to make the smaller quantity pass for the larger, or, in other words, to make three pecks go for a bushel. So the Pine Rat vindicates his claim to a common humanity with all the rest of us men and women; for have not we all our secret and most approved method of springing the arch,—of palming off our three short pecks for a full and bounteous imperial bushel? Ah, yes! brothers and sisters, whisper it, if you will, below your breath, but we all can do the Pine Rat's trick!

We shall not suffer his company much longer in this world,—poor, neglected, pitiable, darkened soul that he is, this fellow-citizen of ours. He must move on; for civilization, like a stern, prosaic policeman, will have no idlers in the path. There must be no vagrants, not even in the forest, the once free and merry greenwood, our policeman-civilization says; nay, the forest, even, must keep a-moving! We must have farms here, and happy homesteads, and orchards heavy with promise of cider, and wheat golden as hope, instead of silent aisles and avenues of mournful pine-trees, sheltering such forlorn miscreations as our poor cranberry-stealing friends! Railways are piercing the Pines; surveyors are marking them out in imaginary squares; market-gardeners are engaging land; and farmers are clearing it. The Rat is driven from point to point, from one means of subsistence to another; and shortly, he will have to make the bitter choice between regulated labor and starvation clean off from the face of the earth. There is no room for a gypsy in all our wide America! The Rat must follow the Indian,—must fade like breath from a window-pane in winter!

In fact, the forest, left so long in its aboriginal savagery, is about to be regenerated. A railroad is to be constructed, this year, which will place Hanover and the centre of the forest within one hour's

travel of Philadelphia; and it is scarcely too much to anticipate, that, within five years, thousands of acres, now dense with pines and cedars of a hundred rings, will be laid out in blooming market-gardens and in fields of generous corn. Such little cultivation as has hitherto been attempted has been attended by the most astonishing results; and persons have actually returned from the West and South, in order to occupy farms in the neighborhood of Hanover.

In one respect *c'est dommage*; one is grieved to part with the game that is now

so plentiful in the Pines. Owing to the beneficent provision of the laws of New Jersey, which stringently forbid every description of hunting in the State during alternate periods of five years, game of all kinds has an opportunity to multiply; and at the termination of the season of rest, in October, 1858, there was some noble hunting in the neighborhood of Hanover. Five years hence, bears and deer will be a tradition, panthers and raccoons a myth, partridges and quails a vain and melancholy recollection, in what shall then be known as what was once the Pines.

THE LAST BIRD.

LITTLE BIRD that singest
Far atop, this warm December day,
Heaven bestead thee, that thou wingest,
Ere the welcome song is done, thy way

To more certain weather,
Where, built high and solemnly, the skies,
Shaken by no storm together,
Fixed in vaults of steadfast sapphire rise!

There, the smile that mocks us
Answers with its warm serenity;
There, the prison-ice that locks us
Melts forgotten in a purple sea.

There, thy tuneful brothers,
In the palm's green plumage waiting long,
Mate them with the myriad others,
Like a broken rainbow bound with song.

Winter scarce is bidden,
Veiled within this fair, deceitful sky;
Fly, ere, from his ambush bidden,
He descend in ruin swift and nigh!

By the Summer stately,
Truant, thou wast fondly reared and bred:
Dost thou linger here so lately,
Knowing not thy beauteous friend is dead,—

Like to hearts that, clinging
Fervent where their first delight was fed,
Move us with untimely singing
Of the hopes whose blossom-time is sped ?

Beauties have their hour,
Safely perched on the Spring-budding tree ;
For the ripened soul is trust and power,
And, beyond, the calm eternity.

THE UTAH EXPEDITION:

ITS CAUSES AND CONSEQUENCES.

[Concluded.]

ON the 3d of July, the Commissioners started on their return to the States. During their stay at Salt Lake City, the doubt which they had been led to entertain of the wisdom of the policy which they were the agents to carry out, had ripened into a firm conviction.

The people who were congregated on the eastern shore of Lake Utah did not begin to repair to their homes until the army had marched thirty or forty miles away from the city ; and even then there was a secrecy about their movements which was as needless as it was mysterious. They returned in divisions of from twenty to a hundred families each. Their trains, approaching the city during the afternoon, would encamp on some creek in its vicinity until midnight, when, if intended for the northern settlements, they would pass rapidly through the streets, or else make a circuit around the city-wall. August arrived before the return was completed.

Morning after morning, one square after another was seen stripped of the board barricades which had sheltered windows and doors from intrusion. In front of every gateway wagons were emptying their loads of household furniture. The streets soon lost their desert-

ed aspect, though for many days the only wayfarers were men,—not a woman being visible, except by chance, to the profane eyes of the invaders. It was near the end of July before a single house was rented except to the intimate associates of the Governor. Up to that time, those Gentiles who did not follow the army to its permanent camp bivouacked on the public squares. By a Church edict, all Mormons were forbidden to enter into business transactions with persons outside their sect without consulting Brigham Young, whose office was beset daily by a throng of clients beseeching indulgences and instruction. Immediately after his return to the city, however, he secluded himself from public observation, never appearing in the streets, nor on the balconies of his mansion-house. He even encompassed his residence with an armed guard.

Gradually, nevertheless, the necessities of the people induced a modification of this system of non-intercourse. The Gentile merchants, who were present with great wagon-trains containing all those articles indispensable to the comfort of life, of which the Mormons stood so much in need, refused to open a single box or bale until they could hire storehouses.

The permission was at length accorded, and immediately the absolute external reserve of the people began to wear away. Both sexes thronged to the stores, eager to supply themselves with groceries and garments; but there they experienced a wholesome rebuff, for which some of them were not entirely unprepared. The merchants refused to receive the paper of the Deseret Currency Association with which the Territory was flooded; and its notes were depreciated instantly by more than fifty per cent. Many of the people were driven to barter cattle and farm-produce for the articles they needed; and for the first time since the establishment of the Church in Utah an audible murmur arose among its adherents against its exactions. The sight of their neglected farms was also calculated to bring the poorer agriculturists to sober reflection. They perceived that the army, which they had been taught to believe would commit every conceivable outrage, was, on the contrary, demeaning itself with extreme forbearance and even kindness toward them, and was supplying an ampler market for the sale of their produce than they had enjoyed since the years when the overland emigration to California culminated. Nevertheless, their regrets, if entertained at all, found no public and concerted utterance. The authority of the Church exacted a sullen demeanor toward all Gentiles.

The 24th of July, the great Mormon anniversary, was suffered to pass without celebration; but its recurrence must have suggested anxious thoughts and bitter recollections to a great part of the population. When they remembered their enthusiastic declaration of independence only one year before, the warlike demonstrations which followed it, the prophecies of Young that the Lord would smite the army as he smote the hosts of Sennacherib, the fever of hate and apprehension into which they had been worked, and contrasted that period of excitement with their present condition, they must, indeed, have found abundant

material for meditation. By the emigration southward they had lost at least four months of the most valuable time of the year. Their families had been subjected to every variety of exposure and hardship. Their ready money had been extorted from them by the Currency Association, or consumed in the expenses of transporting their movables to Lake Utah. And more than all, the fields had so suffered by their absence, that the crops were diminished to at least one-half the yield of an ordinary year. To a community the mass of which lives from hand to mouth, this was a most serious loss.

Almost all agriculture in Utah is carried on by the aid of irrigation. From April till October hardly a shower falls upon the soil, which parches and cracks in the hot sunshine. The settlements are all at the base of the mountains, where they can take advantage of the brooks that leap down through the cañons. They are, therefore, necessarily scattered along the line of the main Wahsatch range, from the Roseaux River, which flows into the Salt Lake from the north, to the Vegas of the Santa Clara,—a distance of nearly four hundred miles. The labor expended in ditching has been immense, but it has been confined wholly to tapping the smaller streams.

By damming the Jordan in Salt Lake Valley and the Sevier in Parawan Valley, and distributing their water over the broad bottom-lands, on which the only vegetation now is wild sage and greasewood, the area of arable ground might be quintupled; and any considerable increase of population will render such an undertaking indispensable; for the narrow strip which is fertilized by the mountain-brooks yields scarcely more than enough to supply the present number of inhabitants. Nowhere does it exceed two or three miles in breadth, except along the eastern shore of Lake Utah, where it extends from the base of the mountains to the verge of the lake.

Almost all cereals and vegetables at-

tain the utmost perfection, rivalling the most luxuriant productions of California. Within the last few years the cultivation of the Chinese sugar-cane has been introduced, and has proved successful. In Salt Lake City considerable attention is paid to horticulture. Peaches, apples, and grapes grow to great size, at the same time retaining excellent flavor. The grape which is most common is that of the vineyards of Los Angeles. In the vicinity of Provo an attempt has been made to cultivate the tea-plant; and on the Santa Clara several hundred acres have been devoted to the culture of cotton, but with imperfect success. Flax, however, is raised in considerable quantity. The fields are rarely fenced with rails, and almost never with stones. The dirt-walls by which they are usually surrounded are built by driving four posts into the ground, which support a case, ten or twelve feet in length, made of boards. This is packed full of mud, which dries rapidly in the intense heat of a summer noon. When it is sufficiently dry to stand without crumbling, the posts are moved farther along and the same operation is repeated.

The country is not dotted with farm-houses, like the agricultural districts of the East. The inhabitants all live in towns, or "forts," as they are more commonly called, each of which is governed by a Bishop. These are invariably laid out in a square, which is surrounded by a lofty wall of mere dirt, or else of adobe. In the smaller forts there are no streets, all the dwellings backing upon the wall, and inclosing a quadrangular area, which is covered with heaps of rubbish, and alive with pigs, chickens, and children. The same stream which irrigates the fields in the vicinity supplies the people with water for domestic purposes. There are few wells, even in the cities. Except in Salt Lake City and Provo, no barns are to be seen. The wheat is usually stored in the garrets of the houses; the hay is stacked; and the animals are herded during the winter in sheltered pastures on the low lands.

AM the people of the smaller towns are agriculturists. In none of them is there a single shop. In Provo there are several small manufacturing establishments, for which the abundant water-power of the Timpanogas River, that tumbles down the neighboring cañon, furnishes great facilities. The principal manufacturing enterprise ever undertaken in the Territory—that for the production of beet-sugar—proved a complete failure. A capital advanced by Englishmen, to the amount of more than one hundred thousand dollars, was totally lost, and the result discouraged foreigners from all similar investments. Rifles and revolvers are made in limited number from the iron tires of the numerous wagons in which goods are brought into the Valley. There are tanneries, and several distilleries and breweries. In the large towns there are many thriving mechanics; but elsewhere even the blacksmith's trade is hardly self-supporting, and the carpenters and shoemakers are all farmers, practising their trades only during intervals from work in the fields.

The deficiency of iron, coal, and wood is the chief obstacle to the material development of Utah. No iron-mines have been discovered, except in the extreme southern portion of the Territory; and the quality of the ore is so inferior, that it is available only for the manufacture of the commonest household utensils, such as andirons. The principal coal-beds hitherto found are in the immediate vicinity of Green River. There are several saw-mills, all run by water-power, scattered among the more densely-wooded cañons; but they supply hardly lumber enough to meet the demand,—even the sugar-boxes and boot-cases which are thrown aside at the merchants' stores being eagerly sought after and appropriated. The most ordinary articles of wooden furniture command extravagant prices.

Nowhere is the absence of trees, the utter desolation of the scenery, more impressive than in a view from the southern shore of the Great Salt Lake. The broad plain which intervenes between its mar-

gin and the foot of the Wahsatch Range is almost entirely lost sight of; the mountain-slopes, their summits flecked with snow, seem to descend into water on every side except the northern, on which the blue line of the horizon is interrupted only by Antelope Island. The prospect in that direction is apparently as illimitable as from the shore of an ocean. The sky is almost invariably clear, and the water intensely blue, except where it dashes over fragments of rock that have fallen from some adjacent cliff, or where a wave, more aspiring than its fellows, overreaches itself and breaks into a thin line of foam. Through a gap in the ranges on the west, the line of the Great Desert is dimly visible. The beach of the lake is marked by a broad belt of fine sand, the grains of which are all globular. Along its upper margin is a rank growth of reeds and salt grass. Swarms of tiny flies cover the surface of every half-evaporated pool, and a few white sea-gulls are drifting on the swells. Nowhere is there a sign of refreshing verdure except on the distant mountain-sides, where patches of green grass glow in the sunlight among the vast fields of sage.

The buildings throughout the entire Territory are, almost without exception, of adobe. The brick is of a uniform drab color, more pleasing to the eye than the reddish hue of the adobes of New Mexico or the buff tinge of many of those in California. In size it is about double that commonly used in the States. The clay, also, is of very superior quality. The principal stone building in the Territory is the Capitol, at Fillmore, one hundred and fifty miles south of Salt Lake City. The design of the architect is for a very magnificent edifice in the shape of a Greek cross, with a rotunda sixty feet in diameter. Only one wing has been completed, but this is spacious enough to furnish all needful accommodation. The material is rough-hammered sandstone, of an intense red.

The plan of Salt Lake City is an index to that of all the principal towns. It

is divided into squares, each side of which is forty rods in length. The streets are more than a hundred feet wide, and are all unpaved. There is not a single sidewalk of brick, stone, or plank. The situation is well chosen, being directly at the foot of the southern slope of a spur which juts out from the main Wahsatch range. Less than twenty miles from the city, almost overshadowing it, are peaks which rise to the altitude of nearly twelve thousand feet, from which the snow of course never disappears. But during the summer months, when scarcely a shower falls upon the valley, its drifts become dun-colored with dust from the friable soil below, and present an aspect similar to that of the Pyrenees at the same season. During most of the year, the rest of the mountains which encircle the Valley are also capped with snow. The residences of Young and Kimball are situated on almost the highest ground within the city-limits, and the land slopes gradually down from them to the south, east, and west. This inclination suggested the mode of supplying the city with water. A mountain-brook, pure and cold, bubbling from under snow-drifts, is guided from this highland down the gently sloping streets in gutters adjoining both the sidewalks. A municipal ordinance imposes severe penalties on any one who fouls it. Young's buildings and gardens occupy an entire square, ten acres in extent, as do also Kimball's. They consist, first, of the Mansion, a spacious two-storied building, in the style of the Yankee-Grecian villas which infest New England towns, with piazzas supported by Doric columns, and a cupola which is surmounted by a beehive, the peculiar emblem of the Mormons, although there is not a single honey-bee in the Territory. This, like all its companions, is of adobe, but it is coated with plaster, and painted white. Next to it is a small building, used formerly as an office, in which the temporal business of the Governor was transacted. By its side stands another office, on the same model, but on a larger scale, devoted to the business of the President of the

Church. These are connected by passage-ways both with the Mansion and with the Lion-House, which is the most westerly of the group, and is the finest building in the Territory, having cost nearly eighty thousand dollars. Like both the offices, it stands with a gable-toward the street, and the plaster with which it is covered has a light buff tinge. The architecture is Elizabethan. Above a porch in front is the figure of a recumbent lion, hewn in sandstone. On each of the sides, which overlook the gardens, ten little windows project from the roof just above the eaves. The whole square is surrounded by a wall of cobblestones and mortar, ten or twelve feet in height, strengthened by buttresses at intervals of forty or fifty feet. Massive plank gates bar the entrances. In one corner is the Tithing-Office, where the faithful render their reluctant tribute to the Lord. Only the swift city-creek intervenes between this square and Kimball's, which is encompassed by a similar wall. His buildings have no pretensions to architectural merit, being merely rough piles of adobe scattered irregularly all over the grounds.

The Temple Square is in the immediate neighborhood, and is of the same size. It is inclosed by a wall even more massive than the others, plastered and divided into panels. Near its southwestern corner stands the Tabernacle, a long, one-storied building, with an immense roof, containing a hall which will hold three thousand people. There the Mormon religious services are conducted during the winter months; but throughout the summer the usual place of gathering to listen to the sermons is in "boweries," so called, which are constructed by planting posts in the ground and weaving over them a flat roof of willow-twigs. An excavation near the centre of the square, partially filled with dirt previously to the exodus to Provo, marks the spot where the Temple is to rise. It is intended that this edifice shall infinitely surpass in magnificence its predecessor at Nauvoo. The design

purports to be a revelation from heaven, and, if so, must have emanated from some one of the Gothic architects of the Middle Ages whose taste had become bewildered by his residence among the spheres; for the turrets are to be surmounted by figures of sun, moon, and stars, and the whole building bedecked with such celestial emblems. Only part of the foundation-wall has yet been laid, but it sinks thirty feet deep and is eight feet broad at the surface of the ground. Its length, according to the heavenly plan, is to be two hundred and twenty feet, and its width one hundred and fifty feet. Beside the Tabernacle and the incipient Temple, the only considerable building within the square is the Endowment-House, where those rites are celebrated which bind a member to fidelity to the Church under penalty of death, and admit him to the privilege of polygamy.

The other principal buildings within the city are the Council-House, a square pile of sandstone, once used as the Capitol,—and the County Court-House, yet unfinished, above which rises a cupola covered with tin. Most of the houses in the immediate vicinity of Young's are two stories high, for that is the aristocratic quarter of the town. In the outskirts, however, they never exceed one story, and resemble in dimensions the innumerable cobblers-shops of Eastern Massachusetts.

None of the streets have names, except those which bound the Temple Square and are known as North, South, East, and West Temple Streets, and also the broad avenue which receives the road from Emigration Cañon and is called Emigration Street. Except on East Temple or Main Street, which is the business street of the city, the houses are all built at least twenty feet back from the sidewalk, and to each one is attached a considerable plot of ground. There is no provision for lighting the streets at night. The cotton-wood trees along the borders of the gutters have attained a considerable growth during the eight or nine years since they were plant-

ed, and afford an agreeable shade to all the sidewalks.

Around a great portion of the city stretches a mud wall with embrasures and loopholes for musketry, which was built under Young's direction in 1853, ostensibly to guard against Indian attacks, but really to keep the people busy and prevent their murmuring. To the east of this runs a narrow canal, which was dug by the voluntary labor of the Saints, nearly fifteen miles to Cottonwood Creek, for the transportation of stone to be used in building the Temple.

Just outside the city-limits, near the northeastern corner of the wall, lies the Cemetery, on a piece of undulating ground traversed by deep gullies, and unadorned even by a solitary tree,—the only vegetation sprouting out of its parched soil being a melancholy crop of weeds interspersed with languid sunflowers. The disproportion between the deaths of adults and those of children, which has been a subject for comment by every writer on Mormonism, is peculiarly noticeable there. Most of the graves are indicated only by rough boards, on which are scrawled rudely, with pencil or paint, the names and ages of the dead, and usually also verses from the Bible and scraps of poetry; but among all the inscriptions it is remarkable that there is not a single quotation from the "Book of Mormon." The graves are totally neglected after the bodies are consigned to them. Nowhere has a shrub or a flower been planted by any affectionate hand, except in one little corner of the inclosure which is assigned to the Gentiles, between whose dust and that of the Mormons there seems to exist a distinction like that which prevails in Catholic countries between the ashes of heretics and those of faithful churchmen. The mode of burial is singularly careless. A funeral procession is rarely seen; and such instances are mentioned by travellers as that of a father bearing to the grave the coffin of his own child upon his shoulder.

The interiors of the houses are as neat

as could be expected, considering the extent of the families. Very often, three wives, one husband, and half-a-dozen children will be huddled together in a hovel containing only two habitable rooms,—an arrangement of course subversive of decency. Few people are able to purchase carpets, and their furniture is of the coarsest and commonest kind. There are few, if any, families which maintain servants. In that of Brigham Young, each woman has a room assigned her, for the neatness of which she is herself responsible;—Young's own chamber is in the rear of the office of the President of the Church, upon the ground floor. The precise number of the female inmates can often be computed from the exterior of the houses. These being frequently divided into compartments, each with its own entrance from the yard, and its own chimney, and being generally only one story in height, the number of doors is an exact index to that of residents.

The domestic habits of the people vary greatly according to their nativity. Of the forty-five thousand inhabitants of the Territory, at least one-half are immigrants from England and Wales,—the scum of the manufacturing towns and mining districts, so superstitious as to have been capable of imbibing the Mormon faith,—though between what is preached in Great Britain and what is practised in America there exists a wide difference,—and so destitute in circumstances as to have been incapable of deteriorating their fortunes by emigration. Possibly one-fifth are Danes, Swedes, and Norwegians. This allows a remainder of three-tenths for the native American element. An Irishman or a German is rarely found. Of the Americans, by far the greater proportion were born in the Northeastern States; and the three principal characters in the history of the Church—Smith, Young, and Kimball—all originated in Vermont, but were reared in Western New York, a region which has been the hot-bed of American *isms* from the discovery of the Golden Bible to the outbreak of

the Rochester rappings. This American element maintains, in all affairs of the Church, its natural political ascendancy. Of the twelve Apostles only one is a foreigner, and among the rest of the ecclesiastical dignitaries the proportion is not very different.

The Scandinavian Mormons are very clannish in their disposition. They occupy some settlements exclusively, and in Salt Lake City there is one quarter tenanted wholly by them, and nicknamed "Denmark," just as that portion of Cincinnati monopolized by Germans is known as "over the Rhine." Like their English and Welsh associates, they belonged to the lowest classes of the mechanics and peasantry of their native countries. They are all clownish and brutal. Their women work in the fields. In their houses and gardens there is no symptom of taste, or of the recollection of former and more innocent days; while in every cottage owned by Americans there is visible, at least, a clock, or a pair of China vases, or a rude picture, which once held a similar position in some farm-house in New England.

It is not intended to discuss here the cardinal points of the Mormon faith, for the subject is too extensive for the limits of this article. A great misapprehension, however, prevails concerning polygamy, that it was one of the original doctrines of the Church. On the contrary, it was expressly prohibited in the Book of Mormon, which declares:—

"Behold, David and Solomon truly had many wives and concubines, which thing was abominable before me, saith the Lord. . . . Wherefore hearken to the word of the Lord: There shall not any man among you have save it be one wife, and concubines he shall have none; for I, the Lord God, delight in the chastity of women."—p. 118.

Up to this date, there have been four eras in the history of polygamy among the Mormons: the first, from about 1833 to 1843, during which it was practised stealthily only by those Church leaders to whom it was considered prudent to

impart the secret; the second, from 1843 to 1852, during which its existence was known to the Church, but denied to the world; the third, from 1852 to 1856, during which it was left to the discretion of individuals whether to adopt its practice or not; and the fourth, since 1856, when its acceptance was inculcated as essential to happiness in this world and salvation in the next. It was the inevitable tendency of Mormonism, like every other religious delusion, from the advent of John of Leyden to that of the Spiritualists, to disturb the natural relation of the sexes under the Christian dispensation. The mystery surrounding the subject constituted the most attractive charm of the religion, both to the initiated and to those who were seeking to be admitted to the secrets of the Endowment,—for the Endowed alone possess the privilege of a plurality of wives. But until the community had become firmly fixed in Utah, no one dared to justify or even to proclaim the doctrine. At the time of the passage of the Organic Act of the Territory, in the autumn of 1850, and repeatedly during the next two years, prominent Mormons at Washington and New York denied its existence, with the most solemn asseverations. It was on Sunday, August 29th, 1852, that it was openly avowed at Salt Lake City,—Brigham Young on that day producing the copy of a revelation, pretended to have been received by Smith on the 12th of July, 1843, which annulled the monogamic injunctions of the Book of Mormon, and stating, that, "although the doctrine of polygamy has not been preached by the elders, the people have believed in it for years." Upon the same occasion, another doctrine was urged,—that human beings upon earth propagate merely bodies, the souls which inhabit them being begotten by spirits in heaven.

The number of the wives of many of the principal Mormons has been greatly exaggerated. Attached to Young's establishment in Salt Lake City, there are only sixteen. His first wife occupies the Mansion-House exclusively, while the

others are quartered in the Lion-House. Besides these, he has probably fifty or sixty more, scattered all over the Territory, and in the principal cities of the United States and of Great Britain. His living children do not exceed thirty in number. Kimball's wives, resident in Salt Lake City, are quite as numerous as Young's, and his children even more so. Both of them aim to reproduce the domestic life of the Biblical patriarchs; and within the squares which they occupy their descendants dwell also, with their wives and progeny, all of them acknowledging the control of the head of the family. The harems of very few of the Church dignitaries approach these in magnitude. The extent of the practice of polygamy cannot be determined by a residence in Salt Lake City alone, for it is there that those Church officers congregate whose wealth enables them to maintain large families. As the traveller journeys northward or southward, he finds the instances diminish in almost exact proportion to his remoteness from the central ecclesiastical influence. There is even a sect of Mormons, called Gladdenites, after their founder, one Gladden Bishop, who deny the right of Young to supreme authority over the Church, and discountenance polygamy. No computation of their number can be made, for few of them dare avow their heresy, on account of the persecution which is the invariable result. The leaders of this sect maintain that a majority of the married men in Utah have but one wife each, and their assertion has never been controverted.

One of the most monstrous results of the practice is the indifference with which an incestuous connection is tolerated. The cohabitation, with the same man, of a mother, and her daughter by a previous marriage, is not unfrequent; and there are other instances even more disgusting. One or two of them will exemplify the character of the whole. One George D. Watt, an Englishman, residing at Salt Lake City, has for his fourth wife his own half-sister, who had been pre-

viously divorced from Brigham Young; and one Aaron Johnson, the Bishop of the town of Springville, on Lake Utah, has seven wives, four of whom are sisters, and his own nieces. Young himself has declared in print, that he looks forward to the time when his son by one wife shall marry his daughter by another. Marriages also are effected with girls who are mere children. Accustomed from their cradles to sights and sounds calculated to impart precocious development, they mature rapidly, and few of them remain single after attaining the age of sixteen. They look around for husbands, and understand, that, if they marry young men and become first wives, in course of time other wives will be associated with them; and they conclude, therefore, that it is as well for themselves to unite with some Bishop or High-Priest, with perhaps half-a-dozen wives already, who is able to feed his family well and clothe them decently; so they plunge into polygamy at once. Another result of the practice is universal obscenity of language among both sexes. The published sermons of the Mormon leaders are utterly vile in this respect, although they are somewhat expurgated before being printed. They consider no language profane from which the name of the Deity is excepted.

There is, unquestionably, much unhappiness in families where polygamy prevails,—daily bickering, jealousies, and heart-burnings,—but it is carefully concealed from the knowledge of the public. If domestic troubles become so aggravated as to be unendurable, recourse is usually had to Brigham Young for a divorce. There are women in Salt Lake City who have been married and divorced half-a-dozen times within a year. The first wife maintains a supremacy over all the others. On the occasion of her marriage, a civil magistrate usually officiates, and the rite of "sealing" is afterwards administered by Young. By the civil process, in the cant language of the Mormons, she is bound to her husband "for time," and by the ecclesiastical sol-

emnization "for eternity." Every wife taken after the first is called a "spiritual," and is "sealed" ecclesiastically only, not civilly. It follows, as a legitimate consequence, that the first wife of one man "for time" may be the "spiritual" wife of another man "for eternity." The power of sealing and unsealing is vested in the Head of the Church, which, however, he may and does assign, with certain limitations, to deputies. The ceremony is performed in a room in the Mansion-House within Brigham's square, which is furnished with an altar and kneeling-benches. In every instance of divorce, the woman is supplied with a printed certificate of the fact, for which a fee of ten or eleven dollars is exacted. When a polygamist dies, it becomes the duty of his "next friend" to care for his wives. Thus, when Young became the President of the Church, he succeeded to all the widows of Joseph Smith.

Every year some modification of the system is effected, which tends to increase still further the confusion in the relations of the sexes. The latest is the doctrine, (which, like polygamy in its earlier stages, is believed, but not avowed,) that absence is temporary death, so far as concerns the transference of wives. This is intended to apply to the two or three hundred missionaries who are dispatched yearly to all parts of the globe, from Stockholm to Macao. It is astonishing that these missionary efforts, which have been pursued with unremitting zeal for the last twenty years, should not have ingrafted upon Mormonism some degree of that refinement which is supposed to result from travel. On the contrary, they seem to have elaborated the natural brutality of the Anglo-Saxon character; and especially with regard to polygamy, their effect has been to acquaint the people of Utah with the grossest features of its practice in foreign lands, and encourage them to imitation. Every Mormon, prominent in the Church, however illiterate in other respects, is thoroughly acquainted with the extent and characteristics of polygamy in Asiatic countries, and pre-

pared to defend his own domestic habits, in argument, by historical and geographical references. Not one of their missionaries has ever been admitted to intercourse with the higher classes of European society. Their sphere of labor and acquaintance has been entirely among those whom they would term the lowly, but who might also be called the credulous and vulgar. The abuse of a knowledge of the machinery of the Masonic order—from which they have been formally excluded—is one of the least evil of their practices, not only abroad, but at home. Of the Endowment, one apostate Mormon has declared that "its signs, tokens, marks, and ideas are plagiarized from Masonry"; and it was a notorious fact, that every one of the Mormon prisoners at the camp at Fort Bridger was accustomed to endeavor to influence the sentinels at the guard-tents by means of the Masonic signs.

This cursory review of the domestic condition of the Mormons would not be complete without some allusion to the Indians who infest the whole country. In the North, having their principal village at the foot of the Wind River Mountains, in the southeastern corner of Oregon, is the tribe of Mountain Snakes or Shoshonees, and the kindred tribe of Bannocks. Throughout all the valleys south of Salt Lake City are the numerous bands of the great tribe of Utahs. Still farther south are the Pyides. The Snakes are superior in condition to any of the others; for, during a portion of the year, they have access to the buffalo, which have not crossed the Wahsatch Range into the Great Basin, within the recollection of the oldest trapper. The only wild animals common in the country of the Utahs are the hare, or "jackass-rabbit," the wild-cat, the wolf, and the grizzly bear. There are few antelope or elk. Trout abound in the mountain-brooks and in Lake Utah. In the Salt Lake, as in the Dead Sea, there are no fish. Before the advent of the Mormons, the habits of all the Utah bands were very degraded. No agency had been estab-

lished among them. They had few guns and blankets. For several years they were engaged in constant hostilities with the people of the young and feeble settlements,—their own method and implements of warfare improving steadily all the while. Ultimately, however, the Mormons inaugurated a system of Indian policy, which was highly successful. They propagated their religion among the Utahs, baptized some of the most prominent chiefs into the Church, fed and clothed them, and thereby acquired an ascendancy over most of the bands, which they attempted to use to the detriment of the army during the winter of 1857–8, but without success. Brigham Young, being vested with the superintendence of Indian affairs, during his entire term of service as Governor, abused the functions of that office. He taught the tribe, that there was a distinction between “Americans” and “Mormons,”—and that the latter were their friends, while they were free to commit any depredations on the former which they might see fit. These infamous teachings were counteracted with considerable success by Dr. Hurt, the Indian Agent, to whom allusion has frequently been made; but it was impossible wholly to neutralize their effect. Some of the Mormons even took squaws for spiritual wives; and in all the settlements, from Provo to the Santa Clara, there are scores of half-breed children, acknowledging half-a-dozen mothers, some white, some red. The Utahs, though a beggarly, are a docile tribe. Several Government farms have now been established among them, and they display more than ordinary aptitude for work. But they require to be spurred to regular labor. None of the charges which have been preferred against the Mormons, of direct participation in the murder of Americans by the Indians in the southern portion of the Territory, have ever been substantiated by legal evidence; but no person can become familiar with the relations which they sustain to those tribes, without attaching to them some degree of

credibility. The most noted instances were the slaughter of Captain Gunnison and his exploring party, near Lake Sevier, in October, 1853; and the horrible massacre of more than a hundred emigrants on their way to California, at the Mountain Meadows, still farther south, in September, 1857, from which only those children were spared who were too young to speak.

The history of events in Utah since the encamping of the army in Cedar Valley and the return of the Mormons to the northern settlements is too recent to need to be recounted. It has been established by satisfactory experiments, that law is powerless in the Territory when it conflicts with the Church. No Gentile, whose property was confiscated during the rebellion, has yet obtained redress. The legislature refuses to provide for the expenses of the District Courts while enforcing the Territorial laws. The grand juries refuse to find indictments. The traverse juries refuse to convict Mormons. The witnesses perjure themselves without scruple and without exception. The unruly crowd of camp-followers, which is the inseparable attendant of an army, has concentrated in Salt Lake City, and is in constant contact and conflict with the Mormon population. An apprehension prevails, day after day, that the presence of the army may be demanded there to prevent mob-law and bloodshed. The Governor is alien in his disposition to most of the other Federal officers; and the Judges are probably already on their way to the States, prepared to resign their commissions. The whole condition of affairs justifies a prediction made by Brigham Young, June 17th, 1855, in a sermon. in which he declared:—

“Though I may not be Governor here, my power will not be diminished. No man they can send here will have much influence with this community, unless he be the man of their choice. Let them send whom they will, it does not diminish my influence one particle.”

The consequences of the Expedition, therefore, have not corresponded to the original expectation of its projectors. So far as the political condition of the Territory is concerned, the result, filtered down, amounts simply to a demonstration of the impolicy of applying the doctrine of Squatter Sovereignty as a rule for its government. The administration of President Polk was an epoch in the history of the continent. By the annexation of Texas a system of territorial aggrandizement was inaugurated; and the treaty of Guadalupe Hidalgo, by which California, Utah, and New Mexico were acquired, was a legitimate result. Every child knows that the tendency is toward the acquisition of all North America. But the statesmen who originated a policy so grand did not stop to establish a system of Territorial government correspondent to its necessities. The character of such a Territorial policy is now the principal subject upon which the great parties of the nation are divided; and its development will constitute the chief political achievement of the generation. On one side, it is proposed to leave each community to work out its own destiny, trusting to Providence for the result. On the other, it is contended, that the only safe doctrine is, that supreme authority over the Territories resides in Congress, which it is its duty to assign to such hands and in such degrees as it may deem expedient, with a view to create homogeneous States; that the same influences which moulded Minnesota into a State homogeneous to Massachusetts might operate on Cuba, or Sonora and Chihuahua, without avail; and that to various districts the various methods should be applied which a father would employ to secure the obedience and welfare of his children.

At the very outset, the Territory of Utah now presents itself as a subject for the application of the one system or the other. To all intents and purposes, the Mormons are proved to be a people more foreign to the population of the States than the inhabitants of Cuba or Mexico.

Alien in great part by birth, and entirely alien in religion, there never can occur in the history of the country an instance of a community harder to govern, with a view to adapt it to harmonious association with the States on the Atlantic and the Pacific. It is undeniably demonstrated that it is unsafe to trust it to administer a government in accordance with republican ideas; for it acknowledges a higher law than even the human conscience, in the will of a person whom it professes to believe a vicegerent of Divinity, and in obedience to whom perjury, robbery, incest, and even murder, may be justifiable,—for his commands are those of Heaven. It is obvious that it is fruitless to anticipate fair dealing from a people professing such doctrines; and the result has shown, that, in transactions with Mormons, even under oath, no one who does not acknowledge a standard of religious belief similar to their own can count upon justice any farther than they may think it politic to accord it. The army is, indeed, placed in a position to suppress instantaneously another forcible outbreak; but everybody is aware that there are means of annulling the operation of law quite as effectually as by an uprising in arms. Recent proceedings in the courts of the extreme Southern States have caused this fact to be keenly appreciated. The pirates who sailed the slavers "Echo" and "Wanderer" yet remain to be punished. So far as South Carolina and Georgia are concerned, the law declaring the slave-trade piracy is a dead letter; and the sentiment which prevails toward it in Charleston and Savannah is an imperfect index of that which is manifested at Salt Lake City toward all national authority.

The legislation of Utah has been conducted with a view to precisely the condition of affairs which now exists, and the Territorial statute-book shows that the transfer of executive power from Brigham Young had long been anticipated. It is impracticable to adduce, in this place, proof of the fact *in extenso*; but a brief enumeration of some of

the principal statutes will indicate the character of the entire code. An act exists incorporating the Mormon Church with power to hold property, both real and personal, to an indefinite extent, exempt from taxation, coupled with authority to establish laws and criteria for its safety, government, comfort, and control, and for the punishment of all offences relating to fellowship, according to its covenants. By this act the Church is invested with absolute and perpetual sovereignty. Under it the whole system of polygamy is conducted, for plural marriages are sanctioned by the covenants; the Danite organization is authorized, for it is instituted for the comfort and control of the Church, and the punishment of offences relative to fellowship; the burden of the taxes is thrown in a yearly increasing ratio upon Gentiles, for the Church property exempted from taxation amounts already to several millions of dollars, and increases every day; and the treasonable rites of the Endowment are celebrated, and the inferior members of the Church tithed and pillaged, for the benefit of the First Presidency and the Twelve Apostles. Acts also exist legalizing negro and Indian slavery. There are within the Territory at the present time not more than fifty or sixty negroes, but there are several hundred Indians, held in servitude. These are mostly Pygmy, into whose country some of the Utah bands make periodical forays, capturing their young women and children, whom they sell to the Navajoes in New Mexico, as well as to the Mormons. There are other acts, which rob the United States judges of their jurisdiction, civil, criminal, and in equity, and confer it on the Probate Courts; which forbid the citation of any reports, even those of the Supreme Court of the United States, during any trial; which regulate the descent of property so as to include the issue of polygamic marriages among the legal heirs; which withdraw from exemption from attachment the entire property of persons suspected of an intention to leave the Territory; which authorize

the invasion of domiciles for purposes of search, upon the simple order of any judicial officer; which legalize the rendition of verdicts in civil cases upon the concurrence of two-thirds of the jurors; which command attorneys to present in court, under penalty of fine and imprisonment, in all cases, every fact of which they are cognizant, "whether calculated to make against their clients or not"; which restrict the institution of proceedings against adulterers to the husband or the wife of one of the guilty parties; which levy duties on all goods imported into the Territory for sale; which abolish the freedom of the ballot-box, by providing that each vote shall be numbered, and a record kept of the names of the electors with the numbers attached, which, together with the ballots, shall be preserved for reference; and which empower the county courts to impose taxes to an indefinite amount on whosoever they may please, for the erection of fortifications within their respective jurisdictions. But the most extraordinary and unconstitutional series of acts—no less than sixty in number—exists with regard to the primary disposal of the soil, with which the Territorial legislature is expressly forbidden by the Organic Act to interfere. These pretend to confer upon Church dignitaries, and especially on Brigham Young and his family, tracts of land probably amounting in the aggregate to more than ten thousand square miles, as well as the exclusive right to establish bridges and ferries over the principal rivers in the Territory, —together with the exclusive use of those streams flowing down from the Wahsatch Mountains which are most valuable for irrigating and manufacturing purposes. The virtual control of the settlement of the eastern portion of Utah is thus vested in the Church; for these grants include almost all the lands which are immediately valuable for occupation. After a glance at a list of them, it is not hard to understand the causes of the great disparity in the distribution of wealth among the Mormons. They have been so al-

lotted as to benefit a very few at the expense of the whole people; and they are protected by a terrorism which no one dares to confront in order to challenge their validity. The majority of the population are ignorant of their rights,—and too pusillanimous to maintain them against the hierarchy, if they were not. They therefore contribute to its coffers not merely their tithing, but heavy exactions also for grazing their cattle on pastures to which they themselves have just as much title as the nominal proprietors, and for grinding their grain and purchasing their lumber at mills on streams which are of right common to all the settlers on their banks.

From the Utah Expedition, then, it has become patent to the world, if it is not to ourselves, that the Mormons are unwilling to administer a republican form of government, if not incapable of doing so. The author of the letter recently addressed by "A Man of the Latin Race" to the Emperor Napoleon, on the subject of French influence in America, comments especially upon this fact as symptomatic of the disintegration of this republic; and allusion is made to it in every other foreign review of our political condition. It is obviously inconsistent with our national dignity that a remedy should not be immediately applied; but when we seek for such, only two courses of action are discernible, in the maze of political quibbles and constitutional scruples that at once suggest themselves. One is, to repeal the Organic Act and place the Territory under military control; the other is, to buy the Mormons out of Utah, offering them a reasonable compensation for the improvements they have made there, as also transportation to whatever foreign region they may select for a future abode.

The embarrassments which might result from the adoption of the former course are obvious. It would be attended with immense expense, and would embitter the Mormons still more against the National Government; and it would also deter Gentiles from emigrating to

a region where three thousand Federal bayonets would constitute the sole guaranty of the security of their persons and property.

The other course is not only practicable, but humane and expedient. During his whole career, Brigham Young committed no greater mistake than when he settled in Utah a community whose recruits are almost without exception drawn from foreign lands; for, since the removal from Illinois, every attempt to propagate Mormonism in the American States has been a failure. Every avenue of communication with Utah is necessarily obstructed. No railroad penetrates to within eleven hundred miles of Salt Lake Valley. There is no watercourse within four hundred miles, on which navigation is practicable. Neither the Columbia nor the Colorado empties into seas bordered by nations from which the Mormons derive accessions; and the length of a voyage up the Mississippi, Missouri, and Yellowstone forbids any expectation that their channels will ever become a pathway to the centre of the continent. The road to Utah must always lead overland, and travel upon it is the more expensive from the fact that no great passenger-transportation companies exist at either of the termini. Each family of emigrants must provide its own outfit of provisions, wagons, and oxen, or mules. Through the agency of what is called the Perpetual Emigration Fund of the Church, the capital of which amounts to several millions of dollars,—which was instituted professedly to befriend, but really to fleece the foreign converts,—few Englishmen arrive at Salt Lake City without having exhausted their own means and incurred an amount of debt which it requires the labor of many years to discharge. The physical sufferings of the journey, also, are severe and often fatal. The bleak cemetery at Salt Lake City contains but a small proportion of the Mormon dead. Along the thousand miles of road from the Missouri River to the Great Lake, there stand, thicker than milestones, memorials of those who

failed on the way. A rough board, a pile of stones, a grave ransacked by wolves, crown many a swell of the bottom-lands along the Platte; and across the broad belt of mountains there is no spot so desolate as to be unmarked by one of these monuments of the march of Mormonism.

As these difficulties of transit subside under the surge of population toward the new State of Oregon, or to the gold-diggings on the head-waters of the South Fork of the Platte, an element must permeate Utah which would be fatal to the supremacy of the Church. That depends, as has been so often repeated, upon isolation. Already the presence of the army with its crowd of unruly dependents has begun to disturb it. In the trail of the troops, like sparks shed from a rocket, a legion of mail-stations and trading-posts have sprung up, which materially facilitate communication with the East. A horseman, starting now from Fort Leavenworth, with a good animal, can ride to Salt Lake City, sleeping under cover every night; while in July, 1857, when the army commenced its march from the frontier, there were stretches of more than three hundred miles without a single white inhabitant. On the west, under the shadow of the Sierra Nevada, there is a settlement of several thousand Gentiles in Carson Valley, who, though nominally under the same Territorial government with the Mormons, have no real connection with them, politically, socially, or commercially, and are petitioning Congress for a Territorial organization of their own. A telegraphic wire has already wound its way over the sierra among them, and will soon palpitate through Salt Lake City in its progress toward the Atlantic.

Brigham Young perceives this inevitable advance of Christian civilization toward his stronghold, as clearly as the most unprejudiced spectator. No one is better aware than himself, that, if the great industrial conception of the age, the Pacific Railroad, shall ever begin to be realized, the first shovelful of dirt thrown

on its embankments will be the commencement of the grave of his religion and authority. Among the projects with which his brain is busy is that of yet another exodus; and it must be undertaken speedily, if at all,—for a generation is growing up in the Church with an attachment for the land in which it was reared. The pioneer of the faith, who were buffeted from Ohio to Missouri, from Missouri to Illinois, and from Illinois to the Rocky Mountains, are dwindling every year. Their migrations have been so various, that no local sentiment would influence them against another removal. Such a sentiment, if it exists at all among them, is not for Utah, but for Missouri, where they believe that the capital will be founded of that kingdom in which the Church in the progress of ages will unite the world. They dropped upon the shores of the Salt Lake in 1847, like birds spent upon the wing, only because they could not fly farther.

Two regions have been suggested for the ultimate resort of the Mormons: one, the Mosquito Coast in Central America; the other, the Island of Papua or New Guinea, among the East Indies. During the winter, while the army lay encamped at Fort Bridger, Colonel Kinney, the colonizing adventurer, endeavored to communicate from the East to Brigham Young an offer to sell to the Church several millions of acres of land on the Mosquito Coast, of which he purports to be the proprietor. His agent, however, reached no farther than Green River. But during the spring of 1858, other agents, dispatched from California, were more successful in reaching Salt Lake Valley. They were hospitably received by the Mormons, but Young declined to enter into the negotiation. The other scheme—that for an emigration to Papua—originated at Washington during the same winter. It was eagerly seized upon by Captain Walter Gibson, the same who was once imprisoned by the Dutch in Java. He put himself into communication on the subject with Mr. Bernhisel, the Mormon delegate to Con-

gress, who appeared to regard the plan with favor. After it was developed, as a step preliminary to transmitting it to Utah for consideration, Mr. Bernhisel waited upon the President of the United States in order to ascertain whether the coöperation of the National Government in the undertaking could be expected. The reply of Mr. Buchanan was fatal to the project, which he discountenanced as a vague and wild dream.

Nevertheless, it may well be considered whether the movement toward Utah appeared any less Quixotic in 1846 than does the idea of an emigration to Papua now. On that island the Mormons would encounter no such obstacles to material prosperity as their indomitable industry has already conquered in Utah. They would find a fertile soil, a propitious climate, and a native population which could be trained to docility. Transplanted thither, they would cease to be a nuisance to America, and would become benefactors to the world by opening to commerce a region now valueless to Christendom, but of as great natural capacities as any portion of the globe. The expense of their migration need not exceed the amount already expended upon the Army of Utah, together with that necessary to maintain it in its present position for the next five years. Into the seats which they would relinquish on the border of the Salt Lake a sturdy population would pour from the Valley of the Mississippi, and develop an intelligent, Christian, and Republican State. That portion of the Mormons which would not follow the fortunes of the Church beyond the seas would soon become submerged, and the last vestige of its religion and peculiar domestic life would disappear speedily and forever from the continent.

For that consummation every genuine Christian must fervently pray. If the Message in the Book of Mormon be, as one of its own Apostles has asserted, indeed "such, that, if false, none who persist in believing it can be saved," the sooner this nation washes its hands of responsibility for its toleration, the better for its credit in history. The Constitution, to be sure, denies to Congress the power to pass laws prohibiting the free exercise of religion; but it is the most monstrous nonsense to argue that the Federal Government is bound thereby to connive at polygamy, perjury, incest, and murder. There are principles of social order which constitute the political basis of every state in Christendom, that are violated by the practices of the Mormon Church, and which this Republic is bound to maintain without regard to any pretence that their transgressors act in pursuance of religious belief. Thirty years ago, no other doctrine would have occurred to the mind of an American statesman. It is only the special-pleadings and constitutional hair-splittings by which Slavery has been forced under national protection, that now impede Congressional intervention in the affairs of Utah. The Christian Church of the United States, also, has a duty to perform toward the Mormons, which has long been neglected. While its missionaries have been shipped by the score to India and China, it has been blind to the growth, upon the threshold of its own temple, of a pagan religion more corrupt than that of the Brahmin. Never once has a Christian preacher opened his lips in the valleys of Utah; and yet the surplice of a Christian priest would be a sight more portentous to the Mormon, on his own soil, than the bayonet of the Federal soldier.

BULLS AND BEARS.

[Continued.]

CHAPTER XXIV.

THE next day, Monroe went with the artist to good Mr. Holworthy, and proposed to undertake the task of instructing a school. The preliminaries were speedily arranged: he was to receive a small weekly stipend, enough, with prudence, to meet his household expenses, and was to commence at once. Both of the gentlemen accompanied him to the quarter where his labor was to begin. A large room was hired in a rickety and forlorn-looking house; the benches for the scholars and a small desk and chair were the only furniture. And such scholars!—far different from the delicate, curled darlings of the private schools. The new teacher found his labor sufficiently discouraging. It was nothing less than the civilization of a troop of savages. Everything was to be done; manners, speech, moral instincts, were all equally depraved. They were to be taught neatness, respect, truth-telling, as well as the usual branches of knowledge. It was like the task of the pioneer settler in the wilderness, who must uproot trees, drain swamps, burn briars and brambles, exterminate hurtful beasts, and prepare the soil for the reception of the seeds that are to produce the future harvest. We leave him with his charge, while we attend to other personages of our story.

Mr. Sandford and his sister, upon leaving their house, took lodgings, and then began to cast about them for the means of support. The money on which he had relied was gone. His credit was utterly destroyed, and he had no hope of being reinstated in his former position. The only way he could possibly be useful in the street was by becoming a curbstone broker, a go-between, trusted by neither borrower nor lender, and earning

a precarious livelihood by commissions. Even in that position he felt that he should labor under disadvantages, for he knew that his course had been universally condemned. It was a matter of every-day experience for him to meet old acquaintances who looked over him, or across the street, or in at shop-windows, to avoid recognition. And the half-patronizing, half-contemptuous nods he did receive were far worse to bear than downright cuts.

To a man out of employment, proscribed, marked, there is nothing so terrible as the *impenetrability* of the close ranks of society around him. Every busy man seems to have found his place; each locks step with his neighbor, and the vast procession moves on. Once out of the serried order, the unhappy wretch can never resume his position. He finds himself the fifth wheel of a coach; there is nothing for him to do,—no place for him at the bountiful board where others are fed. He may starve or drown himself, as he likes; the world has no use for him, and will not miss him. What Sandford felt, as he walked along the streets, may well be imagined. If he had not been supported by the indomitable courage and assurance of his sister, he would have sunk to the level of a pauper.

One day, as he was passing a church, his eye was caught by a placard at the door, inviting, in bold letters, "friend, stranger, or traveller to enter, if but for a few minutes." It was a "businessmen's prayer-meeting." The novelty of the idea struck him; he was at leisure; he had no notes to pay; anybody might fail, for aught he cared. He went in, and, to his surprise, saw, among the worshippers, scores of his old friends, engaged in devotion. Like himself, they had, many of them, failed, and, after the loss of all temporal wealth, had turned

their attention to the "more durable riches." He fell into a profound meditation, from which he did not recover until the meeting ended.

The next day he returned, and the day following, also,—taking a seat each time a little nearer the desk, until at last he reached the front row of benches, where he was to be seen at every service. It is not necessary to speculate upon his motives, or to conjecture how far he deceived himself in his professions,—if, indeed, there was any deception in the case. Let him have the benefit of whatever doubt there may be. The leading religious men *hoped*, without feeling any great confidence; the world, especially the business world, mocked and derided.

But piety, in itself, however heartfelt, does not clothe or feed its possessor, and Mr. Sandford, even with that priceless gift, must find some means of supplying his temporal wants. His new friends had plenty of advice for him, and some of them would have been glad to furnish him with employment; but none of them were so well satisfied with the sincerity of his conversion as to trust him far. It was not to be wondered, after his exploits on the day of his failure, that there should be a reasonable shyness on the part of those who had money which they could not afford or did not choose to give away. It was quite remarkable to see the change produced when the subject was introduced. Faces, that a few minutes before had shone with tearful joy or rapturous aspirations, full of brotherly affection, would suddenly cool, and contract, and grow severe, when Sandford broached the one topic that was nearest to him. He found that there was no way of escaping from the law of compensation by appropriating the results of other men's labors,—that religion (very much to his disappointment) gave him no warrant to live in idleness; therefore he was fain to do what he could for himself. He tried to act as a curb-stone broker, as an insurance agent, as an adjuster of marine losses and averages, as an itinerant solicitor for a life-insurance company, as an

accountant, and in various other situations. All in vain. He was shunned like an escaped convict; the motley suit itself would hardly have added to his disgrace. No one put faith in him or gave him employment,—save in a few instances, for charity's sake. Few men can brave a city; and Sandford, certainly, was not the man to do it. The scowling, or suspicious, or contemptuous, pitying glances he encountered smote him as with fiery swords. He quailed; he cowered; he dropped his eyes; he acquired a stooping, shambling gait. The man who *feels* that he is looked down upon grows more diminutive in his own estimation, until he shrinks into the place which the world assigns him. So Sandford shrunk, until he crept through the streets where once he had walked erect, and earned a support as meagre and precarious as the more brazen-faced and ragged of the great family of mendicants, to which he was gravitating.

Mendicants,—an exceeding great army! They do not all knock at area-doors for old clothes and broken victual, nor hold out hats at street-crossings, nor expose sharp-faced babies to win pity, nor send their infant tatterdemalions to torture the ears of the wealthy with scratchy fiddles and wheezing accordions. No, these plagues of society are only the extreme left wing; the right wing is — a very respectable class in the community. The party-leader who makes his name and influence serve him in obtaining loans which he never intends to pay,—shall we call him a beggar? It is an ugly word. The parasite who makes himself agreeable to dinner-givers, who calculates upon his accomplishments as a stock in trade, *intending* that his brains shall feed his stomach,—what is he, pray? It is ungracious to stigmatize such a jolly dog. The woman whose fingers are hooped with rings won in wagers which gallantry or folly could not decline, who is ready by *philopœna*, or even by more direct suggestions, to lay every beau or acquaintance under contribution,—is she a beggar, too? It is

a long way, to be sure, from the girl with scanty and draggled petticoat and tangled hair, picking out lumps of coal from ash-heaps, or carrying home refuse from the tables of the rich,—a long way from that squalid object to the richly-cloaked, furred, bonneted, jewelled, flaunting lady, whose friends are all *so* kind.

But the most charitable must feel a certain degree of pity, if not of scorn, for those who, like Mr. and Miss Sandford, contrive to wear the outward semblance of respectability, boarding with fashionable people and wearing garments *à la mode*, while they have neither fortune nor visible occupation. Miss Sandford, to be sure, had a few pupils in music,—young friends, who, as she averred, “insisted upon practising with her, although she did not profess to give lessons,” not she. Still her toilet was as elegant as ever. The first appearance of a new style of cloak, a new pattern of silk or embroidery, new ribbons, laces, jewelry, might be observed, as she took her morning promenade. The dealers in rich goods, elegant trifles, costly nothings, all knew her well. Whatever satisfied her artistic taste she purchased. To see was to desire, and, in some way, all she coveted tended by a magical attraction to her rooms. “Society” frowned upon her; she went to no receptions in the higher circles, but she had no lack of associates for all that. At concerts and other public assemblages, her brilliant figure and irreproachable costume were always to be seen,—the admiration of men, the envy of women. Nor was she without gallants. Gentlemen flocked about her, and seemed only too happy in her smiles; but it never happened that their wives or sisters joined in their attentions. On fine days, as she came out for a walk, she was sure to be accompanied by some person whose dress and manners marked him as belonging to the wealthy classes; and at such times it generally happened,—according to the scandal-loving shopkeepers,—that the last new book, the little “love” of a ring, or the engraved scent-bottle was purchased.

An odd affair is Society. At its outposts are flaming swords for women, though invisible to other eyes; men can venture without the lines, if they only return at roll-call. Let a woman receive or visit one of the *demi-monde*, (the technical use of the word is happily inapplicable here,) and she might as well earn her living by her own labor, or do any other disreputable thing; but her brother may pay court to the most doubtful, and mothers will only shake their heads and say, “He *must* sow his wild oats; he’ll get over all that by-and-by.”

So the beauty was still queen in her circle, and found admirers in plenty. Perhaps she even enjoyed the freedom; for, to a woman of spirit, the constraints of *tahoo* must be irksome at times. Not the Brahmin, who fears to tread upon sole-leather from the sacred cow, and dares not even think of the flavor of her forbidden beef, who keeps himself haughtily aloof from the soldier and the trader, and walks sunward from the pariah, lest the polluting shadow fall on his holy person, has a more difficult and engrossing occupation than the woman of fashion, in a country where the distinctions of rank are so purely factitious as in ours. Miss Sandford’s time was now her own; she was accountable to no supervisor. Her brother was a cipher. He did not venture to intrude upon her, except at seasons when she was at leisure, and in a humor to be bored by him. Perhaps she looked back regretfully, but, as far as could be told by her manner, she carried herself proudly, with the air of one who says,—

“Better reign in hell than serve in heaven.”

The observant reader has doubtless wondered before this, that Mr. Sandford did not, in his emergency, apply to his old clerk, Fletcher, for the money in exchange for the peculiar obligation of which mention has been made. It is presuming too much upon Mr. Sandford’s stupidity to suppose that the idea had not frequently occurred to him. But he was satisfied that Fletcher was one of

the few who were making money in this time of general distress, and that with every day's acquisition the paper became more valuable; therefore, as it was his last trump, he preferred to play it when it would sweep the board; and he was willing to live in any way until the proper time came. Not so easy was Fletcher. Several times he attempted to pay the claim, so that he could once more hold his head erect as a free man. But Sandford smiled blandly; "he was in no hurry," he said; "Mr. Fletcher evidently had money, and was good for the amount." Poor Fletcher!—walking about with a rope around his neck,—a long rope now, and slack,—but held by a man who knows not what pity means!

CHAPTER XXV.

GREENLEAF pursued his search for Alice with all the ardor of his nature. One glimpse only he had of her;—at a clothing-store, where he inquired, the clerk seemed to recognize the description given, and was quite sure that such a girl had taken out work, but he knew nothing of her whereabouts, and he believed she was now employed by another establishment. It was something to know that she was in the city, and, probably, not destitute; still better to know what path of life she had chosen, so that his time need not be wasted in fruitless inquiries. On his return, after the second day's search, he sought his friend Easelmann, whose counsel and sympathy he particularly desired.

"Any tidings of the fugitive?" was the first question.

"No," replied Greenleaf,—*"nothing satisfactory. I have heard of her once; but it was like a trail in the woods, which the hunter comes upon, then loses utterly."*

"But the hunter who measures a track once will be likely to find it again."

"Yes, I have that consolation. But, Easelmann, though this mishap of losing Alice has cost me many sleepless nights,

and will continue to engross my time until I find her, I cannot rid myself of other troubles and apprehensions. I have done nothing for a long time. I have no orders; and, as I have no fortune to fall back upon, I see nothing but starvation before me."

"Then, my dear fellow, look the other way. It isn't wise to distress yourself by looking ahead, so long as you have the chance of turning round."

"I feel lonely, too,—isolated. People that I meet are civil enough; but I don't know a man, except in my profession, that I can consider a friend."

"Very likely. Caste isn't confined to India."

"I had supposed that intellect and culture were enough to secure for a man a recognition in good society; but I am made to feel, a hundred times a day, that I have no more *status* than a clever colored man, an itinerant actor, or any other anomaly. To-day I met Travis; you know he comes here and makes himself free and easy with us, and has always put himself on a footing of equality."

"Wherein you made a mistake. He has no right, but by courtesy, to any equality. A little taste, perhaps, and money enough to gratify it,—that's all. He never had an idea in his life."

"That is the reason I felt the slight. He was walking with a lady whose manner and dress were unmistakable,—a lady of undoubted position. I bowed, and received in return one of those hardly-perceptible nods, with a forced smile that covered only the side of his face *from* the lady. It was a recognition that one might throw to his boot-black. I am a mild-mannered man, as you know; but I could have murdered him on the spot."

Greenleaf walked the floor with flashing eyes and his teeth set.

"Now, I like the spirit," said Easelmann; "but, pray, be sensible. 'Where Macdonald sits, there is the head of the table.' Stand firm in your own shoes, and graduate your bows by those you get."

"I suppose I am thin-skinned."

"As long as you are, you will chafe.

Cultivate a hide like a rhinoceros's, and Society will let fly its pin-pointed arrows in vain. You have a great deal to learn, my dear boy."

"But other special classes are not so treated,—literary men, for instance."

"Don't be too sure of that. An author who has attained position is *fêted*, because the fashionable circles must have their lions. But to stand permanently like other men, he must have money or family, or else obey the world's ten commandments, of which the first is, 'Thou shalt not wear a slouched hat,'—and the rest are like unto it. No,—the literary men have their heart-burnings, I suspect. They forget, as you do, that their very profession, the direction of their thoughts, their mode of life, cut them off from sympathy and fellowship. What has a writer who dreams of rivalling Emerson or the 'Autocrat' to do with costly and absorbing private theatricals, with dances at Papanti's, with any of the thousand modes of killing time agreeably? And how shall you become the new Claude, if you give your thoughts to the style of your clothes, and to the inanities that make up the staple of conversation?"

"But because I am precluded from devoting my time to society, that is no reason why I should bear the patronizing airs"—

"Don't be patronized,—that's all. If a man gives you such a look as you have described, cut him dead the next time you meet him. If anybody gives you two fingers to shake, give him only one of yours. I tried that plan on a doctor of divinity once, and it worked admirably. His intended condescension somehow vanished in a mist, and the foolish confusion that overspread his blank features would have done you good to behold."

"I have no doubt. I don't think it would be easy to be impertinent to you. Not that there are not presuming people enough; but you have a way with you. Your blade that cuts off a bayonet at a blow will glide through a feather as well."

"A delicate stroke of yours! Now to return. You are out of money, you say. Perhaps you will allow me to become your creditor for a while. I may presume upon the relation and take on some airs;—that's inevitable; one can't forego such a privilege;—but I promise to bow very civilly whenever I meet you; and I won't remind you of the debt—above twice a day."

Taking out his pocket-book, he handed his friend fifty dollars, and *pshawed* and *poohed* at every expression of gratitude.

"By the way, Greenleaf," he continued, "I have been in search of an absconding female also. You remember Mrs. Sandford, the charming widow?"

"Yes,—what has become of her?"

"You see how philosophical I am. I have not seen her yet; and yet I am not crazy about it. Some chickens think the sky is falling, whenever a rose-leaf drops on their heads."

"But you have no such reason to be anxious."

"Haven't I? Do you think old fellows like me have lost recollection as well as feeling? One of the most deadly cases of romance I ever knew was between people of forty and upwards."

"How dull I was! I saw some rather odd glances when you at the musical party, but thought nothing more about it. But why haven't you been looking for her?"

"I have been cogitating," said Easelmann, twisting his moustaches.

"I should think so. If you had asked me, now! I went with her to the house where I suppose she is still boarding."

"Did you?" [*very indifferently, and with the falling inflection.*]

"Why, don't you want to know?"

"Yes,—to-morrow. And I think, that, when we find her, we may find a clue to your Alice."

Greenleaf started up as if he had been galvanized.

"You *have* seen her, then! You old fox! Where is she? To-morrow, indeed! Tell me, and I will fly."

"You can't; for, as Brother Chadband observed, you haven't any wings."

"Don't trifle with me. I know your fondness for surprises; but if you love me, don't put me off with your nonsense."

Greenleaf was thoroughly in earnest, and Easelmann took a more soothing tone. At another time the temptation to tease would have been irresistible.

"Be calm, you man of gunpowder, steel, whalebone, and gutta-percha! I positively have nothing but guesses to give you. Besides, do you think you have nothing to do but rush into Alice's arms when you find her? Take some valerian to quiet your nerves, and go to bed. In the morning, try to smooth over those sharp features of yours. Use rouge, if you can't get up your natural color. When you are presentable, come over here again, and we'll stroll out in search of adventure. But mind, I promise nothing,—I only guess."

While he spoke, Greenleaf looked into the mirror, and was surprised to see how anxiety had worn upon him. His face was thin and bloodless, and his eyes sunken, but glowing. The quiet influence of his friend calmed him, and his impatience subsided. He took his leave silently, wringing Easelmann's hand, and walked home with a lighter heart.

"He is a good fellow," mused Easelmann, "and has suffered enough for his folly. The lesson will do him good."

CHAPTER XXVI.

MR. BULLION was not without good natural impulses, but his education and experience had been such as to develop only the sharp and selfish traits of his character. An orphan at the age of eleven years, he was placed in a shop under the charge of a grasping, unscrupulous man, where he learned the rules of business which he followed afterwards with so much success. The old-fashioned notions about the Golden Rule he was speedily well rid of; for when his indiscreet frankness to customers was observ-

ed, the rod taught him the folly of untimely truth-telling, if not the propriety of smoothing the way to a bargain by a glib falsehood. With such training, he grew up an expert salesman; and before he was of age, after various changes in business, he became the confidential clerk in a large wholesale house. Owing to unexpected reverses, the house became embarrassed, and at length failed. The head of the firm went back to his native town a broken-hearted man, and not long afterwards died, leaving his family destitute. But Bullion, with a junior partner, settled with the creditors, kept on with the business, and prospered. Perhaps, if the widow had received what was rightfully hers, the juniors would have had a smaller capital to begin upon,—Bullion knew; but the account, if there was one, was past settlement by human tribunals, and had gone upon the docket in the great Court of Review.

Wealth grows like the banian, sending down branches that take root on all sides in the thrifty soil, and then become trunks themselves, and the parents of ever-increasing boughs, — a sturdy forest in breadth, a tree in unity. So Bullion grew and flourished. At the time of our story he was rich enough to satisfy any moderate ambition; but he wished to rear a colossal fortune, and the operations he was now concerned in were fortunate beyond his expectations. But he was not satisfied. He conceived the idea of carrying on the same stock-speculation in New York on a larger scale, and made an arrangement with one of the leading "bears" of that city; but he was careful to keep this a secret, most of all from Fletcher and others of his associates at home. Fortune favored him, as usual, and he promised himself a success that would make him a monarch in the financial world. Under the excitement of the moment, he had filled the baby hands of Fletcher's child with gold pieces. It was as Fletcher said; his head was fairly turned by the glittering prospect before him.

The associate in New York proposed to Bullion the purchase of a controlling

interest in a railroad; and Bullion, believing that the depression had nearly reached its limit, and that affairs would soon take a turn, agreed that it was best now to change their policy, and to buy all the shares in this stock that should be offered while the price was low, and keep them as an investment. He felt sure that he with the New York capitalist had now money enough to "swing" all the shares in market, and they each agreed to purchase all that should be brought to the hammer in their respective cities. Following up his promise faithfully, Bullion bought all the stock of the railroad that came into State Street, and in this way rapidly exhausted his ready money. Then he raised loans upon his other property, and still kept the market clear. But he wondered that so many shares came to Boston for sale; for the railroad was in a Western State, and few of the original holders were New England men.

Bullion now met the first check in his career. Kerbstone, whose appeals for help he had disregarded, and whose property had been wofully depreciated by the course of the "bears," of whom Bullion was chief, failed for a large sum. As he was treasurer of the Neversink Mills, the stockholders and creditors of that corporation made an immediate investigation of its accounts. Kerbstone was found to be a defaulter to the amount of hundreds of thousands of dollars; the property was gone,—undermined like a snow-bank in spring. The largest owner was Bullion. He was overreached by his own shrewdness; and the hitherto unlucky "bulls," who had had small cause to laugh, thought that it was

"sport to see the engineer

Hoist with his own petard,"—

better even than to have tossed him on their own horns.

Bullion made some wry faces; but the loss, though great, was not ruinous. He was obliged, however, to take back the shares of the factory-stock on which he had obtained loans for his New York operations, and to substitute an equal

amount of other securities,—thus cramping his resources at a time when he needed every dollar to carry out his vast plans.

In the multiplicity of his affairs, Bullion had almost forgotten Fletcher, and left him to pursue his own course. But there was a man who had not forgotten him, and who followed all his movements with vigilant eyes. Sandford was convinced that Fletcher had in some way become prosperous, and he now advanced to use the peculiar note as a draft on the miserable debtor's funds. There was the same wily approach, the same covert allusion to Fletcher's supposed resources, the same peremptory demand, and the same ugly threat which had so desperately maddened him when the subject was broached before. Fletcher felt the tightening of the lasso, but could not free himself from the fatal noose. He must pay whatever the cold-eyed creditor demanded. Two thousand dollars was the sum asked for the acknowledgment of having appropriated five hundred. Twopence for halfpenny has been accounted fair usury among the Jews; but in Christian communities it is only crime that accumulates interest like that.

As a measure of precaution, Sandford had made a copy of the paper and prepared an explanatory statement; these he now inclosed in an envelope, in Fletcher's presence, and directed it to Messrs. Foggarty, Danforth, and Dot. Then drawing out his watch, as if to make a careful computation of time, he said,—

"Nine, ten, eleven,—yes,—at eleven, to-morrow, I shall expect to receive the sum; otherwise I shall feel it my duty to send this letter by a trusty hand. In fact, I suppose I have hardly done right in not putting the gentlemen on their guard before."

A cold sweat covered Fletcher's shivering limbs, and for a moment he stood irresolute; but recollecting Bullion, he rallied himself, and, assenting to the proposition, bade Sandford good-bye; then, as the only revenge practicable, he cursed him with the heartiest emphasis, when his

back was turned. Presently Tonsor came with the news of Kerbstone's failure.

"The street is full of rumors," he said;—"Bullion is a large owner in the Nevversink."

"Bosh!" said Fletcher,—*"Bullion is in there for fifty thousand, to be sure; but what is that? He has other property enough,—half a million, at least."*

"Still, a pebble brought down Goliath. A house in New York, worth a million, failed yesterday for want of twenty-five thousand."

"Don't you be alarmed. Bullion knows. He isn't going to fail."

"I want to get ten thousand from him to take some shares I bought for him."

"How soon?"

"Now; and he is not at his office."

"I'll get you the money from our house. I haven't deposited the funds for to-day yet, and I'll put in a memorandum which Bullion will make good."

"Hadn't you better wait?"

"No; it doesn't matter. He's all right; and it isn't best to break his orders for any ten thousand dollars."

Fletcher handed the money to the broker, and, as bank-hours were then about over, he put his papers in order and went home.

"Lovey!" he exclaimed, upon meeting his wife, "I have been thinking over what you said about getting my notes cashed. I believe I'll take Bullion's offer and salt the money down. Probably, now, he will give me a better trade, for there is considerable more due."

"Oh, John! how glad I am! You will do it to-morrow,—won't you, now?"

"Yes, I'll settle with him to-morrow."

He was thinking of the fact that Tonsor had *bought* shares for Bullion, and he wondered what the move meant. A house divided against itself could not stand; and he said to himself, that a man must be uncommonly deep to be a "bull" and a "bear" at the same time. There was no doubt that Bullion had embarked in some speculation which he had not seen fit to make known to his agent.

"There you go,—off into one of your fogs again!" said the wife, noticing his suddenly abstracted air. "That's the way you have done for the last three months,—ever since you began with that hateful man."

"I get to thinking about affairs, my little woman, and I don't want to bother your simple head with them; so I go cruising off in the fog, as you call it, by myself."

"Oh, if you once get through with that man's affairs, we'll have no more fogs!"

"No, deary, we'll have summer weather and a smooth sea, I hope, for the rest of our voyage."

"You see, John, I have been dreadfully anxious, more than I could tell you. If anything goes wrong, I've always noticed that it isn't the big people that have to suffer; it's the smaller ones that get caught."

"Yes, it's an old story; the big flies break out of the spider's net; the little chaps hang there. But I'll settle up the business to-morrow. I shall have enough to buy us a little house in the country,—a snug box, with a garden; then I'll get a horse to drive about with, and we'll take some comfort. Come, little woman, sit on my knee! Come, baby, here is a knee for you, too!"

Holding them in his arms, he still mused upon the morrow, and once and again charged his mind to remember "two thousand for Sandford, ten thousand for Danforth and Dot!"

CHAPTER XXVII.

ALICE did not feel the utter loneliness of her situation, until, as she walked along, square after square, she encountered so many hundreds of abstracted or curious or impudent faces, and reflected that it was upon such people that her future support and comfort would depend. She tried to discover in some countenance the impress of kindly benevolence;—not that she proposed to risk so much as a question; but it was her first experience with the busy world, and

she wished to observe its ways, when neither relationship nor personal interest was involved. Small encouragement she would have felt to approach any that she met. Men of middle-age walked by as in dreams, cold, unobservant, listless; the younger ones, fuller of life, strode on with high heads, and flinging glances that were harder to bear than stony indifference, even. Ladies clothed in costly furs scanned the pretty face under the mourning bonnet with prying eyes, or tossed her a hasty, scornful look. Shop-girls giggled and stared. Boys rushed by, rudely jostling every passenger. Old women in scanty petticoats that were fringed by no dressmaker, with pinched faces and watery eyes, looked imploringly and hobbled along, wrapping parcels of broken victual under their faded shawls.—A sorry world Alice thought it. In the country, she had been used to receive a kindly bow or a civil “Good-morning!” from every person she met; and the isolation of the individual in the city was to her something unnatural, even appalling.

She had cut out some boarding-house advertisements from the daily papers, and her first care was to find a home suited to her slender means. Reaching the door of the first on her list, she rang and was shown into a small drawing-room, shabby-genteel in its furniture and ornaments. Two seamstresses sat chattering around the centre-table; while a ruddy young man, with greenish brown moustaches and sandy hair, rested his clumsy boots on the fender, holding an open music-book in his lap and a flute in his ill-kept and gaudily-ringed hands. The kitchen, apparently, was not ventilated; and a mingled odor, beyond the analysis of chemistry, came up into the entry and pervaded the hot and confined atmosphere of the room. The landlady, a stout and resolute woman, entered with a studied smile, which changed gradually to a cold civility. Her eyes, unlike Banquo’s, had a deal of speculation in them. One might read the price-current in the busy wrinkles. Around

her pursed-up mouth lurked the knowledge of the number of available slices in a sirloin,—the judgment of the lump of butter that should leave no margin for prodigality. Warfare with market-men, shrewish watchfulness over servants, economy scarcely removed from meanness at the table, all were clearly indicated in her flushed and hard-featured face.

Alice was not familiar with such people; but she shrank from her by instinct, as the first chicken fled from the first hawk. The landlady, on her part, was equally suspicious, and, finding that Alice had no relatives to depend upon, and that she expected to earn her own living, was not at all solicitous to increase the number of her boarders.

“It’s pooty hard to tell who’s who, now-a-days,” she said. “I have to pay cash for all I set on the table, and I can’t trust to fair promises. Perhaps, though, you’ve got some *cousin* that looks arter your bills?”

The flute-player exchanged knowing glances with the seamstresses.

All-unconscious of the taunt, Alice simply replied,—

“No, I have told you that I have no one to depend upon.”

The landlady’s mouth was primly set, and she merely exclaimed,—

“Oh! indeed!”

“I think I’ll look further,” said Alice. “Good-morning.”

“Good-morning.”

Half-suppressed chuckles followed her, as she left the room. Sorely grieved and indignant, she took her way to another house. Fortune this time favored her. The landlady, a kind-hearted woman, was in mourning for her only daughter, and with the first words she heard she felt her heart drawn to the lovely and soft-voiced stranger. Without any offensive inquiries, Alice was at once received, and an upper room assigned to her. After sending for her trunk, she dressed for dinner.

The table presented specimens of all the familiar characters of boarding-house

life. There was the lawyer, sharp, observant, talkative, ready for a joke or an argument. There was the solemn man of business, who ate from a sense of duty, and scowled at the lawyer's bad puns. Near him, with an absurdly youthful wig and opaque goggles, sat the Unknown; his name, occupation, resources, and tastes alike a profound mystery. Several dapper clerks, whose right ears drooped from having been used as pen-racks, wearing stunning cravats, *outré* brooches and shirt-studs, learned in the lore of "two-forty" driving, were ranged opposite. Then there was the jolly widow, who was the admiration of men of her own age, but who cruelly gave all her smiles to the boys with newly-sprouting chins. Near her sat the fastidious man, whose nostrils curled ominously when any stain appeared on his napkin, or when anything sullied the virgin purity of his own exclusive fork. His spectacles seemed to serve as microscopes, made for the sole purpose of detecting some fatal speck invisible to other eyes. There was the singer, with a neck like a swan's, bowing with the gracious air that is acquired in the acknowledgment of bouquets and *bravas*. The artist was her *vis-à-vis*, powerful like Samson in his bushy locks, negligent with forethought, wearing a massive seal-ring, and fragrant with the perfume of countless pipes. The nice old maid near him turns away in disgust when she sees his moustaches draggle in the soup.

Down the long row of faces Alice looked timidly, and at length fastened her eyes upon a lady in mourning like herself. There is no physiognomist like the frank, affectionate young man or woman who looks to find appreciation and sympathy. It is not necessary, for such a purpose, to speculate upon Grecian or Roman noses, thin or protruding lips, blue, gray, or brown eyes; each soul knows its own sphere and the people that belong in it; and a sure instinct or prescience guides us in our choice of friends. Alice at a glance became conscious of an affinity, and quietly waited

till circumstances should bring her into associations with the woman whom she hoped to make a friend.

It was not long before the occasion came. Not to make any mystery, it was our old acquaintance, Mrs. Sandford, who attracted the gaze of Alice, and who soon became her kindly adviser. Never was there a more *motherly* woman; and, as she was now almost a stranger in the house, she attached herself to Alice with a warmth and an unobtrusive solicitude that quite won the girl's heart. Alice lost no time in procuring such work from a tailor as she felt competent to do, and applied herself diligently to her task; but a very short trial convinced her, that, at the "starvation prices" then paid for needlework, she should not be able to earn even her board. Then came in the thoughtful friend, who, after gently drawing out the facts of the case, furnished her with sewing on which she could display her taste and skill. Day after day new employment came through the same kind hands, until Alice wondered how one wearer could want such a quantity of the various nameless, tasteful articles in which all women feel so much pride. It was not until long after, that she learned how the work had been procured by her friend's active, but noiseless agency.

Not many days after their intimacy commenced, as Mrs. Sandford sat watching Alice at her work, it occurred to her that there was a look of tender sorrow, an unexplained melancholy, which her recent bereavement did not wholly account for. Not that the girl was given to romantic sighs or tragic starts, or that she carried a miniature for lachrymose exercises; but it was evident that she had what we term "a history." She was frank and cheerful, although there was palpably something kept back, and her cheerfulness was like the mournful beauty of flowers that blossom over graves. No sympathetic nature could refuse confidence to Mrs. Sandford, and it was not long before she discovered that Alice had passed through the golden gate to which all footsteps tend, and from which no one

comes back except with a change that colors all the after life.

"And so you are in love, poor child!" said Mrs. Sandford, compassionately.

"I have been" (with a gentle emphasis).

"Ah, you think you are past it now, I suppose?"

"I sha'n't *forget* soon,—I could not, if I would; but love is over,—gone like yesterday's sunshine."

"But the sun shines again to-day."

"Well, if you prefer another comparison," said Alice, smiling faintly,—"*gone* out like yesterday's fire."

"Fire lurks a long time in the ashes unseen, my dear."

Alice dropped her needle and looked steadily at her companion.

"I am young," she said; "yet I have outgrown the school-girl period. The current of my life has flowed in a deep channel: the shallow little brook may fancy its first spring-freshet to be a Niagara; but my feelings have swelled with no transient overflow. I gave my utmost love and devotion to a man I thought worthy. He treated me with neglect, and at last falsified his word in offering his hand to another. I do not hate him. I have none of that alchemy which changes despised love to gall. But I could never forgive him, nor trust him again. And if he, who seemed always so frank, so earnest, so tender, so single in his aims,—if he could not be trusted, I do not know where I could rest my heart and say,—'Here I am safe, whatever betide!'"

It was a strange thing for Alice to speak in such an exalted strain, and she trembled as she tried to resume her sewing. The thread slipped and knotted; the needle broke and pricked her finger; and then, feeling her cheeks begin to glow, she laid down her work and turned to the window.

"Don't lose *all* faith, Alice; there are true hearts in the world. Perhaps this lover of yours, now, has repented and is striving to find you. Or you may have been misinformed as to the extent of his

treachery. To take your own simile, you don't accuse the brook of fickleness merely because it eddies around under some flowery bank; after it has made the circle, it keeps on its steady course."

Alice only shook her head, still keeping her face averted to conceal the tremor of her lips.

"But you haven't told me who this man is. How odd it would be, if I knew him!"

"I would rather not have you know. The secret isn't a fatal one, to be sure; but I prefer to keep it."

Suddenly she stepped back from the window, ashy pale, and gasping hysterically. Mrs. Sandford rose hastily to assist her, and, as she did so, noticed her old acquaintance, Mr. Greenleaf, on the opposite sidewalk. She helped Alice to her seat and brought her a glass of water, and, as she did so, in an instant the long track of the past was illumined as by a flash of lightning. She saw the reason for Greenleaf's conduct towards her sister-in-law, Marcia. She remembered his early fascination, his long, vacillating resistance, his brief engagement, and the stormy scene when it was broken. She had seen the thread of Fate spun for each, without knowing that invisible strands connected them. She had begun to read a tale of sorrow, but the page was torn, and now she had finished it upon the chance-found fragment; the irregular and jagged edges fitted together like mosaic-work.

What a mystery is Truth! A Lie may simulate its form or hue, and, taken by itself, may deceive the most acute observer. But in the affairs of the world, every fact is related; it meets and is joined by other facts on every side,—the whole forming an harmonious figure in all its angles and curves as well as in its gradations of color. Each truth slips easily into its predestined place; a lie, however trivial, has no place; its angles are belligerent, its colors false; it makes confusion, and is thrown out as soon as the eye of the Master falls upon it.

Alice revived.

"Did I speak?" she asked.

"No,—you said nothing."

"I am glad. I feared I had been foolish. It was a mere passing faintness."

Mrs. Sandford thought it was the cause of the faintness that was passing, but she prudently kept her discovery to herself.

CHAPTER XXVIII.

FLETCHER rose next morning betimes, after a night of fitful and unrefreshing slumber. In his dreams he had sought Bullion in vain; that substantial person seemed to have become a new Proteus, and to escape, when nearly overtaken, by taking refuge in some unexpected transformation. Sometimes the scene changed, and it was the dreamer that was flying, while Sandford, shod with swiftness, pursued him, swinging a lasso; and as often as the fierce hunter whirled the deadly coil, Fletcher awoke with a suffocating sensation, and a cold sweat trickling from his forehead. At breakfast, his wife noticed with intense anxiety his sharpened features and his evident preoccupation of mind. He hurried off, snatching a kiss from the baby and from the mother who held it, and walked towards Bullion's office. He knew Bullion was an early riser, and he felt sure of being able to see him before the usual hour of commencing business. But the office was not even opened; and, looking through the glass door, he saw that there was no fire in the grate. What was the meaning of this? Going into the street, he met Tonsor near the post-office. At the first sight of the broker's face, Fletcher's heart seemed to stop beating.

"Good-morning, Fletcher. Bad business, this! I suppose you've heard. Bullion went to protest yesterday. Hope you got wind of it in time, and made all safe."

"Bullion failed!" exclaimed Fletcher, through his chattering teeth. "Then I'm a ruined man!"

But a sudden thought struck him, and he asked eagerly,—

"But the money,—haven't you got it still?"

"No,—paid it over yesterday."

"Well, the shares, then?"

"No,—sorry to say, Bullion's clerk came for them not ten minutes before I heard of the protest."

"O God!" groaned the unhappy man, "there is no hope! But you, Mr. Tonsor, you are my friend; help me out of this! You can raise the money."

"Ten thousand dollars! It's a pretty large sum. I'm afraid I couldn't get it."

"Try, my friend,—you shall never regret it."

Tonsor hesitated, and Fletcher's spirits rose. He watched the broker's composed face with eyes that might pierce a mummy.

"What is the collateral?" asked Tonsor, slowly raising his wrinkled eyelids.

"Bullion's notes for seventeen thousand dollars."

"And Bullion gone to protest."

"He'll come up again."

"Perhaps; but while he is down, I can't do anything with his paper. The truth is, Fletcher, you ought not to have advanced the money for him. Remember, I warned you when you were about to do it."

Fletcher did not look as though he found the "Balm of I-told-you-so" very consoling.

Tonsor continued,—

"Now, if I were in your place, I would go and make a clean breast of it to Danforth. It was wrong, though I know you didn't mean any harm. He may be angry, but he won't touch you. You *can't* raise ten thousand dollars in these times,—not to save your soul."

"Keep your advice, and your money, too," said Fletcher, in sullen despair. "I ask for bread, and you give me a stone. Your moral lecture won't pay my debts."

He turned away abruptly and went again to Bullion's office. It was still closed. Determined at all hazards to see the man for whom he had risked so much, he went to his house on Beacon Hill. The servant said Mr. Bullion was not at home. Fletcher did not believe it, but the door was closed in his face be-

fore he could send a more urgent message, and with a sinking heart he retraced his steps towards State Street.

The horror of his position was now fully before him. He could not conceal his defalcation, and there was no longer a shadow of hope of replacing the money. Many a time he had taken the risk of lending large sums to brokers and others; but who would trust him, a man without estate, in a time like this? In his terrible anxiety about the new obligation, he had forgotten the old, until he chanced to observe Sandford on the opposite sidewalk, strolling leisurely towards the business quarter of the town. The ex-secretary made a barely-perceptible bow, and, drawing out his watch, significantly turned the face towards his debtor. It was enough; there was no need of words. It was a little after ten o'clock; the fatal letter would be delivered at eleven! Fletcher crossed the street and accosted Sandford, though not without trepidation; for he shuddered like a swimmer within reach of a shark, as he encountered those cold and pitiless eyes.

"Come to the office, Mr. Sandford, at eleven," he said. "The affair will be settled then, and forever."

Mr. Sandford nodded and walked on. Fletcher, meanwhile, quivering with agony, hurried to his employer's office. He scanned each face sharply as he entered, and felt sure that the loss had not yet been discovered. Going to his desk, he wrote and sealed a letter, and then went out, saying he had some business with a lawyer overhead.

Mrs. Fletcher grew momentarily more uneasy, after her husband left the house. A vague sense of coming evil oppressed her, until at length she could bear it no longer; she left her child with the servant, and, walking to the nearest stand, took a coach for State Street. On the way she recalled again and again the muttered words she heard during the night; she thought of the silent, comfortless breakfast, the hurried good-bye; she felt again the pressure of his trembling lips upon her own. Full of appre-

hension, she asked the coachman to call her husband to the door. Answer was made by a clerk that Mr. Fletcher was out on business, but was expected back presently. So she waited, looking out of the carriage-window,—a sad face to see! The hands of the Old State-House clock pointed at eleven, when Mr. Sandford punctually made his appearance,—smooth, cheerful, and with a slight exhilaration, in prospect of the two thousand dollars. Almost at the same moment Bullion came also; for Tonsor, fearing that Fletcher would take some desperate step, had been to the surly bankrupt's house and insisted upon his coming down to see his unfortunate agent. Just at the office-door, and opposite the carriage, met the two bankrupts, the disgraced "bull" and the vanquished "bear." It was an odd look of recognition that was exchanged between them; and if there was a shade of triumph in Sandford's face, it was not to be wondered at. They stood at the door, each motioning the other to enter first, when an unusual sound from the adjoining entry caused both of them to stop, and one of them, at least, to shiver. It was a sound of slow and hesitating, shuffling steps, as of men carrying a burden. The steps came nearer. Both Bullion and Sandford moved hurriedly to the spot. The men stopped in the doorway with their burden, and in a moment, with frantic shrieks, Mrs. Fletcher rushed in and fell upon the body of her husband!

"Good God! what's this?" exclaimed Bullion. "Dead?" He stooped down and thrust his hand under the waistcoat. The heart was still! He shuddered convulsively and drew back, covering his eyes. "Dead!"

Mr. Sandford seemed frozen to the threshold in speechless horror. There was his debtor, free,—the old account settled forever! The pallid temples would throb no more; the mobile lips had trembled their last; the glancing, restless eyes had found a ghastly repose; the slender and shapely frame, bereft of its active tenant, was limp and

unresisting. What a moment for the two men, as they stood over the corpse of their victim!

Attracted by the unusual outcry, Mr. Danforth came hastily out of the office, and stood, as it were, transfixed at the sight of the dead. The men who had brought down the body at last found words to tell their dismal story.

They were at work on the upper floor, when they heard a noise in one of the adjoining rooms; as the apartment had been for some time unoccupied, they were naturally surprised. After a while all sounds ceased, and still no one came out to descend the stairs. Appalled by the silence, they broke open the door, and discovered Fletcher hanging by the neck from a coat-hook; a chair, overturned, had served as the scaffold from which he had stepped into eternity. They took him down, but life was already gone. A paper lay on his hat, with these words hastily pencilled on it:—

"On my desk is a letter that explains all. I'm off. Good-bye.

"JOHN FLETCHER."

Mr. Danforth, hearing this, instantly went into his office, and reappeared, reading a note addressed to him. Mr. Sandford, meanwhile, was striving to raise the wretched woman to her feet, and to lead her to the carriage. Mr. Bullion no longer whisked his defiant eyebrow, but stood downcast, silent, and conscience-stricken.

"Listen a moment," said Mr. Danforth. "Here is a letter from our rash friend, and, as it concerns you, gentlemen, I will read it. But first, my dear Madam, let me help you into the carriage."

The prostrate woman made no answer, save by a slow rolling of her body,—her sobs continuing without cessation. The letter was read:—

"MR. DANFORTH,

"To make a payment for shares bought by Mr. Bullion, I borrowed ten thousand dollars from your house yesterday. Mr. Bullion has failed, and does not protect

me. He escapes, and I am left in the trap. I charge him to pay my wife the notes he owes me. As he hopes to be saved, let him consider that a debt of honor.

"But my death I lay at Sandford's door. He has followed me with a steady bay, like a bloodhound. His claim is now settled forever, as I told him. I don't ask God to forgive him;—I don't, and God won't. Let him live, the cold-blooded wretch that he is; one world or another would make no difference; for, to a devil like him, there is no heaven, no earth, nothing but hell.

"My poor wife! See to her, if you have any pity for

"JOHN FLETCHER."

"Look," said Mr. Danforth, holding the letter under the stony eyes of Sandford,—“see where the tears blistered the paper!”

All the while, Mrs. Fletcher kept up an inarticulate moaning, though the sound grew fainter from exhaustion.

"Let us stop this," said Bullion, seeing the gathering crowd of passers-by. "Better be at home."

Pointing to the still prostrate woman, he, with Mr. Danforth, gently raised her up and placed her in the carriage. She did not speak, but murmured pleadingly, while her face wore a look of agonized longing, and her outstretched hands clutched nervously.

"Poor thing!" said Mr. Danforth, his voice beginning to tremble,—“she shall have her dead husband, if it is any comfort to her.”

"That's right," said Bullion,—“carry him off before half-a-dozen coroner-buzzards come to fight over him.”

The body was laid in the carriage, the head she had so often caressed resting in her lap, while her tears bathed the unconscious face, and her groans became heart-rending. Still holding the carriage-door, Mr. Danforth turned to Sandford, saying,—

"I don't know *what* you have done, but his blood is on your soul. I would

rather be like him there, than you, on your feet.—Bullion, I don't mind the ten thousand dollars; but was it just the manly thing to leave a man that trusted you in this way to be sacrificed? Why didn't you come down this morning? God forgive you!—Coachman, drive to Carleton Street."

He stepped into the carriage, and away it rolled with its load of sorrow.

Mr. Sandford found the glances of his companion and the bystanders quite uncomfortable, and he slunk silently away. Failure and disgrace he had met; but this was a position for which he had not the nerve. The self-accusing Cain was not the only man who has exclaimed, "My punishment is greater than I can bear." Flight was the only alternative for Sandford. As long as he remained in Boston, every face seemed to wear a look of condemnation. The mark was set upon him, and avenging fiends pursued him. That very day he left the city in disguise. Through what trials he passed will never be known. But destitute, friendless, and broken-spirited, he wandered from city to city, a vagabond upon the face of the earth. Nor did a sterner retribution long delay. In New Orleans, he was so far reduced that he was obliged to earn a miserable support in an oyster-saloon near the levee. One night, a fight began between some drunken boatmen; and Sandford, though in no way concerned in the affair, received a chance bullet in his forehead, and fell dead without a word.

CHAPTER XXIX.

BULLION, at last, in spite of his armor of selfishness and stoicism, was touched in a vital part. His dreams of wealth had vanished into air. The confederate in New York in whom he had trusted had only made him a dupe. Blindly following out his agreement, he found himself saddled with a load of railroad-shares, useless for any present purpose, and all his convertible property gone. The consciousness that he—the man of all oth-

ers who prided himself upon his sagacity—had been so easily overreached was quite as humiliating as the idea of ruin itself. He remembered Kerbstone's appeals, also, and now cursed his own stupidity in refusing to aid him. There he had overreached himself; it was his own stocks which he had thrown down to the "bears." And now, heaviest stroke of all, Fletcher, his intrepid and chivalrous agent, who had stepped into the breach for him, had paid for his indiscretion with his life. The thought gave him a pang he had never felt, not even when he followed his wife to the grave. Homeward he went, but slowly and almost without volition. He recognized no acquaintances that he met, but walked on abstractedly, fixing his eyes on vacancy with a look as mournful as his iron features could wear. In his ears still rang those thrilling cries. His hand, that had groped over that motionless heart, still felt a creeping chill; it would not warm. And constantly an accusing voice asked, "Why didn't you come down?"—and conscience repeated the question in tones like those of a judge arraigning a criminal. He reached his house and gave orders that no one should be admitted. In his room he passed the day alone, drifting on an ocean of remorse, full of vague purposes of repentance and restitution. Dinner passed unheeded, and still he paced the silent chamber. With the approach of evening his terrors increased; he rang for a servant and had the gas-burners lighted. Still, in all the blaze, shapes would haunt him; they crouched at the foot of his bed; they lurked behind his wardrobe-door. He dared not look over his shoulder, but forced himself to stand up and face what he so dreaded to see. He rang again and bade the servant bring a screw-driver and take down the coat-hooks from the wardrobe; the garments hanging there seemed to be men struggling in the agonies of asphyxia. The slender thread of sound from the gas-burners seemed to be changed to low, mournful cries, as of a woman over the dead. He turned the gas down a little;

then the shadows of the cannel-coal fire danced like spectres on the ceiling. He jumped up and raised the lights again; again the low, dismal monotone sang in his ears. He stopped them with his fingers; again the persistent voice asked, "Why didn't you come down?" Flakes fell off the coal in the grate in shapes like coffins; the flames seemed to dart at him with their fiery tongues. He rang once more, and when the servant came he bade him drink enough strong tea and then take his chair by the fire.

"Touch me, if I groan," said he to the astonished John. "Keep awake yourself, and hold your tongue. If you go to sleep or leave me, I'll murder you."

Then wrapping himself in his dressing-gown, he settled down in his easy-chair for the night.

The night passed, as all nights will, and in the morning Mr. Bullion was calmer. The first intelligence he received after breakfast was in a message from Tonsor, delivered by a servant.

"Plaze, Sur, Mr. Tonsor's compliments, and he says the banks is suspinded and money's to be asier."

"Send after Mr. Tonsor; overtake him, and ask him to come back. I want to see him."

Tonsor returned, and they had a long conference. It now seemed probable that stocks would be more buoyant and the "bulls" would have their turn. Any considerable rise in shares would place Bullion on his feet and enable him to

resume payment. Most of his time-contracts had been met, and the change would be of the greatest service to him. He placed his shares, therefore, in Tonsor's hands with instructions to sell when prices advanced. He then looked over the amount of his liabilities, and saw, with some of his old exultation, that, if he could effect sales at the rates he expected, he should have at least two hundred thousand dollars after paying all his debts. Ambition again whispered to him, that he might now take his old place in the business world, and perhaps might more than retrieve his losses. But he thought of the last night, and shrank from encountering a new brood of horrors. Firm in his new purpose, he dismissed the broker and sent for his counsellor.

"My son," he meditated, "is a lawyer in good practice. He needs no fortune. Twenty thousand will be enough for him; more than I had, which wasn't a penny. My daughter is married rich. Didn't mean to have any pauper son-in-law to be plaguing me. The same for her. The rest will square those old accounts,—and the new one, too, on the book up yonder! Best to fix it now, while I can muster the courage. If I once get the money, I'm afraid I shouldn't do it. So my will shall set all these matters right; and it shall be drawn and signed to-day."

That night Mr. Bullion needed no servant to watch with him. The ghosts were laid.

[To be concluded in the next number.]

INSCRIPTION

FOR AN ALMS-CHEST MADE OF CAMPHOR-WOOD.

THIS fragrant box that breathes of India's balms
Hath one more fragrance, for it asketh alms;
But, though 'tis sweet and blessed to receive,
You know who said, "It is more blest to give":
Give, then, receive His blessing,—and for me
Thy silent boon sufficient blessing be!

If Ceylon's isle, that bears the bleeding trees,
 With any perfume load the Orient breeze,—
 If Heber's Muse, by Ceylon as he sailed,
 A pleasant odor from the shore inhaled,—
 More lives in me; for underneath my lid
 A sweetness as of sacrifice is hid.

Thou gentle almoner, in passing by,
 Smell of my wood, and scan me with thine eye;—
 I, too, from Ceylon bear a spicy breath
 That might put warmth in the lungs of death;
 A simple chest of scented wood I seem,
 But, oh! within me lurks a golden beam,—

A beam celestial, and a silver din,
 As though imprisoned angels played within;
 Hushed in my heart my fragrant secret dwells;
 If thou wouldst learn it, Paul of Tarsus tells;—
 No jangled brass nor tinkling cymbal sound,
 For in my bosom Charity is found.

A TRIP TO CUBA.

THE DEPARTURE.

WHY one leaves home at all is a question that travellers are sure, sooner or later, to ask themselves,—I mean, pleasure-travellers. Home, where one has the "Transcript" every night, and the "Autocrat" every month, opera, theatre, circus, and good society, in constant rotation,—home, where everybody knows us, and the little good there is to know about us,—finally, home, as seen regretfully for the last time, with the gushing of long frozen friendships, the priceless kisses of children, and the last sad look at dear baby's pale face through the window-pane,—well, all this is left behind, and we review it as a dream, while the railroad-train hurries us along to the spot where we are to leave, not only this, but Winter, rude tyrant, with all our precious hostages in his grasp. Soon the swift motion lulls our brains into the accustomed muddle; we seem to be dragged along like a miserable

thread pulled through the eye of an everlasting needle,—through and through, and never through,—while here and there, like painful knots, the *dépôts* stop us, the poor thread is arrested for a minute, and then the pulling begins again. Or, in another dream, we are like fugitives threading the gauntlet of the grim forests, while the ice-bound trees essay a charge of bayonets on either side; but, under the guidance of our fiery Mercury, we pass them as safely as ancient Priam passed the outposts of the Greeks,—and New York, as hospitable as Achilles, receives us in its mighty tent. Here we await the "Karnak," the British Mail Company's new screw-steamer, bound for Havana, *viâ* Nassau. At length comes the welcome order to "be on board." We betake ourselves thither,—the anchor is weighed, the gun fired, and we take leave of our native land with a patriotic pang, which soon gives place to severer spasms.

I do not know why all celebrated peo-

ple who write books of travels begin by describing their days of sea-sickness. Dickens, George Combe, Fanny Kemble, Mrs. Stowe, Miss Bremer, and many others, have opened in like manner their valuable remarks on foreign countries. While intending to avail myself of their privilege and example, I would, nevertheless, suggest, for those who may come after me, that the subject of sea-sickness should be embalmed in science, and enshrined in the crypt of some modern encyclopædia, so that future writers should refer to it only as the Pang Un-speakable, for which *vide* Ripley and Dana, vol. , page . But, as I have already said, I shall speak of sea-sickness in a hurried and picturesque manner, as follows:—

Who are these that sit by the long dinner-table in the forward cabin, with a most unusual lack of interest in the bill of fare? Their eyes are closed, mostly, their cheeks are pale, their lips are quite bloodless, and to every offer of good cheer, their "No, thank you," is as faintly uttered as are marriage-vows by maiden lips. Can they be the same that, an hour ago, were so composed, so jovial, so full of dangerous defiance to the old man of the sea? The officer who carves the roast-beef offers at the same time a slice of fat;—this is too much; a panic runs through the ranks, and the rout is instantaneous and complete. The ghost of what each man was disappears through the trap-door of his state-room, and the hell which the theatre faintly pictures behind the scenes begins in good earnest.

For to what but to Dante's "Inferno" can we liken this steamboat-cabin, with its double row of pits, and its dismal captives? What are these sighs, groans, and despairing noises, but the *alti guai* rehearsed by the poet? Its fiends are the stewards who rouse us from our perpetual torpor with offers of food and praises of shadowy banquets,— "Nice mutton-chop, Sir? roast-turkey? plate of soup?" Cries of "No, no!" resound, and the wretched turn again, and groan. The philanthropist has lost the movement

of the age,—keeled up in an upper berth, convulsively embracing a blanket, what conservative more immovable than he? The great man of the party refrains from his large theories, which, like the circles made by the stone thrown into the water, begin somewhere and end nowhere. As we have said, he expounds himself no more, the significant forefinger is down, the eye no longer imprisons yours. But if you ask him how he does, he shakes himself, as if, like *Farinata*,—

"avesse l' inferno in gran dispetto,"—

"he had a very contemptible opinion of hell." Let me not forget to add, that it rains every day, that it blows every night, and that it rolls through the twenty-four hours till the whole world seems as if turned bottom upwards, clinging with its nails to chaos, and fearing to launch away. The captain comes and says,— "It is true, you have a nasty, short, chopping sea hereabouts; but you see, she is spinning away down South jolly!" And this is the Gulf-Stream!

But all things have an end, and most things have two. After the third day, a new development manifests itself. Various shapeless masses are carried upstairs and suffered to fall like snow-flakes on the deck, and to lie there in shivering heaps. From these larvæ gradually emerge features and voices,—the lunch-con-bell at last stirs them with the thrill of returning life. They look up, they lean up, they exchange pensive smiles of recognition,—the steward comes, no fiend this time, but a ministering angel, and, lo! the strong man eats broth, and the weak woman clamors for pickled oysters. And so ends my description of our sea-sickness.

For, as for betraying the confidences of those sad days, as for telling how woefully untrue Professors of Temperance were to their principles, how the Apostle of Total Abstinence developed a brandy-flask, not altogether new, what unsuccessful tipplings were attempted in the desperation of nausea, and for what lady

that stunning brandy-smasher was mixed,—as for such tales out of school, I would have you know that I am not the man to tell them.

Yet a portrait or so lingers in my mental repository;—let me throw them in, to close off the lot.

No. 1. A sober Bostonian in the next state-room, whose assiduity with his seasick wife reminds one of Cock-Robin, when he sent Jenny Wren sops and wine. This person was last seen in a dressing-gown, square-cut night-cap, and odd slippers, dancing up and down the state-room floor with a cup of gruel, making wild passes with a spoon at an individual in a berth, who never got any of the contents. Item, the gruel, in a moment of excitement, finally ran in a stream upon the floor, and was wiped up by the steward. Result not known, but disappointment is presumable.

No. 2. A stout lady, imprisoned by a board on a sofa nine inches wide, called by a facetious friend "The Coffin." She complains that her sides are tolerably battered in;—we hold our tongues, and think that the board, too, has had a hard time of it. Yet she is a jolly soul, laughing at her misfortunes, and chirruping to her baby. Her spirits keep up, even when her dinner won't keep down. Her favorite expressions are "Good George!" and "Oh, jolly!" She does not intend, she says, to lay in any dry goods in Cuba, but means to eat up all the good victuals she comes across. Though seen at present under unfavorable circumstances, she inspires confidence as to her final accomplishment of this result.

No. 3. A woman, said to be of a literary turn of mind, in the miserablist condition imaginable. Her clothes, flung at her by the stewardess, seem to have hit in some places, and missed in others. Her listless hands occasionally make an attempt to keep her draperies together, and to pull her hat on her head; but though the intention is evident, she accomplishes little by her motion. She is perpetually being lugged about by a stout steward, who knocks her head

against both sides of the vessel, folds her up in the gangway, spreads her out on the deck, and takes her up-stairs, down-stairs, and in my lady's chamber, where, report says, he feeds her with a spoon, and comforts her with such philosophy as he is master of. N. B. This woman, upon the first change of weather, rose like a cork, dressed like a Christian, and toddled about the deck in the easiest manner, sipping her grog, and cutting sly jokes upon her late companions in misery,—is supposed by some to have been an impostor, and, when ill-treated, announced intentions of writing a book.

No. 4, my last, is only a sketch;—circumstances allowed no more. Can Grande, the great dog, has been got up out of the pit, where he worried the stewardess and snapped at the friend who tried to pat him on the head. Everybody asks where he is. "Don't you see that heap of shawls yonder, lying in the sun, and heated up to about 212° Fahrenheit? That slouched hat on top marks the spot where his head should lie,—by treading cautiously in the opposite direction you may discover his feet. All between is perfectly passive and harmless. His chief food is pickles,—his only desire is rest. After all these years of controversy, after all these battles, bravely fought and nobly won, you might write with truth upon this moveless mound of woollens the pathetic words from *Père la Chaise*:—*Implora Pace*.

But no more at present, for land is in sight, and in my next you shall hear how we found it, and what we saw at Nassau.

NASSAU.

NASSAU looked very green and pleasant to us after our voyage;—the eyes enjoy a little fresh provision after so long a course of salt food. The first view of land is little more than "the feeling of the thing,"—it is matter of faith, rather than of sight. You are shown a dark and distant line, near the horizon, without color or features. They say it is

land, and you believe it. But you come nearer and nearer,—you see first the green of vegetation, then the form of the trees,—the harbor at last opens its welcome arms,—the anchor is dropped,—the gun fired,—the steam snuffed out. Led by a thread of sunshine, you have walked the labyrinth of the waters, and all their gigantic dangers lie behind you.

We made Nassau at twelve o'clock, on the sixth day from our departure, counting the first as one. The first feature discernible was a group of tall cocoa-nut trees, with which the island is bounteously feathered;—the second was a group of negroes in a small boat, steering towards us with open-mouthed and white-toothed wonder. Nothing makes its simple impression upon the mind sophisticated by education. The negroes, as they came nearer, suggested only Christy's Minstrels, of whom they were a tolerably faithful imitation,—while the cocoa-nut-trees transported us to the Boston in Ravel-time, and we strained our eyes to see the wonderful ape, Jocko, whose pathetic death, nightly repeated, used to cheat the credulous Bostonians of time, tears, and treasure. Despite the clumsiest management, the boat soon effected a junction with our gangway, allowing some nameless official to come on board, and to go through I know not what mysterious and indispensable formality. Other boats then came, like a shoal of little fishes around the carcass of a giant whale. There were many negroes, together with whites of every grade; and some of our number, leaning over the side, saw for the first time the raw material out of which Northern Humanitarians have spun so fine a skein of compassion and sympathy.

Now we who write, and they for whom we write, are all orthodox upon this mighty question; we have all made our confession of faith in private and in public; we all, on suitable occasions, walk up and apply the match to the keg of gunpowder which is to blow up the Union, but which, somehow, at the critical moment, fails to ignite. But you must allow

us one heretical whisper,—very small and low. The negro of the North is an ideal negro; it is the negro refined by white culture, elevated by white blood, instructed even by white iniquity;—the negro among negroes is a coarse, grinning, flat-footed, thick-skulled creature, ugly as Caliban, lazy as the laziest of brutes, chiefly ambitious to be of no use to any in the world. View him as you will, his stock in trade is small;—he has but the tangible instincts of all creatures,—love of life, of ease, and of offspring. For all else, he must go to school to the white race, and his discipline must be long and laborious. Nassau, and all that we saw of it, suggested to us the unwelcome question, whether compulsory labor be not better than none. But as a question I gladly leave it, and return to the simple narration of what befell.

There was a sort of eddy at the gangway of our steamer, made by the conflicting tides of those who wanted to come on board and of those who wanted to go on shore. We were among the number of the latter, but were stopped and held by the button by one of the former, while those more impatient or less sympathizing made their way to the small boats which waited below. The individual in question had come alongside in a handsome barge, rowed by a dozen stout blacks, in the undress uniform of the Zouaves. These men, well drilled and disciplined, seemed of a different sort from the sprawling, screaming creatures in the other boats, and their bright red caps and white tunics became them well. But he who now claimed my attention was of British birth and military profession. His face was ardent, his pantaloons were of white flannel, his expression of countenance was that of habitual discontent, but with a twinkle of geniality in the eye which redeemed the Grumbler from the usual tedium of his tribe. He accosted us as follows:—

“Go ashore? What for? To see something, eh? There's nothing to see; the island isn't bigger than a nut-shell, and doesn't contain a single prospect.—Go

ashore and get some dinner? There isn't anything to eat there.—Fruit? None to speak of; sour oranges and green bananas.—I went to market last Saturday, and bought one cabbage, one banana, and half a pig's head;—there's a market for you!—Fish? Oh, yes, if you like it.—Turtle? Yes, you can get the Gallipagos turtle; it makes tolerable soup, but has not the green fat, which, in my opinion, is the most important feature in turtle-soup.—Shops? You can't buy a pair of scissors on the island, nor a baby's bottle;—broke mine the other day, and tried to replace it; couldn't.—Society? There are lots of people to call upon you, and bore you to death with returning their visits."

At last the Major went below, and we broke away, and were duly conveyed to *terra firma*. It was Sunday, and late in the afternoon. The first glimpse certainly seemed to confirm the Major's disparaging statements. The town is small; the houses dingy and out of repair; the legend, that paint costs nothing, is not received here; and whatever may have been the original colors of the buildings, the climate has had its own way with them for many a day. The barracks are superior in finish to anything else we see. Government-House is a melancholy-looking *caserne*, surrounded by a piazza, the grounds being adorned with a most chunky and inhuman statue of Columbus. All the houses are surrounded by verandas, from which pale children and languid women in muslins look out, and incline us to ask what epidemic has visited the island and swept the rose from every cheek. They are a pallid race, the Nassauese, and retain little of the vigor of their English ancestry. One English trait they exhibit,—the hospitality which has passed into a proverb; another, perhaps,—the stanch adherence to the forms and doctrines of Episcopacy. We enter the principal church;—they are just lighting it for evening service; it is hung with candles, each burning in a clear glass shade. The walls and ceiling are whitewashed, and contrast pret-

tily with the dark timbering of the roof. We would gladly have staid to give thanks for our safe and prosperous voyage, but a black rain-cloud warns us homeward,—not, however, until we have received a kind invitation from one of the hospitable islanders to return the next morning for a drive and breakfast.

Returning soon after sunrise to fulfil this promise, we encounter the barracks, and are tempted to look in and see the sons of darkness performing their evolutions. The morning drill is about half over. We peep in,—the Colonel, a lean Don Quixote on a leaner Rosinante, dashes up to us with a weak attempt at a canter; he courteously invites us to come in and see all that is to be seen, and, lo! our friend the Major, quite gallant in his sword and scarlet jacket, is detailed for our service. The soldiers are black, and very black,—none of your dubious American shades, ranging from clear salmon to *café au lait* or even to *café noir*. These are your good, satisfactory, African sables, warranted not to change in the washing. Their Zouave costume is very becoming, with the Oriental turban, caftan, and loose trousers; and the Philosopher of our party remarks, that the African requires costume, implying that the New Englander can stand alone, as can his clothes, in their black rigidity. The officers are white, and the Major very polite; he shows us the men, the arms, the kits, the quarters, and, having done all that he can do for us, relinquishes us with a gallant bow to our host of the drive and breakfast.

The drive does something to retrieve the character of the island. The road is hard and even, overhung with glossy branches of strange trees bearing unknown fruits, and studded on each side with pleasant villas and with negro huts. There are lovely flowers everywhere, among which the Hibiscus, called South-Sea Rose, and the Oleander, are most frequent, and most brilliant. We see many tall groves of cocoa-nut, and cast longing glances towards the fruit, which little negroes, with surprising activity, at-

tain and shake down. A sudden turn in the road discloses a lovely view of the bay, with its wonderful green waters, clear and bright as emerald;—there is a little beach, and boats lie about, and groups of negroes are laughing and chattering,—quoting stocks from the last fish-market, very likely. We purchase for half a dollar a bunch of bananas, for which Ford or Palmer would ask us ten dollars at least, and go rejoicing to our breakfast.

Our host is a physician of the island, English by birth, and retaining his robust form and color in spite of a twenty-years' residence in the warm climate. He has a pleasant family of sons and daughters, all in health, but without a shade of pink in lips or cheeks. The breakfast consists of excellent fried fish, fine Southern hominy,—not the pebbly broken corn which our dealers impose under that name,—various hot cakes, tea and coffee, bananas, sapodillas, and if there be anything else not included in the present statement, let haste and want of time excuse the omission. The conversation runs a good deal on the hopes of increasing prosperity which the new mail-steamer opens to the eyes of the Nassause. Invalids, they say, will do better there than in Cuba,—it is quieter, much cheaper, and the climate is milder. There will be a hotel, very soon, where no attention will be spared, etc., etc. The Government will afford every facility, etc., etc. It seemed, indeed, a friendly little place, with delicious air and sky, and a good, reasonable, decent, English tone about it. Expenses moderate, ye fathers of encroaching families. Negroes abundant and natural, ye students of ethnological possibilities. Officers in red jackets, you young ladies,—young ones, some of them. Why wouldn't you all try it, especially as the captain of the "Karnak" is an excellent sailor, and the kindest and manliest of conductors?

FROM NASSAU TO CUBA.

THE breakfast being over, we recall the captain's parting admonition to be on

board by ten o'clock, with the significant gesture and roll of the eye which clearly express that England expects every passenger to do his duty. Now we know very well that the "Karnak" is not likely to weigh anchor before twelve, at the soonest, but we dare not, for our lives, disobey the captain. So, passing by yards filled with the huge Bahama sponges, piles of wreck-timber, fishing-boats with strange fishes, red, yellow, blue, and white, and tubs of aldermanic turtle, we attain the shore, and, presently, the steamer. Here we find a large deputation of the towns-people taking passage with us for a pleasure excursion to Havana. The greater number are ladies and children. They come fluttering on board, poor things, like butterflies, in gauzy dresses, hats, and feathers, according to the custom of their country; one gentleman takes four little daughters with him for a holiday. We ask ourselves whether they know what an ugly beast the Gulf-Stream is, that they affront him in such light armor. "Good heavens! how sick they will be!" we exclaim; while they eye us askance, in our winter trim, and pronounce us slow, and old fogies. With all the rashness of youth, they attack the luncheon-table. So boisterous a popping of corks was never heard in all our boisterous passage;—there is a chorus, too, of merry tongues and shrill laughter. But we get fairly out to sea, where the wind, an adverse one, is waiting for us, and at that gay table there is silence, followed by a rush and disappearance. The worst cases are hurried out of sight, and, going above, we find the disabled lying in groups about the deck, the feather-hats discarded, the muslins crumpled, and we, the old fogies, going to cover the fallen with shawls and blankets, to speak words of consolation, and to implore the sufferers not to cure themselves with brandy, soda-water, claret, and wine-bitters, in quick succession,—which they, nevertheless, do, and consequently are no better that day, nor the next.

But I am forgetting to chronicle a

touching parting interview with the Major, the last thing remembered in Nassau, and of course the last to be forgotten anywhere. Our concluding words might best be recorded in the form of a catechism of short questions and answers, to wit:—

“How long did the Major expect to stay in Nassau?”

“About six months.”

“How long would he stay, if he had his own way?”

“Not one!”

“What did he come for, then?”

“Oh, you buy into a nigger regiment for promotion.”

These were the most important facts elicited by cross-examination. At last we shook hands warmly, promising to meet again somewhere, and the crimson-lined barge with the black Zouaves carried him away. In humbler equipages depart the many black women who have visited the steamer, some for amusement, some to sell the beautiful shell-work made on the island. These may be termed, in general, as ugly a set of wenches as one could wish not to see. They all wear palm-leaf hats stuck on their heads without strings or ribbons, and their clothes are so ill-made that you cannot help thinking that each has borrowed somebody else's dress, until you see that the ill-fitting garments are the rule, not the exception.

But neither youth nor sea-sickness lasts forever. The forces of nature rally on the second day, and the few who have taken no remedies recover the use of their tongues and some of their faculties. From these I gather what I shall here impart as

SERIOUS VIEWS OF THE BAHAMAS.

THE principal exports of these favored islands are fruits, sponges, molasses, and sugar. Their imports include most of the necessities of life, which come to them oftenest in the form of wrecks, by which they obtain them at a small fraction of the original cost and value. For this resource they are in-

debted to the famous Bahama Banks, which, to their way of thinking, are institutions as important as the Bank of England itself. These banks stand them in a handsome annual income, and facilitate large discounts and transfers of property not contemplated by the original possessors. One supposes that somebody must suffer by these forced sales of large cargoes at prices ruinous to commerce,—but *who* suffers is a point not easy to ascertain. There seems to be a good, comfortable understanding all round. The owners say, “Go ahead, and don't bother yourself,—she's insured.” The captain has got his ship aground in shoal water where she can't sink, and no harm done. The friendly wreckers are close at hand to haul the cargo ashore. The underwriter of the insurance company has shut his eyes and opened his mouth to receive a plum, which, being a good large one, will not let him speak. And so the matter providentially comes to pass, and “enterprises of great pith and moment” oftenest get no farther than the Bahamas.

Nassau produces neither hay nor corn,—these, together with butter, flour, and tea, being brought chiefly from the United States. Politics, of course, it has none. As to laws, the colonial system certainly needs propping up,—for under its action a man may lead so shameless a life of immorality as to compel his wife to leave him, and yet not be held responsible for her support and that of the children she has borne him. The principal points of interest are, first, the garrison,—secondly, Government-House, with an occasional ball there,—and, third, one's next-door neighbor, and his or her doings. The principal event in the memory of the citizens seems to be a certain most desirable wreck, in consequence of which, a diamond card-case worth fifteen hundred dollars was sold for an eighth part of that sum, and laces whose current price ranges from thirty to forty dollars a yard were purchased at will for seventy-five cents. That was a wreck worth having! say the Nassauese. The

price of milk ranges from eighteen to twenty-five cents a quart;—think of that, ye New England housekeepers! That precious article, the pudding, is nearly unknown in the Nassauese economy; nor is pie-crust so short as it might be, owing to the enormous price of butter, which has been known to attain the sum of one dollar per pound. Eggs are quoted at prices not commendable for large families with small means. On the other hand, fruits, vegetables, and sugar-cane are abundant.

The Nassauese, on the whole, seem to be a kind-hearted and friendly set of people, partly English, partly Southern in character, but with rather a predominance of the latter ingredient in their composition. Their women resemble the women of our own Southern States, but seem simpler and more domestic in their habits,—while the men would make tolerable Yankees, but would scarcely support President Buchanan, the Kansas question, or the Filibustero movement. Physically, the race suffers and degenerates under the influence of the warm climate. Cases of pulmonary disease, asthma, and neuralgia are of frequent occurrence, and cold is considered as curative to them as heat is to us. The diet, too, is not that “giant ox-beef” which the Saxon race requires. Meat is rare, and tough, unless brought from the States at high cost. We were forced to the conclusion that no genuine English life can be supported upon a *régime* of fish and fruit,—or, in other words, no beef, no Bull, but a very different sort of John, lantern-jawed, leather-skinned, and of a thirsty complexion. It occurred to us, furthermore, that it is a dolorous thing to live on a lonely little island, tied up like a wart on the face of civilization,—no healthful stream of life coming and going from the great body of the main land,—the same moral air to be breathed over and over again, without renewal,

—the same social elements turned and returned in one tiresome kaleidoscope. Wherefore rejoice, ye Continentals, and be thankful, and visit the Nassauese, bringing beef, butter, and beauty,—bringing a few French muslins to replace the coarse English fabrics, and buxom Irish girls to outwork the idle negro women,—bringing new books, newspapers, and periodicals,—bringing the Yankee lecturer, all expenses paid, and his drink found him. All these good things, and more, the States have for the Nassauese, of whom we must now take leave, for all hands have been piped on deck.

We have jolted for three weary days over the roughest of ocean-highways, and Cuba, nay, Havana, is in sight. The worst cases are up, and begin to talk about their sea-legs, now that the occasion for them is at an end. Sobrina, the chief wit of our party, who would eat sour-sop, sapodilla, orange, banana, cocoa-nut, and sugar-cane at Nassau, and who has lived upon toddy of twenty-cocktail power ever since,—even she is seen, clothed and in her right mind, sitting at the feet of the prophet she loves, and going through the shawl-and-umbrella exercise. And here is the Moro Castle, which guards the entrance of the harbor,—here go the signals, answering to our own. Here comes the man with the speaking-trumpet, who, understanding no English, yells out to our captain, who understands no Spanish. The following is a free rendering of their conversation:—

“Any Americans on board?”

“Yes, thank Heaven, plenty.”

“How many are Filibusteros?”

“All of them.”

“Bad luck to them, then!”

“The same to you!”

“*Caramba*,” says the Spaniard.

“——,” says the Englishman.

And so the forms of diplomacy are fulfilled; and of Havana, more in my next.

[To be continued.]

THE PROFESSOR AT THE BREAKFAST-TABLE.

WHAT HE SAID, WHAT HE HEARD, AND WHAT HE SAW.

The Professor finds a Fly in his Teacup.

I HAVE a long theological talk to relate, which must be dull reading to some of my young and vivacious friends. I don't know, however, that any of them have entered into a contract to read all that I write, or that I have promised always to write to please them. What if I should sometimes write to please myself?

Now you must know that there are a great many things which interest me, to some of which this or that particular class of readers may be totally indifferent. I love Nature, and human nature, its thoughts, affections, dreams, aspirations, delusions,—Art in all its forms,—*virtu* in all its eccentricities,—old stories from black-letter volumes and yellow manuscripts, and new projects out of hot brains not yet imbedded in the snows of age. I love the generous impulses of the reformer; but not less does my imagination feed itself upon the old litanies, so often warmed by the human breath upon which they were wafted to heaven that they glow through our frames like our own heart's blood. I hope I love good men and women; I know that they never speak a word to me, even if it be of question or blame, that I do not take pleasantly, if it is expressed with a reasonable amount of human kindness.

I have before me at this time a beautiful and affecting letter, which I have hesitated to answer, though the postmark upon it gave its direction, and the name is one which is known to all, in some of its representatives. It contains no reproach, only a delicately-hinted fear. Speak gently, as this dear lady has spoken, and there is no heart so insensible that it does not answer to the appeal, no intellect so virile that it does not own a certain allegiance to the claims of age, of childhood, of sensitive and timid natures, when they

plead with it not to look at those sacred things by the broad daylight which they see in mystic shadow. How grateful would it be to make perpetual peace with these pleading saints and their confessors, by the simple act that silences all complainings! Sleep, sleep, sleep! says the Arch-Enchantress of them all,—and pours her dark and potent anodyne, distilled over the fires that consumed her foes,—its large, round drops changing, as we look, into the beads of her convert's rosary! Silence! the pride of reason! cries another, whose whole life is spent in reasoning down reason.

I hope I love good people, not for their sake, but for my own. And most assuredly, if any deed of wrong or word of bitterness led me into an act of disrespect towards that enlightened and excellent class of men who make it their calling to teach goodness and their duty to practise it, I should feel that I had done myself an injury rather than them. Go and talk with any professional man holding any of the mediæval creeds, choosing one who wears upon his features the mark of inward and outward health, who looks cheerful, intelligent, and kindly, and see how all your prejudices melt away in his presence! It is impossible to come into intimate relations with a large, sweet nature, such as you may often find in this class, without longing to be at one with it in all its modes of being and believing. But does it not occur to you that one may love truth as he sees it, and his race as he views it, better than even the sympathy and approbation of many good men whom he honors,—better than sleeping to the sound of the Miserere or listening to the repetition of an effete Confession of Faith?

The three learned professions have but recently emerged from a state of *quasi* barbarism. None of them like too well

to be told of it, but it must be sounded in their ears whenever they put on airs. When a man has taken an overdose of laudanum, the doctors tell us to place him between two persons who shall make him walk up and down incessantly; and if he still cannot be kept from going to sleep, they say that a lash or two over his back is of great assistance.

So we must keep the doctors awake by telling them that they have not yet shaken off astrology and the doctrine of signatures, as is shown by their prescriptions, and their use of nitrate of silver, which turns epileptics into Ethiopians. If that is not enough, they must be given over to the scourgers, who like their task and get good fees for it. A few score years ago, sick people were made to swallow burnt toads and powdered earthworms and the expressed juice of woodlice. The physician of Charles I. and II. prescribed abominations not to be named. Barbarism, as bad as that of Congo or Ashantee. Traces of this barbarism linger even in the greatly improved medical science of our century. So while the solemn farce of over-drugging is going on, the world over, the harlequin pseudo-science jumps on to the stage, whip in hand, with half-a-dozen somersets, and begins laying about him.

In 1817, perhaps you remember, the law of wager by battle was unrepealed, and the rascally murderous, and worse than murderous, clown, Abraham Thornton, put on his gauntlet in open court and defied the appellant to lift the other which he threw down. It was not until the reign of George II. that the statutes against witchcraft were repealed. As for the English Court of Chancery, we know that its antiquated abuses form one of the staples of common proverbs and popular literature. So the laws and the lawyers have to be watched perpetually by public opinion as much as the doctors do.

I don't think the other profession is an exception. When the Reverend Mr. Cauvin and his associates burned my distinguished scientific brother,—he was

burned with green fagots, which made it rather slow and painful,—it appears to me they were in a state of religious barbarism. The dogmas of such people about the Father of Mankind and his creatures are of no more account in my opinion than those of a council of Aztecs. If a man picks your pocket, do you not consider him thereby disqualified to pronounce any authoritative opinion on matters of ethics? If a man hangs my ancient female relatives for sorcery, as they did in this neighborhood a little while ago, or burns my instructor for not believing as he does, I care no more for his religious edicts than I should for those of any other barbarian.

Of course, a barbarian may hold many true opinions; but when the ideas of the healing art, of the administration of justice, of Christian love, could not exclude systematic poisoning, judicial duelling, and murder for opinion's sake, I do not see how we can trust the verdict of that time relating to any subject which involves the primal instincts violated in these abominations and absurdities.—What if we are even now in a state of *semi-barbarism*?

Perhaps some think we ought not to talk at table about such things.—I am not so sure of that. Religion and government appear to me the two subjects which of all others should belong to the common talk of people who enjoy the blessings of freedom. Think, one moment. The earth is a great factory-wheel, which, at every revolution on its axis, receives fifty thousand raw souls and turns off nearly the same number worked up more or less completely. There must be somewhere a population of two hundred thousand million, perhaps ten or a hundred times as many, earth-born intelligences. *Life*, as we call it, is nothing but the edge of the boundless ocean of existence where it comes on soundings. In this view, I do not see anything so fit to talk about, or half so interesting, as that which relates to the innumerable majority of our fellow-creatures, the dead-living, who are hundreds of thousands to

one of the live-living, and with whom we all potentially belong, though we have got tangled for the present in some parcels of fibrine, albumen, and phosphates, that keep us on the minority side of the house. In point of fact, it is one of the many results of *Spiritualism* to make the permanent destiny of the race a matter of common reflection and discourse, and a vehicle for the prevailing disbelief of the Middle-Age doctrines on the subject. I cannot help thinking, when I remember how many conversations my friend and myself have reported, that it would be very extraordinary, if there were no mention of that class of subjects which involves all that we have and all that we hope, not merely for ourselves, but for the dear people whom we love best,—noble men, pure and lovely women, ingenuous children,—about the destiny of nine-tenths of whom you know the opinions that would have been taught by those old man-roasting, woman-strangling dogmatists.—However, I fought this matter with one of our boarders the other day, and I am going to report the conversation.

The divinity-student came down, one morning, looking rather more serious than usual. He said little at breakfast-time, but lingered after the others, so that I, who am apt to be long at the table, found myself alone with him.

When the rest were all gone, he turned his chair round towards mine, and began.

I am afraid,—he said,—you express yourself a little too freely on a most important class of subjects. Is there not danger in introducing discussions or allusions relating to matters of religion into common discourse?

Danger to what?—I asked.

Danger to truth,—he replied, after a slight pause.

I didn't know Truth was such an invalid,—I said.—How long is it since she could only take the air in a close carriage, with a gentleman in a black coat on the box? Let me tell you a story,

adapted to young persons, but which won't hurt older ones.

—There was a very little boy who had one of those balloons you may have seen, which are filled with light gas, and are held by a string to keep them from running off in aeronautic voyages on their own account. This little boy had a naughty brother, who said to him, one day,—Brother, pull down your balloon, so that I can look at it and take hold of it. Then the little boy pulled it down. Now the naughty brother had a sharp pin in his hand, and he thrust it into the balloon, and all the gas oozed out, so that there was nothing left but a shrivelled skin.

One evening, the little boy's father called him to the window to see the moon, which pleased him very much; but presently he said,—Father, do not pull the string and bring down the moon, for my naughty brother will prick it, and then it will all shrivel up and we shall not see it any more.

Then his father laughed, and told him how the moon had been shining a good while, and would shine a good while longer, and that all we could do was to keep our windows clean, never letting the dust get too thick on them, and especially to keep our eyes open, but that we could not pull the moon down with a string, nor prick it with a pin.—Mind you this, too, the moon is no man's private property, but is seen from a good many parlor-windows.

—Truth is tough. It will not break, like a bubble, at a touch; nay, you may kick it about all day, like a football, and it will be round and full at evening. Does not Mr. Bryant say, that Truth gets well if she is run over by a locomotive, while Error dies of lockjaw if she scratches her finger? I never heard that a mathematician was alarmed for the safety of a demonstrated proposition. I think, generally, that fear of open discussion implies feebleness of inward conviction, and great sensitiveness to the expression of individual opinion is a mark of weakness.

—I am not so much afraid for truth,

—said the divinity-student,—as for the conceptions of truth in the minds of persons not accustomed to judge wisely the opinions uttered before them.

Would you, then, banish all allusions to matters of this nature from the society of people who come together habitually?

I would be very careful in introducing them,—said the divinity-student.

Yes, but friends of yours leave pamphlets in people's entries, to be picked up by nervous misses and hysteric house-maids, full of doctrines these people do not approve. Some of your friends stop little children in the street, and give them books, which their parents, who have had them baptized into the Christian fold and give them what they consider proper religious instruction, do not think fit for them. One would say it was fair enough to talk about matters thus forced upon people's attention.

The divinity-student could not deny that this was what might be called opening the subject to the discussion of intelligent people.

But,—he said,—the greatest objection is this, that persons who have not made a professional study of theology are not competent to speak on such subjects. Suppose a minister were to undertake to express opinions on medical subjects, for instance, would you not think he was going beyond his province?

I laughed,—for I remembered John Wesley's "sulphur and supplication," and so many other cases where ministers had meddled with medicine,—sometimes well and sometimes ill, but, as a general rule, with a tremendous lurch to quackery, owing to their very loose way of admitting evidence,—that I could not help being amused.

I beg your pardon,—I said,—I do not wish to be impolite, but I was thinking of their certificates to patent medicines. Let us look at this matter.

If a minister had attended lectures on the theory and practice of medicine, delivered by those who had studied it most deeply, for thirty or forty years, at the

rate of from fifty to one hundred a year,—if he had been constantly reading and hearing read the most approved textbooks on the subject,—if he had seen medicine actually practised according to different methods, daily, for the same length of time,—I should think, that, if a person of average understanding, he *was* entitled to express an opinion on the subject of medicine, or else that his instructors were a set of ignorant and incompetent charlatans.

If, before a medical practitioner would allow me to enjoy the full privileges of the healing art, he expected me to affirm my belief in a considerable number of medical doctrines, drugs, and formulæ, I should think that he thereby implied my right to discuss the same, and my ability to do so, if I knew how to express myself in English.

Suppose, for instance, the Medical Society should refuse to give us an opiate, or to set a broken limb, until we had signed our belief in a certain number of propositions,—of which we will say this is the first:—

I. All men's teeth are naturally in a state of total decay or caries, and, therefore, no man can bite until every one of them is extracted and a new set is inserted according to the principles of dentistry adopted by this Society.

I, for one, should want to discuss that before signing my name to it, and I should say this:—Why, no, that isn't true. There are a good many bad teeth, we all know, but a great many more good ones. You mustn't trust the *dentists*; they are all the time looking at the people who have bad teeth, and such as are suffering from toothache. The idea that you must pull out every one of every nice young man and young woman's natural teeth! Poh, poh! Nobody believes that. This tooth must be straightened, that must be filled with gold, and this other perhaps extracted; but it must be a very rare case, if they are all so bad as to require extraction; and if they are, don't blame the poor soul for it! Don't tell us, as some old dentists used to, that

everybody not only always has every tooth in his head good for nothing, but that he ought to have his head cut off as a punishment for that misfortune! No, I can't sign Number One. Give us Number Two.

II. We hold that no man can be well who does not agree with our views of the efficacy of calomel, and who does not take the doses of it prescribed in our tables, as there directed.

To which I demur, questioning why it should be so, and get for answer the two following:—

III. Every man who does not take our prepared calomel, as prescribed by us in our Constitution and By-Laws, is and must be a mass of disease from head to foot; it being self-evident that he is simultaneously affected with Apoplexy, Arthritis, Ascites, Asphyxia, and Atrophy; with Borborygmus, Bronchitis, and Bulimia; with Cachexia, Carcinoma, and Cretinismus; and so on through the alphabet, to Xerophthalmia and Zona, with all possible and incompatible diseases which are necessary to make up a totally morbid state; and he will certainly die, if he does not take freely of our prepared calomel, to be obtained only of one of our authorized agents.

IV. No man shall be allowed to take our prepared calomel who does not give in his solemn adhesion to each and all of the above-named and the following propositions (from ten to a hundred) and show his mouth to certain of our apothecaries, who have *not* studied dentistry, to examine whether all his teeth have been extracted and a new set inserted according to our regulations.

Of course, the doctors have a right to say we shan't have any rhubarb, if we don't sign their articles, and that, if, after signing them, we express doubts (in public) about any of them, they will cut us off from our jalap and squills,—but then to ask a fellow not to discuss the propositions before he signs them is what I should call boiling it down a little *too* strong!

If we understand them, why can't we

discuss them? If we can't understand them, because we haven't taken a medical degree, what the Father of Lies do they ask us to sign them for?

Just so with the graver profession. Every now and then some of its members seem to lose common sense and common humanity. The laymen have to keep setting the divines right constantly. Science, for instance,—in other words, knowledge,—is not the enemy of religion; for, if so, then religion would mean ignorance. But it is often the antagonist of school-divinity.

Everybody knows the story of early astronomy and the school-divines. Come down a little later. Archbishop Usher, a very learned Protestant prelate, tells us that the world was created on Sunday, the twenty-third of October, four thousand and four years before the birth of Christ. Deluge, December 7th, two thousand three hundred and forty-eight years B. C.—Yes, and the earth stands on an elephant, and the elephant on a tortoise. One statement is as near the truth as the other.

Again, there is nothing so brutalizing to some natures as *moral surgery*. I have often wondered that Hogarth did not add one more picture to his four stages of Cruelty. Those wretched fools, reverend divines and others, who were strangling men and women for imaginary crimes a little more than a century ago among us, were set right by a layman, and very angry it made them to have him meddle.

The good people of Northampton had a very remarkable man for their clergyman,—a man with a brain as nicely adjusted for certain mechanical processes as Babbage's calculating machine. The commentary of the laymen on the preaching and practising of Jonathan Edwards was, that, after twenty-three years of endurance, they turned him out by a vote of twenty to one, and passed a resolve that he should never preach for them again. A man's logical and analytical adjustments are of little consequence, compared to his primary rela-

tions with Nature and truth; and people have sense enough to find it out in the long run; they know what "logic" is worth.

In that miserable delusion referred to above, the reverend Aztecs and Fijians argued rightly enough from their premises, no doubt, for many men can do this. But common sense and common humanity were unfortunately left out from their premises, and a layman had to supply them. A hundred more years and many of the barbarisms still lingering among us will, of course, have disappeared like witch-hanging. But people are sensitive now, as they were then. You will see by this extract that the Rev. Cotton Mather did not like intermeddling with his business very well. "Let the *Levites* of the Lord keep close to their Instructions," he says, "and *God will smite thro' the loins of those that rise up against them*. I will report unto you a Thing which many Hundreds among us know to be true. The *Godly Minister* of a certain Town in Connecticut, when he had occasion to be absent on a *Lord's Day* from his Flock, employ'd an honest *Neighbour* of some small Talents for a *Mechanick*, to read a *Sermon* out of some good Book unto 'em. This *Honest*, whom they ever counted also a *Pious Man*, had so much conceit of his *Talents*, that instead of *Reading a Sermon* appointed, he to the *Surprize* of the People, fell to *preaching one of his own*. For his Text he took these Words, '*Despise not Prophesyings*'; and in his *Preachment* he betook himself to bewail the *Envy of the Clergy* in the Land, in that they did not wish *all the Lord's People to be Prophets*, and call forth *Private Brethren* publickly to *prophesie*. While he was thus in the midst of his Exercise, God smote him with horrible *Madness*; he was taken ravingly distracted; the People were forc'd with violent Hands to carry him home. . . . I will not mention his Name: He was reputed a *Pious Man*."—This is one of Cotton's "Remarkable Judgments of God, on Several Sorts of Offenders,"—and the next cases referred

to are the Judgments on the "Abominable Sacrilege" of not paying the Ministers' Salaries.

This sort of thing doesn't do here and now, you see, my young friend! We talk about our free institutions;—they are nothing but a coarse outside machinery to secure the freedom of individual thought. The President of the United States is only the engine-driver of our broad-gauge mail-train; and every honest, independent thinker has a seat in the first-class cars behind him.

—There is something in what you say,—replied the divinity-student;—and yet it seems to me there are places and times where disputed doctrines of religion should not be introduced. You would not attack a church dogma—say, Total Depravity—in a lyceum-lecture, for instance?

Certainly not; I should choose another place,—I answered.—But, mind you, at this table I think it is very different. I shall express my ideas on any subject I like. The laws of the lecture-room, to which my friends and myself are always amenable, do not hold here. I shall not often give arguments, but frequently opinions,—I trust with courtesy and propriety, but, at any rate, with such natural forms of expression as it has pleased the Almighty to bestow upon me.

A man's opinions, look you, are generally of much more value than his arguments. These last are made by his brain, and perhaps he does not believe the proposition they tend to prove,—as is often the case with paid lawyers; but opinions are formed by our whole nature,—brain, heart, instinct, brute life, everything all our experience has shaped for us by contact with the whole circle of our being.

—There is one thing more,—said the divinity-student,—that I wished to speak of; I mean that idea of yours, expressed some time since, of *depolarizing* the text of sacred books in order to judge them fairly. May I ask why you do not try the experiment yourself?

Certainly,—I replied,—if it gives you any pleasure to ask foolish questions. I think the ocean telegraph-wire ought to be laid and will be laid, but I don't know that you have any right to ask me to go and lay it. But, for that matter, I have heard a good deal of Scripture depolarized in and out of the pulpit. I heard the Rev. Mr. F. once depolarize the story of the Prodigal Son in Park-Street Church. Many years afterwards, I heard him repeat the same or a similar depolarized version in Rome, New York. I heard an admirable depolarization of the story of the young man who "had great possessions" from the Rev. Mr. H. in another pulpit, and felt that I had never half understood it before. All paraphrases are more or less perfect depolarizations. But I tell you this: the faith of our Christian community is not robust enough to bear the turning of our most sacred language into its depolarized equivalents. You have only to look back to Dr. Channing's famous Baltimore discourse and remember the shrieks of blasphemy with which it was greeted, to satisfy yourself on this point. Time, time only, can gradually wean us from our *Epeolatry*, or word-worship, by spiritualizing our ideas of the thing signified. Man is an idolater or symbol-worshipper by nature, which, of course, is no fault of his; but sooner or later all his local and temporary symbols must be ground to powder, like the golden calf,—word-images as well as metal and wooden ones. Rough work, iconoclasm,—but the only way to get at truth. It is, indeed, as that quaint and rare old discourse, "A Summons for Sleepers," hath it, "no doubt a thankless office, and a verie unthriftee occupation; *veritas odium parit*, truth never goeth without a scratcht face; he that will be busie with *væ vobis*, let him looke shortly for *coram nobis*."

The very aim and end of our institutions is just this: that we may think what we like and say what we think.

—Think what we like!—said the divinity-student;—think what we like!

What! against all human and divine authority?

Against all human versions of its own or any other authority. At our own peril always, if we do not *like* the right,—but not at the risk of being hanged and quartered for political heresy, or broiled on green fagots for ecclesiastical treason! Nay, we have got so far, that the very word *heresy* has fallen into comparative disuse among us.

And now, my young friend, let us shake hands and stop our discussion, which we will not make a quarrel. I trust you know, or will learn, a great many things in your profession which we common scholars do not know; but mark this: when the common people of New England stop talking politics and theology, it will be because they have got an Emperor to teach them the one, and a Pope to teach them the other!

That was the end of my long conference with the divinity-student. The next morning we got talking a little on the same subject, very good-naturedly, as people return to a matter they have talked out.

You must look to yourself,—said the divinity-student,—if your democratic notions get into print. You will be fired into from all quarters.

If there were only a bullet, with the marksman's name on it!—I said.—I can't stop to pick out the peep-shot of the anonymous scribblers.

Right, Sir! right!—said Little Boston.—The scamps! I know the fellows. They can't give fifty cents to one of the Antipodes, but they must have it jingled along through everybody's palms all the way, till it reaches him,—and forty cents of it get spilt, like the water out of the fire-buckets passed along a "lane" at a fire;—but when it comes to anonymous defamation, putting lies into people's mouths, and then advertising those people through the country as the authors of them,—oh, then it is that they let not their left hand know what their right hand doeth!

I don't like Ehud's style of doing business, Sir. He comes along with a very sanctimonious look, Sir, with his "secret errand unto thee," and his "message from God unto thee," and then pulls out his hidden knife with that unsuspected left hand of his,—(the little gentleman lifted his clenched left hand with the blood-red jewel on the ring-finger,)—and runs it, blade and haft, into a man's stomach! Don't meddle with these fellows, Sir. They are read mostly by persons whom you would not reach, if you were to write ever so much. Let 'em alone. A man whose opinions are not attacked is beneath contempt.

I hope so,—I said.—I got three pamphlets and innumerable squibs flung at my head for attacking one of the pseudo-sciences, in former years. When, by the permission of Providence, I held up to the professional public the damnable facts connected with the conveyance of poison from one young mother's chamber to another's,—for doing which humble office I desire to be thankful that I have lived, though nothing else good should ever come of my life,—I had to bear the sneers of those whose position I had assailed, and, as I believe, have at last demolished, so that nothing but the ghosts of dead women stir among the ruins.—What would you do, if the folks without names kept at you, trying to get a San Benito on to your shoulders that would fit you?—Would you stand still in fly-time, or would you give a kick now and then?

Let 'em bite!—said Little Boston;—let 'em bite! It makes 'em hungry to shake 'em off, and they settle down again as thick as ever and twice as savage. Do you know what meddling with the folks without names, as you call 'em, is like?—It is like riding at the *quintain*. You run full tilt at the board, but the board is on a pivot, with a bag of sand on an arm that balances it. The board gives way as soon as you touch it; and before you have got by, the bag of sand comes round whack on the back of your neck. "Ananias," for instance, pitches into your

lecture, we will say, in some paper taken by the people in your kitchen. Your servants get sauey and negligent. If their newspaper calls you names, they need not be so particular about shutting doors softly or boiling potatoes. So you lose your temper, and come out in an article which you think is going to finish "Ananias," proving him a booby who doesn't know enough to understand even a lyceum-lecture, or else a person that tells lies. Now you think you've got him! Not so fast. "Ananias" keeps still and winks to "Shimei," and "Shimei" comes out in the paper which they take in your neighbor's kitchen, ten times worse than t'other fellow. If you meddle with "Shimei," he steps out, and next week appears "Rab-shakeh," an unsavory wretch; and now, at any rate, you find out what good sense there was in Hezekiah's "Answer him not."—No, no,—keep your temper.—So saying, the little gentleman doubled his left fist and looked at it, as if he should like to hit something or somebody a most pernicious punch with it.

Good!—said I.—Now let me give you some axioms I have arrived at, after seeing something of a great many kinds of good folks.

—Of a hundred people of each of the different leading religious sects, about the same proportion will be safe and pleasant persons to deal and to live with.

—There are, at least, three real saints among the women to one among the men, in every denomination.

—The spiritual standard of different classes I would reckon thus:—

1. The comfortably rich.
2. The decently comfortable.
3. The very rich, who are apt to be irreligious.
4. The very poor, who are apt to be immoral.

—The cut nails of machine-divinity may be driven in, but they won't clinch.

—The arguments which the greatest of our schoolmen could not refute were two: the blood in men's veins, and the milk in women's breasts.

—Humility is the first of the virtues
—for other people.

—Faith always implies the disbelief
of a lesser fact in favor of a greater. A
little mind often sees the unbelief, with-
out seeing the belief, of a large one.

The Poor Relation had been fidgeting
about and working her mouth while all
this was going on. She broke out in
speech at this point.

I hate to hear folks talk so. I don't
see that you are any better than a hea-
then.

I wish I were half as good as many
heathens have been,—I said.—Dying
for a principle seems to me a higher de-
gree of virtue than scolding for it; and
the history of heathen races is full of in-
stances where men have laid down their
lives for the love of their kind, of their
country, of truth, nay, even for simple
manhood's sake, or to show their obedi-
ence or fidelity. What would not such
beings have done for the souls of men,
for the Christian commonwealth, for the
King of Kings, if they had lived in days
of larger light? Which seems to you
nearest heaven, Socrates drinking his
hemlock, Regulus going back to the en-
emy's camp, or that old New England
divine sitting comfortably in his study
and chuckling over his conceit of certain
poor women, who had been burned to
death in his own town, going "roaring
out of one fire into another"?

I don't believe he said any such thing,
—replied the Poor Relation.

It is hard to believe,—said I,—but it
is true for all that. In another hundred
years it will be as incredible that men
talked as we sometimes hear them now.

Cor facit theologum. The heart makes
the theologian. Every race, every civ-
ilization, either has a new revelation of
its own or a new interpretation of an old
one. Democratic America has a differ-
ent humanity from feudal Europe, and
so must have a new divinity. See, for
one moment, how intelligence reacts on
our faiths. The Bible was a divining-
book to our ancestors, and is so still in
the hands of some of the vulgar. The

Puritans went to the Old Testament for
their laws; the Mormons go to it for their
patriarchal institution. Every generation
dissolves something new and precipitates
something once held in solution from that
great storehouse of temporary and per-
manent truths.

You may observe this; that the con-
versation of intelligent men of the strict-
er sects is strangely in advance of the for-
mulæ that belong to their organizations.
So true is this, that I have doubts wheth-
er a large proportion of them would not
have been rather pleased than offended,
if they could have overheard our talk.
For, look you, I think there is hardly
a professional teacher who will not in-
private conversation allow a large part
of what we have said, though it may
frighten him in print; and I know well
what an under-current of secret symp-
athy gives vitality to those poor words
of mine which sometimes get a hearing.

I don't mind the exclamation of any
old stager who drinks Madeira worth
from two to six Bibles a bottle, and burns,
according to his own premises, a dozen
souls a year in the cigars with which he
muddles his brains. But for the good
and true and intelligent men whom we
see all around us, laborious, self-denying,
hopeful, helpful,—men who know that
the active mind of the century is tending
more and more to the two poles, Rome
and Reason, the sovereign church or the
free soul, authority or personality, God
in us or God in our masters, and that,
though a man may by accident *stand*
half-way between these two points, he
must *look* one way or the other,—I don't
believe they would take offence at any-
thing I have reported of our late conver-
sation.

But supposing any one *do* take offence
at first sight, let him look over these notes
again, and see whether he is quite sure
he does not agree with most of these
things that were said amongst us. If he
agrees with most of them, let him be pa-
tient with an opinion he does not accept,
or an expression or illustration a little too
vivacious. I don't know that I shall re-

port any more conversations on these topics; but I do insist on the right to express a civil opinion on this class of subjects without giving offence, just when and where I please,—unless, as in the lecture-room, there is an implied contract to keep clear of doubtful matters. You didn't think a man could sit at a breakfast-table doing nothing but making puns every morning for a year or two, and never give a thought to the two thousand of his fellow-creatures who are passing into another state during every hour that he sits talking and laughing! Of course, the *one* matter that a real human being cares for is what is going to become of them and of him. And the plain truth is, that a good many people are saying one thing about it and believing another.

—How do I know that? Why, I have known and loved to talk with good people, all the way from Rome to Geneva in doctrine, as long as I can remember. Besides, the real religion of the world comes from women much more than from men,—from mothers most of all, who carry the key of our souls in their bosoms. It is in their hearts that the “sentimental” religion some people are so fond of sneering at has its source. The sentiment of love, the sentiment of maternity, the sentiment of the paramount obligation of the parent to the child as having called it into existence, enhanced just in proportion to the power and knowledge of the one and the weakness and ignorance of the other,—these are the “sentiments” that have kept our soulless systems from driving men off to die in holes like those that riddle the sides of the hill opposite the Monastery of St. Saba, where the miserable victims of a falsely-interpreted religion starved and withered in their delusion.

I have looked on the face of a saintly woman this very day, whose creed many dread and hate, but whose life is lovely and noble beyond all praise. When I remember the bitter words I have heard spoken against her faith, by men who have an Inquisition which excommunicates those who ask to leave their com-

munion in peace, and an *Index Expurgatorius* on which this article may possibly have the honor of figuring,—and, far worse than these, the reluctant, pharisaical confession, that it might perhaps be *possible* that one who so believed should be accepted of the Creator,—and then recall the sweet peace and love that show through all her looks, the price of untold sacrifices and labors,—and again recollect how thousands of women, filled with the same spirit, die, without a murmur, to earthly life, die to their own names even, that they may know nothing but their holy duties,—while men are torturing and denouncing their fellows, and while we can hear day and night the clinking of the hammers that are trying, like the brute forces in the “Prometheus,” to rivet their adamantine wedges right through the breast of human nature,—I have been ready to believe that we have even now a new revelation, and the name of its Messiah is WOMAN!

—I should be sorry,—I remarked, a day or two afterwards, to the divinity-student,—if anything I said tended in any way to foster any jealousy between the professions, or to throw disrespect upon that one on whose counsel and sympathies almost all of us lean in our moments of trial. But we are false to our new conditions of life, if we do not resolutely maintain our religious as well as our political freedom, in the face of any and all supposed monopolies. Certain men will, of course, say two things, if we do not take their views: first, that we don't know anything about these matters; and, secondly, that we are not so good as they are. They have a polarized phrasology for saying these things, but it comes to precisely that. To which it may be answered, in the first place, that we have good authority for saying that even babes and sucklings know *something*; and, in the second, that, if there is a mote or so to be removed from our premises, the courts and councils of the last few years have found beams enough in some other

quarters to build a church that would hold all the good people in Boston and have sticks enough left to make a bonfire for all the heretics.

As to that terrible depolarizing process of mine, of which we were talking the other day, I will give you a specimen of one way of managing it, if you like. I don't believe it will hurt you or anybody. Besides, I had a great deal rather finish our talk with pleasant images and gentle words than with sharp sayings, which will only afford a text, if anybody repeats them, for endless relays of attacks from Messrs. Ananias, Shimei, and Rabshakeh.

[I must leave such gentry, if any of them show themselves, in the hands of my clerical friends, many of whom are ready to stand up for the rights of the laity,—and to those blessed souls, the good women, to whom this version of the story of a mother's hidden hopes and tender anxieties is dedicated by their peaceful and loving servant.]

A MOTHER'S SECRET.

How sweet the sacred legend—if unblamed
In my slight verse such holy things are named—

Of Mary's secret hours of hidden joy,
Silent, but pondering on her wondrous boy!
Ave, Maria! Pardon, if I wrong
Those heavenly words that shame my earthly song!

The choral host had closed the angel's strain
Sung to the midnight watch on Bethlehem's plain;

And now the shepherds, hastening on their way,
Sought the still hamlet where the Infant lay.
They passed the fields that gleaning Ruth
toiled o'er,—

They saw afar the ruined threshing-floor
Where Moab's daughter, homeless and forlorn,

Found Boaz slumbering by his heaps of corn;
And some remembered how the holy scribe,
Skilled in the lore of every jealous tribe,
Traced the warm blood of Jesse's royal son
To that fair alien, bravely wooed and won.
So fared they on to seek the promised sign
That marked the anointed heir of David's line.

At last, by forms of earthly semblance led,
They found the crowded inn, the oxen's shed.
No pomp was there, no glory shone around
On the coarse straw that strewed the reeking ground;

One dim retreat a flickering torch betrayed,—
In that poor cell the Lord of Life was laid!

The wondering shepherds told their breathless tale

Of the bright choir that woke the sleeping vale;
Told how the skies with sudden glory flamed;
Told how the shining multitude proclaimed,
"Joy, joy to earth! Behold the hallowed morn!"

In David's city Christ the Lord is born!
'Glory to God!' let angels shout on high,—
'Good-will to men!' the listening Earth replied!

They spoke with hurried words and accents wild;

Calm in his cradle slept the heavenly child.
No trembling word the mother's joy revealed,—

One sigh of rapture, and her lips were sealed;
Unmoved she saw the rustic train depart,
But kept their words to ponder in her heart.

Twelve years had passed; the boy was fair and tall,

Growing in wisdom, finding grace with all.
The maids of Nazareth, as they trooped to fill
Their balanced urns beside the mountain-rill,—

The gathered matrons, as they sat and spun,
Spoke in soft words of Joseph's quiet son.
No voice had reached the Galilean vale
Of star-led kings or awe-struck shepherds' tale;

In the meek, studious child they only saw
The future Rabbi, learned in Israel's law.

So grew the boy; and now the feast was near,

When at the holy place the tribes appear.
Scarce had the home-bred child of Nazareth seen

Beyond the hills that girt the village-green,
Save when at midnight, o'er the star-lit sands,
Snatched from the steel of Herod's murdering bands,

A babe, close-folded to his mother's breast,
Through Edom's wilds he sought the sheltering West.

Then Joseph spake: "Thy boy hath largely grown;

Weave him fine raiment, fitting to be shown;
Fair robes beseeem the pilgrim, as the priest:
Goes he not with us to the holy feast?"

And Mary culled the flaxen fibres white;
Till eve she spun; she spun till morning light;
The thread was twined; its parting meshes through

From hand to hand her restless shuttle flew,
Till the full web was wound upon the beam,—
Love's curious toil,—a vest without a seam!

They reach the holy place, fulfil the days
To solemn feasting given, and grateful praise.
At last they turn, and far Moriah's height
Melts in the southern sky and fades from sight.
All day the dusky caravan has flowed
In devious trails along the winding road
(For many a step their homeward path at-

tends,
And all the sons of Abraham are as friends).
Evening has come,—the hour of rest and
joy;—

Hush! hush!—that whisper,—“Where is
Mary's boy?”

O weary hour! O aching days that passed
Filled with strange fears, each wilder than the
last:

The soldier's lance,—the fierce centurion's
sword,—

The crushing wheels that whirl some Roman
lord,—

The midnight crypt that sucks the captive's
breath,—

The blistering sun on Hinnom's vale of death!
Thrice on his cheek had rained the morning
light,

Thrice on his lips the mildewed kiss of night,
Crouched by some porphyry column's shining
plinth,

Or stretched beneath the odorous terebinth.

At last, in desperate mood, they sought once
more

The Temple's porches, searched in vain be-
fore;

They found him seated with the ancient
men,—

The grim old rufflers of the tongue and pen,—
Their bald heads glistening as they clustered
near,

Their gray beards slanting as they turned to
hear,

Lost in half-envious wonder and surprise—
That lips so fresh should utter words so wise.

And Mary said,—as one who, tried too long,
Tells all her grief and half her sense of
wrong,—

“What is this thoughtless thing which thou
hast done?”

Lo, we have sought thee sorrowing, O my
son!”

Few words he spake, and scarce of filial
tone,—

Strange words, their sense a mystery yet un-
known;

Then turned with them and left the holy hill,
To all their mild commands obedient still.

The tale was told to Nazareth's sober men,
And Nazareth's matrons told it oft again;
The maids re-told it at the fountain's side;
The youthful shepherds doubted or denied;
It passed around among the listening friends,
With all that fancy adds and fiction lends,
Till newer marvels dimmed the young renown
Of Joseph's son, who talked the Rabbis down.

But Mary, faithful to its lightest word,
Kept in her heart the sayings she had heard,
Till the dread morning rent the Temple's
veil,
And shuddering Earth confirmed the wondrous
tale.

Youth fades; love droops; the leaves of friend-
ship fall:

A mother's secret hope outlives them all.

THE MINISTER'S WOOING.

[Continued.]

CHAPTER XII.

MISS PRISSY.

WILL our little Mary really fall in
love with the Doctor?—The question
reaches us in anxious tones from all the
circle of our readers; and what especial-
ly shocks us is, that grave doctors of di-
vinity, and serious, stocking-knitting ma-
trons, seem to be the class who are par-

ticularly set against the success of our
excellent orthodox hero, and bent on
reminding us of the claims of that unre-
generate James, whom we have sent to
sea on purpose that our heroine may re-
cover herself of that foolish partiality for
him which all the Christian world seems
bent on perpetuating.

“Now, really,” says the Rev. Mrs. Q.,
looking up from her bundle of Sewing-

Society work, "you are *not* going to let Mary marry the Doctor?"

My dear Madam, is not that just what you did, yourself, after having turned off three or four fascinating young sinners as good as James any day? Don't make us believe that you are sorry for it now!

"Is it possible," says Dr. Theophrastus, who is himself a staunch Hopkinsian divine, and who is at present recovering from his last grand effort on Natural and Moral Ability,—“is it possible that you are going to let Mary forget that poor young man and marry Dr. H.? That will never do in the world!”

Dear Doctor, consider what would have become of you, if some lady at a certain time had not had the sense and discernment to fall in love with the *man* who came to her disguised as a theologian.

"But he's so old!" says Aunt Maria.

Not at all. Old? What do you mean? Forty is the very season of ripeness,—the very meridian of manly lustre and splendor.

"But he wears a wig."

My dear Madam, so did Sir Charles Grandison, and Lovelace, and all the other fine fellows of those days; the wig was the distinguishing mark of a gentleman.

No,—spite of all you may say and declare, we do insist that our Doctor is a very proper and probable subject for a young lady to fall in love with.

If women have one weakness more marked than another, it is towards veneration. They are born worshippers,—makers of silver shrines for some divinity or other, which, of course, they always think fell straight down from heaven.

The first step towards their falling in love with an ordinary mortal is generally to dress him out with all manner of real or fancied superiority; and having made him up, they worship him.

Now a truly great man, a man really grand and noble in heart and intellect, has this advantage with women, that he is an idol ready-made to hand; and so that very painstaking and ingenious sex

have less labor in getting him up, and can be ready to worship him on shorter notice.

In particular is this the case where a sacred profession and a moral supremacy are added to the intellectual. Just think of the career of celebrated preachers and divines in all ages. Have they not stood like the image that "Nebuchadnezzar the king set up," and all womankind, coquettes and flirts not excepted, been ready to fall down and worship, even before the sound of cornet, flute, harp, sackbut, and so forth? Is not the faithful Paula, with her beautiful face, prostrate in reverence before poor, old, lean, haggard, dying St. Jerome, in the most splendid painting of the world, an emblem and sign of woman's eternal power of self-sacrifice to what she deems noblest in man? Does not old Richard Baxter tell us, with delightful single-heartedness, how his wife fell in love with him first, spite of his long, pale face,—and how she confessed, dear soul, after many years of married life, that she had found him *less* sour and bitter than she had expected?

The fact is, women are burdened with fealty, faith, reverence, more than they know what to do with; they stand like a hedge of sweet-peas, throwing out fluttering tendrils everywhere for something high and strong to climb by,—and when they find it, be it ever so rough in the bark, they catch upon it. And instances are not wanting of those who have turned away from the flattery of admirers to prostrate themselves at the feet of a genuine hero who never wooed them, except by heroic deeds and the rhetoric of a noble life.

Never was there a distinguished man whose greatness could sustain the test of minute domestic inspection better than our Doctor. Strong in a single-hearted humility, a perfect unconsciousness of self, an honest and sincere absorption in high and holy themes and objects, there was in him what we so seldom see,—a perfect logic of life; his minutest deeds were the true results of his sublimest

principles. His whole nature, moral, physical, and intellectual, was simple, pure, and cleanly. He was temperate as an anchorite in all matters of living,—avoiding, from a healthy instinct, all those intoxicating stimuli then common among the clergy. In his early youth, indeed, he had formed an attachment to the almost universal clerical pipe,—but, observing a delicate woman once nauseated by coming into the atmosphere which he and his brethren had polluted, he set himself gravely to reflect that that which could so offend a woman must needs be uncomely and unworthy a Christian man; wherefore he laid his pipe on the mantel-piece, and never afterwards resumed the indulgence.

In all his relations with womanhood he was delicate and reverential, forming his manners by that old precept, “The elder women entreat as mothers, the younger as sisters,”—which rule, short and simple as it is, is nevertheless the most perfect *résumé* of all true gentlemanliness. Then, as for person, the Doctor was not handsome, to be sure; but he was what sometimes serves with woman better,—majestic and manly, and, when animated by thought and feeling, having even a commanding grandeur of mien. Add to all this, that our valiant hero is now on the straight road to bring him into that situation most likely to engage the warm partisanship of a true woman,—namely, that of a man unjustly abused for right-doing,—and one may see that it is ten to one our Mary may fall in love with him yet, before she knows it.

If it were not for this mysterious selfness-and-sameness which makes this wild, wandering, uncanonical sailor, James Marvyn, so intimate and internal,—if his thread were not knit up with the thread of her life,—were it not for the old habit of feeling for him, thinking for him, praying for him, hoping for him, fearing for him, which—woe is us!—is the unfortunate habit of womankind,—if it were not for that fatal something which neither judgment, nor wishes, nor reason, nor common sense shows any great skill

in unravelling,—we are quite sure that Mary would be in love with the Doctor within the next six months; as it is, we leave you all to infer from your own heart and consciousness what his chances are.

A new sort of scene is about to open on our heroine, and we shall show her to you, for an evening at least, in new associations, and with a different background from that homely and rural one in which she has fluttered as a white dove amid leafy and congenial surroundings.

As we have before intimated, Newport presented a *résumé* of many different phases of society, all brought upon a social level by the then universally admitted principle of equality.

There were scattered about in the settlement lordly mansions, whose owners rolled in emblazoned carriages, and whose wide halls were the scenes of a showy and almost princely hospitality. By her husband's side, Mrs. Katy Scudder was allied to one of these families of wealthy planters, and often recognized the connection with a quiet undertone of satisfaction, as a dignified and self-respecting woman should. She liked, once in a while, quietly to let people know, that, although they lived in the plain little cottage and made no pretensions, yet they had good blood in their veins,—that Mr. Scudder's mother was a Wilcox, and that the Wilcoxes were, she supposed, as high as anybody,—generally ending the remark with the observation, that “all these things, to be sure, were matters of small consequence, since at last it would be of far more importance to have been a true Christian than to have been connected with the highest families of the land.”

Nevertheless, Mrs. Scudder was not a little pleased to have in her possession a card of invitation to a splendid wedding-party that was going to be given, on Friday, at the Wilcox Manor. She thought it a very becoming mark of respect to the deceased Mr. Scudder that his widow and daughter should be brought to mind,—so becoming and praiseworthy, in fact, that, “though an old woman,” as she said, with

a complacent straightening of her tall, lithe figure, she really thought she must make an effort to go.

Accordingly, early one morning, after all domestic duties had been fulfilled, and the clock, loudly ticking through the empty rooms, told that all needful bustle had died down to silence, Mrs. Katy, Mary, and Miss Prissy Diamond, the dressmaker, might have been observed sitting in solemn senate around the camphor-wood trunk, before spoken of, and which exhaled vague foreign and Indian perfumes of silk and sandal-wood.

You may have heard of dignitaries, my good reader,—but, I assure you, you know very little of a situation of trust or importance compared to that of *the* dressmaker in a small New England town.

What important interests does she hold in her hands! How is she besieged, courted, deferred to! Three months beforehand, all her days and nights are spoken for; and the simple statement, that *only* on that day you can have Miss Clippers, is of itself an apology for any omission of attention elsewhere,—it strikes home at once to the deepest consciousness of every woman, married or single. How thoughtfully is everything arranged, weeks beforehand, for the golden, important season when Miss Clippers can come! On that day, there is to be no extra sweeping, dusting, cleaning, cooking, no visiting, no receiving, no reading or writing, but all with one heart and soul are to wait upon her, intent to forward the great work which she graciously affords a day's leisure to direct. Seated in her chair of state, with her well-worn cushion bristling with pins and needles at her side, her ready roll of patterns and her scissors, she hears, judges, and decides *ex cathedra* on the possible or not possible, in that important art on which depends the right presentation of the floral part of Nature's great horticultural show. She alone is competent to say whether there is any available remedy for the stained breadth in Jane's dress,—whether the fatal spot by any magical hocus-pocus can be cut out from

the fulness, or turned up and smothered from view in the gathers, or concealed by some new fashion of trimming falling with generous appropriateness exactly across the fatal weak point. She can tell you whether that remnant of velvet will make you a basque,—whether Mamma's old silk can reappear in juvenile grace for Miss Lucy. What marvels follow her, wherever she goes! What wonderful results does she contrive from the most unlikely materials, as everybody after her departure wonders to see old things become so much better than new!

Among the most influential and happy of her class was Miss Prissy Diamond,—a little, dapper, doll-like body, quick in her motions and nimble in her tongue, whose delicate complexion, flaxen curls, merry flow of spirits, and ready abundance of gayety, song, and story, apart from her professional accomplishments, made her a welcome guest in every family in the neighborhood. Miss Prissy laughingly boasted being past forty, sure that the avowal would always draw down on her quite a storm of compliments, on the freshness of her sweet-pea complexion and the brightness of her merry blue eyes. She was well pleased to hear dawning girls wondering why with so many advantages she had never married. At such remarks, Miss Prissy always laughed loudly, and declared that she had always had such a string of engagements with the women that she never found half an hour to listen to what any *man* living would say to her, supposing she could stop to hear him. "Besides, if I were to get married, nobody else could," she would say. "What would become of all the wedding-clothes for everybody else?" But sometimes, when Miss Prissy felt extremely gracious, she would draw out of her little chest just the faintest tip-end of a sigh, and tell some young lady, in a confidential undertone, that one of these days she would tell her something,—and then there would come a wink of her blue eyes and a fluttering of the pink ribbons in her cap quite stimulating to youthful inquisitive-

ness, though we have never been able to learn by any of our antiquarian researches that the expectations thus excited were ever gratified.

In her professional prowess she felt a pardonable pride. What feats could she relate of wonderful dresses got out of impossibly small patterns of silk! what marvels of silks turned that could not be told from new! what reclaimings of waists that other dress-makers had hopelessly spoiled! Had not Mrs. General Wilcox once been obliged to call in her aid on a dress sent to her from Paris? and did not Miss Prissy work three days and nights on that dress, and make every stitch of that trimming over with her own hands, before it was fit to be seen? And when Mrs. Governor Dexter's best silver-gray brocade was spoiled by Miss Pimlico, and there wasn't another scrap to pattern it with, didn't she make a new waist out of the cape and piece one of the sleeves twenty-nine times, and yet nobody would ever have known that there was a joining in it?

In fact, though Miss Prissy enjoyed the fair average plain-sailing of her work, she might be said to *revel* in difficulties. A full pattern with trimming, all ample and ready, awoke a moderate enjoyment; but the resurrection of anything half-worn or imperfectly made, the brilliant success, when, after turning, twisting, piecing, contriving, and, by unheard-of inventions of trimming, a dress faded and defaced was restored to more than pristine splendor,—that was a triumph worth enjoying.

It was true, Miss Prissy, like most of her nomadic compeers, was a little given to gossip; but, after all, it was innocent gossip,—not a bit of malice in it; it was only all the particulars about Mrs. Thus-and-So's wardrobe,—all the statistics of Mrs. That-and-T'other's china-closet,—all the minute items of Miss Simpkins's wedding-clothes,—and how her mother cried, the morning of the wedding, and said that she didn't know anything how she could spare Louisa Jane, only that Edward was such a good boy that she felt she could love him like an own son,

—and what a providence it seemed that the very ring that was put into the bride-loaf was one that he gave her when he first went to sea, when she wouldn't be engaged to him because she thought she loved Thomas Strickland better, but that was only because she hadn't found him out, you know,—and so forth, and so forth. Sometimes, too, her narrations assumed a solemn cast, and brought to mind the hush of funerals, and told of words spoken in faint whispers, when hands were clasped for the last time,—and of utterances crushed out from hearts, when the hammer of a great sorrow strikes out sparks of the divine, even from common stone; and there would be real tears in the little blue eyes, and the pink bows would flutter tremulously, like the last three leaves on a bare-scarlet maple in autumn. In fact, dear reader, *gossip*, like romance, has its noble side to it. How can you love your neighbor as yourself and not feel a little curiosity as to how he fares, what he wears, where he goes, and how he takes the great life *tragi-comedy* at which you and he are both more than spectators? Show me a person who lives in a country-village absolutely without curiosity or interest on these subjects, and I will show you a cold, fat oyster, to whom the tide-mud of propriety is the whole of existence.

As one of our esteemed collaborators in the ATLANTIC remarks,—“A dull town, where there is neither theatre nor circus nor opera, must have some excitement, and the real tragedy and comedy of life *must* come in place of the second-hand. Hence the noted gossiping propensities of country-places, which, so long as they are not poisoned by envy or ill-will, have a respectable and picturesque side to them,—an undoubted leave to be, as probably has almost everything, which obstinately and always insists on being, except sin!”

As it is, it must be confessed that the arrival of Miss Prissy in a family was much like the setting up of a domestic show-case, through which you could look into all the families in the neighborhood,

and see the never-ending drama of life, —births, marriages, deaths,—joy of new-made mothers, whose babes weighed just eight pounds and three-quarters, and had hair that would part with a comb,—and tears of Rachels who wept for their children, and would not be comforted because they were not. Was there a tragedy, a mystery, in all Newport, whose secret closet had not been unlocked by Miss Prissy? She thought not; and you always wondered, with an uncertain curiosity, what those things might be over which she gravely shook her head, declaring, with such a look, —“Oh, if you only *could* know!”—and ending with a general sigh and lamentation, like the confidential chorus of a Greek tragedy.

We have been thus minute in sketching Miss Prissy's portrait, because we rather like her. She has great power, we admit; and were she a sour-faced, angular, energetic body, with a heart whose secretions had all become acrid by disappointment and dyspepsia, she might be a fearful gnome, against whose family-visitations one ought to watch and pray. As it was, she came into the house rather like one of those breezy days of spring, which burst all the blossoms, set all the doors and windows open, make the hens cackle and the turtles peep,—filling a solemn Puritan dwelling with as much bustle and chatter as if a box of martins were setting up housekeeping in it.

Let us now introduce you to the sanctuary of Mrs. Scudder's own private bedroom, where the committee of exigencies, with Miss Prissy at their head, are seated in solemn session around the camphor-wood trunk.

“Dress, you know, is of *some* importance, after all,” said Mrs. Scudder, in that apologetic way in which sensible people generally acknowledge a secret leaning towards anything so very mundane. While the good lady spoke, she was reverentially unpinning and shaking out of their fragrant folds creamy crape shawls of rich Chinese embroidery,—India muslin, scarfs, and aprons; and already her hands were undoing the pins

of a silvery damask linen in which was wrapped her own wedding-dress. “I have always told Mary,” she continued, “that, though our hearts ought not to be set on these things, yet they had their importance.”

“Certainly, certainly, Ma'am,” chimed in Miss Prissy. “I was saying to Miss General Wilcox, the other day, I didn't see how we could ‘consider the lilies of the field,’ without seeing the importance of looking pretty. I've got a flower-de-luce in my garden now, from one of the new roots that old Major Seaforth brought over from France, which is just the most beautiful thing you ever did see; and I was thinking, as I looked at it to-day, that, if women's dresses only grew on 'em as handsome and well-fitting as that, why, there wouldn't be any need of me; but as it is, why, we *must think*, if we want to look well. Now peach-trees, I s'pose, might bear just as good peaches without the pink blows, but then who would want 'em to? Miss Deacon Twitchel, when I was up there the other day, kept kind o' sighin' 'cause Cerintha Ann is getting a new pink silk made up, 'cause she said it was such a dying world it didn't seem right to call off our attention: but I told her it wasn't any pinker than the apple-blossoms; and what with robins and blue-birds and one thing or another, the Lord is always calling off our attention; and I think we ought to observe the Lord's works and take a lesson from 'em.”

“Yes, you are quite right,” said Mrs. Scudder, rising and shaking out a splendid white brocade, on which bunches of moss-roses were looped to bunches of violets by graceful filets of blue ribbons. “This was my wedding-dress,” she said.

Little Miss Prissy sprang up and clapped her hands in an ecstasy.

“Well, now, Miss Scudder, really!—did I ever see anything more beautiful? It really goes beyond anything I ever saw. I don't think, in all the brocades I ever made up, I ever saw so pretty a pattern as this.”

“Mr. Scudder chose it for me, himself,

at the silk-factory in Lyons," said Mrs. Scudder, with pardonable pride, "and I want it tried on to Mary."

"Really, Miss Scudder, this ought to be kept for *her* wedding-dress," said Miss Prissy, as she delightedly bustled about the congenial task. "I was up to Miss Marvyn's, a-working, last week," she said, as she threw the dress over Mary's head, "and she said that James expected to make his fortune in that voyage, and come home and settle down."

Mary's fair head emerged from the rustling folds of the brocade, her cheeks crimson as one of the moss-roses,—while her mother's face assumed a severe gravity, as she remarked that she believed James had been much pleased with Jane Spencer, and that, for her part, she should be very glad, when he came home, if he could marry such a steady, sensible girl, and settle down to a useful, Christian life.

"Ah, yes,—just so,—a very excellent idea, certainly," said Miss Prissy. "It wants a little taken in here on the shoulders, and a little under the arms. The biases are all right; the sleeves will want altering, Miss Scudder. I hope you will have a hot iron ready for pressing."

Mrs. Scudder rose immediately, to see the command obeyed; and as her back was turned, Miss Prissy went on in a low tone,—

"Now, *I*, for my part, don't think there's a word of truth in that story about James Marvyn and Jane Spencer; for I was down there at work one day when he called, and I *know* there couldn't have been anything between them,—besides, Miss Spencer, her mother, told me there wasn't.—There, Miss Scudder, you see that is a good fit. It's astonishing how near it comes to fitting, just as it was. I didn't think Mary was so near what you were, when you were a girl, Miss Scudder. The other day, when I was up to General Wilcox's, the General he was in the room when I was a-trying on Miss Wilcox's cherry velvet, and she was asking couldn't I come this week for her, and I mentioned I was coming to

Miss Scudder, and the General says he, —'I used to know her when she was a girl. I tell you, she was one of the handsomest girls in Newport, by George!' says he. And says I,—'General, you ought to see her daughter.' And the General,—you know his jolly way,—he laughed, and says he,—'If she is as handsome as her mother was, I don't want to see her,' says he. 'I tell you, wife,' says he, 'I but just missed falling in love with Katy Stephens.'"

"I could have told her more than that," said Mrs. Scudder, with a flash of her old coquette girlhood for a moment lighting her eyes and straightening her lithe form. "I guess, if I should show a letter he wrote me once — But what am I talking about?" she said, suddenly stiffening back into a sensible woman. "Miss Prissy, do you think it will be necessary to cut it off at the bottom? It seems a pity to cut such rich silk."

"So it does, I declare. Well, I believe it will do to turn it up."

"I depend on you to put it a little into modern fashion, you know," said Mrs. Scudder. "It is many a year, you know, since it was made."

"Oh, never you fear! You leave all that to me," said Miss Prissy. "Now, there never was anything so lucky as, that, just before all these wedding-dresses had to be fixed, I got a letter from my sister Martha, that works for all the first families of Boston. And Martha she is really unusually privileged, because she works for Miss Cranch, and Miss Cranch gets letters from Miss Adams,—you know Mr. Adams is Ambassador now at the Court of St. James, and Miss Adams writes home all the particulars about the court-dresses; and Martha she heard one of the letters read, and she told Miss Cranch that she would give the best five-pound-note she had, if she could just copy that description to send to Prissy. Well, Miss Cranch let her do it, and I've got a copy of the letter here in my work-pocket. I read it up to Miss General Wilcox's, and to Major Seaforth's, and I'll read it to you."

Mrs. Katy Scudder was a born subject of a crown, and, though now a republican matron, had not outlived the reverence, from childhood implanted, for the high and stately doings of courts, lords, ladies, queens, and princesses, and therefore it was not without some awe that she saw Miss Prissy produce from her little black work-bag the well-worn epistle.

"Here it is," said Miss Prissy, at last. "I only copied out the parts about being presented at Court. She says:—

"One is obliged here to attend the circles of the Queen, which are held once a fortnight; and what renders it very expensive is, that you cannot go twice in the same dress, and a court-dress you cannot make use of elsewhere. I directed my mantua-maker to let my dress be elegant, but plain as I could possibly appear with decency. Accordingly, it is white lutestring, covered and full-trimmed with white crape, festooned with lilac ribbon and mock point-lace, over a hoop of enormous size. There is only a narrow train, about three yards in length to the gown-waist, which is put into a ribbon on the left side,—the Queen only having her train borne. Ruffled cuffs for married ladies,—treble lace ruffles, a very dress cap with long lace lapets, two white plumes, and a blonde lace handkerchief. This is my rigging."

Miss Prissy here stopped to adjust her spectacles. Her audience expressed a breathless interest.

"You see," she said, "I used to know her when she was Nabby Smith. She was Parson Smith's daughter, at Weymouth, and as handsome a girl as ever I wanted to see,—just as graceful as a sweet-brier bush. I don't believe any of those English ladies looked one bit better than she did. She was always a master-hand at writing. Everything she writes about, she puts it right before you. You feel as if you'd been there. Now, here she goes on to tell about her daughter's dress. She says:—

"My head is dressed for St. James's, and in my opinion looks very tasty. Whilst my daughter is undergoing the

same operation, I set myself down composedly to write you a few lines. Well, methinks I hear Betsey and Lucy say, "What is cousin's dress?" *White*, my dear girls, like your aunt's, only differently trimmed and ornamented,—her train being wholly of white crape, and trimmed with white ribbon; the petticoat, which is the most showy part of the dress, covered and drawn up in what are called festoons, with light wreaths of beautiful flowers; the sleeves, white crape drawn over the silk, with a row of lace round the sleeve near the shoulder, another half-way down the arm, and a third upon the top of the ruffle,—a little stuck between,—a kind of hat-cap with three large feathers and a bunch of flowers,—a wreath of flowers on the hair."

Miss Prissy concluded this relishing description with a little smack of the lips, such as people sometimes give when reading things that are particularly to their taste.

"Now, I was a-thinking," she added, "that it would be an excellent way to trim Mary's sleeves,—three rows of lace, with a sprig to each row."

All this while, our Mary, with her white short-gown and blue stuff-petticoat, her shining pale brown hair and serious large blue eyes, sat innocently looking first at her mother, then at Miss Prissy, and then at the finery.

We do not claim for her any superhuman exemption from girlish feelings. She was innocently dazzled with the vision of courtly halls and princely splendors, and thought Mrs. Adams's descriptions almost a perfect realization of things she had read in "*Sir Charles Grandison*." If her mother thought it right and proper she should be dressed and made fine, she was glad of it; only there came a heavy, leaden feeling in her little heart, which she did not understand, but we who know womankind will translate for you: it was, that a certain pair of dark eyes would not see her after she was dressed; and so, after all, what was the use of looking pretty?

"I wonder what James *would* think,"

passed through her head; for Mary had never changed a ribbon, or altered the braid of her hair, or pinned a flower in her bosom, that she had not quickly seen the effect of the change mirrored in those dark eyes. It was a pity, of course, now she had found out that she ought not to think about him, that so many thought-strings were twisted round him.

So while Miss Prissy turned over her papers, and read out of others extracts about Lord Caermarthen and Sir Clement Cotterel Dormer and the Princess Royal and Princess Augusta, in black and silver, with a silver netting upon the coat, and a head stuck full of diamond pins,—and Lady Salisbury and Lady Talbot and the Duchess of Devonshire, and scarlet satin sacks and diamonds and ostrich-plumes, and the King's kissing Mrs. Adams,—little Mary's blue eyes grew larger and larger, seeing far off on the salt green sea, and her ears heard only the ripple and murmur of those waters that carried her heart away,—till, by-and-by, Miss Prissy gave her a smart little tap, which awakened her to the fact that she was wanted again to try on the dress which Miss Prissy's nimble fingers had basted.

So passed the day,—Miss Prissy busily chattering, clipping, basting,—Mary patiently trying on to an unheard-of extent,—and Mrs. Scudder's neat room, whipped into a perfect froth and foam of gauze, lace, artificial flowers, linings, and other aids, accessories, and abetments.

At dinner, the Doctor, who had been all the morning studying out his Treatise on the Millennium, discoursed tranquilly as usual, innocently ignorant of the unusual cares which were distracting the minds of his listeners. What should he know of dress-makers, good soul? Encouraged by the respectful silence of his auditors, he calmly expanded and soliloquized on his favorite topic, the last golden age of Time, the Marriage-Supper of the Lamb, when the purified Earth, like a repentant Psyche, shall be restored to the long-lost favor of a celestial Bride-

groom, and glorified saints and angels shall walk familiarly as wedding-guests among men.

"Sakes alive!" said little Miss Prissy, after dinner, "did I ever hear any one go on like that blessed man?—such a spiritual mind! Oh, Miss Scudder, how you are privileged in having him here! I do really think it is a shame such a blessed man a'n't thought more of. Why, I could just sit and hear him talk all day. Miss Scudder, I wish sometimes you'd just let me make a ruffled shirt for him, and do it all up myself, and put a stitch in the hem that I learned from my sister Martha, who learned it from a French young lady who was educated in a convent;—nuns, you know, poor things, can do *some* things right; and I think I never saw such hemstitching as they do there;—and I should like to hemstitch the Doctor's ruffles; he is *so* spiritually-minded, it really makes me love him. Why, hearing him talk put me in mind of a real beautiful song of Mr. Watts,—I don't know as I could remember the tune."

And Miss Prissy, whose musical talent was one of her special *fortes*, tuned her voice, a little cracked and quavering, and sang, with a vigorous accent on each accented syllable,—

"From the third heaven, where God resides,
That holy, happy place,
The New Jerusalem comes down,
Adorned with shining grace.

"Attending angels shout for joy,
And the bright armies sing,—
'Mortals! behold the sacred seat
Of your descending King!'"

"Take care, Miss Scudder!—that silk must be cut exactly on the bias"; and Miss Prissy, hastily finishing her last quaver, caught the silk and the scissors out of Mrs. Scudder's hand, and fell down at once from the Millennium into a discourse on her own particular way of covering piping-cord.

So we go, dear reader,—so long as we have a body and a soul. Two worlds must mingle,—the great and the little, the solemn and the trivial, wreathing in and out, like the grotesque carvings on a

Gothic shrine;—only, did we know it rightly, nothing is trivial; since the human soul, with its awful shadow, makes all things sacred. Have not ribbons, cast-off flowers, soiled bits of gauze, trivial, trashy fragments of millinery, sometimes had an awful meaning, a deadly power, when they belonged to one who should wear them no more, and whose beautiful form, frail and crushed as they, is a hidden and a vanished thing for all time? For so sacred and individual is a human being, that, of all the million-peopled earth, no one form ever restores another. The mould of each mortal type is broken at the grave; and never, never, though you look through all the faces on earth, shall the exact form you mourn ever meet your eyes again! You are living your daily life among trifles that one death-stroke may make relics. One false step, one luckless accident, an obstacle on the track of a train, the tangling of the cord in shifting a sail, and the penknife, the pen, the papers, the trivial articles of dress and clothing, which to-day you toss idly and jestingly from hand to hand, may become dread memorials of that awful tragedy whose deep abyss ever underlies our common life.

CHAPTER XIII.

THE PARTY.

WELL, let us proceed to tell how the eventful evening drew on,—how Mary, by Miss Prissy's care, stood at last in a long-waisted gown flowered with rose-buds and violets, opening in front to display a white satin skirt trimmed with lace and flowers,—how her little feet were put into high-heeled shoes, and a little jaunty cap with a wreath of moss-rose-buds was fastened over her shining hair,—and how Miss Prissy, delighted, turned her round and round, and then declared that she must go and get the Doctor to look at her. She knew he must be a man of taste, he talked so beautifully about the Millennium; and so, bursting into his study, she actually chat-

tered him back into the visible world, and, leading the blushing Mary to the door, asked him, point-blank, if he ever saw anything prettier.

The Doctor, being now wide awake, gravely gave his mind to the subject; and, after some consideration, said, gravely, "No,—he didn't think he ever did." For the Doctor was not a man of compliment, and had a habit of always thinking, before he spoke, whether what he was going to say was exactly true; and having lived some time in the family of President Edwards, renowned for beautiful daughters, he naturally thought them over.

The Doctor looked innocent and helpless, while Miss Prissy, having got him now quite into her power, went on volubly to expatiate on the difficulties overcome in adapting the ancient wedding-dress to its present modern fit. He told her that it was very nice,—said, "Yes, Ma'am," at proper places,—and, being a very obliging man, looked at whatever he was directed to, with round, blank eyes; but ended all with a long gaze on the laughing, blushing face, that, half in shame and half in perplexed mirth, appeared and disappeared as Miss Prissy in her warmth turned her round and showed her.

"Now, don't she look beautiful?" Miss Prissy reiterated for the twentieth time, as Mary left the room.

The Doctor, looking after her musingly, said to himself,—“The king's daughter is all glorious within; her clothing is of wrought gold; she shall be brought unto the king in raiment of needlework.”

"Now, did I ever?" said Miss Prissy, rushing out. "How that good man does turn everything! I believe you couldn't get anything, that he wouldn't find a text right out of the Bible about it. I mean to get the linen for that shirt this very week, with the Miss Wilcox's money; they always pay well, those Wilcoxes,—and I've worked for them, off and on, sixteen days and a quarter. To be sure, Miss Scudder, there's no real need of my doing it, for I must say you keep him

looking like a pink,—but only I feel as if I must do something for such a good man.”

The good Doctor was brushed up for the evening with zealous care and energy; and if he did *not* look like a pink, it was certainly no fault of his hostess.

Well, we cannot reproduce in detail the faded glories of that entertainment; nor relate how the Wilcox Manor and gardens were illuminated,—how the bride wore a veil of real point-lace,—how carriages rolled and grated on the gravel works, and negro servants, in white kid gloves, handed out ladies in velvet and satin.

To Mary's inexperienced eye it seemed like an enchanted dream,—a realization of all she had dreamed of grand and high society. She had her little triumph of an evening; for everybody asked who that beautiful girl was, and more than one gallant of the old Newport first families felt himself adorned and distinguished to walk with her on his arm. Bnsy, officious dowagers repeated to Mrs. Scudder the applauding whispers that followed her wherever she went.

“Really, Mrs. Scudder,” said gallant old General Wilcox, “where have you kept such a beauty all this time? It's a sin and a shame to hide such a light under a bushel.”

And Mrs. Scudder, though, of course, like you and me, sensible reader, properly apprised of the perishable nature of such fleeting honors, was, like us, too, but a mortal, and smiled condescendingly on the follies of the scene.

The house was divided by a wide hall opening by doors, the front one upon the street, the back into a large garden, the broad central walk of which, edged on each side with high clipped hedges of box, now resplendent with colored lamps, seemed to continue the prospect in a brilliant vista.

The old-fashioned garden was lighted in every part, and the company dispersed themselves about it in picturesque groups.

We have the image in our mind of Mary as she stood with her little hat and wreath of rose-buds, her fluttering ribbons and rich brocade, as it were a picture framed in the door-way, with her back to the illuminated garden, and her calm, innocent face regarding with a pleased wonder the unaccustomed gayeties within.

Her dress, which, under Miss Prissy's forming hand, had been made to assume that appearance of style and fashion which more particularly characterized the mode of those times, formed a singular, but not unpleasing, contrast to the sort of dewy freshness of air and mien which was characteristic of her style of beauty. It seemed so to represent a being who was in the world, yet not of it,—who, though living habitually in a higher region of thought and feeling, was artlessly curious, and innocently pleased with a fresh experience in an altogether untried sphere. The feeling of being in a circle to which she did not belong, where her presence was in a manner an accident, and where she felt none of the responsibilities which come from being a component part of a society, gave to her a quiet, disengaged air, which produced all the effect of the perfect ease of high breeding.

While she stands there, there comes out of the door of the bridal reception-room a gentleman with a stylishly-dressed lady on either arm, with whom he seems wholly absorbed. He is of middle height, peculiarly graceful in form and moulding, with that indescribable air of high breeding which marks the polished man of the world. His beautifully-formed head, delicate profile, fascinating sweetness of smile, and, above all, an eye which seemed to have an almost mesmeric power of attraction, were traits which distinguished one of the most celebrated men of the time, and one whose peculiar history yet lives not only in our national records, but in the private annals of many an American family.

“Good Heavens!” he said, suddenly

pausing in conversation, as his eye accidentally fell upon Mary. "Who is that lovely creature?"

"Oh, that," said Mrs. Wilcox,— "why, that is Mary Scudder. Her father was a family connection of the General's. The family are in rather modest circumstances, but highly respectable."

After a few moments more of ordinary chit-chat, in which from time to time he darted upon her glances of rapid and piercing observation, the gentleman might have been observed to disembarass himself of one of the ladies on his arm, by

passing her with a compliment and a bow to another gallant, and, after a few moments more, he spoke something to Mrs. Wilcox, in a low voice, and with that gentle air of deferential sweetness which always made everybody well satisfied to do his will. The consequence was, that in a few moments Mary was startled from her calm speculations by the voice of Mrs. Wilcox, saying at her elbow, in a formal tone,—

"Miss Scudder, I have the honor to present to your acquaintance Colonel Burr, of the United States Senate."

THE WALKER OF THE SNOW.

SPEED on, speed on, good master!

The camp lies far away;—

We must cross the haunted valley

Before the close of day.

How the snow-blight came upon me

I will tell you as we go,—

The blight of the shadow hunter

Who walks the midnight snow.

To the cold December heaven

Came the pale moon and the stars,

As the yellow sun was sinking

Behind the purple bars.

The snow was deeply drifted

Upon the ridges drear

That lay for miles between me

And the camp for which we steer.

'Twas silent on the hill-side,

And by the solemn wood

No sound of life or motion

To break the solitude,

Save the wailing of the moose-bird

With a plaintive note and low,

And the skating of the red leaf

Upon the frozen snow.

And said I,—“Though dark is falling,
And far the camp must be,
Yet my heart it would be lightsome,
If I had but company.”

And then I sang and shouted,
Keeping measure, as I sped,
To the harp-twang of the snow-shoe
As it sprang beneath my tread.

Nor far into the valley
Had I dipped upon my way,
When a dusky figure joined me,
In a capuchon of gray,

Bending upon the snow-shoes
With a long and limber stride ;
And I hailed the dusky stranger,
As we travelled side by side.

But no token of communion
Gave he by word or look,
And the fear-chill fell upon me
At the crossing of the brook.

For I saw by the sickly moonlight,
As I followed, bending low,
That the walking of the stranger
Left no foot-marks on the snow.

Then the fear-chill gathered o'er me,
Like a shroud around me cast,
As I sank upon the snow-drift
Where the shadow hunter passed.

And the otter-trappers found me,
Before the break of day,
With my dark hair blanched and whitened
As the snow in which I lay.

But they spoke not, as they raised me ;
For they knew that in the night
I had seen the shadow hunter,
And had withered in his blight.

Sancta Maria speed us !
The sun is falling low,—
Before us lies the Valley
Of the Walker of the Snow !

REVIEWS AND LITERARY NOTICES.

A New History of the Conquest of Mexico.

In which Las Casas' Denunciations of the Popular Historians of that War are fully vindicated. By ROBERT ANDERSON WILSON, Counsellor at Law; Author of "Mexico and its Religion," etc. Philadelphia: James Challen & Son. Boston: Crosby, Nichols, & Co.

(SECOND NOTICE.)

ACCORDING to the well-authenticated legend of the martyrdom of Saint Lawrence, the Saint, as he lay upon the grid-iron, conscious that he had been sufficiently done on one side, begged the cooks, if it were a matter of indifference to them, to turn him on the other. Common humanity demanded compliance with so reasonable a request. We fancy that we hear Mr. Wilson preferring a similar petition; and we hope we are too good-natured to be insensible to the appeal. We cannot, at this moment, indeed, think of him otherwise than good-naturedly. With many things in his book we have been highly pleased. The number, the novelty, and the variety of his blunders have given us a very favorable impression of his ingenuity, and have afforded us constant entertainment in what we feared was to be a drudgery and a task. We had intended to cull some of these beauties for the amusement of our readers and the personal gratification of Mr. Wilson himself. But, as children, gathering shells on the sea-shore, resign, one after another, the treasures which they have collected, and grasp at newer, and, therefore, more pleasing specimens, which are abandoned in their turn, so we, finding our stores accumulate beyond our means of transportation, and tantalized by a richness that made the task of selection an impossible one, have been forced to relinquish the prize and come away with empty hands. If there be, in the compass of what the author calls "these volumes,"—though to us, perhaps from inability to distinguish between unity and duality, his work appears to be comprised in a single tome,—a sentence decently constructed, a foreign name correctly spelt, a punctuation-mark rightly placed, a fact clearly and accurate-

ly stated, or an argument that is not capable of an easy reduction to the absurd, we have not been so unfortunate as to discover it. Mr. Wilson is a man who, to use Carlyle's favorite expression, has "swallowed all formulas." The principles that have generally been held to govern the use of language appear to him mere arbitrary rules, invented by the "sevenfold censorship" and the Spanish Inquisition, for the purpose of preventing the free communication of ideas. All such trammels he rejects; and, accordingly, we have to thank him, so far as mere style is concerned, for an uninterrupted flow of pleasure in the perusal of his book, adorned as it is with "graces" that are very far indeed "beyond the reach of Art."

We come now to those important questions which Mr. Wilson was not, indeed, the first to agitate, but which he has awakened from their profound slumbers in the bosom of the Hon. Lewis Cass and the pages of the "North American Review." We are not to be tempted into writing another "New History of the Conquest of Mexico"; but we shall endeavor to state with clearness those points on which the world has had the temerity to differ from the "high authorities" we have named. It has been, then, commonly asserted, and is, we fear, by the great mass of our readers still superstitiously believed, that, at the time of the discovery of this continent, there existed, in certain portions of it, nations not wholly barbarous, and yet not civilized, according to our notions of that term,—nations which had regular governments and systems of polity, many correct notions in regard to morals, and some acquaintance with Art and with the refinements of life,—but which were yet, in a great measure, ignorant of the true principles of science, little skilled in mechanics, and addicted to the practice of idolatrous rites. This assertion would seem to have some *prima-facie* evidence in its favor. The regions in which these nations are said to have existed lie within the tropics; and it is a well-established principle, that a genial climate, a fertile soil, the consequent facilities for obtaining a subsistence, and the stimulus thus given to the increase of population, are the first

elements of an advance from a savage to a civilized state, of the abandonment of rude freedom and nomadic habits, and of the development of a regular social system. This principle is clearly set forth and elaborately illustrated by Mr. Buckle; and we the more readily refer to this author, because he stands high in the esteem of Mr. Wilson, who, in order to prove his own especial fitness for historical composition, and the incompetence of all who have preceded him in the attempt, refers to a passage in Buckle, containing an enumeration of the qualifications which he considers indispensable for the historian. This enumeration includes all the attainments that have ever been in the common possession of the human family. Mr. Buckle remarks, with indisputable truth, that one historian has lacked some of these qualifications, another historian has lacked others of them. Mr. Wilson states that "each and every writer" who has preceded him has lacked them all. Mr. Buckle, by implication, excepts one person, as uniting in himself all the qualifications, he demands. Mr. Wilson thinks *he* is the exception; but we are quite sure that the exception intended by the author was—Henry Thomas Buckle.

In the Old World, civilization, as all admit, had its origin in tropical regions. Across the whole extent of the Eastern Continent, races are found inhabiting the warmer latitudes, which are now, or formerly were, in what is popularly called a semi-civilized condition. No one, we believe, has ever been foolish enough to account for this fact by supposing that a single people or tribe, having attained some degree of culture, had diffused the germs of knowledge over so large a portion of the globe. Chinese civilization differs almost as much from that of Hindostan as from that of England or of France. The Assyrian civilization was indigenous on the borders of the Euphrates, and the Egyptian on the borders of the Nile. What is remarkable in these and in all the other cases that might be cited is, that in those regions civilization never reached the high point which it has attained in other parts of the world, less favored at the outset; that it exhibited a grotesque union of refined ideas and strangely artificial institutions, with customs, manners, and creeds that seem to the European

mind abhorrent and ridiculous; and that, the internal impulse with which it started having been exhausted, it either remained stationary, without further development, or sank into decay, or fell before the hostile attacks of races that had never yielded to its influence. Now the civilization which is described as having once existed in America exhibits these general characteristics, while it has, like each of the others, its own peculiar traits. If the discoverers had made a different report, we might have been led to suppose that some such state of things as we have described had previously existed, but had perished before their arrival.

Mr. Wilson, however, does not reason in this manner. He has found, from his own observation,—the only source of knowledge, if such it can be called, on which he is willing to place much reliance,—that the Ojibways and Iroquois are savages, and he rightly argues that their ancestors must have been savages. From these premises, without any process of reasoning, he leaps at once to the conclusion, that in no part of America could the aboriginal inhabitants ever have lived in any other than a savage state. Hence he tells us, that, in all statements regarding them, everything "must be rejected that is inconsistent with well-established Indian traits." The ancient Mexican empire was, according to his showing, nothing more than one of those confederacies of tribes with which the reader of early New England history is perfectly familiar. The far-famed city of Mexico was "an Indian village of the first class,"—such, we may hope, as that which the author saw on his visit to the Massasaugus, where, to his immense astonishment, he found the people "clothed, and in their right minds." The Aztecs, he argues, could not have built temples, for the Iroquois do not build temples. The Aztecs could not have been idolaters or offered up human sacrifices, for the Iroquois are not idolaters and do not offer up human sacrifices. The Aztecs could not have been addicted to cannibalism, for the Iroquois never eat human flesh, unless driven to it by hunger. This is what Mr. Wilson means by the "American standpoint"; and those who adopt his views may consider the whole question settled without any debate.

But there are some slight difficulties to be overcome, before we can embrace these views. Putting human testimony aside, there are witnesses of the past that still give their evidence to the fact, that parts of this continent were once inhabited by races who had other pursuits besides hunting and fishing, and whose ideas and manners differed widely from those of the "red men" of the North. Ruined cities, defaced temples, broken statues,—relics such as on the Eastern Continent, from the Straits of Gibraltar to the shores of the Ganges, mark the sites of fallen empires and extinct civilizations,—relics such as we should have expected, from *a-priori* reasoning, to meet with in the corresponding latitudes of the New World,—lie scattered through their whole extent, proclaiming themselves the works of men who lived in settled communities and under regular forms of government, who had some knowledge of architecture and some rude notions of the beautiful and the sublime, who had strong feelings and vivid conceptions in regard to the agency of supernal powers in the control of human affairs, but who clothed their conceptions in uncouth forms, and worshipped their deities with absurd and debasing rites. Some of these remains being known to Mr. Wilson, on the evidence of the only pair of eyes in the universe which, in his estimation, have the faculty of seeing, he cannot treat them, according to his usual method in such cases, as fabrications of Spanish priests and lying chroniclers. How, then, does he account for them? He unfolds a theory on the subject, which he has stolen from the "monkish chroniclers" whom he treats with so much contempt, and which has long ago been exploded and set aside. He tells us, that these relics have no connection with the history of the American Aborigines,—that they have a different origin and a far greater antiquity,—that they are proofs, not to be gained, of the discovery of this continent, at a very early date, by Phœnician adventurers, and of the establishment, in the regions where they are found, of Phœnician colonies. These ruins, he tells us, were Phœnician temples, these statues are the representations of Phœnician gods. In the comparison of facts by which he endeavors to support this theory, we have been surprised to find him admitting the

testimony of other explorers. But they are, it seems, reluctant witnesses. Their inferences from the facts which they have themselves collected are directly opposite to his. "Proving our case," he says, "by such testimony, we have admitted their statement of fact, only rejecting their conclusions." Their proper business, it would appear, was to amass the materials which our author alone was competent to use. He encountered, indeed, a solitary difficulty; but this, in the most astonishing manner, has been removed. "Thus far," he writes, "had we carried the argument, but had here been compelled to stop, for want of further evidence; and the very stereotype plate that at first occupied this page, expressed our regrets that we were not able more completely to identify the Palenque statue as Hercules. At our publishers', however, the eyes of that distinguished Orientalist, the Rev. Mr. Osborn, chanced to fall upon a proof of the American goddess in the fourth note to this chapter, which he at once recognized as Astarte, represented according to an antique pattern. Her head-dress, he insisted, was in the ancient form of the mural crown, without the crescent, the prototype of that worn by Diana of the Ephesians, and so too, he insisted, was her necklace of 'two rows.'" Thus the chain of evidence was complete, and, for once, Mr. Wilson derived assistance from eyes not placed in his own head.

But, whatever distinguished Orientalists may say, undistinguished Occidentalists may be pardoned for inquiring when it was that this stream of Phœnician emigration flowed to the American shores, in what manner such an enormous body of colonists as the hypothesis necessarily supposes were conveyed hither, and what has become of their descendants. With an uncommon indulgence to our weakness of faith, Mr. Wilson condescends to meet these obvious questions. The time he cannot exactly fix; but it was "thousands of years ago,"—"before the time of Moses." To the query in regard to the means of conveyance, he answers, that at that remote period sailing ships were in common use,—as is proved by representations of them found in Egyptian tombs,—although they were afterwards superseded by galleys propelled by oars alone. The reason assigned by Mr. Wilson for this change

makes a valuable addition to the stores of Biblical commentary. "The Greeks," he says, "appear to have been selected from their imitative powers, to perpetuate such of the arts and civilization of the elder world, as were to be preserved from that decree of extermination, pronounced by the Almighty against its nations. *Commerce had been the chief cause of the total demoralization of antiquity*, and of this, they were permitted to preserve only a boat navigation." Coeval with the decline of commerce and the extermination of sailing ships was the cessation of this Phœnician emigration to America. The colonists, having no longer any communication with the mother country, soon dwindled away and perished, in accordance with a well-known law of Nature. "Extinction is the doom of every immigrant population in an uncongenial climate (*habitat*) when migration ceases to keep up and renew the original stock." The same fate is impending over us. "In our own country various causes have been assigned for the recognized delicacy, which is steadily advancing in what may be called the pure American. The growing smallness of the hands and feet, the shortening of the jaw-bones, the diminution in the number of the teeth and their rapid decay, are matters of daily comment." In like manner, the Caucasian race is melting away in the colonies of Great Britain, in South Africa, Australia, and the West Indies. "In these uniform consequences the most obtuse cannot fail to recognise the operation of a universal law, whose primary effects are to diminish migration, and whose ultimate results are the extinction of the exotic population." We suppose none of our readers are obtuse enough not to be aware of the gradual shortening of their jaw-bones, a phenomenon especially noticeable in members of Congress and popular lecturers. As for the diminution in the number of our teeth, and their rapid decay, we need, alas! no Wilson to remind us of these melancholy facts.

What we may call the physical evidence in favor of the Aztec civilization having been thus disposed of by Mr. Wilson, we come now to his treatment of the written and traditional testimony, the accounts that have been handed down to us of the Spanish conquest of Mexico, and of the condition of the country at the time when

that conquest was made. Mr. Wilson opens his "Chapter Preliminary" with the statement, that, "in this work, the standard Spanish authorities have been followed as long as they followed the truth." This declaration excited, we confess, painful misgivings in our mind; for, if Mr. Wilson was already in possession of the truth, independently of historical research,—whether by communications from the spirits of the *Conquistadores*, or by any other of the easy and popular methods of solving obscure problems,—what need was there of his consulting the standard authorities at all? But we were somewhat cheered, when, a little farther on, we found him stating, that the writer who enters into these discussions must "*con musty folios innumerable*"; that "it will not do to denounce in general terms the venerable precedents [?] so constantly quoted by our annalists," but that "their defects and their errors must be shown in detail." For it does appear to us, that, if a great historical question is to be opened,—if a series of extraordinary events, hitherto believed by the world to have really happened, are to be denounced as fabulous,—if numerous writers, whose statements and relations have been regarded in the main as worthy of credit, are now to be rejected as liars and impostors,—it is indispensable that the works containing these relations should be carefully examined, that the statements should be compared and subjected to the severest scrutiny, and that the refutation should proceed, step by step, inch by inch, over the whole field of debate. Has Mr. Wilson taken this course? Has he met with clear and resolute argument the accounts which he denounces as "*fabrications*"? Has he diligently and carefully examined the "*standard Spanish authorities*"? Has he "*conned musty folios innumerable*"? Has he read all the works in question? *Has he ever seen them?*

We may divide these works into three classes,—not with reference to their different degrees of merit and importance, but as regards their accessibility and the relative ease with which they may be consulted. The first class comprises two or three works which have been translated into English; and these translations may be procured with facility and read by any one who has some acquaintance with the

English language, though not acquainted with any other. In the second class we may place a considerable number of works which have been published indeed, but only in the original Spanish, or, in a few instances, in French or Italian translations. Some of them are rare, and difficult to meet with; others may be found in several of our best libraries. The third class embraces relations and documents which have never been translated, which have never been published, of which the originals repose in the Spanish archives at Simancas or the Escorial, or in private collections, jealously guarded, in Mexico or Madrid, and of which the only copies known to exist in this country are in the collection formed, with so much trouble and at so great cost, by Mr. Prescott. Now the writings which come under our first category Mr. Wilson has both seen and read,—to what purpose and with what profit we shall hereafter show. The publications comprised in the second class we feel very confident he has never read. The manuscripts, which come under the last head, we are morally certain he has never seen. That he has not seen them is capable of the strongest proof, short of absolute demonstration. That he had no acquaintance with Mr. Prescott's collection is a matter within our personal knowledge. Had he been in a position to obtain copies for himself, and had he availed himself of that circumstance, he would not have failed to proclaim the fact in his loudest and shrillest tones. Nor does he pretend that he has ever visited Spain, and had access to the originals. Indeed, we do not think he would have ventured upon such a step. He tells us, that, "besides the reasons already given for distrusting the correctness of Spanish statements, there is another, more secret in character, but not less potent than all combined—fear of incurring the displeasure of that tribunal which punished unbelief with fire, torture, and confiscation." If Mr. Wilson, as his language implies, stands in fear of "fire, torture, and confiscation," and if this is his most potent reason for distrusting the correctness of Spanish statements, we can readily understand why he should have chosen to remain on his native soil and write the history of the Conquest of Mexico from "the American stand-point." Lastly, Mr. Wilson makes no allusions to

matter contained in the manuscripts which had not been reproduced in the pages of Prescott. He is careful, indeed, to tell us very little of the contents of these works; but he talks *about* them with the most gratifying candor, and in his choicest phraseology. He informs us, that "Sarmiento's History of the Peruvian Incas altogether surpasses that of Dr. Johnson's *Rasselas* and the *Happy Valley*." The history of Dr. Johnson's "*Rasselas*" is related, we believe, by Boswell. The great moralist composed his beautiful and philosophical, but somewhat gloomy romance, in the evenings of a single week, in order to obtain the means of defraying the expenses of his mother's funeral. The story is a touching one; but Mr. Wilson's comparison is so inapt, that we cannot help suspecting him of having had in his mind, not the history of Johnson's "*Rasselas*," but Johnson's history of *Rasselas*. We think it rather hard, that, having, in general, such a limited amount of meaning to express, Mr. Wilson should have followed the maxim of Talleyrand, and employed language chiefly as a means of concealing his thoughts.

Mr. Wilson nowhere asserts, in so many words, that he has had access to manuscript authorities. His mode of speaking of them, however, implies as much, and he evidently intends that this inference should be drawn by his readers. In a printed note, addressed to his publishers, disclaiming any intention of "assailing the memory of the dead,"—a disclaimer which was not needed to suggest the reason why his book, loaded with typographical blunders, was hurried through the press,*—he "insists on the lawyer's privilege of sifting the evidence—a labor which Mr. Prescott was incapable of performing, from a physical infirmity"; and he undertakes to prove that Mr. Prescott's "books and manuscripts were not reliable authorities." Now even "the lawyer's privilege" does not extend to sifting evidence which he has never heard; and if Mr. Prescott was

* Author, compositor, and proof-reader were evidently engaged in a "stampede,"—the (Printer's) Devil having strict orders to make seizure of the hindmost. Part of a Spanish poem, borrowed, without acknowledgment, from Prescott, seems to have gone to "pie" on the imposing-stone, and been suffered to remain in that state.

"incapable, from a physical infirmity," of properly scrutinizing his authorities, it was the more necessary that Mr. Wilson, with his own wonderful eyes, should undertake the task. There is one manuscript which he might be supposed to have had a strong desire to examine. His book professes to be a vindication of "Las Casas' denunciations of the popular historians" of the Conquest. The work of Las Casas, supposed to contain these denunciations, is his *History of the Indies*. Mr. Wilson acknowledges that he has never seen this work; it has, he says, "been wholly suppressed"; and he is terribly severe on the censorship and the Inquisition for having been guilty of this suppression. But the only suppression in the case is, that the book has never been printed. The original manuscript may be consulted at Madrid. A copy of the most important parts of it is in Mr. Prescott's collection. Mr. Wilson might have seen that copy, had he expressed the wish. He did not, however, give himself this trouble; and we think he was right. The truth is, that, of all the Spanish historians of the Conquest of Mexico, Las Casas is the one who has indulged most largely in hyperbole. Writing, with little personal knowledge, in support of a theory which required him to magnify the ruin accomplished by the *Conquistadores*, he has exaggerated the population of the Mexican empire, the number and size of its towns, and the evidences of its civilization. It was on this very account that Navarrete, who examined the work with a view to its publication, came to the decision not to print it. We have little doubt as to the propriety of that decision; and Mr. Wilson, we think, also did well in sticking to Cass and "suppressing" Las Casas.*

* Mr. Wilson would have been less unfortunate, if he could have "suppressed" the work of Mr. Gallatin to which he has the effrontery to refer as an authority for his ridiculous assertion, that the "so-called picture-writing" of the Aztecs was a Spanish invention. As Mr. Gallatin's essay is within the reach of any of our readers who may be inclined to consult it, we shall content ourselves with a single remark on the subject. That learned writer, who had made a real and thorough study of the Mexican civilization, (having obtained from Mr. Prescott the books necessary for the purpose,) was so far from denying that hieroglyphical painting was practised by the

Our reason for believing that Mr. Wilson has never read the works, relating to his subject, which have been published only in the original Spanish or in translations into other foreign languages, is a very simple one. He produces no evidence that he has ever read them. Some of them he does not even mention. From none of them does he glean a single fact that was not ready to his hand in the pages of Prescott. Except in two or three instances, where he filches a reference from the citations made by the latter historian, he brings forward no statement contained in any of these books, either to support his own positions or to refute theirs. Why did he take from Prescott—to whom on this occasion he confesses his indebtedness—the facts in relation to the early life of Cortés, (we would he had borrowed the language as well as the matter!) if he had himself the means of consulting the works from which Prescott's account was derived? But it is unnecessary to pursue the argument; Mr. Wilson acknowledges that he knows nothing of the works in question. "For our purpose," he writes, "the standard histories of the conquest might as well be blank paper." We believe him; but had his purpose been, not "to denounce in general terms the venerable precedents so constantly quoted by our analysts, but to show their defects and their errors in detail," he would hardly have used them, as he has done, as mere wadding for the great gun which he was loading, and which has exploded with such terrible effect. His objection to the "standard histories" is, that their authors were Spaniards, ecclesiastics, royal historiographers,—that they wrote under the eye of the Inquisition and the censorship. Like objections would apply to the whole field of Spanish history. The reigns of Ferdinand and Isabella, Charles the Fifth, and Philip the Second must, therefore, be as fabulous as the conquests of Mexican Aztecs, or that authentic copies, and even actual specimens of it, have been preserved, that he himself constructed a Mexican chronology which has no other foundation than these same picture-writings. There is one remark in Mr. Gallatin's work on which Mr. Wilson would have done wisely to ponder. It is this:—"The conquest of Mexico is an important event in the history of man. Mr. Prescott has exhausted the subject."

ico and Peru. Accordingly, Mr. Wilson, when he wishes to study the history of Spain, declines to have recourse to Spanish writers. He goes to writers of other countries, and has a very natural preference for such as speak the English tongue. Besides that valuable work known among mortals as the "Encyclopædia Britannica," but usually cited by Mr. Wilson, in an off-hand and familiar way, as "Britannica," he draws much upon a treasure of his own discovery, "a ponderous folio" of the seventeenth century, written in English by one Grimshaw, and containing a full and veritable history of Spain from the earliest epochs. He makes much of Grimshaw, styling him "our chronicler." He pats the volume fondly, and calls it "my old folio,"—just as Mr. Collier pats and fondles his celebrated old folio. To judge from some specimens which Mr. Wilson gives us, the venerable Grimshaw cannot have the merit of being very easy of comprehension. Here is an extract, just as we find it:—"About the year 756, at which time there were great troops of Turks beginne to disperse themselves over all Armenia, the which did overrunne and spoil the Sarrazin's country." And here is another:—"Over common, then, in Spain, and elsewhere, which nevertheless chastise the world in such sort, but that this sinne is at this day more in use than ever it was, to the dishonor of our God, contempt of his laws, and confusion of all good order." Apparently, Mr. Wilson, besides writing in a singular style himself, is the cause of singularities in the writings of other men. What is more worthy of note is the credulity with which he swallows the fabulous inventions of the "monkish chroniclers" when set before him in English earthenware. We would undertake, for a very trifling consideration, to furnish him with the Spanish originals of the stories of "Hispan" and "Hercules," and all the other absurdities with which his old folio has supplied him. From what source does he imagine them to have been derived? Does he think they belong to the stock of traditions in possession of the Anglo-Saxon race,—that Grimshaw got them from Bagshaw, and Bagshaw from Bradshaw?

Our argument in regard to Mr. Wilson's ignorance of most of the "standard au-

thorities" will be strengthened by a review of the works which he actually has used,—or, to speak more correctly, misused,—and an examination of his reasons for selecting them. They are two in number. He can hardly be said to overrate the importance of one of these works,—the celebrated Letters of Cortés. For the events of the Conquest, and the first impressions made upon the minds of the discoverers by the aspect of the country, we could have no evidence of equal value with the dispatches written by the great adventurer from the field of his enterprises and during the course of the operations. Mr. Wilson does not, however, consult the original letters. His strong prejudice against everything Spanish would not allow him to do so. He has studied them through the medium of a translation; and the reason he assigns for his preference of this version is, that "it is better than the original." We have no doubt that it is better for Mr. Wilson's "purpose"; indeed, we fear, that, had it not been for the labors of the translator, Mr. George Folsom, the letters of Cortés would, like "most of the standard histories," have been regarded by Mr. Wilson as "no better than so much blank paper." Lockhart, by translating the chronicle of Bernal Diaz, has saved it from similar condemnation,—but only that it might incur a still more terrible fate. Mr. Wilson's theory in regard to the origin and character of this work is no less subtle than startling. According to the common belief, Bernal Diaz was a soldier in the army of Cortés, accompanied him throughout his campaigns, and, at a late period of his life, composed a narrative of the memorable events in which he had participated as an actor or an eye-witness. Writers who knew him in his old age have left us descriptions of his appearance and character. Mr. Wilson, however, holds that he never existed. The chronicle which bears the name is, according to him, a work of fiction, written by some Spanish De Foe, who had read the common narratives of the conquest of Mexico, but who had no personal knowledge of the scene in which his story is laid. What first excited Mr. Wilson's suspicions was the charming simplicity and apparent truthfulness which, in common with all readers of Bernal Diaz, he has found to be the distinguishing char-

acteristics of the narrative. "A striking feature," he tells us, "in Spanish literature, is the plausibility with which it has carried a fictitious narrative through its most minute details, completely captivating the *uninitiated*. If its supporters were not permitted to write truth, they succeeded in getting up a most excellent imitation. In Bernal Diaz the alleged individual affairs of private soldiers are so artfully interwoven with the general history as to give the effect of truth to the whole. There being no fear of contradiction, this practice of inventing familiar details could be indulged in to any extent, while the beauty and simplicity of such a style fixes at once the doubting."

"Ah! si Molière avait connu l'autre!"—

Oh that Fielding had known Mr. Wilson! Partridge, a mere unsophisticated booby, thought simplicity the characteristic of Nature, and therefore out of place in Art. Mr. Wilson, a transcendental Partridge, thinks simplicity the characteristic of Art, and therefore out of place in Nature. He is more than ordinarily severe on Mr. Prescott for not having detected in Bernal Diaz these "striking marks of the *counterfeit* instead of the *common soldier*." "We differ," he says, "decidedly from Mr. Prescott." The difference seems to be, that Prescott regarded the *appearance* of truthfulness in the narrative of Bernal Diaz as *prima facie* evidence of its truthfulness, while Mr. Wilson regards the same appearance as the most complete evidence of its untruthfulness.

But we have been anxious to discover some more definite and substantial grounds for Mr. Wilson's hypothesis. In a couple of closely-printed pages, devoted to the subject, he asks himself, again and again, the questions,—“Who, then, was Bernal Diaz?”—“Who, then, wrote the history of Bernal Diaz?” Failing to extract any reply from the singular individual to whom these queries are addressed, he winds up with the solemn and emphatic declaration, “On the evidence hereafter to be presented, we have with much deliberation concluded to *denounce* Bernal Diaz as a *myth*.” For the evidence here promised we have searched with a patience of investigation which, if applied to the problem of perpetual motion or squaring the circle, could not, we humbly think, have been wholly

unproductive; and these are the results. “The author of ‘Bernal Diaz’ says the march to Jalapa was accomplished in one day;—a proof that he never saw the country. . . . Cortez makes the ascent the work of three days, and says he did not reach Sienchimalen until the fourth day.” The main discrepancy here is Mr. Wilson's own handiwork, as he has confounded the “Sienchimalen” of Cortés with Jalapa, instead of identifying it with the “Socochima” of Bernal Diaz. But so far as there is any real discrepancy, it may be sufficient to remark, in explanation of it, that Bernal Diaz professes to have written many years after the events which he narrates, and at a distance from the scene, while the letters of Cortés were written in the country, and while the events were taking place. On another occasion, Bernal Diaz represents the Tlascalans as complaining that they could “get no cotton for their clothing.” “If this writer,” says Mr. Wilson, “had really been acquainted with the tribes of the table-land, he must have known that the fibres of the *magwey* were, among them, substitutes for that article, and are even now used at the city of Mexico in the manufacture of some fine fabrics.” We do not see how Bernal Diaz could be expected to know that the fibres of the *magwey* are now used in Mexican manufactures; neither can we comprehend how his statement, that the Tlascalans had no cotton, is at variance with Mr. Wilson's assertion, that they used the *magwey* as a substitute. We can imagine, however, that an old soldier, writing for the “uninitiated,” might prefer to speak of cotton, for which he had a Spanish word, rather than enter into explanations in regard to an Indian substitute for cotton, resembling it in appearance; while it is not easy to believe, on Mr. Wilson's bare assertion, that an article in common use throughout the Valley of Mexico was wholly unknown to the inhabitants of the table-land.

These, and, so far as we can discover, these alone, are the proofs on which Mr. Wilson convicts Bernal Diaz of being a nonentity,—of having, like Rosalind in “As you like it,” merely “counterfeited to be a man.” As a natural *sequitur* to this delicious train of reasoning, he proceeds to take this nonentity, this “myth,” as his guide throughout the narrative of the Conquest. “We may safely follow Diaz,”

he remarks, "in unimportant particulars"; and the "particulars" of the Conquest being, in Mr. Wilson's narration of them, all equally "unimportant," he is so far consistent in following Diaz throughout. Surely the Grecian fables will never grow old; here again we have blind Polyphemus groping in pursuit of cunning *Oúty*. But we must be allowed to ask Mr. Wilson why he has not rather preferred to take Gomara as his guide. It is true that he entertains a strong loathing, a rooted aversion, for this harmless old chronicler, whom he calls always "Gomora,"—associating him, apparently, by some confusion of ideas, with the ancient city of bad fame, buried with Sodom beneath the waters of the Dead Sea. But, at least, he does not deny that Gomara had an actual existence, that he was a veritable somebody,—a reality, and not a "myth,"—that he was the chaplain of Cortés, that he had access to the papers of the great commander, that he wrote a history of the Conquest, and that this history is still extant. Mr. Wilson himself asserts that the dispatches of Cortés "and the work of Gomora are the only original documents touching the Conquest of Mexico, its people, its civilization, its difficulties, and its dangers." After this declaration, it is somewhat remarkable, that, throughout his narrative of the Conquest, while continually quoting from Diaz, he makes not a single reference to Gomara; and he even censures Mr. Prescott for having pursued a different course. How shall we explain this fact? Alas for Gomara! he wrote in his native Castilian, no Lockhart or Folsom had done him into English, and so he missed his chance of having his statements cited, and, possibly even,—though we should not like to hazard an assertion on this point,—of having his name correctly spelt, by the author of the "New History of the Conquest of Mexico."

It remains only that we should notice, as briefly as possible, the use which Mr. Wilson has made of his two authorities, the translations of Bernal Diaz and Cortés, which, rejecting all assistance from other quarters, he takes for the basis of his narrative. That narrative is constructed on a plan which, we venture to say, is without a parallel in literature. Like whatever else is strikingly original, it cannot be described; we can only hope to convey a

faint idea of it by some random illustrations. To nearly every statement which he notices in the works before him Mr. Wilson offers a flat contradiction. When these statements relate to numbers, his method of treating them is a systematic one. He has picked out of Bernal Diaz, who wrote in an avowed spirit of hostility to Gomara, a pettish remark, that the exaggerations of the latter are so great, that, when he says eighty thousand, we may read one thousand. This piece of rhetoric Mr. Wilson receives literally, and makes it a rule of measurement, applying it with more or less exactness,—not, however, to the statements of Gomara, with whose work he is acquainted only at second hand, but to those of Cortés and of Bernal Diaz himself! Thus, in every computation of the number of the enemy's forces, or of the Indian allies who joined the Spaniards in their contest with the Aztecs, Mr. Wilson "takes the liberty," to use his own phrase, of "dropping" one or more ciphers from the amount. This mode of adapting the narrative to his own conceptions he calls "reducing it to reality." When Cortés—not Gomara, be it remembered—computes the number of his allies at eighty thousand, Mr. Wilson says, "Let us drop the thousands, and assume eighty as the actual number. *We must do so often.*" When Cortés writes "thirty-five thousand," Mr. Wilson prefers to say "three hundred or so." When Diaz writes "twelve thousand," Mr. Wilson suggests that we should read "five hundred." Cortés says that he caused a canal to be dug twelve *feet* deep. Mr. Wilson, speaking as if he had been an eye-witness, says the canal was only twelve *inches* deep. In another place he writes, "Accordingly a force of thirteen horse, two hundred foot, and three hundred—not thirty thousand—Indian allies were sent to relieve that village"; merely leaving his readers to the inference that the number placed between dashes is the one given by Cortés. In a single instance, he admits the estimate of Bernal Diaz, who puts the loss sustained by the Indians in a battle at eight hundred; while Las Casas, whose corrections of other writers Mr. Wilson professes to "vindicate," says the loss of the Indians on this occasion amounted to thirty thousand. Las Casas also reckons the number of natives who fell victims to Spanish cruelty in America

at forty millions. This wild estimate has been often quoted. Mr. Wilson, instead of "vindicating" it, as he was bound to do, triumphantly refutes it. "There never probably existed," he most justly remarks, "more than forty millions of savage races at one time on our globe."

It is not merely the arithmetic of his authorities that Mr. Wilson undertakes to rectify. When they describe a pitched battle, he asserts that it was a mere skirmish. When they speak of a large town, he tells us it was a rude hamlet. When they portray the magnificence of the city of Mexico, he says that they are "painting wild figments,"—whatever that may mean,—and that Montezuma's capital was a mere collection of huts. Cortés tells us, that, in his retreat, he lost a great portion of his treasure. Mr. Wilson writes, "The *Conquistador* was too good a soldier to hazard his gold; it was *therefore* in the advance, and came safely off." Cortés states, that, in a certain battle, he retired from the front in order to make a new disposition of his rear. Mr. Wilson replies, that Cortés did *not* go to the rear, because, though his presence was greatly needed there, the press must have been too great to allow of his reaching it. The presents which Cortés, while at Vera Cruz, received from Montezuma, he transmitted to the Emperor Charles the Fifth, sending, at the same time, an inventory of the articles, among which was "a large wheel of gold, with figures of strange animals on it, and worked with tufts of leaves,—weighing three thousand eight hundred ounces." The original inventory is still in existence. We have the evidence of persons who were then at the imperial court of the reception of these presents, of the sensation which they produced, and of the ideas which they suggested in regard to the wealth and civilization of the New World; and we have minute descriptions of the different articles, including the wheel of gold, from persons who saw them at Seville and at Valladolid. Mr. Wilson, without making the least allusion to this testimony, which we cannot help regarding as of the strongest possible kind, intimates that the presents were of very little value,—represents the workmanship, which excited the admiration of the best European artificers, as a mere specimen of "savage ingenuity,"—and as for the wheel

of gold, tells us that it "never existed but in the fertile fancy of Cortez."

In general, Mr. Wilson contents himself with the barest, though broadest, denial of the statements of his authorities, or with silently substituting his own version of the facts in place of theirs. But he sometimes condescends to argue the point. His logic is ingenious, but singularly monotonous. His arguments are all drawn from one source, namely, his own personal experience. The Tlascalcan wall, described by Cortés and Diaz, can never have been in existence, for Mr. Wilson has been on the very spot and found no remains of a wall. Other travellers, it may be remarked, have been more fortunate. Cortés states, that, in a march across the mountains, some of his Indian allies perished of thirst. This Mr. Wilson pronounces "impossible," because he himself travelled over the same route, and did *not* perish of thirst, as neither did his horse, though the "sufferings of both," from that or some other cause, were great. One of the most remarkable acts in the career of Cortés was his voluntary destruction of the vessels which had brought his little army to the Mexican coast, in order, as he avers, that his men might stand committed to follow the fortunes of their leader, whatever might be the dangers of the enterprise. "This event," says Mr. Wilson, "has been the subject of eloquent eulogies for centuries. Among these Robertson is of course pre-eminent." We are here left in doubt whether Robertson is to be regarded as a preëminent century or a pre-eminent eulogy. However this may be, our author denies that the stranding of the vessels was the voluntary act of the Spanish general. He is confident that they were cast away in a storm. His "most potent" reason is, that he himself has "witnessed, not only hereabout, but elsewhere, upon this tideless shore, wrecks by the grounding of vessels at anchor." This he calls "submitting the narrative to the ordeal of proof."

However, as we have already intimated, it is seldom that his authorities are submitted to this "ordeal," which we admit to be a trying one. Usually they are informed that their assertions "rest on air,"—that they are "foolish" and "baseless,"—"wild figments," or "intolerable nonsense." Cortés states that some of his

men, who had been taken prisoners by the Mexicans, were offered up as sacrifices to the Aztec deities. Mr. Wilson, after telling that their hearts were cut out, and their bodies "tumbled to the ground," complains that "to this most probable act of an Indian enemy, is *foolishly* added—it was done in sacrifice to their idols, though the very existence of Indian idols is *still* problematical!" Cortés, who had seen too many Indian idols to entertain any doubts of their existence, ought, nevertheless, not to have mentioned them, because to Mr. Wilson the matter is still a problem. Whenever that gentleman finds it inconvenient to "reduce" the statements of the Spanish historians to "realities," he omits them altogether. Thus, he says not a word of those fearful spectacles which struck horror to the hearts of the Spaniards in their visit to the *teocallis*,—the pyramidal mound garnished with human skulls, the hideous idols and the blood-stained priests, the chapels drenched with gore, and other evidences of a diabolical worship. Not unfrequently he fills up what he considers as gaps in the ordinary narratives. Thus, he pictures the dying Cuitlahua as "stoically wrapping himself in his feathered mantle," and "rejoicing at his expected welcome to the celestial hunting-grounds," where he "felt that he was worthy a name among the immortal braves." This "wild figment" from Mr. Wilson's "fertile fancy" was, perhaps, suggested by Theobald's famous emendation in the description of Falstaff's death-scene,—*"a babbled o' green fields."* On such occasions, Mr. Wilson explains that he is relating the occurrences "as they are understood by one familiar with Indian affairs." A remarkable example of this method of narration shall close our citations from his work.

The reader is, doubtless, acquainted with the tradition, said to have been preserved among the Mexicans, of a fair-complexioned deity, with flowing beard, who had once ruled over them and taught them the arts of peace, and, being subsequently driven from the country, promised to return at some future time. Predictions of his reappearance lingered amongst them, and were supposed to be accomplished in the arrival of the Spaniards. Mr. Wilson tells us that "too much stress" has been laid on this tradition; but we

know of no modern writer who has laid any stress on it except himself. It has been usually supposed to be one of those myths in which nations partially civilized embalm the memory of their heroes. Mr. Wilson does not believe the Mexicans to have been partially civilized. He regards them merely as a horde of savages. Nevertheless, he believes that among these savages "tradition [in the form here noticed] had handed down, through untold generations, from a remote antiquity," the establishment in America of Phœnician colonies, their history, and their subsequent extinction. Nor is this the whole story. In order to strengthen his argument, he gives a new and corrected version of this tradition. "It told," he writes, "that *pale faces* had once before occupied the *hot country*, coming from beyond the *great water*. *Perhaps* with this were coupled also tales of suffering and wrongs; *perhaps* how cruelly they, the natives, had been forced, by these hard task-masters, to labor upon the truncated pyramids and their crowning chapels. With unrequited Indian toil, these men had builded cities and public works which still preserved their memory, though they themselves had long since perished, having fulfilled their allotted centuries. But with their decaying monuments they left a fearful prophecy, and thus it ran: that *floating houses* would again return to the eastern coast, wafted by like winds, and filled with the same race, to teach the same religion, and to practise the same cruelties, until they again finished their cycle, and gave place to others, such as the laws of climate and population might determine." When the reader, after perusing this extraordinary relation, recovers his breath, he naturally casts his eye towards the bottom of the page, in the hope of finding some explanation of it. He accordingly discovers a note, in which Mr. Wilson states that he has "given a *little different shading* to the famous tradition," but that "*such, translated into Indian phraseology, would be the popular accounts.*" Now he had a perfect right to *interpret* the tradition as he pleased. He was at liberty to conjecture that it related to the Phœnicians, as the Spaniards were at liberty to conjecture that it related to St. Thomas. Of the two interpretations, we prefer the latter. Mr. Wilson, were

he consistent, would have done so too; for how could the Aztecs, when they saw the Spaniards desecrating the Phœnician temples and destroying the Phœnician idols, suppose that these people were of the "same race," and had come "to teach the same religion"? We care little for his inconsistencies; but the feat which he has here performed, by his "shadings," his "translations into Indian phraseology," and his medley of "pale faces," "great waters," "floating houses," "truncated pyramids," "hard taskmasters," "winds," "climates," "religions," and "laws of population," we believe to be unsurpassed by anything ever perpetrated in prose or rhyme, by Grecian bard or mediæval monk.

He appears to think himself justified in taking these liberties with the Muse of History by his anxiety to construct a narrative that should not overstep the bounds of probability. As if all history were not a chain of improbabilities, and what is most improbable were not often that which is most certain! But if, at Mr. Wilson's summons, we reject as improbable a series of events supported by far stronger evidence than can be adduced for the conquests of Alexander, the Crusades, or the Norman conquest of England, what is it, we may ask, that he calls upon us to believe? His skepticism, as so often happens, affords the measure of his credulity. He contends that Cortés, the greatest Spaniard of the sixteenth century, a man little acquainted with books, but endowed with a gigantic genius and with all the qualities requisite for success in warlike enterprises and an adventurous career, had his brain so filled with the romances of chivalry, and so preoccupied with reminiscences of the Spanish contests with the Moslems, that he saw in the New World nothing but duplicates of those contests,—that his heated imagination turned wigwams into palaces, Indian villages into cities like Granada, swamps into lakes, a tribe of savages into an empire of civilized men,—that, in the midst of embarrassments and dangers which, even on Mr. Wilson's showing, must have taxed all his faculties to the utmost, he employed himself chiefly in coining lies with which to deceive his imperial master and all the inhabitants of Christendom,—that, although he had a host of powerful enemies among his coun-

trymen, enemies who were in a position to discover the truth, his statements passed unchallenged and uncontradicted by them,—that the numerous adventurers and explorers who followed in his track, instead of exposing the falsity of his relations and descriptions, found their interest in embellishing the narrative,—that a similar drama was performed by other actors and on a different stage,—that the Peruvian civilization, so analogous to that of the Aztecs and yet so different from it, was, like that, the baseless fabric of a vision,—that the whole intellect, in short, of the sixteenth century, was employed in fashioning a gorgeous fable, and that to this end continents were discovered, nations exterminated, countries laid waste, evidences forged, and witnesses invented. And this theory is to be swallowed in one solid and indigestible lump, unleavened with logic, unmoistened with grammar, unsweetened with rhetoric. Let those whose appetites are strong, and whose olfactory nerves are not too delicate, sit down to the repast.

For our own part, we are quite satisfied with the bare contemplation of the fare. Our readers, also, we suspect, have long ago been satiated. They have dropped off, one by one, and left us alone with our kind entertainer. What more we have to say must therefore be bestowed upon his private ear. We shall speak with the greater freedom. We know the exquisite pleasure we have given him. We are sure that he is not ungrateful. When his book comes to a second edition,—with a *change of title-page* corresponding to some change in the popular sentiment,—we shall have to submit to the same honors which he has inflicted on Mr. Prescott and "Rousseau de St. Hilaire"; he will reprint our article as "a flattering notice,"—as the "Atlantic Monthly's estimate of his researches." We beg to call his attention to our closing remarks, which, indeed, may serve as a digest of the whole. When he has "translated them into Indian phraseology," (we regret that we cannot save him this trouble,) and "reduced them to reality," we shall take our leave of him, not without a mournful presentiment that the separation is to be eternal.

There are many points of difference between his work and Mr. Prescott's "History of the Conquest of Mexico"; but the

chief distinction, we think, may be thus stated. If the foundations on which Mr. Prescott's narrative is built should ever be overthrown,—a contingency which as yet we do not apprehend,—that narrative would still rank among the masterpieces of our literature. It could no longer be received as a truthful relation of what had actually happened in the past; but it would be received as a most faithful and graphic relation of what had been *asserted*, of what was once universally *believed*, to have so happened. If the reality appears strange, how much stranger would appear the fiction! The truth of such a story may seem improbable; the invention of such a story would be little short of miraculous. Prescott's work, if removed from its place among histories, must stand in the first rank among works of imagination,—must be classed with the "Odyssey" and the "Arabian Nights' Entertainments."

But this book of Wilson's must, under all conditions, and in any contingency, be regarded as worthless. Be the story of the Conquest true or false, this contains no relation of it, this contains no refutation of it. Not content with vilifying his authorities, with impugning their faith, denying their existence, and mangling their names, he has disfigured their statements, corrupted their narrative, and substituted gross absurdities for what was at least beautiful and coherent, whether it was fiction or reality. His book is in every sense a fabrication. It is no record of the truth; it is not a romance or a fable, artfully constructed and elegantly told; it is—to use that plain language which the occasion authorizes and demands—a barefaced, but awkward falsification of history,—so awkward, that it has cost us little trouble to detect it,—so barefaced, that it has been a duty, though, of course, a painful one, to expose it.

Mothers and Infants, Nurses and Nursing.

Translated from the French of *A Treatise*, etc., by DR. AL. DONNÉ, late Head of the Clinical Department of the Faculty of Paris, etc., etc. Boston: Phillips, Sampson, & Co. 1859.

WHEN the young Count of Paris was at the tender age which requires the food

that only mothers and their substitutes can supply, M. DONNÉ, the author of this work, was called in consultation at the royal palace. He had a new way of examining milk through the microscope, and deciding upon its healthy and nutritive qualities or its defects, as the case might be. The whole world was full of the great question just then,—for the deep-bosomed dame of Normandy or Picardy who should be selected was to be the nurse not of a child only, but of a dynasty. So thought short-sighted mortals, at least, in those days,—little dreaming what cradle would be under the square dome of the Tuileries before twenty years were past!

M. DONNÉ, as we said, was the man selected from all men for the task of choosing a nurse for the most important baby of his time. This is a voucher for his position at that period in the great medical world of Paris. He is known, also, to the scientific world by a number of treatises, with some of which we have long been familiar, as, for instance, the "Cours de Microscopie," with the remarkable Atlas copied from daguerreotypes taken by the aid of the camera. The present work is of a somewhat more popular character than his previous productions.

Little "Nursing" America is the father of Young America that is to be. And there is no denying that our new vital conditions on this side of the planet suggest some very grave questions,—such as these:—Whether there be not a gradual deterioration of the primitive European stock under these influences; and, Whether it is not possible that the imported human breed may run out here, so that, some time or other, the resuscitated tribes of Algonquins and Hurons may show a long shank of the extinct Yankee, as they show the Dodo's foot at the British Museum.

It is this contingency against which many intelligent and worthy persons are now trying to provide. The indefatigable Dr. Bowditch has made a map of this State of Massachusetts, showing the distribution of consumption in its different localities. That is the first thing,—*where* to live. We have been told an alleged fact with reference to a certain large New England town, which, if it were true, would raise the value of real estate in that place a million of dollars, perhaps, in twenty-four hours. We do not tell it,

though mentioned to us by a celebrated practitioner and professor, simply because we are afraid it is too good to be true. At any rate, attention is beginning to be thoroughly awake as to the point of *where* we shall live. Now, then, *how* shall we live?

It is just as well to begin early. Infancy is too late. If men were dealt with like other live stock, a contractor might undertake to deliver at Long Wharf a cargo of three-year old human colts and fillies of almost any required standard of development and health, in five years from date. If only a cheap article were required, such and such parents would be selected; if the young animals were to be of prime quality, he must know it long enough beforehand, and be particular in his choice. This is plain speaking, but true,—as everybody knows, who studies the laws of life. *Ex nihilo nihil fit*. Given a half-starved dyspeptic and a bloodless negative blonde as parents, Hercules or Apollo is an impossibility in their progeny. Yet people look with infinite expectations of health, strength, beauty, intellect, as the product of 0×-1 . The late Colonel Jaques, of the "Ten Hills Farm," knew ever so much better;—what a pity so much sound physiology should have been confined to "Cœlebs," and "Dolly Cream-pot," and the likes of them!

Granted a sound, fair baby,—*viable*, as the French say,—liveable, or life-capable, and life-worthy. What shall we do with it?

A baby answers to the lively definition of an animal as "a stomach provided with organs." It lives to feed. It does not know much, but in its speciality it is unrivalled. The way in which it helps itself from the sources of life is a masterpiece of hydraulic skill. Once let it lose the Heaven-imparted art of haustion, and all the arts and academies of the world can never teach it again.

To manage this little feeding organism, with its wondrous instinct and capacity of imbibition, is the first great question after that of race is settled. Shall the mother's blood continue to flow through its fast-throbbing heart, and all the subtle affinities that bind the two lives be continued until reason and affection take up the chain where the link of bodily dependence is broken? Or shall it cleave no more to

her bosom, but transfer its endearing dependence to a stranger, or learn to call a bottle its mother?

These are some of the questions learnedly, and yet familiarly, discussed in M. Donné's book. He has laid down many excellent rules for the physical and moral management of the infant, which the young mother can readily learn and put in practice. For the physician, his work contains many interesting facts with reference to the quality and the microscopic appearances of milk, as obtained from various sources and under different circumstances.

On one or two points our American experience would somewhat modify the rules commonly accepted in Paris. The nurse from the French provinces is evidently a different being from our Milesian milky mothers. So, too, the rules given by our own venerable and sagacious observer, Dr. James Jackson, as to the period of separating the infant from its mother or nurse, should be borne in mind, as laid down in his admirable "Letters to a Young Physician."

But there is a great deal of information applicable to children and their mothers in all civilized regions; and as we wish to start fair with the next generation, we are very glad to have so intelligent a guide for the management of our infant citizens.

Street Thoughts. By the Rev. HENRY M. DEXTER, Pastor of Pine-Street Church, Boston. With Illustrations by Billings. Boston: Crosby, Nichols, & Co. 1859.

If a profusion of introductory mottoes were any indication of the excellence of a book, this volume would be indeed a *chef-d'œuvre*. On the page usually devoted to the Dedication, we have no less than six more or less appropriate quotations: a Greek one from Julian, a Latin one from Quintilian, a dramatic one from Shakespeare, a metrical one from Young, a ponderous philosophical one from Dr. Johnson, and a commonplace one from Bryant. In consideration of the number and learnedness of these certificates of character, we approach the lucubrations of the Reverend Mr. Dexter with profound respect.

In the days when controversial literature was fashionable in England, and the strife between Protestantism and Catholi-

cism possessed some interest for the public, we remember with considerable amusement the manner in which the champions on either side conducted the attack. The Romish warrior would this month issue a formidable volume entitled "A Conversation between a Roman Catholic English Nobleman and an Irish Protestant." In this work the Roman Catholic lord had it all his own way; the Irish Protestant was accommodately weak in all his arguments, and the noble Papist battered him famously. But the Episcopal side was on hand next month with a volume entitled "A Dialogue between a Protestant Peer and an Irish Papist." Here the whole thing was reversed. The noble was still victorious, but he had changed his religion; and this time the Roman Catholic was feeble, and the Protestant stalwart. It is worthy of remark, however, that in both cases the nobleman was on the right side.

The Reverend Mr. Dexter thoroughly comprehends this ingenious method of attack. Does he, for instance, desire to impress upon the mind of his reader that it is in the highest degree criminal to wear kid gloves in the street, he, by a happy accident, encounters on his way to the office two persons conversing upon that important topic. He innocently eavesdrops. The individual who advocates the wearing of gloves is (of course) frivolous, fashionable, and feeble. His companion, who despises such vanities, is poor, though honest,—brawny and impregnable. It is wonderful how stupidly the kid-glove advocate reasons. The honest son of toil overwhelms him in a few moments. When a man talks so splendidly about the hard palm of labor being more useful to the world than the silken fingers of the aristocrat, who would have the courage to reply? The feeble aristocrat is (very properly) discomfited, and the curtain falls amid applause from the gallery.

The reverend gentleman seems to combine with his talent for eavesdropping a most remarkable good-fortune in the contrasts afforded by the various interlocutors whose conversation he overhears. Whether he is in a shop, or an omnibus, or on the sidewalk, he is certain to encounter a foolish person and a sensible person (according to Mr. Dexter's idea of sense) discussing some important social topic,—

such as, Whether dancing is criminal, or, Whether people should wear stove-pipe hats. At the end of the discussion, the reverend listener appears in a paragraph as the *deus ex machinâ* of the drama, pats the victorious sensible boy on the head, and treats the foolish boy with silent contempt. It does not take much to win Mr. Dexter's approval. He goes into rhapsodies over a rich man who insists on carrying home his own bundle; while another purchaser, who is villain enough to desire his parcel to be sent to his house, meets with all the scorn that he merits. Our author takes cheerful views of life. He goes into State Street, and, struck with the great crowds of people, asks the solemn question, "Whither are they going?"—"To the open grave!" is his jocund reply. He, in fact, sees nothing but a job for the undertaker in all the health and life by which he is surrounded; and a file of schoolboys out for a walk would doubtless to him be nothing more than the beginning of a procession to Mount Auburn. The shop-keepers should beware of Mr. Dexter. He is the avowed enemy of nice coats, kid gloves, silk dresses, fine houses, and his proof-reader knows what other *et ceteras* which ignorant people have been in the habit of looking on as commodities useful in helping trade, and consequently forwarding civilization.

We really thought that this shallow philosophy had completely died out, and that every educated person had been brought to comprehend the uses of Beauty and Luxury. Mr. Dexter's "Street Thoughts" is a silly proof that there are men yet living whose theory of social ethics may apparently be summed up thus: Live meanly, be afraid of God, and listen at keyholes.

The Mathematical Monthly. Edited by J. D. RUNKLE, A. M., A. A. S. Nos. I.—VII. October, 1858, to April, 1859. Cambridge: John Bartlett. 4to. pp. 284.

THE title of Mr. Runkle's *Monthly* is much drier than its table of contents. He has aimed at interesting all classes of mathematicians, has introduced problems and discussions intelligible to scholars in our High Schools, and has also published contributions to the highest departments of the

science. Educational questions have great prominence on the pages of his journal; he gives frequent notes upon the best modes of teaching the elementary branches, and proposes to publish in a serial form treatises adapted to use in the school-room. Every number of the "Monthly" contains five prize problems for students. Nor are its pages confined to topics strictly mathematical. The number for February introduces a problem by a quotation from Longfellow's "Hiawatha"; another gives a list of fifty-five of the Asteroid group, with their orbits, and the circumstances of their discovery. The March number explains an ingenious holoecryptic cipher, written with the English alphabet, with no more letters than would be required for ordinary writing, yet so curiously complicated, that, while with the key easy to understand, it is without the key absolutely undecipherable, even to the inventor of the plan; and the key is capable of so many variations, that every pair of correspondents in Christendom may have their own cipher practically different from all others. In the November and December numbers, a popular account of Donati's Comet was given by Geo. P. Bond, then assistant, now chief director of the Observatory at Cambridge. This paper has been issued separately, very finely illustrated by twenty-one cuts, and by two beautiful engravings. No papers, readily accessible to the public, contain, in a form so entirely devoid of technicalities, and so clearly illustrated to the eye, so much information relative to the nature of comets in general, and in particular to the phenomena of this most beautiful comet of the present century.

The purely mathematical articles are all original, many are of great value, and some are, to those who understand their secret meaning, peculiarly interesting. A note of Peirce's, for example, in the number for February, proposes two new symbols, one for the mystic ratio of the circumference to the diameter, a second for the base of Napier's logarithms,—and then, by joining them in an equation with the imaginary symbol, expresses in a single sentence the mutual relation of the three great talismans in the magic of modern science. Another article, in the April number, by Chauncey Wright, contains a new view of the law of Phyllotaxis, approaching it from an *a-priori* stand-point, and showing

that the natural arrangement of leaves about the stems of plants is precisely that which will keep the leaves most perfectly distributed for the reception of light and air.

We are glad to learn that a constantly increasing subscription-list, both at home and abroad, shows, not only that Mr. Runkle judged wisely in thinking such a journal needed, but also that the editorial office has fallen upon the right man.

Memoir and Letters of the late Thomas Seddon, Artist. By his BROTHER. London: 1858.

ASSOCIATIONS are fast gathering round the English Pre-Raphaelites. Those that come with honors and with death already belong to them. A permanent influence is assured to the new school by a continuance of vigor, and by the space which it already occupies in the history of Art. This little volume is of interest as being the first of its biographies. Mr. Seddon attained no wide reputation during his life, but he left a few pictures of enduring value; and his early death was felt, by those who best knew his powers and purposes, to be a great loss to Art.

He was the son of a cabinet-manufacturer, and was born in London in 1821. After receiving a good school-education, at the age of sixteen he entered his father's work-rooms. He had already shown a decided love of drawing. He had a quick perception of beauty, and excellent power of observation. His disposition was serious, and his conscience sensitive; but he had a pleasant vein of humor, and a generous nature. After some years of irksome work, he was sent to Paris to perfect himself in the arts of ornamentation, and his residence there seems to have confirmed his taste for painting, to the practice of which he desired to devote his life. But for the next ten years he was engaged in business, giving, however, his evenings and his few vacations to the study and practice of Art, and becoming more and more eager to leave an employment which was wholly uncongenial to him. At length, in his thirtieth year, he was able to begin his career as a professional artist. His experiences at first differed but little from those of the common run of young paint-

ers; but his fidelity in work, his conscientious rendering of the details of Nature, and his sincerity of purpose, gave real worth even to his earlier pictures, and brought him into relations of cordial friendship with Holman Hunt, Madox Brown, and others of the heads of Pre-Raphaelitism. After making a long visit, in company with Hunt, for the purposes of study, to Egypt and Palestine, and painting a few remarkable pictures, he returned home, and was married. Some months afterward he set out again for the East, but had hardly reached Cairo before he was seized with fatal illness. He died on the 23d of November, 1856,—just as he was grasping the fruit of years of labor and waiting.

The best part of the volume of memoirs is made up of Seddon's letters from the East. They exhibit his character in a most agreeable light, while, apart from any personal interest, they have a charm, as natural, vivid delineations of Eastern scenery and modes of life. He saw with a painter's eye, and he described what he saw clearly and vigorously, showing in his letters the same traits which he displayed in his pictures. Writing from his camping-ground on the edge of the Desert, he says,—“The Pyramids and Sphinxes, in ordinary daylight, are merely ugly, and do not look half as large as they ought to look from their real size; but in particular effects of light and shade, with a fine sunset behind them, for example, or when the sky lights up again, a quarter or half an hour afterwards,—when long beams of rose-colored light shoot up like a glory from behind the middle one into a sky of the most lovely violet,—they then look imposing, with their huge black masses against the flood of brilliant light behind.”

Here is the first sight of Jerusalem:—“At length, about five o'clock, after expecting, for the last half-hour, that every hill-side we climbed would be the last; we came suddenly in full view of Jerusalem.—Few, I think, however careless, have looked for the first time on this scene, without some feelings of solemn awe. We read the accounts of all that passed within or around these walls with something of the vagueness that always veils the history of times that have gone by two thousand years ago; but however soon the feeling may wear off or be cast away, it is impossible, with the very spot before you where

your Saviour lived and died, not to feel vividly impressed with the actual reality of what we have read of, and its intimate connection with ourselves.—But soon I was struck with the very erroneous idea I had had of Jerusalem. From the west it does not look at all like a city built on a hill; for, rather below you, at the farther end of a barren plain, you see nothing but the embattled walls of a feudal town, with one or two large buildings and a minaret alone visible above them. To the right the ground dips into the Valley of Hinnom,—but to the left it is level with the city-walls, and its surface is covered with bare ribs of rock running along it; and it is from this side that the Romans and Crusaders attacked. Behind the city, rather to the north, lay the Mount of Olives, and the long, straight lines of the Moab Mountains beyond the Dead Sea, stretching from horizon to horizon, half-shadowy and veiled in mist, through which they shone rosy in the evening's sunlight.”

We have no space for further descriptions, excellent as they are. But we make one or two extracts relating more immediately to Art and to Seddon's views of the duties of an artist.

“I am sure that there is a great work to do, which wants every laborer,—to show that Art's highest vocation is, to be the handmaid to religion and purity, instead of to mere animal enjoyment and sensuality. This is what the Pre-Raphaelites are really doing in various degrees, but especially Hunt, who takes higher ground than mere morality, and most manfully advocates its power and duty as an exponent of the higher duties of religion.”

“I hope I may be able to return to this place; for, to assist in directing attention to Jerusalem, and thus to render the Bible more easily understood, seems to me to be a humble way in which, perhaps, I may aid in doing some good.”

Here is a portion of a letter written in England:—“The railway from Farnborough went through a most beautiful country,—by Guildford, Dorking, and Boxhill. While I was at Farnborough, on the bridge, sketching, a respectably-dressed man came up and touched his hat. After standing a minute or two, he said, ‘So you are doing something in my line, Sir?’—‘What!’ said I, ‘are you an artist?’—‘Well, Sir, I cannot venture to call myself an artist, but I

gets my living by making drawings. I makes 'em in pencil.'—I asked him if he took portraits.—'I does every line, portraits and all; but I don't get many portraits since the daguerreotype came in. No, Sir, my drawings are principally in the sporting line. I does portraits of gentlemen going over a fence or a five-barred gate. I does 'em all in pencil, and puts a little color on their faces, but all the rest in pencil,—d'ye see?'—'Yes; but do you make a good living?'—'Well, not much of that; I used to earn a good deal more money when I did portraits at sixpence each than I do now.'—I said, 'I suppose you begin to see that you can do better, and it takes you longer.'—'That's just it; you've hit it, Sir. I used to knock them off in a quarter or half an hour, and now it takes me seven or eight days to do a sporting piece.'—So I told the poor man that I would willingly give him advice, but I was afraid it would ruin him completely, for that afterwards he would have to take two or three months.—'Yes, Sir, I sees that; but I am too old now to learn a new line. But I find trees very hard; I can't manage them.'—So I sat down, and drew a branch of a tree, which he said was very much in his style; and I gave him some advice which I thought might help him, and the good man went away so much obliged."

When the news of Mr. Seddon's death reached England, it was at once felt by his friends that it was due to his memory that the public should be made better acquainted with the excellence of his works. An exhibition of them was accordingly made, and a subscription raised for the benefit of his widow, by purchasing his large picture of Jerusalem, to be presented to the National Gallery. The subscription was successful, and Seddon's fame is secure.

"Mr. Seddon's works," says Mr. Ruskin, "are the first which represent a truly historic landscape Art; that is to say, they are the first landscapes uniting perfect artistical skill with topographical accuracy,—being directed with stern self-restraint to no other purpose than that of giving to persons who cannot travel trustworthy knowledge of the scenes which ought to be most interesting to them. Whatever degrees of truth may have been attempted or attained by previous artists have been more or less subordinate to pictorial or

dramatic effect. In Mr. Seddon's works, the primal object is to place the spectator, as far as Art can do, in the scene represented, and to give him the perfect sensation of its reality, wholly unmodified by the artist's execution."

Mr. Ruskin's judgment will not be questioned by those who have seen Seddon's pictures. But it might also be added, that such accuracy as he attained is by no means the result of mere laborious and conscientious copying, but implies and requires the possession of strong and well-balanced imagination.

We trust that the extracts we have given may lead lovers of Art to read the whole of the little volume from which they are taken.

Passages from my Autobiography. By SYDNEY, LADY MORGAN. New York: D. Appleton & Co. 1859.

AGED sportiveness is not seductive, and we do not become slaves at the tap of a fan, when the hand that holds it is palsied and withered. We have in the volume before us the melancholy spectacle of an aged female of quality setting her cap at everybody.

When an old woman makes up her mind to be young, she invariably overdoes it. The gypsy horse-dealers, when they have a particularly ancient horse to dispose of, administer a nostrum to the animal, which has the effect of keeping him continually in motion, and bestowing on him a temporary vivacity which a colt would hardly exhibit. Lady Morgan is unnecessarily frisky. The gypsy's horse, when the effect of the medicine has passed off, becomes more aged and infirm than ever. What a terrible reaction must have been the lot of this old lady, after all the capers she had cut in these passages from her autobiography!

A great, great, great, long time ago, as the story-tellers say, when novels were few and far between, and an Irish novel was a thing almost unheard of, a smart, self-educated Irish girl, of, we believe, rather humble origin, discovered that she had a knack at writing, and, having published a cleverish novel, called "The Wild Irish Girl," was taken up by great people, exploited, made the fashion, and had Sir

Charles Morgan, a physician of some standing, given her for a husband. She continued to write. Her work on France made some noise, on account of its having been prohibited by the French government; and her subsequent book on Italy, if not profound, was at least sprightly. Her Irish novels were, however, her best productions. There is considerable observation, and some feeling, displayed in them. Her knowledge of Irish society is very exact, and her pictures of it very slightly exaggerated. "The O'Briens and O'Flahertys" and "Florence MacCarthy" are, perhaps, the best of her works of fiction. At this period, Lady Morgan possessed a rather interesting appearance, great audacity, and a certain reckless style of conversation, which was found to be piquant by the jaded gossips of the metropolis. She was taken up by London society,—which must always be taking up something, whether it be a chimney-sweep that composes music, or an elephant that dances the *valse à deux temps*; and she fluttered from party to party, a sort of Tom Moore in petticoats,—with this difference, that Moore left his meek little wife at home, while Lady Morgan trotted her husband out after her on all occasions. It is amusing to observe what pains the poor woman takes to persuade us that Sir Charles is a monstrous clever man. Betsy Trotwood never labored harder to convince the world of the merits of Mr. Dick, than Lady Morgan does to obtain a place for her husband as a learned philosopher who was in advance of his age, or, as she prettily expresses it in French, (she likes to parade her French, this excellent wife,) "*il devançait son siècle.*" This mania for inlaying her writing with French scraps rises with her Ladyship to a species of insanity. "*Est il possible that I am going to Italy?*" she exclaims. How much more forcible is this than the vulgar "Is it possible?" When the Duke of Sussex comes into a party, he does not excite anything so commonplace as a great sensation; no,—it is a "*grand mouvement!*" Praise bestowed on her is an "*éloge.*" She would not condescend to speak of such things as folding-doors,—they are better as "*grands bat-tants.*" A change of scene is a "*changement de décoration.*" Mrs. Opie, whom she sees at a party, is not in full dress, but "*en grand costume.*" The three Messrs. Lygon

look very "*hautain.*" And while driving with Lady Charleville, instead of having a charming conversation on the road, her Ladyship has it "*chemin faisant.*" *Allons, mi lady!* you prefer that style of writing. *Chacun à son goût! Mais* we, nous autres, love mieux the plain old Saxon language.

If Lady Morgan had called this volume "Passages from my Card-Basket," there would have been some harmony between the title and the contents. The three hundred and eighty-two pages are for the most part taken up with frivolous notes from great people, either inviting her Ladyship to parties or apologizing for not having called. These are interspersed with a number of philoprogenitive letters to Lady Clarke,—her Ladyship's sister,—in which, being childless herself, she expends all her bottled-up maternity on her nephews and nieces. The little pieces of autobiography scattered here and there are painfully vivacious. The poor old lady smirks and capers and ogles, until one becomes sick of this sexagenarian agility. Paris beheld no more melancholy spectacle than that of poor old Madame Saqui dancing on the tight-rope for a living at the age of eighty-five, and displaying her withered limbs and long white hair to a curious public. We do not feel any particular degree of veneration for that Countess of Desmond "who lived to the age of a hundred and ten, and died of a fall from a cherry-tree then," as Mr. Thomas Moore sings. Well, Lady Morgan dances on any amount of literary tight-ropes, and climbs any number of intellectual cherry-trees. It is a sight more surprising than pleasant; and her Ladyship must not be astonished that the critics should not treat her with the respect due to her age, when she herself labors so hard to make them forget it.

Bitter-Sweet. A Poem. By J. G. HOLLAND, Author of "The Bay Path," "Titcomb's Letters," etc. New York: Charles Scribner, 124 Grand Street. pp. 220. 1859.

UNEXPECTEDNESS is an essential element of wit,—perhaps, also, of pleasure; and it is the ill-fortune of professional reviewers, not only that surprise is necessarily something as rare with them as a

June frost, but that loyalty to their extemporized omniscience should forbid them to acknowledge, even if they felt, so fallible an emotion.

Unexpectedness is also one of the prime components of that singular product called Poetry; and, accordingly, the much-enduring man whose finger-ends have skimmed many volumes and many manners of verse may be pardoned the involuntary bull of not greatly expecting to stumble upon it in any such quarter. Shall we, then, be so untrue to our craft,—shall we, in short, be so unguardedly natural, as to confess that “Bitter-Sweet” has surprised us? It is truly an original poem,—as genuine a product of our soil as a golden-rod or an aster. It is as purely American,—nay, more than that,—as purely New-English,—as the poems of Burns are Scotch. We read ourselves gradually back to our boyhood in it, and were aware of a flavor in it deliciously local and familiar,—a kind of sour-sweet, as in a *frozen-thaw* apple. From the title to the last line, it is delightfully characteristic. The family-party met for Thanksgiving can hit on no better way to be jolly than in a discussion of the Origin of Evil,—and the Yankee husband (a shooting-star in the quiet heaven of village morals) about to run away from his wife can be content with no less comelike vehicle than a balloon. The poem is Yankee, even to the questionable extent of substituting “locality” for “scene” in the stage-directions; and we feel sure that none of the characters ever went to bed in their lives, but always sidled through the more decorous subterfuge of “retiring.”

We could easily show that “Bitter-Sweet” was not this and that and t’other, but, after all said and done, it would remain an obstinately charming little book. It is not free from faults of taste, nor from a certain commonplaceness of metre; but Mr. Holland always saves himself in some expression so simply poetical, some image so fresh and natural, the harvest of his own heart and eye, that we are ready to forgive him all faults, in our thankfulness at finding the soul of Theocritus transmigrated into the body of a Yankee.

It would seem the simplest thing in the world to be able to help yourself to what lies all around you ready to your hand; but writers of verse commonly find it a difficult, if not impossible, thing to do.

Conscious that a certain remoteness from ordinary life is essential in poetry, they aim at it by laying their scenes far away in time, and taking their images from far away in space,—thus contriving to be foreign at once to their century and their country. Such self-made exiles and aliens are never repatriated by posterity. It is only here and there that a man is found, like Hawthorne, Judd, and Mr. Holland, who discovers or instinctively feels that this remoteness is attained, and attainable only, by lifting up and transfiguring the ordinary and familiar with the *mirage* of the ideal. We mean it as very high praise, when we say that “Bitter-Sweet” is one of the few books that have found the secret of drawing up and assimilating the juices of this New World of ours.

The Mustee; or, Love and Liberty. By B. F. PRESBURY. Boston: Shepard, Clark, & Brown. 12mo.

THE plot of this novel is open to criticism, and we might take exception to some of the opinions expressed in it; but it is evidently the work of a thoughtful and scholarly mind and benevolent heart,—is exceedingly well written, shows a great deal of power in the delineation both of ideal and humorous character, and includes some scenes of the most absorbing dramatic interest. The character of Featherstone is admirably drawn, and Bill Frink is a positive addition to the literature of American low life. We commend him to our Southern friends, as an example of one of the most peculiar products of their peculiar institution. The author of the novel has lived at the South, and his descriptions of slavery display accurate observation, candid judgment, and a vivid power of pictorial representation. The scenes in New Orleans are all good; and in few novels of the present day is there a finer instance of animated narration than the account of Flora’s escape from slavery. The incidents are so managed that the reader is kept in breathless suspense to the end, with sympathies excited almost to pain, as one circumstance after another seems to threaten the capture of the beautiful fugitive. Though the book belongs to the class of anti-slavery novels, it is not confined to the subject of slavery, but in-

cludes a consideration of almost all the "exciting topics" of the day, and treats of them all with singular conscientiousness of spirit and vigor of thought.

Rousse's Portrait of Emerson. Published in Photograph. Boston: Williams & Everett.

Durand's Portrait of Bryant. Engraved by Schoff & Jones. New York: Published by the Century Club.

Barry's Portrait of Whittier. Published in Photograph. Boston: Brainard.

ALMOST one of the lost arts is that of portraiture. Raised by Titian and his contemporaries to the position of one of the noblest walks of Art, and in the generations following depressed to the position of minister to vanity and foolish pride, it has remained, during the most of the years since, one of the lowest and least reputable of the fields of artistic labor. The lost vein was broken into by Reynolds and Gainsborough, who left a golden glory in all they did for us; but no one came to inherit, and in England no one has since appeared worthy of comparison with them. In all Europe there is no school of portraiture worth notice; the so-called portrait-painters are only likeness-makers, comparing with the true portraitist as a topographical draughtsman does with a landscape artist. The intellectual elements of the artistic character, which successful portraiture insists on, are some of its very greatest,—if we admit, as it seems to us that we must, that imagination is not strictly intellectual, but an inspiration, an exaltation of the whole nature. To paint a great man, one must not merely comprehend that he is great, but must in some sense rise up by the side of, and sympathize with, his greatness,—must enter into and identify himself with some essential quality of his character, which quality will be the theme of his portrait. So it inevitably follows that the greatness of the artist is the limitation of his art,—that he expresses in his work himself as much as his subject, but no more of the latter than he can comprehend and appreciate.

The distinction between the true and the false portraitist is that between expression of something felt and representation

of something seen; and as the subtlest and noblest part of the human soul can only be felt, as the signs of it in the face can be recognized and translated only by sympathy, so no mere painter can ever succeed in expressing in its fulness the character of any great man. The lines in which holiest passion, subtlest thought, divinest activity have recorded in the face their existence and presence, are hieroglyphs unintelligible to one who has not kindled with that passion, been rapt in that thought, or swept away in sympathy with that activity; he may follow the lines, but must certainly miss their meaning. A successful portrait implies an equality, in some sense, between the artist and his original. The greatest of artists fail most completely in painting people with whom they have no sympathy, and only the mechanical painter succeeds alike with all,—the fair average of his works being a general levelling of his subjects; the great successes of the genuine artist being as surely offset (if one success can find offset in a thousand failures) by as absolute and extreme failure.

As regards portraiture in general, the public may, without injury to Art or history, employ the painters who make the prettiest pictures of them; it doesn't matter to the future, if Mr. Jenkins, or even the Hon. Mr. Twaddle, has employed the promising Mr. Mahlstock to perpetuate him with a hundred transitory and borrowed graces,—if the talented young *littérateur*, Mr. Simeah, has been found by his limner to resemble Lord Byron amazingly, and has in consequence consented to sit for a half-length, to be done *à la Corsoir*, etc., etc.; but for our men of thought, for those whose works will stand to all time as the signals pointing out the road a nation followed, whose presence and acts shall be our intellectual history,—it is of some little moment that these should be given to us in such visible form, that men shall not conjecture, a thousand years hence, if Emerson were really a man, or a name under which some metaphysical club chose to publish their philosophics. In psychological history, portraits are as necessary as dates; and one of the most valuable gifts to an age is a great portrait-painter,—a Titian, a Gainsborough, a Reynolds, or a Page,—which last has more of the 'Titianesque character than any one

who has painted since the great Venetians lived, and few, indeed, are the generations so endowed.

Beside this full insight and representation of character, which makes the ideal portraiture, we have the less complete, but only in degree less valuable, apprehension which results from a point of sympathy, a likeness of liking in one or more fields of thought, a common sensitiveness, a common interest; and the rarer sympathy between artist and subject, of that intimacy and complete understanding of personal character, which, even where no great talent exists in the artist, gives a unique value to his work, but which, where the intimacy is that of great minds, gives us works on which no dilettanteism, even, makes a criticism,—as in that portrait of Dante by Giotto, to our mind the portrait *par excellence* of past time.

In the three admirable portraits whose titles stand at the head of our notice, we have in one way and another all of the conditions we have spoken of fulfilled. Rowse's portrait of Emerson is one of the most masterly and subtle records of the character of a signal man, nay, the most masterly, we have ever seen. Those who know Emerson best will recognize him most fully in it. It represents him in his most characteristic mood, the subtle intelligence mingling with the kindly humor in his face, thoughtful, cordial, philosophic. The portrait is not more happy in the comprehension of character than in the rendering of it, and is as masterly technically as it is grandly characteristic. An eminent English poet, who knows Emerson well, says of it, justly,—“It is the best portrait I have ever seen of any man”; and we say of it, without any hesitation, that no living man, except, *perhaps*, William Page, is capable, at his best moment, of such a success.

In Barry's portrait of Whittier it is easy to see the points of contact between the characters of the artist and the poet-subject, in the sensitiveness shown in the lines of the mouth in the drawing, in the delicacy of organization which has wasted the cheek and left the eye burning with undimmed brilliancy in the sunken socket, the fervent, earnest face, defying

age to affect its expressiveness, as the heart it manifests defies the chill of time. It is an exceedingly interesting drawing, and one by which those who love the poet are willing to have him seen by the future. It must remain as the only and sufficient record of Whittier's *personnel*.

In the portrait of Bryant we have the results of an intimacy of the most cordial kind, of years' duration,—an almost absolute unity of sentiment and similarity of habits of regarding the things most interesting to each. Of nearly the same age, Bryant and Durand have grown old together, loving the same Nature, and regarding it with the same eyes,—the painter catching inspiration from the poet's themes, and the poet in turn getting new insight into the mystery of the outer world through the painter's eyes. Bryant's face has been a Sphinx's riddle to our best painters; none have succeeded in rendering its severe simplicity, and clear, self-disciplined expression, until Durand tried it with a success which renders the picture interesting evermore as a tribute of friendship as well as a solution of a difficult problem. The artist's hand was directed by a more than ordinary understanding of the lines it drew; it has not varied in a line from reverence for the verisimilitude the world had a right to insist on; it has not flattered or softened, but is simply, completely, absolutely, true. Bryant's face has an immovable tranquillity, a reserve and impassiveness, which yet are not coldness; the clear gray eye calmly looks through and through you, but permits no intelligence of what is passing behind it to come out to you. It is such a face as one of the old Greek kings might have had, as he sat administering justice. All this, it seems to us, Durand's picture gives. It looks out at you impassive, penetrating, as though it would hear all and tell nothing,—a strong, self-contained, completely balanced character,—unshrinking, unyielding, yet without being unsensitive,—concentrated, justly poised, and intense, without being passionate. The head is admirably engraved, though we do not at all fancy the way in which the background is done; it is heavy, formal, and unartistic,—but this may be matter of choice.

RECENT AMERICAN PUBLICATIONS.

Man and his Dwelling-Place. An Essay towards the Interpretation of Nature. New York. Redfield. 12mo. pp. 391. \$1.00.

Annual of Scientific Discovery; or Year-Book of Facts in Science and Art for 1859, exhibiting the most Important Discoveries and Improvements in Mechanics, etc., etc., etc. Edited by David A. Wells, A. M. Boston. Gould & Lincoln. 12mo. pp. 410. \$1.25.

VOL. III.—JUNE, 1859.—NO. XX.

SHAKSPEARE'S ART.

"Yet must I not give Nature all; thy Art,
My gentle SHAKSPEARE, must enjoy a part.
For though the poet's matter Nature be,
His Art doth give the fashion."—BEN JONSON.

WHOEVER would learn to think naturally, clearly, logically, and to express himself intelligibly and earnestly, let him give his days and nights to WILLIAM SHAKSPEARE. His ear will thus accustom itself to forms of phrase whose only mannerism is occasioned by the fulness of thought and the directness of expression; and he will not easily, through the habits which either his understanding or his ear will acquire, fall into the fluent cadences of that sort of writing in which words are used without discrimination of their nice meanings,—where the sentences are only a smoothly-undulating current of common phrases, in which it takes a page to say weakly what should be said forcibly in a few periods.

These are somewhat novel arguments for the study of one whom all the world has so long revered as "the great poet of Nature." But they may properly serve to introduce a consideration of the sense in which that phrase should be understood,—an attempt, in short, to look into Shakspeare's modes of creation, and define his relations, as an *artist*, with Nature.

We shall perhaps be excused the suggestion, that a poet cannot be natural in the same sense that a fool may be; he cannot be a natural,—since, if he is, he is not a poet. For to be a poet implies the ability to use ideas and forms of speech artistically, as well as to have an eye in a fine frenzy rolling. This is a distinction which all who write on poets or poetry should forever seek to keep clear by new illustrations. The poet has poetic powers that are born with him; but he must also have a power over language, skill in arrangement, a thousand, yes, a myriad, of powers which he was born with only the ability to acquire, and to use after their acquirement. In ranking Shakspeare the great poet of Nature, it is meant that he had the purpose and the power to think what was natural, and to select and follow it,—that, among his thick-coming fancies, he could perceive what was too fine, what tinged with personal vanity, what incongruous, unsuitable, feeble, strained, in short, unnatural, and reject it. His vision was so strong that he saw his characters and identified himself with them, yet

preserving his cool judgment above them, and subjecting all he felt through them to its test, and developing it through this artificial process of writing. This vision and high state of being he could assume and keep up and work out through days and weeks, foreseeing the end from the beginning, retaining himself, and determining long before how many acts his work should be, what should be its plot, what the order of its scenes, what personages he would introduce, and where the main passions of the work should be developed. His fancy, which enabled him to see the stage and all its characters,—almost to *be* them,—was so under the control of his imagination, that it did not, through any interruptions while he was at his labor, beguile him with caprices. The *gradation*, or action of his work, opens and grows under his creative hand; twenty or more characters appear, (in some plays nearly forty, as in “Antony and Cleopatra” and the “First Part of Henry the Sixth,”) who are all distinguished, who are all more or less necessary to the plot or the underplots, and who preserve throughout an identity that is life itself; all this is done, and the imagined state, the great power by which this evolution of characters and scene and story is carried on, is always under the control of the poet's will, and the direction of his taste or critical judgment. He chooses to set his imagination upon a piece of work, he selects his plot, conceives the action, the variety of characters, and all their doings; as he goes on reflecting upon them, his imagination warms, and excites his fancy; he sees and identifies himself with his characters, lives a secondary life in his work, as one may in a dream which he directs and yet believes in; his whole soul becomes more active under this fervor of the imagination, the fancy, and all the powers of suggestion,—yet, still, the presiding judgment remains calm above all, guiding the whole; and above or behind that, the *will* which elects to do all this, perchance for a very simple purpose,—namely, for filthy lucre, the purchase-money of an estate in Stratford.

To say that he “followed Nature” is to mean that he permits his thoughts to flow out in the order in which thoughts naturally come,—that he makes his characters think as we all fancy we should think under the circumstances in which he places them,—that it is the truth of his thoughts which first impresses us. It is in this respect that he is so universal; and it is by his universality that his naturalness is confirmed. Not all his finer strokes of genius, but the general scope and progress of his mind, are within the path all other minds travel; his mind *answers* to all other men's minds, and hence is like the voice of Nature, which, apart from particular associations, addresses all alike. The cataracts, the mountains, the sea, the landscapes, the changes of season and weather have each the same general meaning to all mankind. So it is with Shakspeare, both in the conception and development of his characters, and in the play of his reflections and fancies. All the world recognizes his sanity, and the health and beauty of his genius.

Not all the world, either. Nature's poet fares no better than Nature herself. Half the world is out of the pale of knowledge; a good part of the rest are stunted by cant in its Protean shapes, or by inherited narrowness and prejudice, and innumerable soul-cankers. They neither know nor think of Nature or Poetry. Just as there are hundreds in all great cities who never leave their accustomed streets winter or summer, until finally they lose all curiosity, and cease to feel the yearnings of that love which all are born with for the sight of the land and sea,—the dear face of our common mother. Or the creatures who compose the numerical majority of the world are rather like the children of some noble lady stolen away by gypsies, and taught to steal and cheat and beg, and practised in low arts, till they utterly forget the lawns whereon they once played; and if their mother ever discovers them, their natures are so subdued that they neither recognize her nor wish to go with her.

Without fearing that Shakspeare can ever lose his empire while the language lasts, it is humiliating to be obliged to acknowledge one great cause that is operating to keep him from thousands of our young countrymen and women, namely, the wide-spread *mediocrity* that is created and sustained by the universal diffusion of our so-called cheap literature;—dear enough it will prove by and by!—But this is needlessly digressing.

The very act of writing implies an art not born with the poet. This process of forming letters and words with a pen is not natural, nor will the poetic frenzy inspire us with the art to go through it. In conceiving the language of passion, the *natural* impulse is to imitate the passion in gesture; there is something artificial in sitting quietly at a table and holding, "Mortimer!" through a quill. If Hotspur's language is in the highest degree natural, it is because the poet felt the character, and words suggested themselves to him which he chose and wrote down. The act of choice might have been almost spontaneous with the feeling of the character and the situation, yet it was there,—the conscious judgment was present; and if the poet wrote the first words that came, (as no doubt he usually did,) it was because he was satisfied with them at the time; there was no paroxysm of poetic inspiration,—the workings of his mind were sane. His fertility was such that he was not obliged to pause and compare every expression with all others he could think of as appropriate;—judgment may decide swiftly and without comparison, especially when it is supervising the suggestions of a vivid fancy, and still be judgment, or taste, if we choose to call it by that name. We know by the result whether it was present. The poet rapt into unconsciousness would soon betray himself. Under the power of the imagination, all his faculties waken to a higher life; his fancies are more vivid and clear; all the suggestions that come to him are more apt and congruous; and his faculties of selection, his perceptions of fitness, beauty, and appro-

priateness of relation are more keen and watchful. No lapse in what he writes at such times indicates aught like dreaming or madness, or any condition of mind incompatible with soundness and health,—with that perfect sanity in which all the mental powers move in order and harmony under the control of the rightful sovereign, Reason.

These observations are not intended to bear, except remotely, upon the question, Which is the true Dramatic Art, the romantic or the ancient? We shall not venture into that land of drought, where dry minds forever wander. We can admit both schools. In fact, even the countrymen of Racine have long since admitted both,—speculatively, at least,—though practically their temperament will always confine them to artificial models. We may consider the question as set at rest in these words of M. Guizot:—"Everything which men acknowledge as beautiful in Art owes its effect to certain combinations, of which our reason can always detect the secret when our emotions have attested its power. The science—or the employment of these combinations—constitutes what we call Art. Shakspeare had his own. We must detect it in his works, and examine the means he employs and the results he aims at." Although we should be far from admitting so general a definition of Art as this, yet it is sufficient as an answer to the admirers of the purely classic school.

But it has become necessary in this "spasmodic" day to vindicate our great poet from the supposition of having written in a state of somnambulism,—to show that he was even an *artist*, without reference to schools. The scope of our observations is to exhibit him in that light; we wish to insist that he was a man of forethought,—that, though possessing creative genius, he did not dive recklessly into the sea of his fancy without knowing its depth, and ready to grasp every pebble for a pearl-shell; we wish to show that he was not what has been called, in the cant of a class who mistake lawless-

ness for liberty, an "earnest creature,"—that he was not "fancy's child" in any other sense than as having in his power a beautifully suggestive fancy, and that he "warbled his native wood-notes wild" in no other meaning than as Milton warbled his organ-notes,—namely, through the exercise of conscious Art, of Art that displayed itself not only in the broad outlines of his works, but in their every character and shade of color. With this purpose we have urged that he was "natural" from taste and choice,—artistically natural. To illustrate the point, let us consider his Art alone in a few passages.

We will suppose, preliminarily, however, that we are largely interested in the Globe Theatre, and that, in order to keep it up and continue to draw good houses, we must write a new piece,—that, last salary-day, we fell short, and were obliged to borrow twenty pounds of my Lord Southampton to pay our actors. Something must be done. We look into our old books and endeavor to find a plot out of ancient story, in the same manner that Sir Hugh Evans would hunt for a text for a sermon. At length one occurs that pleases our fancy; we revolve it over and over in our mind, and at last, after some days' thought, elaborate from it the plot of a play,—"*TIMON OF ATHENS*,"—which plot we make a memorandum of, lest we should forget it. Meantime, we are busy at the theatre with rehearsals, changes of performance, bill-printing, and a hundred thousand similar matters that must be each day disposed of. But we keep our newly-thought-of play in mind at odd intervals, good things occur to us as we are walking in the street, and we begin to long to be at it. The opening scenes we have quite clearly in our eye, and we almost know the whole; or it may be, *vice versâ*, that we work out the last scenes first; at all events, we have them hewn out in the rough, so that we work the first with an intention of making them conform to a something which is to succeed; and we are so sure of our course that we have no dread of the something after,—noth-

ing to puzzle the will, or make us think too precisely on the event. Such is the condition of mind in which we finally begin our labor. Some Wednesday afternoon in a holiday-week, when the theatres are closed, we find ourselves sitting at a desk before a sea-coal fire in a quaintly panelled rush-strewn chamber, the pen in our hand, nibbed with a "Rogers's" pen-knife,* and the blank page beneath it.

We desire the reader to close his eyes for a moment and endeavor to fancy himself in the position of William Shakspeare about to write a piece,—the play abovenamed. This may be attempted without presumption. We wish to recall and make real the fact that our idol was a man, subject to the usual circumstances of men living in his time, and to those which affect all men at all times,—that he had the same round of day and night to pass through, the same common household accidents which render "no man a hero to his valet." The world was as real to him as it is to us. The dreamy past, of two hundred and fifty years since, was to him the present of one of the most stirring periods in history, when wonders were born quite as frequently as they are now.

And having persuaded the reader to place himself in Shakspeare's position, we will make one more very slight request, which is, that he will occupy another chair in the same chamber and fancy that he sees the immortal dramatist begin a work,—still keeping himself so far in his position that he can observe the workings of his mind as he writes.

Shakspeare has fixed upon a name for his piece, and he writes it,—he that the players told Ben Jonson "never blotted a line." It is the tragedy,—

TIMON OF ATHENS.

He will have it in five acts, as the best form; and he has fixed upon his *dramatis personæ*, at least the principal of them, for he names them on the margin as he writes. He uses twelve in the first scene,

* "A Sheffield thwitel bare he in his hose."—

CHLAUCER. *The Reve's Tale*.

some of whom he has no occasion for but to bring forward the character of his hero; but they are all individualized while he employs them. The scene he has fixed upon; this is present to his mind's eye; and as he cannot afterwards alter it without making his characters talk incongruously and being compelled to rewrite the whole, he writes it down thus:—

ACT I.

SCENE I.—*A Hall in Timon's House.*

Now he has reflected that his first object is to interest his audience in the action and passion of the piece,—at the very outset, if possible, to catch their fancies and draw them into the mimic life of the play,—to beguile and attract them without their knowing it. He has reflected upon this, we say,—for see how artfully he opens the scene, and how soon the empty stage is peopled with life! He chooses to begin by having two persons enter from opposite wings, whose qualities are known at once to the reader of the play, but not to an audience. The stage-direction informs us:—

[Enter Poet, Painter, Jeweller, Merchant, and others, at several doors.]

We shall see how at the same time they introduce and unfold their own characters and awaken an interest in the main action. In writing, we are obliged to name them. They do not all enter quite at once. At first comes

Poet. Good day, Sir.

Painter. I am glad to see you well.

Poet. I have not seen you long; how goes the world?

Painter. It wears, Sir, as it grows.

This shows them to be acquaintances.—While the next reply is made, in which the Poet begins to talk in character even before the audience know him, two others enter from the same side, as having just met, and others in the background.

Poet. Ay, that's well known:—
But what particular rarity? what strange,
That manifold record not matches? See,

And we fancy him waving his hand in an enthusiastic manner,—

Magic of bounty! all these spirits thy power
Hath conjured to attend.

Which manner is only a high-flowing habit, for he adds in the same breath, dropping his figure suddenly,—

I know the merchant.

Painter. I know them both; t'other's a jeweller.

It is certainly natural that painters should know jewellers,—and, perhaps, that poets should be able to recognize merchants, though the converse might not hold. We now know who the next speakers are, and soon distinguish them.

Merchant. Oh, 'tis a worthy lord!

Jeweller. Nay, that's most fixed.

Merchant. A most incomparable man;
breathed as it were

To an untirable and continue goodness:

He passes.

Jeweller. I have a jewel here.

The Jeweller being known, the Merchant is; and, it will be noticed that the first speaks in a cautious manner.

Merchant. Oh, pray, let's see it! For the lord Timon, Sir?

Jeweller. If he will touch the estimate;
but, for that —

We begin to suspect who is the "magic of bounty" and the "incomparable man," and also to have an idea that all these people have come to his house to see him.—While the Merchant examines the jewel, the first who spoke, the high-flown individual, is pacing and talking to himself near the one he met:—

Poet. When we for recompense have praised
the vile,

*It stains the glory in that happy verse
Which aptly sings the good.*

Perhaps he is thinking of himself. The Merchant and Jeweller do not hear him;—they stand in twos at opposite sides of the stage.

Merchant. 'Tis a good form.

[Looking at the jewel.]

He observes only that the stone is well cut; but the Jeweller adds,—

Jeweller. And rich: here is a water, look you.

While they are interested in this and

move backward, the two others come nearer the front.

Painter. You are rapt, Sir, in some work, some dedication

To the great lord.

This is said, of course, with reference to the other's recent soliloquy. And now we are going to know them.

Poet. A thing slipped idly from me.
Our poesy is as a gun, which oozes
From whence 'tis nourished. The fire i' the
flint

Shows not till it be struck; our gentle flame
Provokes itself, and like the current flies
Each bound it chafes.—What have you there?

We perceive that he is a poet, and a rather rhetorical than sincere one. He has the art, but, as we shall see, not the heart.

Painter. A picture, Sir.—And when comes your book forth?

Poet. Upon the heels of my presentment, Sir.—

Let's see your piece.

Painter. 'Tis a good piece.

We know that the Poet has come to make his presentment. The Painter, the more modest of the two, wishes his work to be admired, but is apprehensive, and would forestall the Poet's judgment. He means, it is a "tolerable" piece.

Poet. So 'tis: this comes off well and excellent.

Painter. Indifferent.

Poet. Admirable. How this grace
Speaks his own standing! What a mental
power

This eye shoots forth! How big imagination
Moves in this lip! To the dumbness of the
gesture

One might interpret.

He, at all events, means to flatter the Painter,—or he is so habituated to ecstasies that he cannot speak without going into one. But with what Shakspearean nicety of discrimination! The "grace that speaks his own standing," the "power of the eye," the "imagination of the lip," are all true; and so is the natural impulse, in one of so fertile a brain as a poet from whom verse "oozes," to "interpret to the dumb gesture,"—to invent

an appropriate speech for the figure (Timon, of course) to be uttering. And all this is but to preoccupy our minds with a conception of the lord Timon!

Painter. It is a pretty mocking of the life.
Here's a touch; is't good?

Poet. I'll say of it
It tutors Nature: artificial strife
Lives in these touches livelier than life.

He has thought of too fine a phrase; but it is in character with all his fancies.

[Enter certain Senators, and pass over.

Painter. How this lord's followed!

Poet. The senators of Athens: happy men!

This informs us who they are that pass over. The Poet also keeps up the Ercles vein; while the Painter's eye is caught.

Painter. Look, more!

Poet. You see this confluence, this great
flood of visitors.

I have, in this rough work, shaped out a man
Whom this beneath world doth embrace and
hug

With amplest entertainment: my free drift
Halts not particularly, but moves itself
In a wide sea of wax: no levelled malice
Infects one comma in the course I hold:
But flies an eagle flight, bold, and forth on,
Leaving no tract behind.

This flight of rhetoric is intended to produce a sort of musical effect, in preparing us by its lofty sound for readily apprehending the lord Timon with "amplest entertainment." The same is true of all that follows. The Poet and Painter do but sound a lordly note of preparation, and move the curtain that is to be lifted before a scene of profusion. Call it by what name we please, it surely was not accident or unconscious inspiration,—a rapture or frenzy,—which led Shakspeare to open this play in this manner. If we remember the old use of choruses, which was to lift up and excite the fancy, we may well believe that he intended this flourishing Poet to act as a chorus,—to be a "mighty whiffler," going before, elevating "the flat unraised spirits" of his auditory, and working on their "imaginary forces." He is a rhetorical character, designed to rouse the attention of the house by the pomp of his language,

and to set their fancies in motion by his broad conceptions. How well he does it! No wonder the Painter is a little confused as he listens to him.

Painter. How shall I understand you?

Poet. I'll unbolt to you.

You see how all conditions, how all minds,
(As well of glib and slippery creatures, as
Of grave and austere quality,) tender down
Their services to Lord Timon; his large fortune,
Upon his good and gracious nature hanging,
Subdues and properties to his love and tendance
All sorts of hearts; yea, from the glass-faced flatterer
To Apemantus, that few things loves better
Than to abhor himself; even he drops down
The knee before him, and returns in peace,
Most rich in Timon's nod.

There was almost a necessity that the spectator should be made acquainted with the character of Timon before his appearance; for his profuseness could be illustrated, after being known, better than it could make itself known in dialogue and action in which he should bear a part. And of the hundreds of English plays opening with an explanation or narrative of foregone matters, there is none where the formality is concealed by a more ingenious artifice than is used in this scene. The spectator is fore-possessed with Timon's character, and (in the outline the Poet is proceeding to give) with a suspicion that he is going to see him ruined in the course of the piece; and this is accomplished in the description of a panegyric, incidentally, briefly, picturesquely, artfully, with an art that tutors Nature, and which so well conceals itself that it can scarcely be perceived except in this our microscopic analysis. Here also we have Apemantus introduced beforehand. And with all this, the Painter and Poet speak minutely and broadly in character; the one sees scenes, the other plans an action (which is just what his own creator had done) and talks in poetic language. It is no more than the text warrants to remark that the next observation, primarily intended

to break the poet's speech, was also intended to be the natural thought and words of a

Painter. I saw them speak together.

Poet. Sir, I have upon a high and pleasant hill

Feigned Fortune to be throned: the base o' the mount

Is ranked with all deserts, all kinds of natures,

That labor on the bosom of this sphere
To propagate their states; amongst them all,
Whose eyes are on this sovereign lady fixed,
One do I personate of Lord Timon's frame,
Whom Fortune with her ivory hand wafts to her;

Whose present grace to present slaves and servants

Translates his rivals.

Painter. 'Tis conceived to scope.

This throne, this Fortune, and this hill, methinks,

With one man beckoned from the rest below,
Bowing his head against the steepy mount
To climb his happiness, would be well expressed

In our condition.

Poet. Nay, Sir, but hear me on.

The artifice is to secure the attention of the spectator. The interruptions give naturalness and force to the narrative; and the questions and entreaties, though addressed to each other by the personages on the stage, have their effect in the front. The same artifice is employed in the most obvious manner where Prospero (*Tempest*, Act i. Sc. 2) narrates his and her previous history to Miranda. The Poet continues:—

All those which were his fellows but of late
(Some better than his value) on the moment
Follow his strides, his lobbies fill with tendance,

Rain sacrificia whisperings in his ear,
Make sacred even his stirrup, and through him

Drink the free air.

Painter. Ay, marry, what of these?

The Poet has half deserted his figure, and is losing himself in a new description, from which the Painter impatiently recalls him. The text is so artificially natural that it will bear the nicest natural construction.

Poet. When Fortune, in her shift and
change of mood,
Spurns down her late beloved, all his depend-
ants,
Which labored after him to the mountain's
top,
Even on their knees and hands, let him slip
down,
Not one accompanying his declining foot.

Painter. 'Tis common:
A thousand moral paintings I can show
That shall demonstrate these quick blows of
Fortune
More pregnantly than words. Yet you do
well
To show Lord Timon that mean eyes have
seen
The foot above the head.

[*Trumpets sound. Enter Timon, attended; the
servant of Ventidius talking with him.*

Thus far (and it is of no consequence if we have once or twice forgotten it while pursuing our analysis) we have fancied ourselves present, seeing Shakspeare write this, and looking into his mind. But although divining his intentions, we have not made him intend any more than his words show that he did intend. Let us presently fancy, that, before introducing his principal character, he here turns back to see if he has brought in everything that is necessary. It would have been easier to plan this scene after the rest of the play had been done,—and, as already remarked, it may have been so written; but when the whole coheres, the artistic purpose is more or less evident in every part; and the order in which each was put upon paper is of as little consequence as the place or time of date or the state of the weather. Wordsworth has been particular enough to let it be known, where he composed the last verse of a poem first. With some artists the writing is a mere copying from memory of what is completely elaborated in the whole or in long passages: Milton wrote thus, through a habit made necessary by his blindness; and so Mozart, whose incessant labors trained his genius in the paths of musical learning, or brought learning to be its slave, till his first conceptions were often beyond the reach of elaboration, and remained so clear in his own mind

that he could venture to perform in public concertos to which he had written only the orchestral or accessory parts. Other artists work *seriatim*; some can work only when the pen is in their hands; and the blotted page speaks eloquently enough of the artistic processes of mind to which their most passionate passages are subjected before they come to the reader's eye. Think of the fac-simile of Byron's handwriting in "Childe Harold"! It shows a soul rapt almost beyond the power of writing. But the blots and erasures were not made by a "fine frenzy"; they speak no less eloquently for an artistic taste and skill excited and alert, and able to guide the frenzy and give it a contagious power through the forms of verse,—this taste and this skill and control being the very elements by which his expressions become an echo of the poet's soul,—pleasing, or, in the uncultivated, helping to form, a like taste in the hearer, and exciting a like imagined condition of feeling and poetic vision.

Yet if it were made a question, to be decided from internal evidence, whether the scene here analyzed was written before or after the rest of the piece, a strong argument for its being written before might be found in the peculiar impression it leaves upon the fancy. Let us suppose we follow the author while he runs it over, which he does quite rapidly, since there are no blotted lines, but only here and there a comma to be inserted. He designed to open his tragedy. He finds he has set a scene,—in his mind's eye the entrance-hall to an Athenian house, which he thinks he has presently intimated plainly enough to be Timon's house. Here he has brought forward four actors and made them speak as just meeting; they come by twos from different ways, and the first two immediately make it known that the other two are a merchant and jeweller, and almost immediately that they themselves are, one a painter, the other a poet. They have all brought gifts or goods for the lord Timon. The Athenian Senators pass over, and, as becomes their dignity, are at once received

in an inner hall,—the first four remaining on the stage. All is so far clear. He has also, by the dialogue of the Painter and Poet, made in itself taking to the attention through the picture and the flighty recitation, suggested and interested us incidentally in the character of Timon, and conveyed a vague misgiving of misfortune to come to him. And there is withal a swelling pomp, three parts rhetorical and one part genuinely poetical, in the Poet's style, which gives a tone, and prepares the fancy to enter readily into the spirit of the tragedy. This effect the author wished to produce; he felt that the piece required it; he was so preoccupied with the Timon he conceived that he sets to work with a Timon-rich hue of fancy and feeling; to this note he pitches himself, and begins his measured march "bold and forth on." What he has assumed to feel he wishes spectators to feel; and he leaves his style to be colored by his feeling, because he knows that such is the way to make them feel it. And we do feel it, and know also that we are made thus to feel through an art which we can perceive and admire. On the whole, this introduction opens upon the tragedy with just such a display of high-sounding phrases, such a fine appropriateness, such a vague presentiment, and such a rapid, yet artful, rising from indifference to interest, that it seems easiest to suppose the author to be writing while his conceptions of what is to follow are freshest and as yet unwrought out. We cannot ask him; even while we have overlooked him in his labor, his form has faded, and we are again in this dull every-day Present.

We have seen him take up his pen and begin a tragedy; or, to drop the fancy, we have made it real to ourselves in what manner Shakspeare's writing evidences that he wrought as an *artist*,—one who has an idea in his mind of an effect he desires to produce, and elaborates it with careful skill, not in a trance or ecstasy, but "in clear dream and solemn vision." The subtle tone of feeling to be struck is as much a matter of art as

the action or argument to be opened. And it is no less proper to judge (as we have done) of the presence of art by its result in this respect than in respect to what relates to the form or story. An introduction is before us, a dramatic scene, in which characters are brought forward and a dialogue is given, apparently concerning a picture and poem that have been made, but having a more important reference to a character yet to be unfolded. Along with this there is also expressed, in the person of a professed panegyrist, a certain lofty and free opinion of his own work, in a confident declamatory style of description,—

"Sir, I have upon a high and pleasant hill
Feigned Fortune to be throned," etc.,—

that is levelled with exquisite tact just on the verge of bombast. This is not done to make the hearer care for the thing described, which is never heard of after, but to give a hint of Timon and what is to befall him, and to create a *melodic effect* upon the hearer's sense which shall put him in a state to yield readily to the illusion of the piece.

It is not possible to conceive Shakspeare reviewing his lines and thinking to himself, "That is well done; my genius has not deserted me; I could not have written anything more to my liking, if I had set about it deliberately!" But it is easy to see him running it over with a sensation of "This will serve; my poet will open their eyes and ears; and now for the hall and banquet scene."

The sense of fitness and relation operates among thoughts and feelings as well as among fancies, and its results cannot be mistaken for accident. Ariel and his harpies could not interrupt a scene with a more discordant action than the phase of feeling or the poetic atmosphere pervading it would be interrupted by, if a cloud of distraction came across the poet and the faculties of his mind rioted out of his control. For he not only feels, but sees his feeling; he takes it up as an object and holds it before him,—a feeling to be conveyed. Just as a sculptor holds in his mind a form and models it out of

clay, undiverted by other forms thronging into his vision, or by the accidental forms that the plastic substance takes upon itself in the course of his work, till it stands forth the image of his ideal,—so the poet works out his states of poetic feeling. He grasps and holds and sustains them amidst the multiplicity of up-flying thoughts and thick-coming fancies;—no matter how subtle or how aspiring they may be, he fastens them in the chamber of his imagination until his distant purpose is accomplished, and he has found a language for them which the world will understand. And this is where Shakspeare's art is so noble,—in that he conquers the entire universe of thought, sentiment, feeling, and passion,—goes into the whole and takes up and portrays characters the most extreme and diverse, passions the most wild, sentiment the most refined, feelings the most delicate,—and does this by an art in which he must make his characters appear real and we looking on, though he cannot use, to develop his dramas, a hundred-thousandth part of the words that would be used in real life,—that is, in Nature. He also always approaches us upon the level of our common sense and experience, and never requires us to yield it,—never breaks in or jars upon our judgment, or shocks or alarms any natural sensibility. After enlarging our souls with the stir of whatever can move us through poetry, he leaves us where he found us, refreshed by new thoughts, new scenes, and new knowledge of ourselves and our kind, more capable, and, if we choose to be so, more wise. His art is so great that we almost forget its presence,—almost forget that the Macbeth and Othello we have seen and heard were Shakspeare's, and that he MADE them; we can scarce conceive how he could feign as if felt, and retain and reproduce such a play of emotions and passions from the position of spectator, his own soul remaining, with its sovereign reason, and all its powers natural and acquired, far, far above all its creations,—a spirit alone before its Maker.

The opening of "Timon" was selected on account of its artful preparation for and relation to what it precedes. It shows the forethought and skill of its author in the construction or opening out of his play, both in respect to the story and the feeling; yet even here, in this half-declamatory prologue, the poet's dramatic art is also evident. His poet and painter are living men, and not mere utterers of so many words. Was this from intuition?—or because he found it easy to make them what he conceived them, and felt that it would add to the life of his introduction, though he should scarcely bring them forward afterwards? No doubt the mind's eye helps the mind in character-drawing, and that appropriate language springs almost uncalled to the pen, especially of a practised writer for the stage. But is his scene a dream which he can direct, and which, though he knows it all proceeds from himself, yet seems to keep just in advance of him,—his fancy shooting ahead and astonishing him with novelties in dialogue and situation? There are those who have experienced this condition in sickness, and who have amused themselves with listening to a fancied conversation having reference to subjects of their own choosing, yet in which they did not seem to themselves to control the cause of the dialogue or originate the particular things said, until they could actually hear the voices rising from an indistinct whisper to plain speech. I knew an instance, (which at least is not related in the very curious work of M. Boismont on the "Natural History of Hallucinations,") where an invalid, recovering from illness, could hear for half a night the debates and doings of an imaginary association in the next chamber, the absurdity of which often made him laugh so that he could with difficulty keep quiet enough to listen; while occasionally extracts would be read from books written in a style whose precision and eloquence excited his admiration, or whose affecting solemnity moved him deeply, though he knew perfectly well that the whole came

from his own brain. This he could either cause or permit, and could in an instant change the subject of the conversation or command it into silence. He would sometimes throw his pillow against the wall and say, "Be still! I'll hear no more till daybreak!" And this has taken place when he was in calm health in mind, and, except weakness, in body, and broad awake. What was singular, the voices would cease at his bidding, and in one instance (which might have startled him, had he not known how common it is for persons to wake at an hour they fix) they awoke him at the time appointed. Their language would bear the ordinary tests of sanity, and was like that we see in daily newspapers; but the various knowledge brought in, the complicated scenes gone through, made the whole resemble intricate concerted music, from the imperfect study of which possibly came the power to fabricate them. That they were owing to some physical cause was shown by their keeping a sort of cadence with the pulse, and in the fact, that, though not disagreeable, they were wearisome; especially as they always appeared to be got up with some remote reference to the private faults and virtues of that tedious individual who is always forcing his acquaintance upon us, avoid him however we may,—one's self.

Shall we suppose that Shakspeare wrote in such an *opium dream* as this? Did his "wood-notes wild" come from him as tunes do from a barrel-organ, where it is necessary only to set the machine and disturb the bowels of it by turning? Was it sufficient for him to fore-plan the plots of his plays, the story, acts, scenes, persons,—the general rough idea, or argument,—and then to sit at his table, and, by some process analogous to mesmeric manipulations, put himself into a condition in which his *genius* should elaborate and shape what he, by the aid of his poetic taste and all other faculties, had been able to rough-hew? How far did his consciousness desert him?—only partially, as in the instance just given, so that he marvelled,

while he wrote, at his own fertility, power, and truth?—or wholly, as in a Pythonic inspiration, so that the frenzy filled him to his fingers' ends, and he wrote, he knew not what, until he re-read it in his ordinary state? In fine, was he the mere conduit of a divinity within him?—or was he in his very self, in the nobility and true greatness of his being and the infinitude of his faculties, a living fountain,—he, he alone, in as plain and common a sense as we mean when we say "a man," the divinity?

These are "questions not to be asked," or, at least, argued, any more than the question, Whether the blessed sun of heaven shall eat blackberries. The quality of Shakspeare's writing renders it impossible to suppose that it was produced in any other state than one where all the perceptions that make good sense, and not only good, but most excellent sense, were present and alert. Howsoever "apprehensive, quick, forgetive, full of nimble, fiery, and delectable shapes" his brain may be, it never gambols from the superintendence of his reason and understanding. In truth, it is the perfectness of the control, the conscious assurance of soundness in himself, which leaves him so free that the control is to so many eyes invisible; they perceive nothing but luxuriant ease in the midst of intricate complexities of passion and character, and they think he could have followed the path he took only by a sort of necessity which they call Nature,—that he wrote himself quite into his works, bodily, just as he was, every thought that came and went, and every expression that flew to his pen,—leaving out only a few for shortness. They are so thoroughly beguiled by the very quality they do not see, that they are like spectators who mistake the scene on the stage for reality; they cannot fancy that a man put it all there, and that it is by the artistic and poetic power of him, this man, who is now standing behind or at the wing, and counting the money in the house, that they are beguiled of their tears or thrown into such ecstasies of mirth.

It exalts, and not degrades, the memory of Shakspeare to think of him in this manner, as a man: for he *was* a man; he had eyes, hands, organs, dimensions, and so forth, the same that a Jew hath; a good many people saw him alive. Had we lived in London between 1580 and 1610, we might have seen him,—a man who came from his Maker's hand endowed with the noblest powers and the most godlike reason,—who had the greatest natural ability to become a great dramatic poet,—the native genius and the aptness to acquire the art, and who did acquire the highest art of his age, and went on far beyond it, exhibiting new ingenuities and resources, and a breadth that has never been equalled, and which admits at once and harmonizes the deepest tragedy and the broadest farce, and, in language, the loftiest flights of measured rhetoric along with the closest imitation of common talk;—and all this he *so used*, so elaborated through it the poetic creations of his mind, in such glorious union and perfection of high purpose and art and reach of soul, that he was the greatest and most universal poet the world has known.

Rowe observes, in regard to Shakspeare,—“Art had so little and Nature so large a share in what he did, that, for aught I know, the performances of his youth, as they were the most vigorous, and had the most fire and strength of imagination in them, were the best. I would not be thought by this to mean that his fancy was so loose and extravagant as to be independent on the rule and government of judgment; but that what he thought was commonly so great, so justly and rightly conceived in itself, that it wanted little or no correction, and was immediately approved by an impartial judgment at the first sight.”

The last sentence is true; but Mr. Rowe really means to say that he was as great an artist as natural poet,—that his *creative* and *executive* powers wrought in almost perfect spontaneity and harmony,—the work of the *making* part of him being generally at once approved by the

shaping part, and each and both being admirable. When a man creates an Othello, feigns his story and his passion, assumes to be him and to observe him at the same time, figures him so exactly that all the world may realize him also, brings in Desdemona and Iago and the rest, everything kept in propriety and with the minutest perfection of detail, which does most, Art or Nature? How shall we distinguish? Where does one leave off and the other begin? The truth of the passion, that is Nature; but can we not perceive that the Art goes along with it? Do we not at once acknowledge the Art when we say, “How natural!”? In such as Iago, for example, it would seem as if the least reflective spectator must derive a little critical satisfaction,—if he can only bring himself to fancy that Iago is not alive, but that the great master painted him and wrote every word he utters. As we read his words, can we not see how boldly he is drawn, and how highly colored? There he is, right in the foreground, prominent, strong, a most miraculous villain. Did Nature put the words into his mouth, or Art? The question involves a consideration of how far natural it is for men to make Iagos, and to make them speaking naturally. Though it be natural, it is not common; and if its naturalness is what must be most insisted on, it may be conceded, and we may say, with Polixenes, “The Art itself is Nature.”

There is a strong rapture that always attends the full exercise of our highest faculties. The whole spirit is raised and quickened into a secondary life. This was felt by Shakspeare,—felt, and at the same time controlled and guided with the same strictness over all thoughts, feelings, passions, fancies, that thronged his mind at such moments, as he had over those in his dull every-day hours. When we are writing, how difficult it is to avoid pleasing our own vanity! how hard not to step aside a little, now and then, for a brilliant thought or a poetic fancy, or any of the thousand illusions that throng upon us! Even for the sake of a well-

sounding phrase we are often tempted to turn. The language of passion,—how hard it is to feign to write it! how harder than all, to keep the tone, serious, or whatever it may be, with which we begin, so that no expressions occur to break it,—lapses of thought or speech, that are like sudden stumbles or uneasy jolts! And if this is so in ordinarily elevated prose, how much more must it be so in high dramatic poetry, where the poet rides on the whirlwind and tempest of passion and “directs the storm.” There must go to the conception and execution of this sort of work a resolved mind, strong fancies, thoughts high and deep, in fine, a multitude of powers, all under the grand creative, sustaining imagination. When completed, the work stands forth to all time, a great work of Art, and bulwark of all that is high against all that is low. It is a great poetic work, the work of a maker who gives form and direction to the minds of men.

In a certain sense, it is not an extravagance to say that all who are now living and speak English have views of life and Nature modified by the influence of Shakspeare. We see the world through his eyes; he has taught us how to think; the freedom of soul, the strong sense, the grasp of thought,—above all, the honor, the faith, the love,—who has imparted such noble ideas of these things as he? Not any one, though there were giants in those days as well as he. Hence he has grown to seem even more “natural” than he did in his own day, his judges being mediately or immediately educated by him. The works are admired, but the nobleness of soul in him that made them is not perceived, and his genius and power are degraded into a blind faculty by unthinking minds, and by vain ones that flatter themselves they have discovered the royal road to poetry. What they seem to require for poetry is the flash of thought or fancy that starts the sympathetic thrill,—the little jets,—the striking, often-quoted lines or “gems.” The rest is merely introduced to build

up a piece; these are the “pure Nature,” and all that.

And it is not to be denied that they *are* pure Nature; for they are true to Nature, and are spontaneous, beautiful, exquisite, deserving to be called gems, and even diamonds.

“The sweet South,
That breathes upon a bank of violets,
Stealing and giving odor”:—

thousands of such lines we keep in our memories’ choicest cells; yet they are but the exterior adornments of a great work of Art. They are the delightful finishes and lesser beauties which the great work admits, and, indeed, is never without, but which are not to be classed among its essentials. Their beauty and fitness are not those of the grand columns of the temple; they are the sculptures upon the frieze, the caryatides, or the graceful interlacings of vines. They catch the fancy of those whose field of vision is not large enough to take in the whole, and upon whom all excellences that are not little are lost. Beautiful in themselves, their own beauty is frequently all that is seen; the beauty of their propriety, the grace and charm with which they come in, are overlooked. Many people will have it that nothing is poetry or poetic but these gems of poetry; and because the apparent spontaneousness of them is what makes them so striking, these admirers are unwilling to see that it is through an art that they are brought in so beautifully in their spontaneousness and give such finish to larger effects. And we have no end of writers who are forever trying to imitate them, forgetting that the essence of their beauty is in their coming unsought and in their proper places as unexpected felicities and fine touches growing out of and contributing to some higher purpose. They are natural in this way:—when the poet is engaged upon his work, these delicate fancies and choice expressions throng into his mind; he instantly, by his Art-sense, accepts some, and rejects more; and those he accepts are such as he wants for his ulterior purpose, which will not admit the

appearance of art; hence he will have none that do not grow out of his feeling and harmonize with it. All this passes in an instant, and the apt simile or the happy epithet is created,—an immortal beauty, both in itself and as it occurs in its place. It was put there by an art; the poet knew that the way to make expressions come is to assume the feeling; he knew that he

“But in a fiction, in a dream of passion,

Could force his soul so to his own conceit”

that his whole function would suit with expressions to his conceit. He then withdrew his judgment from within, and cheated his fancy into supposing he had given her the rein, letting the feigned state be as real to him as it could, and writing from that primarily,—humoring Nature by his art in leaving her to do what she alone could do. So that the very gems we admire as natural are the offspring of Nature creating under Art. To make streaked gillyflowers, we marry a gentler scion to the wildest stock, and Nature does the rest. So in poetry, we cannot get at the finest excellences by seeking for them directly, but we put Nature in the way to suggest them. We do not strive to think whether “the mobled queen” is good; we do not let our vanity keep such a strict look-out upon Nature; she will not desert us, if we follow her modes,—which we must do with all the art and fine tact we can acquire and command, not only in order to gain the minute beauties, but to compass the great whole.

The analogies that might be drawn from music would much assist in making all this clear, if they could be used with a chance of being understood. But, unfortunately, the ability to comprehend a great work, as a whole, is even rarer in music than in poetry. The little taking bits of melody are all that is thought of or perceived; the great *epos* or rhapsody, the form and meaning of the entire composition,—which is a work of Art in no other sense than a poem is one, except that it uses, instead of speech, musical forms, of greater variety and symmetry,

—are not at all understood. Nor is the subtle and irresistible coherence in successions of clear sunny melody, in which Mozart so abounds, in any great degree understood, even by some who call themselves artists. They think only of the sudden flashes, the happinesses, and, if such a word may be used once only, the smartnesses,—like children who care for nothing in their cake but the frosting and the plums. But in continuing the study of the art with such notions of its expression, the relish for it soon cloy, the mind ceases to advance, the enthusiasm deadens, progress becomes hopeless, and the little gained is soon lost; whereas, if the student is familiarized with the most perfect forms of the art, and led on by them, both by committing a few of them to memory, and by fully understanding their structure, it will soon be evident that an intellectual study of music, pursued with a true love of it, can, more than any other study, strengthen the imaginative faculty.

The forms of poetry have only the rhythmic analogy, as forms, to those of music; but in their foundation in the same Nature, and in their manner of development, there is a closer resemblance. Both in music and poetry, the older artists regarded with most strictness the carrying through of the whole; they cared little for the taking tunes or the striking passages; they looked with eyes single to their ultimate purposes. Shakspeare came, and accomplished at once, for dramatic art, what the fathers of modern music began for their art nearly a century later. He made the strict form yield to and take new shape from natural feeling. This feeling, whose expression is the musical element of poetry, he brought up to its proper relation with all the other qualities. Look at the terrific bombast which preceded him,—the mighty efforts of mighty men to draw music or the power of sound into their art; Hieronymo is like some portentous convulsion of Nature,—the upheaval of a new geological era. The writers felt that there must be style suited to passion, and that they must attain it,—but how? By arti-

ficial pomp?—or by yielding with artful reserve to the natural eloquence of passion?

Shakspeare has answered the question for all time; and he uses both, each in its proper place. Nothing, even in music, ever showed an art growing out of a nicer sensibility in sound than his variety and appropriateness in style. For an art it is, and we cannot make a definition of that word which shall include other forms of art and not include it. If the passion and the feeling make the style, it is the poet's art that leaves them free to do it; he superintends; he feigns that which he leaves to make; he shares his art with "great creating Nature." All is unreal; all comes out of him; and all that has to do with the form and expression of his products is, of course, included in the manifest when his ship of fancy gets its clearance at the custom-house of his judgment. The style he assumes cannot but be present to his consciousness in the progress of a long drama. He must perceive, as he writes, if he has the common penetration of humanity, that the flow and cadence of his "Henry the Eighth" are not like those of his "Midsummer Night's Dream"; and he must preserve his tone, with, at times, direct art, not leaving everything to the feeling. That he does so is as evident as if he had chosen a form of verse more remote from the language of Nature and obliged himself to conform to its requirements. The terrible cursing of Margaret in "Richard III.," for example, is not the remorseless, hollow monotony of it, while it so

heightens the passion, as evident to Shakspeare as to us; or had he no ear for verse, and just let his words sound on as they would, looking only at the meaning, and counting his iambs on his fingers,—not too carefully either? If the last supposition is to be insisted on, we must confine our notions of his perceptions and powers within very ordinary bounds, and make dramatic art as unpoetic as the art of brickmaking.

The beauty of Shakspeare's art is in its comprehensiveness. It takes in every quality of excellence. It looks at the great whole, and admits the little charms and graces. It includes constructiveness in story, character-drawing, picturesqueness, musicalness, naturalness,—in fine, whatever art may combine with poetry or the soul of poetry admit in art. To the young and unobservant, and all who are unable to consider the poet's writing, as we have in this article endeavored to study—a single passage of it, *from his position*, the art is not apparent; the mimic scene is reality, or some supernatural inspiration or schoolboy-like enthusiasm has produced the work. But there are others, created with different faculties, who begin to perceive the art almost as soon as they feel its power, and who love to study it and to live in the spirit of poetry that breathes through it; these come gradually to think of the man, as well as of his works,—to feel more and more the influence upon them of his greatness and beauty of soul, and, as years pass by, to find consolation and repose in the loftiness of his wisdom.

MIEN-YAUN.

I.

YOUNG Mien-yaun had for two years been the shining centre of the aristocratic circles of Peking. Around him revolved

the social system. He was the vitalizing element in fashionable life,—the radiant sun, diffusing conventional warmth of tone and brilliancy of polish. He created modes. He regulated reputations.

His smile or his frown determined the worldly fate of thousands. His ready assurance gave him preëminence with one sex, and his beauty made him the admiration of the other. When he talked, Mandarins listened; when he walked, maidens' eyes glistened. He was, in short, the rage,—and he knew it, and meant to remain so. He was a wonderful student, and understood politics like a second Confucius. With the literature of all ages, from the Shee-king, written four thousand years ago, down to the latest achievements of the modern poets, he was intimately acquainted. His accomplishments were rich and varied, and his Tartar descent endowed him with a spirit and animation that enabled him to exhibit them to every advantage. He sang like a veritable Orpheus, and sensitive women had been known to faint under the excitement of his Moo-lee-wha, or national song. He even danced,—a most rare faculty in Peking, as in all China,—but this was frowned upon, as immoral, by his family. Comely indeed he was, especially on state occasions, when he appeared in all the radiance of rosy health, overflowing spirits, and the richest crapes and satins,—decorated with the high order of the peacock's feather, the red button, and numberless glittering ornaments of ivory and lapis-lazuli. Beloved or envied by all the men, and with all the women dying for him, he was fully able to appreciate the comforts of existence. Considering the homage universally accorded him, he was as little of a dandy as could reasonably be expected.

His family connections were very exalted. All his relatives belonged to the Tse,—the learned and governing class. His father had been one of the Too-tche-yuen, a censor of the highest board, and was still a member of the council of ministerial Mandarins. His uncle was a personal noble, a prince, higher in rank than the best of the Mandarins, and directed the deliberations of the Ping-pu, the Council of War. Thus his station gave him access to all the best society.

His career was a path of roses. He never knew a sorrow. All were friendly to him, even the jealous, because it was the fashion. The doors of the mighty opened at his approach, and the smiles of the noble greeted him. He lived in an atmosphere of adulation, and yet resisted the more intoxicating influences of his dangerous elevation. Young as he was, he had penetrated the social surface, and, marking its many uncertainties, had laid out for himself a system of diplomacy which he believed best calculated to fortify him in his agreeable position of master of modes and dictator of fashionable public opinion.

The course he adopted was thoroughly effective. His sway was never disputed for a moment. He knew his personal charms, and determined to enhance their value by displaying them sparingly. Accordingly, he began by refusing forty-nine out of every fifty public invitations,—his former habit having been to refuse but one in five. He appeared on the promenade only twice in three weeks, but on these occasions he always artfully contrived to throw the community into the wildest excitement. One day, he appeared arrayed from head to foot in yellow Nankin, a color always considered a special abomination in Peking, but which was nevertheless instantly adopted by all the gallants about town,—a proceeding which caused so much scandal that an imperial edict had to be issued, forbidding the practice in future. Another time, he came out with an unparalleled twist to his tail, the construction of which had occupied his mind for some days, and which occasioned the death by suicide of three over-ambitious youths who found themselves unable to survive the mortification of an unsuccessful attempt to imitate it. Again, to the infinite horror of the Mandarins, he paraded himself one afternoon with decapitated finger-nails, and came very near producing a riot by his unwillingness to permit them to grow again, besides calling forth another imperial decree, threatening ignominious death to all nobles throughout

the empire who should encourage the practice. All these eccentricities served only to add to the consequence of the multipotent Mien-yaun. Then again, he was gifted with a bewitching smile; but he steadily refrained from making any use of it oftener than once a month, at which times the enthusiasm of his adherents knew no bounds, and it might have been supposed that all Peking had administered unto itself a mild preparation of laughing-gas, so universal were the grimaces. On very rare and distinguished occasions, Mien-yaun permitted himself to be persuaded to sing; but as ladies sometimes swooned under his melodious influence, the natural goodness of his heart prevented him from frequent indulgence in the exercise of this accomplishment.

It may naturally be supposed that the popular and fascinating young Chinese nobleman was the devoted object of much matrimonial speculation. Managing mammas and aspiring daughters gave the whole of their minds to him. To look forward to the possible hope of sharing through life his fortunes and his fame was the continual employment of many a high-born damsel. And they the more readily and unreservedly indulged these fancies, as nothing in the laws of China could prevent Mien-yaun from taking as many wives as he chose, provided he could support them all, and supply all their natural wants. But our hero knew his value. He was fully conscious that a member of the Tse, a son of an ex-censor of the highest board, a nephew of a personal noble and the Secretary of War, and, above all, the brightest ornament of aristocratic society, was by no means the sort of person to throw himself lightly away upon any woman or any set of women. He preferred to wait.

His family had high hopes of him. He was largely gifted with filial piety, which is everything in China. Politics, religion, literature, government, all rest upon the broad principle of filial piety. Being very filially pious, of course Mien-yaun

was eminent in all these varied accomplishments. Consequently his family had a right to have high hopes of him. The great statesman, Kei-ying,—who has very recently terminated a life of devoted patriotism and heroic virtues by a sublime death on the scaffold,—undertook his instruction in Chinese politics. One lesson completed his education. "Lie, cheat, steal, and honor your parents," were the elementary principles which Kei-ying inculcated. The readiness with which Mien-yaun mastered them inspired his tutor with a lively confidence in the young man's future greatness. He was pronounced a rising character. His popularity increased. His name was in everybody's mouth. He shunned society more sedulously than ever, and assumed new and loftier airs. He was seized with fits of ambition, each of which lasted a day, and then gave place to some new aspiration. First, he would be a poet; but, after a few hours' labor, he declared the exertion of hunting up rhymes too great an exertion. Next, he would be a moral philosopher, and commenced a work, to be completed in sixty volumes, on the Whole Duty of Chinamen; but he never got beyond the elementary principles he had imbibed from Kei-ying. Again, he would become a great painter; but, having in an unguarded moment permitted the claims of perspective to be recognized, he was discouraged from this attempt by a deputation of the first artists of the empire, who waited upon him, and with great respect laid before him the appalling effects that would inevitably follow any public recognition of perspective in painting. Finally, he renounced all ambition but that of ruling his fellow-creatures with a rod more tyrannical than that of political authority, and more respected than the sceptre of government itself.

II.

SATIATED with success, Mien-yaun at length became weary of the ceaseless round of flattering triumphs, and began

to lament that no higher step on the social staircase remained for him to achieve. Alas that discontent should so soon follow the realization of our brightest hopes! What, in this world, is enough? More than we have! Mien-yaun felt all the pangs of anxious aspiration, without knowing how to alleviate them. He was only conscious of a deep desolation, for which none of the elementary principles he had learned from Kei-ying afforded the slightest consolation. He now avoided publicity from inclination, rather than from any systematic plan of action. He dressed mostly in blue, a sufficient sign of a perturbed spirit. He discarded the peacock's feather, as an idle vanity, and always came forth among the world arrayed in ultramarine gowns and cerulean petticoats. His stockings, especially, were of the deepest, darkest, and most beautiful blue. The world of fashion saw, and was amazed; but in less than a week all Pekin had the blues. Annoyed at what a few months before he would have delighted in as another convincing proof of his influential position, Mien-yaun fled the city, and sought relief in a cruise up and down the Peiho, in his private junk. As he neared the Gulf of Pe-tchee, the sea-breeze brought calm to his troubled spirit and imparted renewed vigor to his wearied mind. A degree of resolution, to which he had heretofore been a stranger, possessed him. His courage returned. He would go back to Pekin. He would renounce those vain pursuits in which he had passed his unworthy life. Henceforth he would strive for nobler aims. Something great and wonderful he certainly would accomplish,—the exact nature of which, however, he did not pause to consider.

As he reëntered the city, he was obliged to pass through that quarter which is inhabited by the Kung,—the working and manufacturing classes. His attention was suddenly arrested by feminine cries of distress; and, turning a corner, he came upon a domestic scene so common in China that it would hardly have

attracted his notice but for a peculiar circumstance. A matron, well advanced in years, was violently beating a young and beautiful girl with a bit of bamboo; and the peculiar circumstance that enforced Mien-yaun's interest was, that, as the maiden turned her fair face towards him, she smiled through her tears and telegraphed him a fragrant kiss, by means of her fair fingers. Naturally astounded, he paused, and gazed upon the pair. The younger female was the loveliest maid he had ever looked upon. She had the smallest eyes in the world, the most tempting, large, full, pouting lips, the blackest and most abundant hair, exquisitely plaited, and feet no bigger than her little finger. As these are the four characteristics of female beauty dearest to a Chinaman's heart, it is no wonder that Mien-yaun thought her a paragon. The old woman, on the contrary, was hideously ugly. Her teeth were gone, and her eyes sought the comforting assistance of an ill-fitting pair of crystal spectacles. She had no hair, and her feet might have supported an elephant. As he rested his eyes wistfully upon them, the young woman discharged a second rapturous salute. His heart beat with singular turbulence, and he approached.

"What has the child done?" he asked.

Now the law of China is, that parents shall not be restrained from beating and abusing their children as often and as soundly as is convenient. The great principle of filial piety knows no reciprocity. Should a child occasionally be killed, the payment of a small fine will satisfy the accommodating spirit of the authorities. The ill-favored mother was not, therefore, in any way bound to answer this somewhat abrupt question; but, observing the appearance of high gentility, and touched by the engaging manner of the interrogator, she answered, that her appetite had of late been uncertain, and that she was endeavoring to restore it by a little wholesome exercise.

So reasonable an explanation admitted

of no reply ; and Mien-yaun was about to resume his way with a sigh, when the young lady insinuated a third osculatory hint, more penetrating than either of the others, and bestowed on him, besides, a most ravishing smile. He fluttered internally, but succeeded in preserving his outward immobility. He entered into conversation with the elderly female, observing that it was a fine day, and that it promised to continue so, although destiny was impenetrable, and clouds might overshadow the radiant face of Nature at any unexpected moment. To these and other equally profound and original remarks the old woman graciously assented, and finally invited the young gentleman to partake of a cup of *seau-tcheou*. Now *seau-tcheou*, which is the most ardent of Chinese spirits, was Mien-yaun's abomination ; but he concealed his disgust, and quietly observed that he should prefer a cup of tea.

The old woman was delighted, and ran off to prepare the desired refreshment, so that Mien-yaun was at length rewarded by the opportunity of a few private words with the daughter.

"Tell me, Miss," said he,—"why did the sweetest of lips perform their most delicate office when the brightest of eyes first turned upon me ?"

The young lady, confused and blushing, answered, that the brilliancy of the jewel which Mien-yaun wore in his hat had dazzled her vision, and that she mistook him for an intimate friend of her youth,—that was all.

He knew this was a lie ; but as lying was in exact accordance with the elementary principles laid down by the learned Kei-ying, he was rather pleased by it. Moreover, it was a very pretty lie, worthy of so pretty a girl ; and Mien-yaun, whose wits were fast leaving him, removed the jewel from his hat, and begged the maiden to accept it. She, declaring that she never could think of such a thing, deposited it in her bosom. Evidently the twain were on the brink of love ; a gentle push only was needed to submerge them.

Mien-yaun speedily learned that his fair friend's name was Ching-ki-pin ; that she was the daughter of a wealthy manufacturer, named Tching-whang, who owned extensive porcelain-factories at the North, and was besides a considerable tobacco-planter ; that her father was very kind to her, but that the old woman, who was not her own mother, treated her very cruelly ; that her father married this ancient virago for her wealth, and now repented the rash step, but found it impossible to retrace it, as the law of China allows no divorces excepting when the wife has parents living to receive and shelter her ; and the obnoxious woman being nearly a hundred years old herself, this was out of the question. When he had learned so much, they were interrupted by the re-appearance of the Antique, who brought with her the cup of tea, most carefully prepared. In deep abstraction, Mien-yaun seized it, and, instead of drinking the boiling beverage, poured it upon the old woman's back, scalding her to such a degree that her shrieks resounded through the neighborhood. Then dropping the cup upon the ground, he put his heel into it, and, with a burning glance of love at Ching-ki-pin, strode, melancholy, away.

III.

ALL that night, Mien-yaun's heart was troubled. The tranquillizing finger of Sleep never touched his eyelids. At earliest dawn he arose, and devoted some hours to the consideration of his costume. Never before had he murmured at his wardrobe ; now everything seemed unworthy of the magnitude of the occasion. Finally, after many doubts and inward struggles, and much bewilderment and desperation, the thing was done. He issued forth in a blaze of splendor, preceded by two servants bearing rare and costly presents. His raiment was a masterpiece of artistic effect. He wore furs from Russia, and cotton from Bombay ; his breast sparkled with various orders of

nobility; his slippers glistened with gems; his hat was surmounted with the waving feather of the peacock. Turning neither to the right nor to the left, he made his way to the residence of Tching-whang. At the portal he paused, and sent in before him his card,—a sheet of bright red paper,—with a list of the presents he designed to offer the family whose acquaintance he desired to cultivate.

As he had expected, his reception was most cordial. Though his person was unknown, the magic of his name was not unfelt, even in the regions of the Kung. A prince of the peacock's feather was no common visitor to the home of a plebeian manufacturer; and when that prince was found to be in addition the leader of the fashions and the idol of the aristocracy, the marvel assumed a miraculous character. The guest was ushered in with many low obeisances. How the too gay Ching-ki-pin regretted those unlucky telegraphic kisses! What would he think of her? She, too, had passed a most unquiet night, but had been able to relieve her feelings to some extent at the sewing-circle, which had met at her home, and at which she poured into the eager ears of her young companions rapturous accounts of the beauty, elegance, dignity, and tenderness of the enchanting stranger, and displayed before their dazzled eyes the lustrous jewel he had presented to her. Having excited a great deal of envy and jealousy, she was able to rest more in peace than would otherwise have been possible. But she had never dreamed of the real rank of her admirer. It came upon her like a lightning-flash, and almost reduced her to a condition of temporary distraction. As for the mother-in-law, she would infallibly have gone off into hysterics, but for the pain in her back, which the barbers—who are also the physicians in China—had not been able to allay. But the sight of a peacock's feather under her roof was better than balm to her tortured spine. Tching-whang lost his presence of mind altogether, and violated the common decencies of life by receiving his

visitor with his hat off, and taking the proffered presents with one hand,—the other being occupied in pulling his ear, to assure himself he was not dreaming.

Mien-yaun spoke. His voice fell like soft music on the ears of his hosts, and went straight to the innermost core of Ching-ki-pin's heart. He had come, he said, to give utterance to his deep grief at the mishap of yesterday, the recollection of which had harrowed his soul. The thought of that venerable blistered back had taken away his repose, and seriously interfered with his appetite. At the same time he could not forget his own great loss, occasioned by the unlucky spilling of the precious cup. He was sure that Madam, in the kindness of her heart, would overlook his fault, and consent to bestow on him another cheering, but not inebriating draught.

The Antique was overcome by so much condescension. She could not say a word. Tching-whang, too, remained paralyzed. But the beauteous Ching-ki-pin, who had recovered her composure, answered with the sweetest air imaginable, and succeeded in winding another amorous chain around the already sufficiently-enslaved heart of her lover.

Presently the ice of constraint was broken, and the Antique, having once put her foot in it, plunged off into conversation with remarkable vigor. She entertained Mien-yaun with a detailed account of her family trials, so interminable, that, with all his politeness, the young noble could not avoid gaping desperately. Tching-whang, observing his visitor's strait, interposed.

"What the women have lost in their feet, they have added to their tongues," said he, quoting a Chinese proverb of great popularity.

As the Antique persisted, her husband gently reminded her that excessive talkativeness is an allowed ground for divorce in China, and, by suggesting the idea that she might possibly become the dismembered fragment of a shattered union, at length succeeded in shaming her into silence.

This Tching-whang was a fine old fellow. He was not a bit fashionable, and Mien-yaun liked him the better for it. He had been educated by the bamboo, and not by masters in the arts of courtesy. But he was a shrewd, cunning, jolly old Chinaman, and was evidently perfectly familiar with the elementary principles according to Kei-ying. After an animated discussion of some ten minutes, it would have been difficult to determine which of the two gentlemen was most deeply imbued with a sense of the righteousness of the elementary principles.

After a proper time had elapsed, Mien-yaun was permitted the luxury of a private chat with his charmer. What sighs, what smiles, what pleasing tremors, what soft murmurings, what pressings of the hand and throbings of the heart were there! The Antique, who watched the course of proceedings through a contiguous keyhole, subsequently declared that she had never in all her life witnessed so affecting a spectacle, and she was prevented from giving way to her excessive agitation only by the thought that the interruption might seriously endanger her daughter-in-law's prospects. The lovers, unconscious of scrutiny, made great progress. Some doubt appeared at one time to exist as to which had first experienced the budding passion which had now blossomed so profusely; but in due time it was settled that both had suffered love at precisely the same moment, and that the first gleam of the other's eye had kindled the flame in the bosom of each.

Towards evening, the Antique came in with a cup of tea worthy to excite a poet's inspiration,—and poets in China have sung the delights of tea, and written odes to teacups, too, before now. Mien-yaun sipped it with an air of high-breeding that neither Ching-ki-pin nor her respectable mother-in-law had ever seen before. Soon after, the enamored couple parted, with many fond protestations of faith, avowed and betrothed lovers.

Mien-yaun went home in an amatory

ecstasy, and immediately exploded four bunches of crackers and blazed a Bengal light, as a slight token of his infinite happiness.

IV.

ALL Pekin was in an uproar. That is to say, the three thousand eminent individuals who composed the aristocracy had nearly lost their wits. The million and a half of common people were, of course, of no account. Mien-yaun had given out that he was about to be married; but to whom, or to how many, remained a mystery. No further intelligence passed his lips. Consequently, in less than twenty-four hours there were four hundred and fifty persons who knew the lady's name, as many more who had conversed with her upon the subject, twice as many who knew the day on which the ceremony was to take place, at least one thousand who had been invited to assist, and an infinitely greater number who simply shook their heads. In two days the names of some hundreds of young and comely damsels were popularly accepted as the chosen future partner of the glass of fashion and the mould of form. Fifty different days and hours were fixed as the appointed time. All the most noted bonzes in Pekin were in turn declared to be the fortunate sacred instrument by which the union was to be effected. In the course of a week, public feeling reached such a height that business was neglected and property declined in value. A panic was feared. Mien-yaun shut himself up, and did not stir abroad for a month, lest he should be tracked, and his secret discovered. He contrived, however, to maintain a constant correspondence with the light of his soul.

He was a little disturbed to find that his much revered father, the ex-censor of the highest board, took no notice of what was going on, and never alluded to the subject in any manner. Mien-yaun was too deeply impressed with a sense of filial obligation to intrude his humble affairs upon the old gentleman's

distinguished notice; so he let matters take their course, and said nothing.

V.

THE New Year drew nigh,—season of unrestrained pleasure, festival-time of the nation. 'Twas the custom of the aristocratic denizens of Pekin to celebrate the New Year in a very peculiar manner,—a manner which the most eccentric people in the world alone could have devised. The women were all constrained to stay at home and prepare feasts of every delicacy and variety for the men, who were accustomed to rise from their beds at an early hour in the morning, and start incontinently upon a distracted course of visiting, which occupied them until nearly midnight. To remain more than thirty seconds in one house was the grossest breach of decorum, and to make less than one hundred calls during the day was a sign of utter disregard for the regulations of society. Moreover, at each call, it was considered an imperative duty to devour a morsel of food and to swallow a hasty cup of sam-shu. In consequence of these habits, the men who went out empty in the morning found themselves before evening stuffed more tremendously than were the early French missionaries who undertook to write veracious accounts of Chinese morals and manners; and those few who possessed any wits at the start contrived to scatter them broadcast in a very few hours. One hundred or more cups of sam-shu, drunk at regular intervals throughout the day, had the inevitable effect of reducing everybody to a common level of intoxication, from which it was considered impolite to recover in less than two days; so that the New Year's sports were, in fact, consecrated to Bacchus, or the corresponding Chinese deity, and the Feast of Lanterns, by which name this annual merry-making is usually designated, was nothing more than a universal national frolic. Some distinguished ethnologists, indeed, have discovered a singular coincidence in the

fact, that the immense lanterns used by the Chinese in these orgies are made entirely of horn, and insist that the proverbial phrase of *taking a horn* had its origin in this custom, the prelude, as it always is, of measureless sam-shu. A paper on this subject has been prepared by a certain learned doctor, who steadily refuses to make it public until the meeting of the next Scientific Congress, lest, as he says, the envious and unscrupulous professors of a neighboring college should avail themselves of his ideas, as they have before done, and cheat him out of a well-deserved immortality.

Mien-yaun's refined tastes revolted at this degrading manner of commemorating the birth of the New Year. He resolved to put his great popularity and influence to the test, and use his best endeavors to turn aside his countrymen from their foolish ways. Ah, more foolish Mien-yaun! you may uproot a nation's prejudices, soften its passions, upset its politics,—anything but make it sensible of its follies. That you can never do. For a time, perhaps, your counsels may prevail; but the returning tide will sweep alike your influence and yourself away. But Mien-yaun's hopes were high. He had never suffered a reverse, and he never doubted his ability to accomplish all that he might undertake.

Three days before the Feast of Lanterns, when all Pekin was laying in great stores of eatables and drinkables, and speculating largely on the prospective delights of unlimited sam-shu and soup, Mien-yaun issued invitations for his wedding. Ten secretaries had been employed the whole of the previous night in transcribing the notes on delicate red paper tinged with gold. Upwards of a thousand guests were expected; for who, that could be present, would fail to witness so important an event as the nuptials of the reigning prince of fashion? The ceremony was to take place in the magnificent gardens attached to the residence of Mien-yaun's father, where many a festival had before been held. But this was to outshine them all in splendor.

There were lanterns without number, and of the largest size; there were the richest and most luxurious couches disposed about for the general comfort; there were consultations of cooks, headed by a professor from Ning-po, a city famed throughout China for its culinary perfection, with a view to producing an unrivalled gastronomic sensation; there were tailors who tortured their inventive brains to realize the ideal raiment which Mien-yaun desired to appear in. The panic ceased as suddenly as it had arisen. A little while ago, and there was a surplus of supply and no demand; now, the demand far exceeded the supply. Artists in apparel were driven frantic. In three days the entire fashionable world of Peking had to be new clad, and well clad, for the great occasion. One tailor, in despair at his inability to execute more than the tenth of his commissions, went and drowned himself in the Peiho River, a proceeding which did not at all diminish the public distress. The loss of the tailor was nothing, to be sure, but his death was a fatal blow to the hopes of at least a hundred of the first families. As for the women, they were beside themselves, and knew not which way to turn. It was evident that nothing had occurred within a half-century to create anything like the excitement that existed. Mien-yaun's prospects of eternal potency never seemed so cheering.

All this time, our hero's father, the censor of the highest board, preserved a profound silence.

VI.

THE three days passed so rapidly, that even Mien-yaun's anxiety, great as it was, could hardly keep pace with the swift hours. The morning of the New Year came. For the first time in his life, the dictator of fashion lost his mind. His head whirled like a tee-to-tum, and his pulses beat sharp and irregular as the detonations of a bundle of crackers. He was obliged to resign himself to fate and his valet, and felt compelled to have

recourse to many cups of tea to calm his fevered senses. At length it became necessary for him to descend to the gardens. Nerving himself by a powerful effort, he advanced among his guests.

What a gorgeous array of rank and beauty was there! The customary calls of the New Year had been forgotten. Curiosity had alike infected all, and the traditionary commemoration of two thousand years was for the first time neglected. Why this tremor at our hero's heart? Was he not lord of all that he surveyed? Reigned he not yet with undisputed sway? Or was it that an undefined presentiment of dire misfortune had settled upon him? He strove to banish his melancholy, but with slight success.

His troubled air did not escape the scrutinizing eyes of the company. The women whispered; the men shook their heads. But all greeted him with enthusiasm, and asked after his bride with eagerness.

A crash of gongs was heard. The gates of a pavilion flew open, and the beauteous Ching-ki-pin stepped forth, glowing with loveliness and hope. As she stood an instant timidly on the portal, she seemed almost a divinity,—at least, Mien-yaun thought so. Her sweet face was surmounted by a heavy coronet of black hair, plaited to perfection, and glistening with gum. Her little eyes beamed lovingly on her betrothed, and a flush of expectancy overspread her countenance. Her costume was in the best Chinese taste. An embroidered tunic of silk fell from her neck almost to her ankles, and just temptingly revealed the spangled trousers and the richly jewelled slippers. A murmur of admiration diffused itself around. Then followed many anxious inquiries. Who was she? Whence came she? To whom belonged she? Her face was strange to all that high-born throng. In a minute, however, her father appeared, bearing on his arm the Antique, who looked more hideous than ever. A flash of intelligence quivered through the multitude. Many of the nobility purchased their porcelain and

tobacco of Tching-whang, and recognized him immediately. It is astonishing how like lightning unpleasant facts do fly. In less than two minutes, every soul in the gardens knew that Mien-yaun, the noble, the princely, the loftily-descended, the genteel, was going to marry a tradesman's daughter.

Now that the great secret was out, everybody had thought so. Some had been sure of it. Others had told you so. It was the most natural thing in the world. Where there was so much mystery, there must, of necessity, be some peculiar reason for it. A great many had always thought him a little crazy. In fact, the whole tide of public sentiment instantly turned. Mien-yaun, without knowing it, was dethroned. Upstarts, who that morning had trembled at his frown, and had very properly deemed themselves unworthy to braid his tail, now swept by him with swaggering insolence, as if to compensate in their new-found freedom for the years of social enslavement they had been subjected to. Leers and shrugs and spiteful whispers circulated extensively. But the enraptured Mien-yaun, blind to everything except his own overwhelming happiness, saw and heard them not.

Little time was afforded for these private expressions of amiable feeling. The grand repast was declared ready, and the importance of this announcement overweighed, for a short period, the claims of scandal and ill-nature. The company quickly found their way to the tables, which, as the "Pekin Gazette" of the next morning said, in describing the *fête*, "literally groaned beneath the weight of the delicacies with which they were loaded." The consultations of the Ning-po cook and his confederates had produced great results. The guests seated themselves, and delicately tasted the slices of goose and shell-fish, and the pickled berries, and prawns, and preserves, which always compose the prefatory course of a Chinese dinner of high degree. Then porcelain plates and spoons of the finest quality, and ivory chopsticks tipped with

pearl, were distributed about, and the birds'-nest soup was brought on. After a sufficient indulgence in this luxury, came sea-slugs, and shark stews, and crab salad, all served with rich and gelatinous sauces, and cooked to a charm. Ducks' tongues and deers' tendons, from Tartary, succeeded, with stewed fruits and mucilaginous gravy. Every known and some unknown luxuries were lavishly provided. The Ning-po cook had invented a new dish expressly for the occasion,—"Baked ice à la Ching-ki-pin,"—which was highly esteemed. The ice was enveloped in a crust of fine pastry, and introduced into the oven; the paste being baked before the ice—thus protected from the heat—had melted, the astonished visitors had the satisfaction of biting through a burning crust, and instantly cooling their palates with the grateful contents. The Chinese never cook except on substantial principles; and it was the principle of contrast which regulated this sublime *chef-d'œuvre* of the Ning-po artist.

Of course, the rarest beverages were not wanting. A good dinner without good wine is nought. Useless each without the other. Those whose fancy rested upon medicated *liqueurs* found them in every variety. Those who placed a higher value upon plain light wines had no reason to complain of the supply set before them. Those whose unconquerable instinct impelled them to the more invigorating sam-shu had only to make known their natural desires. As the feast progressed, and the spirits of the company rose, the charms of music were added to the delights of appetite. A band of sing-song girls gently beat their tom-toms, and carolled in soft and soothing strains. As they finished, a general desire to hear Mien-yaun was expressed. Willing, indeed, he was, and, after seven protestations that he could not think upon it, each fainter than the other, he suffered himself to be prevailed over, and, casting a fond look upon his betrothed, he rose, and sang the following verses from the Shee-king,—a collection of odes four

thousand years old, and, consequently, of indisputable beauty :—

"The peach-tree, how graceful! how fair!
How blooming, how pleasant its leaves!
Such is a bride when she enters to share
The home of her bridegroom, and every care
Her family from her receives." *

VII.

THE festivities were at their height, the sam-shu was spreading its benign influences over the guests, the deep delight of satiated appetite possessed their bosoms, when the entrance of a stern and fat old gentleman arrested universal attention. It was the respected father of Mien-yaun, the ex-censor of the highest board, and Councillor of the Empire. The company rose to greet him; but he, with gracious suavity, begged them not to discompose themselves. Approaching that part of the table occupied by the bridal party, he laid his hand upon his heart, and assured Tching-whang that he was unable to express the joy he felt at seeing him and his family.

Mien-yaun's father was a perfect master of the elementary principles.

Turning then to his son, he pleasantly requested him to excuse himself to the assemblage, and follow him for a few minutes to a private apartment.

As soon as they were alone, the adipose ex-censor of the highest board said :—
"My son, have you thought of wedding this maiden?"

"Nothing shall divert me from that purpose, O my father," confidently answered Mien-yaun.

"Nothing but my displeasure," said

* The following is Sir William Jones's less literal and more poetic paraphrase of the same selection :—

"Gay child of Spring, the garden's queen,
Yon peach-tree charms the roving sight:
Its fragrant leaves how richly green!
Its blossoms how divinely bright!

"So softly smiles the blooming bride
By love and conscious virtue led
O'er her new mansion to preside,
And placid joys around her spread."

the ex-censor of the highest board. "You will not marry her."

Mien-yaun was thunderstruck. When he had said that nothing should awe him from the career of his humor, he had never contemplated the appalling contingency of the interposition of paternal authority. He wept, he prayed, he raved, he gnashed his teeth, he tore out as much of his hair as was consistent with appearances. He went through all the various manifestations of despair, but without producing the slightest effect upon the inexorable ex-censor of the highest board. That, worthy official briefly explained his objections to a union between his son, the pride and joy of the Tse, and a daughter of one of the Kung, and then, taking the grief-stricken lover by the hand, he led him back to the gardens.

"Good friends," said he, "my son has just conveyed to me his lively appreciation of the folly he was about to commit. He renounces all connection with the black-haired daughter of the Kung, whom he now wishes a very good evening."

And the ex-censor of the highest board gravely and gracefully bowed the family of Tching-whang out of the premises. The moment they crossed the threshold, Mien-yaun and Ching-ki-pin went into a simultaneous fit.

VIII.

MIEN-YAUN now abandoned himself to grief. He laid away the peacock's feather on a lofty shelf, and took to cotton breeches. Mien-yaun in cotton breeches! What stronger confirmation could be needed of his utter desolation? As he kept himself strictly secluded, he knew nothing of the storm of ridicule that was sweeping his once illustrious name disgracefully through the city. He knew not that a popular but unscrupulous novelist had caught up the sad story and wrought it into three thrilling volumes,—nor that an enterprising dramatist had constructed a closely-written play in five acts, founded on the event, and called "The Judgment of Taoli, or Vanity

Rebuked," which had been prepared, rehearsed, and put upon the stage by the second night after the occurrence. He would gladly have abdicated the throne of fashion; he cared nothing for that;—but it was well that he was spared the humiliation of seeing his Ching-ki-pin's name held up to public scorn; that would have destroyed the feeble remains of intellect which yet inhabited his bewildered brain.

Occasionally he would address the most piteous entreaties to his cruel parent, but always unavailingly. He had not the spirit to show resentment, even if the elementary principles would have permitted it. The reaction of his life had come. This first great sorrow had completely overwhelmed him, and, like most young persons in the agony of a primal disappointment, he believed that the world had now no charms for him, and that in future his existence would be little better than a long sad bore. He looked back upon his career of gaudy magnificence without regret, and felt like a *blasé* butterfly, who would gladly return to the sober obscurity of the chrysalis. He found that wealth and station, though they might command the admiration of the world, could not insure him happiness; and he thought how readily he would resign all the gifts and glories which Fortune had showered on him for the joyous hope, could he dare to indulge it, of a cottage on the banks of the Grand Canal, with his darling Ching-ki-pin at his side.

Thus passed away some months. At last, one day, he ventured forth, in hope of meeting some former friend, in whose confiding ear he might whisper his many sorrows. He had not proceeded twenty paces before a group of young gallants, who in earlier days had been the humblest of his satellites, brushed rudely by him, without acknowledging his courteous salutation. Thinking that anguish might have changed his features beyond recognition, he walked on, and soon met one with whom his intimacy had been unlimited. He paused, and accosted him.

The other stared coldly upon him, said he had a faint remembrance of Mien-yaun, but Mien-yaun was *passé* now, since that affair with old Tching-whang's daughter, and he must really be excused from entering into conversation with any one so excessively behind the fashionable times.

Mien-yaun seized the offender by the tail, whirled him violently to the ground, and strode haughtily back to his home, whence he could not be persuaded to stir, until after the occurrence of a very remarkable event.

IX.

WHEN Mien-yaun had pined nearly half away, and was considering within himself whether it was expedient to commence upon the other half, word was brought to him, one day, that his father, whom he had not seen for some weeks, had met with an accident. Further inquiry revealed the fact, that the worthy ex-censor of the highest board had so far forgotten himself as to sneeze in the presence of the Emperor; and as nothing in the elementary principles could be found to justify so gross a breach of etiquette, the ex-censor's head had been struck off by the public executioner, and his property, which was immense, had been confiscated to the state. Some of Mien-yaun's friends, who had sedulously shunned him for six months, lost no time in hastening to him with the agreeable intelligence that he was an orphan and a pauper. After kicking them out of doors, he sat down and pondered upon the matter.

On the whole, he saw no great cause for grief. The Chinese law, which is strict in the enforcement of all duties of a son to a living parent, does not compel excessive lamentation for the dead. Mien-yaun could not but perceive that the only obstacle to his union with Ching-ki-pin was now removed. The sudden flood of joy which this thought gave rise to came very near upsetting him again, and he had to resort to an opium-pipe to quiet his nerves. He attended per-

sonally to the ceremonies of interring the decollated deceased, and then shut himself up for a week, to settle his mind.

At the expiration of this time, he started out, one early morning, alone and in humble garb, to seek his lost love. He threaded the familiar streets, and, with heart beating high in delightful expectation, he stood before the door of Tching-whang's mansion. He entered, and found the Antique alone.

Then followed a woful scene. The Antique began by informing him that Mien-yaun rich and famous, and Mien-yaun poor and in disgrace, were two very different persons. She went on to show that things were not now as they used to be,—that, though her daughter-in-law had permitted his addresses when he was in prosperity, she could not think of listening to them under the present circumstances. *Pei* was one thing, and *pin* was another. She concluded by recommending him, as he seemed in distress, to take a dose of gin-seng and go to bed, after which she opened the door, and gently eliminated him.

X.

DEEPER than ever plummet sounded was Mien-yaun's wretchedness now. Desperation took possession of him. Nothing prevented him from severing his carotid artery but the recollection that only the vulgar thus disposed of themselves. He thought of poison, whose sale was present death in Pekin, according to established law. Suicide by poison being a forbidden luxury, it recommended itself nimbly unto Mien-yaun's senses. He did remember an apothecary whose poverty, if not his will, would consent to let him have a dram of poison. He was about acting on this inspiration, when a message was brought to him from Tching-whang, that, at his daughter's most earnest prayer, one solitary interview would be permitted the lovers.

Like an arrow, Mien-yaun flew to the arms of Ching-ki-pin. She was, then, true to him. She told him so; she swore

it. Hope revived. He thought no longer of the apothecary. Since Ching-ki-pin was faithful, he asked no higher bliss.

A hundred plans were discussed, and all declared ineffectual to accomplish their union. Still they suggested impracticabilities.

"Let us run away," said Mien-yaun.

"Think of my feet," said Ching-ki-pin, reproachfully;—"am I a Hong-Kong woman, that I should run?"

It is only in Hong-Kong that the Chinese women permit their feet to grow.

Mien-yaun was full of heroic resolutions. Hitherto, besides being born great, he had had greatness thrust upon him. Now he would achieve greatness. He would secure not only wealth, but also a more enduring fame than he had before enjoyed. He saw many avenues to eminence opening before him. He would establish a periodical devoted to pictorial civilization. If civilization did not bring it success, he would illustrate great crimes and deadly horrors, in the highest style of Art, and thus command the attention of the world. Or he would establish a rival theatre. Two playhouses already existed in Pekin, each controlled by men of high integrity, great tact, and undenied claims to public support. He would overturn all that. He would start without capital, sink immense sums, pay nobody, ruin his company, and retire in triumph. Or he would become a successful politician, which was easier than all, for nothing was needed in this career but strong lungs and a cyclopædia. Many other methods of achieving renown did he rehearse, all of which seemed feasible.

Ching-ki-pin, too, thought she might do something to acquire wealth. She painted beautifully, with no sign of perspective to mar her artistic productions. She warbled like a nightingale. She understood botany better than the great Chin-nong, who discovered in one day no less than seventy poisonous plants, and their seventy antidotes. Could she not give lessons to select classes of young ladies in all these several accomplishments? She was dying to do something

to help defeat the machinations of their evil Quei-shin, the mother-in-law.

Finally, without coming to any particular conclusion, and after interchanging eternal vows, they parted much comforted, and looking forward to a brighter future.

XL

MIEN-YAUN went to his home,—no longer the splendid mansion of his early days, but a poor cottage, in an obscure quarter of the city. As he threw himself upon a bench, a sharp bright thought flashed across his mind. His brain expanded with a sudden poetic ecstasy. He seized upon a fresh white sheet, and quickly covered it with the mute symbols of his fancy. Another sheet, and yet another. Faster than his hand could record them, the burning thoughts crowded upon him. No hesitation now, as in his former efforts to effect his rhymes. Experience had taught him how to think, and much suffering had filled his bosom with emotions that longed to be expressed. Still he wrote on. Towards midnight he kicked off his shoes, and wrote on, throwing the pages over his shoulder as fast as they were finished. Morning dawned, and found him still at his task. He continued writing with desperate haste until noon, and then flung away his last sheet; his poem was done.

He rose, and moistened his lips with a cup of fragrant Hyson, which, according to the great Kian-lung, who was both a poet and an emperor, and therefore undoubted authority on all subjects, drives away all the five causes of disquietude which come to trouble us. Then he walked up and down his narrow apartment many times, carefully avoiding the piles of eloquence that lay scattered around. Then he sat down, and, gathering up the disordered pages, resigned himself to the dire necessity—that curse of authorship—of revising and correcting his verses. By nightfall, this, too, was completed.

In the morning, he ran to the nearest

publisher. His poem was enthusiastically accepted. In a week, it was issued anonymously, although the author's name was universally known the same day.

As Mien-yaun himself was afterwards accustomed to say,—after six months of ignominious obscurity, he awoke one morning and found himself famous!

In two days the first edition was exhausted, and a second, with illustrations, was called for. In two more, it became necessary to issue a third, with a biography of the author, in which it was shown that Mien-yaun was the worst-abused individual in the world, and that Pekin had forever dishonored itself by ill-treating the greatest genius that city had ever produced. In the fourth edition, which speedily followed, the poet's portrait appeared.

It was soon found that Mien-yaun's poem was a versified narration of his own experiences. There was the romantic youth, the beautiful maiden, the obdurate papa, the villanous mother-in-law, and the shabby public. This discovery augmented its popularity, and ten editions were disposed of in a month.

At length the Emperor was induced to read it. He underwent a new sensation, and, in the exuberance of his delight, summoned the author to a grand feast. When the Antique heard of this, she swallowed her chopsticks in a fit of rage and spite, and died of suffocation. Mien-yaun was then satisfied. He went to the dinner. The noble and the mighty again lavished their attentions upon him, but he turned from them with disgust. He saw through the flimsy tissue of flattery they would fain cast over his eyes. The most appetizing delicacies were set before him, but, like a true poet, he refused to take anything but biscuits and soda-water. As neither of these articles had been provided, he consented to regale himself with a single duck's tongue. In short, he behaved so singularly, and gave himself so many airs, that everybody present, from the Emperor to the cook, was ready to bow down and worship him.

At the close of the repast, the Emperor begged to be informed in what way he could be permitted to testify his appreciation of the towering talents of his gifted subject.

"Son of Heaven," answered Mien-yaun, "grant me only the hand in marriage of my beauteous Ching-ki-pin. No other ambition have I."

The Emperor was provoked at the modesty of the demand. In truth, he would have been glad to see the young poet united to one of his own daughters. But his imperial word was pledged, — and as Mien-yaun willed it, so it was.

XII.

THEIR home is a little cottage on the bank of the Peiho; finery never enters it, and neatness never leaves it. The singing of birds, the rustling of the

breeze, the murmuring of the waters are the only sounds that they hear. Their window will shut, and their door open,—but to wise men only; the wicked shun it. Truth dwells in their hearts, innocence guides their actions. Glory has no more charms for them than wealth, and all the pleasures of the world cost them not a single wish. The enjoyment of ease and solitude is their chief concern. Leisure surrounds them, and discord shuns them. They contemplate the heavens and are fortified. They look on the earth and are comforted. They remain in the world without being of it. One day leads on another, and one year is followed by another; the last will conduct them safe to their eternal rest, and they will have lived for one another.*

* The concluding lines are from a modern Chinese poem.

JOY-MONTH.

OH, HARK to the brown thrush! hear how he sings!

How he pours the dear pain of his gladness!

What a gush! and from out what golden springs!

What a rage of how sweet madness!

And golden the buttercup blooms by the way,

A song of the joyous ground;

While the melody rained from yonder spray

Is a blossom in fields of sound.

How glisten the eyes of the happy leaves!

How whispers each blade, "I am blest!"

Rosy heaven his lips to flowered earth gives,

With the costliest bliss of his breast.

Pour, pour of the wine of thy heart, O Nature,

By cups of field and of sky,

By the brimming soul of every creature! —

Joy-mad, dear Mother, am I!

Tongues, tongues for my joy, for my joy! more tongues! —

Oh, thanks to the thrush on the tree,

To the sky, and to all earth's blooms and songs!

They utter the heart in me.

A TRIP TO CUBA.

[Continued.]

THE HARBOR OF HAVANA.

As we have said, there were some official mysteries connected with the arrival of our steamer in Nassau; but these did not compare with the visitations experienced in Havana. As soon as we had dropped anchor, a swarm of dark creatures came on board, with gloomy brows, mulish noses, and suspicious eyes. This application of Spanish flies proves irritating to the good-natured captain, and uncomfortable to all of us. All possible documents are produced for their satisfaction,—bill of lading, bill of health, and so on. Still they persevere in tormenting the whole ship's crew, and regard us, when we pass, with all the hatred of race in their rayless eyes. "Is it a crime," we are disposed to ask, "to have a fair Saxon skin, blue eyes, and red blood?" Truly, one would seem to think so; and the first glance at this historical race makes clear to us the Inquisition, the Conquest of Granada, and the ancient butcheries of Alva and Pizarro.

As Havana is an unco uncertain place for accommodations, we do not go on shore, the first night, but, standing close beside the bulwarks, feel a benevolent pleasure in seeing our late companions swallowed and carried off like tidbits by the voracious boatmen below, who squabble first for them and then with them, and so gradually disappear in the darkness. On board the "Karnak" harmony reigns serene. The custom-house wretches are gone, and we are, on the whole, glad we did not murder them. Our little party enjoys tea and bread-and-butter together for the last time. After so many mutual experiences of good and evil, the catguts about our tough old hearts are loosened, and discourse the pleasant music of Friendship. An hour later, I creep up to the higher deck, to have a look-out

forward, where the sailors are playing leap-frog and dancing fore-and-afters. I have a genuine love of such common sights, and am quite absorbed by the good fun before me, when a solemn voice sounds at my left, and, looking round, I perceive Can Grande, who has come up to explain to me the philosophy of the sailor's dances, and to unfold his theory of amusements, as far as the narrow area of one little brain (mine, not his) will permit. His monologue, and its interruptions, ran very much as follows:—

I.—This is a pleasant sight, isn't it?

Can Grande.—It has a certain interest, as exhibiting the inborn ideal tendency of the human race;—no tribe of people so wretched, so poor, or so infamous as to dispense with amusement, in some form or other.

Voice from below.—Play up, Cook! That's but a slow jig ye're fluting away at.

Can Grande.—I went once to the Five Points of New York, with a police-officer and two philanthropists;—our object was to investigate that lowest phase of social existence.—

Bang, whang, go the wrestlers below, with loud shouts and laughter. I give them one eye and ear,—Can Grande has me by the other.

Can Grande.—I went into one of their miserable dance-saloons. I saw there the vilest of men and the vilest of women, meeting with the worst intentions; but even for this they had the fiddle, music and dancing. Without this little crowning of something higher, their degradation would have been intolerable to themselves and to each other.—

Here the man who gave the back in leap-frog suddenly went down in the middle of the leap, bringing with him the other, who, rolling on the deck, caught the traitor by the hair, and pommelled

him to his heart's content. I ventured to laugh, and exclaim, "Did you see that?"

Can Grande.—Yes; that is very common.—At that dance of death, every wretched woman had such poor adornment as her circumstances allowed,—a collar, a tawdry ribbon, a glaring false jewel, her very rags disposed with the greater decency of the finer sex,—a little effort at beauty, a sense of it. The good God puts it there;—He does not allow the poorest, the lowest of his human children the thoughtless indifference of brutes.—

And there was the beautiful tropical sky above, starry, soft, and velvet-deep, —the placid waters all around, and at my side the man who is to speak no more in public, but whose words in private have still the old thrill, the old power to shake the heart and bring the good thoughts uppermost. I put my hand in his, and we descended the companion-way together and left the foolish sailors to their play.

But now, on the after-deck, the captain, much entreated, and in no wise unwilling, takes down his violin, and with pleasant touch gives us the dear old airs, "Home, Sweet Home," "Annie Laurie," and so on, and we accompany him with voices toned down by the quiet of the scene around. He plays, too, with a musing look, the merry tune to which his little daughter dances, in the English dancing-school, hundreds of leagues away. Good-night, at last, and make the most of it. Coolness and quiet on the water to-night, and heat and mosquitoes, howling of dogs and chattering of negroes to-morrow night, in Havana.

The next morning allowed us to accomplish our transit to the desired land of Havana. We pass the custom-house, where an official in a cage, with eyes of most oily sweetness, and tongue, no doubt, to match, pockets our gold, and imparts in return a governmental permission to inhabit the Island of Cuba for the space of one calendar month. We go trailing through the market, where we buy peel-

ed oranges, and through the streets, where we eat them, seen and recognized afar as Yankees by our hats, bonnets, and other features. We stop at the *Café Dominica*, and refresh with coffee and buttered rolls, for we have still a drive of three miles to accomplish before breakfast. All the hotels in Havana are full, and more than full. Woolcut, of the Cerro, three miles from the gates, is the only landlord who will take us in; so he seizes us fairly by the neck, bundles us into an omnibus, swears that his hotel is but two miles distant, smiles archly when we find the two miles long, brings us where he wants to have us, the Spaniards in the omnibus puffing and staring at the ladies all the way. Finally, we arrive at his hotel, glad to be somewhere, but hot, tired, hungry, and not in raptures with our first experience of tropical life.

It must be confessed that our long-tried energies fall somewhat flat on the quiet of Woolcut's. We look round, and behold one long room with marble floor, with two large doors, not windows, opening in front upon the piazza and the street, and other openings into a large court behind, surrounded by small, dark bedrooms. The large room is furnished with two dilapidated cane sofas, a few chairs, a small table, and three or four indifferent prints, which we have ample time to study. For company, we see a stray New York or Philadelphia family, a superannuated Mexican who smiles and bows to everybody, and some dozen of those undistinguishable individuals whom we class together as Yankees, and who, taking the map from Maine to Georgia, might as well come from one place as another, the Southerner being as like the Northerner as a dried pea is to a green pea. The ladies begin to hang their heads, and question a little:—"What are we to do here? and where is the perfectly delightful Havana you told us of?" Answer:—"There is nothing whatever to do here, at this hour of the day, but to undress and go to sleep;—the heat will not let you stir, the glare will not let you

write or read. Go to bed ; dinner is at four ; and after that, we will make an effort to find the Havana of the poetical and Gan Eden people, praying Heaven it may not have its only existence in their brains."

Still, the pretty ones do not brighten ; they walk up and down, eyeing askance the quiet boarders who look so contented over their children and worsted-work, and wondering in what part of the world they have taken the precaution to leave their souls. Unpacking is then begun, with rather a flinging of the things about, interspersed with little peppery hints as to discomfort and dulness, and dejected stage-sighs, intended for hearing. But this cannot go on,—the thermometer is at 78° in the shade,—an intense and contagious stillness reigns through the house,—some good genius waves a bunch of poppies near those little fretful faces, for which a frown is rather heavy artillery. The balmy breath of sleep blows off the lightly-traced furrows, and, after a dreamy hour or two, all is bright, smooth, and freshly dressed, as a husband could wish it. The dinner proves not intolerable, and after it we sit on the piazza. A refreshing breeze springs up, and presently the tide of the afternoon drive sets in from the city. The *volantes* dash by, with silver-studded harnesses, and postilions black and booted ; within sit the pretty *Señoritas*, in twos and threes. They are attired mostly in muslins, with bare necks and arms ; bonnets they know not,—their heads are dressed with flowers, or with jewelled pins. Their faces are whitened, we know, with powder, but in the distance the effect is pleasing. Their dark eyes are vigilant ; they know a lover when they see him. But there is no twilight in these parts, and the curtain of the dark falls upon the scene as suddenly as the screen of the theatre upon the *dénouement* of the tragedy. Then comes a cup of truly infernal tea, the mastication of a stale roll, with butter, also stale,—then, more sitting on the piazza,—then, retirement, and a wild hunt after mosquitoes,—and

so ends the first day at Woolcut's, on the Cerro.

HAVANA. THE HOTELS.

"SHALL I not take mine ease in mine inn ?" Yes, truly, if you can get it, Jack Falstaff ; but it is one thing to pay for comfort, and another thing to have it. You certainly pay for it, in Havana ; for the \$3 or \$3.50 *per diem*, which is your simplest hotel-charge there, should, in any civilized part of the world, give you a creditable apartment, clean linen, and all reasonable diet. What it does give, the travelling public may like to learn.

Can Grande has left Woolcut's. The first dinner did not please him,—the cup of tea, with only bread, exasperated,—and the second breakfast, greasy, peppery, and incongruous, finished his disgust ; so he asked for his bill, packed his trunk, called the hotel detestable, and went.

Now he was right enough in this ; the house is detestable ;—but as all houses of entertainment throughout the country are about equally so, it is scarcely fair to complain of one. I shall not fear to be more inclusive in my statement, and to affirm that in no part of the world does one get so little comfort for so much money as on the Island of Cuba. To wit : an early cup of black coffee, oftenest very bad ; bread not to be had without an extra sputtering of Spanish, and darkening of the countenance ;—to wit, a breakfast between nine and ten, invariably consisting of fish, rice, beefsteak, fried plantains, salt cod with tomatoes, stewed tripe and onions, indifferent claret, and an after-cup of coffee or green tea ;—to wit, a dinner at three or four, of which the inventory varieth not,—to wit, a plate of soup, roast beef, tough turkeys and chickens, tolerable ham, nameless stews, cajota, plantains, salad, sweet potatoes ; and for dessert, a spoonful each of West India preserve,—invariably the kind you do not like,—oranges, bananas, and another cup of coffee ;—to wit, tea of the sort already described ;—to wit, attend-

ance and non-attendance of negro and half-breed waiters, who mostly speak no English, and neither know nor care what you want;—to wit, a room whose windows, reaching from floor to ceiling, inclose no glass, and are defended from the public by iron rails, and from the outer air, at desire, by clumsy wooden shutters, which are closed only when it rains;—to wit, a bed with a mosquito-netting;—to wit, a towel and a pint of water, for all ablutions. This is the sum of your comforts as to quantity; but as to their quality, experience alone can enlighten you.

Taking pity on my exile at the Cerro, Can Grande and his party invite me to come and spend a day at their hotel, of higher reputation, and situated in the centre of things. I go;—the breakfast, to my surprise, is just like Woolcut's; the dinner *idem*, but rather harder to get; preserves for tea, and two towels daily, instead of one, seem to constitute the chief advantages of this establishment. Domestic linens, too, are fairer than elsewhere; but when you have got your ideas of cleanliness down to the Cuban standard, a shade or two either way makes no material difference.

Can Grande comes and goes; for stay in the hotel, behind those prison-gratings, he cannot. He goes to the market and comes back, goes to the Jesuit College and comes back, goes to the banker's and gets money. In his encounters with the sun he is like a prize-fighter coming up to time. Every round finds him weaker and weaker, still his pluck is first-rate, and he goes at it again. It is not until three, P. M., that he wrings out his dripping pocket-handkerchief, slouches his hat over his brows, and gives in as dead-beat.

They of the lovely sex, meanwhile, undergo, with what patience they may, an Oriental imprisonment. In the public street they must on no account set foot. The Creole and Spanish women are born and bred to this, and the hardest American or English woman will scarcely venture out a second time without the severe escort of husband or brother.

These relatives are, accordingly, in great demand. In the thrifty North, man is considered an incumbrance from breakfast to dinner,—and the sooner he is fed and got out of the way in the morning, the better the work of the household goes on. If the master of the house return at an unseasonable hour, he is held to an excuse, and must prove a headache, or other suitable indisposition. In Havana, on the contrary, the American woman suddenly becomes very fond of her husband:—"he must not leave her at home alone; where does he go? she will go with him; when will he come back? remember, now, she will expect him." The secret of all this is, that she cannot go out without him. The other angel of deliverance is the *volante*, with its tireless horses and *calesero*, who seems fitted and screwed to the saddle, which he never leaves. He does not even turn his head for orders. His senses are in the back of his head, or wherever his mistress pleases. "*José, calle de la muralla, esquina á los oficios,*"—and the black machine moves on, without look, word, or sign of intelligence. In New York, your Irish coachman grins approval of your order; and even an English flunkey may touch his hat and say, "Yes, Mum." But in the Cuban negro of service, dumbness is the complement of darkness;—you speak, and the patient right hand pulls the strap that leads the off horse, while the other gathers up the reins of the nigh, and the horses, their tails tightly braided and deprived of all movement, seem as mechanical as the driver. Happy are the ladies at the hotel who have a perpetual *volante* at their service! for they dress in their best clothes three times a day, and do not soil them by contact with the dusty street. They drive before breakfast, and shop before dinner, and after dinner go to flirt their fans and refresh their robes on the Paseo, where the fashions drive. At twilight, they stop at friendly doors and pay visits, or at the entrance of the *café*, where ices are brought out to them. At eight o'clock they go to the Plaza, and hear

the band play, sitting in the *volante*; and at ten they come home, without fatigue, having all day taken excellent care of number one, beyond which their arithmetic does not extend. "I and my *volante*" is like Cardinal Wolsey's "*Ego et Rex meus*."

As for those who have no *volantes*, modesty becomes them, and quietness of dress and demeanor. They get a little walk before breakfast, and stay at home all day, or ride in an omnibus, which is perhaps worse;—they pay a visit now and then in a hired carriage, the bargain being made with difficulty;—they look a good deal through the bars of the windows, and remember the free North, and would, perhaps, envy the *volante*-commanding women, did not dreadful Moses forbid.

One alleviation of the tedium of hotel-life in the city is the almost daily visit of the young man from the dry-goods' shop, who brings samples of lawns, misses' linen dresses, piña handkerchiefs, and fans of all prices, from two to seventy-five dollars. The ladies cluster like bees around these flowery goods, and, after some hours of bargaining, disputing, and purchasing, the vendor pockets the golden honey, and marches off. As dress-makers in Havana are scarce, dear, and bad, our fair friends at the hotel make up these dresses mostly themselves, and astonish their little world every day by appearing in new attire. "How extravagant!" you say. They reply, "Oh! it cost nothing for the making; I made it myself." But we remember to have heard somewhere that "Time is Money." At four in the afternoon, a negress visits in turn every bedroom, sweeps out the mosquitoes from the curtains with a feather-brush, and lets down the mosquito-net, which she tucks in around the bed. After this, do not meddle with your bed until it is time to get into it; then put the light away, open the net cautiously, enter with a dexterous swing, and close up immediately, leaving no smallest opening to help them after. In this mosquito-net you live, move, and have your being

until morning; and should you venture to pull it aside, even for an hour, you will appall your friends, next morning, with a face which suggests the early stages of small-pox, or the spotted fever.

The valuable information I have now communicated is the sum of what I learned in that one day at Mrs. Almy's; and though our party speedily removed thither, I doubt whether I shall be able to add to it anything of importance.

HAVANA. YOUR BANKER. OUR CONSUL. THE FRIENDLY CUP OF TEA.

ONE is apt to arrive in Havana with a heart elated by the prospect of such kindnesses and hospitalities as are poetically supposed to be the perquisite of travellers. You count over your letters as so many treasures; you regard the unknown houses you pass as places of deposit for the new acquaintances and delightful friendships which await you. In England, say you, each of these letters would represent a pleasant family-mansion thrown open to your view,—a social breakfast,—a dinner of London wits,—a box at the opera,—or the visit of a lord, whose perfect carriage and livery astonish the quiet street in which you lodge, and whose good taste and good manners should, one thinks, prove contagious, at once soothing and shaming the fretful Yankee conceit. But your Cuban letters, like fairy money, soon turn to withered leaves in your possession, and, having delivered two or three of them, you employ the others more advantageously, as shaving-paper, or for the lighting of cigars, or any other useful purpose.

Your banker, of course, stands first upon the list,—and to him accordingly, with a beaming countenance, you present yourself. For him you have a special letter of recommendation, and, however others may fail, you consider him as sure as the trump of the deal at whist. But why, alas, should people, who have gone through the necessary disappointments

of life, prepare for themselves others, which may be avoided? Listen and learn. At the first visit, your banker is tolerably glad to see you,—he discounts your modest letter of credit, and pockets his two and a half *per cent.* with the best grace imaginable. If he wishes to be very civil, he offers you a seat, offers you a cigar, and mumbles in an indistinct tone that he will be happy to serve you in any way. You call again and again, keeping yourself before his favorable remembrance,—always the same seat, the same cigar, the same desire to serve you, carefully repressed, and prevented from breaking out into any overt demonstration of good-will. At last, emboldened by the brilliant accounts of former tourists and the successes of your friends, you suggest that you would like to see a plantation,—you only ask for one,—would he give you a letter, etc., etc.? He assumes an abstracted air, wonders if he knows anybody who has a plantation,—the fact being that he scarcely knows any one who has not one. Finally, he will try,—call again, and he will let you know. You call again,—“Next week,” he says. You call after that interval,—“Next week,” again, is all you get. Now, if you are a thoroughbred man, you can afford to quarrel with your banker; so you say, “Next week,—why not next year?”—make a very decided snatch at your hat, and wish him a very long “good-morning.” But if you are a snob, and afraid, you take his neglect quietly enough, and will boast, when you go home, of his polite attentions to yourself and family, when on the Island of Cuba.

Our Consul is the next post in the weary journey of your hopes, and to him, with such assurance as you have left, you now betake yourself. Touching him personally I have nothing to say. I will only remark, in general, that the traveller who can find, in any part of the world, an American Consul not disabled from all service by ill-health, want of means, ignorance of foreign languages, or unpleasant relations with the repre-

sentatives of foreign powers,—that traveller, we say, should go in search of the sea-serpent, and the passage of the North Pole, for he has proved himself able to find what, to every one but him, is undiscoverable.

But who, setting these aside, is to show you any attention? Who will lift you from the wayside, and set you upon his own horse, or in his own *volante*, pouring oil and wine upon your wounded feelings? Ah! the breed of the good Samaritan is never allowed to become extinct in this world, where so much is left for it to do.

A kind and hospitable American family, long resident in Havana, takes us up at last. They call upon us, and we lift up our heads a little; they take us out in their carriage, and we step in with a little familiar flounce, intended to show that we are used to such things; finally, they invite us to a friendly cup of tea,—all the hotel knows it,—we have tarried at home in the shade long enough. Now, people have begun to find us out,—*we are going out to tea!*

How pleasant the tea-table was! how good the tea! how more than good the bread-and-butter and plum-cake! how quaint the house of Spanish construction, all open to the air, adorned with flowers like a temple, fresh and fragrant, and with no weary upholstery to sit heavy on the sight! how genial and prolonged the talk! how reluctant the separation!—imagine it, ye who sing the songs of home in a strange land. And ye who cannot imagine, forego the pleasure, for I shall tell you no more about it. I will not, I, give names, to make good-natured people regret the hospitality they have afforded. If they have entertained un-awares angels and correspondents of the press, (I use the two terms as synonymous,) they shall not be made aware of it by the sacrifice of their domestic privacy. All celebrated people do this, and that we do it not answers for our obscurity.

The cup of tea proves the precursor of many kind services and pleasant hours.

Our new friends assist us to a deal of sight-seeing, and introduce us to cathedral, college, and garden. We walk out with them at sunrise and at sunset, and sit under the stately trees, and think it almost strange to be at home with people of our own race and our own way of thinking, so far from the home-surroundings. For the gardens, they may chiefly be described as triumphs of Nature over Art,—our New England horticulture being, on the contrary, the triumph of Art over Nature, after a hard-fought battle. Here, the avenues of palm and cocoa are magnificent, and the flowers new to us, and very brilliant. But pruning and weeding out are hard tasks for Creole natures, with only negroes to help them. There is for the most part a great overgrowth and overrunning of the least desirable elements, a general air of slovenliness and unthrift; in all artificial arrangements decay seems imminent, and the want of idea in the laying out of grounds is a striking feature. In Italian villas, the feeling of the Beautiful, which has produced a race of artists, is everywhere manifest,—everywhere are beautiful forms and picturesque effects. Even the ruins of Rome seem to be held together by this fine bond. No stone dares to drop, no arch to moulder, but with an exquisite and touching grace. And the weeds, oh! the weeds that hung their little pennon on the Coliseum, how graciously do they float, as if they said,—“Breathe softly, lest this crumbling vision of the Past go down before the rude touch of the modern world!” And so, one treads lightly, and speaks in hushed accents; lest, in the brilliant Southern noon, one should wake the sleeping heart of Rome to the agony of her slow extinction.

But what is all this? We are dreaming of Rome,—and this is Cuba, where the spirit of Art has never been, and where it could not pass without sweeping out from houses, churches, gardens, and brains, such trash as has rarely been seen and endured elsewhere. They show us, for example, some mutilated statues in the ruins of what is called the Bishop's Garden. Why, the elements did a righteous work, when they effaced the outlines of these coarse and trivial shapes, unworthy even the poor marble on which they were imposed. Turning from these, however, we find lovely things enough to rebuke this savage mood of criticism. The palm-trees are unapproachable in beauty,—they stand in rows like Ionic columns, straight, strong, and regular, with their plumed capitals. They talk solemnly of the Pyramids and the Desert, whose legends have been whispered to them by the winds that cross the ocean, freighted with the thoughts of God. Then, these huge white lilies, deep as goblets, which one drinks fragrance from, and never exhausts,—these thousand unknown jewels of the tropic. Here is a large tank, whose waters are covered with the leaves and flowers of beautiful aquatic plants, whose Latin names are of no possible consequence to anybody. Here, in the very heart of the garden, is a rustic lodge, curtained with trailing vines. Birds in cages are hung about it, and a sweet voice, singing within, tells us that the lodge is the cage of a more costly bird. We stop to listen, and the branches of the trees seem to droop more closely about us, the twilight lays its cool, soft touch upon our heated foreheads, and we whisper,—“Peace to his soul!” as we leave the precincts of the Bishop's Garden.

SOME INEDITED MEMORIALS OF SMOLLETT.

A HUNDRED years and upwards have elapsed since Fielding and Smollett, the fathers and chiefs of the modern school of English novel-writing, fairly established their claims to the dignified eminence they have ever since continued to enjoy; and the passage of time serves but to confirm them in their merited honors. Their pictures of life and manners are no longer, it is true, so familiar as in their own days to the great mass of readers; but this is an incident that scarce any author can hope to avert. The changes of habits and customs, and the succession of writers who in their turn essay to hold the mirror up to Nature, must always produce such a result. But while the mind of man is capable of enjoying the most fortunate combinations of genius and fancy, the most faithful expositions of the springs of action, the most ludicrous and the most pathetic representations of human conduct, the writings of Fielding and Smollett will be read and their memories kept green. Undeterred by those coarsenesses of language and occasional grossnesses of detail (which were often less their own fault than that of the age) that frequently disfigure the pages of "*Amelia*" and "*Roderick Random*," men will always be found to yield their whole attention to the story, and to recognize in every line the touches of the master's hand.

Were any needed, stronger proof of the truth of this proposition could not be given than is afforded by the zeal with which the greatest novelists since their day have turned aside to contemplate and to chronicle the career of this immortal pair, whose names, notwithstanding the dissimilarity of genius and style, seem destined to be as eternally coupled together as those of the twin sons of Leda. To the rescue from oblivion of their personal histories, a host of biographers have appeared, scattered over the

whole period that has elapsed since their deaths to the present time. The first life that appeared of Tobias George Smollett came from the hands of his friend and companion, the celebrated Dr. Moore, himself a novel-writer of no mean fame. To him succeeded Anderson; who in turn was followed by Sir Walter Scott, the fruits of whose unrivalled capacity for obtaining information are before the world in the form of a most delightful memoir. So that when Roscoe, at a later date, took up the same theme, he found that the investigations of his predecessors had left him little more to do than to make selections or abridgments, and to arrange what new matter he had come into possession of. One would have thought that with all these labors the public appetite should have been satisfied,—that everything apt to be heard with interest of and about Smollett had been said. So far from this being the case, however, it was but a few years ago, that, as we all recollect, the brilliant pen of Thackeray was brought to bear on the same subject, and the great humorist of this generation employed his talents worthily in illustrating the genius of a past age. "*Humphrey Clinker*," says he, "is, I do believe, the most laughable story that has ever been written since the goodly art of novel-writing began." This is strong praise, though but of a single book; yet it falls short of the general estimate that Walter Scott formed of the capacity of our author. "We readily grant to Smollett," he says, "an equal rank with his great rival, Fielding, while we place both far above any of their successors in the same line of fictitious composition."

After the testimonies we have cited, it would be useless to seek other approbation of Smollett's merits.

"From higher judgment-seats make no appeal
To lower."

Yet, with all his imaginative power and humorous perception, it cannot be gainsaid that there was a great lack of delicacy in the composition of his mind,—a deficiency which, even in his own days, gave just offence to readers of the best taste, and which he himself was sometimes so candid as to acknowledge and to correct. Its existence is too often a sufficient cause to deter any but minds of a certain masculine vigor from the perusal of such a work as “*Roderick Random*”; and yet this work was an especial favorite with the most refined portion of the public in the latter half of the last century. Burke delighted in it, and would no doubt often read from it aloud to the circle of guests of both sexes that gathered about him at Beaconsfield; and Elia makes his imaginary aunt refer to the pleasure with which in her younger days she had read the story of that unfortunate young nobleman whose adventures make such a figure in “*Peregrine Pickle*.” So great is the change in the habit of thought and expression in less than half a century, that we believe there is not in all America a gentleman who would now venture to read either of these works aloud to a fireside group. Smollett’s Muse was free enough herself, in all conscience;—

“High-kirtled was she,
As she gaed o’er the lea”;—

but in “*Peregrine Pickle*,” beside the natural incidents, there are two long episodes foisted upon the story, neither of which has any lawful connection with the matter in hand, and one of which, indelicate and indecent in the extreme, does not appear to have even been of his own composition. Reference is here made to the “*Memoirs of a Lady of Quality*,” and to the passages respecting young Annesley; and since biographers do not seem to have touched especially on the manner of their introduction into the novel, we will give a word or two to this point.

John Taylor, in the *Records of his Life*, states that the memoirs of Lady Vane, as they appear in “*Peregrine Pickle*,” were

actually written by an Irish gentleman of wealth, a Mr. Denis McKerchier, who at the time entertained relations with that abandoned, shameless woman; so that, if, as was probably the case, she paid Smollett a sum of money to procure their incorporation in his pages, there could have been no other motive to actuate her conduct than a desire to blazon her own fall or to mortify the feelings of her husband. The latter is the more likely alternative, if we are to believe that Lord Vane himself stooped to employ Dr. Hill to prepare a history of Lady Frail, by way of retorting the affront he had received. This Mr. McKerchier in season broke with her Ladyship, and refused her admission to his dying bedside; but, in the mean time, his *Memoirs* had gone out to the world, and had greatly conduced to the popularity and sale of Smollett’s novel. He was also the patron of Annesley, that unfortunate young nobleman whose romantic life has furnished Godwin and Scott with a foundation for their most highly-wrought novels; and it was, we may judge, from his own lips that Smollett received the narrative of his *protégé’s* adventures. Whatever we may think, however, of the introduction of scenes that were of sufficient importance to suggest such books as “*Cloudeley*” and “*Guy Mannering*,” there can be but one opinion as to the bad taste which governed Smollett, when he consented to overload “*Peregrine Pickle*” with Lady Vane’s memoirs; and if lucre were indeed at the bottom of the business, it assumes a yet graver aspect.

But the business of this article is not to dwell upon matters that are already in print, and to which the general reader can have easy access. To such as are desirous of obtaining a full account of the life and genius of Smollett, prepared with all the aids that are to be derived from a thorough knowledge of the question, we would suggest the perusal of an exceedingly well-written article in the *London Quarterly Review* for January, 1858; and we will here heartily express

a regret that the unpublished materials which have found a place in this magazine could not have been in the hands of the author of that paper. It is certain he would have made a good use of them. As it is, however, they will perhaps possess an additional interest to the public from the fact that they have never before seen the light.

It is something, says Washington Irving, to have seen the dust of Shakspeare. It is assuredly not less true that one can hardly examine without a peculiar emotion the private letters of such a man as Smollett. A strange sensation accompanies the unfolding of the faded sheets, that have hardly been disturbed during the greater part of a century. And as one at least of the documents in question is of an almost autobiographical character, its tattered folds at once assume a value to the literary student far beyond the usual scope of an inedited autograph.

The first letter to which we shall call attention was written by Smollett in 1763. It was in reply to one from Richard Smith, Esq., of Burlington, New Jersey, by whose family it has been carefully preserved, together with a copy of the letter which called it forth. Mr. Smith was a highly respectable man, and in later years, when the Revolution broke out, a delegate from his Province to the first and second Continental Congress. He had written to Smollett, expressing his hopes that the King had gratified with a pension the author of "*Peregrine Pickle*" and "*Roderick Random*," and asking under what circumstances these books were composed, and whether they contained any traces of his correspondent's real adventures. He adverts to a report that, in the case of "*Sir Launcelot Greaves*," Smollett had merely lent his name to "a mercenary bookseller." "*The Voyages* which go under your name Mr. Rivington (whom I consulted on the matter) tells me are only nominally your's, or, at least, were chiefly collected by understrappers. Mr. Rivington also gives me such an account of the shortness of time

in which you wrote the History, as is hardly credible." A list of Smollett's genuine publications is also requested.

The Mr. Rivington referred to in the foregoing extract was probably the well-known New York bookseller, whose press was so obnoxious to the Whigs a few years later. To the letter itself Smollett thus replied:—

DR. SMOLLETT TO MR. SMITH.

"SIR,—I am favoured with your's of the 26th of February, and cannot but be pleased to find myself, as a writer, so high in your esteem. The curiosity you express, with regard to the particulars of my life and the variety of situations in which I may have been, cannot be gratified within the compass of a letter. Besides, there are some particulars of my life which it would ill become me to relate. The only similitude between the circumstances of my own fortune and those I have attributed to Roderick Random consists in my being born of a reputable family in Scotland, in my being bred a surgeon, and having served as a surgeon's mate on board a man-of-war during the expedition to Carthage. The low situations in which I have exhibited Roderick I never experienced in my own person. I married very young, a native of Jamaica, a young lady well known and universally respected under the name of Miss Nancy Lassells, and by her I enjoy a comfortable, tho' moderate estate in that island. I practised surgery in London, after having improved myself by travelling in France and other foreign countries, till the year 1749, when I took my degree of Doctor in Medicine, and have lived ever since in Chelsea (I hope) with credit and reputation.

"No man knows better than Mr. Rivington what time I employed in writing the four first volumes of the History of England; and, indeed, the short period in which that work was finished appears almost incredible to myself, when I recollect that I turned over and consulted above three hundred volumes in the

course of my labour. Mr. Rivington likewise knows that I spent the best part of a year in revising, correcting, and improving the quarto edition; which is now going to press, and will be continued in the same size to the late Peace. Whatever reputation I may have got by this work has been dearly purchased by the loss of health, which I am of opinion I shall never retrieve. I am now going to the South of France, in order to try the effects of that climate; and very probably I shall never return. I am much obliged to you for the hope you express that I have obtained some provision from his Majesty; but the truth is, I have neither pension nor place, nor am I of that disposition which can stoop to solicit either. I have always piqued myself upon my Independancy, and I trust in God I shall preserve it to my dying day.

"Exclusive of some small detached performances that have been published occasionally in papers and magazines, the following is a genuine list of my productions. *Roderick Random*. The *Regicide*, a Tragedy. A translation of *Gil Blas*. A translation of *Don Quixotte*. An *Essay upon the external use of water*. *Peregrine Pickle*. *Ferdinand Count Fathom*. Great part of the *Critical Review*. A very small part of a *Compendium of Voyages*. The complete *History of England, and Continuation*. A small part of the *Modern Universal History*. Some pieces in the *British Magazine*, comprehending the whole of *Sir Launcelot Greaves*. A small part of the translation of *Voltaire's Works*, including all the notes, historical and critical, to be found in that translation.

"I am much mortified to find it is believed in America that I have lent my name to Booksellers: that is a species of prostitution of which I am altogether incapable. I had engaged with Mr. Rivington, and made some progress in a work exhibiting the present state of the world; which work I shall finish, if I recover my health. If you should see Mr. Rivington, please give my kindest compliments to him. Tell him I wish him all manner

of happiness, tho' I have little to expect for my own share; having lost my only child, a fine girl of fifteen, whose death has overwhelmed myself and my wife with unutterable sorrow.

"I have now complied with your request, and beg, in my turn, you will commend me to all my friends in America. I have endeavoured more than once to do the Colonies some service; and am, Sir, your very humble servant,

"TS. SMOLLETT.

"London, May 8, 1763."

The foregoing letter, though by no means confidential, must possess considerable value to any future biographer of the writer. It very clearly shows the light in which Smollett was willing to be viewed by the public. It explains the share he took in more than one literary enterprise, and establishes his paternity of the translation of "*Gil Blas*," which has been questioned by Scott and ignored by other critics. The travels in France, which, according to the letter, could not have been posterior to 1749, seem unknown even to the *Quarterly Reviewer*; but it is possible that here Smollett's memory may have played him false, and that he confounded 1749 with the following year, when, as is well known, he visited that kingdom. The reference to his own share in furnishing the original for the story of "*Roderick Random*" is curious; nevertheless it can no longer be doubted that very many of the persons and scenes of that work, as well as of "*Peregrine Pickle*," were drawn, with more or less exaggeration, from his actual experience of men and manners. And the despondency with which he contemplates his shattered health and the prospect of finding a grave in a foreign land explains completely the governing motives that produced, in the concluding pages of the history of the reign of George II., so calm and impartial a testimony to the various worth of his literary compeers that it almost assumes the tone of the voice of posterity. This is the suggestion of the article

in the "Quarterly Review," and the language of the letter confirms it. Despairing of ever again returning to his accustomed avocations, and with a frame shattered by sickness and grief, he passes from the field of busy life to a distant land, where he thinks to leave his bones; but ere he bids a last farewell to his own soil, he passes in review the names of those with whom he has for years been on relations of amity or of ill-will, in his own profession, and, while he makes their respective merits, so far as in him lies, a part of the history of their country, he seems to breathe the parting formula of the gladiator of old,—*Moriturus vos saluto*.

In the first of the ensuing letters an amusing commentary will be found on Smollett's assertion, that his independent spirit would not stoop to solicit either place or pension. The papers of which it forms one appear to have been selected from the private correspondence of Dr. Smollett, and are preserved among the MSS. of the Library Company of Philadelphia, to which they were presented by Dr. Benjamin Rush, one of the signers of the Declaration of Independence, who may have obtained them in Scotland. Like the letter to Mr. Smith, we are satisfied that these are authentic documents, and shall deal with them as such, here. Lord Shelburne (better known by his after-acquired title of Marquis of Lansdowne) was the identical minister whom Pitt, twenty years later, so highly eulogized for "that capacity of conferring good offices on those he prefers," and for "his attention to the claims of merit," of which we could wish to know that Smollett had reaped some benefit. The place sought for was probably a consulate on the Mediterranean, which would have enabled our author to look forward with some assurance of faith to longer and easier years. The Duchess of Hamilton, to whom his Lordship writes, and by whom his letter seems to have been transmitted to its object, was apparently the beautiful Elizabeth Gunning, dowager Duchess of

Hamilton, but married, at the date of the letter, to the Duke of Argyle. Having an English peerage of Hamilton in her own right, it is probable she preferred to continue her former title.

LORD SHELburne TO THE DUCHESS OF HAMILTON.

"*Holt Street, Tuesday.*"

"MADAM,—I am honour'd with your Grace's letter, inclosing one from Doctor Smollett. It is above a year since I was applied to by Doctor Smollett, thro' a person whom I wish'd extremely to oblige; but there were and still subsist some applications for the same office, of a nature which it will be impossible to get over in favour of Mr. Smollett, which makes it impossible for me to give him the least hopes of it. I could not immediately recollect what had pass'd upon that subject, else I should have had the honour to answer your Grace's letter sooner. I am with great truth and respect your Grace's most obedient and most humble servant.

"SHELburne."

The letter bears no month nor year, but is indorsed, apparently by Smollett himself, as of 1762,—that is, in the year previous to his expressed aversion to solicitations for place. Yet if there was a man in England entitled to ask for and to receive some provision by his country for his broken health and narrow fortunes, that man was Smollett. It is perhaps a trifling thing to notice, but it may be observed that Lord Shelburne's communication does not bear any marks of frequent perusal. The silver sand with which the fresh lines were besprinkled still clings to the fading ink, furnishing perhaps the only example remaining of the use of that article. Rousseau, we remember, mentions such sand as the proper material to be resorted to by one who would be very particular in his correspondence,—"*employant pour cela le plus beau papier doré, séchant l'écriture avec de la poudre d'azur et d'argent*";

and Moore repeats the precept in the example of M. le Colonel Calicot, according to the text of Miss Biddy, in the "Fudge Family in Paris":—

"Upon paper gilt-edged, without blot or erasure;

Then sanded it over with silver and azure."

Among the remaining letters in this collection we find some from John Gray, "teacher of mathematics in Cupar of Fife,"—some from Dr. John Armstrong, the author of "The Art of Health,"—and one from George Colman the elder. In 1761, Gray writes to Smollett, thanking him for kind notices in the "Critical Review," and asking his influence in regard to certain theories concerning the longitude, of which Gray was the inventor. In 1770, Colman thus writes:—

GEORGE COLMAN TO DR. SMOLLETT.

"DEAR SIR,—I have some idea that Mr. Hamilton about two years ago told me he should soon receive a piece from you, which he meant, at your desire, to put into my hands; but since that time I have neither seen nor heard of the piece.

"I hope you enjoy your health abroad, and shall be glad of every opportunity to convince you that I am most heartily and sincerely, dear Sir, your, &c.,

G. COLMAN.

"London, 28 Sept. 1770."

The piece referred to here by Colman (who was at this period, we believe, the manager of the Haymarket Theatre) may possibly have been a farce that was brought out fifteen years later on the Covent-Garden stage, with the title of "The Israelites, or the Pampered Nabob." Its merits and its success are said by Scott to have been but slight, and the proof of its having been written by Smollett very doubtful; so that it was never printed, and was soon forgotten.

At this time, (1770,) it must be remembered, Smollett was established at Leghorn, where a milder climate and sunnier skies tended to promote, we fancy, a serener condition of mind than he had

known for years. In leaving England, he left behind him some friends, but many enemies. In his literary career, as he himself had not been over-merciful, so he was in return not always tenderly handled. As a sample of the invective which was occasionally poured forth on him, we will quote some lines from "The Race," a dull imitation of "The Dunciad," ascribed to one Cuthbert Shaw, and published in 1766. Although reprinted in "Dilly's Repository," (1790,) it has long ago been very properly forgotten, and is now utterly worthless save for purposes of illustration. The Hamilton referred to is the same person to whom Colman makes allusion; he was indeed Smollett's *fidus Achates*.

"—Next Smollet came. What author dare resist

Historian, critic, bard, and novelist?

'To reach thy temple, honour'd Fame,' he cried,

'Where, where's an avenue I have not tried?

But since the glorious present of to-day

Is meant to grace alone the poet's lay,

My claim I wave to every art beside,

And rest my plea upon the Regicide.

* * * *

But if, to crown the labours of my Muse,

Thou, inauspicious, should'st the wreath refuse,

Whoe'er attempts it in this scribbling age

Shall feel the Scottish pow'rs of Critic rage.

Thus spurn'd, thus disappointed of my aim,

I'll stand a bugbear in the road to Fame,

Each future author's infant hopes undo,

And blast the budding honours of his brow.'

He said,—and, grown with future vengeance big,

Grimly he shook his scientific wig.

To clinch the cause, and fuel add to fire,

Behind came Hamilton, his trusty squire:

Awhile he paus'd, revolving the disgrace,

And gath'ring all the honours of his face;

Then rais'd his head, and, turning to the crowd,

Burst into bellowing, terrible and loud:—

'Hear my resolve; and first by—I swear,

By Smollet, and his gods, whoe'er shall dare

With him this day for glorious fame to vie,

Sous'd in the bottom of the ditch shall lie;

And know, the world no other shall confess,

While I have crab-tree, life, or letter-press.'

Scar'd at the menace, authors fearful grew,

Poor Virtue trembled, and e'en Vice look'd blue."

It is unnecessary to pursue this rapid composition to its most lame and impotent conclusion; it is sufficient to cite it as a specimen-brick of the hostility which many literary characters entertained against the author of "Roderick Random." Despite his own birthplace being north of the Tweed, many Scots were aggrieved at the incidental ridicule with which characters from "the land o' cakes" are sometimes treated in that and other works from the same hand; and the picture of Lismahago in "Humphrey Clinker" is said to have still more violently inflamed their ire. It is to this feeling on the part of his countrymen that Charles Lamb alludes, in his essay upon "Imperfect Sympathies." "Speak of Smollett as a great genius," he says, "and they [the Scots] will retort upon Hume's History compared with his continuation of it. What if the historian had continued 'Humphrey Clinker'?" In fact, there were a good many North Britons, a century ago, who seem to have felt, on the subject of English censure or ridicule, pretty much as some of our own people do to-day. No matter how well-founded the objection may be, or how justly a local habit may be satirized, our sensitiveness is wounded and our indignation aroused. That the portrait in Lismahago's case was not altogether overcharged may be deduced from a passage in one of Walter Scott's letters, in which he likens the behavior and appearance of one of his oldest and most approved friends to that of the gallant Obadiah in a similar critical moment. "The noble Captain Ferguson was married on Monday last. I was present at the bridal, and I assure you the like hath not been seen since the days of Lismahago. Like his prototype, the Captain advanced in a jaunty military step, with a kind of leer on his face that seemed to quizz the whole matter." That the sketch was a portrait, though doubtless disguised to such an extent as rendered its introduction permissible, is very probable; and as it is beyond question one of the masterpieces of English

fiction, a few lines may well be given to the point. With great justice the Quarterly Reviewer pronounces the character of Lismahago in no whit inferior to that of Scott's Dugald Dalgetty; and who would not go out of his way to trace any circumstance in the history of such a conception as that of the valiant Laird of Drumthwacket, the service-seeking Rittmaster of Swedish Black Dragoons?

Scott himself tells us that he recollected "a good and gallant officer" who was said to have been the prototype of Lismahago, though probably the opinion had its origin in "the striking resemblance which he bore in externals to the doughty Captain." Sir Walter names no name; but there is a tradition that a certain Major Robert Stobo was the real original from which the picture was drawn. Stobo may fairly be said to fulfil the necessary requisites for this theory. That he was as great an oddity as ever lived is abundantly testified by his own "Memorial," written about 1760, and printed at Pittsburg in 1854, from a copy of the MS. in the British Museum. At the breaking out of the Seven-Years' War, he was in Virginia, seeking his fortune under the patronage of his countryman, Dinwiddie, and thus obtained a captaincy in the expedition which Washington, in 1754, led to the Great Meadows. On the fall of Fort Necessity, he was one of the hostages surrendered by Washington to the enemy; and thus, and by his subsequent doings at Fort Du Quesne and in Canada, he has linked his name with some interesting passages of our national history.* That he was known to Smollett in after life appears by a letter from David Hume to the latter, in which his "strange adventures" are alluded to; and there is considerable resemblance between these, as narrated by Stobo himself, and those assigned by the novelist to Lismahago. And, bearing in mind the ineffable self-complacency with which Stobo always

* Some amusing particulars concerning Stobo may be found also in the *Journal of Lieut. Simon Stevens*: Boston 1760. — Eds. ATLANTIC.

dwells on himself and his belongings, the description of his person given in the "Memorial" coincides very well with that of the figure which the novelist makes to descend in the yard of the Durham inn. One circumstance further may be noted. We are told of "the noble and sonorous names" which Miss Tabitha Bramble so much admired: "that Obadiah was an adventitious appellation, derived from his great-grandfather, who had been one of the original Covenanters; but Lismahago was the family surname, taken from a place in Scotland, so called." Now we are not very well versed in Scottish topography; but we well recollect, that in Dean Swift's "Memoirs of Captain John Creighton," who was a noted Cavalier in the reigns of Charles II., James II., and William III., and had borne an active part in the persecution of "the puir hill-folk," there is mention made of the name of Stobo. The Captain dwells with no little satisfaction upon the manner in which, after he had been so thoroughly outwitted by Mass David Williamson,—the Covenanting minister, who played Achilles among the women at my Lady Cherrytree's,—he succeeded in circumventing and taking prisoner "a notorious rebel, one Adam Stobow, a farmer in Fife near Culross." And later in the same book occurs a very characteristic passage:—*"Having drunk hard one night, I dreamed that I had found Captain David Steele, a notorious rebel, in one of the five farmers' houses on a mountain in the shire of Clydesdale and parish of Lismahago, within eight miles of Hamilton, a place I was well acquainted with."* Lest the marvellous fulfilment of Creighton's dream should induce other seekers to have resort to a like self-preparation, we will merely add, that the village of Hamilton is hard by the castle of the Duke of that name, to whose family we have already seen Smollett was under some obligations, and that it is described in the same pages with Lismahago. It is not improbable, therefore, that, being at Hamilton, the novelist's attention may

have been attracted to "Creighton's Memoirs," which treat of the adjacent districts, and that the mention of Stobo's name therein may have suggested to his mind its connection with Lismahago. Certainly there was no antecedent work to "Humphrey Clinker," in which, as we may believe, either of these names finds a place, save this of Creighton; and as, throughout the whole series of letters, Smollett does not profess to avoid the introduction of actual persons and events, often even with no pretence of disguise, we need not hesitate to think that he would make no difficulty of turning the eccentricities of a half-pay officer to some useful account.

But we have wandered too far away from the business of his correspondence. The next letter that we shall examine is one from John Gray, dated at Florence, Nov. 15th, 1770, to Smollett, at Leghorn. It abounds in details of the writer's attempts at the translation of a French play for the English stage, on which he desires a judgment; and cites verses from several of the songs it contains,—one of them being that so familiar to American ears thirty years since, when Lafayette was making his last tour through this country:—

"Où peut on être mieux
Qu'au sein de sa famille?"

Gray had been at Leghorn, on his way to Rome; and now amuses his correspondent with the inconveniences of his journey under the auspices of a tippling companion, with his notions about Pisa and Italy in general, and with particulars of public intelligence from home, some of which relate to Smollett's old antagonist, Admiral Knowles.—"I despaired of executing Mrs. Smollett's commission," he says, "for there was no ultramarine to be found in the shops; but I at length procured a little from Mr. Patch, which I have sent along with the patterns in Mrs. Varrien's letter, hoping that the word *Mostre* on the back of the letter will serve for a passport to all. The ultramarine costs nothing; therefore, if

it arrives safe, the commission is finished."

We next have a couple of letters from Dr. Armstrong; which, on account of his ancient and enduring friendship for Smollett, and of the similarity in their careers, may be given at large. Armstrong was a wrongheaded, righthearted man,—a surgeon in the army, we believe,—and a worshipper of Apollo, as well in his proper person as in that of Esculapius. In these, and in the varied uses to which he turned his pen, the reader will see a similarity to the story of his brother Scot. That he was occasionally splenetic in his disposition is very manifest. His quarrel with Wilkes, with whom he had been on terms of intimate friendship, finds a parallel in Smollett's own history. The first letter is without date; but the reference to the publication of his "Miscellanies" fixes it as of 1770, and at London.

DR. ARMSTRONG TO DR. SMOLLETT.

"MY DEAR DOCTOR,—I reproach myself;—but it is as insignificant as embarrassing to explain some things;—so much for that. As to my confidence in your stamina, I can see no reason to flinch from it; but I wish you would avoid all unwholesome accidents as much as possible.

"I am quite serious about my visit to you next autumn. My scheme is now to pass my June or July at Paris; from thence to set out for Italy, either over the Alps or by sea from Marseilles. I don't expect the company of my widow lumber, or any other that may be too fat and indolent for such an excursion; and hope to pick up some agreeable companion without being at the expense of advertising.

"You feel exactly as I do on the subject of State Politics. But from some late glimpses it is still to be hoped that some *Patriots* may be disappointed in their favourite views of involving their country in confusion and destruction. As to the K. Bench patriot, it is hard to say

from what motive he published a letter of your's asking some trifling favour of him on behalf of somebody for whom *the Cham of Literature*, Mr. Johnson, had interested himself. I have within this month published what I call my *Miscellanies*. Tho' I admitted my operator to an equal share of profit and loss, the publication has been managed in such a manner as if there had been a combination to suppress it: notwithstanding which, it makes its way very tolerably at least. But I have heard to-day that somebody is to give me a good trimming very soon.

"All friends remember you very kindly, and our little club at the Q. Arms never fail to devote a bumper to you, except when they are in the humour of drinking none but scoundrels. I send my best compliments to Mrs. Smollett and two other ladies, and beg you'll write me as soon as suits you: and with black ink. I am always, my dear Doctor, most affectionately yours,—

"JOHN ARMSTRONG."

The letter to Wilkes had been written many years before, to obtain his assistance in procuring the release of Johnson's black servant, who had been impressed. It was couched in free terms respecting Dr. Johnson, and was probably now given by Wilkes to the press in the hope that it might do its author harm with the *Cham*, or at least cause the latter some annoyance.

Armstrong's next letter finds him arrived in Italy, and on the eve of repairing to his friend at Leghorn.

DR. ARMSTRONG TO DR. SMOLLETT.

"Rome, 2nd June, 1770.

"DEAR DOCTOR,—I arrived here last Thursday night, and since that have already seen all the most celebrated wonders of Rome. But I am most generally disappointed in these matters; partly, I suppose, from my expectations being too high. But what I have seen has been in such a hurry as to make it a fatigue: be-

sides, I have strolled about amongst them neither in very good humour nor very good health.

"I have delayed writing till I could lay before you the plan of my future operations for a few weeks. I propose to post it to Naples about the middle of next week, along with a Colonel of our Country, who seems to be a very good-natured man. After remaining a week or ten days there, I shall return hither, and, after having visited Tivoli and Frascati, set out for Leghorn, if possible, in some vessel from Civita Vecchia; for I hate the lodgings upon the road in this country. I don't expect to be happy till I see Leghorn; and if I find my Friend in such health as I wish him, or even hope for him, I shall not be disappointed in the chief pleasure I proposed to myself in my visit to Italy. As you talked of a ramble somewhere towards the South of France, I shall be extremely happy to attend you.

"I wrote to my brother from Genoa, and desired him to direct his answer to your care at Pisa. If it comes, please direct it, with your own letter, for which I shall long violently look, care of Mr. Francis Barazzi at Rome. I am, with my best compliments to Mrs. Smollett and the rest of the ladies, &c.,

"JOHN ARMSTRONG."

There is no reason to suppose that Armstrong found anything in the condition of his friend to fulfil the anxious wishes of his letter. In the following year, Smollett died, leaving to his widow little beyond the empty consolations of his great fame. From her very narrow purse she supplied the means of erecting the stone that marks the spot where he lies; and the pen of his companion, whose letter we have just given, furnished an appropriate inscription. The niggardly hands of government remained as firmly closed against the relief of Mrs. Smollett as they had been in answer to her husband's own application for himself; an application which must have cost a severe struggle to his proud spirit, and

of which his most intimate literary friends were probably never aware. He sought favors for others, says Dr. Moore; but "for himself he never made an application to any great man in his life!" He was not intemperate, nor yet was he extravagant, but by nature hospitable and of a cheerful temperament; his house-keeping was never niggardly, so long as he could employ his pen. Thus his genius was too often degraded to the hackney-tasks of booksellers; while a small portion of those pensions which were so lavishly bestowed upon ministerial dependants and placemen would have enabled him to turn his mind to its congenial pursuits, and probably to still further elevate the literary civilization of his country. But if there be satisfaction in the thought that a neglect similar to that which befell so bright a genius as his could no longer occur in England, there is food likewise for reflection in the change that has come over the position in which men of letters lived in those days towards the public, and even towards each other. Let any one read the account of the ten or a dozen authors whom Smollett describes himself, in "Humphrey Clinker," as entertaining at dinner on Sundays,—that being the only day upon which they could pass through the streets without being seized by bailiffs for debt. Each character is drawn with a distinctive minuteness that leaves us no room to doubt its possessing a living original; yet how disgusting to suppose that such a crew were really to be seen at the board of a brother writer! and in what bad taste does their host describe and ridicule their squalor! That such things were in those times cannot be doubted. Even in this century, in the golden days of book-making, we are told how Constable and how Ballantyne, the great publisher and the great printer of Edinburgh,—"His Czarish Majesty," and "the Dey of All-jeers," as Scott would call them,—delighted at their Sunday dinners to practise the same exercises as those which Smollett relates,—how they would bring together for their diversion Constable's

"poor authors," and start his literary drudges on an after-dinner foot-race for a new pair of breeches, and the like ! While it cannot justify the indifference with which Shelburne treated his request, we cannot but perceive that Smollett's contemptuous ridicule of his unfortunate or incapable Grub-Street friends must rob him of much of the sympathy which would otherwise accompany the ministerial neglect with which the claims of literature were visited in his person.

BLOODROOT

"Hast thou loved the wood-rose, and left it on its stalk ?"

BEECH-TREES, stretching their arms, rugged, yet beautiful,
Here shade meadow and brook ; here the gay bobolink,
High poised over his mate, pours out his melody.
Here, too, under the hill, blooms the wild violet ;
Damp nooks hide, near the brook, bellworts that modestly,
Pale-faced, hanging their heads, droop there in silence ; while
South winds, noiseless and soft, bring us the odor of
Birch twigs mingled with fresh buds of the hickory.

Hard by, clinging to rocks, nods the red columbine ;
Close hid, under the leaves, nestle anemones,—
White-robed, airy and frail, tender and delicate.

Ye who, wandering here, seeking the beautiful,
Stoop down, thinking to pluck one of these favorites,
Take heed ! Nymphs may avenge. List to a prodigy ;—
One moon scarcely has waned since I here witnessed it.

One moon scarcely has waned, since, on a holiday,
I came, careless and gay, into this paradise,—
Found here, wrapped in their cloaks made of a leaf, little
White flowers, pure as the snow, modest and innocent,—
Stooped down, eagerly plucked one of the fairest, when
Forth rushed, fresh from the stem broken thus wickedly,
Blood !—tears, red, as of blood !—shed through my selfishness !

THE DIFFERENTIAL AND INTEGRAL CALCULUS.

Πολλὰ τὰ δεινὰ, κοῦδέν ἀν-
θρώπου δεινότερον πέλει . . .
περιφράδης ἀνὴρ !

SORH. *Ant.* 322 et seq.

"MANY things are wonderful," says the Greek poet, "but nought more wonderful than man, all-inventive man!" And surely, among many wonders wrought out by human endeavor, there are few of higher interest than that splendid system of mathematical science, the growth of so many slow-revolving ages and toiling hands, still incomplete, destined to remain so forever perhaps, but to-day embracing within its wide circuit many marvellous trophies wrung from Nature in closest contest. There are strange depths, doubtless, in the human soul,—recesses where the universal sunlight of reason fails us altogether; into which if we would enter, it must be humbly and trustfully, laying our right hands reverentially in God's, that he may lead us. There are faculties reaching farther than all reason, and utterances of higher import than hers,—problems, too, in the solution of which we shall derive very little aid from any mere mathematical considerations. Those who think differently should read once more, and more attentively, the sad history of frantic folly and limitless license, written down forever under the date, September, 1792, boastfully proclaimed to the world as the New Era, the year 1. of the Age of Reason. Perhaps the number of those who would to-day follow Momoro's pretty wife with loud adulation and Bacchanalian rejoicings to the insulted Church of Nôtre Dame, thus publicly disowning the God of the Universe and discarding the sweetest of all hopes, the hope of immortality and eternal youth after the weariness of age, would be found to be very small. This was indeed a new version of the old story of Godiva, wherein implacable, inhuman hate sadly enough took the place

of the sweet Christian charity of that dear lady. Let us recognize its deep significance, and acknowledge that many things of very great importance lie beyond the utmost limits of human reason.

But let us not forget, meanwhile, that within its own sphere this same Human Reason is an apt conjuror, marshalling and deftly controlling the powers of the earth and air to a degree wonderful and full of interest. And nowhere have all its possibilities so fully found expression in vast attainment as in those studies preëminently called the mathematics, as embracing all *μάθησις*, all sound learning. Casting about for some sure anchorage, drifting hither and thither over changeful seas of phenomena, a large body of men, deep, clear thinkers withal, some twenty-four centuries since, fancied that they had found *all* truth in the fixed, eternal relations of number and quantity. Hence that wide-spread Pythagorean philosophy, with its spherul harmonies and esoteric mysteries, uniting in one brotherhood for many years men of thought and action,—dare we say, our inferiors? Why allude to the old fable of the dwarf upon the giant's shoulders? Let us have a tender care for the sensitive nature of this ultimate Nineteenth Century, and refrain. They were not so far wrong either, those old philosophers; they saw clearly a part of the boundless expanse of Truth,—and somewhat prematurely, as we believe, pronounced it the true Land's End, stoutly asserting that beyond lay only barren seas of uncertain conjecture.

But mark what followed! Presently, under their hands, fair and clear of outline as a Grecian temple, grew up the science of Geometry. Perfect for all time, and as incapable of change or improvement as the Parthenon, appear the

Elements of Euclid, whose voice comes floating down through the ages, in that one significant rejoinder,—“*Non est regia ad mathematicam via.*” It is the reply of the mathematician, quiet-eyed and thoughtful, to the first Ptolemy, inquiring if there were not some less difficult path to the mysteries. But the Greek Geometry was in no wise confined to the elements. Before Euclid, Plato is said to have written over the entrance to his garden,—“Let no one enter, who is unacquainted with geometry,”—and had himself unveiled the geometrical analysis, exhibiting the whole strength and weakness of the instrument, and applying it successfully in the discussion of the properties of the Conic Sections. Various were the discoveries, and various the discoverers also, all now at rest, like Archimedes, the greatest of them all, in his Sicilian tomb, overgrown with brambles and forgotten, found only by careful research of that liberal-minded Cicero, and recognized only by the sphere and circumscribed cylinder thereon engraved by the dead mathematician’s direction.

Meanwhile, let us turn elsewhere, to that singular people whose name alone is suggestive of all the passion, all the deep repose of the East. Very unlike the Greeks we shall find these Arabs, a nation intellectually, as physically, characterized by adroitness rather than endurance, by free, careless grace rather than perfect, well-ordered symmetry. Called forth from centuries of proud repose, not unadorned by noble studies and by poesy, they swept like wildfire, under Mohammed and his successors, over Palestine, Syria, Persia, Egypt, and before the expiration of the Seventh Century occupied Sicily and the North of Africa. Spain soon fell into their hands;—only that seven-days’ battle of Tours, resplendent with many brilliant feats of arms, resonant with shoutings, and weightier with fate than those dusty combatants knew, saved France. Then until the last year of the Eleventh Century, almost four hundred years, the Caliphs ruled the Spanish Peninsula. Architect-

ture, music, astrology, chemistry, medicine,—all these arts, were theirs; the grace of the Alhambra endures; deep and permanent are the traces left by these Saracens upon European civilization. During all this time they were never idle. Continually they seized upon the thoughts of others, gathering them in from every quarter, translating the Greek mathematical works, borrowing the Indian arithmetic and system of notation, which we in turn call Arabic, filling the world with wild astrological fantasies. Nay, the “good Haroun Al Raschid,” familiar to us all as the genial-hearted sovereign of the World of Faëry, is said to have sent from Bagdad, in the year 807 or thereabout, a royal present to Charlemagne, a very singular clock, which marked the hours by the sonorous fall of heavy balls into an iron yase. At noon, appeared simultaneously, at twelve open doors, twelve knights in armor, retiring one after another, as the hour struck. The time-piece then had superseded the sun-dial and hour-glass; the mechanical arts had attained no slight degree of perfection. But passing over all ingenious mechanism, making no mention here of astronomical discoveries, some of them surprising enough, it is especially for the Algebraic analysis that we must thank the Moors. A strange fascination, doubtless, these crafty men found in the cabalistic characters and hidden processes of reasoning peculiar to this science. So they established it on a firm basis, solving equations of no inconsiderable difficulty, (of the fourth degree, it is said,) and enriched our arithmetic with various rules derived from this source, Single and Double Position among others. Trigonometry became a distinct branch of study with them; and then, as suddenly as they had appeared, they passed away. The Moorish cavalier had no longer a place in the history of the coming days; the sage had done his duty and departed, leaving among his mysterious manuscripts, bristling with uncouth, and, as the many believed, unholy signs, the

elements of truth mingled with much error,—error which in the advancing centuries fell off as easily as the husk from ripe corn. Whether the present civilization of Spain is an advance upon that of the Moors might in many respects become a matter of much doubt.

Long lethargy and intellectual inanition brooded over Christian Europe. The darkness of the Middle Ages reached its midnight, and slowly the dawn arose,—musical with the chirping of innumerable *trouvères* and minnesingers. As early as the Tenth Century, Gerbert, afterwards Pope Sylvester II., had passed into Spain and brought thence arithmetic, astronomy, and geometry; and five hundred years after, led by the old tradition of Moorish skill, Camille Leonard of Pisa sailed away over the sea into the distant East, and brought back the forgotten algebra and trigonometry,—a rich lading, better than gold-dust or many negroes. Then, in that Fifteenth Century, and in the Sixteenth, followed much that is of interest, not to be mentioned here. Copernicus, Galileo, Kepler,—we must pass on, only indicating these names of men whose lives have something of romance in them, so much are they tinged with the characteristics of an age just passing away forever, played out and ended. The invention of printing, the restoration of classical learning, the discovery of America, the Reformation, followed each other in splendid succession, and the Seventeenth Century dawned upon the world.

The Seventeenth Century!—forever remarkable alike for intellectual and physical activity, the age of Louis XIV. in France, the revolutionary period of English history, say, rather, the Cromwellian period, indelibly written down in German remembrance by that Thirty-Years' War,—these are only the external manifestations of that prodigious activity which prevailed in every direction. Meanwhile the two sciences of algebra and geometry, thus far single, each depending on its own resources, neither in consequence fully developed, as nothing of human or divine origin can be alone,

were united, in the very beginning of this epoch, by Descartes. This philosopher first applied the algebraic analysis to the solution of geometrical problems; and in this brilliant discovery lay the germ of a sudden growth of interest in the pure mathematics. The breadth and facility of these solutions added a new charm to the investigation of curves; and passing lightly by the Conic Sections, the mathematicians of that day busied themselves in finding the areas, solids of revolution, tangents, etc., of all imaginable curves,—some of them remarkable enough. Such is the cycloid, first conceived by Galileo, and a stumbling-block and cause of contention among geometers long after he had left it, together with his system of the universe, undetermined. Descartes, Roberval, Pascal, became successively challengers or challenged respecting some new property of this curve. Thereupon followed the epicycloids, curves which—as the cycloid is generated by a point upon the circumference of a circle rolled along a straight line—are generated by a similar point when the path of the circle becomes any curve whatever. Caustic curves, spirals without number, succeeded, of which but one shall claim our notice,—the logarithmic spiral, first fully discussed by James Bernouilli. This curve possesses the property of reproducing itself in a variety of curious and interesting ways; for which reason Bernouilli wished it inscribed upon his tomb, with the motto,—*Eadem mutata resurgo*. Shall we wisely shake our heads at all this, as unavailing? Can we not see the hand of Providence, all through history, leading men wiselier than they knew? If not, may it not be possible that we have read the wrong book,—the Universal Gazetteer, perhaps, instead of the true History? When Plato and Plato's followers wrought out the theory of those Conic Sections, do we imagine that they saw the great truth, now evident, that every whirling planet in the silent spaces, yes, and every falling body on this earth, describes one of these same curves which furnished to

those Athenian philosophers what you, my practical friend, stigmatize as idle amusement? Comfort yourself, my friend: there was many a Callicles then who believed that he could better bestow his time upon the politics of the state, neglecting these vain speculations, which to-day are found to be not quite unprofitable, after all, you perceive.

And so in the instance which suggested these reflections, all this eager study of unmeaning curves (if there be anything in the starry universe quite unmeaning) was leading gradually, but directly, to the discovery of the most wonderful of all mathematical instruments, the Calculus preëminently. In the quadrature of curves, the method of exhaustions was most ancient,—whereby similar circumscribed and inscribed polygons, by continually increasing the number of their sides, were made to approach the curve until the space contained between them was *exhausted*, or reduced to an inappreciable quantity. The sides of the polygons, it was evident, must then be infinitely small. Yet the polygons and curves were always regarded as distinct lines, differing inappreciably, but different. The careful study of the period to which we refer led to a new discovery, that every curve may be considered as composed of infinitely small straight lines. For, by the definition which assigns to a point position *without* extension, there can be no tangency of points without coincidence. In the circumference of the circle, then, no two of the points equidistant from the centre can touch each other; and the circumference must be made up of infinitely small rectilineal sides joining these points.*

A clear conception of this fact led almost immediately to the Method of Tangents of Fermat and Barrow; and this again is the stepping-stone to the Differential Calculus,—itself a particular application of that instrument. Dr. Barrow regarded the tangent as merely the prolongation of any one of these infinitely small sides, and demonstrated the

relations of these sides to the curve and its ordinates. His work, entitled "*Lectiones Geometricæ*," appeared in 1669. To his high abilities was united a simplicity of character almost sublime. "*Tu, autem, Domine, quantus es geometra!*" was written on the title-page of his Apollonius; and in the last hour he expressed his joy, that now, in the bosom of God, he should arrive at the solution of many problems of the highest interest, without pain or weariness. The comment of the French historian conveys a sly sarcasm on the Encyclopedists:—"*On voit au reste, par-là, que Barrow étoit un pauvre philosophe; car il croiroit en l'immortalité de l'âme, et une Divinité, autre que la nature universelle.*"*

The Italian Cavalleri had, before this, published his "*Geometry of Indivisibles*," and fully established his theory in the "*Exercitationes Mathematicæ*," which appeared in 1647. Led to these considerations by various problems of unusual difficulty proposed by the great Kepler, who appears to have introduced infinitely great and infinitely small quantities into mathematical calculations for the first time, in a tract on the measure of solids, Cavalleri enounced the principle, that all lines are composed of an infinite number of points, all surfaces of an infinite number of lines, and all solids of an infinite number of surfaces. What this statement lacks in strict accuracy is abundantly made up in its conciseness; and when some discussion arose thereupon, it appeared that the absurdity was only seeming, and that the author himself clearly enough understood by these apparently harsh terms, infinitely small sides, areas, and sections. Establishing the relation between these elements and their primitives, the way lay open to the Integral Calculus. The greatest geometers of the day, Pascal, Roberval, and others, unhesitatingly adopted this method, and employed it in the abstruse researches which engaged their attention.

* MONTUCLA. *Hist. des Math.* Part. iv. liv. 1.

And now, when but the magic touch of genius was wanting to unite and harmonize these scattered elements, came Newton. Early recognized by Dr. Barrow, that truly great and good man resigned the Mathematical Chair at Cambridge in his favor. Twenty-seven years of age, he entered upon his duties, having been in possession of the Calculus of Fluxions since 1666, three years previously. Why speak of all his other discoveries, known to the whole world? *Animi vi propè divinâ, planetarum motus, figuras, cometarum semitas, Oceanique æstus, suâ Mathesi lucem præferente, primus demonstravit. Radiorum lucis dissimilitudines, colorumque inde nascentium proprietates, quas nemo suspicatus est, pervestigavit.* So stands the record in Westminster Abbey; and in many a dusty alcove stands the "Principia," a prouder monument perhaps, more enduring than brass or crumbling stone. And yet, with rare modesty, such as might be considered again and again with singular advantage by many another, this great man hesitated to publish to the world his rich discoveries, wishing rather to wait for maturity and perfection. The solicitation of Dr. Barrow, however, prevailed upon him to send forth, about this time, the "Analysis of Equations containing an Infinite Number of Terms,"—a work which proves, incontestably, that he was in possession of the Calculus, though nowhere explaining its principles.

This delay occasioned the bitter quarrel between Newton and Leibnitz,—a quarrel exaggerated by narrow-minded partisans, and in truth not very creditable, in all its ramifications, to either party. Newton, in the course of a scientific correspondence with Leibnitz, published in 1712, by the Royal Society, under the title, "*Commercium Epistolicum de Analysisi promotâ*," not only communicated very many remarkable discoveries, but added, that he was in possession of the inverse problem of the tangents, and that he employed two methods which he did not choose to make public, for which reason he concealed them by anagram-

matical transposition, so effectual as completely to extinguish the faint glimmer of light which shone through his scanty explanation.* The reference is obviously to what was afterwards known as the Method of Fluxions and Fluents. This method he derived from the consideration of the laws of motion uniformly varied, like the motion of the extreme point of the ordinate of any curve whatever. The name which he gave to his method is derived from the idea of motion connected with its origin.

Leibnitz, reflecting upon these statements on the part of Newton, arrived by a somewhat different path at the Differential and Integral Calculus, reasoning, however, concerning infinitely great and infinitely small quantities in general, viewing the problem algebraically instead of geometrically,—and immediately imparted the result of his studies to the English mathematician. In the Preface to the first edition of the "Principia," Newton says, "It is ten years since, being in correspondence with M. Leibnitz, and having instructed him that I was in possession of a method of determining tangents and solving questions involving *maxima* and *minima*, a method which included irrational expressions, and having concealed it by transposing the letters, he replied to me that he had discovered a similar method, which he communicated, differing from mine only in the terms and signs, as well as in the generation of the quantities." This would seem to be sufficient to set at rest any conceivable controversy, establishing an equal claim to originality, conceding priority of discovery to Newton. Thus far all had been open and honorable. The petty complaint, that, while Leibnitz freely imparted his discoveries to Newton,

* This logograph Newton afterwards rendered as follows: "*Una methodus consistit in extractione fluentis quantitatis ex æquatione simul involvente; altera tantum in assumptione seriei pro quantitate incognitâ ex quâ ceteræ commodè derivari possunt, et in collatione terminorum homologorum æquationis resultantis ad eruendos terminos seriei assumptæ.*"

the latter churlishly concealed his own, would deserve to be considered, if it were obligatory upon every man of genius to unfold immediately to the world the results of his labor. As there may be many reasons for a different course, which we can never know, perhaps could never hope to appreciate, if we did know them, let us pass on, merely recalling the example of Galileo. When the first faint glimpses of the rings of Saturn floated hazily in the field of his imperfect telescope, he was misled into the belief that three large bodies composed the then most distant light of the system,—a conclusion which, in 1610, he communicated to Kepler in the following logograph:—

SMASMRMLMEPOETALEVMIBVYENOTTAVIRAVS.

It is not strange that the riddle was unread. The old problem, Given the Greek alphabet, to find an Iliad, differs from this rather in degree than in kind. The sentence disentangled runs thus:—

ALTISSEVM PLANETAM TERGEMINVM OBSERVAVI.

And yet we have never heard that Kepler, or, in fact, Leibnitz himself, felt aggrieved by such a course.

But Leibnitz made his discovery public, neglecting to give Newton *any* credit whatever; and so it happened that various patriotic Englishmen raised the cry of plagiarism. Keil, in the "Philosophical Transactions" for 1708, declared that he had published the Method of Fluxions, only changing the name and notation. Much debate and angry discussion followed; and, alas for human weakness! Newton himself, in a later edition of the "Principia," struck out the generous recognition of genius recorded above, and joined in terming Leibnitz an impostor, —while the latter maintained that Newton had not fathomed the more abstruse depths of the new Calculus. The "Commercium Epistolicum" was published, giving rise to new contentions; and only death, which ends all things, ended the dispute. Leibnitz died in 1716.

The Calculus at first found its chief supporters on the Continent. James and John Bernoulli, Varignon, author of the "Theory of Variations," and the Marquis

de l'Hôpital, were the first to appreciate it; but soon it attracted the attention of the scientific world to such a degree that the frivolous populace of Paris had even a well-known song with the burden, "*Des infiniment petits*." Neither were opponents wanting. Wrong-headed men and thick-headed men are unfortunately too numerous in all times and places. One Nieuwentiit, a dweller in intellectual fog-banks, who had distinguished himself by proving the existence of the Deity in one of his works, made about this time what he doubtless considered a second discovery. He found a flaw in the reasoning of Leibnitz, namely, that *he* (Nieuwentiit) could not conceive of quantities infinitely small! A certain Chever also performed sundry singular mathematical feats, such as squaring the circle, a problem which he reduced to the single question, *Construere mundum divinæ menti analogum*, and showing that the parabola, the only conic section squared by ancient or modern geometers, could never be quadrated, to the eternal discomfiture and discredit of the shade of Archimedes. Leibnitz used every means in his power to engage these worthy adversaries in a contest concerning his Calculus, but unfortunately failed. Bishop Berkeley, too, author of the "Essay on Tar-Water," devout disbeliever in the material universe, could not resist the Quixotic inclination to run a tilt against a science which promised so much aid in unveiling those starry splendors which he with strenuous asseveration denied. He published, in 1754, "The Minute Philosopher," and soon after, "The Analyst, or the Discourse of a Mathematician," showing that the Mathematics are opposed to religion, and cultivate an incredulous spirit, —such as would never for a moment listen, let us hope, to any theory which proclaims this green earth and all the universe "such stuff as dreams are made of," even though the doctrine be ecclesiastically sustained and backed with abundant wealth of learning. Numerous were the defenders, called out rather by the acknowledged metaphysical ability of

Bishop Berkeley than by any transcendent merit in these two tracts; and among others came Maclaurin.

Taylor's Theorem, based upon that first published by Maclaurin, is the foundation of the Calculus by La Grange, differing from the methods of Leibnitz and Newton in the manner of deriving the auxiliaries employed, proceeding upon analytical considerations throughout. Of his "*Théorie des Fonctions*," and that noblest achievement of the pure reason, the "*Mécanique Analytique*," we do not propose to speak, nor of the later developments of the Calculus, so largely due to his genius and labors. These are mysteries, known only to the initiated, yet capable of raising their thoughts in as sublime emotion as arose from the view of the elder, forgotten mysteries, which Cicero deemed the very source and beginning of true life.

We have seen how, and through whose toil, this mightiest instrument of human thought has reached its present perfection. Now, its vast powers fully recognized, it has become interwoven with all Natural Philosophy. On its sure basis rests that majestic structure, the "*Mécanique Céleste*" of La Place. Its demonstration supports with undoubted proof many doctrines of the great Newton. Discovery has succeeded discovery; but its powers have never yet been fully tested. "It is that field of mathematical investigation," says Davies, "where genius may exert its highest powers and find its surest rewards." Looking back through the long course of events leading to such

a magnificent result, looking up to that choral dance of wandering planets, all whose courses and seasons are marked down for us in the yearly almanac, can we not find in these manifestations something on the whole quite wonderful, worthy of very deep thankfulness, heartfelt humility withal, and far-reaching hope?

In an age of many-colored absurdity, when extremes meet and contradictions harmonize,—when men of gross, material aims give implicit confidence to the wildest ravings of the supernatural, and pure-minded men embrace French theories of social organization,—when crowds of dullards all aflame with unexpected imagination assemble in ascension-robcs to await the apocalyptic trump, and Asiatic polygamy spreads unmolested along our Western rivers,—when the prediction is accomplished, "Old men dream dreams and young men see visions," and the most practical of the ages bids fair to glide ghostly into history as the most superstitious,—it is well, it can but be well, to contemplate reverently that Reason, which Coleridge, after Leighton, calls "an influence from the Glory of the Almighty." In the contemplation of the spirit of man (not your *animula*, by any means!) there is earnest of immortality which needs not that one rise from the dead to confirm it. In view of the Foresight which guides men, we may trust that all this tumultuous sense of inadequacy in present institutions, this blind notion of wrong, far enough from intelligent correction, is, after all, better than sluggish inaction.

BULLS AND BEARS.

[Concluded.]

CHAPTER XXX.

THE suspension of specie payments brought instant relief to all really solvent mercantile houses; since those who had valuable assets of any kind could

now obtain discounts sufficient to enable them to meet their liabilities. Among those who were at once relieved was the house of Lindsay and Company; they resumed payment and recommenced busi-

ness. Mr. Lindsay lost no time in finding his clerk Monroe, and reinstated him with an increased salary. Great was the sorrow in the ragged school at the loss of the teacher; and it was with some regret that he abandoned the place. He felt no especial vocation to the career of a missionary; but his duties had become less irksome than at the beginning, if not absolutely pleasant. His own position, however, was such that he could not afford to continue in his self-denying occupation. Easelmann was one of the first to congratulate him upon his improved prospects.

"Don't you feel sorry, my dear fellow? Now you get upon your treadmill of business, and you must keep going, or break your legs. Think, too, of the jolly little rascals you have left! The beggars are the only aristocracy we have,—the only people who enjoy their *dolce far niente*. Look on the Common: who are there amusing themselves on a fine day, unless it be your Duke Do-nothing, Earl Out-at-elbows, Duchess Draggie-tail, and others of that happy class? Meanwhile your Lawrences, Eliots, and the "Merchant Princes" (a satirical dog that invented the title!) are going about with sharpened faces, looking as though they weren't sure of a dinner. Oh, business is a great matter, to be sure! but the idlers, artists, poets, and other lazzaroni, are the only people that enjoy life."

Monroe smiled, and only replied,—

"Think of my mother! I must do something besides enjoying life, as you call it: I must earn the means of making it enjoyable."

"You were always a good boy," replied his friend, benignantly. "So go to work; but don't forget to walk out of town now and then; in which case, I hope you won't disdain the company of *one* of the idlers."

The "mother" was full of joy; her melancholy nervousness almost wholly forsook her. She looked proudly upon her "dear boy," thinking him the best, most considerate, faithful, and affectionate of sons,—as he was.

Walter, after listening to her benedictions, told her he had an invitation from Mr. Lindsay to dine the next day, and begged her to go with him; but the habit of inaction, the dread of bustle and motion, were too strong to be overcome. She could not be persuaded to leave home.

"But go, by all means, Walter," she added. "It will be pleasant to be on such terms with your employer. I must keep watch of you, though, now that Alice is gone. Are there young ladies at the house?"

"Why, mother, how jealous you are! Do you think I go about falling in love with all the young ladies I see? Mr. Lindsay has a beautiful daughter; but do you think a poor clerk is likely to be regarded as 'eligible' by a family accustomed to wealth and luxury?"

The mother looked as though she thought her son a match for the richest and proudest; she said nothing, but patted his head as though he were still only a boy.

"Speaking of Alice, mother, I am very much concerned about her. Now that I am reestablished, I shall make every exertion to find her and bring her home to live with us. Mr. Greenleaf, I know, is looking for her; very little good it will do him, if he finds her."

"But we shall hear from him, I presume?"

"I think so. He is intimate with my friend Mr. Easelmann.—But, mother, I have some more good news. I shall get our property back. Lawyers say that Mr. Tonsor will be obliged to give up the notes, and look to the estate of Sandford for the money he lent. And the notes, fortunately, are as valuable as ever, in spite of all the multitude of failures; one name, at least, on each note is good."

"Everything comes back, like Job's prosperity. This repays us for all our anxiety."

"If Alice had not run away!"

"But we shall have her again,—poor motherless child!"

So with mutual gratulations they passed the evening. My readers who now enjoy a mother's love, or look back with affectionate reverence to such scenes in the past, will pardon these apparently unimportant portions of the story. Sooner or later all will learn that no worldly success whatever, no friendships, not even the absorbing love of wife and children, can afford a pleasure so full, so serene, as the sacred feeling which rises at the recollection of a mother's self-sacrificing affection.

Very commonplace, no doubt,—but still worth an occasional thought. As for those who demand that natural and simple feelings shall be ignored, and that every chapter shall record something not less startling than murder or treason, are there not already means for gratifying their tastes? Do not the "Torpedo" and the "Blessing of the Boudoir" give enough of these delicate condiments with the intellectual viands they furnish? Let old-fashioned people enjoy their plain dishes in peace.

CHAPTER XXXI.

THE reader may be quite sure that Greenleaf lost no time in presenting himself at Easelmann's studio on the morning after his last interview.

"On hand early, I see," said the elder. "And how fresh you look! The blood comes dancing into your face; you are radiant with expectation."

"You mummy, what do you suppose I am made of, if the thought of meeting Alice should not quicken my blood a little?"

"If it were my case, I think my cheeks would tingle from another cause."

"Now you need not try to frighten me. I will see her first. I don't believe she has forgotten me."

"Nor I; but forgetting is one thing, and forgiving is another. Besides, we haven't seen her yet."

"I haven't, I know; but I'll wager you have."

"Well, my Hotspur, I sha'n't entice her away from you."

"Let us go," said Greenleaf.

"Presently; I must finish this pipe first; it lasts thirty-six minutes, and I have smoked only—let me see—twenty-eight."

"Well, puff away; but you'll burn up my patience with your tobacco, unless you are ready soon."

"Don't hurry. You'll get to your stool of repentance quite soon enough. Have you heard the news? The banks have suspended,—ditto Fletcher, a banker's clerk."

"What do you mean?"

"Plain enough. The banks suspend paying specie because they haven't any to redeem their bills; and Fletcher, because he has neither specie nor bills."

"Fletcher suspended?"

"Yes, *sus. per coll.*, as the Newgate records have it,—hung himself with his handkerchief,—an article he might have put to better use."

And Easelmann blew a vigorous blast with his, as he laid down the pipe.

"You understand, choking is disagreeable,—painful, in fact,—and, if indulged in long enough, is apt to produce unpleasant effects. Remember, I once warned you against it."

"This matter of suicide is horrible. Couldn't it have been prevented?"

"Yes, if Fletcher could have got hold of Bullion."

"Coin would have done as well, I suppose."

"Now haven't I been successful in diverting your attention? You have actually punned. Don't you know Mr. Bullion, the capitalist?"

"I have good reason to remember him, though I don't know him myself. My father was once connected with him in business, and not at all to his own advantage."

"I never heard you speak of your father before; in fact, I never knew you had one."

"It was not necessary to speak of him; he has been dead many years."

"And left you nothing to remember him by. Now a man with an estate has a perpetual reminder."

"So has the son of a famous man; and people are continually depreciating him, comparing his little bud of promise with the ripe fruitage of the ancestral tree. I prefer to acquire my own fortune and my own fame. My father did his part by giving me being and educating me.—But come; your pipe is out; you draw like a pump, without puffing even a nebula of smoke."

"I suppose I must yield. First a lavation; this Virginian incense is more agreeable to devout worshippers like you and me than to the uninitiated. There," (wiping the water from his moustaches,) "now I am qualified to meet that queenly rose, Mrs. Sandford, or even that delicate spring violet of yours,—if we should find the nook where she blooms."

"You are the most tantalizing fellow! How provokingly cool you are, to stand dallying as though you were going on the most indifferent errand! And all the while to remind me of what I have lost. Come, you look sufficiently fascinating; your gray moustache has the proper artistic curl; your hair is carelessly-well-arranged."

"So the boy can't wait for due preparation. There, I believe I am ready."

Arrived at the house where Mrs. Sandford boarded, they were ushered into the reception-room; but Easemann, bidding his friend wait, followed the servant upstairs. Waiting is never an agreeable employment. The courtier in the ante-chamber before the expected audience, the office-seeker at the end of a cue in the Presidential mansion, the beau lounging in the drawing-room while the idol of his soul is in her chamber busy with the thousand little arts that are to complete her charms,—none of these find that time speeds. To Greenleaf the delay was full of torture; he paced the room, looked at the pictures without seeing anything, looked out of the window, turned over the gift-books on the table, counted the squares in the car-

pet, and finally sat down in utter despair. At length Easemann returned. Greenleaf started up.

"Where is she? Have you seen her? Why doesn't she come down? And why, in the name of goodness, have you kept me waiting in this outrageous way?"

"I don't know.—I have not.—I can't tell you.—And because I couldn't help it.—Never say, after this, I don't answer all your questions."

"Now, what is the use of all this mystery?"

"Softly, my friend; and let us not make a mess of it. Mrs. Sandford advises us to walk out awhile."

"I am obliged to her and to you for your well-meant caution, but I don't intend to go out until I have seen Alice,—if she will see me."

"But consider."

"I have considered, and am determined to see her; I can't endure this suspense."

"But Alice bore it much longer. Be advised; Mrs. Sandford wants to prepare the way for you."

"I thank you; but I don't mean to have any stratagem acted for my benefit. I will trust the decision to her: if she loves me, all will be well; if her just resentment has uprooted her love, the sooner I know it the better."

While they were engaged in this mutual expostulation, Alice, all-unconscious of the impending situation in the drama, was busy in her own room,—for Mrs. Sandford had not yet decided how to break the news to her,—and having an errand that led her to the street, she put on her cloak and hat and tripped lightly down-stairs. Naturally she went into the drawing-room, to make sure, by the mirror, that her ribbons were neatly adjusted. As she entered, fastening her cloak, and humming some simple air meanwhile, she started back at the sight of strangers, and was rapidly retreating, when a voice that she had not forgotten exclaimed, "Great Heavens, there she is now! Alice! Alice! stop! I beg of you!"

Greenleaf at the same time bounded to the door, and, seizing her hand, drew her, bewildered, faint, and fluttering, back into the room.

He turned almost fiercely to his companion:—

"This is your policy, is it, to send her off?—or, more probably, to amuse me and not send for her at all?"

"Ask the lady,—ask Mrs. Sandford," replied Easelmann. "I have not sent her off; and you ought to know by this time that I am incapable of playing false to any man."

Alice, erect, but very pale, maintained her composure as well as she could, though the timid lips trembled a little, and blinding clouds rose before her eyes. She withdrew her hand from Greenleaf's grasp, and asked the meaning of this unusual conduct. Greenleaf's good sense came to the rescue seasonably.

"Alice,—Miss Lee,—allow me to introduce my friend Mr. Easelmann. We came here to see you, and were waiting for that purpose; but it seems you were not told of it."

Easelmann bowed, saying, "No, Miss Lee; I saw Mrs. Sandford, who thought it best to speak to you first herself."

"I am happy to meet you, Mr. Easelmann," said Alice. "I was just going out, however, as you see, and I must ask you to excuse me this morning."

Greenleaf saw with a pang how silently, but effectually, he was disposed of; a downright rebuff would not have been so humiliating. But he was not to be deterred from his purpose, and he went on:

"Pardon me, if I seem to overstep the bounds of courtesy; but I cannot let you go in this way, Alice,—for so I must call you. Stay and hear me. Now that I see you, I must speak. God only knows with what anxiety I have sought you for the last month."

She tried to answer, but could not command her speech. Seeing her increasing agitation, Easelmann led her to a seat, and then, in a gentler tone than he often used, said,—

"I will leave the room, if you please,

Miss Lee; this is an interview I did not desire to witness."

"No," she exclaimed, "do not go. I have nothing to say that you should not hear; and I hope Mr. Greenleaf will spare me the pain of going over a history which is better forgotten."

"It can never be forgotten," interposed Greenleaf; "and, in spite of your protest, I must say what I can—and that is little enough—to exculpate myself, and then throw myself upon your charity for forgiveness."

Alice remained silent; but it was a silence that gave no encouragement to Greenleaf. He advanced still nearer, looking at her with a tender earnestness, as though his very soul were in the glance. She covered her face with her hands.

"Alice," he said, "you know what that name once meant to me. I cannot speak it now without a feeling beyond utterance."

Easelmann, meanwhile, quietly sidled towards the door, and, saying that he was going back to see Mrs. Sandford, abruptly left the room.

Greenleaf went on,—*"I know my conduct was utterly inexcusable; but I declare, by my hope of heaven, I never loved any woman but you. I was fascinated, ensnared, captivated by the senses only; now that illusion is past, and I turn to you."*

"My illusion is past also; you turn too late. Can you make me forget those months of neglect?"

The tone was tender, but mournful. How he wished that her answer had been fuller of rebuke! He could hope to overcome her anger far more easily than this settled sorrow.

"I know I can never atone for the wrong; there are injuries that are irreparable, wounds that leave ineffaceable scars. I can never undo what I have done; would to Heaven I could! You may never forget this period of suffering; but that is past now; it is not to be lived over again. Go back rather to the brighter days before it; think of them,

and then look down the future;—may I dare say it?—the future, perhaps, will make us both forget my insane wanderings and your undeserved pains.”

“But love must have faith to lean upon. While I loved you, I rested on absolute trust. I would have believed you against all the world. I would have been glad to share your lot, even in poverty and obscurity. I did not love you for your art nor your fame. You wavered; you forgot me. I don’t know what it was that tempted you, but it was enough; it drew you away from me; and as long as you preferred another, or could be satisfied with any other woman’s love, you lost all claim to mine.”

Greenleaf could not but feel the force of this direct, womanly logic; in its clear light how pitiful were the excuses he had framed for himself! He felt sure that many, even of the best of men, might have erred in the same way; but this was an argument which would have much more weight with his own sex than with women. Men know their own frailties, and are therefore charitable; women consider inconstancy to be the one unpardonable sin, and are inexorable.

He came still nearer, vainly hoping to see some indication of relenting; but the pale face was as firm as it was sad.

“I said before, Alice, that I do not attempt to defend my faithlessness, hardly to extenuate it; and I do not at all wonder at your altered temper towards me. It was a cruel blow I gave you. But my life shall show you the sincerity of my repentance.”

She shook her head as she answered,—
“When you left me, the last spark of love went out. It is hard to kindle anew the dead embers. No,—when I found that you *could* be untrue, all was over,—past, present, and future.”

“But consider,” he said, still more earnestly, “what remains for you or me. You will have the memory of this great sorrow, and I the unending remorse. I can never love another woman while you live, and you—may I say it?—will never love again as you have loved. Is

it not for your own happiness, as it is most assuredly for mine, that you overlook the fault, receive me again, and trust to the lasting effect of the bitter lesson I have learned? Forgive me, if I seem too bold,—if the desire to atone for the past makes me sue for pardon with unbecoming zeal. If I were less urgent, it would be because I was not sensible of the wrong, and careless about reparation.”

She was silent; contending passions strove for mastery. She had not forgotten him, then! He took courage and came yet nearer.

“Will you give me your hand? Alice, will you?”

He reached his own towards her.

“No,—pardon me,—I must not. It is not well to decide by impulse,—to be swayed by a thrill. When my heart tells me to give you my hand, it shall be yours. I don’t wish to be charmed out of my calmer judgment. Your presence, your fiery words, and your will, are sufficiently magnetic.”

“My dear Alice, I have been guilty of *one* folly, a serious one, but you don’t believe I am incapable of constancy henceforth. Remember you were away; time hung heavily on my hands; my good-nature made me accept invitations which brought me into daily contact with a woman who of all others was most dangerous to a man of ardent temperament. The friendship which began without a thought of a nearer relation grew into an intimacy which I was not far-sighted enough to check. In your own words, I was magnetized, thoroughly; and when, at last, in a scene of imminent danger, I rashly said some things that should not have been spoken, I found myself committed irrevocably. It is not too much to say that the lady was looking for the opportunity which fate and my own stupidity gave her. But the spell did not last. Your face was constantly before me like an accusing angel. I waited only until the lady recovered from a dangerous illness to tell her that I did not love her, and that my heart, as well as my faith, was yours. I went at once to see you,

and found your father dead, yourself homeless. And from that hour I have done nothing but search for you. Is it in vain?—I can say no more. Perhaps I have said too much. But I implore you, Alice, by the memory of our love as it was once, by all your hope of the future, to forgive me, and not to make my whole life as miserable as the last few months have been to you.”

It was the last word; he felt that he had nothing further to urge. He bent over her chair, seized her hand and pressed it passionately to his lips, watching with the intensest eagerness the effect of his appeal.—There was a rustle of silk behind him, an incoming of perfumes, a light footstep. He started, as did Alice, and beheld—Miss Marcia Sandford! She was tastefully dressed, as usual, and she bore herself with superb composure. In coming from the sunlight into the semi-translucent gloom which pervades modern drawing-rooms, people are not easily recognized, and the lady swept majestically across the floor, and took a seat, without a sign of consciousness, near the couple whose conversation she had interrupted.

Not so Greenleaf; it was the most dangerous dilemma in which he had ever been placed, and he was thoroughly at a loss to know how to extricate himself. Would that he could telegraph to Easemann to come down, so that he could effect a decent retreat, and not leave the field in the sole possession of the enemy. The silence was becoming embarrassing. He was about to make some excuse for departure, when the lioness fixed her eyes upon him,—her glance sparkling with malicious joy. A servant entered to say that Mrs. Sandford was engaged for a few minutes, and that she wished to know the name of her visitor.

“Miss Sandford,” she replied, “and please tell her I will wait.”

Alice remembered the name, and now shared fully in Greenleaf’s embarrassment. She watched him, therefore, keenly, while the lady began,—

“Oh, Mr. Greenleaf, is it you? Why

didn’t you speak? It is not worth while to keep a memory of the old disappointment. Let bygones be bygones. Besides, I see you know the remedy for heartbreak; if you can’t succeed where you would, you must try elsewhere. And you seemed to be getting on very well when I came in.”

“Miss Sandford,” he retorted, indignantly, “there is as little need of your ironical condolence as of your ungenerous insinuations.”

“What an impatient fellow! and so sensitive, too! The wound is not healed, then. Pray introduce me to the Zerlina in our little opera. As I know you so well, I can give her some excellent counsel about managing you.—Ah, you wince! I am indiscreet, I fear; I have betrayed a secret; the Zerlina is perhaps still in her rustic seclusion, and this is only— Well, you must submit to your destiny, I suppose. How many are there since? Let me see,—six weeks,—time for three flirtations of the most intensely crimson hue.”

Alice rose to her feet, with a glow of resentment on her hitherto pale face. And Greenleaf, feeling that courtesy was now wholly unnecessary, exclaimed,—

“Miss Sandford, you have said quite as much as was proper for a young girl to hear: your own cheeks, I presume, are proof against any indelicate surprise. Let me ask you to stop, before”——

“Before what, Sir? And what is this high-and-mighty innocence about? To be sure, one does not like to be exposed,—that is, the wolf doesn’t,—though the lamb shouldn’t be angry. A pretty lamb it is, too.”

Alice gradually drew away from Greenleaf’s side, turning her glances from one to the other of the combatants. She had never seen such confidence, such readiness of invective, joined with such apparent sincerity and ease of manner; and the evident effect of the attack upon Greenleaf puzzled her not a little; in this brief colloquy there were opened new fields for dark conjecture. The woman’s words had been barbed arrows in her ears.

Greenleaf's perplexity increased momentarily. He dared not go away now; and he knew not how, in Miss Sandford's presence, to counteract the impression she might make. If he could get rid of her or shut her wickedly-beautiful mouth, he might answer all she had so artfully thrown out. But as Alice had not given any token of returning affection, he could not presume upon his good standing with her and remain silent. Growing desperate, he ventured once more.

"Miss Sandford, I know very well the depth of your hate towards me, as well as your capacity for misrepresentation. If you desire to have the history of our intimacy dragged to the light, I, for my part, am willing. But don't think your sex will screen you, if you continue the calumnies you have begun.—You, Alice, must judge between us. And in almost every point, Mrs. Sandford, your friend and her sister-in-law, will be able to support my statements."

The servant returned to say that "Mrs. Sandford must be excused."

Greenleaf turned upon the adversary with a triumphant glance.

"A palpable trick," she exclaimed. "You gave the servant a signal: you were unwilling to have us confronted. You have filled her ears with scandal about me."

"Not a word; she can hear a plenty about you in any circle where you are known, without coming to me. And so far from giving any signal, I should be rejoiced to show Alice how easily an honest woman's testimony will put your monstrous effrontery to shame."

Alice here interposed,—her resolute spirit manifest in spite of her trembling voice,—

"I have heard this too long already. I don't wish to be the subject of this lady's jests, and I don't desire her advice. Your quarrel does not concern me,—at least, not so deeply that I wish to have it repeated in my presence. Mr. Greenleaf, let me bid you good-morning."

She moved away with a simple dignity,

bowing with marked coolness to the former rival.

"Stay, Alice," said Greenleaf. "Let me not be thrust aside in this way. Miss Sandford, now that she has done what mischief she can, will go away and enjoy the triumph. I beg of you, stay and let me set myself right."

Miss Sandford laughed heartily,—a laugh that made Greenleaf shiver.

"Not to-day, Mr. Greenleaf," she answered. "I have need of rest and reflection. I am not used to scenes like this, and my brain is in a whirl."

The first flush of excitement was over, and it was with difficulty that she found her way through the hall. Eäselmann was coming down, and saw her hesitating step and her tremulous grasp upon the rail; he sprang down four steps at a time, caught her before she fell, and carried her in his arms like a child up to Mrs. Sandford's room.

Greenleaf was so completely absorbed by the danger of losing the last hold upon Alice, that he forgot his most excusable anger against the vindictive woman who still lingered, enjoying her victory. He sank into a chair, buried his face in his hands, and for some time neither looked up nor replied to her taunts.

"Come, now," said she, "don't take it so hard. Is my handsome sister-in-law obdurate? Never mind; don't be desolate; other women will be kind,—for you are just the man to attract sentimental damsels. Cheer up! you will find a new affinity before night, I haven't a doubt."

Roused at length, Greenleaf stood up before the mocking fiend, so radiant in her evil smiles, and said,—

"You enemy of all that is good, what brought you here? Keep in your own sphere, if there is one for you in this world."

"I came to see my sister, as you know. It was a most unexpected pleasure to meet you. I came to tell her that brother Henry has either run away or killed himself, it doesn't matter which."

"Pray, follow him. I assure you we

shall mourn your absence as bitterly as you do his."

"Well, good-bye," she said, still laughing in the same terrible tone. "Better luck next time."

The door closed upon her, and Greenleaf drew a long breath with a sense of infinite relief.

"Come," said Easemann, entering a moment later,—“come, let us go. We have done quite enough for one day. You wouldn't take my advice, and a pretty mess you have made of it."

CHAPTER XXXII.

WHEN the remains of John Fletcher were borne to the grave, the memory of his faults was buried with him. "Poor fellow!" was the general ejaculation in State Street,—at once his *requiescat* and epitaph. But the great wheels of business moved on; Bulls and Bears kept up their ever-renewing conflicts and their secret machinations; new gladiators stepped into the ring; new crowds waited the turn of the wheel of Fortune; and new Fletchers were ready to sacrifice themselves, if need were, for the Bullions of the exchange. Who believes in the efficacy of "lessons"? What public execution ever deterred the murderer from his design? What spectacle of drunkenness ever restrained the youthful debauchee? What accession, however notable, to the ranks of "the unfortunate" ever made the fascinated woman pause in her first steps toward ruin?

No,—human nature remains the same; and the erring ones, predestined to sin by their own unrestrained passions, wait only for the overmastering circumstances to yield and fall. When any of these solemn warnings are held up to the yet callow sinner, what does he propose to do? To stop and repent? No,—to be a little more careful and not be caught.

Not that precepts and examples are useless. All together go to make up the moral government of the world,—pervading like the atmosphere, and like it

resting with uniform pressure upon the earth. Crime and folly will always have their exemplars, but retribution furnishes the restraining influence that keeps evil down to its average. As locks and bolts are made for honest men, not for thieves, so the moral law and its penalties are for those who have never openly sinned.

If Mr. Bullion had been ten times the Shylock he was, he could not have disregarded the last injunction of Fletcher. The turn in the market enabled him to make advantageous sales of his stocks, and in less than a week he resumed payment. The first thing he did was to pay over to trustees the notes he had given Fletcher, thereby securing the widow at least a decent support. He also sent Danforth & Co. the ten thousand dollars for which their clerk had paid such a terrible forfeiture. After discharging all his obligations, there was still an ample margin left,—a large fortune, in fact. Mr. Bullion could now retire with comfort,—could look forward to many years; so he flattered himself. His will was made, his children provided for; and some unsettled accounts, not remembered by any save himself and the recording angel, were adjusted as well as the lapse of time would allow. So he thought of purchasing a country-house for the next season, and of giving the rest of his days to the enjoyment of life.

But it was not so to be. A swift and sudden stroke smote him down. In the dead of night, and alone, he met the angel for whose summons all of us are waiting, and went his way without a struggle. The morning sun, as its rays shot in between the blinds, lighted the seamed and careworn face of an old man, resting, as in a serene, dreamless sleep.

Mr. Tonsor found, on consulting the best legal authorities, that he could not maintain his claim upon the notes he had received of Sandford; and, rather than subject himself to the expense of a lawsuit in which he was certain to be beaten, he relinquished them to Monroe,

and filed his claim for the money against Sandford's estate. Ten *per cent.* was the amount of the dividend he received; the remainder was charged to Profit and Loss,—Experience being duly credited with the same amount.

It was with the greatest difficulty that the judicious Easelmann prevented his friend from making a second visit in the evening of the same day. Greenleaf had come to a full conviction, in his own mind, that his difference with Alice ought to be settled, and he could not conceive that it might take time to bring her to the same conclusion. Some people adapt themselves to circumstances instantly; the aversion of one hour becomes the delight of the next; but those who are guided by reasoning, especially where there is a shade of resentment,—who are fortified by pride of opinion, and by the idea of consistent self-respect,—such persons are slow to change a settled conviction; the course of feeling is too powerful and too constant to be arrested and turned backward. Easelmann thought—and perhaps rightly—that Alice needed only time to become accustomed to the new view of the case; and he believed that any precipitation might be fatal to his friend's hopes.

"Give her the opportunity to think about it," he said; "if she loves you, depend upon it, the wind will change with her. Due east to-day, according to all you have told me; and the violets won't blossom till the sun comes out of the sullen gray cloud and the south wind breathes on them.—The very contact with a lover, you see, makes me poetical."

"But her thoughts may take another direction. Who can tell what impression that malicious vixen has made upon her?"

"Alice, I fancy, is a sensible young woman; and Miss Sandford, in her rage, must have shown her hand too freely. To be sure, Alice might wonder how you could ever have been captivated; but she could not blame you for getting out of

reach of such a Tartar. Besides, the exemplary widow is your friend, you know, and I'll warrant that she will set the matter right. Marcia won't trouble you again; such a mischance couldn't happen twice. You are as safe as the sailor who put his head into the hole where a cannon-shot had just come through. Lightning doesn't strike the same tree twice in one shower."

Greenleaf was at length persuaded to wait and let events take their course. If he remained inactive, however, Easelmann did not; from Mrs. Sandford he heard daily the progress of affairs, and at length intimated to his friend that it might be judicious to call again.

Once more Greenleaf was seated in the drawing-room of the boarding-house. At every distant footstep his heart beat almost audibly; and when at last the breezy rustle of a woman's robes came in from the hall, he thought, as many a man has, before and since,—

"She is coming, my life, my fate!"

She entered, not with the welcoming smile he would have liked to see, nor with the forbidding cloud of sadness which veiled her face a few days before. But how lovely! Time had given fullness and perfection to her beauty, while the effect of the trials she had undergone was seen only in the look of womanly dignity and self-control she had acquired. It was the freshness of girlhood joined to the grace of maturity.

Nothing is more inscrutable than the working of the human will; argument does not reach it, nor does persuasion overcome it. It holds out against reason, against interest, against passion; no sufficient motive can be found with which to control it. On the other hand, it sometimes stoops in a way that defies prediction; pride is vanquished or disarmed, resentment melts away like frost, and the resolution that at first seemed firm as the everlasting rock proves to be no barrier. Nor is this uncertainty confined to the sex at whose foibles the satirists have been wont to let fly their arrows.

Feeling is deeper than thought; and as the earthquake lifts the mountain with all the weight of its rocky strata and of the piled-up edifices that crown its top, so there comes a time when the emotional nature rises up and overthrows the carefully wrought structures of the intellect, and asserts its original and supreme mastery over the soul of man.

Alice felt sure that every trace of her love for Greenleaf had disappeared. She looked in her heart and saw there only the memory of neglect and unfaithfulness. If love existed, it was as fire lurks in ashes, unrecognized. She had conversed freely with Mrs. Sandford, and learned that Greenleaf's version of the story was the correct one. Still the original treason remained without apology; and she had determined to express her regret for what had happened, to assure him of her friendship, but to forbid any hope of reëstablishing their former relations. With this intention, she bade him good-morning and quietly took a seat.

"I did not think that so many days would pass before I should see you; but now that you have had time to reflect, I hope your feelings have softened towards me."

"You mistake, if you suppose that giving me time for reflection has produced any such change."

"Then, pray, forget the past altogether."

"I cannot forget."

"If your memory must be busy, pray, go back to the pleasanter days of our acquaintance."

"I remember the days you speak of; I shall never forget them; but it is a happiness that is dead and buried."

"Love will make it live again."

"It is hard to recognize love when it comes like Lazarus from the tomb."

"Still we don't read that the friends of Lazarus were displeased with his return and wished him back to his grave-clothes."

"You can turn the comparison as you choose; but it is not necessary that an illustration should be perfect in every

respect; if one catches a gleam of resemblance, it is enough."

The perfect command of her faculties, and the deliberate way in which she sustained her part in the conversation, thus far, were sufficiently disheartening to Greenleaf. He longed to change the tone, but feared to lose all by any rapid advance. He answered deprecatingly,—

"But all this intellectual fencing, my dear Alice, is useless. Love is not a spark to be struck out by the collision of arguments; I shall in vain try to *reason* you into affection for me. I have already said all I can say by way of apology for what I have done. If there yet lingers any particle of regard for me in your heart, I would fain revive it. If it is your pride that withstands me, I pray you consider whether it is well to make us both unhappy in order to maintain so poor a triumph. I am already conquered, and throw myself upon your generosity."

"You would put me in the wrong, then, and ascribe my refusal to an ungenerous pride? Is it generous in you to do so? Have you the right to place such a construction upon my conduct? I appeal to you in return. Remember, it is you who are responsible for this painful interview. I never sought you to cover you with reproaches. You force me to say what I would gladly leave in silence."

"Forgive me, Alice, if I wrong you; but my heart clings to you and will not be repulsed. I would fain believe, that, beneath all your natural resentment, there yet survives some portion of the love you once bore to me. If it were the first time I had ever approached you, a sense of delicacy, to say nothing of my own self-respect, would have prevented my importuning you in this way. But my fault has given me warrant to be bold, and if you finally cast me off,—but that is what I won't anticipate; I can't give you up. You once loved me,—and am I not the same?"

"No, not the same; or, rather, you have proved to be not what I thought."

"You persist in fixing your attention upon one dark spot. Do you remember this miniature? It has never been out of my bosom, and there has never been but one day in which I might not loyally carry it there. At that time, when I opened it, your eyes looked out at me with a tender reproach, and I was instantly recalled to myself. It was only the illusion of a moment, through which I had passed. Whatever may happen, I have one consolation: this dear image will remind me of the love I once possessed. I shall fold to my bosom the Alice that once was mine, and strive to forget our estrangement."

Alice was sensibly touched by this appeal, and much more by the tone in which it was made. In the momentary pause, Greenleaf raised his eyes and saw the struggle in her face. He rose, came nearer, and quietly took a seat on the sofa beside her.

"I heard you distinctly where you sat," she said, making an effort to keep down the tumult within, and shrinking, perhaps, from the influence of his presence.

"I wished to hear you, dear Alice, and therefore came nearer. Tell me, are you not mistaken? You have not forgotten me: you do love me yet. Let your heart speak; if you imprison it and force the dissembling lips to deny me, the dear traitor will make signals: it looks out of your eyes now."

He seized and imprisoned her hand, and still watched the current of feeling in her face.

"I thought myself strong enough for this," she said, tremblingly, "but I am not. I meant only to say that we would part — friends, but that we must part. It is not so easy to be calm, when you distract me so."

"Alice, you only deceive yourself; you love me. You have covered the spring in your heart with snow, but the fountain still flows underneath."

Her tears could be kept back no longer; they fell not like November rain, but rather like those sudden showers of spring

from passing clouds, while the blue sky still looks down, and rainbow smiles transfigure the landscape.

His heart gave a mighty throb as those softly humid eyes were turned upon him. He drew her, half consenting, still nearer. She hesitated, but not long.

"Hard a-port!" shouts the master; and the helmsman, with firm hand, holds down the wheel. Slowly the ship veers; the sails flutter and back, the yards are swung; waves strive to head the bow off, but the rudder is held with iron grasp; now comes the wind, the shaking sails fill with the sudden rush, and the ship bounds on her new course over the heaving waters.

Shall I fill out the comparison? Not for you, elders, who have seen the struggle of "tacking ship," and have felt the ecstatic swell of delight when it was accomplished! Not for the younger, who must learn for themselves the seamanship that is to carry them safely over the mysterious ocean on whose shore they have lingered and gazed and wished!

The conversation that followed it would be vain to report, even if it were possible; for the force of ejaculations depends so much on *tone*,—which our types do not know how to convey; and their punctuation-marks, I fear, were such as are not in use in any well-regulated printing-office. In due time it came to an end; and when Greenleaf took his unwilling departure, having repeatedly said good-bye, with the usual confirmation, he could no more remember what had been said in that miraculous hour than a bee flying home from a garden could tell you about the separate blossoms from which he (the Sybarite!) had gathered his freight of flower-dust.

One thing only he heard which the wisely incurious reader will care to know. Alice had met her cousin, Walter Monroe, the day before, had received a proper scolding for her absurd independence, and, after a frank settlement of the heart-question which came up on the day of her flight, had promised at once to re-

turn to his house,—where, for the brief remainder of our story, she is to be found. Let us wish her joy,—and the kind, motherly aunt, also.

Greenleaf went directly to Easelmann's room, opened the door, and spread his arms.

"Have you a strawberry-mark?" he shouted.

"No."

"Then you are my long-lost brother! Come to my arms!"

Easelmann laughed long and loudly.

"Forgive my nonsense, Easelmann. I know I am beside myself and ready for any extravagance,—I am so full of joy. I feared, in coming along the street, that I should break out into singing, or fall to dancing, like the Scriptural hills."

"Then you have succeeded, and the girl is yours! I forgive your stupid old joke. You can say and do just what you like. You have a right to be jolly, and to make a prodigious fool of yourself, if you want to. I should like to have heard you. You were very poetical, quoted Tennyson, fell on your knees, and perhaps blubbered a little. You *are* sentimental, you know."

"I am happy, I know, and I don't care whether you think me sentimental or not."

"Well, I wish you joy anyhow. Let us make a night of it. 'It is our royal pleasure to be'—imagine the rest of the line. 'Now is the winter of our discontent.' 'My bosom's lord sits lightly on his throne.' Come, let us make ready, and we'll talk till

'Night's candles are burnt out, and jocund day
Stands tiptoe on the misty'—

misty steeple of Park-Street Church,—since we haven't any misty mountain-tops in the neighborhood."

"One would think *you* the happy man."

"I am; your enthusiasm is so contagious that I am back in my twenties again."

"Why do you take your pleasure vicariously? There is Mrs. Sandford, the charming woman; I love her, because"—

"No, Sir, not her,—one is enough."

"Then why not love her yourself? We'll make a double-barrelled shot of it, —two couples brought down by one parson."

"Very ingenious, and economical, too; but I think not. It is too late. I was brought up in the country, and I don't think it good policy to begin agricultural operations in the fall of the year; my spring has past. But is the day fixed? When are you to be the truly happy man?"

"No,—the day is not fixed," said Greenleaf, thoughtfully. "You see, I was so bent upon the settlement of the difficulty, that I had not considered the practical bearing of the matter. I am too poor to marry, and I am heartsick at the prospect of waiting"—

"With the chance of another rupture."

"No,—we shall not quarrel again. But I shall go to work. I'll inundate the town with pictures; if I can't sell them myself, I will have Jews to peddle them for me."

"Hear the mercenary man! No,—go to work in earnest, but put your life into your pictures. If you can keep up your present glow, you will be warmer than Cuyp, dreamier than Claude, more imaginative than Millais."

"But the desperate long interval!"

"I don't know about that. I quite like the philosophy of Mr. Micawber, and strenuously believe in something turning up."

"What is that?" asked Greenleaf, noticing a letter on his friend's table. "It seems to be addressed to me."

"Yes,—I met a lawyer to-day, who asked me if I knew one George Greenleaf. As I did, he gave me the letter. Some dun, probably, or threat of a suit. I wouldn't open it. Don't!"

"You only make me curious. I shall open it. To-day I can defy a dun even from—What, what's this? Bullion dead?—left in his will a bequest—forty thousand—to *me*?"

Easelmann looked over his friend's

shoulder with well-simulated astonishment.

"Sure enough; there it is, in black and white.—What do you think of Micawber?"

"I think," said Greenleaf, with many tears in his eyes, "that you are the art-fullest, craftiest, hugger-muggering, dear old rascal that ever lived. Now let me embrace you in good earnest. Oh, Easelmann, this is too much! Here is Alice—mine! Here is Europe, that I have looked at as I would heaven, beyond reach in this life! *Now* we will go to work; and let Cuyyp, Claude, and the rest of them, look out for their laurels!"

"Softly, my boy; you squeeze like a cider-press. But how came the old miser to give you this?"

"My father was his partner; he was thought to be worth a handsome sum while he lived,—but at his death, though Bullion and another junior went on with the business, there was nothing left for us. My mother died poor. I am the only child living. This, I suppose, is the return for the property that Bullion wrongfully detained,—with compound interest, too, I should say. Let us not speak ill of the dead. He has made restitution and squared the books; I hope the correction has been made above."

"How lucky for you that Bullion was your banker! Suppose you had grown up with the expectation of having this money, what would you have been good for? You would have run all to patent-leather boots, silky moustaches, and black-tan terriers. Your struggles have developed your muscles, metaphorically speaking, and made a man of you."

"Two sides to that question. It is true, luxury might have spoiled me, for I am accessible to such influences; but, on the other hand, I should have escaped some painful things. No one who has not been poor can understand me, can know the wounds which a sensitive man must receive as he is working his way up in the world,—wounds that leave lasting scars, too. I am conscious of certain feelings, most discreditable, if I were to avow them,

which have been cultivated in me, and which will probably cling to me all my days. What I have gained in hardness I have gained as the smith gains his strength, at the expense of symmetry, sensibility, and grace."

"Nonsense, you mimosa! Don't curl up your leaves before you are touched."

"But if I am a sensitive-plant, as you say, I can't help it; if I were a burdock, I might."

"You'll get over that. By-the-by, you may as well tell Alice. I know you will be uneasy; go, go,—but come back soon. It is jolly that she accepted you poor; if the report had got abroad, you might have thought she was influenced by golden reasons."

"That's because you don't know her, my cynical friend. She is incapable of mercenary motives."

"What female heart can gold despise?"

"What cat's averse to fish?"

"Well, for an hour, good-bye. Have a good fire and the pipes ready."

"Yes, truly,—and a magnum, if my closet is not empty. The king will drink to Hamlet."

Little more remains to be told. After the long period of probation, it was not deemed necessary that the nuptials should be deferred beyond the time necessary to make due preparation. In a month the wedding took place at Mr. Monroe's house, Mr. Easelmann giving away the bride. I do not say that the bachelor felt no twinges when he saw among the guests the lovely Mrs. Sandford in her becoming white robes; in fact, he "thought seriously," as all such people do while there remains even the recollection of youth,—but his habits were too fixed. He saw and sighed, and that was all. However, he is on the right side of — forty, we will call it, and there is hope for him. We may find him in some adventure yet; if so, the reader shall assuredly know it.

In the spring, Greenleaf with his wife went abroad and took up their residence in Rome.

"What pictures has he painted?" did you ask?

Really, Madam, a great many; but I have not the least idea of letting you come at the name of my hero in this way. You have seen them both here and in New York, and you thought them the productions of a rising man,—as they are.

Our friend Monroe is now a partner in the house of Lindsay & Co. He makes frequent visits to the villa at Brookline, and is always welcome. Mr. Lindsay considers him a most sensible and worthy young man, and his daughter Clara has implicit confidence in his judgment of literature as well as in his taste for pictures. One fine day last summer, Mrs. Monroe was prevailed upon, after some weeks of solicitation, to get into a carriage and take a drive with her son. "She's a nice girl," said the mother, fervently, on their return; "and if you *must* marry anybody, I don't think you can do better." Walter's smile showed that he thought so too, although the alternative was hardly so painful as she

seemed to consider it,—from which we infer that his relations with the senior partner of the house have become, or will be, still more intimate.

Mrs. Sandford has left Boston and gone to live with her relatives some fifty miles distant;—the place Mr. Easemann can tell, as he has had occasion to send her a few letters.

The personages of our drama are all dismissed; the curtain begins to fall; but a voice is heard, "What became of the Bulls and Bears?" What became of Mars and Minerva after the siege of Troy? Men die; but the deities, infernal as well as celestial, live on. Fortunes may rise like Satan's *chef d'œuvre* of architecture, may be transported from city to city like the palace of Aladdin, or may sink into salt-water lots as did the Cities of the Plain; success may wait upon commerce and the arts, or desolation may cover the land; still, surviving all change, and profiting alike by prosperity and by calamity, the secret, unfathomable agents in all human enterprises will remain the BULLS AND BEARS.

THE SPHINX.

Go not to Thebes. The Sphinx is there;
And thou shalt see her beauty rare,
And thee the sorcery of her smile
To read her riddle shall beguile.

Oh! woe to those who fail to read!
And woe to him who shall succeed!
For he who fails the truth to show
The terror of her wrath shall know:

But should'st thou find her mystery,
Not less is Death assured to thee;
For she shall cease, and thou shalt sigh
That she no longer is, and die.

A CHARGE WITH PRINCE RUPERT.

"Thousands were there, in darker fame that dwell,
Whose deeds some nobler poem shall adorn;
And though to me unknown, they sure fought well,
Whom Rupert led, and who were British-born."

DRYDEN.

I.

THE MARCH. JUNE 17, 1643.

LAST night the Canary wine flashed in the red Venice glasses on the oaken tables of the hall; loud voices shouted and laughed till the clustered hawk-bells jingled from the rafters, and the chaplain's fiddle throbbed responsive from the wall; while the coupled stag-hounds fawned unnoticed, and the watchful falcon whistled to himself unheard. In the carved chairs lounged groups of revellers, dressed in scarlet, dressed in purple, dressed in white and gold, gay with satins and ribbons, gorgeous with glittering chains and jewelled swords: stern, manly faces, that had been singed with powder in the Palatinate; brutal, swarthy faces, knowing all that sack and sin could teach them; beautiful, boyish faces, fresh from ancestral homes and high-born mothers; grave, sad faces,—sad for undoubted tyranny, grave against the greater wrong of disloyalty. Some were in council, some were in strife, many were in liquor; the parson was there with useless gravity, and the jester with superfluous folly; and in the outer hall men more plebeian drained the brown October from pewter cans, which were beaten flat, next moment, in hammering the loud drinking-chorus on the wall; while the clink of the armorer still went on, repairing the old head-pieces and breast-plates which had hung untouched since the Wars of the Roses; and in the doorway the wild Welsh recruits crouched with their scythes and their cudgels, and muttered in their uncouth dialect, now a prayer to God, and now a curse for their enemy.

But to-day the inner hall is empty, the stag-hounds leap in the doorway, the chaplain prays, the maidens cluster in the windows, beneath the soft beauty

of the June afternoon. The streets of Oxford resound with many hoofs; armed troopers are gathering beside chapel and quadrangle, gateway and tower; the trumpeter waves his gold and crimson trappings, and blows, "To the Standard,"—for the great flag is borne to the front, and Rupert and his men are mustering for a night of danger beneath that banner of "Tender and True."

With beat of drum, with clatter of hoof, and rattle of spur and scabbard, tramping across old Magdalen Bridge, cantering down the hill-sides, crashing through the beech-woods, echoing through the chalky hollows, ride leisurely the gay Cavaliers. Some in new scarfs and feathers, worthy of the "show-troop,"—others with torn laces, broken helmets, and guilty red smears on their buff doublets;—some eager for their first skirmish,—others weak and silent, still bandaged from the last one;—discharging now a rattle of contemptuous shot at some closed Puritan house, grim and stern as its master,—firing anon as noisy a salute, as they pass some mansion where a high-born beauty dwells,—on they ride. Leaving the towers of Oxford behind them, keeping the ancient Roman highway, passing by the low, strong, many-gabled farm-houses, with rustic beauties smiling at the windows and wiser fathers scowling at the doors,—on they ride. To the Royalists, these troopers are "Prince Robert and the hope of the nation";—to the Puritans, they are only "Prince Robber and his company of rake-shames."

Riding great Flanders horses, a flagon swung on one side of the large padded saddle, and a haversack on the other,—booted to the thigh, and girded with the leathern bandoleer, supporting cartridge-box and basket-hilted sword, they are a picturesque and a motley troop. Some

wear the embroidered buffcoat over the coat of mail, others beneath it,—neither having yet learned that the buffcoat alone is sabre-proof and bullet-proof also. Scantly furnished with basinet or breastplate, pot, haqueton, cuirass, poul-dron, taslets, vambraces, or cuisses,—each with the best piece of iron he could secure when the ancestral armory was ransacked,—they yet care little for the deficit, remembering, that, when they first rode down the enemy at Worcester, there was not a piece of armor on their side, while the Puritans were armed to a man. There are a thousand horsemen under Percy and O'Neal, armed with swords, pole-axes, and petronels; this includes Rupert's own lifeguard of chosen men. Lord Wentworth, with Innis and Washington, leads three hundred and fifty dragoons,—dragoons of the old model, intended to fight either on foot or on horseback, whence the name they bear, and the emblematic dragon which adorns their carbines. The advanced guard, or "forlorn hope," of a hundred horse and fifty dragoons, is commanded by Will Legge, Rupert's life-long friend and correspondent; and Herbert Lunsford leads the infantry, "the inhuman cannibal foot," as the Puritan journals call them. There are five hundred of these, in lightest marching order, and carrying either pike or arquebuse,—this last being a matchlock musket with an iron rest to support it, and a lance combined, to resist cavalry,—the whole being called "Swine (Swedish) feathers,"—a weapon so clumsy, that the Cavaliers say a Puritan needs two years' practice to discharge one without winking. And over all these float flags of every hue and purport, from the blue and gold with its loyal "*Ul rex, sit rex*," to the ominous crimson, flaming with a lurid furnace and the terrible motto, "*Quasi ignis conflatoris*."

And foremost rides Prince Rupert, darling of fortune and of war, with his beautiful and thoughtful face of twenty-three, stern and bronzed already, yet beardless and dimpled, his dark and pas-

sionate eyes, his long love-locks drooping over costly embroidery, his graceful scarlet cloak, his white-plumed hat, and his tall and stately form, which, almost alone in the army, has not yet known a wound. His high-born beauty is preserved to us forever on the canvas of Vandyck, and as the Italians have named the artist "*Il Pittore Cavalieresco*," so will this subject of his skill remain forever the ideal of *Il Cavaliere Pittoreesco*. And as he now rides at the head of this brilliant array, his beautiful white dog bounds onward joyously beside him, that quadruped renowned in the pamphlets of the time, whose snowy skin has been stained by many a blood-drop in the desperate forays of his master, but who has thus far escaped so safely that the Puritans believe him a familiar spirit, and try to destroy him "by poyson and extempore prayer, which yet hurt him no more than the plague plaster did Mr. Pym." Failing in this, they pronounce the pretty creature to be "a divell, not a very downright divell, but some Lapland ladye, once by nature a handsome white ladye, now by art a handsome white dogge."

The Civil War is begun. The King has made his desperate attempt to arrest the five members of Parliament, and been checkmated by Lucy Carlisle. So the fatal standard was reared, ten months ago, on that dismal day at Nottingham,—the King's arms, quartered with a bloody hand pointing to the crown, and the red battle-flag above;—blown down disastrously at night, replaced sadly in the morning, to wave while the Cavaliers rallied, slowly, beneath its folds. During those long months, the King's fortunes have had constant and increasing success,—a success always greatest when Rupert has been nearest. And now this night-march is made to avenge a late attack, of unaccustomed audacity, from Essex, and to redeem the threat of Rupert to pass in one night through the whole country held by the enemy, and beat up the most distant quarters of the Round-heads.

II.

THE CONDITION OF THE TIMES.

It is no easy thing to paint, with any accurate shadings, this opening period of the English Revolution. Looking habitually, as we do, at the maturer condition of the two great parties, we do not remember how gradual was their formation. The characters of Cavalier and Roundhead were not more the cause than the consequence of civil strife. There is no such chemical solvent as war; where it finds a mingling of two alien elements, it leaves them permanently severed. At the opening of hostilities, the two parties were scarcely distinguishable, in externals, from each other. Arms, costume, features, phrases, manners, were as yet common to both sides. On the battlefield, spies could pass undetected from one army to the other. At Edgehill, Chalgrove, and even Naseby, men and standards were captured and rescued, through the impossibility of distinguishing between the forces. An orange scarf, or a piece of white paper, was the most reliable designation. True, there was nothing in the Parliamentary army so gorgeous as Sir John Suckling's troop in Scotland, with their white doublets and scarlet hats and plumes; but that bright company substituted the white feather for the red one, in 1639, and rallied no more. Yet even the Puritans came to battle in attire which would have seemed preposterously gaudy to the plain men of our own Revolution. The London regiment of Hollis wore red, in imitation of the royal colors, adopted to make wounds less conspicuous. Lord Say's regiment wore blue, in imitation of the Covenanters, who took it from Numbers, xv. 38; Hampden's men wore green; Lord Brooke's purple; Colonel Ballard's gray. Even the hair afforded far less distinction than we imagine, since there is scarcely a portrait of a leading Parliamentarian which has not a display of tresses such as would now appear the extreme of foppery; and when the remains of Hampden himself were disinterred

within twenty-five years, the body was at first taken for a woman's, from the exceeding length and beauty of the hair.

But every year of warfare brought a change. On the King's side, the raiment grew more gorgeous amid misfortunes; on the Parliament's, it became sadder with every success. The Royalists took up feathers and oaths, in proportion as the Puritans laid them down; and as the tresses of the Cavaliers waved more luxuriantly, the hair of the Roundheads was more scrupulously shorn. And the same instinctive exaggeration was constantly extending into manners and morals also. Both sides became ostentatious; the one made the most of its dissoluteness, and the other of its decorum. The reproachful names applied derisively to the two parties became fixed distinctions. The word "Roundhead" was first used early in 1642, though whether it originated with Henrietta Maria or with David Hyde is disputed. And Charles, in his speech before the battle of Edgehill, in October of the same year, mentioned the name "Cavalier" as one bestowed "in a reproachful sense," and one "which our enemies have striven to make odious."

And all social as well as moral prejudices gradually identified themselves with this party division. As time passed on, all that was high-born in England gravitated more and more to the royal side, while the popular cause enlisted the Londoners, the yeomanry, and those country-gentlemen whom Mrs. Hutchinson styled the "worsted-stocking members." The Puritans gradually found themselves excluded from the manorial halls, and the Cavaliers (a more inconvenient privation) from the blacksmiths' shops. Languishing at first under aristocratic leadership, the cause of the Parliament first became strong when the Self-denying Ordinance abolished all that weakness. Thus the very sincerity of the civil conflict drew the lines deeper; had the battles been fought by mercenaries, like the contemporary Continental wars, there would have grown up a less hearty mutual antipathy, but a far more terrible

demoralization. As it was, the character of the war was, on the whole, a humane one; few towns were sacked or destroyed, the harvests were bounteous and freely gathered, and the population increased during the whole period. But the best civil war is fearfully injurious. In this case, virtues and vices were found on both sides; and it was only the gradual preponderance which finally stamped on each party its own historic reputation. The Cavaliers confessed to "the vices of men,—love of wine and women"; but they charged upon their opponents "the vices of devils,—hypocrisy and spiritual pride." Accordingly, the two verdicts have been recorded in the most delicate of all registers,—language. For the Cavaliers added to the English vocabulary the word *plunder*, and the Puritans the word *cant*.

Yet it is certain that at the outset neither of these peculiarities was monopolized by either party. In abundant instances, the sins changed places,—Cavaliers canted, and Puritans plundered. That is, if by cant we understand the exaggerated use of Scripture language which originated with the reverend gentleman of that name, it was an offence in which both sides participated. Clarendon, reviewing the Presbyterian discourses, quoted text against text with infinite relish. Old Judge Jenkins, could he have persuaded the "House of Rimmon," as he called Parliament, to hang him, would have swung the Bible triumphantly to his neck by a ribbon, to show the unscriptural character of their doings. Charles himself, in one of his early addresses to his army, denounced the opposing party as "Brownists, Anabaptists, and Atheists," and in his address to the city of London pleaded in favor of his own "godly, learned, and painfull preachers." Every royal regiment had its chaplain, including in the service such men as Pearson and Jeremy Taylor, and they had prayers before battle, as regularly and seriously as their opponents. "After solemn prayers at the head of every division, I led my part

away," wrote the virtuous Sir Beville Grenvill to his wife, after the battle of Bradock. Rupert, in like manner, had prayers before every division at Marston Moor. To be sure, we cannot always vouch for the quality of these prayers, when the chaplain happened to be out of the way and the colonel was his substitute. "O Lord," petitioned stout Sir Jacob Astley, at Edgehill, "thou knowest how busy I must be this day; if I forget thee, do not thou forget me!"—after which, he rose up, crying, "March on, boys!"

And as the Puritans had not the monopoly of prayer, so the Cavaliers did not monopolize plunder. Of course, when civil war is once begun, such laxity is mere matter of self-defence. If the Royalists unhorsed the Roundheads, the latter must horse themselves again, as best they could. If Goring "uncattled" the neighborhood of London, Major Medhope must be ordered to "uncattle" the neighborhood of Oxford. Very possibly individual animals were identified with the right side or the wrong side, to be spared or confiscated in consequence;—as in modern Kansas, during a similar condition of things, one might hear men talk of a pro-slavery colt, or an anti-slavery cow. And the precedent being established, each party could use the smallest excesses of the other side to palliate the greatest of its own. No use for the King to hang two of Rupert's men for stealing, when their commander could urge in extenuation the plunder of the house of Lady Lucas, and the indignities offered by the Roundheads to the Countess of Rivers. Why spare the churches as sanctuaries for the enemy, when rumor accused that enemy (right or wrong) of hunting cats in those same churches with hounds, or baptizing dogs and pigs in ridicule of the consecrated altars? Setting aside these charges as questionable, we cannot so easily dispose of the facts which rest on actual Puritan testimony. If, even after the Self-denying Ordinance, the "Perfect Occurrences" repeatedly report soldiers of the Puritan army, as cashiered for drunkenness, rudeness to

women, pilfering, and defrauding inn-keepers, it is inevitable to infer that in earlier and less stringent times they did the same undetected or unpunished. When Mrs. Hutchinson describes a portion of the soldiers on her own side as "licentious, ungovernable wretches,"—when Sir Samuel Luke, in his letters, depicts the glee with which his men plunder the pockets of the slain,—when poor John Wolstenholme writes to head-quarters that his own compatriots have seized all his hay and horses, "so that his wife cannot serve God with the congregation but in frosty weather,"—when Vicars in "Jehovah Jireh" exults over the horrible maiming and butchery wrought by the troopers upon the officers' wives and female camp-followers at Naseby,—it is useless to attribute exaggeration to the other side. In civil war, even the humanest, there is seldom much opening for exaggeration,—the actual horrors being usually quite as vivid as any imaginations of the sufferers, especially when, as in this case, the spiritual instructors preach, on the one side, from "Curse ye Meroz," and, on the other side, from "Cursed be he that keepeth back his sword from blood."

We mention these things, not because they are deliberately denied by anybody, but because they are apt to be overlooked by those who take their facts at second-hand. All this does not show that the Puritans had, even at the outset, worse men or a cause no better; it simply shows that war demoralizes, and that right-thinking men may easily, under its influence, slide into rather reprehensible practices. At a later period the evil worked its own cure, among the Puritans, and the army of Cromwell was a moral triumph almost incredible; but at the time of which we write, the distinction was but lightly drawn. It would be easy to go farther and show that among the leading Parliamentary statesmen there were gay and witty debauchees,—that Harry Marten deserved the epithet with which Cromwell saluted him,—that Pym succeeded to the regards of Strafford's bewitching mistress,—that Warwick was

truly, as Clarendon describes him, a profuse and generous profligate, tolerated by the Puritans for the sake of his earldom and his bounty, at a time when bounty was convenient and peers scarce. But it is hardly worth while farther to demonstrate the simple and intelligible fact, that there were faults on both sides. Neither war nor any other social phenomenon can divide infallibly the sheep from the goats, or collect all the saints under one set of staff-officers and all the sinners under another.

But, on the other hand, the strength of both sides, at this early day, was in a class of serious and devoted men, who took up the sword so sadly, in view of civil strife, that victory seemed to them almost as terrible as defeat. In some, the scale of loyalty slightly inclined, and they held with the King; in others, the scale of liberty, and they served the Parliament; in both cases, with the same noble regrets at first, merging gradually into bitter alienation afterwards. "If there could be an expedient found to solve the punctilio of honor, I would not be here an hour," wrote Lord Robert Spencer to his wife, from the camp of the Cavaliers. Sir Edmund Verney, the King's standard-bearer, disapproved of the royal cause, and adhered to it only because he "had eaten the King's bread." Lord Falkland, Charles's Secretary of State, "sitting among his friends, often, after a deep silence and frequent sighs, would, with a shriek and sad accent, ingeminate the words, Peace! Peace!" and would prophesy for himself that death which soon came. And these words show close approximation to the positions of men honored among the Puritans, as when Sir William Waller wrote from his camp to his chivalrous opponent, Sir Ralph Hopton,—*"The great God, who is the searcher of my heart, knows with what reluctance I go upon this service."*

As time passed on, the hostility between the two parties exceeded all bounds of courteous intercourse. The social distinction was constantly widening, and so was the religious antagonism. Waller

could be allowed to joke with Goring and sentimentalize with Hopton,—for Waller was a gentleman, though a rebel; but it was a different thing when the Puritan gentlemen were seen to be gradually superseded by Puritan clowns. Strafford had early complained of “your Prynnes, Pims, and Bens, with the rest of that generation of odd names and natures.” But what were these to the later brood, whose plebeian quality Mr. Buckle has so laboriously explored,—Goffe the grocer and Whalley the tailor, Pride the drayman and Venner the cooper, culminating at last in Noll Cromwell the brewer? The formidable force of these upstarts only embittered the aversion. If odious when vanquished, what must they have been as victors? For if it be disagreeable to find a foeman unworthy of your steel, it is much more unpleasant when your steel turns out unworthy of the foeman; and if sad-colored Puritan raiment looked absurd upon the persons of fugitives, it must have been very particularly unbecoming when worn by conquerors.

And the growing division was constantly aggravated by very acid satire. The Court, it must be remembered, was more than half French in its general character and tone, and every Frenchman of that day habitually sneered at every Englishman as dull and inelegant. The dazzling wit that flashed for both sides in the French civil wars flashed for one only in the English; the Puritans had no comforts of that kind, save in some caustic repartee from Harry Marten, or some fearless sarcasm from Lucy Carlisle. But the Cavaliers softened labor and sweetened care with their little jokes. It was rather consoling to cover some ignominious retreat with a new epigram on Cromwell's red nose, that irresistible member which kindled in its day as much wit as Bardolph's,—to hail it as “Nose Immortal,” a beacon, a glow-worm, a bird of prey,—to make it stand as a personification of the rebel cause, till even the stately Montrose asked newcomers from England, “How is Oliver's nose?” It was very entertaining to

christen the Solemn League and Covenant “the constellation on the back of Aries,” because most of the signers could only make their marks on the little bits of sheepskin circulated for that purpose. It was quite lively to rebaptize Rundway Down as Run-away-down, after a royal victory, and to remark how Hazlerig's regiment of “lobsters” turned to crabs, on that occasion, and crawled backwards. But all these pleasant follies became whips to scourge them, at last,—shifting suddenly into very grim earnest when the Royalists themselves took to running away, with truculent saints, in steeple-hats, behind them.

Oxford was the stronghold of the Cavaliers, in these times, as that of the Puritans was London. The Court itself (though here we are anticipating a little) was transferred to the academic city. Thither came Henrietta Maria, with what the pamphleteers called “her Rattle-headed Parliament of Ladies,” the beautiful Duchess of Richmond, the merry Mrs. Kirke, and brave Kate D'Aubigny. In Merton College the Queen resided; at Oriel the Privy Council was held; at Christ Church the King and Rupert were quartered; and at All Souls Jeremy Taylor was writing his beautiful meditations, in the intervals of war. In the New College quadrangle, the students were drilled to arms “in the eye of Doctor Pink,” while Mars and Venus kept undisturbed their ancient reign, although transferred to the sacred precincts of Magdalen. And amidst the passion and the pomp, the narrow streets would suddenly ring with the trumpet of some foam-covered scout, bringing tidings of perilous deeds outside; while some traitorous spy was being hanged, drawn, and quartered in some other part of the city, for betraying the secrets of the Court. And forth from the outskirts of Oxford rides Rupert on the day we are to describe, and we must still protract our pause a little longer to speak of him.

Prince Rupert, Prince Robert, or Prince Robber,—for by all these names was he known,—was the one formidable military

leader on the royal side. He was not a statesman, for he was hardly yet a mature man; he was not, in the grandest sense, a hero, yet he had no quality that was not heroic. Chivalrous, brilliant, honest, generous,—neither dissolute, nor bigoted, nor cruel,—he was still a Royalist for the love of royalty, and a soldier for the love of war, and in civil strife there can hardly be a more dangerous character. Through all the blunt periods of his military or civil proclamations, we see the proud, careless boy, fighting for fighting's sake, and always finding his own side the right one. He could not have much charity for the most generous opponents; he certainly had none at all for those who (as he said) printed malicious and lying pamphlets against him "almost every morning," in which he found himself saluted as a "nest of perfidious vipers," "a night-flying dragon prince," "a flapdragon," "a caterpillar," "a spider," and "a *butterbox*."

He was the King's own nephew,—great-grandson of William the Silent, and son of that Elizabeth Stuart from whom all the modern royal family of England descends. His sister was the renowned Princess Palatine, the one favorite pupil of Descartes, and the chosen friend of Leibnitz, Malebranche, and William Penn. From early childhood he was trained to war; we find him at fourteen pronounced by his tutors fit to command an army,—at fifteen, bearing away the palm in one of the last of the tournaments,—at sixteen, fighting beside the young Turenne in the Low Countries,—at nineteen, heading the advanced guard in the army of the Prince of Orange,—and at twenty-three, appearing in England, the day before the Royal Standard was reared, and the day after the King lost Coventry, because Wilmot, not Rupert, was commander of the horse. This training made him a general,—not, as many have supposed, a mere cavalry-captain;—he was one of the few men who have shown great military powers on both land and sea; he was a man of energy unbounded, industry inexhaustible, and the most comprehensive and

systematic forethought. It was not merely, that, as Warwick said, "he put that spirit into the King's army that all men seemed resolved,"—not merely, that, always charging at the head of his troops, he was never wounded, and that, seeing more service than any of his compeers, he outlived them all. But even in these early years, before he was generalissimo; the Parliament deliberately declared the whole war to be "managed by his skill, labor, and industry," and his was the only name habitually printed in capitals in the Puritan newspapers. He had to create soldiers by enthusiasm, and feed them by stratagem,—to toil for a king who feared him, and against a queen who hated him,—to take vast responsibilities alone,—accused of negligence, if he failed, reproached with license, if he succeeded. Against him he had the wealth of London, intrusted to men who were great diplomatists, though new to power, and great soldiers, though they had never seen a battle-field till middle life; on his side he had only unmanageable lords and penniless gentlemen, who gained victories by daring, and then wasted them by license. His troops had no tents, no wagons, no military stores; they used those of the enemy. Clarendon says, that the King's cause labored under an incurable disease of want of money, and that the only cure for starvation was a victory. To say, therefore, that Rupert's men never starved is to say that they always conquered,—which, at this early period, was true.

He was the best shot in the army, and the best tennis-player among the courtiers, and Pepys calls him "the boldest attacker in England for personal courage." Seemingly without reverence or religion, he yet ascribed his defeats to Satan, and, at the close of a letter about a marauding expedition, requested his friend Will Legge to pray for him. Versed in all the courtly society of the age, chosen interpreter for the wooing of young Prince Charles and La Grande Mademoiselle, and mourning in purple, with the royal family, for Marie de Médicis, he could yet mingle in any conceiv-

able company and assume any part. He penetrated the opposing camp at Dunsmore Heath as an apple-seller, and the hostile town of Warwick as a dealer in cabbage-nets, and the pamphleteers were never weary of describing his disguises. He was charged with all manner of offences, even to slaying children with cannibal intent, and only very carelessly disavowed such soft impeachments. But no man could deny that he was perfectly true to his word; he never forgot one whom he had promised to protect, and, if he had promised to strip a man's goods, he did it to the uttermost farthing. And so must his pledge of vengeance be redeemed to-night; and so, riding eastward, with the dying sunlight behind him and the quiet Chiltern hills before, through air softened by the gathering coolness of these midsummer eves, beside clover fields, and hedges of wild roses, and ponds white with closing water-lilies, and pastures sprinkled with meadow-sweet, like foam,—he muses only of the clash of sword and the sharp rattle of shot, and all the passionate joys of the coming charge.

III.

THE FORAY.

THE long and picturesque array winds onward, crossing Chiselhampton Bridge, (not to be re-crossed so easily,) avoiding Thame with its church and abbey, where Lord-General Essex himself is quartered, unconscious of their march; and the Cavaliers are soon riding beneath the bases of the wooded hills towards Postcombe. Near Tetsworth, the enemy's first outpost, they halt till evening; the horsemen dismount, the flagon and the foraging-bag are opened, the black-jack and the manchets go round, healths are drunk to successes past and glories future, to "Queen Mary's eyes," and to "Prince Rupert's dog." A few hours bring darkness; they move on eastward through the lanes, avoiding, when possible, the Roman highways; they are sometimes fired upon by a picket, but make no re-

turn, for they are hurrying past the main quarters of the enemy. In the silence of the summer night, they stealthily ride miles and miles through a hostile country, the renegade Urry guiding them. At early dawn, they see, through the misty air, the low hamlet of Postcombe, where the "beating up of the enemy's quarters" is to begin. A hurried word of command; the infantry halt; the cavalry close, and sweep down like night-hawks upon the sleeping village,—safe, one would have supposed it, with the whole Parliamentary army lying between it and Oxford, to protect from danger. Yet the small party of Puritan troopers awake in their quarters with Rupert at the door; it is well for them that they happen to be picked men, and have promptness, if not vigilance; forming hastily, they secure a retreat westward through the narrow street, leaving but few prisoners behind them. As hastily the prisoners are swept away with the stealthy troop, who have other work before them; and before half the startled villagers have opened their lattices the skirmish is over. Long before they can send a messenger up, over the hills, to sound the alarm-bells of Stoken Church, the swift gallop of the Cavaliers has reached Chinnor, two miles away, and the goal of their foray. The compact, strongly-built village is surrounded. They form a parallel line behind the houses, on each side, leaping fences and ditches to their posts. They break down the iron chains stretched nightly across each end of the street, and line it from end to end. Rupert, Will Legge, and the "forlorn hope," dismounting, rush in upon the quarters, sparing those alone who surrender.

In five minutes the town is up. The awakened troopers fight as desperately as their assailants, some on foot, some on horseback. More and more of Rupert's men rush in; they fight through the straggling street of the village, from the sign of the Ram at one end to that of the Crown at the other, and then back again. The citizens join against the invaders, the 'prentices rush from their attics, hasty

barricades of carts and harrows are formed in the streets, long musket-barrels are thrust from the windows, dark groups cluster on the roofs, and stones begin to rattle on the heads below, together with phrases more galling than stones, hurled down by women, "cursed dogs," "devilish Cavaliers," "Papist traitors." In return, the intruders shoot at the windows indiscriminately, storm the doors, fire the houses; they grow more furious, and spare nothing; some towns-people retreat within the church-doors; the doors are beaten in; women barricade them with wool-packs, and fight over them with muskets, barrel to barrel. Outside, the troopers ride round and round the town, seizing or slaying all who escape; within, desperate men still aim from their windows, though the houses each side are in flames. Melting lead pours down from the blazing roofs, while the drum still beats and the flag still goes on. It is struck down presently; tied to a broken pike-staff, it rises again, while a chaos of armor and plumes, black and orange, blue and red, torn laces and tossing feathers, powder-stains and blood-stains, fills the dewy morning with terror, and opens the June Sunday with sin.

Threescore and more of the towns-people are slain, sixscore are led away at the horses' sides, bound with ropes, to be handed over to the infantry for keeping. Some of these prisoners, even of the armed troopers, are so ignorant and unwarlike as yet, that they know not the meaning of the word "quarter," refusing it when offered, and imploring "mercy" instead. Others are little children, for whom a heavy ransom shall yet be paid. Others, cheaper prisoners, are ransomed on the spot. Some plunder has also been taken, but the soldiers look longingly on the larger wealth that must be left behind, in the hurry of retreat,—treasures that, otherwise, no trooper of Rupert's would have spared: scarlet cloth, bedding, saddles, cutlery, iron-ware, hats, shoes, hops for beer, and books to sell to the Oxford scholars. But the daring which has given them

victory now makes their danger;—they have been nearly twelve hours in the saddle and have fought two actions; they have twenty-five miles to ride, with the whole force of the enemy in their path; they came unseen in the darkness, they must return by daylight and with the alarm already given; Stoken Church-bell has been pealing for hours, the troop from Postcombe has fallen back on Tetworth, and everywhere in the distance videttes are hurrying from post to post.

The perilous retreat begins. Ranks are closed; they ride silently; many a man leads a second horse beside him, and one bears in triumph the great captured Puritan standard, with its five-buff Bibles on a black ground. They choose their course more carefully than ever, seek the by-lanes, and swim the rivers with their swords between their teeth. At one point, in their hushed progress, they hear the sound of rattling wagons. There is a treasure-train within their reach, worth twenty-one thousand pounds, and destined for the Parliamentary camp, but the thick woods of the Chilterns have sheltered it from pursuit, and they have not a moment to waste; they are riding for their lives. Already the gathering parties of Roundheads are closing upon them, nearer and nearer, as they approach the most perilous point of the wild expedition, their only return-path across the Cherwell, Chisellhampton Bridge. Percy and O'Neal with difficulty hold the assailants in check; the case grows desperate at last, and Rupert stands at bay on Chalgrove Field.

It is Sunday morning, June 18th, 1643. The early church-bells are ringing over all Oxfordshire,—dying away in the soft air, among the sunny English hills, while Englishmen are drawing near each other with hatred in their hearts,—dying away, as on that other Sunday, eight months ago, when Baxter, preaching near Edgehill, heard the sounds of battle, and disturbed the rest of his saints by exclaiming, "To the fight!" But here there are no warrior-preachers, no bishops praying in surplices on the one

side, no dark-robed divines preaching on horseback on the other, no king in glittering armor, no Tutor Harvey in peaceful meditation beneath a hedge, pondering on the circulation of the blood, with hotter blood flowing so near him; all these were to be seen at Edgehill, but not here. This smaller skirmish rather turns our thoughts to Cisatlantic associations; its date suggests Bunker's Hill,—and its circumstances, Lexington. For this, also, is a marauding party, with a Percy among its officers, brought to a stand by a half-armed and angry peasantry.

Rupert sends his infantry forward, to secure the bridge, and a sufficient body of dragoons to line the mile-and-a-half of road between,—the remainder of the troops being drawn up at the entrance of a corn-field, several hundred acres in extent, and lying between the villages and the hills. The Puritans take a long circuit, endeavoring to get to windward of their formidable enemy,—a point judged as important, during the seventeenth century, in a land fight as in a naval engagement. They have with them some light field-pieces, artillery being the only point of superiority they yet claim; but these are not basilisks, nor falconets, nor culverins, (*colubri, couleuvres,*) nor drakes, (*dracones,*) nor warning-pieces,—they are the leathern guns of Gustavus Adolphus, made of light cast-iron and bound with ropes and leather. The Roundhead dragoons, dismounted, line a hedge near the Cavaliers, and plant their "swinc-feathers"; under cover of their fire the horse advance in line, matches burning. As they advance, one or two dash forward, at risk of their lives, flinging off the orange scarfs which alone distinguish them, in token that they desert to the royal cause. Prince Rupert falls back into the lane a little, to lead the other forces into his ambush of dragoons. These tactics do not come naturally to him, however; nor does he like the practice of the time, that two bodies of cavalry should ride up within pistol-shot of each other, and exchange a volley before they charge. He rather anticipates, in

his style of operations, the famous order of Frederick the Great: "The King hereby forbids all officers of cavalry, on pain of being broke with ignominy, ever to allow themselves to be attacked in any action by the enemy; but the Prussians must always attack them." Accordingly he restrains himself for a little while, chafing beneath the delay, and then, a soldier or two being suddenly struck down by the fire, he exclaims, "Yea! this insolency is not to be endured." The moment is come.

"God and Queen Mary!" shouts Rupert; "Charge!" In one instant that mass of motionless statues becomes a flood of lava; down in one terrible sweep it comes, silence behind it and despair before; no one notices the beauty of that brilliant chivalrous array,—all else is merged in the fury of the wild gallop; spurs are deep, reins free, blades grasped, heads bent; the excited horse feels the heel no more than he feels the hand; the uneven ground breaks their ranks,—no matter, they feel that they can ride down the world: Rupert first clears the hedge,—he is always first,—then comes the captain of his lifeguard, then the whole troop "jumble after them," in a spectator's piquant phrase. The dismounted Puritan dragoons break from the hedges and scatter for their lives, but the cavalry "bear the charge better than they have done since Worcester,"—that is, now they stand it an instant, then they did not stand it at all; the Prince takes them in flank and breaks them in pieces at the first encounter,—the very wind of the charge shatters them. Horse and foot, carbines and petronels, swords and pole-axes, are mingled in one struggling mass. Rupert and his men seem refreshed, not exhausted, by the weary night,—they seem incapable of fatigue; they spike the guns as they cut down the gunners, and, if any escape, it is because many in both armies wear the same red scarfs. One Puritan, surrounded by the enemy, shows such desperate daring that Rupert bids release him at last, and sends afterwards to Es-

sex to ask his name. One Cavalier bends, with a wild oath, to search the pockets of a slain enemy;—it is his own brother. O'Neal slays a standard-bearer, and thus restores to his company the right to bear a flag, a right they lost at Hopton Heath; Legge is taken prisoner and escapes; Urry proves himself no coward, though a renegade, and is trusted to bear to Oxford the news of the victory, being raised to knighthood in return.

For a victory of course it is. Nothing in England can yet resist these high-born, dissolute, reckless Cavaliers of Rupert's. "I have seen them running up walls twenty feet high," said the engineer consulted by the frightened citizens of Dorchester; "these defences of yours may possibly keep them out half an hour." Darlings of triumphant aristocracy, they are destined to meet with no foe that can match them, until they recoil at last before the plebeian pikes of the London train-bands. Nor can even Rupert's men claim to monopolize the courage of the King's party. The brilliant "show-troop" of Lord Bernard Stuart, comprising the young nobles having no separate command,—a troop which could afford to indulge in all the gorgeousness of dress, since their united incomes, Clarendon declares, would have exceeded those of the whole Puritan Parliament,—led, by their own desire, the triumphant charge at Edgehill, and threescore of their bodies were found piled on the spot where the Royal Standard was captured and rescued. Not less faithful were the Marquis of Newcastle's "Lambs," who took their name from the white woollen clothing which they refused to have dyed, saying that their hearts' blood would dye it soon enough; and so it did: only thirty survived the battle of Marston Moor, and the bodies of the rest were found in the field, ranked regularly, side by side, in death as in life.

But here at Chalgrove Field no such fortitude of endurance is needed; the enemy are scattered, and, as Rupert's Cavaliers are dashing on, in their accustomed headlong pursuit, a small, but

fresh force of Puritan cavalry appears behind the hedges and charges on them from the right,—two troops, hastily gathered, and in various garb. They are headed by a man in middle life and of noble aspect: once seen, he cannot easily be forgotten; but seen he will never be again, and, for the last time, Rupert and Hampden meet face to face.

The foremost representative men of their respective parties, they scarcely remember, perhaps, that there are ties and coincidences in their lives. At the marriage of Rupert's mother, the student Hampden was chosen to write the Oxford epithalamium, exulting in the prediction of some noble offspring to follow such a union. Rupert is about to be made General-in-chief of the Cavaliers; Hampden is looked to by all as the future General-in-chief of the Puritans. Rupert is the nephew of the King,—Hampden the cousin of Cromwell; and as the former is believed to be aiming at the Crown, so the latter is the only possible rival of Cromwell for the Protectorate,—"the eyes of all being fixed upon him as their *pater patriæ*." But in all the greater qualities of manhood, how far must Hampden be placed above the magnificent and gifted Rupert! In a congress of natural noblemen—for such do the men of the Commonwealth appear—he must rank foremost. It is difficult to avoid exaggeration in speaking of these men,—men whose deeds vindicate their words, and whose words are unsurpassed by Greek or Roman fame,—men whom even Hume can only criticize for a "mysterious jargon" which most of them did not use, and for a "vulgar hypocrisy" which few of them practised. Let us not underrate the self-forgetting loyalty of the Royalists,—the Duke of Newcastle laying at the King's feet seven hundred thousand pounds, and the Marquis of Worcester a million; but the sublimer poverty and abstinence of the Parliamentary party deserve a yet loftier meed,—Vane surrendering an office of thirty thousand pounds a year to promote public economy,—Hutchin-

son refusing a peerage and a fortune as a bribe to hold Nottingham Castle a little while for the King,—Eliot and Pym bequeathing their families to the nation's justice, having spent their all for the good cause. And rising to yet higher attributes, as they pass before us in the brilliant paragraphs of the courtly Clarendon, or the juster modern estimates of Forster, it seems like a procession of born sovereigns; while the more pungent epithets of contemporary wit only familiarize, but do not mar, the fame of Cromwell, (Cleveland's "Cæsar in a Clown,")—"William the Conqueror" Waller,—"young Harry" Vane,—"fiery Tom" Fairfax,—and "King Pym." But among all these there is no peer of Hampden, of him who came not from courts or camps, but from the tranquil study of his Davila, from that thoughtful retirement which was for him, as for his model, Coligny, the school of all noble virtues,—came to find himself at once a statesman and a soldier, receiving from his contemporary, Clarendon, no affectionate critic, the triple crown of historic praise, as being "the most able, resolute, and popular person in the kingdom." Who can tell how changed the destiny of England, had the Earl of Bedford's first compromise with the country party succeeded, and Hampden become the tutor of Prince Charles,—or could this fight at Chalgrove Field issue differently, and Hampden survive to be general instead of Essex, and Protector in place of Cromwell?

But that may not be. Had Hampden's earlier counsels prevailed, Rupert never would have ventured on his night foray; had his next suggestions been followed, Rupert never would have returned from it. Those failing, Hampden has come, gladly followed by Gunter and his dragoons, outstripping the tardy Essex, to dare all and die. In vain does Gunter perish beside his flag; in vain does Crosse, his horse being killed under him, spring in the midst of battle on another; in vain does "that great-spirited little Sir Samuel Luke" (the original of Hudibras) get

thrice captured and thrice escape. For Hampden, the hope of the nation, is fatally shot through the shoulder with two carbine-balls, in the first charge; the whole troop sees it with dismay; Essex comes up, as usual, too late, and the fight at Chalgrove Field is lost.

We must leave this picture, painted in the fading colors of a far-off time. Let us leave the noble Hampden, weak and almost fainting, riding calmly from the field, and wandering away over his own Chiltern meadows, that he loves so well,—leave him, drooping over his saddle, directing his horse first towards his father-in-law's house at Pyrton, where once he wedded his youthful bride, then turning towards Thame, and mustering his last strength to leap his tired steed across its boundary brook. A few days of laborious weakness, spent in letter-writing to urge upon Parliament something of that military energy which, if earlier adopted, might have saved his life,—and we see a last, funereal procession winding beneath the Chiltern hills, and singing the 90th Psalm as the mourners approach the tomb of the Hampdens, and the 43d as they return. And well may the "Weekly-Intelligencer" say of him, (June 27, 1643,) that "the memory of this deceased Colonel is such that in no age to come but it will more and more be had in honor and esteem; a man so religious, and of that prudence, judgment, temper, valor, and integrity, that he hath left few his like behind him."

And we must leave Rupert to his career of romantic daring, to be made President of Wales and Generalissimo of the army,—to rescue with unequalled energy Newark and York and the besieged heroine of Lathom House,—to fight through Newbury and Marston Moor and Naseby, and many a lesser field,—to surrender Bristol and be acquitted by court-martial, but hopelessly condemned by the King;—then to leave the kingdom, refusing a passport, and fighting his perilous way to the seaside;—then to wander over the world for years, astonishing Dutchmen by his seamanship, Austrians by his soldier-

ship, Spaniards and Portuguese by his buccaneering powers, and Frenchmen by his gold and diamonds and birds and monkeys and "richly-liveried Blackamoors";—then to reorganize the navy of England, exchanging characters with his fellow-commander, Monk, whom the ocean makes rash, as it makes Rupert prudent;—leave him to use nobly his declining years, in studious toils in Windsor Castle, the fulfilment of Milton's dream, outwatching the Bear with thrice-great Hermes, surrounded by strange old arms and instruments, and maps of voyages, and plans of battles, and the abstruse library which the "Harleian Miscellany" still records;—leave him to hunt and play at tennis, serve in the Hudson's Bay Company and the Board of Trade;—leave him to experiment in alchemy and astrology, in hydraulics, metallurgy,

gunpowder, perspective, quadrants, mezzotint, fish-hooks, and revolvers;—leave him to look from his solitary turret over hills and fields, now peaceful, but each the scene of some wild and warlike memory for him;—leave him to die a calm and honored death at sixty-three, outliving every companion of his early days. The busy world, which has no time to remember many, forgets him and remembers only the slain and defeated Hampden. The brilliant renown of the Prince was like the glass toys which record his ingenuity and preserve his name; the hammer and the anvil can scarcely mar them, yet a slight pressure of the finger, in the fatal spot, will burst them into glittering showers of dust. The full force of those iron times beat ineffectual upon Rupert;—Death touched him, and that shining fame sparkled and was shattered forever.

SPRING.

Ah! my beautiful violets,
 Stirring under the sod,
 Feeling, in all your being,
 The breath of the spirit of God
 Thrilling your delicate pulses,
 Warming your life-blood anew,—
 Struggle up into the Spring-light;
 I'm watching and waiting for you.

Stretch up your white arms towards me,
 Climb and never despair;
 Come! the blue sky is above you,
 Sunlight and soft warm air.
 Shake off the sleep from your eyelids,
 Work in the darkness awhile,
 Trust in the light that's above you,
 Win your way up to its smile.

Ah! do you know how the May-flowers,
 Down on the shore of the lake,
 Are whispering, one to another,
 'All in the silence, "Awake!"'
 Blushing from under the pine-leaves,
 Soon they will greet me anew,—
 But still, oh, my beautiful violets,
 I'll be watching and longing for you.

THE STEREOSCOPE AND THE STEREOGRAPH.

DEMOCRITUS of Abdera, commonly known as the Laughing Philosopher, probably because he did not consider the study of truth inconsistent with a cheerful countenance, believed and taught that all bodies were continually throwing off certain images like themselves, which subtle emanations, striking on our bodily organs, gave rise to our sensations. Epicurus borrowed the idea from him, and incorporated it into the famous system, of which Lucretius has given us the most popular version. Those who are curious on the matter will find the poet's description at the beginning of his fourth book. Forms, effigies, membranes, or *films*, are the nearest representatives of the terms applied to these effluences. They are perpetually shed from the surfaces of solids, as bark is shed by trees. *Cortex* is, indeed, one of the names applied to them by Lucretius.

These evanescent films may be seen in one of their aspects in any clear, calm sheet of water, in a mirror, in the eye of an animal by one who looks at it in front, but better still by the consciousness behind the eye in the ordinary act of vision. They must be packed like the leaves of a closed book; for suppose a mirror to give an image of an object a mile off, it will give one at every point less than a mile, though this were subdivided into a million parts. Yet the images will not be the same; for the one taken a mile off will be very small, at half a mile as large again, at a hundred feet fifty times as large, and so on, as long as the mirror can contain the image.

Under the action of light, then, a body makes its superficial aspect potentially present at a distance, becoming appreciable as a shadow or as a picture. But remove the cause,—the body itself,—and the effect is removed. The man beholdeth himself in the glass and goeth his way, and straightway both the mirror and the mirrored forget what manner

of man he was. These visible films or membranous *exuvie* of objects, which the old philosophers talked about, have no real existence, separable from their illuminated source, and perish instantly when it is withdrawn.

If a man had handed a metallic speculum to Democritus of Abdera, and told him to look at his face in it while his heart was beating thirty or forty times, promising that one of the films his face was shedding should stick there, so that neither he, nor it, nor anybody should forget what manner of man he was, the Laughing Philosopher would probably have vindicated his claim to his title by an explosion that would have astonished the speaker.

This is just what the Daguerreotype has done. It has fixed the most fleeting of our illusions, that which the apostle and the philosopher and the poet have alike used as the type of instability and unreality. The photograph has completed the triumph, by making a sheet of paper reflect images like a mirror and hold them as a picture.

This triumph of human ingenuity is the most audacious, remote, improbable, incredible,—the one that would seem least likely to be regained, if all traces of it were lost, of all the discoveries man has made. It has become such an everyday matter with us, that we forget its miraculous nature, as we forget that of the sun itself, to which we owe the creations of our new art. Yet in all the prophecies of dreaming enthusiasts, in all the random guesses of the future conquests over matter, we do not remember any prediction of such an inconceivable wonder, as our neighbor round the corner, or the proprietor of the small house on wheels, standing on the village common, will furnish any of us for the most painfully slender remuneration. No Century of Inventions includes this among its possibilities. Nothing but the vision

of a Laputan, who passed his days in extracting sunbeams out of cucumbers, could have reached such a height of delirium as to rave about the time when a man should paint his miniature by looking at a blank tablet, and a multitudinous wilderness of forest foliage or an endless Babel of roofs and spires stamp itself, in a moment, so faithfully and so minutely, that one may creep over the surface of the picture with his microscope and find every leaf perfect, or read the letters of distant signs, and see what was the play at the "Variétés" or the "Victoria," on the evening of the day when it was taken, just as he would sweep the real view with a spy-glass to explore all that it contains.

Some years ago, we sent a page or two to one of the magazines,—the "Knickerbocker," if we remember aright,—in which the story was told from the "Arabian Nights," of the three kings' sons, who each wished to obtain the hand of a lovely princess, and received for answer, that he who brought home the most wonderful object should obtain the lady's hand as his reward. Our readers, doubtless, remember the original tale, with the flying carpet, the tube which showed what a distant friend was doing by looking into it, and the apple which gave relief to the most desperate sufferings only by inhalation of its fragrance. The railroad-car, the telegraph, and the apple-flavored chloroform could and do realize, every day,—as was stated in the passage referred to, with a certain rhetorical amplitude not doubtfully suggestive of the lecture-room,—all that was fabled to have been done by the carpet, the tube, and the fruit of the Arabian story.

All these inventions force themselves upon us to the full extent of their significance. It is therefore hardly necessary to waste any considerable amount of rhetoric upon wonders that are so thoroughly appreciated. When human art says to each one of us, I will give you ears that can hear a whisper in New Orleans, and legs that can walk six hundred miles in

a day, and if, in consequence of any defect of rail or carriage, you should be so injured that your own very insignificant walking members must be taken off, I can make the surgeon's visit a pleasant dream for you, on awaking from which you will ask when he is coming to do that which he has done already,—what is the use of poetical or rhetorical amplification? But this other invention of *the mirror with a memory*, and especially that application of it which has given us the wonders of the stereoscope, is not so easily, completely, universally recognized in all the immensity of its applications and suggestions. The stereoscope, and the pictures it gives, are, however, common enough to be in the hands of many of our readers; and as many of those who are not acquainted with it must before long become as familiar with it as they are now with friction-matches, we feel sure that a few pages relating to it will not be unacceptable.

Our readers may like to know the outlines of the process of making daguerreotypes and photographs, as just furnished us by Mr. Whipple, one of the most successful operators in this country. We omit many of those details which are everything to the practical artist, but nothing to the general reader. We must premise, that certain substances undergo chemical alterations, when exposed to the light, which produce a change of color. Some of the compounds of silver possess this faculty to a remarkable degree,—as the common indelible marking-ink, (a solution of nitrate of silver,) which soon darkens in the light, shows us every day. This is only one of the innumerable illustrations of the varied effects of light on color. A living plant owes its brilliant hues to the sunshine; but a dead one, or the tints extracted from it, will fade in the same rays which clothe the tulip in crimson and gold,—as our lady-readers who have rich curtains in their drawing-rooms know full well. The sun, then, is a master of *chiaroscuro*, and, if he has a living petal for his pallet, is the first of colorists.—Let us walk into

his studio, and examine some of his painting machinery.

1. THE DAGUERRETYPE.—A silver-plated sheet of copper is resilvered by electro-plating, and perfectly polished. It is then exposed in a glass box to the vapor of iodine until its surface turns to a golden yellow. Then it is exposed in another box to the fumes of the bromide of lime until it becomes of a blood-red tint. Then it is exposed once more, for a few seconds, to the vapor of iodine. The plate is now sensitive to light, and is of course kept from it, until, having been placed in the darkened camera, the screen is withdrawn and the camera-picture falls upon it. In strong light, and with the best instruments, *three seconds'* exposure is enough,—but the time varies with circumstances. The plate is now withdrawn and exposed to the vapor of mercury at 212° . Where the daylight was strongest, the sensitive coating of the plate has undergone such a chemical change, that the mercury penetrates readily to the silver, producing a minute white granular deposit upon it, like a very thin fall of snow, drifted by the wind. The strong lights are little heaps of these granules, the middle lights thinner sheets of them; the shades are formed by the dark silver itself, thinly sprinkled only, as the earth shows with a few scattered snow-flakes on its surface. The precise chemical nature of these granules we care less for than their palpable presence, which may be perfectly made out by a microscope magnifying fifty diameters or even less.

The picture thus formed would soon fade under the action of light, in consequence of further changes in the chemical elements of the film of which it consists. Some of these elements are therefore removed by washing it with a solution of hyposulphite of soda, after which it is rinsed with pure water. It is now permanent in the light, but a touch wipes off the picture as it does the bloom from a plum. To fix it, a solution of hyposulphite of soda containing chloride of gold

is poured on the plate while this is held over a spirit-lamp. It is then again rinsed with pure water, and is ready for its frame.

2. THE PHOTOGRAPH.—Just as we must have a mould before we can make a cast, we must get a *negative* or reversed picture on glass before we can get our positive or natural picture. The first thing, then, is to lay a sensitive coating on a piece of glass,—crown-glass, which has a natural surface, being preferable to plate-glass. *Collodion*, which is a solution of gun-cotton in alcohol and ether, mingled with a solution of iodide and bromide of potassium, is used to form a thin coating over the glass. Before the plate is dry, it is dipped into a solution of nitrate of silver, where it remains from one to three or four minutes. Here, then, we have essentially the same chemical elements that we have seen employed in the daguerreotype,—namely, iodine, bromine, and silver; and by their mutual reactions in the last process we have formed the sensitive iodide and bromide of silver. The glass is now placed, still wet, in the camera, and there remains from three seconds to one or two minutes, according to circumstances. It is then washed with a solution of sulphate of iron. Every light spot in the camera-picture becomes dark on the sensitive coating of the glass-plate. But where the shadows or dark parts of the camera-picture fall, the sensitive coating is less darkened, or not at all, if the shadows are very deep, and so these shadows of the camera-picture become the lights of the glass-picture, as the lights become the shadows. Again, the picture is reversed, just as in every camera-obscura where the image is received on a screen direct from the lens. Thus the glass plate has the right part of the object on the left side of its picture, and the left part on its right side; its light is darkness, and its darkness is light. Everything is just as wrong as it can be, except that the relations of each wrong to the other wrongs are like the relations

of the corresponding rights to each other in the original natural image. This is a *negative* picture.

Extremes meet. Every given point of the picture is as far from truth as a lie can be. But in travelling away from the pattern it has gone round a complete circle, and is at once as remote from Nature and as near it as possible.—“How far is it to Taunton?” said a countryman, who was walking exactly the wrong way to reach that commercial and piscatory centre.—“‘Bäout twenty-five thäousan’ mild,”—said the boy he asked,—“‘f y’ go ‘z y’ ‘r’ goin’ näow, ‘n’ ‘bäout häaf a mild ‘f y’ turn right räoun’ ‘n’ go t’other way.”

The negative picture being formed, it is washed with a solution of hyposulphite of soda, to remove the soluble principles which are liable to decomposition, and then coated with shellac varnish to protect it.

This *negative* is now to give birth to a *positive*,—this mass of contradictions to assert its hidden truth in a perfect harmonious affirmation of the realities of Nature. Behold the process!

A sheet of the best linen paper is dipped in salt water and suffered to dry. Then a solution of nitrate of silver is poured over it and it is dried in a dark place. This paper is now sensitive; it has a conscience, and is afraid of daylight. Press it against the glass negative and lay them in the sun, the glass uppermost, leaving them so for from three to ten minutes. The paper, having the picture formed on it, is then washed with the solution of hyposulphite of soda, rinsed in pure water, soaked again in a solution of hyposulphite of soda, to which, however, the chloride of gold has been added, and again rinsed. It is then sized or varnished.

Out of the perverse and totally depraved negative,—where it might almost seem as if some magic and diabolic power had wrenched all things from their properties, where the light of the eye was darkness, and the deepest blackness was gilded with the brightest glare,—is to come the true end of all this series

of operations, a copy of Nature in all her sweet gradations and harmonies and contrasts.

We owe the suggestion to a great wit, who overflowed our small intellectual home-lot with a rushing freshet of fertilizing talk the other day,—one of our friends, who quarries thought on his own premises, but does not care to build his blocks into books and essays,—that perhaps this world is only the *negative* of that better one in which lights will be turned to shadows and shadows into light, but all harmonized, so that we shall see why these ugly patches, these misplaced gleams and blots, were wrought into the temporary arrangements of our planetary life.

For, lo! when the sensitive paper is laid in the sun under the negative glass, every dark spot on the glass arrests a sunbeam, and so the spot of the paper lying beneath remains unchanged; but every light space of the negative lets the sunlight through, and the sensitive paper beneath confesses its weakness, and betrays it by growing dark just in proportion to the glare that strikes upon it. So, too, we have only to turn the glass before laying it on the paper, and we bring all the natural relations of the object delineated back again,—its right to the right of the picture, its left to the picture's left.

On examining the glass negative by transmitted light with a power of a hundred diameters, we observe minute granules, whether crystalline or not we cannot say, very similar to those described in the account of the daguerreotype. But now their effect is reversed. Being opaque, they darken the glass wherever they are accumulated, just as the snow darkens our skylights. Where these particles are drifted, therefore, we have our shadows, and where they are thinly scattered, our lights. On examining the paper photographs, we have found no distinct granules, but diffused stains of deeper or lighter shades.

Such is the sun-picture, in the form in which we now most commonly meet it,—

for the daguerreotype, perfect and cheap as it is, and admirably adapted for miniatures, has almost disappeared from the field of landscape, still life, architecture, and *genre* painting, to make room for the photograph. Mr. Whipple tells us that even now he takes a much greater number of miniature portraits on metal than on paper; and yet, except occasionally a statue, it is rare to see anything besides a portrait shown in a daguerreotype. But the greatest number of sun-pictures we see are the photographs which are intended to be looked at with the aid of the instrument we are next to describe, and to the stimulus of which the recent vast extension of photographic copies of Nature and Art is mainly owing.

3. THE STEREOSCOPE.—This instrument was invented by Professor Wheatstone, and first described by him in 1838. It was only a year after this that M. Daguerre made known his discovery in Paris; and almost at the same time Mr. Fox Talbot sent his communication to the Royal Society, giving an account of his method of obtaining pictures on paper by the action of light. Iodine was discovered in 1811, bromine in 1826, chloroform in 1831, gun-cotton, from which collodion is made, in 1846, the electro-plating process about the same time with photography; "all things, great and small, working together to produce what seemed at first as delightful, but as fabulous, as Aladdin's ring, which is now as little suggestive of surprise as our daily bread."

A stereoscope is an instrument which makes surfaces look solid. All pictures in which perspective and light and shade are properly managed, have more or less of the effect of solidity; but by this instrument that effect is so heightened as to produce an appearance of reality which cheats the senses with its seeming truth.

There is good reason to believe that the appreciation of solidity by the eye is purely a matter of education. The famous case of a young man who underwent the operation of couching for cata-

ract, related by Cheselden, and a similar one reported in the Appendix to Müller's *Physiology*, go to prove that everything is seen only as a superficial extension, until the other senses have taught the eye to recognize *depth*, or the third dimension, which gives solidity, by converging outlines, distribution of light and shade, change of size, and of the texture of surfaces. Cheselden's patient thought "all objects whatever touched his eyes, as what he felt did his skin." The patient whose case is reported by Müller could not tell the form of a cube held obliquely before his eye from that of a flat piece of pasteboard presenting the same outline. Each of these patients saw only with one eye,—the other being destroyed, in one case, and not restored to sight until long after the first, in the other case. In two months' time Cheselden's patient had learned to know solids; in fact, he argued so logically from light and shade and perspective that he felt of pictures, expecting to find reliefs and depressions, and was surprised to discover that they were flat surfaces. If these patients had suddenly recovered the sight of *both* eyes, they would probably have learned to recognize solids more easily and speedily.

We can commonly tell whether an object is solid, readily enough with one eye, but still better with two eyes, and sometimes *only* by using both. If we look at a square piece of ivory with one eye alone, we cannot tell whether it is a scale of veneer, or the side of a cube, or the base of a pyramid, or the end of a prism. But if we now open the other eye, we shall see one or more of its sides, if it have any, and then know it to be a solid, and what kind of a solid.

We see something with the second eye which we did not see with the first; in other words, the two eyes see different pictures of the same thing, for the obvious reason that they look from points two or three inches apart. By means of these two different views of an object, the mind, as it were, *feels round it* and gets an idea of its solidity. We clasp an object with our eyes, as with our arms, or with our

hands, or with our thumb and finger, and then we know it to be something more than a surface. This, of course, is an illustration of the fact, rather than an explanation of its mechanism.

Though, as we have seen, the two eyes look on two different pictures, we perceive but one picture. The two have run together and become blended in a third, which shows us everything we see in each. But, in order that they should so run together, both the eye and the brain must be in a natural state. Push one eye a little inward with the forefinger, and the image is doubled, or at least confused. Only certain parts of the two retinæ work harmoniously together, and you have disturbed their natural relations. Again, take two or three glasses more than temperance permits, and you see double; the eyes are right enough, probably, but the brain is in trouble, and does not report their telegraphic messages correctly. These exceptions illustrate the every-day truth, that, when we are in right condition, our two eyes see two somewhat different pictures, which our perception combines to form one picture, representing objects in all their dimensions, and not merely as surfaces.

Now, if we can get two artificial pictures of any given object, one as we should see it with the right eye, the other as we should see it with the left eye, and then, looking at the right picture, and that only, with the right eye, and at the left picture, and that only, with the left eye, contrive some way of making these pictures run together as we have seen our two views of a natural object do, we shall get the sense of solidity that natural objects give us. The arrangement which effects it will be a *stereoscope*, according to our definition of that instrument. How shall we attain these two ends?

1. An artist can draw an object as he sees it, looking at it only with his right eye. Then he can draw a second view of the same object as he sees it with his left eye. It will not be hard to draw a cube or an octahedron in this way; in-

deed, the first stereoscopic figures were pairs of outlines, right and left, of solid bodies, thus drawn. But the minute details of a portrait, a group, or a landscape, all so nearly alike to the two eyes, yet not identical in each picture of our natural double view, would defy any human skill to reproduce them exactly. And just here comes in the photograph to meet the difficulty. A first picture of an object is taken,—then the instrument is moved a couple of inches or a little more, the distance between the human eyes, and a second picture is taken. Better than this, two pictures are taken at once in a double camera.

We were just now stereographed, ourselves, at a moment's warning, as if we were fugitives from justice. A skeleton shape, of about a man's height, its head covered with a black veil, glided across the floor, faced us, lifted its veil, and took a preliminary look. When we had grown sufficiently rigid in our attitude of studied ease, and got our umbrella into a position of thoughtful carelessness, and put our features with much effort into an unconstrained aspect of cheerfulness tempered with dignity, of manly firmness blended with womanly sensibility, of courtesy, as much as to imply,—“You honor me, Sir,” toned or sized, as one may say, with something of the self-assertion of a human soul which reflects proudly, “I am superior to all this,”—when, I say, we were all right, the spectral Mokanna dropped his long veil, and his waiting-slave put a sensitive tablet under its folds. The veil was then again lifted, and the two great glassy eyes stared at us once more for some thirty seconds. The veil then dropped again; but in the mean time, the shrouded sorcerer had stolen our double image; we were immortal. Posterity might thenceforth inspect us, (if not otherwise engaged,) not as a surface only, but in all our dimensions as an undisputed *solid* man of Boston.

2. We have now obtained the double-eyed or twin pictures, or *STEREOGRAPH*, if we may coin a name. But the pictures

are two, and we want to slide them into each other, so to speak, as in natural vision, that we may see them as one. How shall we make one picture out of two, the corresponding parts of which are separated by a distance of two or three inches?

We can do this in two ways. First, by *squinting* as we look at them. But this is tedious, painful, and to some impossible, or at least very difficult. We shall find it much easier to look through a couple of glasses that *squint for us*. If at the same time they *magnify* the two pictures, we gain just so much in the distinctness of the picture, which, if the figures on the slide are small, is a great advantage. One of the easiest ways of accomplishing this double purpose is to cut a convex lens through the middle, grind the curves of the two halves down to straight lines, and join them by their thin edges. This is a *squinting magnifier*, and if arranged so that with its right half we see the right picture on the slide, and with its left half the left picture, it squints them both inward so that they run together and form a single picture.

Such are the stereoscope and the photograph, by the aid of which *form* is henceforth to make itself seen through the world of intelligence, as thought has long made itself heard by means of the art of printing. The *morphotype*, or form-print, must hereafter take its place by the side of the *logotype* or word-print. The *stereograph*, as we have called the double picture designed for the stereoscope, is to be the card of introduction to make all mankind acquaintances.

The first effect of looking at a good photograph through the stereoscope is a surprise such as no painting ever produced. The mind feels its way into the very depths of the picture. The scraggy branches of a tree in the foreground run out at us as if they would scratch our eyes out. The elbow of a figure stands forth so as to make us almost uncomfortable. Then there is such a frightful amount of detail, that we have the same sense of infinite complexity which Nature

gives us. A painter shows us masses; the stereoscopic figure spares us nothing,—all must be there, every stick, straw, scratch, as faithfully as the dome of St. Peter's, or the summit of Mont Blanc, or the ever-moving stillness of Niagara. The sun is no respecter of persons or of things.

This is one infinite charm of the photographic delineation. Theoretically, a perfect photograph is absolutely inexhaustible. In a picture you can find nothing which the artist has not seen before you; but in a perfect photograph there will be as many beauties lurking, unobserved, as there are flowers that blush unseen in forests and meadows. It is a mistake to suppose one knows a stereoscopic picture when he has studied it a hundred times by the aid of the best of our common instruments. Do we know all that there is in a landscape by looking out at it from our parlor-windows? In one of the glass stereoscopic views of Table Rock, two figures, so minute as to be mere objects of comparison with the surrounding vastness, may be seen standing side by side. Look at the two faces with a strong magnifier, and you could identify their owners, if you met them in a court of law.

Many persons suppose that they are looking on *miniatures* of the objects represented, when they see them in the stereoscope. They will be surprised to be told that they see most objects as large as they appear in Nature. A few simple experiments will show how what we see in ordinary vision is modified in our perceptions by what we think we see. We made a sham stereoscope, the other day, with no glasses, and an opening in the place where the pictures belong, about the size of one of the common stereoscopic pictures. Through this we got a very ample view of the town of Cambridge, including Mount Auburn and the Colleges, in a single field of vision. We do not recognize how minute distant objects really look to us, without something to bring the fact home to our conceptions. A man does not deceive us as to his real size when we see

him at the distance of the length of Cambridge Bridge. But hold a common black pin before the eyes at the distance of distinct vision, and one-twentieth of its length, nearest the point, is enough to cover him so that he cannot be seen. The head of the same pin will cover one of the Cambridge horse-cars at the same distance, and conceal the tower of Mount Auburn, as seen from Boston.

We are near enough to an edifice to see it well, when we can easily read an inscription upon it. The stereoscopic views of the arches of Constantine and of Titus give not only every letter of the old inscriptions, but render the grain of the stone itself. On the pediment of the Pantheon may be read, not only the words traced by Agrippa, but a rough inscription above it, scratched or hacked into the stone by some wanton hand during an insurrectionary tumult.

This distinctness of the lesser details of a building or a landscape often gives us incidental truths which interest us more than the central object of the picture. Here is Alloway Kirk, in the churchyard of which you may read a real story by the side of the ruin that tells of more romantic fiction. There stands the stone "Erected by James Russell, seedsman, Ayr, in memory of his children,"—three little boys, James, and Thomas, and John, all snatched away from him in the space of three successive summer-days, and lying under the matted grass in the shadow of the old witch-haunted walls. It was Burns's Alloway Kirk we paid for, and we find we have bought a share in the griefs of James Russell, seedsman; for is not the stone that tells this blinding sorrow of real life the true centre of the picture, and not the roofless pile which reminds us of an idle legend?

We have often found these incidental glimpses of life and death running away with us from the main object the picture was meant to delineate. The more evidently accidental their introduction, the more trivial they are in themselves, the more they take hold of the imagination. It is common to find an object in one of

the twin pictures which we miss in the other; the person or the vehicle having moved in the interval of taking the two photographs. There is before us a view of the Pool of David at Hebron, in which a shadowy figure appears at the water's edge, in the right-hand farther corner of the right-hand picture only. This muffled shape stealing silently into the solemn scene has already written a hundred biographies in our imagination. In the lovely glass stereograph of the Lake of Brienz, on the left-hand side, a vaguely hinted female figure stands by the margin of the fair water; on the other side of the picture she is not seen. This is life; we seem to see her come and go. All the longings, passions, experiences, possibilities of womanhood animate that gliding shadow which has flitted through our consciousness, nameless, dateless, featureless, yet more profoundly real than the sharpest of portraits traced by a human hand. Here is the Fountain of the Ogre, at Berne. In the right picture two women are chatting, with arms akimbo, over its basin; before the plate for the left picture is got ready, "one shall be taken and the other left"; look! on the left side there is but one woman, and you may see the blur where the other is melting into thin air as she fades forever from your eyes.

Oh, infinite volumes of poems that I treasure in this small library of glass and pasteboard! I creep over the vast features of Rameses, on the face of his rock-hewn Nubian temple; I scale the huge mountain-crystal that calls itself the Pyramid of Cheops. I pace the length of the three Titanic stones of the wall of Baalbec,—mightiest masses of quarried rock that man has lifted into the air; and then I dive into some mass of foliage with my microscope, and trace the veinings of a leaf so delicately wrought in the painting not made with hands, that I can almost see its down and the green aphids that sucks its juices. I look into the eyes of the caged tiger, and on the scaly train of the crocodile, stretched on the sands of the river that has mirrored

a hundred dynasties. I stroll through Rhenish vineyards, I sit under Roman arches, I walk the streets of once buried cities, I look into the chasms of Alpine glaciers, and on the rush of wasteful cataracts. I pass, in a moment, from the banks of the Charles to the ford of the Jordan, and leave my outward frame in the arm-chair at my table, while in spirit I am looking down upon Jerusalem from the Mount of Olives.

"Give me the full tide of life at Charing Cross," said Dr. Johnson. Here is Charing Cross, but without the full tide of life. A perpetual stream of figures leaves no definite shapes upon the picture. But on one side of this stereoscopic doublet a little London "gent" is leaning pensively against a post; on the other side he is seen sitting at the foot of the next post;—what is the matter with the little "gent"?

The very things which an artist would leave out, or render imperfectly, the photograph takes infinite care with, and so makes its illusions perfect. What is the picture of a drum without the marks on its head where the beating of the sticks has darkened the parchment? In three pictures of the Ann Hathaway Cottage, before us,—the most perfect, perhaps, of all the paper stereographs we have seen,—the door at the farther end of the cottage is open, and we see the marks left by the rubbing of hands and shoulders as the good people came through the entry, or leaned against it, or felt for the latch. It is not impossible that scales from the epidermis of the trembling hand of Ann Hathaway's young suitor, Will Shakspeare, are still adherent about the old latch and door, and that they contribute to the stains we see in our picture.

Among the accidents of life, as delineated in the stereograph, there is one that rarely fails in any extended view which shows us the details of streets and buildings. There may be neither man nor beast nor vehicle to be seen. You may be looking down on a place in such a way that none of the ordinary marks of its being actually inhabited show themselves.

But in the rawest Western settlement and the oldest Eastern city, in the midst of the shanties at Pike's Peak and stretching across the court-yards as you look into them from above the clay-plastered roofs of Damascus, wherever man lives with any of the decencies of civilization, you will find the *clothes-line*. It may be a fence, (in Ireland,)—it may be a tree, (if the Irish license is still allowed us,)—but clothes-drying, or a place to dry clothes on, the stereoscopic photograph insists on finding, wherever it gives us a group of houses. This is the city of Berne. How it brings the people who sleep under that roof before us to see their sheets drying on that fence! and how real it makes the men in ~~that~~ house to look at their shirts hanging, arms down, from yonder line!

The reader will, perhaps, thank us for a few hints as to the choice of stereoscopes and stereoscopic pictures. The only way to be sure of getting a good instrument is to try a number of them, but it may be well to know which are worth trying. Those made with achromatic glasses may be as much better as they are dearer, but we have not been able to satisfy ourselves of the fact. We do not commonly find any trouble from chromatic aberration (or false color in the image). It is an excellent thing to have the glasses adjust by pulling out and pushing in, either by the hand, or, more conveniently, by a screw. The large instruments, holding twenty-five slides, are best adapted to the use of those who wish to show their views often to friends; the owner is a little apt to get tired of the unvarying round in which they present themselves. Perhaps we relish them more for having a little trouble in placing them, as we do nuts that we crack better than those we buy cracked. In optical effect, there is not much difference between them and the best ordinary instruments. We employ one stereoscope with adjusting glasses for the hand, and another common one upon a broad rosewood stand. The stand may

be added to any instrument, and is a great convenience.

Some will have none but glass stereoscopic pictures; paper ones are not good enough for them. Wisdom dwells not with such. It is true that there is a brilliancy in a glass picture, with a flood of light pouring through it, which no paper one, with the light necessarily falling *on* it, can approach. But this brilliancy fatigues the eye much more than the quiet reflected light of the paper stereograph. Twenty-five glass slides, well inspected in a strong light, are *good* for one headache, if a person is disposed to that trouble.

Again, a good paper photograph is infinitely better than a bad glass one. We have a glass stereograph of Bethlehem, which looks as if the ground were covered with snow,—and paper ones of Jerusalem, colored and uncolored, much superior to it both in effect and detail. The Oriental pictures, we think, are apt to have this white, patchy look; possibly we do not get the best in this country.

A good view on glass or paper is, as a rule, best uncolored. But some of the American views of Niagara on glass are greatly improved by being colored; the water being rendered vastly more suggestive of the reality by the deep green tinge. *Per contra*, we have seen some American views so carelessly colored that they were all the worse for having been meddled with. The views of the Hathaway Cottage, before referred to, are not only admirable in themselves, but some of them are admirably colored also. Few glass stereographs compare with them as real representatives of Nature.

In choosing stereoscopic pictures, beware of investing largely in *groups*. The owner soon gets tired to death of them. Two or three of the most striking among them are worth having, but mostly they are detestable,—vulgar repetitions of vulgar models, shamming grace, gentility, and emotion, by the aid of costumes, attitudes, expressions, and accessories worthy only of a Thespian society of candle-snuffers. In buying brides under veils,

and such figures, look at the lady's *hands*. You will very probably find the young countess is a maid-of-all-work. The presence of a human figure adds greatly to the interest of all architectural views, by giving us a standard of size, and should often decide our choice out of a variety of such pictures. No view pleases the eye which has glaring patches in it,—a perfectly white-looking river, for instance,—or trees and shrubs in full leaf, but looking as if they were covered with snow,—or glaring roads, or frosted-looking stones and pebbles. As for composition in landscape, each person must consult his own taste. All have agreed in admiring many of the Irish views, as those about the Lakes of Killarney, for instance, which are beautiful alike in general effect and in nicety of detail. The glass views on the Rhine, and of the Pyrenees in Spain, are of consummate beauty. As a specimen of the most perfect, in its truth and union of harmony and contrast, the view of the Circus of Gavarni, with the female figure on horseback in the front ground, is not surpassed by any we remember to have seen.

What is to come of the stereoscope and the photograph we are almost afraid to guess, lest we should seem extravagant. But, premising that we are to give a *colored* stereoscopic mental view of their prospects, we will venture on a few glimpses at a conceivable, if not a possible future.

Form is henceforth divorced from matter. In fact, matter as a visible object is of no great use any longer, except as the mould on which form is shaped. Give us a few negatives of a thing worth seeing, taken from different points of view, and that is all we want of it. Pull it down or burn it up, if you please. We must, perhaps, sacrifice some luxury in the loss of color; but form and light and shade are the great things, and even color can be added, and perhaps by and by may be got direct from Nature.

There is only one Coliseum or Pantheon; but how many millions of poten-

tial negatives have they shed, — representatives of billions of pictures, — since they were erected! Matter in large masses must always be fixed and dear; form is cheap and transportable. We have got the fruit of creation now, and need not trouble ourselves with the core. Every conceivable object of Nature and Art will soon scale off its surface for us. Men will hunt all curious, beautiful, grand objects, as they hunt the cattle in South America, for their *skins*, and leave the carcasses as of little worth.

The consequence of this will soon be such an enormous collection of forms that they will have to be classified and arranged in vast libraries, as books are now. The time will come when a man who wishes to see any object, natural or artificial, will go to the Imperial, National, or City Stereographic Library and call for its skin or form, as he would for a book at any common library. We do now distinctly propose the creation of a comprehensive and systematic stereographic library, where all men can find the special forms they particularly desire to see as artists, or as scholars, or as mechanics, or in any other capacity. Already a workman has been traveling about the country with stereographic views of furniture, showing his employer's patterns in this way, and taking orders for them. This is a mere hint of what is coming before long.

Again, we must have special stereographic collections, just as we have professional and other special libraries. And as a means of facilitating the formation of public and private stereographic collections, there must be arranged a comprehensive system of exchanges, so that there may grow up something like a universal currency of these bank-notes, or promises to pay in solid substance, which the sun has engraved for the great Bank of Nature.

To render comparison of similar objects, or of any that we may wish to see side by side, easy, there should be a stereographic *metre* or fixed standard of focal length for the camera lens, to fur-

nish by its multiples or fractions, if necessary, the scale of distances, and the standard of power in the stereoscope-lens. In this way the eye can make the most rapid and exact comparisons. If the "great elm" and the Cowthorpe oak, if the State-House and St. Peter's, were taken on the same scale, and looked at with the same magnifying power, we should compare them without the possibility of being misled by those partialities which might tend to make us overrate the indigenous vegetable and the dome of our native Michel Angelo.

The next European war will send us stereographs of battles. It is asserted that a bursting shell can be photographed. The time is perhaps at hand when a flash of light, as sudden and brief as that of the lightning which shows a whirling wheel standing stock still, shall preserve the very instant of the shock of contact of the mighty armies that are even now gathering. The lightning from heaven does actually photograph natural objects on the bodies of those it has just blasted, — so we are told by many witnesses. The lightning of clashing sabres and bayonets may be forced to stereotype itself in a stillness as complete as that of the tumbling tide of Niagara as we see it self-pictured.

We should be led on too far, if we developed our belief as to the transformations to be wrought by this greatest of human triumphs over earthly conditions, the divorce of form and substance. Let our readers fill out a blank check on the future as they like, — we give our indorsement to their imaginations beforehand. We are looking into stereoscopes as pretty toys, and wondering over the photograph as a charming novelty; but before another generation has passed away, it will be recognized that a new epoch in the history of human progress dates from the time when He who

—never but in uncreated light
Dwelt from eternity—

took a pencil of fire from the hand of the "angel standing in the sun," and placed it in the hands of a mortal.

THE MINISTER'S WOOING.

[Continued.]

CHAPTER XIV.

At the period of which we are speaking, no name in the New Republic was associated with ideas of more brilliant promise, and invested with a greater *prestige* of popularity and success, than that of Colonel Aaron Burr.

Sprung of a line distinguished for intellectual ability, the grandson of a man whose genius has swayed New England from that day to this, the son of parents eminent in their day for influential and popular talents, he united in himself the quickest perceptions and keenest delicacy of fibre with the most diamond hardness and unflinching steadiness of purpose;—apt, subtle, adroit, dazzling, no man in his time ever began life with fairer chances of success and fame.

His name, as it fell on the ear of our heroine, carried with it the suggestion of all this; and when, with his peculiarly engaging smile, he offered his arm, she felt a little of the flutter natural to a modest young person unexpectedly honored with the notice of one of the great ones of the earth, whom it is seldom the lot of humble individuals to know, except by distant report.

But, although Mary was a blushing and sensitive person, she was not what is commonly called a diffident girl;—her nerves had that healthy, steady poise which gave her presence of mind in the most unwonted circumstances.

The first few sentences addressed to her by her new companion were in a tone and style altogether different from any in which she had ever been approached,—different from the dashing frankness of her sailor lover, and from the rustic gallantry of her other admirers.

That indescribable mixture of ease and deference, guided by refined tact, which

shows the practised, high-bred man of the world, made its impression on her immediately, as the breeze on the chords of a wind-harp. She felt herself pleasantly swayed and breathed upon;—it was as if an atmosphere were around her in which she felt a perfect ease and freedom, an assurance that her lightest word might launch forth safely, as a tiny boat, on the smooth, glassy mirror of her listener's pleased attention.

"I came to Newport only on a visit of business," he said, after a few moments of introductory conversation. "I was not prepared for its many attractions."

"Newport has a great deal of beautiful scenery," said Mary.

"I have heard that it was celebrated for the beauty of its scenery, and of its ladies," he answered; "but," he added, with a quick flash of his dark eye, "I never realized the fact before."

The glance of the eye pointed and limited the compliment, and, at the same time, there was a wary shrewdness in it;—he was measuring how deep his shaft had sunk, as he always instinctively measured the person he talked with.

Mary had been told of her beauty since her childhood, notwithstanding her mother had essayed all that transparent, respectable hoaxing by which discreet mothers endeavor to blind their daughters to the real facts of such cases; but, in her own calm, balanced mind, she had accepted what she was so often told, as a quiet verity; and therefore she neither fluttered nor blushed on this occasion, but regarded her auditor with a pleased attention, as one who was saying obliging things.

"Cool!" he thought to himself,—"*hum!*—a little rustic belle, I suppose,—well aware of her own value;—rather piquant, on my word!"

"Shall we walk in the garden?" he said,—*"the evening is so beautiful."*

They passed out of the door and began promenading the long walk. At the bottom of the alley he stopped, and, turning, looked up the vista of box ending in the brilliantly-lighted rooms, where gentlemen, with powdered heads, lace ruffles, and glittering knee-buckles, were handing ladies in stiff brocades, whose towering heads were shaded by ostrich-feathers and sparkling with gems.

"Quite court-like, on my word!" he said. "Tell me, do you often have such brilliant entertainments as this?"

"I suppose they do," said Mary. "I never was at one before, but I sometimes hear of them."

"And *you* do not attend?" said the gentleman, with an accent which made the inquiry a marked compliment.

"No, I do not," said Mary; "these people generally do not visit us."

"What a pity," he said, "that their parties should want such an ornament! But," he added, "this night must make them aware of their oversight;—if you are not always in society after this, it will surely not be for want of solicitation."

"You are very kind to think so," replied Mary; "but even if it were to be so, I should not see my way clear to be often in such scenes as this."

Her companion looked at her with a glance a little doubtful and amused, and said, "And pray, why not? if the inquiry be not too presumptuous."

"Because," said Mary, "I should be afraid they would take too much time and thought, and lead me to forget the great object of life."

The simple gravity with which this was said, as if quite assured of the sympathy of her auditor, appeared to give him a secret amusement. His bright, dark eyes danced, as if he suppressed some quick repartee; but, drooping his long lashes deferentially, he said, in gentle tones, "I should like to know what so beautiful a young lady considers the great object of life."

Mary answered reverentially, in those words then familiar from infancy to every Puritan child, "To glorify God, and enjoy Him forever."

"*Really?*" he said, looking straight into her eyes with that penetrating glance with which he was accustomed to take the gauge of every one with whom he conversed.

"Is it *not*?" said Mary, looking back, calm and firm, into the sparkling, restless depths of his eyes.

At that moment, two souls, going with the whole force of their being in opposite directions, looked out of their windows at each other with a fixed and earnest recognition.

Burr was practised in every art of gallantry,—he had made womankind a study,—he never saw a beautiful face and form without a sort of restless desire to experiment upon it and try his power over the interior inhabitant; but, just at this moment, something streamed into his soul from those blue, earnest eyes, which brought back to his mind what pious people had so often told him of his mother, the beautiful and early-sainted Esther Burr. He was one of those persons who systematically managed and played upon himself and others, as a skillful musician, on an instrument. Yet one secret of his fascination was the *naïveté* with which, at certain moments, he would abandon himself to some little impulse of a nature originally sensitive and tender. Had the strain of feeling which now awoke in him come over him elsewhere, he would have shut down some spring in his mind, and excluded it in a moment; but, talking with a beautiful creature whom he wished to please, he gave way at once to the emotion;—real tears stood in his fine eyes, and he raised Mary's hand to his lips, and kissed it, saying,—

"Thank you, my beautiful child, for so good a thought. It is truly a noble sentiment, though practicable only to those gifted with angelic natures."

"Oh, I trust not," said Mary, earnestly touched and wrought upon more

than she herself knew, by the beautiful eyes, the modulated voice, the charm of manner, which seemed to enfold her like an Italian summer.

Burr sighed,—a real sigh of his better nature, but passed out with all the more freedom that he felt it would interest his fair companion, who, for the time being, was the one woman of the world to him.

"Pure and artless souls like yours," he said, "cannot measure the temptations of those who are called to the real battle of life in a world like this. How many nobler aspirations fall withered in the fierce heat and struggle of the conflict!"

He was saying then what he really felt, often bitterly felt,—but *using* this real feeling advisedly, and with skilful tact, for the purpose of the hour.

What was this purpose? To win the regard, the esteem, the tenderness of a religious, exalted nature shrined in a beautiful form,—to gain and hold ascendancy. It was a life-long habit,—one of those forms of refined self-indulgence which he pursued, thoughtless and reckless of consequences. He had found now the key-note of the character; it was a beautiful instrument, and he was well pleased to play on it.

"I think, Sir," said Mary, modestly, "that you forget the great provision made for our weakness."

"How?" he said.

"They that *wait on the Lord* shall renew their strength," she replied, gently.

He looked at her, as she spoke these words, with a pleased, artistic perception of the contrast between her worldly attire and the simple, religious earnestness of her words.

"She is entrancing!" he thought to himself,—*"so altogether fresh and naive!"*

"My sweet saint," he said, "such as you are the appointed guardians of us coarser beings. The prayers of souls given up to worldliness and ambition effect little. You must intercede for us. I am very orthodox, you see," he added, with

that subtle smile which sometimes irradiated his features. "I am fully aware of all that your reverend doctor tells you of the worthlessness of unregenerate doings; and so, when I see angels walking below, I try to secure 'a friend at court.'"

He saw that Mary looked embarrassed and pained at this banter, and therefore added, with a delicate shading of earnestness,—

"In truth, my fair young friend, I hope you *will* sometimes pray for me. I am sure, if I have any chance of good, it will come in such a way."

"Indeed I will," said Mary, fervently,—her little heart full, tears in her eyes, her breath coming quick,—and she added, with a deepening color, "I am sure, Mr. Burr, that there should be a covenant blessing for you, if for any one, for you are the son of a holy ancestry."

"*Eh, bien, mon ami, qu'est ce que tu fais ici?*" said a gay voice behind a clump of box; and immediately there started out, like a French picture from its frame, a dark-eyed figure, dressed like a Marquise of Louis XIV.'s time, with powdered hair, sparkling with diamonds.

"*Rien que m'amuser,*" he replied, with ready presence of mind, in the same tone, and then added,—*"Permit me, Madame, to present to you a charming specimen of our genuine New England flowers. Miss Scudder, I have the honor to present you to the acquaintance of Madame de Frontignac."*

"I am very happy," said the lady, with that sweet, lisping accentuation of English which well became her lovely mouth. "Miss Scudder, I hope, is very well."

Mary replied in the affirmative,—her eyes resting the while with pleased admiration on the graceful, animated face and diamond-bright eyes which seemed looking her through.

"*Monsieur la trouve bien séduisante apparemment,*" said the stranger, in a low, rapid voice, to the gentleman, in a manner which showed a mingling of pique and admiration.

"*Petite jalouse ! rassure-toi,*" he replied, with a look and manner into which, with that mobile force which was peculiar to him, he threw the most tender and passionate devotion. "*Ne suis-je pas à toi tout à fait ?*"—and as he spoke, he offered her his other arm. "Allow me to be an unworthy link between the beauty of France and America."

The lady swept a proud curtsy backward, bridled her beautiful neck, and signed for them to pass her. "I am waiting here for a friend," she said.

"Whatever is your will is mine," replied Burr, bowing with proud humility, and passing on with Mary to the supper-room.

Here the company were fast assembling, in that high tide of good-humor which generally sets in at this crisis of the evening.

The scene, in truth, was a specimen of a range of society which in those times could have been assembled nowhere else but in Newport. There stood Dr. H. in the tranquil majesty of his lordly form, and by his side, the alert, compact figure of his contemporary and theological opponent, Dr. Stiles, who, animated by the social spirit of the hour, was dispensing courtesies to right and left with the debonair grace of the trained gentleman of the old school. Near by, and engaging from time to time in conversation with them, stood a Jewish Rabbin, whose olive complexion, keen eye, and flowing beard gave a picturesque and foreign grace to the scene. Colonel Burr, one of the most brilliant and distinguished men of the New Republic, and Colonel de Frontignac, who had won for himself laurels in the corps of La Fayette, during the recent revolutionary struggle, with his brilliant, accomplished wife, were all unexpected and distinguished additions to the circle.

Burr gently cleared the way for his fair companion, and, purposely placing her where the full light of the wax chandeliers set off her beauty to the best advantage, devoted himself to her with a

subserviency as deferential as if she had been a goddess.

For all that, he was not unobservant, when, a few moments after, Madame de Frontignac was led in, on the arm of a Senator, with whom she was presently in full flirtation.

He observed, with a quiet, furtive smile, that, while she rattled and fanned herself, and listened with apparent attention to the flatteries addressed to her, she darted every now and then a glance keen as a steel blade towards him and his companion. He was perfectly adroit in playing off one woman against another, and it struck him with a pleasant sense of oddity, how perfectly unconscious his sweet and saintly neighbor was of the position in which she was supposed to stand by her rival; and poor Mary, all this while, in her simplicity, really thought that she had seen traces of what she would have called the "strivings of the spirit" in his soul. Alas! that a phrase weighed down with such mysterious truth and meaning should ever come to fall on the ear as mere empty cant!

With Mary it was a living form,—as were all her words; for in nothing was the Puritan education more marked than in the earnest *reality* and truthfulness which it gave to language; and even now, as she stands by his side, her large blue eye is occasionally fixed in dreamy reverie as she thinks what a triumph of Divine grace it would be, if these inward movings of her companion's mind *should* lead him, as all the pious of New England hoped, to follow in the footsteps of President Edwards, and forms wishes that she could see him some time when she could talk to him undisturbed.

She was too humble and too modest fully to accept the delicious flattery which he had breathed, in implying that her hand had had power to unseal the fountains of good in his soul; but still it thrilled through all the sensitive strings of her nature a tremulous flutter of suggestion.

She had read instances of striking and wonderful conversions from words dropped by children and women,—and sup-

pose some such thing should happen to her! and that this so charming and distinguished and powerful being should be called into the fold of Christ's Church by her means! No! it was too much to be hoped,—but the very possibility was thrilling.

When, after supper, Mrs. Scudder and the Doctor made their adieus, Burr's devotion was still unabated. With an enchanting mixture of reverence and fatherly protection, he waited on her to the last,—shawled her with delicate care, and handed her into the small, one-horse wagon,—as if it had been the coach of a duchess.

"I have pleasant recollections connected with this kind of establishment," he said, as, after looking carefully at the harness, he passed the reins into Mrs. Scudder's hands. "It reminds me of school-days and old times. I hope your horse is quite safe, Madam."

"Oh, yes," said Mrs. Scudder, "I perfectly understand him."

"Pardon the suggestion," he replied;—"what is there that a New England matron does *not* understand? Doctor, I must call by-and-by and have a little talk with you,—my theology, you know, needs a little straightening."

"We should all be happy to see you, Colonel Burr," said Mrs. Scudder; "we live in a very plain way, it is true,"—

"But can always find place for a friend,—that, I trust, is what you meant to say," he replied, bowing, with his own peculiar grace, as the carriage drove off.

"Really, a most charming person is this Colonel Burr," said Mrs. Scudder.

"He seems a very frank, ingenious young person," said the Doctor; "one cannot but mourn that the son of such gracious parents should be left to wander into infidelity."

"Oh, he is not an infidel," said Mary; "he is far from it, though I think his mind is a little darkened on some points."

"Ah," said the Doctor, "have you had any special religious conversation with him?"

"A little," said Mary, blushing; "and
VOL. III.

it seems to me that his mind is perplexed somewhat in regard to the doings of the unregenerate,—I fear that it has rather proved a stumbling-block in his way; but he showed so much feeling!—I could really see the tears in his eyes!"

"His mother was a most godly woman, Mary," said the Doctor. "She was called from her youth, and her beautiful person became a temple for the indwelling of the Holy Spirit. Aaron Burr is a child of many prayers, and therefore there is hope that he may yet be effectually called. He studied awhile with Bellamy," he added, musingly, "and I have often doubted whether Bellamy took just the right course with him."

"I hope he *will* call and talk with you," said Mary, earnestly; "what a blessing to the world, if such talents as his could become wholly consecrated!"

"Not many wise, not many mighty, not many noble are called," said the Doctor; "yet if it would please the Lord to employ my instrumentality and prayers, how much should I rejoice! I was struck," he added, "to-night, when I saw those Jews present, with the thought that it was, as it were, a type of that last ingathering, when both Jew and Gentile shall sit down lovingly together to the gospel feast. It is only by passing over and forgetting these present years, when so few are called and the gospel makes such slow progress, and looking unto that glorious time, that I find comfort. If the Lord but use me as a dumb stepping-stone to that heavenly Jerusalem, I shall be content."

Thus they talked while the wagon jogged soberly homeward, and the frogs and the turtles and the distant ripple of the sea made a drowsy, mingling concert in the summer-evening air.

Meanwhile Colonel Burr had returned to the lighted rooms, and it was not long before his quick eye espied Madame de Frontignac standing pensively in a window-recess, half hid by the curtain. He stole softly up behind her and whispered something in her ear.

In a moment she turned on him a

face glowing with anger, and drew back haughtily; but Burr remarked the glitter of tears, not quite dried even by the angry flush of her eyes.

"In what have I had the misfortune to offend?" he said, crossing his arms upon his breast. "I stand at the bar, and plead, Not guilty."

He spoke in French, and she replied in the same smooth accents,—

"It was not for her to dispute Monsieur's right to amuse himself."

Burr drew nearer, and spoke in those persuasive, pleading tones which he had ever at command, and in that language whose very structure in its delicate *tutoiement* gives such opportunity for gliding on through shade after shade of intimacy and tenderness, till gradually the haughty fire of the eyes was quenched in tears, and, in the sudden revulsion of a strong, impulsive nature, she said what she called words of friendship, but which carried with them all the warmth of that sacred fire which is given to woman to light and warm the temple of home, and which sears and scars when kindled for any other shrine.

And yet this woman was the wife of his friend and associate!

Colonel de Frontignac was a grave and dignified man of forty-five. Virginie de Frontignac had been given him to wife when but eighteen,—a beautiful, generous, impulsive, fulfil girl. She had accepted him gladly, for very substantial reasons. First, that she might come out of the convent where she was kept for the very purpose of educating her in ignorance of the world she was to live in. Second, that she might wear velvet, lace, cashmere, and jewels. Third, that she might be a Madame, free to go and come, ride, walk, and talk, without surveillance. Fourth,—and consequent upon this,—that she might go into company and have admirers and adorners.

She supposed, of course, that she loved her husband;—whom else should she love? He was the only man, except her father and brothers, that she had ever known; and in the fortnight that preceded

their marriage did he not send her the most splendid *bons-bons* every day, with bouquets of every pattern that ever taxed the brain of a Parisian *artiste*?—was not the *corbeille de mariage* a wonder and an envy to all her acquaintance?—and after marriage had she not found him always a steady, indulgent friend, easy to be coaxed as any grave papa?

On his part, Monsieur de Frontignac cherished his young wife as a beautiful, though somewhat absurd little pet, and amused himself with her frolics and gambols, as the gravest person often will with those of a kitten.

It was not until she knew Aaron Burr that poor Virginie de Frontignac came to that great awakening of her being which teaches woman what she is, and transforms her from a careless child to a deep-hearted, thinking, suffering human being.

For the first time, in his society she became aware of the charm of a polished and cultivated mind, able with exquisite tact to adapt itself to hers, to draw forth her inquiries, to excite her tastes, to stimulate her observation. A new world awoke around her,—the world of literature and taste, of art and of sentiment; she felt, somehow, as if she had gained the growth of years in a few months. She felt within herself the stirring of dim aspiration, the uprising of a new power of self-devotion and self-sacrifice, a trance of hero-worship, a cloud of high ideal images,—the lighting up, in short, of all that God has laid, ready to be enkindled, in a woman's nature, when the time comes to sanctify her as the pure priestess of a domestic temple. But, alas! it was kindled by one who did it only for an experiment, because he felt an artistic pleasure in the beautiful light and heat, and cared not, though it burned a soul away.

Burr was one of those men willing to play with any charming woman the game of those navigators who give to simple natives glass beads and feathers in return for gold and diamonds,—to accept from a woman her heart's blood in return for such odds and ends and clippings as he

can afford her from the serious ambition of life.

Look in with us one moment, now that the party is over, and the busy hum of voices and blaze of lights has died down to midnight silence and darkness; we make you clairvoyant, and you may look through the walls of this stately old mansion, still known as that where Rochambeau held his head-quarters, into this room, where two wax candles are burning on a toilette table, before an old-fashioned mirror. The slumberous folds of the curtains are drawn with stately gloom around a high bed, where Colonel de Frontignac has been for many hours quietly asleep; but opposite, resting with one elbow on the toilette table, her long black hair hanging down over her night-dress, and the brush lying listlessly in her hand, sits Virginie, looking fixedly into the dreamy depths of the mirror.

Scarcely twenty yet, all unwarned of the world of power and passion that lay slumbering in her girl's heart, led in the meshes of custom and society to utter vows and take responsibilities of whose nature she was no more apprised than is a slumbering babe, and now at last fully awake, feeling the whole power of that mysterious and awful force which we call love, yet shuddering to call it by its name, but by its light beginning to understand all she is capable of, and all that marriage should have been to her! She struggles feebly and confusedly with her fate, still clinging to the name of duty, and baptizing as friendship this strange new feeling which makes her tremble through all her being. How can she dream of danger in such a feeling, when it seems to her the awakening of all that is highest and noblest within her? She remembers when she thought of nothing beyond an operaticket or a new dress; and now she feels that there might be to her a friend for whose sake she would try to be noble and great and good,—for whom all self-denial, all high endeavor, all difficult virtue would become possible,—who would be to her life, inspiration, order, beauty.

She sees him as woman always sees

the man she loves,—noble, great, and good;—for when did a loving woman ever believe a man otherwise?—too noble, too great, too high, too good, she thinks, for her,—poor, trivial, ignorant coquette,—poor, childish, trifling Virginie! Has he not commanded armies? she thinks,—is he not eloquent in the senate? and yet, what interest he has taken in her, a poor, unformed, ignorant creature!—she never tried to improve herself till since she knew him. And he is so considerate, too,—so respectful, so thoughtful and kind, so manly and honorable, and has such a tender friendship for her, such a brotherly and fatherly solicitude! and yet, if she is haughty or imperious or severe, how humbled and grieved he looks! How strange that she could have power over such a man!

It is one of the saddest truths of this sad mystery of life, that woman is, often, never so much an angel as just the moment before she falls into an unsounded depth of perdition. And what shall we say of the man who leads her on as an experiment,—who amuses himself with taking woman after woman up these dazzling, delusive heights, knowing, as he certainly must, where they lead?

We have been told, in extenuation of the course of Aaron Burr, that he was not a man of gross passions or of coarse indulgence, but, in the most consummate and refined sense, a *man of gallantry*. This, then, is the descriptive name which polite society has invented for the man who does this thing!

Of old, it was thought that one who administered poison in the sacramental bread and wine had touched the very height of impious sacrilege; but this crime is white, by the side of his who poisons God's eternal sacrament of love and destroys a woman's soul through her noblest and purest affections.

We have given you the after-view of most of the actors of our little scene to-night, and therefore it is but fair that you should have a peep over the Colonel's shoulder, as he sums up the evening in a letter to a friend.

"MY DEAR ———

"As to the business, it gets on rather slowly. L—— and S—— are away, and the coalition cannot be formed without them; they set out a week ago from Philadelphia, and are yet on the road.

"Meanwhile, we have some providential alleviations, — as, for example, a wedding-party to-night, at the Wilcoxes', which was really quite an affair. I saw the prettiest little Puritan there that I have set eyes on for many a day. I really couldn't help getting up a flirtation with her, although it was much like flirting with a small copy of the 'Assembly's Catechism,' — of which last I had enough years ago, Heaven knows.

"But, really, such a *naïve*, earnest little saint, who has such real deadly belief, and opens such pitying blue eyes on one, is quite a stimulating novelty. I got myself well scolded by the fair Madame, (as angels scold,) and had to plead like a lawyer to make my peace; — after all, that woman really enchains me. Don't shake your head wisely, — 'What's going to be the end of it?' I'm sure I don't know; we'll see, when the time comes.

"Meanwhile, push the business ahead with all your might. I shall not be idle. D—— must canvass the Senate thoroughly. I wish I could be in two places at once, — I would do it myself. *Au revoir*.

"Ever yours,

"BURR."

CHAPTER XV.

"AND now, Mary," said Mrs. Scudder, at five o'clock the next morning, "to-day, you know, is the Doctor's fast; so we won't get any regular dinner, and it will be a good time to do up all our little odd jobs. Miss Prissy promised to come in for two or three hours this morning, to alter the waist of that black silk; and I shouldn't be surprised if we should get it all done and ready to wear by Sunday."

We will remark, by way of explanation to a part of this conversation, that our Doctor, who was a specimen of life

in earnest, made a practice, through the greater part of his pulpit course, of spending every Saturday as a day of fasting and retirement, in preparation for the duties of the Sabbath.

Accordingly, the early breakfast things were no sooner disposed of than Miss Prissy's quick footsteps might have been heard pattering in the kitchen.

"Well, Miss Scudder, how do you do this morning? and how do you do, Mary? Well, if you a'n't the beaters! up just as early as ever, and everything cleared away! I was telling Miss Wilcox there didn't ever seem to be anything done in Miss Scudder's kitchen, and I did verily believe you made your beds before you got up in the morning.

"Well, well, wasn't that a party last night?" she said, as she sat down with the black silk and prepared her ripping-knife. — "I must rip this myself, Miss Scudder; for there's a great deal in ripping silk so as not to let anybody know where it has been sewed. — You didn't know that I was at the party, did you? Well, I was. You see, I thought I'd just step round there, to see about that money to get the Doctor's shirt with, and there I found Miss Wilcox with so many things on her mind, and says she, 'Miss Prissy, you don't know how much it would help me if I had somebody like you just to look after things a little here.' And says I, 'Miss Wilcox, you just go right to your room and dress, and don't you give yourself one minute's thought about anything, and you see if I don't have everything just right.' And so, there I was, in for it; and I just staid through, and it was well I did, — for Dinah, she wouldn't have put near enough egg into the coffee, if it hadn't been for me; why, I just went and beat up four eggs with my own hands and stirred 'em into the grounds.

"Well, — but, really, wasn't I behind the door, and didn't I peep into the supper-room? I saw who was a-waitin' on Miss Mary. Well, they do say he's the handsomest, most fascinating man. Why, they say all the ladies in Philadelphia are in a perfect quarrel about him; and

I heard he said he had'n't seen such a beauty he didn't remember when."

"We all know that beauty is of small consequence," said Mrs. Scudder. "I hope Mary has been brought up to feel that."

"Oh, of course," said Miss Prissy, "it's just like a fading flower; all is to be good and useful,—and that's what she is. I told 'em that her beauty was the least part of her; though I must say, that dress did fit like a biscuit,—if 'twas my own fitting."

"But, Miss Scudder, what do you think I heard 'em saying about the good Doctor?"

"I'm sure I don't know," said Mrs. Scudder; "I only know they couldn't say anything bad."

"Well, not bad exactly," said Miss Prissy,—“but they say he's getting such strange notions in his head. Why, I heard some of 'em say, he's going to come out and preach against the slave-trade; and I'm sure I don't know what Newport folks will do, if that's wicked. There a'n't hardly any money here that's made any other way; and I hope the Doctor a'n't a-going to do anything of that sort.”

"I believe he is," said Mrs. Scudder; "he thinks it's a great sin, that ought to be rebuked;—and I think so too," she added, bracing herself resolutely; "that was Mr. Scudder's opinion when I first married him, and it's mine."

"Oh,—ah,—yes,—well,—if it's a sin, of course," said Miss Prissy; "but then—dear me!—it don't seem as if it could be. Why, just think how many great houses are living on it;—why, there's General Wilcox himself, and he's a very nice man; and then there's Major Seaforth; why, I could count you off a dozen,—all our very first people. Why, Doctor Stiles doesn't think so, and I'm sure he's a good Christian. Doctor Stiles thinks it's a dispensation for giving the light of the gospel to the Africans. Why, now I'm sure, when I was a-workin' at Deacon Stebbins', I stopped over Sunday once 'cause Miss Stebbins she was weakly,—'twas when

she was getting up, after Samuel was born,—no, on the whole, I believe it was Nehemiah,—but, any way, I remember I staid there, and I remember, as plain as if 'twas yesterday, just after breakfast, how a man went driving by in a chaise, and the Deacon he went out and stopped him ('cause you know he was justice of the peace) for travelling on the Lord's day, and who should it be but Tom Seaforth?—he told the Deacon his father had got a ship-load of negroes just come in,—and the Deacon he just let him go; 'cause I remember he said that was a plain work of necessity and mercy.* Well, now who would 'a' thought it? I believe the Doctor is better than most folks, but then the best people may be mistaken, you know."

"The Doctor has made up his mind that it's his duty," said Mrs. Scudder. "I'm afraid it will make him very unpopular; but I, for one, shall stand by him."

"Oh, certainly, Miss Scudder, you are doing just right exactly. Well, there's one comfort, he'll have a great crowd to hear him preach; 'cause, as I was going round through the entries last night, I heard 'em talking about it,—and Colonel Burr said he should be there, and so did the General, and so did Mr. What's-his-name there, that Senator from Philadelphia. I tell you, you'll have a full house."

It was to be confessed that Mrs. Scudder's heart rather sunk than otherwise at this announcement; and those who have felt what it is to stand almost alone in the right, in the face of all the first families of their acquaintance, may perhaps find some compassion for her,—since, after all, truth is invisible, but "first families" are very evident. First families are often very agreeable, undeniably respectable, fearfully virtuous, and it takes great faith to resist an evil principle which incarnates itself in the suavities of their breeding and amiability; and therefore it was that Mrs. Scudder felt her heart heavy within her, and could with a very good

* A fact.

grace have joined in the Doctor's Saturday fast.

As for the Doctor, he sat the while tranquil in his study, with his great Bible and his Concordance open before him, culling, with that patient assiduity for which he was remarkable, all the terrible texts which that very unceremonious and old-fashioned book rains down so unsparingly on the sin of oppressing the weak.

First families, whether in Newport or elsewhere, were as invisible to him as they were to Moses during the forty days that he spent with God on the mount; he was merely thinking of his message,—thinking only how he should shape it, so as not to leave one word of it unsaid,—not even imagining in the least what the result of it was to be. He was but a voice, but an instrument,—the passive instrument through which an almighty will was to reveal itself; and the sublime fatalism of his faith made him as dead to all human considerations as if he had been a portion of the immutable laws of Nature herself.

So, the next morning, although all his friends trembled for him when he rose in the pulpit, he never thought of trembling for himself; he had come in the covered way of silence from the secret place of the Most High, and felt himself still abiding under the shadow of the Almighty. It was alike to him, whether the house was full or empty,—whoever were decreed to hear the message would be there; whether they would hear or forbear was already settled in the counsels of a mightier will than his,—he had the simple duty of utterance.

The ruinous old meeting-house was never so radiant with station and gentility as on that morning. A June sun shone brightly; the sea sparkled with a thousand little eyes; the birds sang all along the way; and all the notables turned out to hear the Doctor. Mrs. Scudder received into her pew, with dignified politeness, Colonel Burr and Colonel and Madame de Frontignae. General Wilcox and his portly dame, Major

Seaforth, and we know not what of Vernons and De Wolfs, and other grand old names, were represented there; stiff silks rustled, Chinese fans fluttered, and the last court fashions stood revealed in bonnets.

Everybody was looking fresh and amiable,—a charming and respectable set of sinners, come to hear what the Doctor would find to tell them about their transgressions.

Mrs. Scudder was calculating consequences; and, shutting her eyes on the too evident world about her, prayed that the Lord would overrule all for good. The Doctor prayed that he might have grace to speak the truth; and the whole truth. We have yet on record, in his published works, the great argument of that day, through which he moved with that calm appeal to the reason which made his results always so weighty.

"If these things be true," he said, after a condensed statement of the facts of the case, "then the following terrible consequences, which may well make all shudder and tremble who realize them, force themselves upon us, namely: that all who have had any hand in this iniquitous business, whether directly or indirectly, or have used their influence to promote it, or have consented to it, or even connived at it, or have not opposed it by all proper exertions of which they are capable,—all these are, in a greater or less degree, chargeable with the injuries and miseries which millions have suffered and are suffering, and are guilty of the blood of millions who have lost their lives by this traffic in the human species. Not only the merchants who have been engaged in this trade, and the captains who have been tempted by the love of money to engage in this cruel work, and the slave-holders of every description, are guilty of shedding rivers of blood, but all the legislatures who have authorized, encouraged, or even neglected to suppress it to the utmost of their power, and all the individuals in private stations who have in any way aided in this business, consented to it, or have not opposed it to

the utmost of their ability, have a share in this guilt.

"This trade in the human species has been the first wheel of commerce in Newport, on which every other movement in business has chiefly depended; this town has been built up, and flourished in times past, at the expense of the blood, the liberty, and the happiness of the poor Africans; and the inhabitants have lived on this, and by it have gotten most of their wealth and riches. If a bitter woe is pronounced on him 'that buildeth his house by unrighteousness and his chambers by wrong,' Jer. *xxii.* 13,—to him 'that buildeth a town with blood, and stablisheth a city by iniquity,' Hab. *ii.* 12,—to 'the bloody city,' Ezek. *xxiv.* 6,—what a heavy, dreadful woe hangs over the heads of all those whose hands are defiled by the blood of the Africans, especially the inhabitants of this State and this town, who have had a distinguished share in this unrighteous and bloody commerce!"

He went over the recent history of the country, expatiated on the national declaration so lately made, that all men are born equally free and independent and have natural and inalienable rights to liberty, and asked with what face a nation declaring such things could continue to hold thousands of their fellow-men in abject slavery. He pointed out signs of national disaster which foreboded the wrath of Heaven,—the increase of public and private debts, the spirit of murmuring and jealousy of rulers among the people, divisions and contentions and bitter party alienations, the jealous irritation of England constantly endeavoring to hamper our trade, the Indians making war on the frontiers, the Algerines taking captive our ships and making slaves of our citizens,—all

evident tokens of the displeasure and impending judgment of an offended Justice.

The sermon rolled over the heads of the gay audience, deep and dark as a thunder-cloud, which in a few moments changes a summer sky into heaviest gloom. Gradually an expression of intense interest and deep concern spread over the listeners; it was the magnetism of a strong mind, which held them for a time under the shadow of his own awful sense of God's almighty justice.

It is said that a little child once described his appearance in the pulpit by saying, "I saw God there, and I was afraid."

Something of the same effect was produced on his audience now; and it was not till after sermon, prayer, and benediction were all over, that the respectables of Newport began gradually to un-stiffen themselves from the spell, and to look into each other's eyes for comfort, and to reassure themselves that after all they were the first families, and going on the way the world had always gone, and that the Doctor, of course, was a radical and a fanatic.

When the audience streamed out, crowding the broad aisle, Mary descended from the singers, and stood with her psalm-book in hand, waiting at the door to be joined by her mother and the Doctor. She overheard many hard words from people who, an evening or two before, had smiled so graciously upon them. It was therefore with no little determination of manner that she advanced and took the Doctor's arm, as if anxious to associate herself with his well-earned unpopularity,—and just at this moment she caught the eye and smile of Colonel Burr, as he bowed gracefully, yet not without a suggestion of something sarcastic in his eye.

[To be continued.]

THE PROFESSOR AT THE BREAKFAST-TABLE.

WHAT HE SAID, WHAT HE HEARD, AND WHAT HE SAW.

YOU don't look so dreadful poor in the face as you did a while back. Bloated some, I expect.

This was the cheerful and encouraging remark with which the Poor Relation greeted the divinity-student one morning.

Of course every good man considers it a great sacrifice on his part to continue living in this transitory, unsatisfactory, and particularly unpleasant world. This is so much a matter of course, that I was surprised to see the divinity-student change color. He took a look at a small and uncertain-minded glass which hung slanting forward over the chapped sideboard. The image it returned to him had the color of a very young pea somewhat over-boiled. The scenery of a long tragic drama flashed through his mind as the lightning-express-train *whishes* by a station: the gradual dismantling process of disease; friends looking on, sympathetic, but secretly chuckling over their own stomachs of iron and lungs of caoutchouc; nurses attentive, but calculating their crop, and thinking how soon it will be ripe, so that they can go to your neighbor, who is good for a year or so longer; doctors assiduous, but giving themselves a mental shake, as they go out of your door, that throws off your particular grief as a duck sheds a rain-drop from his oily feathers; undertakers solemn, but happy; then the great subsoil cultivator, who plants, but never looks for fruit in his garden; then the stone-cutter, who finds the lie that has been waiting for you on a slab ever since the birds or beasts made their tracks on the new red sandstone; then the grass and the dandelions and the buttercups, —Earth saying to the mortal body, with her sweet symbolism, "You have seared my bosom, but you are forgiven"; then a glimpse of the soul as a floating con-

sciousness without very definite form or place, but dimly conceived of as an upright column of vapor or mist several times larger than life-size, so far as it could be said to have any size at all, wandering about and living a thin and half-awake life for want of good old-fashioned solid *matter* to come down upon with foot and fist,—in fact, having neither foot nor fist, nor conveniences for taking the sitting posture.

And yet the divinity-student was a good Christian, and those heathen images which remind one of the childlike fancies of the dying Adrian were only the efforts of his imagination to give shape to the formless and position to the placeless. Neither did his thoughts spread themselves out and link themselves as I have displayed them. They came confusedly into his mind like a heap of broken mosaics,—sometimes a part of the picture complete in itself, sometimes connected fragments, and sometimes only single severed stones.

They did not diffuse a light of celestial joy over his countenance. On the contrary, the Poor Relation's remark turned him pale, as I have said; and when the terrible wrinkled and jaundiced looking-glass turned him green in addition, and he saw himself in it, it seemed to him as if it were all settled, and his book of life were to be shut not yet half-read, and go back to the dust of the under-ground archives. He coughed a mild short cough, as if to point the direction in which his downward path was tending. It was an honest little cough enough, so far as appearances went. But coughs are ungrateful things. You find one out in the cold, take it up and nurse it and make everything of it, dress it up warm, give it all sorts of balsams and other food it likes, and carry it round in your bosom as if it were a miniature lapdog. And by-

and-by its little bark grows sharp and savage, and—confound the thing!—you find it is a wolf's whelp that you have got there, and he is gnawing in the breast where he has been nestling so long.—The Poor Relation said that somebody's surrup was good for folks that were gettin' into a bad way. The landlady had heard of desperate cases cured by cherry-pictorial.

Whiskey's the fellah,—said the young man John.—Make it into punch, cold at dinner-time 'n' hot at bed-time. I'll come up 'n' show you how to mix it. Haven't any of you seen the wonderful fat man exhibitin' down in Hanover Street?

Master Benjamin Franklin rushed into the dialogue with a breezy exclamation, that he had seen a great pieter outside of the place where the fat man was exhibitin'. Tried to get in at half-price, but the man at the door looked at his teeth and said he was more'n ten year old.

It isn't two years,—said the young man John,—since that fat fellah was exhibitin' here as the Livin' Skeleton. Whiskey—that's what did it,—real Burbon's the stuff. Hot water, sugar, 'n' jest a little shavin' of lemon-skin in it,—*skin*, mind you, none o' your juice; take it off thin,—shape of one of them flat curls the factory-girls wear on the sides of their foreheads.

But I am a teetotaller,—said the divinity-student, in a subdued tone;—not noticing the enormous length of the bow-string the young fellow had just drawn.

He took up his hat and went out.

I think you have worried that young man more than you meant,—I said.—I don't believe he will jump off of one of the bridges, for he has too much principle; but I mean to follow him and see where he goes, for he looks as if his mind were made up to something.

I followed him at a reasonable distance. He walked doggedly along, looking neither to the right nor the left, turned into State Street, and made for a well-known Life-Insurance Office. Luckily, the doctor was there and overhauled him

on the spot. There was nothing the matter with him, he said, and he could have his life insured as a sound one. He came out in good spirits, and told me this soon after.

This led me to make some remarks the next morning on the manners of well-bred and ill-bred people.

I began,—The whole essence of true gentle-breeding (one does not like to say gentility) lies in the wish and the art to be agreeable. Good-breeding is *surface-Christianity*. Every look, movement, tone, expression, subject of discourse, that may give pain to another is habitually excluded from conversational intercourse. This is the reason why rich people are apt to be so much more agreeable than others.

—I thought you were a great champion of equality,—said the discreet and severe lady who had accompanied our young friend, the Latin Tutor's daughter.

I go politically for equality,—I said,—and socially for *the* quality.

Who are the "quality,"—said the Model, etc.,—in a community like ours?

I confess I find this question a little difficult to answer,—I said.—Nothing is better known than the distinction of social ranks which exists in every community, and nothing is harder to define. The great gentlemen and ladies of a place are its real lords and masters and mistresses; they are the *quality*, whether in a monarchy or a republic; mayors and governors and generals and senators and ex-presidents are nothing to them. How well we know this, and how seldom it finds a distinct expression! Now I tell you truly, I believe in man as man, and I disbelieve in all distinctions except such as follow the natural lines of cleavage in a society which has crystallized according to its own true laws. But the essence of equality is to be able to say the truth; and there is nothing more curious than these truths relating to the stratification of society.

Of all the facts in this world that do not take hold of immortality, there is not

one so intensely real, permanent, and engrossing as this of social position,—as you see by the circumstance that the core of all the great social orders the world has seen has been, and is still, for the most part, a privileged class of gentlemen and ladies arranged in a regular scale of precedence among themselves, but superior as a body to all else.

Nothing but an ideal Christian equality, which we have been getting farther away from since the days of the Primitive Church, can prevent this subdivision of society into classes from taking place everywhere,—in the great centres of our republic as much as in old European monarchies. Only there position is more absolutely hereditary,—here it is more completely elective.

—Where is the election held? and what are the qualifications? and who are the electors?—said the Model.

Nobody ever sees when the vote is taken; there never is a formal vote. The women settle it mostly; and they know wonderfully well what is presentable, and what can't stand the blaze of the chandeliers and the critical eye and ear of people trained to know a staring shade in a ribbon, a false light in a jewel, an ill-bred tone, an angular movement, everything that betrays a coarse fibre and cheap training. As a general thing, you do not get elegance short of two or three removes from the soil, out of which our best blood doubtless comes,—quite as good, no doubt, as if it came from those old prize-fighters with iron pots on their heads, to whom some great people are so fond of tracing their descent through a line of small artisans and petty shopkeepers whose veins have held base fluid enough to fill the Cloaca Maxima!

Does not money go everywhere?—said the Model.

Almost. And with good reason. For though there are numerous exceptions, rich people are, as I said, commonly altogether the most agreeable companions. The influence of a fine house, graceful furniture, good libraries, well-

ordered tables, trim servants, and, above all, a position so secure that one becomes unconscious of it, gives a harmony and refinement to the character and manners which we feel, even if we cannot explain their charm. Yet we can get at the reason of it by thinking a little.

All these appliances are to shield the sensibility from disagreeable contacts, and to soothe it by varied natural and artificial influences. In this way the mind, the taste, the feelings, grow delicate, just as the hands grow white and soft when saved from toil and incased in soft gloves. The whole nature becomes subdued into suavity. I confess I like the quality-ladies better than the common kind even of literary ones. They haven't read the last book, perhaps, but they attend better to you when you are talking to them. If they are never learned, they make up for it in tact and elegance. Besides, I think, on the whole, there is less self-assertion in diamonds than in dogmas. I don't know where you will find a sweeter portrait of humility than in Esther, the poor play-girl of King Ahasuerus; yet Esther put on her royal apparel when she went before her lord. I have no doubt she was a more gracious and agreeable person than Deborah, who judged the people and wrote the story of Sisera. The wisest woman you talk with is ignorant of something that you know, but an elegant woman never forgets her elegance.

Dowdiness is clearly an expression of imperfect vitality. The highest fashion is intensely alive,—not alive necessarily to the truest and best things, but with its blood tingling, as it were, in all its extremities and to the farthest point of its surface, so that the feather in its bonnet is as fresh as the crest of a fighting-cock, and the rosette on its slipper as clean-cut and *pimpant* (pronounce it English fashion,—it is a good word) as a dahlia. As a general rule, that society where flattery is acted is much more agreeable than that where it is spoken. Don't you see why? Attention and deference don't

require you to make fine speeches expressing your sense of unworthiness (lies) and returning all the compliments paid you. This is one reason.

—A woman of sense ought to be above flattering any man,—said the Model.

[*My reflection.* Oh! oh! no wonder you didn't get married. Served you right.] *My remark.* Surely, Madam,—if you mean by flattery telling people boldly to their faces that they are this or that, which they are not. But a woman who does not carry a halo of good feeling and desire to make everybody contented about with her wherever she goes,—an atmosphere of grace, mercy, and peace, of at least six feet radius, which wraps every human being upon whom she voluntarily bestows her presence, and so flatters him with the comfortable thought that she is rather glad he is alive than otherwise, isn't worth the trouble of talking to, *as a woman*; she may do well enough to hold discussions with.

—I don't think the Model exactly liked this. She said,—a little spitefully, I thought,—that a sensible man might stand a little praise, but would of course soon get sick of it, if he were in the habit of getting much.

Oh, yes,—I replied,—just as men get sick of tobacco. It is notorious how apt they are to get tired of that vegetable.

—That's so!—said the young fellow John.—I've got tired of my cigars and burnt 'em all up.

I am heartily glad to hear it,—said the Model.—I wish they were all disposed of in the same way.

So do I,—said the young fellow John.

Can't you get your friends to unite with you in committing those odious instruments of debauchery to the flames in which you have consumed your own?

I wish I could,—said the young fellow John.

It would be a noble sacrifice,—said the Model,—and every American woman would be grateful for you. Let us

burn them all in a heap out in the yard.

That a'n't my way,—said the young fellow John;—I burn 'em one 't time,—little end in my mouth and big end outside.

—I watched for the effect of this sudden change of programme, when it should reach the calm stillness of the Model's interior apprehension, as a boy watches for the splash of a stone which he has dropped into a well. But before it had fairly reached the water, poor Iris, who had followed the conversation with a certain interest until it turned this sharp corner, (for she seems rather to fancy the young fellow John,) laughed out such a clear, loud laugh, that it started us all off, as the locust-cry of some full-throated soprano drags a multitudinous chorus after it. It was plain that some dam or other had broken in the soul of this young girl, and she was squaring up old scores of laughter, out of which she had been cheated, with a grand flood of merriment that swept all before it. So we had a great laugh all round, in which the Model—who, if she had as many virtues as there are spokes to a wheel, all compacted with a personality as round and complete as its tire, yet wanted that one little addition of grace, which seems so small, and is as important as the linchpin in trundling over the rough ways of life—had not the tact to join. She seemed to be “stuffy” about it, as the young fellow John said. In fact, I was afraid the joke would have cost us both our new lady-boarders. It had no effect, however, except, perhaps, to hasten the departure of the elder of the two, who could, on the whole, be spared.

—I had meant to make this note of our conversation a text for a few axioms on the matter of breeding. But it so happened, that, exactly at this point of my record, a very distinguished philosopher, whom several of our boarders and myself go to hear, and whom no doubt many of my readers follow habitually, treated this matter of *manners*. Up to this point, if I have been so fortunate as

to coincide with him in opinion, and so unfortunate as to try to express what he has more felicitously said, nobody is to blame; for what has been given thus far was all written before the lecture was delivered. But what shall I do now? He told us it was childish to lay down rules for deportment,—but he could not help laying down a few.

Thus,—*Nothing so vulgar as to be in a hurry.*—True, but hard of application. People with short legs step quickly, because legs are pendulums, and swing more times in a minute the shorter they are. Generally a natural rhythm runs through the whole organization: quick pulse, fast breathing, hasty speech, rapid trains of thought, excitable temper. *Stillness* of person and steadiness of features are signal marks of good-breeding. Vulgar persons can't sit still, or, at least, they must work their limbs or features.

Talking of one's own ails and grievances.—Bad enough, but not so bad as insulting the person you talk with by remarking on his ill-looks, or appearing to notice any of his personal peculiarities.

Apologizing.—A very desperate habit,—one that is rarely cured. Apology is only egotism wrong side out. Nine times out of ten, the first thing a man's companion knows of his shortcoming is from his apology. It is mighty presumptuous on your part to suppose your small failures of so much consequence that you must make a talk about them.

Good dressing, quiet ways, low tones of voice, lips that can wait, and eyes that do not wander,—shyness of personalities, except in certain intimate communions,—to be *light in hand* in conversation, to have ideas, but to be able to make talk, if necessary, without them,—to belong to the company you are in, and not to yourself,—to have nothing in your dress or furniture so fine that you cannot afford to spoil it and get another like it, yet to preserve the harmonies throughout your person and dwelling: I should say that this was a fair capital of manners to begin with.

Under bad manners, as under graver faults, lies very commonly an overestimate of our special individuality, as distinguished from our generic humanity. It is just here that the very highest society asserts its superior breeding. Among truly elegant people of the highest *ton*, you will find more real equality in social intercourse than in a country village. As nuns drop their birth-names and become Sister Margaret and Sister Mary, so high-bred people drop their personal distinctions and become brothers and sisters of conversational charity. Nor are fashionable people without their heroism. I believe there are men that have shown as much self-devotion in carrying a lone wall-flower down to the supper-table as ever saint or martyr in the act that has canonized his name. There are Florence Nightingales of the ballroom, whom nothing can hold back from their errands of mercy. They find out the red-handed, gloveless undergraduate of bucolic antecedents, as he squirms in his corner, and distil their soft words upon him like dew upon the green herb. They reach even the poor relation, whose dreary apparition saddens the perfumed atmosphere of the sumptuous drawing-room. I have known one of these angels ask, *of her own accord*, that a desolate middle-aged man, whom nobody seemed to know, should be presented to her by the hostess. He wore no shirt-collar,—he had on black gloves,—and was flourishing a red bandanna handkerchief! Match me this, ye proud children of poverty, who boast of your paltry sacrifices for each other! Virtue in humble life! What is that to the glorious self-renunciation of a martyr in pearls and diamonds? As I saw this noble woman bending gracefully before the social mendicant,—the white billows of her beauty heaving under the foam of the traitorous laces that half-revealed them,—I should have wept with sympathetic emotion, but that tears, except as a private demonstration, are an ill-disguised expression of self-consciousness and vanity, which is inadmissible in good society.

I have sometimes thought, with a pang, of the position in which political chance or contrivance might hereafter place some one of our fellow-citizens. It has happened hitherto, so far as my limited knowledge goes, that the President of the United States has always been what might be called in general terms a gentleman. But what if at some future time the choice of the people should fall upon one on whom that lofty title could not, by any stretch of charity, be bestowed? This may happen,—how soon the future only knows. Think of this miserable man of coming political possibilities,—an unrepresentable boor, sucked into office by one of those eddies in the flow of popular sentiment which carry straws and chips into the public harbor, while the prostrate trunks of the monarchs of the forest hurry down on the senseless stream to the gulf of political oblivion! Think of him, I say, and of the concentrated gaze of good society through its thousand eyes, all confluent, as it were, in one great burning-glass of ice that shrivels its wretched object in fiery torture, itself cold as the glacier of an unsunned cavern! No,—there will be angels of good-breeding then as now, to shield the victim of free institutions from himself and from his torturers. I can fancy a lovely woman playfully withdrawing the knife which he would abuse by making it an instrument for the conveyance of food,—or, failing in this kind artifice, sacrificing herself by imitating his use of that implement; how much harder than to plunge it into her bosom, like Lucretia! I can see her studying his provincial dialect until she becomes the Champollion of New England or Western or Southern barbarisms. She has learned that *hâow* means *what*; that *thinkin'* is the same thing as *thinking*; or she has found out the meaning of that extraordinary monosyllable, which no single-tongued phonographer can make legible, prevailing on the banks of the Hudson and at its embouchure, and elsewhere,—what they say when they think they say *first*, (*fe-eest*,—*fe* as in the French *le*),—or

that *cheer* means *chair*,—or that *urritation* means *irritation*,—and so of other enormities. Nothing surprises her. The highest breeding, you know, comes round to the Indian standard,—to take everything coolly,—*nil admirari*,—if you happen to be learned and like the Roman phrase for the same thing.

If you like the company of people that stare at you from head to foot to see if there is a hole in your coat, or if you have not grown a little older, or if your eyes are not yellow with jaundice, or if your complexion is not a little faded, and so on, and then convey the fact to you, in the style in which the Poor Relation addressed the divinity-student,—go with them as much as you like. I hate the sight of the wretches. Don't for mercy's sake think I hate *them*; the distinction is one my friend or I drew long ago. No matter where you find such people; they are clowns. The rich woman who looks and talks in this way is not half so much a lady as her Irish servant, whose pretty "saving your presence," when she has to say something which offends her natural sense of good manners, has a hint in it of the breeding of courts, and the blood of old Milesian kings, which very likely runs in her veins,—thinned by two hundred years of potato, which, being an underground fruit, tends to drag down the generations that are made of it to the earth from which it came, and, filling their veins with starch, turn them into a kind of human vegetable.

I say, if you like such people, go with them. But I am going to make a practical application of the example at the beginning of this particular record, which some young people who are going to choose professional advisers by-and-by may remember and thank me for. If you are making choice of a physician, be sure you get one, if possible, with a cheerful and serene countenance. A physician is not—at least, ought not to be—an executioner; and a sentence of death on his face is as bad as a warrant for execution signed by the Governor. As a general rule, no man has a right to tell another

by word or look that he is going to die. It may be necessary in some extreme cases; but as a rule, it is the last extreme of impertinence which one human being can offer to another. "You have killed me," said a patient once to a physician who had rashly told him he was incurable. He ought to have lived six months, but he was dead in six weeks. If we will only let Nature and the God of Nature alone, persons will commonly learn their condition as early as they ought to know it, and not be cheated out of their natural birthright of hope of recovery, which is intended to accompany sick people as long as life is comfortable, and is graciously replaced by the hope of heaven, or at least of rest, when life has become a burden which the bearer is ready to let fall.

Underbred people tease their sick and dying friends to death. The chance of a gentleman or lady with a given mortal ailment to live a certain time is as good again as that of the common sort of coarse people. As you go down the social scale, you reach a point at length where the common talk in sick rooms is of churchyards and sepulchres, and a kind of perpetual vivisection is forever carried on, upon the person of the miserable sufferer.

And so, in choosing your clergyman, other things being equal, prefer the one of a wholesome and cheerful habit of mind and body. If you can get along with people who carry a certificate in their faces that their goodness is so great as to make them very miserable, your children cannot. And whatever offends one of these little ones cannot be right in the eyes of Him who loved them so well.

After all, as *you* are a gentleman or a lady, you will probably select gentlemen for your bodily and spiritual advisers, and then all will be right.

This repetition of the above words,—*gentleman and lady*,—which could not be conveniently avoided, reminds me how much use is made of them by those who ought to know what they mean. Thus,

at a marriage ceremony, once, of two very excellent persons who had been at service, instead of, Do you take this man, etc.? and, Do you take this woman? how do you think the officiating clergyman put the questions? It was, Do you, Miss So and So, take this GENTLEMAN? and, Do you, Mr. This or That, take this LADY?! What would any English duchess, ay, or the Queen of England herself, have thought, if the Archbishop of Canterbury had called her and her bridegroom anything but plain woman and man at such a time?

I don't doubt the Poor Relation thought it was all very fine, if she happened to have been in the church; but if the worthy man who uttered these monstrous words—monstrous in such a connection—had known the ludicrous surprise, the convulsion of inward disgust and contempt, that seized upon many of the persons who were present,—had guessed what a sudden flash of light it threw on the Dutch gilding, the pinchbeck, the shabby, perking pretension belonging to certain social layers,—so inherent in their whole mode of being, that the holiest offices of religion cannot exclude its impertinences,—the good man would have given his marriage-fee twice over to recall that superb and full-blown vulgarity. Any persons whom it could please have no better notion of what the words referred to signify than of the meaning of *apsides* and *asymptotes*.

MAN! Sir! WOMAN! Sir! Gentility is a fine thing, not to be undervalued, as I have been trying to explain; but humanity comes before that.

"When Adam dived and Eve span,
Where was then the gentleman?"

The beauty of that plainness of speech and manners which comes from the finest training is not to be understood by those whose *habitat* is below a certain level. Just as the exquisite sea-anemones and all the graceful ocean-flowers die out at some fathoms below the surface, the elegances and suavities of life die out one by one as we sink through the social

scale. Fortunately, the virtues are more tenacious of life, and last pretty well until we get down to the mud of absolute pauperism, where they do not flourish greatly.

—I had almost forgotten about our boarders. As the Model of all the Virtues is about to leave us, I find myself wondering what is the reason we are not all very sorry. Surely we all like good persons. She is a good person. Therefore we like her.—Only we don't.

This brief syllogism, and its briefer negative, involving the principle which some English conveyancer borrowed from a French wit and embodied in the lines by which *Dr. Fell* is made unamiably immortal,—this syllogism, I say, is one that most persons have had occasion to construct and demolish, respecting somebody or other, as I have done for the Model. “Pious and painefull.” Why has that excellent old phrase gone out of use? Simply because these good *painefull* or painstaking persons proved to be such nuisances in the long run, that the word “painefull” came, before people thought of it, to mean *paingiving* instead of *pains-taking*.

—So, the old fellah's off to-morrah,
—said the young man John.

Old fellow?—said I,—whom do you mean?

Why, the chap that came with our little beauty,—the old boy in petticoats.

—Now that means something,—said I to myself.—These rough young rascals very often hit the nail on the head, if they do strike with their eyes shut. A real woman does a great many things without knowing why she does them; but these pattern machines mix up their intellects with everything they do, just like men. They can't help it, no doubt; but we can't help getting sick of them, either. Intellect is to a woman's nature what her watch-spring skirt is to her dress; it ought to underlie her silks and embroideries, but not to show itself too staringly on the outside.—You don't know, perhaps, but I will tell you;—the brain is the palest of all the internal organs, and the heart

the reddest. Whatever comes from the brain carries the hue of the place it came from, and whatever comes from the heart carries the heat and color of its birth-place.

The young man John did not hear my *soliloque*, of course, but sent up one more bubble from our sinking conversation, in the form of a statement, that she was at liberty to go to a personage who receives no visits, as is commonly supposed, from virtuous people.

Why, I ask again, (of my reader,) should a person who never did anybody any wrong, but, on the contrary, is an estimable and intelligent, nay, a particularly enlightened and exemplary member of society, fail to inspire interest, love, and devotion? Because of the *reversed current* in the flow of thought and emotion. The red heart sends all its instincts up to the white brain to be analyzed, chilled, blanched, and so become pure reason, which is just exactly what we do not want of woman as woman. The current should run the other way. The nice, calm, cold thought, which in women shapes itself so rapidly that they hardly know it as thought, should always travel to the lips *viâ* the heart. It does so in those women whom all love and admire. It travels the wrong way in the Model. That is the reason why the Little Gentleman said, “I hate her, I hate her.” That is the reason why the young man John called her the “old fellah,” and banished her to the company of the great Unpresentable. That is the reason why I, the Professor, am picking her to pieces with scalpel and forceps. That is the reason why the young girl whom she has befriended repays her kindness with gratitude and respect, rather than with the devotion and passionate fondness which lie sleeping beneath the calmness of her amber eyes. I can see her, as she sits between this estimable and most correct of personages and the misshapen, crotchety, often violent and explosive little man on the other side of her, leaning and swaying towards him as she speaks, and looking into his sad eyes as

if she found some fountain in them at which her soul could quiet its thirst.

Women like the Model are a natural product of a chilly climate and high culture. It is not

"The frolic wind that breathes the spring,
Zephyr with Aurora playing,"

when the two meet

—"on beds of violets blue,
And fresh-blown roses washed in dew,"

that claim such women as their offspring. It is rather the east wind, as it blows out of the fogs of Newfoundland, and clasps a clear-eyed wintry noon on the chill bridal couch of a New England ice-quarry.—Don't throw up your cap now, and hurrah as if this were giving up everything, and turning against the best growth of our latitudes,—the daughters of the soil. The brain-women never interest us like the heart-women; white roses please less than red. But our Northern seasons have a narrow green streak of spring, as well as a broad white zone of winter,—they have a glowing band of summer and a golden stripe of autumn in their many-colored wardrobe; and women are born to us that wear all these hues of earth and heaven in their souls. Our ice-eyed brain-women are really admirable, if we only ask of them just what they can give, and no more. Only compare them, talking or writing, with one of those babbling, chattering dolls, of warmer latitudes, who do not know enough even to keep out of print, and who are interesting to us only as specimens of *arrest of development* for our psychological cabinets.

Good-bye, Model of all the Virtues! We can spare you now. A little clear perfection, undiluted with human weakness, goes a great way. Go! be useful, be honorable and honored, be just, be charitable, talk pure reason, and help to disenchant the world by the light of an achromatic understanding. Good-bye! Where is my Béranger? I must read "Frétilton."

Fair play for all. But don't claim incompatible qualities for anybody. Jus-

tice is a very rare virtue in our community. Everything that public sentiment cares about is put into a Papin's digester, and boiled under high pressure till all is turned into one homogeneous pulp, and the very bones give up their jelly. What are all the strongest epithets of our dictionary to us now? The critics and politicians, and especially the philanthropists, have chewed them, till they are mere wads of syllable-fibre, without a suggestion of their old pungency and power.

Justice! A good man respects the rights even of brute matter and arbitrary symbols. If he writes the same word twice in succession, by accident, he always erases the one that stands *second*; has not the first-comer the prior right? This act of abstract justice, which I trust many of my readers, like myself, have often performed, is a curious anti-illustration, by the way, of the absolute wickedness of human dispositions. Why doesn't a man always strike out the *first* of the two words, to gratify his diabolical love of *injustice*?

So, I say, we owe a genuine, substantial tribute of respect to these filtered intellects which have left their womanhood on the strainer. They are so clear that it is a pleasure at times to look at the world of thought through them. But the rose and purple tints of richer natures they cannot give us, and it is not just to them to ask it.

Fashionable society gets at these rich natures very often in a way one would hardly at first think of. It loves vitality above all things, sometimes disguised by affected languor, always well kept under by the laws of good-breeding,—but still it loves abundant life, opulent and showy organizations,—the spherical rather than the plane trigonometry of female architecture,—plenty of red blood, flashing eyes, tropical voices, and forms that bear the splendors of dress without growing pale beneath their lustre. Among these you will find the most delicious women you will ever meet,—women whom dress and flattery and the round

of city gayeties cannot spoil,—talking with whom, you forget their diamonds and laces,—and around whom all the nice details of elegance, which the cold-blooded beauty next them is scanning so nicely, blend in one harmonious whole, too perfect to be disturbed by the petulant sparkle of a jewel, or the yellow glare of a bangle, or the gay toss of a feather.

There are many things that I, personally, love better than fashion or wealth. Not to speak of those highest objects of our love and loyalty, I think I love ease and independence better than the golden slavery of perpetual *matinées* and *soirées*, or the pleasures of accumulation.

But fashion and wealth are two very solemn realities, which the frivolous class of moralists have talked a great deal of silly stuff about. Fashion is only the attempt to realize Art in living forms and social intercourse. What business has a man who knows nothing about the beautiful, and cannot pronounce the word *view*, to talk about fashion to a set of people who, if one of the quality left a card at their doors, would contrive to keep it on the very top of their heap of the names of their two-story acquaintances, till it was as yellow as the Codex Vaticanus?

Wealth, too,—what an endless repetition of the same foolish trivialities about it! Take the single fact of its alleged uncertain tenure and transitory character. In old times, when men were all the time fighting and robbing each other,—in those tropical countries where the Sabæans and the Chaldeans stole all a man's cattle and camels, and there were frightful tornadoes and rains of fire from heaven, it was true enough that riches took wings to themselves not unfrequently in a very unexpected way. But, with common prudence in investments, it is not so now. In fact, there is nothing earthly that lasts so well, on the whole, as money. A man's learning dies with him; even his virtues fade out of remembrance; but the dividends on the stocks

he bequeathes to his children live and keep his memory green.

I do not think there is much courage or originality in giving utterance to truths that everybody knows, but which get overlaid by conventional trumpery. The only distinction which it is necessary to point out to feeble-minded folk is this: that, in asserting the breadth and depth of that significance which gives to fashion and fortune their tremendous power, we do not indorse the extravagances which often disgrace the one, nor the meanness which often degrades the other.

A remark which seems to contradict a universally current opinion is not generally to be taken “neat,” but watered with the ideas of common-sense and commonplace people. So, if any of my young friends should be tempted to waste their substance on white kids and “all-rounds,” or to insist on becoming millionnaires at once, by anything I have said, I will give them references to some of the class referred to, well known to the public as literary diluents, who will weaken any truth so that there is not an old woman in the land who cannot take it with perfect impunity.

I am afraid some of the blessed saints in diamonds will think I mean to flatter them. I hope not;—if I do, set it down as a weakness. But there is so much foolish talk about wealth and fashion, (which, of course, draw a good many heartless and essentially vulgar people into the glare of their candelabra, but which have a real respectability and meaning, if we will only look at them stereoscopically, with both eyes instead of one,) that I thought it a duty to speak a few words for them. Why can't somebody give us a list of things that everybody thinks and nobody says, and another list of things that everybody says and nobody thinks?

Lest my parish should suppose we have forgotten graver matters in these lesser topics, I beg them to drop these trifles and read the following lesson for the day.

THE TWO STREAMS.

Behold the rocky wall
That down its sloping sides
Pours the swift rain-drops, blending, as they
fall,
In rushing river-tides!

Yon stream, whose sources run
Turned by a pebble's edge,
Is Athabasca, rolling toward the sun
Through the cleft mountain-ledge.

The slender rill had strayed,
But for the slanting stone,
To evening's ocean, with the tangled braid
Of foam-flecked Oregon.

So from the heights of Will
Life's parting stream descends,
And, as a moment turns its slender rill,
Each widening torrent bends,—

From the same cradle's side,
From the same mother's knee,—
One to long darkness and the frozen tide,
One to the Peaceful Sea!

REVIEWS AND LITERARY NOTICES.

Sixty Years' Gleanings from Life's Harvest.
A Genuine Autobiography. By JOHN
BROWN, Proprietor of the University
Billiard-Rooms, Cambridge. New York:
Appleton & Company. 1859.

WE are all familiar with that John Brown whom the minstrel has immortalized as being the possessor of a diminutive youth of the aboriginal American race, who, in the course of the ditty, is multiplied from "one little Injun" into "ten little Injuns," and who, in a succeeding stanza, by an ingenious amphibænic process, is again reduced to the singular number. As far as we are aware, the author of this "genuine autobiography" claims no relationship with the famous owner of tender redskins. The multiplicity of adventures of which he has been the hero demands for him, however, the same notice that a multiplicity of "Injuns" has insured to his illustrious namesake.

We have always had a pet theory, that a plain and minute narrative of any ordinary man's life, stated with simplicity and without any reference to dramatic effect or the elegances of composition, would possess an immediate interest for the public. We cannot know too much about men. No man's life is so uneventful as to be incapable of amusing and instructing. The same event is never the same to more than one person; no two see it from the same

point of view. And as we want to know more of men than of incidents, every one's record of trifles is useful. A book written by a Cornish miner, whose life passes in subterranean monotony, sparing none of the petty and ever-recurring details that make up his routinized existence, would, if set down in the baldest language, be a valuable contribution to literature. But we rarely, if ever, find a man sufficiently free from vanity and the demon of composition to tell us plainly what has happened to him. The moment the working-man gets a pen into his hand, he is, as it were, possessed. He is no longer himself. He has not the courage to come out naked and show himself in all his grime and strength. The instant that he conceives the idea of putting himself on paper he borrows somebody else's clothes, and, instead of a free, manly figure, we have a wretched scarecrow in a coat too small or too large for him,—generally the latter. For it is a curious fact, that the more uneducated a man is,—in which condition his ordinary language must of necessity be proportionately idiomatic,—the greater pains he takes, when he has formed the resolution of composing, to be splendid and expansive in his style. He racks his brains until he rummages out imperfect memories of the turgid paragraphs of cheap newspapers and novels which he has some time or other read, and forthwith

struts off with all the finest feathers in the dictionary rustling about him.

Mr. John Brown, the hero of the Autobiography before us, is no exception to this unhappy rule. The son of a butcher, he became in boyhood a sheep-driver, was then apprenticed to a shoemaker, got into trouble and a prison, enlisted as a soldier, deserted, turned strolling player, shipped on board a man-of-war, tried again to desert, was flogged at the gratings, beheld Napoleon on board the Bellerophon, was discharged from the navy, consorted with thieves and prize-fighters, appeared on the London stage with success, married and starved, became the pet of the Cambridge students, whom he assisted in amateur theatricals, started a stage-coach line to London and failed, set up a billiard-room, got into innumerable street-fights and always came off conqueror, was elected town-councillor of Cambridge and made a fortune, which it is to be hoped he is now enjoying.

Here was material for a book. From the glimpses of his *personnel* which we occasionally catch through all Mr. Brown's splendid writing, we should say that he was a man of a strong, hearty nature, full of indomitable energy, and possessed with a truly Saxon predilection for the use of his fists. The number of physical contests in which he was chief actor renders his volume almost epical in character. Invulnerable as Achilles and quarrelsome as Hector, he strides over the bodies of innumerable foes. If some of his friends, the Seniors, at Cambridge, would only put his adventures into Greek verse, he might descend to posterity in sounding hexameters with the sons of Telamon and Thetis.

The plain narrative portions of Mr. Brown's volume possess much real interest. His adventures with the strolling players, the insight he gives us into the life of a journeyman shoemaker, and his reminiscences of his friends, the Jew old-clothesmen, the pick-pockets, and the prize-fighters, are so many steaks cut warm from the living world, and are good, substantial food for thought. But he seldom forgets himself long, and is natural only by fits and starts. After he has been striding along for a short time with a free, manly gait, he suddenly bethinks himself that he is writing a book. The malign influences

of Cambridge University begin to work upon him. The loose stride is contracted; the swing of the vigorous shoulders is restrained, and, instead of an honest fellow tramping sturdily after his own fashion through the paths of literature, we are treated to an imitation of Dr. Johnson, done by an illiterate butcher's son. We are afraid that the Cantabs have been at the bottom of John Brown's fine writing. How valuable, for instance, are the following philosophical reflections upon Napoleon, which John Brown makes when he beholds the dethroned Emperor standing sadly upon the poop of the Bellerophon!

"Here, then," remarks John, "had ended his dream of universal conquest; here he lay prostrate at the foot of the altar," (we are informed a few lines before this that he had taken his stand on the poop,) "on which he sacrificed, not hecatombs, but pyramids, of human victims." (Beautiful antithesis!) "As his ambition was boundless, posterity will not weep at his fall. But that he insinuated himself into the hearts of a generous people is too true; they worshipped him as a demigod, until," etc. Farther on, we learn the startling intelligence, that "for a time his adopted country was enriched by the spoils and plunder of other lands." (Did Alison know this?) "He formed the bulk of the population into an organized banditti, and led them forth in martial pomp to do the unholy work of bloodshed and robbery. . . . All the independent states of Europe leagued together to put down this infamous system of national plunder." (Russia among the rest of the independent states, we suppose.) . . . "Had he been desirous of establishing just principles on earth, and crushing despotism, the sympathies of the entire human race would have been enlisted on his side." Certainly, John. Two and two make four, and things that are equal to the same are equal to each other.

After having in a street-fight pommelled an unhappy Cambridge student into jelly, and reduced him to a state which he picturesquely describes as resembling that of "a dog in a coal-box," he picks him up and philosophically informs him that "all the different styles of fence were invented and established for man's protection, not for his destruction. Besides," he adds, with much profundity, "the laws thereto ap-

pertaining are based on certain strict principles of honor, which you have unquestionably violated in this case. Now, take my advice, never again engage in fight without having some just cause of quarrel. Thus, at least, you will always come off with credit, if not with victory." And having delivered himself of this stupendous moral lesson, Dr. Samuel Johnson Mendoza John Brown puts on his hat (he surely ought to have had a full-bottomed wig under it) and walks off, leaving his opponent doubtless more like a dog in a coal-box than ever. He sees Dr. Abernethy, and rises into this inspired strain: "To me, who have ever held genius and talent in veneration, as being

'Olympus-high above all earthly things,'

the sight of this plain, unostentatious man afforded more pleasurable feelings than could all the gilded pomp beneath the sun." One can fancy, if John had communicated this reflection to the Doctor, what would have been the reply of that suave practitioner. He goes to low dance-houses, and the interesting result of his reflections on what he beheld there is, "that vice, however gilded over, is still a hideous monster; in which conviction, I resigned myself to that power that 'must delight in virtue.'" When he speaks of his billiard-pupils, he loftily denominates them "hundreds of the best gentlemen-players scattered over the earth's surface," from which we draw the pleasing inference that none of John Brown's scholars are addicted to subterranean billiards.

In spite of these rags of old college-gowns, in which John so funnily arrays himself on occasions, his book is worth reading. If it has not the muscular, unaffected morality of his namesake's unsurpassable "School-Days at Rugby," it is at least the production of an honest, hearty Englishman, and teaches an excellent lesson on the value of pluck and perseverance.

Colton's Illustrated Cabinet Atlas and Descriptive Geography. Maps by G. W. COLTON. Text by R. S. FISHER. New York: J. H. Colton & Co. 4to. pp. 400.

THIS work meets an acknowledged want; it combines in one convenient vol-

ume most of the desirable features of the larger atlases, being full enough in detail for all ordinary purposes, without being cumbersome and costly. It is prefaced by a clear and well-digested statement of the laws of Physical Geography, "based," as the publishers say, "upon the excellent treatise on the same subject found in the Atlas of Milner and Petermann, recently published in London." The maps are one hundred and sixteen in number, admirably engraved, and, what especially enhances their value, they are draughted on easily-convertible scales,—one inch always representing ten, twenty-five, fifty, one hundred, or other number of miles readily comparable. They include the results of the latest explorations of travellers, and the newest settlements made by the English and Americans.

The descriptions are full and accurate, and the statistics of population, trade, public and private institutions, etc., are convenient for reference. This department is illustrated by over six hundred wood-cuts.

This Atlas may, therefore, fairly claim rank as a Cyclopædia of Geography, and for the household and school it is one of the most useful publications of our time. The attention now everywhere excited by proposed or impending changes in the boundary-lines of European States, by the inroads of Western civilization in the East, by the settlement of the Pacific Islands, and by the growth of empire on the western coast of our own country, renders the publication of a compendious work like this very timely.

Poems. By OWEN MEREDITH. The Wanderer and Clytemnestra. Boston: Ticknor & Fields. 18mo.

THE author of these poems is Robert Bulwer Lytton, the son of the eminent novelist. Though still very young, he has reached the honor of being arrayed in Ticknor and Fields's "blue and gold," the paradisiacal condition of contemporary poets; and his works occupy, in words, though not in matter, as much space as Tennyson's. The volume includes all the poems which Lytton has published up to the present time. The general characteristics of his Muse are fluency, fancy, melody, and sensibility. The diligent reader

will detect, throughout the volume, the traces of the author's sympathy with other poets, especially Tennyson, and, amid all the opulence of expression and intensity of feeling, will be sensible of the lack of decided original genius and character. There is evidence of intellect and imagination, but they are at present tossed somewhat wildly about in a tumult of sensations and passions, and have not yet mastered their instruments. But the poems, as they are the product of a young man, so they possess all the attractions which allure young readers. It would not be surprising, if they obtained a popularity equal to those of Alexander Smith; for they give even more musical utterance to the loves, hopes, exultations, regrets, and despairs of youth, and indicate the same hot blood. They are also characterized by similar vagueness of thought and vividness of fancy, in those passages where sensibility turns theorist and philosophizes on its gratified or baffled sensations,—while they generally evince wider culture, larger superficial experience of life, a more controlling sense of the beautiful, and an equal facility of self-abandonment to the passion of the moment.

Leaving out those poems which are repetitions or imitations, a thin volume might be made containing some striking examples of original perception and original experience. Among these the charming little piece entitled "Madame La Marquise" would hold a prominent place. After making, however, all deductions from the pretensions of the volume, it may be said, that the father, at the same age, did not indicate so much talent as the son.

Symbols of the Capital; or Civilization in New York. By A. D. MAYO. 12mo.

THIS is a clear and forcibly written exposition of the tendencies of American society, as surveyed from the point of view of an earnest, practical, and dispassionate reformer. The essays on Town and Country Life, those on Education, Art, and Religion, the Forces of Free Labor, and the Gold Dollar, exhibit equal independence of thought and extent of information. In the essay on the Position of Woman in America, a difficult theme is discussed with candor and sagacity. We

have rarely seen a volume to which the conscientious adversaries of the reforms of the day could go for a more lucid statement of the opinions they oppose; and it is admirably calculated to effect the purpose the author had in view, namely, "to aid the young men and women of our land in their attempt to realize a character that shall justify our professions of republicanism, and to establish a civilization which, in becoming national, shall illustrate every principle of a pure Christianity."

The Avenger, a Narrative; and other Papers. By THOMAS DE QUINCEY, Author of "Confessions of an Opium-Eater," etc. Boston: Ticknor & Fields. 16mo.

THIS is the twenty-first volume of De Quincey's miscellaneous writings, collected by the indefatigable American editor, Mr. James T. Fields. It contains "The Avenger," a powerful story of wrong and revenge; "Additions to the Confessions of an Opium-Eater"; "Supplementary Note on the Essenes," in which the theory of the original paper is supported against objections by some new arguments; a long paper on "China," published in 1857, and full of information in regard to that empire; and "Traditions of the Rabbins," one of the most exquisite papers in the list of the author's writings.

The Life of George Herbert. By GEORGE L. DUYCKINCK. New York: 1858. pp. 197.

WE have too long neglected to do our share in bringing this delightful little book to the notice of the lovers of holy George Herbert, among whom we may safely reckon a large number of the readers of the "Atlantic." It is based on the life by Izaak Walton, but contains much new matter, either out of Walton's reach or beyond the range of his sympathy. Notices are given of Nicholas Ferrar and other friends of Herbert. There is a very agreeable sketch of Bemerton and its neighborhood, as it now is, and the neat illustrations are of the kind that really illustrate. The Brothers Duyckinck are well known for their unpretensions and valuable labors in the cause of good letters and American

literary history, and this is precisely such a book as we should expect from the taste, scholarship, and purity of mind which distinguish both of them. It is much the best account of Herbert with which we are acquainted.

Lectures on Metaphysics. By SIR WILLIAM HAMILTON, BART., Professor of Logic and Metaphysics in the University of Edinburgh. Edited by the Rev. Henry Longueville Mansel, B. D., Oxford, and John Veitch, M. A., Edinburgh. Boston: Gould & Lincoln. 8vo.

Few persons, with any pretensions to a knowledge of the metaphysicians of the century, are unacquainted with Sir William Hamilton. His articles in the "Edinburgh Review" on Cousin and Dr. Brown, and his Dissertations on Reid, are the most important contributions to philosophy made in Great Britain for many years. The present volume contains his Course of Lectures, forty-six in number, which he delivered as Professor of Metaphysics; and being intended for young students, they are, as compared with his other works, more comprehensible without being less comprehensive. The most conclusive proof of the excellence of these Lectures is to be found in their influence on the successive classes of students before whom they were pronounced. The universal testimony of the young men who were fortunate enough to listen to Hamilton has been, that his teaching not only inspired them with an enthusiasm for the science, and gave them clear ideas and accurate information, but directly aided them in the discipline of their minds. Some of his students became, later in life, champions of his system; others became its opponents; but opponents as well as champions warmly professed their obligations to their instructor, and dated their interest in philosophy from the period when they were brought by these Lectures within the contagious sphere of his powerful intellect. So numerous were these testimonials, that they gradually roused public curiosity to see and read what was so effective as spoken. That curiosity has now an opportunity of being gratified, and we do not doubt that these Lectures will have a greater popularity

than usually attends philosophical publications. The American publishers deserve thanks for the cheap, compact, and elegant form of their reprint.

We have no space to present here an exposition of Hamilton's system, or to discuss any of its leading principles. We can merely allude to some characteristics of his mode of thinking and writing which make his Lectures of especial value to those who propose to begin the study of metaphysics, or whose knowledge of the science is superficial. Hamilton has the immense advantage of being a scholar in that large sense which implies the exercise, not merely of attention and memory, but of every faculty of the mind, in the acquisition and arrangement of knowledge. His erudition is great, but it is also critical and interpretative. He knows intimately every philosophical writer from the dawn of speculation to the last German thinker, including the somewhat neglected Schoolmen of the Middle Ages; and in this volume, every important question that arises is historically as well as analytically treated, and the names are given of the thinkers on both sides. In the course of one or two sentences, he often places the reader in a position to view a principle, not only in itself, but in relation to the controversies which have raged round it for two thousand years. Hamilton's erudition is also displayed in the quotations with which his pages are sprinkled, — fragrant sentences, which came originally from the imagination or character of the writers he quotes, and which relieve his own abstract propositions and reasonings with concrete beauty or truth. Most of these quotations will be novel even to advanced students.

Hamilton is also admirable in statement. Confusion, vacillation, obscurity, uncertainty, are as foreign to his style as to his mind. He is almost rigid in his precision. Every word has its meaning, and every idea its stern, sure, decisive statement. His masterly powers of analysis, of reasoning, of generalization, are always adequately exhibited by a corresponding mastery of expression. The study of such a volume as the present is itself an education in statement and logic; and that it will be studied by thousands, in the colleges and out of the colleges of the country, we cannot but hope.

Allibone's Dictionary of Authors. Philadelphia : Childs & Peterson, 1858. Vol. I. pp. 1005.

LEIGH HUNT, in one of his Essays, speaks of the wishful thrill with which, in looking over an index, he wondered if ever his name would appear under the letter H in the reversed order (Hunt, Leigh) peculiar to that useful and too much neglected field of literary achievement. In Mr. Allibone's Dictionary he would see his wish more than satisfied; for if he turn up "Hunt, Leigh," he will find a reference to "Hunt, James Henry Leigh," and under that head a list of his works, more complete, perhaps, than he himself could easily have drawn up.

In glancing along the leaves of a collection like this, one's heart is touched with something of the same vague pathos that dims the eye in a graveyard. What a necrology of notability! How many a controversialist who made a great stir in his day, how many a once rising genius, how many a withering satirist, lies here shrunk all away to the tombstone immortality of a name and date! Think of the aspirations, the dreams, the hopes, the toil, the confidence (of himself and wife) in an impartial and generous posterity;—and then read "Smith J. (ohn ?) 1713-1784 (?). The Vision of Immortality, an Epic Poem in Twelve Books, 1740, 4to. See Lowndes." The time of his own death less certain than that of his poem, which we may fix pretty safely in 1740,—and the only posterity that took any interest in him the indefatigable Lowndes! Well, even a bibliographic indemnity for contemporary neglect, to have so much as your title-page read after it is a century old, and to enjoy a posthumous public of one, is better than nothing.

A volume like Mr. Allibone's—so largely a hospital for incurable forgottenhoods—is better than any course of philosophy to the young author. Let him reckon how many of the ten thousand or so names here recorded he has ever heard of before, let him make this myriad the denominator of a fraction to which the dozen perennial fames shall be the numerator, and he will find that his dividend of a chance at escaping speedy extinction is not worth making himself unhappy about. Should some statistician make such a book the basis for con-

structing the tables of a fame-insurance company, the rates at which alone policies could be safely issued would put them beyond the reach of all except those who did not need them. After all, perhaps, the next best thing to being famous or infamous is to be utterly forgotten; for that, at least, is to accomplish a decisive result by living. To hang on the perilous edge of immortality by the nails, liable at any moment to drop into the waters of Oblivion, is at best a questionable beatitude.

But if a dictionary of this kind give rise to some melancholy reflections, it is not without suggestions of a more soothing character. We are reminded by it of the tender-heartedness of Chaucer, who, in the "House of Fame," after speaking of Orpheus and Arion, (Mr. Tyrwhitt calls him Orion,) and Cheiron and Glasgerion, has a kind word for the lesser minstrels that play on pipes made of straw,—

"Such as have the little herd-groomes
That keepen beastes in the broomes."

This is the true Valhalla of Mediocrity, the *libro d' oro* of the *onymi-anonymi*, of the never-named authors who exist only in name,—Parson Adams would be here, had he found a printer for his sermons, Mr. Primrose for his tracts on Monogamy,—and not merely such *nominum umbræ* of the past, but that still stranger class of ancient-moderns, preterite-presents, dead (and something more) as authors, but still to be met with in the flesh as solid men and brethren,—privileged, alas, to outstay cockcrow when they drop in of an evening to give you their views on the aims and tendencies of periodical literature. Will it be nothing, if we should be untimely snatched away from our present sphere of usefulness, to those shadowy *παιδιες* who lived too soon to enjoy their monthly dip in the ATLANTIC,—will it be nothing, we say, that our orphaned Papyrorcetes, junior, will be able to read the name of his lamented parent on the nine-hundredth page of Allibone,—occupying, at least, an entire line, and therefore (as we gather from a hasty calculation) sure forever of *ἄσφατος* the attention of whoever reads the book through? This is a handy and inexpensive substitute for the *imagines* of the Roman nobles; for those were inconvenient to pack on a change of lodgings, liable to melt in warm

weather,—even the elder Brutus himself might soften in August,—and not readily salable, unless to a *novus homo* who wished to buy a set of ancestors ready-made, as some of our enthusiastic genealogists are said to order a family-tree from the heraldic nursery-man skilled to graft a slip of Scroggins on a stock of De Vere or Montmorenci. Contemporary glory is comparatively dear; it is sold by the column,—for columns have got over their Horatian antipathies; but the bibliographer will thank you for the name of any man that has ever printed a book, nay, his gratitude will glow in exact proportion to the obscurity of the author, and one may thus confer perpetuity at least (which is a kind of Tithonus-immortality) upon some respected progenitor, or assure it to himself, with little trouble and at the cost of a postage-stamp.

The benignity of Providence is nowhere more strongly marked than in its compensations; and what can be more beautiful than the arrangement by which the same harmless disinterestedness of matter and style that once made an author the favorite of trunk-makers and grocers should, by thus leading to the quiet absorption of his works, make them sure of commemoration by Brunet or Lowndes and of commanding famine-prices under the hammer? Fame, like electricity, is thus positive and negative; and if a writer must be Somebody to make himself of permanent interest to the world at large, he must not less be Nobody—like Junius—to have his namelessness embalmed by Mons. Guérard. Take comfort, therefore, all ye who either make paper invaluable or worthless by the addition of your autograph! for your dice (as the Abbé Galiani said of Nature's) are always loaded, and you may make your book the heir of Memory in two ways,—by contriving to get the fire of genius into it, or to get it into the fire by the hands of the hangman. Milton's "Areopagitica" is an example of one method, and the "Philostratus" of Blount (who pillaged the "Areopagitica") of the other. And yet, again, how perverse is human nature! how more perverse is literary taste! There is a large class of men madly desirous to read cuneiform and runic inscriptions simply because of their unreadableness, adding to our compulsory stock of knowledge about the roy-

al Smiths and Joneses of to-day much conjectural and conflicting information concerning their royal prototypes of an antiquity unknown, and, as we fondly hoped, unknowable. Were there only a compensatory arrangement for this also in another class who should be driven by a like irresistible instinct to unreadable books, the heart of the political economist would be gladdened at seeing the substantial rewards of authorship so much more equally distributed by means of a demand adapted to the always abundant supply.

We should like Mr. Allibone's book better, if it were more exclusively a dictionary of names, facts, editions, and dates, and allowed less space (or none at all) to opinions. The contemporaneous judgments of individual critics upon writers of original power are commonly of little value, and are absolutely worthless when an author's fame has struck its roots down into the kindly soil of national or European appreciation, when his work has won that "perfect witness of all-judging Jove" which cannot be begged or bought. When the criticism is anonymous, (as are many of those cited by Mr. Allibone,) it has not even the reflected interest, as a measure of the critic himself, which we find sometimes in the incapacity of a strong nature to appreciate a great one, as in Johnson's opinion of Milton, for instance,—or of a delicate mind to comprehend an imaginative one, as in Addison's of Bunyan. In the article "Carlyle," for example, (by the way, John A. Carlyle is omitted,) we should have been better content, if Mr. Allibone (instead of letting us know what "Blackwood's Magazine" thinks of a writer who, whatever his faults of style, has probably influenced the thought of his generation more than any other man) had given us the date of the first publication of "Cromwell's Letters and Speeches," and had mentioned that the original collection of the "Miscellanies" was made in America. (This last we have since found alluded to under "De Quincey.") Sometimes the editor himself intrudes remarks which are quite out of keeping with the character of such a work. We will give an instance which caught our eye in turning over the leaves. After giving the title of "The Rare Trauailles" of Job Hlorstop, Mr. Allibone adds, "We trust that in

the home-relation of his 'Rare Trauails among wilde and sauage people' the *raconteur* did not yield to the temptation of 'pulling the long bow,' for the purpose of increasing the amazement of his wondering auditors." Now if Mr. Allibone knew nothing about Hortop, he should have said nothing. If the édition of 1591 was inaccessible to him, he could have found out what kind of a story-teller our ancient mariner was in the third volume of Hakluyt. We resent this slur upon Job the more because he happens to be a favorite of ours, and saw no more wonders than travellers of that day had the happy gift of seeing. We remember he got sight of a very fine merman in the neighborhood of the Bermudas; but then stout Sir John Hawkins was as lucky.

The two criticisms we have made touch, one of them the plan of the work, and the other its manner. We have one more to make, which, perhaps, should properly have come under the former of these two heads;—it is that Mr. Allibone allows a disproportionate space to the smaller celebrities of the day in comparison with those of the past. In such an undertaking, the amount of interest which the general public may be supposed to take in comparatively local notabilities should, it seems to us, be measured on a scale whose degrees are generations.

Mr. Allibone's good-nature has misled him in some cases to the allowance of manifest disproportions. Twice as much room, for instance, is allowed to Mr. Dallas as to Emerson. Mr. Dallas has been Vice-President of the United States; Emerson is one of the few masters of the English tongue, and both by teaching and practical example has done more to make the life of the scholar beautiful, and the career of the man of letters a reproof to all low aims and an inspiration to all high ones, than any other man in America.

What we have said has been predicated upon the general impression left on our minds after dipping into the book here and there almost at random. But on opening it again, we find so much that is interesting, even in those articles which are most expansive and gossiping, that we are almost inclined to draw our pen through what we have written in the way of objection, and merely express our gratitude to Mr. Allibone for what he has done. We

have been led to speak of what we consider the defects, or rather the redundancies, of the "Dictionary," because we believe, that, if less bulky, it would be more certain of the wide distribution it so highly deserves. It is a shrewd saying of Vauvenargues, that it is "*un grand signe de médiocrité de louer toujours modérément,*" and we have no desire to expose the "Atlantic" to a charge so fatal by showing ourselves cold to the uncommon merits of Mr. Allibone's achievement. The book is rather entitled to be called an Encyclopædia than a Dictionary. As the work of a single man, it is one of the wonders of literary industry. The amount of labor implied in it is enormous, and its general accuracy, considering the immense number and variety of particulars, remarkable. A kindly and impartial spirit makes itself felt everywhere,—by no means an easy or inconsiderable merit. We have already had occasion several times to test its practical value by use, and can recommend it from actual experiment. Every man who ever owned an English book, or ever means to own one, will find something here to his purpose.

That a volume so comprehensive in its scope and so multitudinous in its details should be wholly without errors and omissions is impossible; and we trust that any of our readers who detect such will discharge a part of the obligation they are under to Mr. Allibone by communicating them to him for the benefit of a second edition.

1. *Trübner's Bibliographical Guide to American Literature.* London: TRÜBNER & Co. 1859. pp. cxlix., 554. 8vo.
2. *Index to the Catalogue of a Portion of the Public Library of the City of Boston.* 1858. pp. 204.

NEXT to knowledge itself, perhaps the best thing is to know where to find it. To make an index that shall combine completeness, succinctness, and clearness,—how much intelligence this demands is proved by the number of failures. Mr. Trübner's volume contains, 1st, some valuable bibliographical prolegomena by the editor himself; 2d, an historical sketch of American literature, which is not very well done by Mr. Moran, and would have

been admirably done by Mr. Duyckinck; 3d, a full and very interesting account of American libraries by Mr. Edwards; and 4th, a classed list of books written and published in the United States during the last forty years, arranged in thirty-one appropriate departments, with a supplementary thirty-second of *Addenda*. In some instances,—as in giving tables of the proceedings of learned societies,—the period embraced is nearly a century. A general alphabetical index completes the volume. The several heads are, Bibliography, Collections, Theology, Jurisprudence, Medicine and Surgery, Natural History (in five subdivisions), Chemistry and Pharmacy, Natural Philosophy, Mathematics and Astronomy, Philosophy, Education (in three subdivisions), Modern Languages, Philology, American Antiquities, Indians and Languages, History (in three subdivisions), Geography, Useful Arts, Military Science, Naval Science, Rural and Domestic Economy, Politics, Commerce, Belles Lettres, Fine Arts, Music, Freemasonry, Mormonism, Spiritualism, Guide Books, Maps and Atlases, Periodicals. This list is enough to show the great value of the "Guide" to students and collectors. The volume will serve to give both Americans and Europeans a juster notion of the range and tendency, as well as amount, of literary activity in the United States. As the work of a cultivated and intelligent foreigner, it has all the more claim to our acknowledgment, and also to our indulgence where we discover omissions or inaccuracies.

The second volume whose title stands at the head of our article would demand no special notice from us, were it not for the admirable manner in which it is executed and the judgment evinced in the selection of the books which it catalogues. The Boston Library may well be congratulated on having at its head a gentleman so experienced and competent as Professor Jewett. He has hitherto distinguished himself in a department of literature in which little notoriety is to be won, his labors in which, however, are appreciated by the few whose quiet suffrage outvalues the noisy applause of the moment. His little work on the "Construction of Library Catalogues" is a truly valuable contribution to letters, rendering, as it does, the work of classification more easy, and in-

creasing the chances of our getting good general directories to the books already in our libraries, without which the number of volumes we gather is only an increase of incumbrance. It is a great detriment to sound and exhaustive scholarship, that the books for students to read should be left to chance; and we owe a great deal more than we are apt to acknowledge to men who, like Mr. Jewett, enable us to find out the books that will really help us. Dr. Johnson, to be sure, commends the habit of "browsing" in libraries; and this will do very well for those whose memory clinches, like the tentacula of zoöphytes, around every particle of nourishment that comes within its reach. But the habit tends rather to make ready talkers than thorough scholars; and he who is left to his chances in a collection of books grasps like a child in the "grab-bag" at a fair, and gets, in nine cases out of ten, precisely what he does not want.

We think that a great mistake is made in the multiplying of libraries in the same neighborhood, unless for some specialty, such as Natural History or the like. It is sad to think of the money thus wasted in duplicates and triplicates. Rivalry in such cases is detrimental rather than advantageous to the interests of scholarship. Instead of one good library, we get three poor ones; and so, instead of twenty men of real learning, we are vexed with a score of sciolists, who are so through no fault of their own. We hope that the movement now on foot, to give something like adequacy to the University Library at Cambridge, will receive the aid it deserves, not only from graduates of the College, but from all persons interested in the literary advancement of the country. So there be one really good library in the United States, it matters little where it is, for students will find it,—and they should at least be spared the necessity of going abroad in order to master any branch of learning.

A great library is of incalculable benefit to any community. It saves infinite waste of time to the thinker by enabling him to know what has already been thought. It is of greater advantage (and that advantage is of a higher kind) than any seminary of learning, for it supplies the climate and atmosphere, without which good seed is sown in vain. It is not merely that books are the "precious life-blood of master-spir-

its," and to be prized for what they contain, but they are still more useful for what they prevent. The more a man knows, the less will he be apt to think he knows, the less rash will he be in conclusion, and the less hasty in utterance. It is of great consequence to the minds of most men how they *begin* to think, and many an intellect has been lamed irretrievably for steady and lofty flight by toppling out into the helpless void of opinion with wings yet callow. The gross and carnal hallucinations of what is called "Spiritualism"—the weakest-kneed of all whimsies that have come upon the parish from the days of the augurs down to our own—would be disenchanting at once in a neighborhood familiar with Del Rio, Wierus, Bodin, Scot, Glanvil, Webster, Casaubon, and the Mathers. Good books are the enemies of delusion, the most effectual extinguishers of self-conceit. Impersonal, dispassionate, self-possessed, they reason without temper, and remain forever of the same mind without obstinacy.

The man who has the freedom of a great library lengthens his own life without the weariness of living; he may include all past generations in his experience without risk of senility; not yet fifty, he may have made himself the contemporary of "the world's gray fathers"; and with no advantages of birth or person, he may have been admitted to the selectest society of all times and lands.

We live in the hope of seeing, if not a great library somewhere on this continent, at least the foundations of such a one, laid broad enough and deep enough to change hope into a not too remote certainty. Hitherto America has erected but one statue in commemoration of a scholar, and we cannot help wishing that the money that has been wasted in setting up in effigy one or two departed celebrities we could mention had been appropriated to a means of culture which, perhaps more than any other, would be likely to give us men worthy of bronze or marble, but above the necessity of them for memory.

RECENT AMERICAN PUBLICATIONS.

The Poetical Works of William Motherwell; with a Memoir of his Life. Fourth Edition, greatly Enlarged. Boston. Ticknor & Fields. 32mo. pp. 308. 75 cts.

The Avenger, a Narrative; and other Papers. By Thomas De Quincey. Boston. Ticknor & Fields. 16mo. pp. 327. 75 cts.

Life of William Pitt. By Lord Macaulay. Preceded by the Life of the Earl of Chatham. New York. Delisser & Proctor. 32mo. pp. 227. 50 cts.

Shakspeare's Legal Acquirements Considered. By John Lord Campbell, LL. D., F. R. S. E. In a Letter to J. Payne Collier, Esq., F. S. A. New York. D. Appleton & Co. 12mo. pp. 146. 75 cts.

The Pillar of Fire; or, Israel in Bondage. By Rev. J. H. Ingraham, Author of "The Prince of the House of David." New York. Putney & Russell. 12mo. pp. 600. \$1.25.

The Life of North American Insects. By B. Jaeger, Assisted by H. E. Preston, M. D. With Numerous Illustrations from Specimens in the Cabinet of the Author. New York. Harper & Brothers. 12mo. pp. 319. \$1.25.

Life of Frederick the Great. By Macaulay. New York. Delisser & Proctor. 32mo. pp. 277. 50 cts.

Lectures on Metaphysics and Logic. By Sir William Hamilton, Bart. Edited by the Rev. Henry Longueville Mansel, B. D., Oxford, and John Veitch, M. A., Edinburgh. 2 vols. Vol. I. Metaphysics. Boston. Gould & Lincoln. 8vo. pp. 718. \$3.00.

India and the Indian Mutiny. Comprising the Complete History of Hindostan, from the Earliest Times to the Present Day; with Full Particulars of the Recent Mutiny in India. By Henry Frederick Malcolm. Illustrated with Numerous Engravings. Philadelphia. J. W. Bradley. 12mo. pp. 426. \$1.25.

Frank Elliott; or, Walks in the Desert. By James Challen. Philadelphia. J. Challen & Son. 12mo. pp. 349. \$1.00.

Border War. A Tale of Disunion. By J. B. Jones, Author of "Wild Western Scenes." New York. Rudd & Carleton. 12mo. pp. 502. \$1.25.

Mothers and Infants, Nurses and Nursing. A Translation from the French of a Treatise

on Nursing, Weaning, and the General Treatment of Young Children. By Dr. A. L. Donné. Boston. Phillips, Sampson, & Co. 12mo. pp. 303. \$1.00.

Poems and Ballads of Goethe. Translated by W. Edmonstoune Aytoun, D. C. L., and Theodore Martin. New York. Delisser & Proctor. 12mo. pp. 240. 75 cts.

On the Probable Fall of the Value of Gold; the Commercial and Social Consequences which may Ensue, and the Measures which it Invites. By Michel Chevalier. Translated from the French, with a Preface by Richard Cobden, Esq. New York. D. Appleton & Co. 12mo. pp. 217. \$1.25.

A Treatise on Theism and on the Modern Skeptical Theories. By Francis Wheaton. Philadelphia. J. B. Lippincott & Co. 12mo. pp. 395. \$1.25.

The Precious Stones of the Heavenly Foundation; with Illustrations Selected in Prose and Verse. By Augusta Browne Garrett. New York. Sheldon & Co. 12mo. pp. 328. \$1.00.

The Convalescent. By N. Parker Willis. New York. Charles Scribner. 12mo. pp. 456. \$1.25.

Plan of the Creation; or, Other Worlds, and who Inhabit them. By Rev. C. L. Hequem-bourg. Boston. Phillips, Sampson, & Co. 12mo. pp. 391. \$1.25.

Five Essays. By John Kearsley Mitchell, M. D. Edited by S. Weir Mitchell, M. D. Philadelphia. J. B. Lippincott & Co. 12mo. pp. 371. \$1.25.

Hope Marshall; or, Government and its Offices. By William N. O. Lasselle. Washington. H. Lasselle. 12mo. pp. 326. \$1.00.

Sermons Preached and Revised by the Rev. C. H. Spurgeon. Fifth Series. New York. Sheldon & Co. 12mo. pp. 454. \$1.00.

Hours with my Pupils; or, Educational Addresses, etc. The Young Lady's Guide and Parents' and Teachers' Assistant. By Mrs. Lincoln Phelps. New York. C. Scribner. 12mo. \$1.25.

"Love me Little, Love me Long." By Charles Reade. New York. Harper & Brothers. 12mo. pp. 435. 75 cts.

The Christian Law of Amusement. By James Leonard Corning, Pastor of the Westminster Presbyterian Church. Buffalo, N. Y. Phinney & Co. 16mo. pp. 162. 50 cts.

Scenes and Adventures in the Army; or, Romance of Military Life. By P. St. G. Cooke, Colonel Second Dragoons, U. S. A. Philadelphia. Lindsay & Blakiston. 12mo. pp. 432. \$1.00.

Infant Salvation in its Relation to Infant Depravity, Infant Regeneration, and Infant

Baptism. By J. H. Bomberger. Philadelphia. Lindsay & Blakiston. 16mo. pp. 192. 50 cts.

Popular Geology. A Series of Lectures read before the Philosophical Institution of Edinburgh; with Descriptive Sketches from a Geologist's Portfolio. By Hugh Miller. With an Introductory *Résumé* of the Progress of Geological Science within the last Two Years, by Mrs. Miller. Boston. Gould & Lincoln. 12mo. pp. 423. \$1.25.

Poems of Owen Meredith. The Wanderer and Clytemnestra. Boston. Ticknor & Fields. 32mo. pp. 514. 75 cts.

Memoir of Theophilus Parsons, Chief Justice of the Supreme Judicial Court of Massachusetts; with Notices of Some of his Contemporaries. By his Son, Theophilus Parsons. Boston. Ticknor & Fields. 12mo. pp. 476. \$1.50.

The Life of James Watt; with Selections from his Correspondence. By James Patrick Muirhead, M. A. Illustrated with Wood-Cuts. New York. D. Appleton & Co. 12mo. pp. 424. \$1.25.

The Spy. A Tale of the Neutral Ground. By J. Fenimore Cooper. Illustrated from Drawings by F. O. C. Darley. New York. W. A. Townsend & Co. crown 8vo. pp. 463. \$1.50.

Internal Relations of the Cities, Towns, Villages, Counties, and States of the Union; or, the Municipalist. A highly Useful Book for Voters, Tax-Payers, Statesmen, Politicians, and Families. Second Edition. New York. Ross & Tousey, etc., and Wm. Radde. 12mo. pp. 302. \$1.00.

Farm Drainage. The Principles, Processes, and Effects of Draining Land, etc., etc. Including Tables of Rain-Fall, etc., and more than One Hundred Illustrations. By Henry F. French. New York. A. O. Moore & Co. 12mo. pp. 381. \$1.00.

The Jealous Husband. A Story of the Heart. By Annette Marie Maillard. Philadelphia. T. B. Peterson & Brothers. 12mo. pp. 375. \$1.25.

A Practical Treatise on the Hive and Honey-Bee. By L. L. Langstroth. With an Introduction by Rev. Robert Baird, D. D. Third Edition. Revised, with Illustrations. New York. A. O. Moore & Co. 12mo. pp. 405. \$1.25.

From Wall Street to Cashmere. A Journal of Five Years in Asia, Africa, and Europe; comprising Visits, during 1851-2-3-4-5-6, to the Danemona Iron-Mines, etc., etc. By John B. Ireland. With nearly One Hundred Illustrations from Sketches made on the Spot, by the Author. New York. S. A. Roll. 8vo. pp. 526. \$3.50.
